Asheville's Triple Bottom Line: (1) People—Improve public health by investing in clean energy technologies that reduce pollution from fossil fuel power plants and create new jobs in the green economy; (2) Planet—Make Asheville a national leader in improving the environmental performance of our homes and businesses; and (3) Profits—Put professionals in the construction trades back to work and save families and businesses in Asheville money by reducing their utility costs.

Using a chart, he showed the cost comparison of electricity technologies of energy efficiency, solar water heating, landfill gas, pulverized coal, wind, nuclear and solid waste methane.

Progress Energy requests significant rate increases. From WRAL.COM posted Jun 6, 2008. Raleigh, N.C. — Citing the need to cover the soaring cost of fuel for power plants, Progress Energy has asked the state to approve a 16.2 percent rate increase. The Raleigh-based utility filed a petition Friday with the North Carolina Utilities Commission to increase rates by about $424 million. If approved, the increase would raise the average monthly bill to $112.57 from the current $98.86. The Utilities Commission will likely have a public hearing on the request in the fall. If approved, it would take effect Dec. 1.

The program design concept: (1) Partnership between the City of Asheville and property owners who want to invest in energy efficiency improvements on their homes or places of business; (2) City issues bonds or other financing instrument to create Asheville Energy Independence Fund; (3) Property owners access funds ($5,000- $20,000 for residential) to finance energy efficiency improvements; (4) Repayment through 10-15 year special assessment on property tax bill; (5) Program should be revenue-neutral (or better) for government, taxpayers and participating families and businesses; (6) Participation by property owners is voluntary; (7) Only property owners who participate pay the assessment; (8) Assessment revenues should be sufficient to repay principal and interest on municipal debt as well as administrative costs for managing the program; and (9) Energy savings should be equal to or greater than costs for paying the special assessment.

Energy efficiency technologies that have less than a 10-year payback:

Technology	ROI	Typical Payback Period
LowFlow Showerheads	100- 200%	1 year or less
Sealing ductwork	50- 100%	1- 2 years
Weather-stripping	35- 40%	2- 3 years
Programmable thermostat	50-75%	2-3 years
Attic insulation	15- 25%	4 - 6 years
CFLs	50-75%	2-3 years
LEDs	10- 15%	6- 10 years
Motion-sensors	25- 50%	2- 4 years
Solar thermal systems	10- 20%	5- 10 years
HVAC upgrade	10- 20%	5- 10 years
Geothermal	8- 15%	7- 12 years

Process for property owners to participate: (1) Interested property owners fill out an application; (2) Energy audit performed to identify opportunities for cost-effective energy efficiency measures; (3) Property owner applies for funding and receives approval; and (4) Energy improvements for the home/business are installed.

Benefits for homeowners and business owners: (1) Eliminates upfront cost of energy project; (2) Special assessment transfers with property ownership; (3) Fixed repayment rate for 10- 15 years; and (4) Reduction in annual utility expenses should be larger than cost of assessments.

Opportunities for Job Creation:

Oct. 2008 -- 176,600 jobs in Buncombe County
Oct. 2009 -- 168,400 jobs in Buncombe County
Net loss -- 8,200 jobs

Construction
Oct. 2008 – 10,800 jobs in Buncombe County
Oct. 2009 – 9,100 jobs in Buncombe County
Net loss -- 1,700 jobs – 15.7% decline

- Based on projections from Sonoma County economic analysis, investment of $50 million in energy efficiency initiative will generate 563 new jobs. 382 of the jobs would be in construction trades. The initiative would create enough jobs to re-employ 22% of the positions lost in the construction sector during the recession.

- Investment of $50 million in the PACE model was also projected to generate $3.3 million in additional state and local tax revenues. The new tax revenues are primarily through

increased sales taxes (ex. purchase of equipment and materials from home improvement retailers) and income taxes as people return to work and begin paying taxes again.

Benefits for City of Asheville: (1) Improvement to Asheville's older housing stock and commercial facilities; (2) Pressure to construct additional power plants, which require utility rate increases, is reduced; (3) Program is essentially self-funding; (4) No liability to General Fund. City should charge enough interest to cover debt repayment and administrative costs; and (5) Strengthen Asheville's position as a leader for developing clean energy and green jobs.

Advantages of Assessment vs. Loan: (1) Assessment runs with property rather than individual. People defer energy investments because they do now know how long they will live in their home; (2) Provides City with strong security interest to assure repayment; and (3) Simple, low-cost method of collecting funds.

Case Study: The Jones Family: (1) After energy audit, the Jones family applies for and receives $10,000 from Energy Independence Fund. Installs solar thermal system ($6,500) attic, insulation ($700), energy efficient windows ($2,400) and more efficient lighting ($400). Total investment = $10,000; (2) Homeowner receives several credits and rebates, total = $4,895 (a) Solar tax credits ($1,950 federal+$1,400 NC) = $3,350 total; (b) Energy efficiency tax credit (for building envelope– windows and insulation)- $930; and (c) Progress Energy rebate for windows ($240) and insulation ($375) -- $615; (3) Homeowner repays $10,000 over a 15 year period at 6.25% interest = $85 per month/ $1020 per year; (4) In year one, homeowner reduces energy costs by $700 (assumes annual energy costs are $2000 and achieves 35% reduction; (5) Over 15 years, home owner receives $18,912 in energy benefits and tax credits (assumes 4% annual increase in cost of electricity/ natural gas); (6) Over 15 years, homeowner pays $15,420 to repay special assessment taxes, for a net benefit to homeowner of $3,492; and (7) After year 15, homeowner continues to have lower energy payments but no longer makes any special assessment payments.

Environmental benefits: (1) Retrofitting 1,000 homes like the Jones' would reduce electricity use by 3,850,000 kWh per year and reduce natural gas use by 231,000 Therms; and (2) Carbon reduction equivalent of taking 1,000 cars off the road or planting 40 acres of trees. (Assumes each home uses 1,100 kWh per year of electricity and 660 Therms of natural gas and that each are reduced by 35%)

Start Small – Think Big: (1) Recommend launching Asheville Energy Independence with a pilot program. Monitor and evaluate results; (2) If successful, scale-up the program in 2011-2012; and (3) If want to make a real impact on carbon footprint, peak power demand and job creation, we need to invest $50 million or more in Asheville Energy Independence over the next three to five years (a) 2000 homes at $15,000 each = $30 million; and (b) 500 business at $40,000 each = $20 million.

Resources for further information include: (1) www.progress-energy.com/custservice/carres/efficiency/programs/heip/index.asp; and (2) www.pacenow.org.

Vice-Mayor Newman also presented Council with the Sonoma County Energy Independence Program: Employment and Economic Impact Analysis and Estimation. This is an analysis of the potential for this type of initiative to create jobs.

Vice-Mayor Newman's proposal for consideration is to (1) Request for City Council to approve Asheville Energy Independence Initiative in principal; (2) Direct City Manager to develop a pilot program to be implemented in 2010. Ideally, project can progress enough so that some work can be completed this calendar year to take advantage of strong national incentives for energy efficiency investments; (3) Work with staff and Sustainable Advisory Committee on Energy & the Environment (SACEE) to flesh out program details; (4) Explore whether Buncombe

County may be interested in partnering in the program; and (5) Evaluate results of pilot program prior to extending or expanding the project.

The following individuals spoke in support of the Asheville Energy Independence Initiative:

President and Co-Owner of Asheville Geothermal
Representative of 1600 Members of the Sierra Group
Ms. Grace Curry, Asheville resident and member of local Sierra Club
Chair of the Board of Directors of the Blue Ridge Sustainability Institute and a Senior Advisor to the Institute
Ms. Michelle Smith, Asheville homeowner
Member of Build Smart Alliance, employee of Sundance Power Systems and Local Renewable Energy and Asheville resident
Building Scientist/Energy Auditor and Greenbuilding Consultant
Board Member of Green Building Council
Employee of the N.C. Dept. of Commerce in Sustainable Economies and Asheville Resident
Representative of Biltmore Farms
Representative of Green Opportunities
Buncombe County Commissioner Holly Jones

Councilman Smith said that what this program will do is create the conditions for a truly green economy in Asheville and in western North Carolina. As the County and the surrounding areas mimic our success it will be our local businesses that are strong enough and well positioned to meet those needs as they begin to implement this same program. This will have a ripple effect for years to come for our local businesses. In tandem with our high tech earth science corridor and the other green infrastructure we hope to implement in the future, Asheville is going to be a national leader in this green economy. The job growth is only the beginning for us. This project is the beginning of something that is very crucial to our economic future.

Councilman Russell explained that we will definitely need some additional funding sources because we have a lot of other programs, debt service, and master plans to be funded. However, anything that could potentially work, be revenue neutral to the City and create this type of outcome is exciting.

Councilwoman Manheimer is supportive of the concept if staff putting together a plan that Council can review to see if it is possible to implement this program and she is supportive of the goal. She would need to understand the difference of how would the financing work, e.g., why wouldn't people get a home equity line; and, what kind of protection is the City afforded if someone were to default on repayment. Those are the type of questions that Council will to discuss to ensure that we are protecting our City's finances and our citizens who rely on the City maintaining a strong financial position. However, she felt this recession is calling on a new day for private/public partnerships that create jobs and create a new economic outlook.

Councilman Davis felt this is an exciting initiative, but he is cautious as well. He is supportive of the program, but he felt the details of the program will require a lot of staff time to research.

Councilman Bothwell was supportive of this initiative and noted that the houses that are most in need are usually the ones in worse shape and are the older homes that are more likely to be low income houses. Although the intent is not particularly an affordable housing issue, this would address it in some ways. He felt positive that we will find models for this because towns as small as 1,600 people have working models.

Mayor Bellamy wanted to be clear that staff will be doing research on this concept only and felt this should be a key agenda item for the Finance Commission to look at on an on-going basis. She could not, however, support investing $50 Million at this time because Council must look at all the capital needs of the City. Council heard at their retreat that the capital needs of the City is $270 Million and that doesn't include a performing arts center and other projects that the community wants Council to support. She did support staff researching this concept. She questioned if the $250,000 from the Department of Energy for the competitive grant for community projects process might be available, and perhaps some money from the Community Development Block Grant funds. Keeping our limited budget in mind, Council has been asked to clean up downtown, expand greenways implement different master plans and support a lot more issues that impact our City. She felt that in the future we need to look at a true bond program (not just for energy efficiency) because there are a lot of needs in our community. As we go forward with this concept, as it comes back to Council, the community needs to understand that this will be a pilot program. The pilot program must be successful and we need to make sure we are good stewards of the City's tax dollars. She asked that Council, in the future, hear from Mountain Housing Opportunities on their rural rehabilitation program is a model for review.

Councilman Bothwell moved to (1) Approve the Asheville Energy Independence Initiative in principle; (2) Direct City Manager to develop a pilot program to be implemented in 2010. Ideally, project can progress enough so that some work can be completed this calendar year to take advantage of strong national incentives for energy efficiency investments; (3) Work with staff and SACEE to flesh out program details; (4) Explore whether Buncombe County may be interested in partnering in the program; and (5) Evaluate results of pilot program prior to extending or expanding the project. This motion was seconded by Councilwoman Manheimer and carried unanimously.

C. SIX-MONTH REVIEW OF THE ROADSIDE SOLICITATION POLICY

Police Chief Bill Hogan said that City Council established a policy for granting approval of roadside solicitation requests on May 12, 2009, and resolved to review this policy 6 months after its implementation.

Asheville City Council established a policy for granting approval of roadside solicitation requests on May 12, 2009 (Resolution 09-87) in accordance with N.C.G.S. 20-175 which authorized roadside solicitation under certain circumstances. Since the adoption of this policy, the City of Asheville has received two requests for roadside solicitation. These requests were from the Asheville Firefighter's Association (AFFA) for Fill the Boot events in conjunction with the Muscular Dystrophy Association (MDA). These events were held in May and September of 2009. There were no safety issues or problems identified by the Asheville Police Department during these events.

The Public Safety Committee reviewed this update on November 17, 2009, and agreed to make no changes to the current policy.

Regarding City Council's Strategic Operating Plan, by adopting a policy to address roadside solicitation requests under G.S. 20-175, this resolution assisted in making Asheville a safer city based upon metrics of similarly sized cities, by establishing due process to address the safety of this activity.

Pro:

- By continuing a process to address the safety of this activity, approved roadside solicitation will continue to be conducted with reduced risks to solicitors and the motoring public.

Cons:

- There has not been an increase in the first 6 months of this policy; however, Council may see an increase in requests for roadside solicitation from a variety of organizations in the future.
- Standing in the roadway, even with a vest, is an inherently dangerous activity.

City staff recommends that City Council continue the roadside solicitation policy currently in place.

- In order to increase the safety of those participating in roadside solicitation, staff would like to suggest the City require advanced signage that warns motorists that a solicitation is taking place and to slow down since pedestrians are in the roadway.
- The City may wish to produce the signage to be used and rent or loan it to an approved organization to notify oncoming traffic that they are approaching an intersection where solicitation is taking place.

Councilman Davis moved to continue the roadside solicitation policy with the City requiring advanced signage. This motion was seconded by Councilman Russell and carried unanimously.

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-3 – RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for vacancies on the Board of Adjustment, they made the following recommendations: (1) appoint David Brown (Regular member) to fill the unexpired term of Councilwoman Manheimer, to serve until January 21, 2011; (2) reappoint Kristy Carter and Phillip Harden (Alternate members) to serve a three-year term respectively, term to expire January 21, 2013; and (3) appoint Douglas Hattaway (Alternate member) to serve the unexpired Alternate term of David Brown, term to expire January 21, 2011. All appointments are until their successors have been appointed.

Councilman Russell moved to make the appointments as recommended by the Boards & Commissions Committee as noted above. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 311

B. CIVIC CENTER COMMISSION

It was the consensus of Council to instruct the City Clerk to re-advertise for the vacancy on the Civic Center Commission.

C. RESOLUTION NO. 10-4 – RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for a vacancy on the Asheville-Buncombe Community Relations Council, they recommended appointing Sharon West.

Mayor Bellamy moved to appoint Sharon West (to replace Craig White) to serve a three-year term, term to expire December 31, 2012, or until her successor has been appointed. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilman Bothwell voting "no" due to a misunderstanding in the voting process procedure.

RESOLUTION BOOK NO. 32 – PAGE 312

D. RESOLUTION NO. 10-5 – RESOLUTION APPOINTING MEMBERS TO THE DOWNTOWN COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for vacancies on the Downtown Commission, they made the following recommendations: (1) appoint Michael McDonough to fill the unexpired term of Harry Weiss, to serve until December 31, 2011; and (2) reappoint Guadalupe Chavarria to serve an additional three-year term, term to expire December 31, 2012. Both appointments are until their successors have been appointed.

It was the consensus of Council to instruct City Clerk Burleson to re-advertise the three remaining vacancies, particularly looking for architects or design professionals.

Councilman Davis moved to make the appointments as recommended by the Boards & Commissions Committee as noted above. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 313

E. RESOLUTION NO. 10-6 – RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for vacancies on the Sustainable Advisory Committee on Energy & the Environment, they made the following recommendations: (1) reappoint Sasha Vrtunski and Jane Mathews, to serve a three-year term respectively, terms to expire December 31, 2012, or until their successors are appointed; and (2) interview for the remaining position.

After a brief discussion, it was the consensus of Council to instruct City Clerk Burleson to re-advertise for the one position, particularly looking for diversity on the Committee.

Councilwoman Manheimer moved to reappoint Sasha Vrtunski and Jane Mathews, to serve a three-year term respectively, terms to expire December 31, 2012, or until their successors are appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 314

F. RESOLUTION NO. 10-7 – RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for a vacancy on the Firemen's Relief Fund, they recommended reappointing Pat Leckey.

Councilman Russell moved to reappoint Pat Leckey to serve an additional two-year term, term to expire January 1, 2012, or until her successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 315

G. RESOLUTION NO. 10-8 – RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE GREENWAY COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for vacancies on the Greenway Commission, they made the following recommendations: (1) reappoint Glen Locascio to serve an additional three-year term, term to expire December 31, 2012, or until his successor is appointed; and (2) interview for the remaining two positions.

It was the consensus of Council to interview Stephen Jones, Bill Jones, M. James Grode and Sandy Tarantino.

Councilman Smith moved to reappoint Glen Locascio to serve an additional three-year term, term to expire December 31, 2012, or until his successor is appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 316

H. RESOLUTION NO. 10-9 – RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD OF DIRECTORS

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for a vacancy on the Metropolitan Sewerage District Board of Directors, they recommended reappointing Mayor Terry Bellamy.

Councilman Russell moved to reappoint Mayor Terry Bellamy to serve an additional three-year term, term to expire January 19, 2013, or until her successor has been appointed. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 317

I. RESOLUTION NO. 10-10 – RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE RIVERFRONT REDEVELOPMENT COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for vacancies on the Riverfront Redevelopment Commission, they made the following recommendations: (1) appoint Joe Ferikes and Robert Camille (both representing the riverfront property or business owner) to each serve an initial one-year term, terms to expire January 1, 2011, or until their successors are appointed; and (2) interview for the remaining one position.

It was the consensus of Council to instruct City Clerk Burleson to re-advertise for the one position.

Councilman Russell moved to appoint Joe Ferikes and Robert Camille (both representing the riverfront property or business owner) to each serve an initial one-year term, terms to expire January 1, 2011, or until their successors are appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 318

J. RESOLUTION NO. 10-11 – RESOLUTION APPOINTING MEMBERS TO THE TRANSIT COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for vacancies on Transit Commission, they made the following recommendations: (1) reappoint Hanna Raskin to serve an additional three-year term, term to expire December 31, 2012; (2) appoint Georgia Shannon (to replace Andrew Goldberg) to serve

a three-year term, term to expire December 31, 2012; (3) appoint Paul Van Heden (to replace Karen Austin) to serve a three-year term, term to expire December 31, 2012; and (4) appoint Kevin Jenkins to serve the unexpired term of Josh O'Conner, term to expire December 21, 2010. All appointments are until their successors have been appointed.

It was noted that when Josh O'Connor returns from his tour of service that if he wishes he will be placed in the next available seat on the Transit Commission.

Councilman Davis moved to make the appointments as recommended by the Boards & Commissions Committee as noted above. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 319

J. RESOLUTION NO. 10-12 – RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for a vacancy on the Tree Commission, they recommended reappointing Laura Uberbacher and Bill Hascher.

Councilman Russell moved to reappoint Laura Uberbacher and Bill Hascher to each serve a three-year term respectively, term to expire December 31, 2012, or until their successors have been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 320

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

The following claims were received by the City of Asheville during the period of November 26 – December 23, 2009: Steven Weinrib (Sanitation), Cyndy Howze (Water), Shirnell Langford (Transit), Jeffrey Harris (Transit), Bill Carter (Streets), Eleanor Jones (Streets), Kathleen Campbell (Transit), Richard Jackson (Water), Mike Gratton (Streets), Marcello Bargellini (Sanitation), John E. Willard (Police), Progress Energy (Water) and Eric Woon (Fire). The following claims were received by the City of Asheville during the period of December 23 – December 31, 2009: Lael Kmecza (Streets), Thomas H. Jones (Fire), Louise Kistler (Streets), Lisa Bruet (Water), Fannie Bishi (Streets), Ronald Gates (Streets), Timothy Cutshaw (Transit) and Kaye Coxe-Andrews (Water). These claims have been referred to Asheville Claims Corporation for investigation.

Rev. Christopher Chiaronmonte spoke about homeless camps.

Mr. Gene Hampton spoke on Asheville's economic development.

Ms. Patricia Pinner asked for Council's help in obtaining municipal water for 14 homes on Chapel Hill Church Road and Gilmore Drive.

Mr. Aaron Penland urged Council for additional assistance in providing clean water to residents on Chapel Hill Church Road which CTS continues to put hazardous chemicals in the ground.

After discussion about the City's former and present commitment to partner with Buncombe County in extending water lines to the Chapel Hill Church Road area, it was the consensus of Council to instruct City Attorney Oast to prepare a letter to elected and appointed officials, including Congressman Shuler, Senators Burr and Hagan, the local delegation to the N.C. General Assembly, the Buncombe County Commissioners, the NCDENR (N.C. Dept. of

Environment and Natural Resources sending them the City's analysis for water line extensions to that area and noting the City's offer for partnership in order to extend water lines into the Chapel Hill Church Road area.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:42 p.m.

Magdalen Bouleson
CITY CLERK

MAYOR

Tuesday – January 19, 2010 - 5:00 p.m.
First Floor North Conference Room – City Hall

Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; Assistant City Attorney Martha McGlohon; and City Clerk Magdalen Burleson

Absent: None

Mayor Bellamy led the discussion on the direction of where Council would like to go with some of their strategic partnerships in 2010 and began conversations about the larger issues looming over our City. In preparation of the annual City Council retreat, Council received a white paper prepared by City Manager Jackson and the Executive Management Team dated January 4, 2010, entitled Asheville NC 2010: A Financial Crossroads highlighting some facts facing our City. City Manager Jackson then briefly highlighted some of the key observations from the document.

At Mayor Bellamy's request, it was the consensus of Council to first discuss things they support as a Council, possible funding options and then move forward with the public input process outlined below in the staff report. Mayor Bellamy felt it would be a disservice to City staff, and staff and Council liaisons to the various boards & commissions members to spend a lot of time on issues that there is not consensus of Council. It is very difficult to talk to other partners without having a menu of supported items with possible funding options.

Staff Report provided to Council: "At its annual planning retreat held January 8-9, 2010, the Asheville City Council received a paper entitled *Asheville, NC 2010: A Financial Crossroads*. The paper focuses on issues and challenges facing Asheville as it seeks to address the city's financial structure while meeting the community's expectations and vision for Asheville's future. That vision is largely captured within the city's portfolio of 16 active master plans, which were led by and developed with widespread public input.

"One of the conclusions of the paper asserts that involving key partners, community leaders and citizens in identifying solutions to Asheville's financial constraints is essential to addressing those challenges. An item was included on the retreat agenda for this purpose, but time constraints led City Council to add this as a topic to the Jan. 19 worksession agenda. The purpose of this memorandum is to introduce this topic and to suggest a plan for pursuing public input and community partnerships.

"Reaching out the public and community leaders to seek their input on alternatives for Asheville's future has proven successful in the past. At the 2006 Goals for Asheville forum, more than 300 citizens participated in establishing and prioritizing community goals. Staff is proposing a similar structure along with formal meetings with identified partners including the North Carolina legislative delegation and the Buncombe County Commission.

"A proposed schedule for implementing a public input process is included below:

Partners & Outreach Activity	Timeframe	Leadership
Community Forum Series Conduct a series of three community forums in different parts of the city where the paper could be presented and citizens would be invited to provide their input on solutions; invite community leaders and key agencies to attend and participate	Late February-early March	City Council and city staff
North Carolina Legislative Delegation Provide paper to NC State Legislative Delegation and schedule legislative visit to Raleigh	January-February	City Council
City of Asheville Boards & Commissions Distribute paper to all boards and commissions members and ask that discussion be scheduled at each body's next meeting	January-March	City Council and staff liaisons to Boards and Commissions
Buncombe County Commission Provide paper to the Buncombe County Commission and schedule discussion at next joint meeting	February-March	City Council
Asheville Area Chamber of Commerce Provide paper to the Asheville Area Chamber of Commerce Board and schedule discussion at next joint meeting	February-March	City Council

"For each outreach opportunity, staff would prepare a video documentary highlighting the paper's content for presentation. Staff would also compile the feedback and input provided at each meeting into a single report for City Council's consideration.

"To launch the community forum series, staff would recommend hosting the first forum in a central location, such as the Asheville Civic Center, and would structure the event like the Goals for Asheville forum where citizens break into small focus groups to discuss the issues and challenges and brainstorm solutions. The remaining two meeting could be held in different parts of the city. These meetings would be widely advertised and promoted through the city's communications tools and local media outlets. In addition, as with past efforts, comments would be encouraged in writing or through electronic communications for citizens who cannot attend meetings.

"For the purpose of City Council's worksession discussion, staff is seeking Council's input and direction on the following questions:

(1) Is Council generally supportive of the concept of the outreach plan?
(2) Do the sequence of events and schedule meet Council's expectations?
(3) For the public input piece, is Council comfortable hosting three forums?
(4) What will the role of the Mayor and Council be in making contact with key partners and arranging meetings?
(5) Are there other key partners or groups that should be included on the list?
(6) Are the different or additional strategies we should consider?"

Throughout discussion, each Council member stated the priority of the following possible funding options: property tax revenues; sales tax revenue; occupancy tax revenues; utility revenues; revenues from other sources like fees for services, licenses and permits, the motor vehicle tax, investment earnings and intergovernmental revenue; bond referendum; product development funds; prepared food and beverage fee; federal and state grant funds (American Recovery & Reinvestment Act, N.C. Dept. of Transportation, Community Development Block Grants, etc.); increase of 2.5% or 5% of water revenues; and earmarking by Representative Shuler.

When Mayor Bellamy also asked Council to identify additional information they would like to see from staff in order to make a decision on what they would support, some comments/items requested consisted of: options for a more fair apportionment of the sales tax; request for a graph to show how much sales tax is collected from inside the city limits; detailed information on each of the funding tools available; chart of where the commuters into Asheville come from; are there ways to have differential rates or user fees for commuters into Asheville; is there some way to have non-City residents pay for the use of police services; challenge staff to see about creative user fees; can we pursue additional 911 fees for non-City residents; investigate 911 cost recovery; would it be feasible to add a tax to people who work in the City but who do not live in the City; information on the City subsidizing the volunteer fire station in Upper Hominy (close to Haywood County); information on the Metropolitan Sewerage District participation in financing sewer lines into annexed areas; water rate adjustments; areas that City taxpayers are bearing the burden for – annexation; investigate naming rights for the Civic Center and other City venues; look for ways for consolidation; creation of a GIS map of the master plans so you can see how the different plans fit together; what the water system would look like with an additional percentage of water revenues; and list of low-hanging fruit opportunities with Buncombe County.

Vice-Mayor Newman supported talking with Buncombe County about some strategic initiatives that the City has that we think are in the interest of everyone in the County and ask them if they would be willing to dedicate some funding to some of those priorities over a multi-year period. Some potential partnership areas include regional greenways; the riverfront redevelopment area; downtown investments; parks, recreation and cultural activities; energy independence initiative; and regional planning issues. He also felt it would be appropriate to begin discussions again with our legislators on the voluntary annexation issue.

Councilman Davis supported quality of life issues; however, the City has critical needs having to do with basic City services, e.g., police, fire, sidewalks, capital improvements, etc. He felt Buncombe County would have a serious problem if Asheville falls into neglect and supported building those relationships.

Councilwoman Manheimer said that when we do fundraising we need to put together a package for what we want to do in the next zero-five years with a price tag and the bundle of funding options. Then we could go to the different partnerships and ask for their buy-in and let them know what's in it for them. Or, she wondered if it would be more worthwhile to get the partnerships interest items first so we can package them together. She felt we cannot do this alone and we are dependent on the different partnerships to participate with us.

Councilman Smith felt that going to our partners and clearly stating our priorities with a unified voice is essential to be able to move forward. His priorities would be public safety and jobs/community development. He felt we need to look beyond just our relationship with Buncombe County and our state legislators and recognize that a rising Asheville tide lifts all regional boats.

Councilman Bothwell felt that since we have a lot of commuters from Buncombe, Haywood and Madison counties who come into Asheville we should try to facilitate their use of transit to get into the City. He suggested we look for some partnership opportunities from the government entities in those counties.

Vice-Mayor Newman agreed that we should identify revenue strategies that Council is either supportive of or open to; and list the key service and infrastructure priorities the funds would be used for. Because, from a community and political standpoint there will be varying levels of enthusiasm for doing the revenue strategies depending on what the infrastructure or service priorities actually turn out to be.

Councilman Russell expressed concern about the $5 Million gap facing Council prior to the next fiscal year. He felt we have some structural expenditure items that we need to control

and we need to gain reliable revenue to take care of the basic services before we start looking at something that could potentially increase our annual budget. He felt Council should focus on creating a more reliable fair revenue stream prior to creating a list of nice, but not necessary things.

Mayor Bellamy gave a scenario where Council filled the gap of $5 Million with no raises for City employees, use of Fund Balance, cuts into public safety for downtown officers, community policing, closing of a senior center, cutting back on the hours of buses, less garbage collection, no street sweeping, etc. and felt our taxpayers would not want to live in a community like that. We need to stress to our residents that Asheville is the product that people sell. We are one of the safest cities of our size in America and a place where people want to live and work in our community. Not providing some of our services will impact tourism and we must make our community and partners aware of that fact.

Councilwoman Manheimer wondered about (1) the City and County blending fire and police; (2) creating a separate entity for our water system; and (3) the City's operation of the Civic Center and the Municipal Golf Course. Even though we manage our water system really well, perhaps the County and our legislators would look favorably on the way the water system could be run.

Mayor Bellamy advocated pursuing an additional percentage from our state legislators from the water revenues (that would not be earmarked just for water-related projects) to be earmarked for the first two years for roadway improvements or whatever the biggest needs are would not only address our short-fall, but address long-term needs while not impacting the City taxpayers.

In response to Councilwoman Manheimer, City Manager Jackson said that staff will provide Council, as a result of the budget process, a list of capital projects which are aligned with the master plans than we can fund. Every year we provide Council with a list of unfunded priorities outlining exactly where those waterline projects are and where we think there are opportunities to leverage and make best use of the 5% water revenues.

Mayor Bellamy heard support for beginning conversations with our state delegation regarding short and long term goals sooner rather than later.

It was the consensus of Council that the first key partnership contact should be the Buncombe County Commissioners. Other partnerships include N.C. legislative delegation, Tourism Development Authority Product Development Fund, N.C. Dept. of Transportation, and the City's boards and commissions. Community forums would be scheduled at a later date.

City Manager Jackson summarized that staff needs to (1) continue to merge and integrate master plans and pursue the GIS mapping; (2) identify Buncombe County partnership opportunities; (3) instruct staff liaisons to proceed to communicate with City boards/commissions; (4) delay community forums until after working on relationships and Council has an action plan. In working toward that action plan, develop a list of immediate capital improvement needs, taking into consideration the master plans, but identify unfunded immediate priorities that Council may go to the legislators with as a package; (5) develop a short session state legislative package to include, among other things, the voluntary waterline extension policy; and (6) develop a federal legislative package regarding opportunities for funding support.

When City Manager Jackson suggested staff take the list of other revenue options to the Finance Committee for review, it was the consensus of Council to have staff bring those back directly to Council and let the Finance Committee work on the fees and charges.

Mayor Bellamy felt there needed to be one additional worksession by Council to determine the initiatives they support as a Council and what they want to accomplish with those

relationships. Some partnerships with Buncombe County include the Tourism Development Authority Wayfinding Project, cleanliness campaign and nuisance court. She asked for Council support of herself, Vice-Mayor Newman and Councilman Davis to work on the partnership with the Buncombe County Commissioners. She stressed that these Council-supported initiatives will be want Council can carry forward to their individual boards.

Mayor Bellamy adjourned the meeting at 7:09 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – January 26, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman Gordon D. Smith; City Manager Gary W. Jackson; Assistant City Attorney Martha McGlohon; and City Clerk Magdalen Burleson

Absent: Councilman William A. Russell Jr.

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Bothwell gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY, 2010, AS "BLACK HISTORY MONTH"

Mayor Bellamy read the proclamation proclaiming February, 2010, as "Black History Month" in the City of Asheville. She presented the proclamation to Elder Alfred Blount with Tried Stone Missionary Baptist Church, who briefed City Council on some activities taking place during the month and was pleased to note that they are getting ready to celebrate their 82nd anniversary.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE CITY COUNCIL RETREAT HELD ON JANUARY 8-9, 2010; THE REGULAR MEETING HELD ON JANUARY 12, 2010; AND THE WORKSESSION HELD ON JANUARY 19, 2010

At Mayor Bellamy's request, it was the consensus of Council to amend the minutes of the City Council retreat held on January 8-9, 2010, as follows: "It was the consensus of Council for Mayor Bellamy to place on a future Council meeting agenda consideration of approval of the RICH Task Force, Mayor's Committee on (Dis)abilities and Mayor's Committee on Veterans in order for these programs to receive City staff resources."

B. RESOLUTION NO. 10-13 - RESOLUTION APPOINTING COUNCILMAN GORDON SMITH TO THE AMERICANS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Summary: Councilman Gordon Smith be and he is hereby appointed as the elected representative to the Americans with Disabilities Act Compliance Committee to serve a term according to the length of his Council term of office.

RESOLUTION BOOK NO. 32 – PAGE 321

C. RESOLUTION NO. 10-14 - RESOLUTION APPOINTING COUNCILMAN JAN DAVIS TO THE CITIZENS/POLICE ADVISORY COMMITTEE

Summary: Councilman Davis be and he is hereby appointed to serve as the ex-officio non-voting City Council member on the Citizens/Police Advisory Committee to serve a term according to the length of his Council term of office.

RESOLUTION BOOK NO. 32 – PAGE 322

D. RESOLUTION NO. 10-15 - RESOLUTION APPOINTING COUNCILMAN GORDON SMITH TO THE HUB COMMUNITY ECONOMIC DEVELOPMENT ALLIANCE BOARD

Summary: Councilman Gordon Smith be and he is hereby appointed to serve as the City Council Planning & Economic Development Committee member to the HUB Community Economic Development Alliance Board, until such time as he is no longer a member of the City Council Planning & Economic Development Committee.

RESOLUTION BOOK NO. 32 – PAGE 323

E. RESOLUTION NO. 10-16 - RESOLUTION APPOINTING VICE-MAYOR BROWNIE NEWMAN AS CHAIRMAN TO THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

Summary: Vice-Mayor Brownie Newman be and he is hereby appointed as the City Council representative, to serve as Chairman, to the Police Officers and Firefighters Disability Review Board to serve a term according to the length of his Vice-Mayor term of office.

RESOLUTION BOOK NO. 32 – PAGE 324

F. RESOLUTION NO. 10-17 - RESOLUTION APPOINTING COUNCILMAN JAN DAVIS TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Summary: Councilman Jan Davis be and he is hereby appointed as the ex-officio non-voting City Council representative on the Buncombe County Tourism Development Authority to serve a term according to the length of his Council term of office.

RESOLUTION BOOK NO. 32 – PAGE 325

G. ORDINANCE NO. 3823 - BUDGET AMENDMENT FROM VARIOUS CONTRIBUTIONS TO SUPPORT RECREATION PROGRAMS

Summary: The consideration of a budget amendment, in the amount of $8038, for contributions to support recreation programs.

The City of Asheville in the Parks, Recreation & Cultural Arts Department has received contributions to support programming and special projects within the department operations. Description of each is listed below.

$6831.00 from the Asheville Parks and Greenway Foundation to increase the operating budget in the Recreation Division to support cultural art programs, therapeutic recreation, youth summer playground program, youth athletics and senior citizen programs.

$1,207.08 from miscellaneous donations to support youth recreation programs community centers.

This action complies with the Parks, Recreation, Cultural Arts & Greenway Master Plan in that it makes use of diverse funding sources for successful implementation in the delivery of parks, recreation and cultural art services.

Pro:
- Provide funds to support parks, recreation and cultural arts programming enhancements

Con:
- None

The City's Fiscal Year 2009/10 operating budget for Parks and Recreation will increase by $8873. This increase is funded by $6831 in contributions from the Asheville Parks and Greenway Foundation and $1207 from miscellaneous donations. Thus, there is no net fiscal impact to the City's budget.

Staff recommends City Council to adopt budget amendments authorizing the City Manager to increase the budgets for 1) WC Reid Center for Creative Arts by $3,790, 2) Therapeutic Recreation by $1,353, 3) Summer Playground Program by $900, 4) Youth Athletics $520, 5) Senior Citizen Program by $268, and community centers by $1,207.08.

ORDINANCE BOOK NO. 26 – PAGE 30

H. RESOLUTION NO. 10-18 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ASSIGN THE LEASE HELD BY PALACE BASEBALL LLC FOR THE USE OF MCCORMICK FIELD TO DEWINE SEEDS – SILVER DOLLAR BASEBALL LLC FOR THE CONTINUED OPERATION OF MINOR LEAGUE BASEBALL IN THE CITY LIMITS OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to assign the lease held by Palace Baseball, L.L.C. for the use of McCormick Field to DeWine Seeds –Silver Dollar Baseball, L.L.C. for the continued operation of minor league baseball in the city limits of Asheville.

On July 1, 2005, the City entered into a lease with Asheville Tourist Baseball Club, Inc. for the use of McCormick Field to operate a minor league baseball program. On October 7, 2005, the lease with Asheville Tourist Baseball Club, Inc. was assign to Palace Baseball, L.L.C.

On January 5, 2010, Palace Baseball, L.L.C. entered into an asset purchase agreement with DeWine Seeds – Silver Dollar Baseball, L.L.C. Palace Baseball, L.L.C. wishes to assign the lease for the use of McCormick Field to DeWine Seeds – Silver Dollar Baseball, L.L.C. for the continued operation of minor league baseball in the city limits of Asheville. The Parks, Recreation and Cultural Arts Department is committed to working with DeWine Seeds –Silver Dollar Baseball, L.L.C. to make minor league baseball available in the community.

This action complies with the Parks, Recreation, Cultural Art & Greenways Master Plan in that it continues a partnership within the community to take advantage of existing facilities and provide recreation services to the community.

Pro:
- DeWine Seeds –Silver Dollar Baseball, L.L.C. is committed to keeping minor league baseball in Asheville.

Con:
- None

Assignment of the lease will have no impact on the budget as all financial terms will remain the same.

Staff recommends City Council adopt a resolution authorizing the City Managers to assign the lease held by Palace Baseball, L.L.C. for the use of McCormick Field to DeWine Seeds – Silver Dollar Baseball, L.L.C.

Mayor Bellamy said that because the City owns McCormick Field she felt it was important to note that the City will continue the relationship with DeWine Seeds – Silver Dollar Baseball LLC for baseball in our community.

RESOLUTION BOOK NO. 32 – PAGE 326

I. RESOLUTION NO. 10-19 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR A FEDERAL TRANSIT ADMINISTRATION GRANT TO PURCHASE THREE 30-FOOT DIESEL BUSES AND TWO 30-FOOT LOW FLOOR HYBRID DIESEL-ELECTRIC BUSES AND AUTHORIZING THE MAYOR TO EXECUTE THE APPROPRIATE DOCUMENTS TO ACCEPT THE GRANT, IF IT IS AWARDED TO THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing City staff to apply for a Federal Transit Administration (FTA) grant to purchase three 30-foot diesel buses and two 30-foot low floor hybrid diesel-electric buses and authorizing the Mayor to execute the appropriate documents to accept the grant, if it is awarded to the City of Asheville.

As previously shared with City Council, the City of Asheville's Transit System fleet consists of a total of 21 buses. 16 of these buses were purchased in 1996 and five were purchased in 2006. Since the typical life cycle for the existing buses is about 10 years, 16 buses are overdue for replacement. Five low floor hybrid diesel-electric buses have been ordered with an expected delivery date during November 2010 and five diesel buses are currently going through the requisition process. The subject grant would provide funding for three diesel buses and two low floor hybrid diesel-electric buses. Assuming the subject grant is approved, only one bus would remain to be replaced.

The Federal Transit Administration (FTA) has announced the availability of discretionary Section 5309 Bus and Bus Facilities grant funds in support of the Department of Transportation's Livability Initiative (Livability Bus Program). The Livability Bus Program will be funded using $150 million in unallocated discretionary bus and bus facilities program funds to finance capital projects to replace, rehabilitate, and purchase buses. Funds may not be used for operating expenses or preventive maintenance. Through the Livability Bus Program, the Federal Transit Administration (FTA) will invest in projects that fulfill the six livability principles that serve as the foundation for the DOT-HUD-EPA partnership for sustainable communities. These principles include providing more transportation choices, promoting equitable, affordable housing, enhancing economic competitiveness, supporting existing communities, coordinating policies and leveraging investments, and valuing communities and neighborhoods. The deadline to apply for the subject grant is February 8, 2010.

The total cost to purchase the five buses is $2,400,000. Thanks to Congressman Heath Shuler's office, the City has already received $532,000 to be used to help purchase two hybrid diesel-electric buses. Therefore, the grant application would total $1,868,000 ($2,400,000 - $532,000). If awarded, the grant would fund 80% of the cost, which equals $1,388,000, the City would fund half of the 20% local match, which equals $240,000, and City staff would request the North Carolina Department of Transportation to provide the additional half of the 20% local match. Staff recommends using the Transit's Capital Reserve Fund to provide the local match. This reserve only allows us to fund five buses, instead of the six that need replacement. City staff has been aggressively looking for funds to replace the aged fleet and a plan is moving forward in

the proposed Capital Improvement Program (CIP) for Fiscal Year 2010-11 to fund the subject five buses. This grant opportunity enables us to speed up the process.

This action complies with the current City Council's Strategic Operating Plan by helping to achieve short-term and long-term energy goals and reducing city carbon emissions, helping to establish a multi-modal transportation plan by making transit system improvements, and helping to fully leverage funding for transportation improvements. This action also complies with the capital improvement recommendations included in the Transit Master Plan that was accepted by the City Council on October 27, 2009.

The Transit Commission supports the subject action.

Pros:

- The subject grant, if awarded, would enable the City to replace most of its aged transit system fleet (15 out of 16 buses) that would produce savings in maintenance costs and fuel costs.
- The subject action would help reduce the City's carbon emissions.
- The Federal Transit Administration (FTA) would fund 80% of the subject project cost.
- The North Carolina Department of Transportation (NCDOT) would fund 10% of the subject project cost.
- The City of Asheville's local match has been identified and would not require any additional allocation of funds.

Con:

- A 10% local match in the amount of $240,000 is required.

The total anticipated cost of the subject project is $2,400,000. The City has already received $532,000 for two hybrid diesel-electric buses through the efforts of Congressman Heath Shuler's office. The grant application would total $1,868,000, with 80% to be paid by Federal funds, 10% by State funds, and 10% by City funds. The City's 10% match, which totals $240,000, is already included in the Transit Capital Reserve Fund.

City staff recommends City Council to adopt a resolution authorizing City staff to apply for the Section 5309 Bus and Bus Facilities Livability Initiative Program Grant to purchase three 30-foot diesel buses and two 30-foot low floor hybrid diesel-electric buses and authorizing the Mayor to execute the appropriate documents to accept the grant, if it is awarded to the City of Asheville.

Mr. Paul Van Heden, member of the Transit Commission, suggested Council take advantage of this opportunity and acquire six buses instead of five, which would mean an additional $40,000.

After a brief discussion about why staff was recommending five buses, noting that the City's match for five buses is already included in the Transit Capital Reserve Fund and the additional $40,000 would have to come out of the City's Fund Balance, it was the consensus of Council to proceed with staff's recommendation as we will be pursuing additional grant funds in the future to replace the last bus.

RESOLUTION BOOK NO. 32 – PAGE 327

J. ORDINANCE 3824 - ORDINANCE AMENDING THE WATER POLICIES ORDINANCE

Summary: This is the consideration of an ordinance authorizing the changes in the Water Policies Ordinance.

The Water Policies were last updated and adopted by City Council in November 2007. Since then, Water Resources Staff have reviewed the Water Policies and determined that some sections need to be updated to coincide with current departmental procedures, engineering design standards, and State / Federal laws that the department is required to follow and enforce. Changes to the Water Polices include:

1. I. General, B. Definitions: added a definition for ISO, or International Organization for Standardization. The department is ISO 14001 certified.

2. I. General, D. Contracts: updated this section to be compliant with City of Asheville Purchasing contracting requirements.

3. II. Water Availability: updated the application process to align with current departmental procedures.

4. III. Connection Policy: updated wording to align with current departmental procedures and Water Engineering Standard Specifications and Details.

5. IV. Extension Policy, B. General Specifications, 5.: add clarifying language to define the Pump Station Maintenance Fee and how it is calculated.

6. V. Meters, E. Metering Requirements: changed this section to read:

   "Metering options may be found in the Water Engineering Design Standards Manual. All metering shall comply with Section VI: Cross-Connection Control Policy."

7. VI. Cross-Connection Control Policy: replaced all verbiage in this section to comply with current State and Federal laws as pertains to backflow and cross connection control.

8. X. Water Shortage Response Plan: renamed this section (former title: Water Use Restrictions) and replaced all verbiage with the same wording in the Water Shortage Response Plan to be compliant with State and Federal laws. The State required Water Resources to update this section of the policies. The updated wording in this section has been approved and found compliant with all applicable laws.

9. XII. Interruption of Service, B. Pressure Fluctuations: added "The City of Asheville shall not be liable for any damages to a customer's plumbing or property caused by high pressure, low pressure, or by fluctuations in pressure in the City's water mains." This is our current operating practice.

10. XIII. ISO 14001:2004 / Safety Policies and Procedures: added this entire section:

    A. The City of Asheville Water Resources Department is ISO 14001 Registered by a third party organization. Contractors are expected to abide by the ISO 14001:2004 Standard while working for or on behalf of the City. Contractors are also expected to abide by all local, state, and federal laws and regulations while conducting business for or on behalf of the City.
    B. Water Resources staff may inspect any job site at any time. If a job site is found out of compliance with the ISO 14001:2004 Standard or any local/state/federal law, it shall be shut down until the job site is brought in compliance.
    C. The Director may be contacted for any disputes.

11. XIV. Water Engineering Standard Specifications and Details: added the following section to inform interested parties where they can find Water Engineering requirements since the Standard Specifications and Details are too extensive to include in the policies:

"Refer to the Water Resources Water Engineering Standard Specifications and Details for more requirements."

This action is part of City Council's Strategic Plan to implement practical water system management and to improve infrastructure installation and maintenance.

Pro:

- Adoption of the change in the Water Policies Ordinance will ensure that the Water Policies are compliant with required State and Federal laws and up-to-date with current departmental procedures.

Con:

- Failure to adopt the change in the Water Policies Ordinance will keep clauses in effect that are not relevant to current procedures or compliant with State and Federal laws.

The changes to the Water Resources Policies do not change any fees, charges, or operating procedures that would affect revenues or expenditures for the department.

Staff recommends City Council adopt the ordinance authorizing the changes in the Water Policies Ordinance to become effective upon adoption.

ORDINANCE BOOK NO. 26 – PAGE 32

K. RESOLUTION NO. 10-20 - RESOLUTION AMENDING THE 2010 CITY COUNCIL MEETING SCHEDULE TO INCLUDE A WORKSESSION ON (1) TUESDAY, FEBRUARY 9, 2010, AT 2:00 P.M. IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF CITY HALL; AND (2) TUESDAY, MARCH 9, 2010, AT 3:00 P.M. IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF CITY HALL

RESOLUTION BOOK NO. 32 – PAGE 328

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Manheimer and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 10-21 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH J.L.S. COMPANY LLC FOR THE KIMBERLY AVENUE RESURFACING PROJECT

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council approval of a resolution to award the construction contract for the Kimberly Avenue resurfacing project to J.L.S. Company, LLC, of Arden, NC, in the amount of $539,995.00.

This is the last of the ARRA projects funded through the French Broad River Metropolitan Planning Organization (MPO). The grant agreements and budget amendments were approved by the Asheville City Council on August 25, 2009. Once this resolution is adopted, the contract documentation will be forwarded to the N.C. Dept. of Transportation (NCDOT) for final reviews and authorizations prior to city contract execution.

The Kimberly Avenue resurfacing project will provide milling, repair, resurfacing, and pavement markings on Kimberly Avenue from Edwin Place to Gracelyn Road/Griffing Boulevard. It will include the addition of a bicycle climbing lane on the northbound side of Kimberly within the project limits. The contract specifies that work may begin as soon as February 1, 2010, and must be completed by October 15, 2010.

A formal request for bids was issued on December 7, 2009, and bids were opened December 30, 2009. The engineer's estimate for the project was $567,176.16, and the disadvantaged business enterprise (DBE) goal was 10%. The lowest bid was provided by J.L.S. Company, in the amount of $539.995, which was 4.8% below the engineer's estimate of project cost. The project's 10% DBE participation goal was met in the bid. This is a unit price contract, not a lump sum contract.

Bidder	Address	Bid Amount
J.L.S. Company	**Arden, NC**	**$539,995.00**
Moore & Sons Site Contractors	Mills River, NC	$562,552.50
Young and McQueen Grading Co., Inc.	Burnsville, NC	$579.975.05
APAC Atlantic, Inc.	Candler, NC	$670,642.85

This project supports the City Council's strategic plan goals of proactively pursing funding opportunities with state and federal economic stimulus packages and leveraging funding for regional transportation improvements.

Pros:

- Improves Asheville's transportation facilities
- Provides long term investment in the City's infrastructure

Con:

- Project management and contract administration will consume staff time and possibly city funds

The cost of the construction contract for the Kimberly Avenue resurfacing project is $539,995. In addition to this amount, it is estimated that there will be $81,000 in construction administration costs, which is based on a 15% MPO allowance for project inspection and materials testing costs. The total cost for the project is thus estimated at $620,995.

Of this total, approximately $550,000 in ARRA funds is available. This amount will cover the $539,995 construction contract and a portion of the $81,000 in contract administration costs, leaving a balance of $70,995 to be funded by the city.

Grant Revenue:	
ARRA Funding:	**$550,000**
Project Costs:	
Construction Contract	$539,995
Contract Administration	81,000
Total Project Costs	**$620,995**
Balance to be Funded by the City:	**$70,995**

Funds to cover the $70,995 in remaining construction administration costs (that are currently not covered by the ARRA grant) are already included in the existing city budget. Specifically, the construction administration costs will be cover4ed with fund balance proceeds that were previously appropriated in anticipation of cases where total project costs might exceed the amount of available ARRA funding. It is possible that additional ARRA funds may be indentified to cover the construction administration costs. If such funds are indentified, no fund balance will be used for this project. An update on the actual amount of fund balance required to support ARRA projects will be presented in the next quarterly financial report.

City staff requests City Council approve the resolution to award the construction contract for the Kimberly Avenue resurfacing project to J.L.S. Company, LLC, of Arden, NC, in the amount of $539,995.00.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Manheimer moved for the adoption of Resolution No. 10-21. This motion was seconded by Vice-Mayor Newman and carried unanimously.

RESOLUTION BOOK NO. 32– PAGE 329

IV. PUBLIC HEARINGS: None

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 10-22 - RESOLUTION ADOPTING THE WATER SYSTEM MASTER PLAN AS PREPARED BY JORDAN, JONES & GOULDING IN MAY 2009

Water Resources Director Steve Shoaf said that this is the consideration of a resolution to officially adopt the Water System Master Plan as prepared by Jordan Jones & Goulding (JJG) in May 2009.

A Water System Master Plan is typically updated every 5 – 10 years. The City of Asheville Water Resources Department's Master Plan was last updated in 1995. In June 2007, the Water Resources Department partnered with Jordan, Jones & Goulding (JJG) to update the Water System Master Plan. In September 2008 JJG presented a draft Master Plan to the City Council and highlighted the projections for future growth and projects to improve the water system to meet that demand. JJG completed the final update of the plan in May 2009, and is now presenting the following projections and recommendations to the Asheville City Council:

- Buncombe County Growth – In 2007, Buncombe County population was 243,565. In 2012, 2017 and 2037, the population is projected to be 264,326, 285,088 and 368,135, respectively. The major growth is projected to be in the southern part of Buncombe County.
- Model Development – JJG developed a model to project future needs for treatment plants, pipes, pump stations, and valves. Model Development will also provide GIS integrated water computerized hydraulic model and maps.
- System Evaluation – with future growth projections, the water treatment plant capacity will be needed to be increased around the year 2025.
- Capital Improvement Plan – between now and 2037, JJG projects 14 pipeline installations, one pump station replacement, one new pump station, and additional water treatment plant capacity at a total estimated cost of $60,449,000. This amount does not

included recommended annual costs for pipe replacement due to age or any line extensions that the City accepts from developers.

This project is part of the City Council strategic plan to improve City infrastructure and sustainability through long-term planning.

Pro:

- Adoption of the Water System Master Plan will help to ensure that Asheville builds the water infrastructure to accommodate current demands and future growth while making the best use of financial resources.

Con:

- Failure to adopt the Water System Master Plan will not prepare the Water Resources Department for future growth.

The cost to update the Water System Master Plan was $550,000 in 2007. There is no additional cost for City Council to officially adopt the plan. The updated Master Plan recommends additional long-term improvements that will require financial planning to implement. The projected cost of the Master Plan's proposed projects is $60,449,000 spread over the next 27 years. City staff has started to incorporate the plan's recommended projects into the five-year Capital Improvement Program. Revenue generated from the CIP Fee will be used to fund a majority of these projects. Additional funding sources may be required to implement the most costly improvements recommended in the plan by JJG.

City staff recommends that City Council officially adopt the Water System Master Plan Update as prepared by Jordan, Jones & Goulding (JJG).

Mr. Eric Nease, representing Jordan, Jones & Goulding, provided Council with a graph showing the Buncombe County population growth, along with the projected growth to 2037.

Using a PowerPoint, he explained the system overview as (1) 21.4 Million Gallons Per Day (MGD) annual average day demand; (2) 1,625 miles of pipe; (3) 3 Water Treatment Plants; (4) 40 pump stations; (5) 31 storage tanks; (6) 12 Pressure Reducing Values (PRV); (7) 37 pressure zones; and (8) elevations 1,950 to 3,700.

He then provided an overview of pressure zones and a system overview.

Model development includes (1) treatment plants, pipes, pumps, and value locations based on the City GIS (mapping system); (2) updated pressure zone boundaries; (3) actual pump data used to simulate pumps; (4) system controls included in model; and (5) model verified to simulate actual system data.

System evaluation includes (1) total system demand for 2037 is 41 MGD; (2) exceeds current treatment capacity of 27 MGD; (3) additional water treatment capacity needed in 2025 $\pm$; (4) pipes evaluated for velocity; (5) tanks evaluated for ability to drain and re-fill; and (6) pumps evaluated for capacity.

Using charts, he showed the PRV relocation, areas of recommended improvements, and concord area options.

Using a table, he showed the growth Capital Improvement Plan summary showing a total cost of $60,449,000 for 14 pipeline installations, one pump station replacement, one new pump station, and additional water treatment plant capacity. This amount does not include recommended annual costs for pipe replacement due to age.

Throughout discussion, Mr. Nease and Mr. Shoaf responded to various questions/comments from Council, some being, but are not limited to: have studies been analyzed to determine if conservation efforts reduce usage; explanation of 21 MGD usage even though we have lost industry water users in the past decade; for a system Asheville's size what factors are taken into consideration of unaccounted-for water; thoughts on using Bee Tree Reservoir (since it is more of a back-up plant) for recreation opportunities; how are we partnering with Buncombe County on the maintenance of their two facilities and extension of water lines; regarding the new $40 Million new water treatment facility in the future, is that taking into consideration we have the Bent Creek property and that would be the location of the new facility; how does this study support the Brown & Caldwell Study; why are two major lines outside the City limits included in these recommendations; and has there been any analysis about how much land is needed to build a new water treatment facility on the Bent Creek property.

In response to Mayor Bellamy, Mr. Shoaf confirmed that in 2025 or 2033 the Council at that time will need to consider whether to build a water treatment facility on the Bent Tree property, so we need to keep that land for that purpose whenever it comes back to the City.

Mayor Bellamy felt we need to talk about growth and how and where we grow and the resources that are going to be needed to support that growth. Vice-Mayor Newman has talked about land use planning and our ability to use our water system as an opportunity for people to come into the City without an involuntary annexation. We are seeing the impact of growth outside the City limits and its impact on rate payers. Discussions need to continue, about our asset of water, with our state legislators and the Buncombe County Commissioners with the two major lines outside the City limits in the future costing over $2 Million.

Councilman Newman hoped we would get into more detail as the Bent Creek property gets to be closer under the City's management. He felt it was appropriate to plan for the new water treatment facility, but if there is more property than is needed for that facility there may be other values that we might want to use that land for. Also, he didn't want to be dismissive of the potential for different policies that we create to affect future demand because there is quite a bit we can do through education and rate policies.

Mr. Alan Ditmore spoke about how the projected population and consumption are only guesses.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-22. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 330

B. RESOLUTION NO. 09-23 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A 90-DAY EXTENSION AGREEMENT WITH WNC COMMUNITY MEDIA CENTER (FORMERLY KNOWN AS URTV INC.) FOR THE MANAGEMENT OF PUBLIC ACCESS

Administrative Services Director Lauren Bradley said that this is the consideration of a resolution authorizing the Mayor to sign a 90-day extension agreement with WNC Community Media Center (formerly URTV, Inc.) for the management of public access.

At its meeting on October 13, 2009, the City Council directed staff to negotiate a 90-day extension to URTV's, now known as the WNC Community Media Center, agreement for the management of public access, including terms that (1) address compliance with open meetings and public records law and (2) specify the funding amount and payment terms for the duration of

the agreement. City Council agreed that an extension would provide time for Council to work through unresolved concerns expressed by the Boards and Commissions Committee in its July 20, 2009, letter to the WNC Community Media Center. At the same time, staff would review the materials submitted by the WNC Community Media Center in its request for a longer-term management agreement. The additional time will also allow staff to evaluate how the transition to a State-wide franchise agreement will impact the City's relationship with the WNC Community Media Center.

The 90-day extension agreement includes clauses that address public records, open meetings and compensation, as directed by Council. The agreement also includes a section to clarify the WNC Community Media Center's board structure and membership.

Staff is seeking City Council direction on the City's role in making appointments to and defining the number of members on the WNC Community Media Center board. In the past, pursuant to a City resolution, board membership was set at 11 members, and the City and the County each appointed two members to the board. It is staff's recommendation that the management agreement be structured in a manner that is consistent with other contracted services. Following that model, the City Council would not appoint members to the contractor's board. Instead, the contractor would be held accountable for its performance according to the terms in the contract. If City Council continues to appoint members to the board, the WNC Community Media Center has requested that the total board membership be increased to 13.

The WNC Community Media Center has reviewed and agreed to the terms of the extension agreement. During the 90-day extension, at City Council's direction, staff will work to develop a longer-term management agreement for Council consideration in March 2010.

Pros:

- The extension agreement provides a foundation for beginning to formulate a longer term contract for managing public access television in Asheville.
- The agreement addresses concerns expressed by City Council regarding open meetings and public records.
- The agreement also clarifies the organization's board structure and the city's payment terms for management services.
- The extension period will allow for additional time to resolve any concerns City Council may have with the conduct of the WNC Community Media Center's board and/or the organization's operations.

Con:

- The process by which City Council will work to address concerns regarding the WNC Community Media Center's board or operations is currently undefined, which may make negotiating a long-term agreement beyond the 90-day extension challenging.

Under the proposed agreement, the City will pay the WNC Community Media Center $30,000 in P.E.G. fees, which is one-half of the total budget allocation, for managing public access for a full year. By the time the 90-day extension agreement expires, the WNC Community Media Center will have managed public access for more than six months of the fiscal year. P.E.G. fees are collected from cable subscribers and must be spent on public, government, or education access activities.

Staff recommends that City Council approve the resolution authorizing the Mayor to sign an extension agreement with the WNC Community Media Center for management of public access. Staff further recommends that the clause allowing City Council to appoint two board members to the WNC Community Media Center be removed from the agreement or that Council clarify its direction for the total number of members allowed on the board.

Ms. Bradley said that said that there have been some questions as to whether the WNC Media Center's Board is a public body. She thought that what adds to some of that confusion is the fact that we make board appointments to that organization. If Council would like to continue to appoint members to the WNC Media Center Board, the Board is requesting an increase from 11 to 13 due to quorum problems. Staff would like clarification on whether Council wants to continue to appoint members in this agreement and also in terms of negotiating a longer term agreement.

She also asked for policy consideration from Council if they are supportive of this 90-day extension agreement and if so, could this agreement be in effect from today through 90 days and then Council would come back to Council to look at negotiating a longer term agreement in the March timeframe.

Councilwoman Manheimer said that her firm has represented URTV in the past and although that attorney is no longer with the firm as of the end of December, she was not sure of the on-going relationship. Therefore, out of an abundance of caution, Vice-Mayor Newman moved to excuse Councilwoman Manheimer from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Smith and carried unanimously. Councilwoman Manheimer then left the Chamber.

At Vice-Mayor Newman's request, it was the consensus of Council to hear public comments prior to a motion being made.

The following individuals spoke in support of an agreement with WNC Community Media Center:

Operations Manager of WNC Community Media Center
Rev. Christopher Chiaronmonte
Director of Programming at the WNC Community Media Center (also provided Council with a graphic explaining the name change)
Two individuals who have a show on URTV

Mr. Alan Ditmore felt that the membership fees should be reduced. He also felt the Board is too powerful relative to elected officials and the members. He did not support self-perpetuating boards with no outside accountability.

In response to Councilman Bothwell, Ms. McGlohon said that the issue is whether or not the URTV Board is a public body. By removing Council's authority to appoint members to the Board it lessens the impact and the appearance that this is a public body. She felt that is the reason why staff is recommending that Council consider not appointing members to this body. However, whether Council continues to appoint members to the URTV Board or not, the issue of whether or not it is a public body will not go away.

In response to Vice-Mayor Newman, Ms. Bradley said that we are essentially contracting with a non-profit agency to provide management services and they have by-laws by which they have a board and structure and they appoint members. The complicating factor is layering in our involvement with appointing members to the Board. If the City chose not to do that, they would continue to operate like a non-profit agency. We could structure that arrangement like we do with other agencies for contracted services.

Ms. Bradley said that Council does not have to decide on whether to appoint members to this Board or not as it's not essential to this 90-day extension agreement. When staff comes back to Council in March they will provide additional information on the pros and cons of appointing members or not.

In response to Councilman Davis, Ms. Bradley said that there is some question now about our ability to force them to comply with the Open Meetings Law and Public Records Law as a public body. What we have tried to do under the terms of the contract is to say we want you to follow the intent of the law and your performance under this contract requires that you follow the intent of those laws but not that you are forced to do so as a matter of law as a public body.

Councilman Davis, liaison to the WNC Media Community Center, spoke about a meeting with the Board he attended in which they reviewed their audit in an open meeting. He recommended Council extend the 90-day management agreement. He wondered if an ad hoc committee should be appointed to help staff craft a longer-term agreement. He felt that even though Council has limited accountability with the Board, other than appointing members and providing P.E.G. fees, and did not want to give up that limited accountability up.

Councilman Davis moved to authorize the Mayor to sign a 90-day extension agreement with WNC Community Media Center (formerly URTV, Inc.) for the management of public access, or sooner if possible. This motion was seconded by Councilman Smith.

In response to Councilman Davis, Buncombe County has not stepped away from making their appointments to the Board.

Mayor Bellamy felt that City Attorney Oast did a good job in capturing the concerns raised. She noted that if the public is unable to obtain records from a board that reports to City Council, they can make a public records request to the City Clerk for those records. At Mayor Bellamy's request, it was the consensus of Council to amend the agreement in order to provide language that they provide all meeting minutes to the City Clerk. Councilman Davis also noted that WNC Community Media Center's meeting minutes are also posted on-line.

In response to Councilman Bothwell, Ms. McGlohon said that staff has been asked to bring a permanent agreement back to Council in March, so this extension agreement will not be perpetual. It was the consensus of Council that that language be incorporated into the resolution.

Ms. Bradley clarified that staff is asking that the effective date of the agreement be effective 90-days from tonight, but that they will come back in March and be on the road of having a longer-term agreement before the 90-day extension agreement would expire.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

The motion made by Councilman Davis and seconded by Councilman Smith to adopt Resolution No. 09-23 carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 331

At this time, Councilwoman Manheimer re-entered the Chamber and continued participation in the Council meeting.

VI. NEW BUSINESS:

A. UPDATE ON THE 2025 PLAN IMPLEMENTATION

Planning & Development Director Judy Daniel said that the 2025 Comprehensive Plan was adopted by the City Council in October of 2003. In June of 2009 the Planning and Economic Development Committee asked for a review of this Plan to benchmark progress toward the goals outlined in the Plan. A comprehensive review of the Plan goals led to the development of a matrix that reflects the progress toward each goal and its strategies.

Ms. Daniel provided Council a summary matrix of those findings. The full content of the 7 section, 66 page matrix of finding is posted on the Planning and Development Department website. She also provided a summary of goal achievement. The full 2025 Plan (430 pages divided into 7 documents) is also posted.

The timeline since inception includes (1) 2001 City Plan Advisory Committee formed by City Council; (2) 2003 City Development Plan 2025 Adopted – October; (3) 2005 City Development Office Merged into Office of Economic Development (OED); (4) 2008 Downtown Master Plan Process Initiated; (5) 2009 Downtown Master Plan Adopted by City Council; and (6) 2009 PED Request Review of 2025 Plan.

The 2025 Plan represents a bold, ambitious, and visionary commitment by the citizens and leadership of the City to becoming a greener, cleaner, safer city with a strong economic base. The Plan's 96 goals with 486 strategies for achieving those goals set high standards for achievement. To the City's credit, only seven years after adoption, with fifteen years remaining on the timeline – achievement or major progress has been reached on 87% of the goals of the City Plan, and 60% of the goals of the Center City Plan. This is an excellent result 7 years into a Plan looking 25 years into the future.

The 2025 Plan laid out standards in the following areas: Smart Growth Development Tools, Public Participation and Intergovernmental Cooperation, Land Use and Transportation, Air and Water Quality, Economic Development, City Services, and the Center City Plan. Within the Center City Plan there are goals for Economic Development, Housing, Physical Environment, and Transportation. Interestingly, there are almost as many strategies for the Center City (242) as for the entire residual City Plan (244). The primary reason for the less successful implementation rates for the Center City Plan was the elimination of the entity that was to be the primary implementation driver in Downtown, the City Development Office, due to changing City policies. The commitment of a subsequent City Council to a new Downtown Master Plan reinvigorated these goals, and the intent of much of the Center City Plan was included and expanded in the Downtown Master Plan, now being implemented.

The seven sections of the 2025 Plan envision and require participation from all City Departments and multiple other government entities and the local organizations. Many of the goals have practical, easily achieved strategies and these have seen the greatest progress. Some of the more visionary goals have strategies require substantial action outside the control of the City and those have seen less progress. Some are ongoing goals that will always need to be monitored. Some of the strategies require substantial funding that has not been available, or participation of organizations that are no longer active, or reflect changing directions of Council policies.

As of this date, it can be definitively stated that the 2025 Plan is moving toward success – with major strides made since 2003. This is clearly not a Plan that has "sat on a shelf". All City Departments, all subsequent City Councils, many related organizations and outside organizations have and continue to, contribute to that success. That success, however, does not include a number of the most important and visionary goals the City set for itself. There are still a number of areas of the Plan that have seen limited success. Some of these will need funding, but others can still be achieved through the ongoing commitment of the City Council, Asheville's committed and dedicated residents, and the continuing commitment and hard work of the City staff.

The commitment to this ongoing work is the primary reason that staff reports to the Council reflect the relationship any subject matter to both the Council goals, and the 2025 Plan. Statistically, implementation success of the Plan is as follows:

	Goals / Strategies	Achieved or Major Progress
Section 1 Smart Growth Vision		
Development Tools	8 / 39	80%

Section 2 Communication		
Public Participation and Intergovernmental Cooperation	3 / 5	100%
Section 3		
Land Use	13 / 72	82%
Transportation	9 / 45	62%
Section 4		
Air/Water Quality	12 / 16	85%
Section 5		
Economic Development	8 / 14	90%
Section 6 City Services		
Fire	5 / 12	100%
Police	8 / 8	100%
Streets	3 / 5	90%
Solid Waste/Recycling	2 / 2	100%
Water	3 / 3	100%
Sewer	5 / 5	100%
Schools	1 / 4	75%
Parks, Recreation, Open Space	3 /14	90%
CITY PLAN TOTAL	**83 / 244**	
Section 7 Center City Plan		
Economic Development	6 / 74	68%
Housing	3 / 47	55%
Physical Environment	10 / 56	54%
Transportation	7 / 65	59%
CENTER CITY PLAN TOTAL	**26 / 242**	

Achievements include (1) Practical, necessary, achievable strategies; (2) Ongoing commitments and monitoring; (3) Bold action by City Council; (4) Ongoing participation and push for action by citizens; and (5) Volunteer actions.

Challenges include (1) Limited funding for some goals; (2) Required actions from outside entities; (3) Action organizations disbanded or never formed; and (4) Visionary goals with long range action required.

2025 Plan through 2009 for the City Center Plan include: (1) *Significant Challenges* (a) Loss of City Development Office; and (b) National/Regional Economy; and (2) *Significant Achievements* (a) Adoption of Downtown Master Plan; (b) Downtown Master Plan Implementation Committees; and (c) Near Completion Pack Square.

Challenges Looking Forward: 2010 to 2025 (1) Consider Plan update by 2015 – differential visionary and ongoing goals; (2) Continue building cooperative relationships with local and state government to achieve some visionary goals; (3) Unified Development Ordinance/Zoning goals require substantial staff time (or consultants) for research and processing; (4) Some transit goals depend on both added density along transit corridors and supplemental funding; and (5) Some goals face ongoing fiscal constraints.

Overall much to celebrate and much more to do - *If visionary, a Plan never fully meets all goals, but it should achieve success in many goals and keep working on or modify the boldest goals.*

When Mayor Bellamy asked if we will have more restrooms downtown, Ms. Daniel replied that she will work on that.

Mayor Bellamy thanked Ms. Daniel for this update and looked forward to continuing updates.

B. RESOLUTION NO. 10-24 - RESOLUTION ADOPTING REVISIONS TO THE HOUSING TRUST FUND GUIDELINES

Community Development Director Jeff Staudinger said that this is the consideration of a resolution authorizing revisions to the Housing Trust Fund Guidelines.

Community Development Division staff and Council's Housing and Community Development Committee have been reviewing and revising the Housing Trust Fund's policies and procedures since June. The purpose of the review was to ensure that available resources are strategically targeted, and that the Trust Fund aligns with the City's strategic housing goals.

The Committee notes the following issues:

- The Guidelines have not been revised since the release of the Affordable Housing Plan;
- City budget constraints have reduced the annual allocation to the Fund;
- The need for newly affordable rental housing is a clear priority arising from the 2009 Housing Needs Assessment and Market Analysis.
- Lessons learned in the Fund's operations need to be translated into the Fund's application and underwriting processes.

The review is now complete, and the Housing and Community Development Committee recommends 21 changes to the policy and procedures. These are summarized below, and are incorporated into the proposed revised application guidelines.

Eligible projects, eligible applicants, eligible uses:

1) Grants will not be made from the Fund.
2) Loans for homeownership housing will be for construction only.
3) Soft second mortgages will be discontinued.
4) Applications for manufactured housing are to be considered provided that units are on a permanent foundation and titled as real property.
5) Rehabilitation loans are to be considered for the conversion of market rate developments to affordable housing provided that the displacement of current residents remains minimal and that the impact on the available workforce housing stock is negligible.
6) Public Housing Agencies and State/Local governments to be listed as eligible applicants.
7) Affordable units pledged in exchange for density or conditional zoning are not eligible for HTF financing. However, if the total number of affordable units pledged for density or conditional zoning and for Housing Trust Fund financing equals 20% of all units, an application can be considered for those additional Housing Trust Fund units.
8) A minimum of 20% affordable units of the total project units being developed is required for consideration of HTF financing.

Priorities for use of the fund:

9) Rental Housing will be prioritized over homeownership with the goal to award a minimum of 75% of available HTF funds to rental projects (as averaged over the most recent three year period).
10) Multi-family housing is to be prioritized over single-family housing.
11) Larger scale projects requiring less subsidy per unit will be prioritized.
12) Program resources will be targeted to the income demographic(s) identified in the new Housing Needs Assessment as being in the most need of assistance.
13) Higher priority will be given to applications that create 1-bedroom and efficiency units as noted in the Affordable Housing Plan.
14) Higher priority will be given to projects developed along transit corridors.
15) Higher priority will be given to projects that meet the highest level of energy efficiency as determined by an independent rating system.

Terms and Conditions:

16) The affordability period for non-construction loans is to be equal to the term of the loan repayment.
17) A tiered interest rate structure will be based on the number of affordable units provided as shown in the following Table.

Number of Affordable Units	Interest Rate
1-9	4.50%
10-19	3.00%
20-29	2.50%
30+	2.00%

18) The maximum housing-for-sale sales price is to be eliminated and qualification is to be based on the cost to the buyer after subsidy. The final cost to the buyer, as measured by the monthly PITI (principal, interest, taxes and insurance for all primary and secondary financing sources) is not to exceed 30% of the buyer's household income and the buyer's total household income cannot exceed the 100% of the area median income (100% AMI)
19) Maximum loan amounts are to be based on per-unit subsidy rather than a predetermined amount as shown in the following Table:

Per Unit Subsidy Requested	Maximum Loan amount
More than $20,000	$0.00
$15,001 to $20,000	$150,000
$10,001 to $15,000	$200,000
$5,001 to $10,000	$300,000
Less than $5,000	$500,000

Application Review Process:

20) A minimum score must be achieved before an application is reviewed by HCD for funding.
21) Staff will score applications to determine that projects meet the minimum threshold. Additional review by an outside expert/consultant to provide a commercial underwriting analysis will be performed if determined necessary and advisable by the CD Director.

These changes directly support the City's Strategic Operating Goals of: (1) Affordable: Many of the recommendation directly support recommendations made in the 2008 Affordable Housing Plan; all are intended to continue to make housing affordable for Asheville citizens; and (2) Sustainable: These proposed changes prioritize development located near to transit lines, higher urban development densities, and encourage higher standards of energy efficiency.

Pros:

- The proposed changes align the Housing Trust Fund policies with the strategic plans developed by the City of Asheville;
- The proposed changes prioritize projects that meet the greatest housing needs of the community;
- The proposed standards encourage increased leveraging of the Housing Trust Fund resource;
- The proposed changes will prioritize longer periods of housing affordability.

Cons:

- The proposed changes reduce the amount of funds available per unit;
- The proposed changes will eliminate the participation of the Housing Trust Fund in the long-term financing of single-family housing.

The proposals do not affect the amount of funding contributed from the City's General Fund to the Housing Trust Fund.

City staff recommends City Council adopt a resolution adopting the proposed changes to the Housing Trust Fund policy.

Mr. Staudinger responded to various comments/questions from Council, some being, but are not limited to: how did staff come up with the percentage of affordable units required for consideration of financing; when staff looked at adjusting the interest rates based on the number of affordable units, why did they use units instead of a percentage of units; request to proofread the guidelines for possible errors; suggestion to have only the definition of eligible projects (not eligible projects and ineligible projects); how often do we subordinate a loan; has the City ever had to foreclose on a loan or been involved in foreclosure proceedings; does the subordination issue come before Council or does staff make that decision; and how do we enforce affordability over the term of the loan with houses.

When Councilwoman Manheimer expressed concern about subordinating our loans, Mr. Staudinger said that the next portion of review that staff will be doing is reviewing some of our specific underwriting policies as we look again to reflect the changing economic times and look at what is happening in the real estate market in general. That will be part of the work staff will bring to the Housing & Community Development Committee this year.

Mr. Alan Ditmore expressed various concerns about the Guidelines.

Rev. Christopher Chiaronmonte felt the Guidelines do not meet the basic needs of the poor.

Mayor Bellamy noted that single room occupancies are allowed in the City of Asheville, but we need individuals who want to operate them.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-24. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 332

C. INVOCATIONS AT COUNCIL MEETINGS

At Mayor Bellamy's request, it was the consensus of Council to delay this item in order to give City Attorney Oast sufficient time to provide Council the necessary information, as he is currently defending the City in a lawsuit. This matter will be rescheduled on a future meeting.

D. RESOLUTION NO. 10-25 - RESOLUTION APPOINTING MEMBERS TO THE GREENWAY COMMISSION

Vice-Mayor Newman said that the term of Phyllis Stiles, as a member on the Greenway Commission, expired on December 31, 2009.

There also currently exists a vacancy by Rev. Russ Pierce, whose term will expire December 31, 2010.

At the January 12, City Council meeting, it was the consensus of Council to interview M. James Grode, Stephen Jones, Bill Jones and Sandy Tarantino.

After Council spoke highly of the candidates, M. James Grode received 5 votes; Stephen Jones received 4 votes; Bill Jones received 2 votes; and Sandy Tarantino received 1 vote. Therefore, Stephen Jones was appointed to serve the unexpired term of Rev. Pierce, term to expire December 31, 2010 and M. James Grode was appointed to serve a three-year term, term to expire December 31, 2012. Both terms are until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 333

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte spoke about the homeless in Asheville.

Mr. Alan Ditmore commended on invocations at Council meetings and felt Asheville should preserve their southeastern leadership on friendliness to religious diversity.

Mr. John Kleckner, local artist, provided Council with information on his evolution of an art project and hoped to work with the City.

Ms. Leesa Kulba asked that staff provide large plan documents as soon as possible to the public to review prior to the Council meeting it is scheduled to be discussed.

The following claims were received by the City of Asheville during the period of January 1-14, 2010: Michelle Ward (Water), Kenneth Woody (Water), J. Michael Baldwin (Streets), Carolyn Termini (Parking Services), Darlene Dixon (Streets), Barbara Sullivan (Transit), Tom Brotherton (Streets), Kevin Minish (Sanitation), Sears Holding (Water), Barbara Melton (Parks & Recreation), Nathan Monroe (Police) and Deborah Arnold (Water): These claims have been referred to Asheville Claims Corporation for investigation.

City Clerk Burleson said that she would attach to the minutes as Exhibit "A" the abstract containing the number of legal votes in the Primary Election, City of Asheville, held on October 6, 2009. Also attached as Exhibit "B" is the abstract containing the number of legal votes cast in the General Election, City of Asheville held on November 3, 2009.

Closed Session

At 7:19 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is

contained in G.S. 143-318.11(a)(5); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Davis and carried unanimously.

At 8:02 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Vice-Mayor Newman and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:02 p.m.

Magdalen Burleson

MUNICIPAL ELECTION
NOVEMBER 3, 2009
ABSTRACT OF VOTES
FOR
ASHEVILLE
STATE OF NORTH CAROLINA

INSTRUCTIONS

THREE COPIES are to be made. One copy is to be signed by the County Board of Elections and delivered by them, when the canvass is concluded, to the City Clerk (GS 163-300). One copy is to be retained by the County Board of Elections. One copy is to be mailed on canvass day to the Chairman of the State Board of Elections, Raleigh, North Carolina (GS 163-182.6).

STATE OF NORTH CAROLINA
COUNTY OF BUNCOMBE

The County Board of Elections for said county, having opened, canvassed, and judicially determined the original returns of the election in the precincts in this county, held as above stated, do hereby certify that the above is a true abstract thereof, and contains the number of legal ballots cast in each precinct for each office named, the name of each person voted for, their party affiliation, and the number of votes cast for each person for the office named.

This is the 10th day of November, 2009

This day personally appeared before me, JOE BYRD
Chairman of the County Board of Elections, who being duly sworn, says the abstract of votes herein contained is true and correct, according to the returns made to said Board.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed My notarial seal this the 10 day of NOV, 2009.

(Seal)

My Commission (if any) Expires: 8/21/10

Tuesday – February 9, 2010 - 2:00 p.m.
Worksession

Present: Mayor Terry M. Bellamy, Presiding (excused from worksession at 4:04 p.m.); Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman William A. Russell Jr. (illness)

CONTINUATION OF DISCUSSION REGARDING STRATEGIC PARTNERSHIPS

City Manager Gary Jackson said that City Council discussed the Financial Crossroads White Paper at its January 19 worksession. As follow-up and preparation for a continuation of this discussion at its February 9, 2010, worksession, he provided Council with the following requested specific background information from City staff to include:

1) Summary of local/state revenue options for the City of Asheville
2) Federal appropriations requests
3) Summary of Buncombe County/City of Asheville financial partnerships
4) Parks & Facilities 5-Year Capital Improvement Plan needs
5) Revenue generating ideas (city staff brainstorming ideas)

Federal Legislative Agenda

At the Jan. 19 City Council worksession, a request was made for staff to explore and provide information about City projects that could be submitted for Federal funding consideration. Since then, Congressman Health Shuler's office has issued its appropriations request form for Fiscal Year 2011 and asked that submissions be returned to his office by Feb. 16. Similar processes are expected to begin with Senator Burr and Senator Hagan in the coming weeks.

In response to the Jan. 19 request, and in preparation for the federal appropriations process, staff has compiled for Council consideration a list of projects that could be submitted to Federal representatives. She provided council with a chart of the Appropriations Bill, Project Name, Description, Project Cost and Strategic Plan Alignment.

Project names and project costs consist of: Mills River Solar Farm Project - $2 Million; Municipal Facilities Building Retrofits - $1 Million; Water Transmission Main Replacement - $7 Million; Radio Tower Infrastructure Project - $1.4 Million; Emergency Response Team armored vehicle - $303,000; Bulk Water Loaded Stations (Three Stations) - $132,000; Water System Threat Assessment Update - $100,000; Self-Contained Breathing Apparatus - $250,000; North Asheville Fire Station - $1 Million; Memorial Stadium - $2 Million; Recreation Center at Livingston Street Park (GIFT Project) - $4 Million; Asheville City Hall Restoration Project - $3.5 Million; Municipal Water and Utility Maintenance Facility - $10 Million; Obesity Management for Asheville Project Participants - $120,000; On-site Clinic Expansion for Asheville Project Monitoring - $250,000; Emergency Traffic Signal Preemption - $495,000; Asheville Transit Bus Replacement (1 hybrid diesel electric bus) - $600,000; Tunnel Road Sidewalk Project – Veteran's Walk - $3 Million; and Riceville Road Sidewalk Project – Tunnel Road to Bull Mountain Road - $700,000.

She ran this list past Congressman Shuler's office to get a feel of what the Congressman is interested in and the following are the projects most appealing: Mills River Solar Farm Project - $2 Million; Municipal Facilities Building Retrofits - $1 Million; Radio Tower Infrastructure Project - $1.4 Million; Asheville City Hall Restoration Project - $3.5 Million; Obesity Management for Asheville Project Participants - $120,000; On-site Clinic Expansion for Asheville Project

Monitoring - $250,000; Emergency Traffic Signal Preemption - $495,000; Asheville Transit Bus Replacement (1 hybrid diesel electric bus) - $600,000.

Last year, the City of Asheville submitted appropriation requests for:

- Asheville-Buncombe Regional Emergency Training Facility ($4,000,000): Buncombe County has moved forward with securing funding for this project to proceed.

- Asheville Transit Bus Replacement – Hybrid Buses ($7,875,000): In FY2010, Asheville was successful in securing $238,000 for Asheville Transit bus replacements with the assistance of Congressman Shuler. This was preceded by $294,000 secured in FY2009.

- Emergency Signal Preemption ($495,000): Asheville has not received funding for this request.

- Municipal Building Retrofits and CNG Vehicle Conversions ($1,749,000): Asheville did not receive funding for this request through the appropriations process. However, Asheville allocated Energy Efficiency and Conservation Block Grant (EECBG) funding for facility retrofits and has applied for another ARRA grant for CNG vehicle conversions.

Based on City Council's direction to submit projects, staff will proceed with developing full project proposals for submission by Feb. 16. These submissions would also be extended to Senator Burr and Senator Hagan.

Staff is seeking City Council's direction on identified projects as well as other projects Council would add to the list. She explained why she felt 3-5 proposals should be submitted.

Throughout discussion on the draft project list, staff responded to various questions/comments.

Mayor Bellamy suggested that in the future staff provide Council with a list of what our representatives have supported in the past in order to give Council an idea of what they might support.

Public Works Director Cathy Ball responded to Councilman Davis when he questioned if the Azalea Road Project would be a good project to add to this list.

Mayor Bellamy requested the project list include the funding of I-26 Connector and the realignment of the road along the river. These two projects will not only benefit Asheville and Buncombe County but our entire region. She also supported projects in the safe and homeland security areas as these seem to be the projects that have been traditionally funded.

After each Council member explained their thoughts on which projects should be submitted, it was the consensus of Council to mark their top five projects, have staff compile the votes and bring the total votes back to the formal meeting later in the day for approval. In addition, it was the consensus of Council to have staff prepare a cover letter, for the Mayor's signature, to send to our representatives attaching our federal appropriation list including language to (1) request for funding of the I-26 Connector; (2) realign of the road along the river; and (3) emphasis the importance of the Asheville City Hall Restoration Project.

Selected Revenue Options

Chief Financial Officer Ben Durant provided Council with the following selected revenue options:

Revenue Item	Estimate	Description
1 cent on Property Tax	$1.0 million	The tax rate is set locally as part of adopting the annual operating budget.
Population-based Sales Tax Distribution formula	$3.0 million	Sales taxes are currently distributed to Buncombe County and municipalities within the County based on an "ad-valorem" distribution method. If the alternative "population-based" distribution formula were used, the City would gain $3.0 million in additional revenue per year. Buncombe County is authorized to select the distribution method.
Additional half-cent sales tax	$3.2 million	General Assembly approval needed.
1% Hotel/Motel Tax	$1.5 million	(He provided Benchmark Data on Occupancy Tax)
1% Food & Beverage Tax (City)	$3.3 million	There are currently 4 counties and the Town of Hillsborough that levy a 1% prepared food & beverage tax. The counties are: Cumberland, Dare, Mecklenburg, & Wake. Staff compared the amount of revenue that each of these entities collects from this tax to their total retail sales and used that percentage to make an estimate of how much would be collected in the City of Asheville.

Revenue Item	Estimate	Description
Additional $5 Motor Vehicle Fee	$325,000	The City currently charges a $10 motor vehicle fee, with $5 earmarked for Transit. The City would need legislation to increase the vehicle tax, and it could only be increased by $20 (max of $30). Without special legislation, the maximum amount is $10 for cities that operate a transit system and $5 for those that don't.
Fee Recovery	$200,000	Based on fee change requests that have been proposed by departments, there is a potential for $200,000 in additional. Staff is currently analyzing additional opportunities to pursue enhanced or full cost recovery for specific services.

Mr. Durant then reviewed with Council a chart of several different surrounding area counties and cities of their percentage of ad valorem levy and their sales tax revenue vs. their percent of population and their sales tax revenue. For Asheville, the sales tax revenue for the percentage of ad valorem levy is $14,959,877 and the sales tax revenue for the percent of population is $18,442,694.

Mr. Durant also provided Council with a base list of revenue generating ideas (City staff brainstorming ideas) and partnership opportunities.

Mayor Bellamy felt that a necessary step in order for us to discuss different revenue options with our partners is to identify what the additional revenue would be used for. She supported several of the different revenue options presented as long as we identify the use, with

her preference being basic infrastructure. She wanted to be able to present a unified vision of what we need when we meet with our partners. For example, the City partnered with the Buncombe County Tourism Development Authority on the Wayfinding Project. Since that project is finished, we should have a list of what else would be a good fit for partnership with them on.

Councilman Bothwell felt a partnership possibility would be with the Towns of Black Mountain and Woodfin, since the County's formula of sales tax distribution would be beneficial to them as well.

Councilman Smith suggested the following three discussion items with the County Commissioners: (1) downtown shuttle to move people more easily around downtown and help alleviate some of the parking stresses; (2) parks; and (3) the Wilma Dykeman Riverway. He felt a portion of the County's sales tax could be used to create Buncombe County and Asheville as a greater destination.

Vice-Mayor Newman felt we need to identify those infrastructure pieces that there is a really strong case for regional participation. He supported focusing in on investments in downtown; regional parks, recreation and cultural assets that are clearly being used by non-City residents; and the riverfront (including Wilma Dykeman Riverway and greenway components).

Councilman Davis felt the creation of a Regional Parks/Sports/Facilities Commission would be beneficial to not only the City, but the County and surrounding municipalities. He felt the Commission would be a good opportunity for consolidation or an authority, but it has to have trust by contributing funds.

At Councilman Newman's suggestion, it was the consensus of Council to have staff provide additional information on the different structuring models for City-County partnerships.

Councilman Davis also wondered if transit might be included with a County partnership.

Mayor Bellamy said that since the largest part of our budget is public safety, she suggested some consolidation partnership with the County on some of those efforts.

Councilman Smith suggested a County partnership on some of the following ideas that will help them achieve some of their goals County-wide (1) how Asheville can create more density on the corridor (while creating more construction jobs) in order for the County to protect it's open space; (2) improving our downtown and parks infrastructure (recognizing they have a lot of infrastructure needs they have) and when Asheville prospers, so does the County. We have open space protection, job creation and infrastructure creation to begin conversations with the County.

Councilman Bothwell also suggested adding $2 more a ticket for events at the Civic Center, with City residents not paying the surcharge and if the County helps fund the Civic Center, then County residents would not have to pay the surcharge as well.

Councilwoman Manheimer felt that staff should identify the needs that we have that transcend the City of Asheville that we can sell to our partners and build a case for the funding needs and how it will help us all. Then it's City Council's job to make the sale.

Councilman Davis noted that if we receive funds through partnership opportunities, then we can so some reallocation of existing funds for our basic needs.

Councilman Smith asked for information on how the restaurants would be impacted with an additional 1% food and beverage tax.

At Vice-Mayor Newman's suggestion, it was the consensus to form a subcommittee of Council (Vice-Mayor Newman Chair, Councilwoman Manheimer and Councilman Davis) to work with the City Manager to discuss ideas of potential partnerships and come up with a 3-5 list that our partners see the benefit of them funding, not just one time but long-term, and bring it back to Council for review.

DOWNTOWN PARKING PLAN

Director of Transportation Ken Putnam provided Council with the following Downtown Parking Action Plan dated November 8, 2006:

Item	Description	Estimated Total Costs*
1	Evaluate adding levels to Rankin Street Parking Garage	N/A
2	Evaluate demo and reconstruction of existing parking garages	N/A
3	Evaluation of parking option in the Battery Park area	N/A
4	Determine highest and best use of the property the City owns on Haywood Street.	Unknown
5	Surface parking on North Lexington	$15,000
6	Surface parking on Cherry Street	$25,000
7	Evaluate possibility of new parking lot on Rankin Avenue across from the Civic Center	$13 M
8	Parking at or near the Senior Opportunity Center	Unknown
9	Parking at or near the Sheriff's Office/Ann Street	Unknown
10	Public/Public partnership on Cox Avenue and College Street to include public parking	$3.5 M
11	**Public/Private partnership on Biltmore Avenue to include public parking**	**$5 M****
12	Park side parking initiative	$10 M**
13	Determine feasibility of locating parking facility over I-240	Unknown

* Estimated total costs –These costs include previous expenditures and estimated future costs. Due to escalating construction costs these are subject to change.

** These are subject to change depending on financing options such as tax increment financing. This figure assumes $20,000 per parking space plus 20% contingency.

He also provided Council with the following status update of the Downtown Parking Action Plan items:

Item # 1 – Evaluate adding levels to the Rankin Avenue Parking Deck – City staff coordinated an initial review and determined that the project would not be feasible. Although the Rankin Avenue Parking Deck, which was constructed in 1988, was originally designed to be expanded by two levels, current building code requirements have changed significantly making this option cost prohibitive.

Item # 2 – Evaluate the demolition and reconstruction of the existing parking decks – Although this option might be the best one to increase parking, City staff does not recommend it until additional parking is available due to the loss of parking during the demolition and construction activities.

Item # 3 – Evaluate parking options in the Battery Park area – City staff has had initial discussions with AT&T regarding their surface parking lot that is bordered by O.Henry Avenue, Haywood Street, and North French Broad Avenue.

Item # 4 – Determine the highest and best use of the City-owned property on Haywood Street – City staff is currently reviewing a RFP for a public/private partnership that would include a hotel and parking deck. The Office of Economic Development has more detailed information.

Item # 5 – Surface parking on North Lexington Street – This project, which is located under I-240, is completed and includes a paved, surface parking lot with a total of 15 metered parking spaces and one handicapped parking space. Parking is prohibited from 8:00 pm until 6:00 am.

Item # 6 – Surface parking lot on Cherry Street – There is an agreement between the North Carolina Department of Transportation and the City of Asheville allowing the City to use the property between I-240 and Cherry Street for parking purposes. The City's skateboard park is also located on the subject property. Parking is currently allowed on most of the property although it has not been improved. There is a paved area between the skateboard park and Broadway. Due to complaints, City staff is currently exploring options to better control the subject area.

Item # 7 – Evaluate the possibility of a new parking deck on Rankin Avenue across the street from the Civic Center Parking Deck – Conceptual plans have been prepared; however, this project is currently on hold due to the possible project at 51 Biltmore Avenue.

Item # 8 – Parking at or near the Senior Opportunity Center – This project has been completed with the addition of a mixture of permitted and metered on-street parking along Grove Street. The monthly permits are available at a cost of $30 per month and currently the Griffin Apartments (a MHO project) buys 10 to 12 permits per month for their renters.

Item # 9 – Parking at or near the Sheriff's Office/Ann Street – City staff has not explored the subject item in great detail; however, initial contacts with the property owner have not been very favorable.

Item # 10 – Public/public partnerships on Coxe Avenue and College Street to include public parking – Buncombe County prepared plans to construct a parking deck along College Street adjacent to the Health Department and to construct a parking deck along Coxe Avenue adjacent to the Department of Social Services *(the old Sears building)*. The College Street Parking Deck has been completed and is used primarily by County employees and citizens that are called for jury duty. Public parking is also available. The County has decided not to construct the Coxe Avenue Parking Deck. During the entire planning and design process, City staff explored partnership opportunities with the County.

Item # 11 – Public/private partnership on Biltmore Avenue to include public parking – A project to include a hotel and a parking deck is currently ongoing. The project is located at 51 Biltmore Avenue and the construction plans have been completed. The City's finances are in place and the project is ready for the construction phase. We are still waiting for the private developer to secure financing. Options on the property are set to expire on June 30, 2010.

Item # 12 – Parkside parking initiative – This item would locate a parking deck on property bordered by Eagle Street, Spruce Street, Marjorie Street, and Davidson Street. City employees currently use most of this property for parking purposes. A potential public/private partnership might be with the anticipated performing arts center.

Item # 13 – Determine the feasibility of locating a parking facility over I-240 – City staff has not explored the subject item in detail yet. This project would be very difficult to pursue due to involvement with the Federal Highway Administration and the North Carolina Department of Transportation and it could be cost prohibitive.

Upon inquiry of Mayor Bellamy, there was discussion on whether the City can transfer some of our Parking funds to the General Fund, similar to how we can use some of our Water Funds to supplement some of our other basic needs. City Manager Jackson said that Chief Financial Officer Ben Durant will provide more detail on this as we get into the budget process.

Mr. Putnam answered various questions from Councilman Bothwell, some being, but are not limited to: what are the peak times for parking space deficiencies; has staff researched smaller parking spaces; and how does the rise of gas prices affect transit ridership.

Councilman Bothwell suggested a partnership opportunity with surrounding counties on satellite parking lots for those who live outside of Asheville but work in the City.

At the request of Vice-Mayor Newman, Mr. Putnam updated Council on the status of the Biltmore Avenue public/private project.

It was the consensus of Council to instruct City staff provide the following information at the March worksession: (1) a contingency plan if the Biltmore Project does not proceed due to the private sector not being able to fulfill its obligations; and (2) details on transferring funds from an enterprise fund into the general fund. It was also the consensus to have City Attorney Oast send a letter to the appropriate person asking for re-engagement of discussions regarding the AT&T parking lot.

CITY-OWNED PROPERTY/FACILITIES

At this time, Mayor Bellamy requested to be excused from the worksession. Prior to leaving, she supported moving forward with the Flying Frog property as soon as possible.

Vice-Mayor Newman then presided over the remainder of the worksession.

Economic Development & Civic Center Director Sam Powers explained the City-owned land initiatives. As an introduction, he said that (1) Background to the RFQ process: the opportunity to redevelop City owned property to advance Council's and the Community's strategic goals for Asheville; (a) Basis of staff presentation to Council, April 2006; (b) Underperforming city assets; (c) Consolidation opportunities for City services; and (d) Low hanging fruit; and (2) Method identified, May 2007 (a) RFQ/RFP process; and (b)Transparent, methodical, key for public-private partnerships.

Community benefits that could be realized (1) Leverage real estate for community benefit; (2) Minimize cost to taxpayers; (3) Property tax base increase; (4) Job creation; (5) Redevelopment that meets community goals; and (6) Vibrant and sustainable downtown.

The next step, defined the guiding principles that would inform the process is (1) Enhanced tax base; (2) Smart growth; (3) Realistic market opportunities; (4) Attract innovative developers; (5) Path to redevelopment next 2 to 4 years; (6) Focus City efforts to be results-oriented; (7) Transparent process; (8) Best use of public assets; (9) Economically and environmentally sound; (10) Workforce housing; (11) Potential public space; (12) Potential public parking; (13) Involve local businesses; (14) Support City's Minority Business Plan; (15) Cost-benefit of relocating municipal facilities; (16) Limit impact on tax payers; (17) Promote live-work-play downtown; (18) Market Assessment & Overview; and (19) Invite adjacent property owners.

The following is the City-owned land identified – Phase I:

Potential Redevelopment Site	Priority	Supported Market Uses	Development Timeframe

Ralph Street	1	Multifamily Workforce Housing	1.5 – 3 years
Choctaw Street	1	Multifamily Workforce Housing	1.5 – 3 years
Asheland Avenue	1	Multifamily Workforce Housing	1.5 – 3 years
Old Asheland Avenue	2	Multifamily Workforce Housing	1.5 – 3 years

The following is the City-owned land identified – Phase II:

Potential Redevelopment Site	Priority	Supported Market Uses	Development Timeframe
Haywood Street Properties at Civic Center	1	Upscale hotel, retail, limited office, structured parking	2 – 4 years
Eagle – Market Street Property	1	Office or multifamily residential	1.5 – 3 years
Office of Economic Development	1	Office or multifamily residential; ground floor commercial	1.5 – 3 years
Park Maint. Property	2	Multifamily residential, limited commercial	1.5 – 3 years

Long-term priorities include:

Potential Redevelopment Site	Priority	Supported Market Uses	Development Timeframe
Transit Operations Center	3	Multifamily residential	3 – 5 years
Parkside Property	3	Office; upscale hotel or residential condo; supporting commercial structured parking	5 – 7 years
S. Charlotte Street Properties	3	Corporate headquarters with complementing uses or multifamily residential and commercial	8 – 10 years

In Phase I, staff proceeded with RFQ for 2 properties; (1) Ralph Street; and (2) Choctaw Street. The following other two have been deleted from Phase I per Council's direction: (1) Old Asheland; and (2) Asheland

In Phase II, staff proceeded with the RFQ for 4 properties – Fall 2007; (1) Haywood Street at Civic Center; (2) Eagle-Market Street; (3) Office of Economic Development; and (4) Park Maintenance.

Long-term priorities include: (1) Transit Operations Center; (2) Parkside Property; and (3) S. Charlotte Street.

The facilities assessment is needed for the following (1) Ralph & Choctaw Street; (2) Asheland & Old Asheland; (3) Haywood Street at Civic Center; and (4) Eagle-Market Street. In addition to a facilities assessment for the following properties, redevelopment of these parcels require long-range planning and relocation of City facilities: (1) Office of Economic Development; (2) Park Maintenance; (3) Transit Operations Center; (4) Parkside Property; and (5) S. Charlotte Street.

The facilities assessment in the Winter of 2007 included (1) In December 2007, the "City of Asheville Facilities Assessment Report" was produced; (2) Reviewed the space needs for various city operations for the next 10 to 20 years; (3) Key highlights: (a) Identified space deficiencies in several departments; (b) Proposed operational consolidation (i) One stop shop for permitting; (ii) Consolidation of Street, Parks and Water Maintenance operations; and (iii) Consolidation of Vehicle Maintenance operations; and (4) Further defined the need for additional space/property to address long term vision.

Regarding the facilities master planning, (1) In August 2008, Jeff Richardson presented Facilities Master Planning to Council; (2) Framed as a three phase project; (a) Phase I: Critical needs assessment & recommendations; (b) Phase II: Comprehensive facility analysis; and (c) Phase III: Implementation planning for mid- and long-term needs; and (3) Key Outcomes of Facility Master Planning; (a) One Stop Shop at Public Works; (b) Oakley Police Center Development; (c) Relocation of Economic Development to City Hall; re-purpose of 29 Haywood Street for Police Department use; and (d) Anticipated relocation of Park Maintenance to the Armory at Shelburne Road.

In summary, the variables are (1) Impact of the Recession; (2) Lending Environment; (2) Constraints on City Resources: Financial and Manpower; and (4) Infrastructure Requirements of City Property.

Affirmation of Policy: (1) RFQ: Current Position; (a) DTMP Implementation; (b) RENCI 3D Modeling, community review; (c) Haywood Street: McKibbon Hotel Group, Feb. 2008; (d) Park Maintenance property: Mountain Housing Opportunities Feb. 2008; (e) Ralph and Choctaw Parcels: Mountain Housing Opportunities 2007; and (f) Asheland / Old Asheland: PED Recommendation, Fall 2009; (2) Facilities Master Planning: Current Position; (a) Armory at Shelburne Road is designated relocation for Park Maintenance function and other mid-term uses; and (b) Developing long range vision for future RFQ properties; and (3) Policy feedback.

There was a brief discussion by Council on the Haywood Street properties.

Vice-Mayor Newman recessed the meeting at 4:39 p.m. to reconvene at 5:00 p.m. in the Council Chamber.

Present: Mayor Terry M. Bellamy (arrived at 5:05 and excused at 7:55 p.m.), Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman William A. Russell Jr. (illness)

PLEDGE OF ALLEGIANCE

Vice-Mayor Newman led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Newman gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF A.C. REYNOLDS FOOTBALL TEAM IN WINNING THE STATE 4-A CHAMPIONSHIP

Vice-Mayor Newman recognized Head Coach Shane Laws, Kenny Cubra, Carson Gratton and Jake Whitaker, as well as the entire A.C. Reynolds football team, in winning the State 4-A Championship.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 26, 2010

B. RESOLUTION NO. 10-26 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO FUND THE TRANSIT PLANNING PROGRAM

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to fund the transit planning program, Section 5303 Planning Grant of the Federal Transit Administration (FTA) Metropolitan Planning Organization (MPO).

The FTA MPO Section 5303 Planning Grant is an annual grant designated exclusively for transit planning. The funds are currently administered by the City of Asheville as a direct recipient of Federal Transit Funds. The funds are primarily used to pay the Transit Projects Coordinator position (90% of the grant) and a portion of the Transportation Manager position (the remaining 10%) for time spent on transit planning. In addition, the funds support grants administration and reporting activities, short range and long range transit planning, transportation improvement program preparation, Title VI and DBE programs, and planning and operational analyses.

Fiscal Year 2009-10 anticipated funding totals $72,060. The grant will fund 80% of the anticipated funding, which equals $57,548, the City will fund half of the 20% local match, which equals $7,206. The North Carolina Department of Transportation will provide the additional half of the 20% local match.

The anticipated grant funding and the City's local match in the amount of $7,206 are currently budgeted in the Transportation Department's approved budget.

This action complies with the current City Council's Strategic Operating Plan in the green and sustainable focus areas by helping to develop a sustainable funding structure for the Asheville Transit system.

The Transit Commission supports the subject action.

Pros:

- The subject grant helps to fund an existing position.
- The subject grant enables the City of Asheville to use $64,854 in Federal and State monies for transit planning activities.

Con:

- A 10% local match in the amount of $7,206 is required.

The total anticipated grant funding for Fiscal Year 2009-10 is $72,060. The City is required to provide a 10% local match in the amount of $7,206. The anticipated grant funding and the City's local match in the amount of $7,206 are currently budgeted in the Transportation Department's approved budget. The City's local match is included in the approved General Fund Transfer *($872,831)* to the Transit Operations Division for the current fiscal year.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into an agreement with the NCDOT to fund the transit planning program, Section 5303 Planning Grant of the FTA MPO.

RESOLUTION BOOK NO. 32 – PAGE 334

C. RESOLUTION NO. 10-27 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE U.S. DEPT. OF HOMELAND SECURITY, N.C. EMERGENCY MANAGEMENT, TO ACCEPT SUB-GRANTEE FUNDS FOR THE ASHEVILLE POLICE DEPARTMENT'S HAZARDOUS DEVICES UNIT X-RAY MACHINE

ORDINANCE NO. 3825- BUDGET AMENDMENT FROM THE U.S. DEPT. OF HOMELAND SECURITY, N.C. EMERGENCY MANAGEMENT, FOR THE ASHEVILLE POLICE DEPARTMENT'S HAZARDOUS DEVICES UNIT X-RAY MACHINE

Summary: The consideration of a (1) a resolution authorizing the City Manager to enter into an agreement with the US Department of Homeland Security, through North Carolina Emergency Management, to accept sub-grantee funds for Asheville Police Department's Hazardous Devices Unit X-ray machine ; and (2) a the budget amendment accepting funds in the amount of $57,000.

The purchase of a Digital X-ray Unit for the Hazardous Devices Unit (HDU) will enhance Asheville Polie Department's (APD) Bomb Squad by insuring we maintain NIMS III Standard and FBI Accreditation Standards.

This investment will support the State Homeland Security Strategy 2007-09 goals by enabling the local Bomb Squad Units to respond more effectively and efficiently on a regional basis, ensuring faster response to explosive incidents and other explosives related matters. This addresses a National Overarching Priority by implementing the NIMS III Standards to all bomb squads across North Carolina. In addition, it addresses a National Capability Specific priority by strengthening CBRNE detection and response capabilities.

The total grant fund award is $57,000.

This action complies with City Council's Strategic Operating Plan in the Focus Areas - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities. The purchase and implementation of and X-ray unit by HDU will greatly enhance the safety of our Citizens, as well as those in surrounding communities due to the regional response capability of APD's HDU. This equipment will also increase the safety for the members of the HDU.

Pros:

- Increase safety for HDU members
- Increased safety for our communities

Con:

- Maintenance cost

The acquisition cost for the Digital X-ray Unit is fully-funded with the $57,000 NC Emergency Management grant; thus, there is no fiscal impact on the Police Department's capital outlay budget.

APD will be required to cover the annual maintenance and operating costs associated with the equipment, Those costs are currently estimated at $500 per year and will be programmed into the department's annual operating budget request.

The X-ray unit is expected to have a useful life of 10-15 years. APD will be responsible for the replacement cost of the X Ray unit at the end of its life cycle.

City staff recommends City Council (1) adopt the resolution authorizing the City Manager to enter an agreement and acceptance of funds as a sub-recipient with NC Emergency Management; and (2) adopt the budget amendment in the amount of $57,000

RESOLUTION BOOK NO. 32 – PAGE 335

ORDINANCE BOOK NO. 26 – PAGE 34

D. RESOLUTION NO. 10-28 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH HUNTLEY CONSTRUCTION COMPANY INC. FOR THE REYNOLDS MOBILE HOME PARK WATER SYSTEM IMPROVEMENTS PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Huntley Construction Company, Inc., in the amount of $167,496.00 for the Reynolds Mobile Home Park Water System Improvements Project.

Grant Funds from the North Carolina Department of Environment and Natural Resources (NCDENR) North Carolina Water Infrastructure Act of 2005 (N.C.G.S. 150G) are available for this project and were approved by City Council on July 14, 2009, by Resolution No. 09-147.

The City of Asheville has received a grant from NCDENR to replace the existing, private, failing water system at the Reynolds Mobile Home Park. Upon completion of the water system improvements project, the City of Asheville will own and maintain this new water system. The Water Resources Department (WRD) issued an Advertisement For Bids for the construction and installation of approximately 2,360 Linear Feet of new 8-inch and 6-inch waterline and all necessary valves, hydrants, and service connections. In response to the Advertisement For Bids, the WRD received eight (8) proposals.

Companies responding were:

1. Huntley Construction Company, Inc. – Asheville, NC
2. Appalachian Environmental Services – Webster, NC
3. T & K Utilities, Inc. – Asheville, NC
4. Buckeye Construction Company – Canton, NC
5. MacKenzie Company – Asheville, NC
6. Spur Construction – Waynesville, NC
7. Terry Brothers Construction – Leicester, NC
8. Fallon Utility Contractors, Inc. – Asheville, NC

A review team, comprised of staff from multiple City Departments including James Lee, the City of Asheville Minority Business Coordinator, reviewed these bids and selected Huntley Construction Company, Inc., as the lowest responsible bidder at a bid of $167,496.00.

This project is part of City Council's strategic plans to improve city infrastructure and provide local companies with labor opportunities.

Pros:
- This project will provide forty (40) customers with a safe reliable drinking water source and much improved fire protection.
- The contract amount is fully reimbursable by the committed grant money.
- Approval of the construction contract to the lowest responsible bidder will invest City funds in the local economy.

Con:
- Failure to award a construction contract would lead to forfeiture of the NCDENR grant and the existing failing private water system would not be upgraded.

The Water Resources Department will initially fund the estimated construction costs of $167,496 for this project until reimbursement is received from the State. Funds for these upfront costs are already included in Water Resource's Fiscal Year 2009-10 Capital Improvement Program budget.

City staff recommends City Council approval of the City Manager to enter into an agreement with Huntley Construction Company, Inc., in the amount of $167,496.00 for the Reynolds Mobile Home Park Water System Improvements Project.

RESOLUTION BOOK NO. 32 – PAGE 336

E. RESOLUTION NO. 10-29 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A SERVICE AGREEMENT WITH HERSEY METERS CO., LLC, FOR THE FIVE-YEAR AUTOMATED METER READING PROJECT

Summary: The consideration of a resolution updating the contract amount for Hersey Meters Co., LLC, and authorizing the City Manager to sign a service agreement with them for the five-year Automated Meter Reading (AMR) Project contingent upon City Council approval of funding for the remaining four (4) fiscal years for the purchase and installation of approximately 52,000 AMR Devices to complete installation throughout the water system.

In July 2009, the City issued a Request for Proposals on the Automated Radio Frequency Meter Reading System for the Water Resources Department. On August 17, 2009, proposals were received from the four (4) following companies:

9. Hersey Meters Co., LLC

10. Metron-Farnier, LLC
11. Neptune Technology Group, Inc., and
12. Vanguard Utility Service, Inc

On January 12, 2010, City Council authorized the City Manager to sign a service agreement with Hersey Meters to install approximately 52,000 AMR devices throughout the water system for a total project cost of $6,666,625.86. There was an error in the contract amount, and it must be corrected before executing the contract documents. The error occurred by including the total cost of new meters in the amount of $2,419,421 into the total estimated project cost for all four (4) bids received. The meters will be a separate purchase, thereby decreasing the total contract amount for the installation of the AMR's.

Hersey Meters is still the lowest responsible bidder but at a reduced contract amount of $4,234,859.86 as outlined below: This $4,234,859.86 amount equals the total project cost of $6,666,625.86 minus the new meter cost of $2,419,421.

Bid Tabulation for the Automated Meter Reading (AMR) Installation Project

Cost Breakdown	Hersey Meters Co., LLC	Metron-Farnier, LLC	Neptune Technology Group, Inc.	Vanguard Utility Service, Inc.
A. Total Up-Front AMR Bid Cost	$2,758,670.86	$3,877,160.00	$3,589,650.00	$3,329,235.00
B. Total Meter Exchange Cost	$883,544.00	$2,022,420.00	$1,265,295.58	$934,819.77
C. Total Meter Retrofit Cost	$450,060.00	$346,200.00	$432,750.00	$542,380.00
D. Performance Bond Pricing	$122,585.00	$127,500.00	$72,275.00	$40,000.00
E. Total Maintenance Cost	$20,000.00	$30,000.00	$35,054.70	$15,550.00
Total Estimated Contract Cost	$4,234,859.86	$6,403,280.00	$5,395,025.28	$4,861,984.77

This project is part of City Council's strategic plans to improve city infrastructure.

Pro:

- Approval will correct the contract amount to Hersey Meters and allow the City to proceed with the AMR program.

Con:

- Without approval, the City cannot proceed with signing an agreement with Hersey Meters for the correct contract amount.

The initial investment in the AMR program is still $2,890,576 in the current fiscal year, which is currently budgeted in this year's Capital Improvement Project fund. Previously, the $2.89 million was approved to be entirely allocated to Hersey Meters. Now, the $2.89 million will be divided approximately as follows: $1,790,000 for Hersey Meters AMR devices and installation and $1,100,576 for the purchase of new meters needed for the AMR installation. The department plans to request the remaining funds over the following four (4) fiscal years to make this a five-year project unless more funds are available to reduce the program length. The cost over the following (4) years will be approximately $1 - $1.5 million per year depending on the availability of funds and inflation.

City staff recommends City Council authorize the City Manager to sign a service agreement with Hersey Meters Co., LLC, for the five-year Automated Meter Reading (AMR) Project contingent upon City Council approval of funding for the remaining four (4) fiscal years for the purchase and installation of approximately 52,000 AMR Devices to complete installation throughout the water system.

RESOLUTION BOOK NO. 32 – PAGE 338

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Manheimer and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE REGIONAL AIRPORT AUTHORITY UPDATE

Mr. David Hillier, Asheville Regional Airport Authority Director, was pleased to present Council with an update on the Asheville Regional Airport Authority. The Airport's mission is to be the premier airport of choice for Western North Carolina travelers, by providing an array of choices and amenities, distinctive customer service, value, and convenience.

He provided Council with the following facts: (1) land – 1,000 acres; (2) CY 2009 Traffic Statistics (a) operations – 66,437; (b) total passengers – 580,630; (3) Runway: 16-34 – 8,001' x 150'. Major uses consist of commercial aviation, corporate aviation, general aviation (landmark and odyssey) and military aviation.

He showed Council (1) a chart of passenger traffic growth from 2003-2009; (2) demographics within 30 miles of Asheville; and (3) 28 daily non-stop flights to 8 hub cities of Atlanta, Charlotte, Chicago, Detroit, Houston, Newark New Jersey, New York New York and Orlando on 4 commercial air carriers – Continental, US Airways, Air Tran and Delta.

Based on a 2007 economic impact study by the EDC of Asheville-Buncombe County, the Asheville Regional Airport provides the following:

Impact Type	Jobs	Annual Economic Impact	Annual Payroll
Direct	442	$68,090,925	$15,025,572
Indirect	1,624	$104,692,555	$36,112,858
Induced	364	$32,341,489	$10,487,239
Total	2,410	$205,124,969	$61,625,669

It is estimated that each additional daily flight of a 50-seat passenger jet generates approximately $9,125,000 in annual economic impact.

He then provided Council with a chart of revenue/expenses for Fiscal Year 2004 though 2010.

Some amenities and entertainment consist of (1) recharge station, (2) CNN/Muzak; (3) Massage Chairs; (4) Fee Wi-Fi; (4) Airport Art Program; (5) Promotions/Community; and (6) E-Newsletter and Fare Alerts.

2009 accomplishments consist of (1) upgraded baggage make-up; (2) upgraded baggage claim and rental car counters; (3) upgraded ticket counter; (4) new guest services center; (5) new regional boarding ramps; (6) new terminal advertising program; and (7) new fixed base operator.

2010 goals and objectives consist of (1) North GA Expansion Project; (2) Parking Lot and Terminal Roadway ($1.6 Million project to improve the flow of roadway traffic, repave the parking lots, enhance signage, lighting and landscaping); (3) new 22,000 square foot bulk hangar; (4) new entrance signage; (5) toll booth plaza ($500K Toll Plaza expansion project which when complete will provide a third exit lane from our parking lot); (5) General Aviation Roadway (paving Wright Brothers Way, putting in pedestrian sidewalks, and adding some wayfinding, a $1.7 Million investment); and (6) terminal renovation ($10.5 Million – of which $7.6 Million is from stimulus money – to be completed next summer).

Regarding environmental, (1) continued implementation of environmental practices with the adoption of an environmental policy; (2) installation of PC Air and Fixed Ground Power units; (3) installation of a new triturator (lav cart waste dumping facility); (4) implementation of a solar power energy project; and (5) seek additional federal and state environmental grants.

Air Service Development (1) develop a "Community Partnership Team" to help acquire additional air service to markets; and (2) additional marketing in the 11 county air service catchment area for Asheville to reduce leakage.

It is estimated that Asheville leaks more than 45% of its potential traffic to Atlanta, Charlotte, Greenville-Spartanburg, etc. Main causes are air fares and non-stop service.

Using a map, Mr. Hillier explained the catchment area. The Asheville Regional Airport serves 11 counties in Western North Carolina. Each county is geographically and economically unique.

Key objectives include (1) fund the future development program as a pay-as-you-go program; no local tax dollars or long-term debt financing are currently used or will be used in the future; (2) promote general aviation and commercial air travel from and to Asheville and Western North Carolina; (3) seek additional air service options for both the business and leisure traveler; and (4) seek aviation and non-aviation related business development opportunities.

On behalf of City Council, Mayor Bellamy thanked Mr. Hillier and the entire Airport Authority for their hard work.

B. PLANNING & ZONING COMMISSION UPDATE

Ms. Cindy Weeks, Planning & Zoning Commission Chair, provided Council with the following report on the Asheville Planning & Zoning Commission which is an appointed advisory board charged with providing advice and recommendations to City Council on issues related to land use and development:

"Over the past year, the Planning and Zoning Commission has reviewed thirteen (13) applications for rezonings, this includes straight rezonings, initial zonings of annexed properties, and conditional zonings.

"Of these thirteen, seven (7) were for conditional zonings or new zonings specifically for development that was impending and has since moved forward.

"Of the seven (7) development projects that we reviewed, four (4) would be considered "public" in that the developer was a governmental or quasi-governmental entity and therefore the resulting development will be tax exempt. These four were:

- Buncombe Intermediate School South: new construction, 106,646 sf
- Irene Wortham Adult Daycare Center: new construction, 7,169 sf
- WNC Agricultural Center: renovation of existing plus new construction, 14,706 sf
- Mission Outpatient Cancer Center: new construction, 229,521 sf

"Of the remaining three (3) projects, two (2) would be considered large development new construction projects that will provide significant new tax base and property tax revenue when fully constructed. The third project was a small drive through bank at Biltmore Park Town Square.

- Crowne Plaza Resort: expansion 61,500 sf, new construction 323,200 sf
- Westmore Apartments (affordable housing): 7 buildings, 72 units, approximately 88,000 sf

"There were other smaller (Level 1) development projects that were permitted that we do not see as well as continued build out of formerly approved projects, but there was certainly a decrease in both applications for larger new development and projects actually achieving financing and moving forward.

"We spent a great deal of time dealing with economic downturn UDO amendments; Responses to Current Economic Climate.'

"Twenty UDO amendments were reviewed and approved under this category. The most notable were as follows--

- Extension of time for zoning permits (will allow developers to work on the more difficult timeframes of banks)
- Increased opportunities for businesses to advertise (through flexibility in signage)
- Increased from 50% to 75% the rule of value for cost of renovations that requires new compliance with the UDO (which will encourage the reuse of existing buildings)

"The Planning and Zoning Commission felt these were very timely and in many cases were improvements to the UDO that would stand the test of time, even without economic challenges.

"The 3 key points of development are as follows:

- The market
- Acquiring permitting and securing vested rights
- Acquiring financing

"The City's rule as the permitting authority cannot be overstressed—without zoning approvals, developers cannot acquire financing. We can't do much about the market, but we can help developers acquire and keep their financing by making the permitting process more user friendly and we have done that.

"I want to point out specifically that we had two special meetings regarding the Stormwater Ordinance, culminating with our vote on the Stormwater Buffers on October 22, 2009.

"Our entire Commission wanted me to communicate to you that although we were not in unanimous agreement with the staff recommendation on the Buffers, we were in agreement and were supportive of 99% of the other Stormwater policy recommendations that were brought before us by staff.

"The Commission was proactive on the buffer issue. Although we did not endorse the staff recommendation, we did provide an alternative recommendation and achieved a 5-1 vote in favor of that.

"I am here tonight to report to you what our Commission asked me to communicate to City Council regarding our work on behalf of the City.

"First, we all wish to state publicly and without qualification that our main goal is evaluate development proposals and policy changes by honoring the variety of plans that have been adopted by City Council and by keeping in mind the wishes of City Council regarding how our City should grow.

"When I first was appointed to the Commission, it was immediately apparent to me that one of my primary roles was to help the City grow its most important source of revenue, which is property tax revenue.

"Quoting from **Asheville NC 2010: A Financial Crossroads**, the report provided to City Council for your January retreat...

'In North Carolina, property tax revenue is typically the largest source of municipal revenue.'

"Many of the points made in this report also refer to Asheville's challenges regarding annexation.

"In order to achieve the balanced growth of our City, and protect the environment, we need to seek to implement our adopted master plans and their themes of an anti-sprawl, in-filled urban core philosophy.

"This is referred to in the report as follows...

'...research supports the notion of inter-dependency between the urban economy and the rural economy, and further suggests dense growth in urban centers is beneficial to rural areas by allowing them to remain undeveloped.'

"This leads to a possible source of collaboration with our County leaders, which was suggested by Planning and Zoning Commission members as an area that needs attention and continued outreach.

"Along with helping the City to grow its income base, we have to pay attention to the needs of our citizens for balanced growth and quality growth, as well as the needs of our community in the residential, service, business, and recreational sectors.

"This is a responsibility the Planning and Zoning Commission takes seriously and we have taken it even more seriously since the economy has taken a turn for the worse and we have seen development slow to such a great extent.

"We have had a year that we have had time to consider policy with a more detailed analysis, without the benefit (and sometimes the distraction) of having a specific development proposal before us.

"In light of the economic changes, and our knowledge of some stalled, problematic, and unimplemented development plans throughout our community, this responsibility takes on a different meaning.

"We have done well as a City—our staff, our Planning Commission, and our City Council to respond to the economic challenges before us by permitting some changes to the UDO that will help development move forward without compromising ideals or compromising the integrity of our neighborhoods.

"But we have more work to do.

"Our Commission's specific recommendations were in response to three areas of focus in our discussion...

- the state of our national and our local economy
- the need for increased revenues
- the need to continue to implement the planning documents that have been formally adopted by this body

"Here are the specific recommendations from the Planning and Zoning Commission that I was asked to communicate:

"1. As mentioned previously, forge a stronger collaboration with County leaders to break down the barriers that inhibit our growth

"2. As a result of the economic realities we are facing, and to encourage a more universal view of how development affects our community, require that development proposals forecast how many jobs will be created during the course of construction and what the resulting tax revenues will be after the project is built.

"3. Cultivate a more positive relationship with our state legislative delegation. Set this as an objective, and approach it as a "campaign"...specifically we want our delegation to support legislation for the additional revenues we may need to invest in special projects that we agree are required for our community's continued growth and prosperity, for example, the Performing Arts Center.

"4. Give due process to developers who follow the rules and make sure to assess the work that the Planning Commission has already done before striking out on new agendas in the final public hearings.

"We respect that City Council is the final permitting authority on new development but we believe that there are rules in place, that the Planning and Zoning Commission has provided that first pass at the rules and that this should be considered as the starting point. On this point, having Maggie Burleson provide to you the minutes of our meetings has helped a great deal so far as recording the deliberations that we made in coming to our conclusions.

"5. Help bring competing factions to common ground--to the "middle ground." For example, City adopted plans well document that in order to Save Our Slopes, we must increase density in our urban core.

"No one likes change in their neighborhoods.

"We must help all factions understand that City review bodies are following City plans that have had broad community involvement and input. We must keep returning to this theme.

"We are excited about some of the challenges before us this year.

"We understand that we will be participating helping to make the UDO less complicated.

"We understand that we will be working on planning new development patterns on our transit corridors and helping to build these corridors so that ridership is increased.

"We are interested in re-examining the west Asheville Haywood Corridor and seeing if we can come up with a corridor plan that can apply to other corridors.

"We seek the guidance of City Council, we are energized by the new composition of members and we look forward to our continued work together."

Ms. Weeks asked, and Council agreed, to make the two new appointments effective April 1, 2010, as the Commission would like to invite the new members to the Commission's annual retreat in March and to an orientation meeting prior to officially taking office.

Upon inquiry of Mayor Bellamy, Ms. Weeks said that she will be possibly meeting monthly with Councilwoman Manheimer, liaison to the Planning & Zoning Commission, to discuss Council and the Commission's actions and to check in on the five specific recommendations. Mayor Bellamy said that would be a good opportunity for Councilwoman Manheimer to bring the Commission up to date on some of our partnerships, specifically with the County and State, and the work of the City Council Planning & Economic Development Committee.

On behalf of City Council, Mayor Bellamy thanked Ms. Weeks and the entire Planning & Zoning Commission for their hard work.

C. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 10-30 - RESOLUTION AUTHORIZING THE CITY MANAGER TO WAIVE THE FORMAL BID REQUIREMENTS AND AWARD THE BID FOR FIVE 35-FOOT LOW FLOOR DIESEL BUSES IN ACCORDANCE WITH THE N.C. GEN. STAT. USING THE "PIGGY BACK" PROVISIONS FROM THE AWARD OF BID FROM THE CAPE FEAR PUBLIC TRANSPORTATION AUTHORITY, WILMINGTON, N.C., AWARDED ON JUNE 25, 2009

American Recovery & Reinvestment Project Manager Brenda Mills said that this is the consideration of a resolution authorizing the City Manager to waive the formal bid requirements and award the bid for five (5) 35 foot Low Floor diesel buses in accordance with the N.C. Gen. Statutes using the "piggy back" provision from the award of bid from the Cape Fear Public Transportation Authority, Wilmington, North Carolina, awarded on June 25, 2009.

In 2009, the City of Asheville received funding through the American Recovery and Reinvestment Act to purchase five diesel buses. On August 25 2009, Council approved a budget amendment for $2,590,439 that includes the purchase and covers 100% of the cost.

The City has the opportunity to acquire these buses through a "piggy backing" process. Staff recommends that we utilize a contract from the Cape Fear Public Transportation Authority, Wilmington, North Carolina, awarded on June 25, 2009 that will meet our operational needs. State statutes allow us to "piggy back" that bid. By doing so, the City avoids the cost increases and expedites the bidding process which can take between six months to one year.

The contract has been reviewed by the N.C. Dept. of Transportation and the Federal Transit Administration and complies with local, State and Federal regulations. Following the N.C. Gen. Statutes, an advertisement informing the Council's intent to utilize the "piggy back" option and waive the formal bidding process was posted on January 20, 2010.

The estimated cost of this project is $1,900,000. The City is funding this project using section 5340 (ARRA) of the Federal Transit Administration which provides 100% for capital

projects. According to the manufacturer, the buses will be delivered in approximately 18 months after the buses are ordered.

This action complies with the current City Council's Strategic Operating Plan by helping to achieve short-term and long-term energy goals and reducing city carbon emissions, helping to establish a multi-modal transportation plan by making transit system improvements, and helping to fully leverage funding for transportation improvements. This action also complies with the capital improvement recommendations included in the Transit Master Plan that was accepted by the City Council on October 27, 2009.

The Transit Commission supports the subject action.

Pros:

- The City will replace five of its aged transit system fleet (10 out of 16 buses) that would produce savings in maintenance costs and fuel costs.
- The subject action would help reduce the City's carbon emissions.
- The Federal Transit Administration (FTA) would fund 100% of the subject project cost.

Con:

- None at this time.

No fiscal impact has been identified for this project. The Federal Transit Administration will fund 100% of the project.

City staff recommends City Council approve the resolution authorizing the City Manager to waive the formal bid requirements and award the bid for five (5) 35-foot Low Floor diesel buses in accordance with the N.C. General Statutes using the "piggy back" provision from the award of bid from the Cape Fear Public Transportation Authority, Wilmington, North Carolina, awarded on June 25, 2009 to Gillig, LLC.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-30. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 340

IV. PUBLIC HEARINGS: None.

V. UNFINISHED BUSINESS:

A. INTERIM REPORT ON PARKING DECK RATES

Transportation Director Ken Putnam said that the purpose of the subject memorandum is to provide City Council an update *(interim report)* regarding the impact that the new variable parking rate structure is having on after hour's customers to the City's three parking decks *(The term "after hour's customers" refers to the activities that take place in the City's three parking decks after 7:00 pm on weekdays and on weekends).*

Prior to the equipment upgrade that was completed in the City's parking decks during September 2009, a flat $1.00 fee was charged to customers exiting the Civic Center Deck and the Rankin Avenue Deck and a flat $2.00 fee was charged to customers exiting the Wall Street Deck after 7:00 pm on weekdays and on weekends *(not including times when the special event*

fee was in effect) because the old equipment could not support variable rates. Some customers quickly learned that they could enter one of the City's parking decks anytime during the day and if they waited until 7:00 pm to leave, they would only pay either a $1.00 or $2.00 *(in the Wall Street Deck)* instead of the appropriate fee up to the daily maximum. Not only did this practice decrease potential revenues to the City, it created an unequal rate structure compared to daytime customers.

City staff began the process to replace the old equipment in late 2005. Originally, the equipment upgrade project was going to be included with the Haywood Street Parking Deck project. When that project did not materialize, City staff recommended and City Council approved the funds for the equipment upgrade project in Fiscal Year 2008-09. In addition, City Council approved the variable rate structure and eliminated the flat fee as a part of the Fiscal Year 2008-09 budget process. Given the downturn in the economic climate that began in late 2008 and continued in 2009, City staff decided that it would be a good idea to revisit the new variable rate structure before it was implemented. They met with the Asheville Downtown Association and the Downtown Commission and both groups agreed that City staff should move forward with implementation. City Council also agreed that City staff should move forward and as a result, the new rate structure became effective on September 8, 2009.

Within the first 30 days that the new rate structure became effective, citizens began sharing some concerns with City Council members. The primary concern included the conclusion that long-term customers *(nighttime workers)* were now being "forced" out of the parking decks and onto the streets where on-street parking is free after 6:00 pm. As a result, these long-term customers are now using on-street parking spaces that should be used by restaurant patrons and shoppers.

In order to analyze the primary concern in a fair, logical, and reasonable manner, City staff suggested that parking activity be monitored closely for a six-month time period between October 1, 2009, and March 31, 2010, and then compare the results with the same time period a year ago. City Council agreed with this suggestion and asked that an interim report be presented on February 9, 2010, and the final report to be presented on April 27, 2010.

Initial Findings:

According to our records, 47,100 after hour's customers used the City's parking decks between October 1, 2008 and December 31, 2008 compared to 46,700 after hour's customers between October 1, 2009 and December 31, 2009. The data indicates that the after hour's parking deck usage has virtually remained at the same level with a decrease of only 400 customers. Much of the decrease could be attributed to the major snowstorm that hit Asheville on December 18, 2009.

Under the old flat rate structure, the City would have received a minimum of $47,100 in revenue *(not accounting for the $2.00 fee in the Wall Street Deck)*. With the new variable rate structure, the City actually received $65,400 in revenue. It should be noted that 44% of the after hour's customers paid less than $1.00 to exit the parking decks. 65% of the after hour's customers *(44% + 21%)* paid less than $2.00 to exit. The total "stay" for these customers was less than three hours with the first hour being free. The remainder of the after hour's customers stayed in the parking decks for three hours or more *(93% stayed in the parking decks for a total time period of less than eight hours with the first hour being free)*.

Since the subject memorandum represents the interim report, no definitive conclusions and/or recommendations are offered at this time.

Mr. Putnam responded to Vice-Mayor Newman regarding discount rates in the parking garages.

On behalf of City Council, Mayor Bellamy thanked Mr. Putnam for this interim report and looked forward to the final report being presented on April 27, 2010.

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-31 - RESOLUTION ADOPTING CITY COUNCIL 2010-11 STRATEGIC OPERATING PLAN

Director of Administrative Services Lauren Bradley said that this is the consideration of a resolution reaffirming City Council's Strategic Operating Plan for fiscal year 2010-2011.

2010-11 Strategic Operating Plan Update

At its January 2010 retreat, the Asheville City Council updated the City of Asheville's Strategic Operating Plan including a commitment to five key focus areas including:

- **Affordable** -*The City of Asheville will offer a standard of living that is affordable and attainable for people of all income levels, life stages and abilities.*
- **Fiscally Responsible** - *The City of Asheville will create a stronger, more prosperous community with smart investments that accomplish lasting, tangible returns.*
- **Green & Sustainable** - *Asheville will be the southeastern leader in clean energy and environmental sustainability.*
- **Job Growth & Community Development** – *Asheville will support a dynamic and robust economy with balanced and sustainable growth.*
- **Safe** - *Asheville will be one of the safest and most secure communities when compared to similar cities.*

Performance Measurement and Reporting

During the 2009-10 fiscal year, City staff continued to provide City Council with quarterly management reports in order to provide information about performance tied to the organization's adopted strategic goals and related initiatives. Staff will continue these updates during the coming fiscal year.

At the January retreat, City Council discussed scheduling work sessions for each focus area contained in the strategic plan. Council would discuss the goals and objectives contained in each focus area through this process. Staff will be ready to provide updates and any requested information to City Council when these work sessions are scheduled.

Pros:

- Provide Council and City staff with an overall direction and goals of the organization
- Provide Council and City staff with measures of success

Con:

- None-noted

During the retreat, City Council agreed that it was important to balance the goals and objectives outlined in the strategic plan with the financial constraints of the city's budget and the current economy. Given current budgetary forecasts, some goals in the plan will not be fully realized during a single fiscal year. Those goals can be reconsidered during the next fiscal year and may roll from one strategic plan to the next with City Council's direction. For Fiscal Year

2010-11, the strategic plan will serve as a guide for funding decisions during the City's upcoming budget process, whereby projects and services can be prioritized and matched to available resources.

City staff recommends City Council adopt a resolution reaffirming the City of Asheville's Strategic Operating Plan.

Vice-Mayor Newman explained why he asked for an additional bullet under the "Safe" focus area in the first goal the following: "To implement strategies to significantly improve public safety in neighborhoods in Asheville with the highest levels of crime."

Mr. Alan Ditmore felt the Strategic Operating Plan should not be in alphabetical order, but in order of priorities. He also felt that the City should not rely on what Raleigh defines as crime, but define crime on what Asheville's priorities are, e.g. highest level of violence, etc.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-31, as amended by the additional bullet to the Safe focus area outlined above. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 341

B. MOTION REAFFIRMING SUPPORT FOR THE MAYOR'S COMMITTEE ON (DIS)ABILITIES, THE MAYOR'S COMMITTEE ON VETERAN'S AFFAIRS AND THE RICH TASK FORCE

Mayor Bellamy said that this is the consideration of a motion to continue the Mayor's Committees for the 2010-2013 fiscal years with associated staff support for their success.

Definition: A "mayor's committee" is a group of citizens who come together to provide and promote awareness and education of various issues within the city. Additionally, members of the committees assist in developing community wide ceremonies and/r events.

Membership composition: The committees are currently self-appointed. This process allows service providers, interested citizens (city and county residents), volunteers, governmental employees (including city, county, state, and federal employees), and representatives from the served populations (veterans, people with disabilities, etc.) to attend and make recommendations on how to achieve the committees' goals.

Meeting frequency: Each committee meets on a monthly basis.

Mayor's Committee for Citizens with (Dis)Abilities

The mission of the Asheville Mayor's Committee for Citizens with (Dis)Abilities is to promote and advocate for equal and inclusive opportunities for people with disabilities in all aspects of society; and to recognize and cooperate with all people and organizations that contribute to this cause.

Highlights of the committee's activities:

* Participation in the city's Volunteer Handicapped Parking Enforcement Program.
* Awards presentation each fall to individuals and businesses for outstanding advocacy,

awareness and contributions.
* Community education, training and resources, such as an accessibility checklist and a resource list for businesses.
* Inclusive job fairs, therapeutic recreation events, statewide meetings, and celebrations of the Americans with Disabilities Act.

Meetings are held on the third Friday of each month at 10 a.m. in the Public Works Building on S. Charlotte Street. Meetings last about one hour.

Mayor's Committee for Veterans Affairs

In April 2007, Mayor Terry Bellamy created the Mayor's Committee for Veterans Affairs, a volunteer committee charged with providing advice to the mayor on events and issues of interest to active duty and retired service members and military veterans. This Committee honors our veterans who have served our community. The members of this Committee also support the efforts of the Memorial Day and Veterans Day.

She noted that Asheville is honored to have had four vessels named after us as a City. We also have an exhibit recognizing those exhibits on the first floor of the City Hall Building. We have a bi-annual celebration in Asheville recognizing the individuals who gave their lives, as well as the individuals from western North Carolina who volunteered their services to our country after individual vessels sank. The Committee, along with City staff, takes on the responsibility of planning that ceremony.

Goals of the committee include:

• Serving as the advisory board for the city's USS Asheville, Memorial Day event and the Veterans Day event.
• Advising the Mayor on how best to increase the participation of veterans in local government.
• Increasing awareness of education, employment and other community resources available to retiring and separating members of the military.
• Providing a forum for former members of the military community to express their views and interests directly to local government officials.

Meetings are held on the fourth Tuesday of each month at 1 p.m. in the training room on the sixth floor of City Hall. Meetings last about one hour.

Website maintained by the committee members: http://www.ashevilleveterans.com/

Mayor's R.I.C.H. Task Force

The Reaching, Inspiring, Character, and Hope (R.I.C.H.) formerly Mayor's Gang Prevention Task force, provides an opportunity for service providers to come together on a monthly basis to discuss issues impacting youth and young adults. In the beginning, R.I.C.H. only focused on gang related issues; however, the task force's efforts have expanded to the following:

1. Developing a comprehensive catalog of services for children, teens and young adults in order to increase parent's awareness of services available within Asheville and Buncombe County.

2. Increasing collaboration amongst service providers, including the efforts of the Gang Suppression Unit (which uses the High Point Model) and Mediation Center's/Buncombe County's Gang Prevention Task Force.

3. Developing a uniform application for services to make it easier for parents.

4. Supporting the school systems goal of reducing the drop-out rate and decreasing the achievement gap.

Meetings are held on the second Tuesday of each month beginning at 9:00 a.m. in Pisgah View's Administration Building.

Ms. Karen Harrington, Co-Chair of the Mayor's Committee on Disabilities, gave a brief description of the committee and explained why the committee is in existence. She outlined the following upcoming events (1) "A New Way of Listening" on March 7 at 7:00 p.m. at Jubilee Church; and (2) a booth at Bele Chere for awareness. They are looking for volunteers to help man the booth at Bele Chere. Ms. Harrington thanked with Council for their support and hoped they would continue to support this committee.

Mayor Bellamy said that City staff did an analysis of funding for the three committees as follows: (1) Mayor's Committee for Citizens with (Dis)Abilities – Budget: $500. She said that is for the annual recognition ceremony and that is leveraged by in-kind contributions; (2) Mayor's Committee for Veterans Affairs – Budget: $1,000. She provided $1,000 out of her travel budget for planning Veterans and Memorial Day activities as well as provide necessary event items for exhibits and things of that nature; and (3) RICH Gang Task Force – Budget: None. She said they do not have a need for a budget right now except for printing services for parent information on all the services available. We are also looking at a partnership with 2-1-1.

Mayor Bellamy requested ongoing staff support, which includes updating the City's website to include meeting minutes; sending out monthly meeting notices with agendas; providing printing for catalogues and event/ceremonies programs; and general cooperative support for the success of the transparent efforts of the committees and task force.

In response to Vice-Mayor Newman, City Manager Jackson said that there is not one person designated for all three committees. If Council supports the Mayor's request, he will have staff out of the City Manager's Office handle the Mayor's Committee for Citizens with (Dis)Abilities and the Mayor's Committee for Veterans Affairs. In term of the RICH Task Force, there is no staff report except for convening different agencies. If directed by Council, he would designate a staff person for support and allocate a budget.

In response to Vice-Mayor Newman, Mayor Bellamy said that the RICH Task Force will continue to operate as an on-going entity. At this time Ms. Jessica Dunlap sends out meeting notices and has taken the minutes of the RICH Task Force for the past three months. Ms. Dunlap also works with the Mayor's Committee for Veterans Affairs on planning the Veterans and Memorial Day celebrations; however, they have their own secretary.

Vice-Mayor Newman moved to support the Mayor's request through Fiscal Year 2010-11 to have the City provide ongoing staff support, which includes updating the City's website to include meeting minutes; sending out monthly meeting notices with agendas; providing printing for catalogues and event/ceremonies programs; and general cooperative support for the success of the transparent efforts of the Mayor's Committee for Citizens with (Dis)Abilities, the Mayor's Committee for Veteran's Affairs and the RICH Gang Task Force. This motion was seconded by Councilman Davis.

Mr. Alan Ditmore felt the City already has a large commitment to the veterans through the homeless initiative and anything else should be handled by the Department of Defense.

Mayor Bellamy asked for a friendly amendment to the motion that Council is to receive copies of the minutes from each of these committees and task force on a monthly basis.

Vice-Mayor Newman and Councilman Davis accepted Mayor Bellamy's friendly amendment. Said amended motion carried unanimously.

C. RESOLUTION NO. 10-32 - RESOLUTION AMENDING CITY COUNCIL'S RULES OF PROCEDURES

City Attorney Oast said that this is the consideration of an amendment to Council's Rules of Procedure regarding placing items on a Council Meeting agenda.

At Council's retreat on January 8 and 9, there was some discussion regarding the process for individual council members to have items placed on the agenda for a council meeting.

The rules have long provided that the mayor sets the agenda and that any council member may request that an item be placed on an agenda. Actual scheduling is subject to the length of agenda, availability of staff, and other logistical considerations. A form has recently been developed so that certain basic information about a request is provided. Previous Councils have had an informal policy that a council member could get an item placed on an agenda if he or she got two other council members to join in this request. This informal policy predated the committee structure that is now in place. The form has not been a part of the process until very recently.

The policy is a hybrid of these two informal polices and a formalization of existing practices, including the information form. Pursuant to this proposed amendment, items will be placed on the agenda if (1) the item has been reviewed by one or more committees of council as directed by the mayor, or (2) two or more council members join in the request. An additional change applicable to items following either route is the completion of the new form providing certain information about the request. The amended language appears in new paragraph (a1) as shown below:

"4. (a1) Any council member wishing to have an item placed on the agenda shall complete the "Agenda Item Request Form" in the appendix and submit the form to the city clerk. The mayor may direct the item to be placed on the agenda for the next available council meeting or may direct that the item be submitted to one or more council committees. Items that have been reviewed by a council committee shall be placed on the agenda for the next available council meeting. If three or more council members request that an item be placed on council's agenda without first going to a council committee, said item shall be placed on the agenda for the next available council meeting. Nothing herein shall limit council's ability to add items to the agenda pursuant to paragraph (c) below."

One effect of this change is that council members are limiting their individual right to get an item on the agenda. This would not prevent an individual council member from bringing an item up under "informal discussion and public comment" on the agenda, subject to time limits applicable to the public. This rule change would not limit or affect council's ability to add items to its own agenda, by majority vote, bypassing any committee. This is a power that most deliberative bodies have.

The placing of any item on the agenda by any means would be subject to compliance with applicable notice procedures set out in law or ordinance.

This amendment affects all Council-initiated agenda items and crosses all substantive areas of the strategic plan.

Pros:

- Ensures that items on agenda have substantive interest
- Recognizes role of committees

Con:

- Limits but does not eliminate the individual member ability to place items on agenda.

If Council is satisfied with the rule amendment as proposed, adoption of the resolution is recommended.

Vice-Mayor Newman felt that since we have the City Council Committee structure, if there is an issue that clearly should be reviewed by one of those Council Committees then we should take it through that Committee structure first prior to bringing it before the full Council.

Mayor Bellamy felt that the issue should be reviewed by a Council Committee first and the rule of three would be the exception.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 10-32. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 344

D. MOTION TO AGREE TO THE CONCEPT OF DOMESTIC PARTNER BENEFITS FOR CITY EMPLOYEES AND INSTRUCT CITY STAFF TO PROVIDE COUNCIL WITH IMPLEMENTATION SUGGESTIONS

Councilman Smith provided Council with the following PowerPoint on domestic partner benefits.

Why does Asheville provide benefits to its workforce? (1) To recruit quality employees; (2) To retain quality employees; (3) To increase productivity and morale; (4) To increase competitiveness; and (5) To value employees and their families.

Opportunity (1) improve recruitment and retention; (2) provide equal rights to our employees who are denied the option to marry; (3) strengthen families; (4) maintain Asheville's image as a safe, inclusive community that respects diversity; (5) compete with private sector employees; and (6) bolster economic resilience.

Why now (1) staff preparing health insurance report for the March 9 worksession; (2) Council direction imperative; (3) history of inaction; and (4) bolster staff morale.

The following governments in North Carolina offer domestic partner benefits: (1) Greensboro, Mecklenburg, Chapel Hill, Durham and Carrboro. Also, 270 of the Fortune 500 offer domestic partnership benefits, some being Kimberly-Clark, WNCCHS, Lowes, Barnes & Noble, Bank of America, Time Warren Cable, The Home Depot, Office Depot, BB&T, Progress Energy and The Grove Park Inn.

The Mecklenburg County Domestic Partner Benefits: Research and Review from December 15, 2009, states "Council legal staff, in collaboration with staff from the N.C. School of Government, has concluded there is no legal reason why a N.C. government cannot adopt policies designed to positively impact the recruitment and retention of a capable and diligent workforce."

Domestic partner benefits are the same benefits now offered to the spouses of married City employees: (1) medical, dental, vision, cancer, accident, life, prescription; (2) bereavement leave; and (3) family and medical leave.

Carrboro's legal definition of domestic partner is (1) are not related by blood closer than would bar marriage in North Carolina; (2) are not married or related by marriage; (3) share the common necessities of life; (4) are 18 years old or older; (5) are competent to enter into a contract; (6) declare that they are each other's sole domestic partner; (7) agree to be responsible for each other's welfare; and (8) agree to notify the town of any change in the status of their domestic partnership.

We offer domestic partnership benefits to (1) improve recruitment and retention (a) the Number One reason for offering domestic partner benefits is to attract and retain employees, according to a 2005 Hewitt Associates study; (b) in a time of salary freezes and job uncertainty, this is a way to let employees know we value them; and (c) with so many private employers offering domestic partner benefits, we could lose some of our best and brightest; (2) fairness (a) gay City employees are City employees: their families are families of City employees; (b) many of our employees work equal time for unequal compensation; and (c) reflect our historical commitment to treating our employees with respect and fairness; (3) strengthen families (a) the following groups have endorsed domestic partner benefits: The American Academy of Family Physicians, The American Psychological Association, The National Association of Social Workers; and The American Medical Association; and (b) The American Academy of Pediatrics found that offering domestic partner benefits can further strengthen families; (4) enhancing Asheville's reputation (a) passing domestic partner benefits reinforces Asheville's image as an inclusive community; and (b) gay tourists, who spend $64 Billion per year in the US alone travel to destinations that have a reputation for being safe and welcoming; and (5) economic growth and resilience (a) our City's commitment to equality will add to its economic resilience and potential for growth; (b) "A community's success in attracting and retaining high-tech business" depends upon "providing a safe, respectful, and congenial environment;" and (c) a Brookings Institute study shows a strong link between a thriving tech-oriented economy and diverse populations.

Same-sex domestic partners vs. comprehensive domestic partners (1) same-sex couples are not capable of accessing benefits available to opposite-sex couples; and (2) the cost of implementation will be lower if targeting only same-sex couples.

Regarding registering as domestic partners, program details to be determined by City staff include (1) employees may register their domestic partnership with appropriate department; (2) a fee may be charged for processing registration; (3) registration will include proof of partnership; (4) termination of the domestic partnership registration will terminate the benefits; and (5) current precautions against misuse of marital status will extend to the new same-sex policy.

Regarding financial impact, recruitment and retainment (1) to recruit quality employees; (2) to retain quality employees; (3) to increase worker productivity and morale; (4) to increase competitiveness; and (5) to value employees and their families.

The City of Asheville currently employs 1,101 full-time and 89 part-time employees. Only 30% of employees currently utilize spousal and/or family coverage (357 employees).

The Hewitt Associates 2005 report shows 95% of employers have a financial impact of less than 3% of their total health care costs. Mecklenburg County anticipates a financial impact of one percent or less.

Arguments for and against same-sex domestic partner benefits include (1) religious beliefs (a) people of faith hold many different religious beliefs regarding same-sex domestic

partners (i) personal religious views are not a valid basis for denying some municipal employees the benefits that are provided to other employees; and (2) financial impact (a) some argue that increased health care costs are not fiscally responsible (i) increased recruitment and retention reduces human resources costs; (ii) fairness is a core value of our City government; and (iii) maintaining the status quo will institutionalize discrimination against same-sex couples.

In conclusion, (1) same-sex domestic partner benefits improve recruitment, retention, competitiveness; (2) join other cities and counties in North Carolina; (3) opportunity to include all of our City employees' families; (4) improve Asheville's reputation as a safe, inclusive community that welcomes diversity; and (5) improve Asheville's economic prospects.

Councilman Smith asked Council to extend domestic partner benefits to City employees who choose to register their same-sex couples status on or before January 1, 2011. He asked that Council direct City staff to return with implementation suggestions during the March 9 worksession if that is doable for the City Manager.

He also provided Council with (1) the Charlotte/Mecklenburg report; and (2) AFFA report to Charleston Chamber of Commerce.

Councilwoman Manheimer moved to agree to the proposal in concept and instruct City staff to bring Council implementation suggestions. This motion was seconded by Councilman Bothwell.

The following individuals spoke in support of extending domestic partner benefits to City employees for various reasons outlined in Councilman Smith's presentation:

Ms. Kim Congre
Ms. Jerri Goldberg
Ms. Katie Beane
Mr. Hamilton Fuller
Mr. Jim Cavener
Ms. Katelyn Labrie
Mr. Alan Ditmore
Ms. Sharon Lewis
Mr. Michael Muller
Ms. Veronika Gunter
Mr. Alan Robinson
Mr. Bryon Greiner
Mr. Shannon Fields
Ms. Diane Walton
Mr. Dwight Buckner
Ms. Lin Orndorf

The following individuals spoke against the motion to extend domestic partner benefits to City employees for various reasons:

Dr. Keith Ogden
Mr. Tim Harrison
Mr. Mike Fryar
Ms. Leslee Kulba
Mr. Vernon Myers
Mr. Justin Parker

Councilman Bothwell was cognizant that there have been religious arguments made, but there is no one religious position. He felt that as a matter of fairness. We have a fairly large gay

and lesbian population in Asheville and they pay taxes. Now they are being forced to pay benefits for straight people. He supported the motion.

Councilman Davis had difficulty in supporting the motion because he didn't like the process to which this was brought before the Council, especially when the health insurance issue has not been brought before the Council yet. He has a lot of unanswered questions. He did note that some portions of the presentation do make a lot of sense to him. As an employer offering insurance, there is a cost associated with this, as well as a staff cost to just explore this issue. He did not have the necessary background information at this time to be able to support the motion.

Vice-Mayor Newman noted that the motion is to support the idea in principle, and he felt this is the right time to address it with a lot details to be worked out on how it will be implemented.

Councilwoman Manheimer too was interested in seeing the details and also the projected fiscal impact. Our community is known as accepting diversity and this is one trademark she is interested in furthering. She felt this is truly an issue of fairness.

In response to Mayor Bellamy, City Manager Jackson said that staff has not done research on this and will take direction from Council. If directed, staff will report back to Council at their March 9 worksession with an outline and preliminary schedule on the steps we will follow to move from where we are to where Council is steering us.

Human Resources Director Lisa Roth responded to several e-mail questions raised by Mayor Bellamy. Mr. Roth said that the City does not extend any benefits to any people who are in a domestic partner relationship, as Councilman Smith defines them. Our Equal Employment Opportunity Policy does prohibit us from discriminating in hiring and firing decisions based on sexual orientation. The City does abide by the Family Leave Act by the federal government. To her knowledge staff has not researched this issue in the past.

Mayor Bellamy could not remember a time in her 11 years on Council where the Council made political issues out of health care benefits. Ms. Roth responded that generally staff sees a need, researches it and brings it forward to Council; however, she felt this is clearly a policy decision for Council.

When Mayor Bellamy asked for a copy of Charlotte's resolution of adoption (since the information presented is based on a lot of Charlotte's research), Ms. Roth said that Charlotte adopted a resolution in December, with a year for policy implementation.

In response to Mayor Bellamy, Ms. Roth said that she has not done an analysis of everything that will be required in order to add domestic partner benefits to our health care plan. That is the type of research she will be bringing to Council on March 9. She won't have cost information or have the entire analysis done on March 9, but she can bring a project plan about what will be required in order to move this forward.

Mayor Bellamy noted that this issue was originally scheduled on March 9 at which time the health care plan for all employees will be discussed. At that time, there will be policy discussions about how we fund our insurance program for all employees. At this time we have a shortfall in our health insurance of $1.3 Million. She too had a concern about the process in the way it was brought before Council. In the past, as policy-makers when policies have been discussed, we take into consideration our experience, facts, figures and studies and not just one person's information. She felt this issue is larger than the number of people we are making this decision about. She asked for a friendly amendment to the motion that a personnel committee of staff formed so that the political process still stay out of the health care benefit process. She could not support the motion.

The motion made by Councilwoman Manheimer and seconded by Councilman Bothwell carried on a 4-2 vote, with Mayor Bellamy and Councilman Davis voting "no."

At this time, Mayor Bellamy announced a 10-minute recess.

E. RESOLUTION NO. 10-33 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MOORE & SON SITE CONTRACTORS INC. FOR THE CLINGMAN AVENUE STREETSCAPE PROJECT

At 7:55 p.m. and at the request of Mayor Bellamy, Councilman Davis moved to recuse Mayor Bellamy for the remainder of the meeting. This motion was seconded by Councilman Smith and carried unanimously. At this time, Vice-Mayor Newman presided over the remainder of the meeting.

Director of Public Works Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with Moore & Son Site Contractors, Inc. to construct the Clingman Avenue Streetscape project in the amount of $503,827 and execute all necessary change orders up to 20% of the contract price.

The City entered into an agreement with Mountain Housing Opportunities (MHO) in January 2004 that allowed MHO to manage the design of the project in coordination with the applicable Departments within the City. MHO partnered with the local firms Civil Design Concepts (CDC) and Kerns Land Planning & Design to design the project.

The City received two Enhancement grants from the N.C. Dept. of Transportation (NC DOT) to construct this project. The first was in February 2004 in the amount of $172,131. The second came in October 2005 for $235,120. Total Federal funds equal $407,251. Council approved allocating another $500,000 in City funds to the project as a part of the Fiscal Year 2007-08 Capital Improvement Program, bringing the total project funding to $907,251.

Approximately $109,057 of the $907,251 project budget has already been spent on construction plans and contract documents, leaving a balance of $798,193 in the project that is available for construction

MHO delivered the project to the City in early 2009 to begin the construction phase. City staff recently met with various stakeholders of the project to discuss options to improve the project. The group included MHO, the West End/Clingman Avenue Neighborhood Association (WECAN) and the biking community. The group agreed that the project should include a safe bicycle climbing lane, additional on-street parking, more landscaping, ADA compliant sidewalks and to stay on schedule. While the group didn't mutually agree on specific details, they were in full agreement that the current contract should not be delayed. The lower section of the project that contained the majority of the heavy construction, the group didn't have concerns with; therefore the contractor could work there until the final details are agreed upon on the upper section of Clingman.

This project complies with Council's Strategic plan in the Focus Area of (1) Sustainability, as it will address the City's aging infrastructure, as well as fully leveraging funding from the State for transportation improvements; and (2) Green, due to the improvements to the City's mutli-modal transportation options, and the unique stormwater bio-retention swale to capture and naturally filter storm run off. This action also complies with the Comprehensive Bicycle plan, with the exception of a short section near Hilliard Ave. Due to NC DOT time constraints, and existing on-street parking conditions, this section will be made to comply in the near future.

The project will provide many improved bicycle and pedestrian features, and include a roundabout at the intersection of Clingman Avenue and Roberts Street. It also includes new on-

street parking from Roberts Street to Clingman Ave. Extension, bike lanes on both sides from Riverview Street to Clingman Avenue Extension, and a bicycle climbing lane on the up grade side of Clingman Ave. from Clingman Avenue Extension to Clingman Place.

Pros:

- Approval of this action will allow for the completion of the Clingman Streetscape project, providing a gateway to a major entrance to the City's west side.
- Utilize Federal funds, administered by NCDOT, to upgrade City infrastructure, thus fulfilling two previously approved agreements with NCDOT.
- Create a more bicycle and pedestrian friendly facility for the Clingman community.

Cons:

- The City will have to fund all expenses over the Grant amount.
- The current plans do not extend the bicycle climbing lanes all the way to Hilliard Ave.

The cost of the construction contract for the Clingman Avenue Streetscape project is currently estimated to cost $503,827. Approximately $798,000 is currently available in the capital project budget to cover this cost, as well as the cost of any necessary change-orders up to 20% of the contracted cost.

Remaining project funds have been earmarked to cover other necessary project elements for which contracts have not been awarded at this time. Those elements include a small materials testing contract (estimated at $25,000 or less) and revisions to the upper portion of the project to allow for more parking and extending the bicycle land to Hilliard Avenue at an estimated cost approximately $150,000. Such contracts will be brought to Council for approval in the future as awards are made.

City staff recommends City Council approve a resolution authorizing the City Manager to enter into a contract with Moore & Son Site Contractors, Inc. to construct the Clingman Avenue Streetscape project in the amount of $503,827 and execute necessary change orders up to 20% of the value of the contract.

Mr. Alan Ditmore suggested the concept of getting bicycles onto residential streets.

Ms. Claudia Nix, representing the Bike and Pedestrian Task Force, supported this action by Council. She felt it was important that pedestrians and bicyclists are considered in the development and design of all our streets.

Ms. Pattiy Torno, Board President for WECAN, said that the Board supports this action. However, item of concern include (1) maintaining the current character of the neighborhood; (2) maintaining the current level of on-street parking; and ()addition of a climbing on the east side of Clingman Avenue. A proposal that MHO has brought forward, and there is neighborhood support, is to reduce the size of the sidewalk on the east side of the street.

Mr. Mike Soule, representing Asheville on Bikes, supports the first phase of this project. He said it was important to consider all modes of transportation during road improvements and planning. The top of Clingman Avenue still remains an issue as it's problematic for pedestrian infrastructure; however, they believe there are options.

Mr. Mike Fryar felt that all bikes on the City's streets should be street legal and not racing bikes.

Vice-Mayor Newman said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-33. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 346

F. RESOLUTION NO. 10-34 – RESOLUTION APPOINTING A MEMBER TO THE CIVIC CENTER COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for a vacancy on the Civic Center Commission, they recommended appointment of Mr. Joel Storrow.

Councilman Davis moved to appoint Joel Storrow to serve the unexpired term of Mr. Brian Woods, term to expire June 30, 2012, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 347

G. RESOLUTION NO. 10-35 – RESOLUTION APPOINTING A MEMBER TO THE RIVERFRONT REDEVELOPMENT COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that after a review of all applications received for a vacancy on the Riverfront Redevelopment Commission, they recommended appointment of Ms. Pattiy Torno.

Councilman Smith moved to appoint Pattiy Torno to serve a three-year term to the Riverfront Redevelopment Commission, term to begin immediately and expire on January 1, 2013, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 348

H. BOARD & COMMISSIONS

It was the consensus of Council to instruct the City Clerk to arrange interviews for Mike Hahn and Curry First for a vacancy on the Asheville-Buncombe Community Relations Council.

It was the consensus of Council to instruct the City Clerk to arrange interviews for Bruce Hazzard, Rachael Bliss, Matt Sprouse, Bill Allison and Tony Fraga for vacancies on the Downtown Commission.

It was the consensus of Council to instruct the City Clerk to arrange interviews for Susan Garrett, Sherry Ingram and Dane Barrager for vacancies on the Sustainable Advisory Committee on Energy & the Environment.

It was the consensus of Council to instruct the City Clerk to arrange interviews for Susan West, Amanda Warren and Ashley Black for vacancies on the Asheville-Buncombe Historic Resources Commission. It was also the consensus of Council for City Attorney Oast to provide Council with a report on the possible change to the membership size of the Board for discussion by the City Council Boards & Commissions Committee.

It was the consensus of Council to instruct the City Clerk to arrange interviews for Joe Minicozzi, Mark Brooks, Holly Shriner and Russ Towers for vacancies on the Planning & Zoning Commission.

It was the consensus of Council to instruct the City Clerk to readvertise for the vacancy on the Public Art Board.

I. MOTION APPROVING THE FEDERAL APPROPRIATIONS FOR FISCAL YEAR 2011

Vice-Mayor Newman stated at the worksession earlier in the day Council gave direction to staff to tally the top priorities for City Council's federal appropriations for Fiscal Year 2011. Those top priorities are Asheville City Hall Restoration Project, Municipal Facilities Building Retrofits, Mills River Solar Farm Project (which City Attorney Oast said that Vice-Mayor Newman did not have a conflict of interest), Asheville Transit Bus Replacement – 1 Hybrid Diesel Electric Bus, and Radio Tower Infrastructure Project.

Mr. Alan Ditmore felt that Council should position the list by priority and the list should be longer than 5 priorities.

Councilman Bothwell moved to approve the federal appropriations list outlined above by Vice-Mayor Newman for Fiscal Year 2011. This motion was seconded by Councilman Davis and carried unanimously.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

The following claims were received by the City of Asheville during the period of January 15-February 4, 2010: David Miller (Police), Dorinda Watford (Transit Services), Erica Harrison (Sanitation), Derick Tickle (Water), Vincent A. Curtis (Building Safety), Peter Kotyay (Police), Rebecca Gustina (Parks & Recreation), Patrick E. Fairman (Fire), Danny Smith (Water), Travis Haralson (Water), Jennifer Barnes (Water), Purcell Todd (Fire), Joe Swiger (Water), Andrew Messick (Water), Joel Rudel (Water), and Mary Wickes (Fire). These claims have been referred to Asheville Claims Corporation for investigation.

Mr. Alan Ditmore felt that Council should focus on workforce housing and not parking garages.

Rev. Christopher Chiaronmonte urged Council to repeal the panhandling ordinance and in it's place adopt a non-harassment ordinance.

Mr. Daniel Bridges spoke to Council about handicap parking volunteers. City Manager Jackson said that he would investigate the concern regarding handicapped parking enforcement and report back to Mr. Bridges and Council.

Mr. John Kloeckner spoke to Council about an art project he is trying to get started. City Manager Jackson said that he would coordinate with Councilman Smith (liaison to the Public Art Board) and Mr. Kloeckner to schedule a presentation before the Public Art Board.

At the request of Councilman Bothwell, City Manager Jackson said that he would prepare a memorandum to Council reporting on the banking relationships of the City and the feasibility and process for converting to local banks.

VIII. ADJOURNMENT:

Vice-Mayor Newman adjourned the meeting at 8:41 p.m.

Magdalen Bowlerson
CITY CLERK

MAYOR

Tuesday – February 23, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 9, 2010

B. RESOLUTION NO. 10-36 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH WILBUR SMITH ASSOCIATES FOR ENVIRONMENTAL ANALYSIS, ENGINEERING, AND DESIGN FOR A PORTION OF THE WILMA DYKEMAN RIVERWAY TRANSPORTATION PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Wilbur Smith Associates in the amount of $556,692 to conduct environmental analysis, engineering, and design for a portion of the Wilma Dykeman Riverway transportation project.

This project is funded from a federal appropriation from the United States Department of Transportation (USDOT). No local match is required. In June of 2009 the City of Asheville received authorization from the N.C. Dept. of Transportation (NCDOT) to proceed with the process of procuring a consulting firm Wilma Dykeman Riverway Project. Staff released a request for proposals, and through a competitive process selected the firm of Wilbur Smith Associates (WSA). WSA will be assisted by the firms of LandDesign, MACTEC Environmental, Matthews Architecture, Blue Ridge Archaeological Consultants, and others.

The consultants will deliver a federally approved environmental document, and a preliminary design for the project. This will put the City in a position to begin acquiring right-of-way and seeking funding for construction.

This project will focus on Riverside Drive and Lyman Street, which are the city-maintained streets in the corridor. The project extends from Broadway near UNC-Asheville to Amboy Road, and will build on the previously developed conceptual design and economic development plan contained in the Wilma Dykeman Riverway Master Plan. The Riverway will balance the needs of motorists, cyclists, pedestrians, and transit riders, and will pay special attention to plans for economic development and redevelopment, flood protection, historic

properties, aesthetic considerations, pedestrian accommodations, and greenways development. The project will also include a significant public involvement component.

Pros:

- Executing this contract is one of the steps toward following through on the commitment to pursue this federal appropriation.
- No local matching money is required.
- Implementing the Wilma Dykeman Plan is one of the strategic goals of the City.

Cons:

- Administering a study of this size and following through on implementation will require staff time.

This project supports the City of Asheville's Sustainable Economic Development Plan, Greenway Master Plan, and the 2025 City Development Plan. It also supports the French Broad River MPO Long Range Transportation Plan.

On April 24, 2009, the City entered into a municipal agreement with the NCDOT to receive $590,357 in federal funds from the USDOT. The reimbursement rate is 100%. No local matching funds are required. City Council established the budget for this project in a grant fund on August 21, 2007.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into an agreement with Wilbur Smith Associates in the amount of $556,692 to conduct environmental analysis, engineering, and design for a portion of the Wilma Dykeman Riverway project.

RESOLUTION BOOK NO. 32 – PAGE 349

C. ORDINANCE NO. 3826 - BUDGET AMENDMENT TOWARD THE COMPLETION OF THE OAKLEY RESOURCE CENTER PROJECT DECKING AND ACCESS RAMP

Summary: The consideration of a budget amendment, in the amount of $2,500, to the City of Asheville's Capital Project Fund from Carolina First Bank toward the completion of the Oakley Resource Center Project decking and access ramp.

The City of Asheville began working on a project in 2009 to replace the Oakley Police Resource Center located at 711 Fairview Road. The goal of the project was to partner with AB Tech to replace the old structure with a sustainable structure that accented and complimented the neighborhood and to do so as economical as possible. Costs associated with the project have been higher than anticipated. The City of Asheville reached out to the local community for financial support to assist in the completion of the project. Carolina First Bank donated $2,500 to the City of Asheville to be used in completing the project.

This action conforms to the City Council's Strategic Operating Plan under Goal 2 - Fiscal Responsibility; Objective G: Provide leadership in buying local products and services and Goal 5 – Sustainable; Objective H : Expand partnerships with UNC-A, AB Tech and other institutions to achieve common goals, including health and wellness, workforce development, and sustainable economic development.

Pro:

- Revenue to cover some of the cost of the materials to complete the construction of the Oakley Police Resource Center while keeping the cost to the City of Asheville at a minimum.

Con:

- None noted.

This action will not have any impact on the operating budget of the police department. There will be no re-occurring charges associated with the acceptance of these funds. These funds will reduce the amount of capital funds spent by the City of Asheville on the Oakley Resource Center.

City staff recommends City Council adopt the budget amendment in the amount of $2,500 to the City of Asheville Capital Project Fund for the Oakley Police Resource Center.

ORDINANCE BOOK NO. 26 – PAGE 36

D. RESOLUTION NO. 10-37 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR THE FISCAL YEAR 2009-10 N.C. DEPT. OF TRANSPORTATION STATE MAINTENANCE ASSISTANCE PROGRAM GRANT AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE APPROPRIATE DOCUMENTS IF AWARDED

Summary: The consideration of a resolution authorizing City staff to apply for the Fiscal Year 2009-10 N.C. Dept. of Transportation (NCDOT) State Maintenance Assistance Program (SMAP) in the amount of $931,660 and authorizing the City Manager to execute the appropriate documents to accept the grant when it is awarded to the City of Asheville.

The SMAP is a recurring annual grant designated exclusively to assist transit systems with their non-Federal share of net operating costs. Operating costs, as defined in the Federal Section 5307 program, are those costs necessary to operate, maintain, and manage a transit system. These costs include driver salaries, fuel, preventive maintenance, and Americans with Disabilities Act service costs.

The SMAP funds are based on the Fiscal Year 2009-10 approved State budget and carryover funds from Fiscal Year 2008-09. The total funds available for Fiscal Year 2009-10 are $33,958,183. These funds are allocated among eligible systems based on the existing formula approved by the N.C. Board of Transportation. The formula is based on performance including unlinked passenger trips per vehicle revenue hour, cost per trip, local commitment, and equal share among small urban, urban, and regional transit systems.

The SMAP Fiscal Year 2009-10 allocation for the City of Asheville is $931,660. In order for the City to receive the grant, its annual support to the transit system must equal or exceed the Fiscal Year 1992-93 funding level, which was $813,485. The City satisfies that requirement with a current budgeted amount of $1,120,947 ($872,831 from the General Fund and $248,116 from the Parking Enterprise Fund). It should be noted that the City's current funding level equates to 21.8% of the total transit system budget.

The anticipated grant funding and the City's annual contribution are currently budgeted in the Transportation Department's approved budget.

This action complies with the current City Council's Strategic Operating Plan in the green and sustainable focus areas by helping to develop a sustainable funding structure for the Asheville Transit system.

The Transit Commission supports the subject action.

Pro:

- The subject grant is a recurring operating support that assists with transit operating expenses in the amount of $931,660.

Con:

- Without the grant, the City would need to provide the additional $931,660 from the General Fund.

The total anticipated grant funding for Fiscal Year 2009-10 is $931,660. The anticipated grant funding and the City's local contribution in the amount of $1,120,947 are currently budgeted in the Transportation Department's approved operating budget for Fiscal Year 2009-10.

City staff recommends that City Council adopt a resolution authorizing City staff to apply for the Fiscal Year 2009-10 N.C. Dept. of Transportation State Maintenance Assistance Program in the amount of $931,660 and authorizing the City Manager to execute the appropriate documents to accept the grant when it is awarded to the City of Asheville.

RESOLUTION BOOK NO. 32 – PAGE 350

E. RESOLUTION NO. 10-38 - RESOLUTION ADOPTING REVISIONS TO THE CITY OF ASHEVILLE WATER DISTRIBUTION SYSTEM DESIGN STANDARDS

Summary: The consideration of a resolution authorizing revisions to the City of Asheville Water Distribution System Design Standards.

The Water Distribution System Design Standards was last updated and adopted by City Council on March 28, 2000. The current version of the Water Distribution System Design Standards is combined as part of the Asheville Standard Specifications and Details Manual. City staffs from multiple departments and a stakeholder group, consisting of local design professionals have participated in focus groups to review the current manual. From these reviews it was determined that some sections of the design standards needed to be revised to coincide with current departmental procedures, and industry standards and practices, to simplify requirements and procedures to aide the development process, to ensure sustainability, and to reduce future maintenance expenditures of new waterline construction. It was also determined that the water design standard should be separated from the overall Asheville Standard Specifications and Details Manual, which contains the design standards for other types of construction. The stand alone document will be named the City of Asheville Water Design and Construction Manual.

Council received the current Water Distribution System Design Standards and the proposed Water Design and Construction Manual which contained specific information on changes, deletions and additions to the water standards.

Pros:

- Ensure that the design and construction standards are compliant and up-to-date with current departmental procedures and industry standards
- Simplify requirements to aide the development process
- Ensure sustainability and
- Reduce future maintenance expenditures of new waterline construction.

Cons:

- Result in standards that are not compliant or up-to-date with current departmental procedures and industry standards
- Keep requirements that are unnecessary and cumbersome to development and
- Allow practices that add costs to future maintenance expenditures for waterline repair.

The changes incorporated in the Water Design and Construction Manual do not change any fees, charges, or operating procedures that would affect revenues or expenditures for the department. The expense of developing the updated Water Design and Construction Manual consisted of staff time and input from stakeholders.

Staff recommends City Council adopt the resolution authorizing the changes in the Water Design and Construction Manual to become effective March 1, 2010.

RESOLUTION BOOK NO. 32 – PAGE 351

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. ALCOHOLIC BEVERAGE CONTROL BOARD UPDATE

Alcoholic Beverage Control Board Chairman Charles Worley said that the Asheville ABC System has implemented many changes since 2004. Building renovations, site acquisitions and store relocations have taken place in response to population growth patterns and business activities.

The Board initiated a strategic planning study in 2005 and updated that plan in 2008 to determine how to best serve their customers. The relocation of the Tunnel Road store and the construction of a new store on Leicester Highway were completed last year. We also completed the purchase of a parcel located on south Sweeten Creek road to accommodate the growth in that area of the city. These three locations incorporate the new vision and "branding" for Asheville's ABC system going forward. In total six of the eight original stores have been renovated or relocated. Evaluation of all store locations is ongoing as we continue in our efforts to enhance the customer shopping experience. We are focused on improvements in store merchandising and operational efficiencies while modernizing our facilities. Currently our operating results reflect the economic slowdown and rising unemployment in the area, the state's struggle with its budget shortfall and increases in the excise and sales taxes on liquor added burden on sales. However, the Asheville ABC Store System is very strong financially and we continue to execute our strategic plan to meet the needs of the citizens of Asheville.

In the last five years, they have:

- Renovated existing stores and opened new locations for customer convenience and accessibility. We have reinvested capital resources in the renovation or replacement of six of our nine locations. The ABC Board is committed to having our system grow with its market.

- Developed a "Branding" campaign that was incorporated into our new store design that identifies our system with Asheville. The new store design provides a fresh, welcoming atmosphere for customers while updating and unifying the ABC brand. The new prototype design was utilized for the Tunnel Road and Leicester Highway stores incorporates energy-efficient features and a sustainable design that is easily adapted to various site locations.

❑ Developing in partnership with several ABC Boards across the state a Public Education Media Program. Our focus is to air several underage drinking prevention messages during the prom and graduation timeframe for local high schools.

❑ Developed product information training programs for employees. We identified that it was critical for individual store staff to be knowledgeable about both current and new products. Utilizing training materials provided by product distributors, management developed a program and shared with individual managers in a formalized way. Customers have shown an appreciation for the product knowledge our representative's share with them when making decisions about purchases.

❑ Enhanced our emphasis on customer service to promote a pleasant shopping environment for customers. Managers encourage employees to speak to customers; to be friendly and to suggest products. This practice occurs system wide and is a part of the employee review process. Customers remember how they are treated in retail establishments and we make every attempt to insure a positive shopping experience for them.

❑ Increased the use of creative store displays. ABC management encouraged staff to develop in conjunction with the product distributors, to creation of their own displays. Competition among stores encourages participation and customers appear to appreciate the different "themes" that are created in each campaign.

❑ Provided informational material to customers by having new stores equipped with information booths where information can be displayed. Touch screen computers have been placed in several stores to provide product specific recipes or entertainment tips. Throughout the system coupons and recipes are on display in the information booths as well as colorful flyers used to promote select products. Store employees are encouraged to offer suggestions to customers that have questions about holiday entertaining or general product questions.

❑ New Inventory Management and Financial Software System was implemented to meet the growing needs of the enterprise. Implemented in three critical phases over eighteen months this new platform creates the solid base the organization requires as we continue to grow.

Mr. Worley also presented the Council with information ABC distribution of income from 2004-2009.

In response to Mayor Bellamy, Mr. Worley said that they would be happy to give Council their recommendation on the impact of the proposed legislation for our system.

On behalf of City Council, Mayor Bellamy thanked Mr. Worley and the entire ABC Board for their hard work on this Board.

B. PUBLIC ART BOARD UPDATE

Mr. Kenn Kotara, 2009 Public Art Board Chair explained the mission of the Public Art Board is to provide public art of the highest quality with public participation.

He outlined the key accomplishments – (1) Re-installation of the *Energy Loop* in new downtown plaza; (2) Repair, restoration, re-installation and re-dedication of *Art Deco Masterpiece* (Urban Trail Station #7); (3) Repair, restoration, and re-installation of the *Flat Iron* sculpture (Urban Trail Station #8); (4) Re-installation of Urban Trail sculptures in Pack Square Park; (5) Collaboration with Black Mountain College Museum and Arts Center on the lecture and visit with Kenneth Snelson; and (6) Collaboration with Asheville Art Museum on lecture Public Art in Asheville as part of Christo & Jean Claude exhibit.

He then outlined the following key goals for 2010: (1) City Council adoption of new Public Art Board ordinance, policy, and implementation guidelines; (2) Acquisition of five new public art pieces in Pack Square Park; (3) Launch the first Art on Transit bus graphics program; (4) Launch the Urban Trail audio tour (early 2010); (5) Host the regional Public Art 360 Conference (Fall 2010); and (6) Identify new opportunities for permanent and temporary public art.

In response to Mayor Bellamy, Mr. Kotara said that the Public Art Board does not have a member on the aesthetics committee for the I-26 Connector.

On behalf of City Council, Mayor Bellamy thanked Mr. Kotara and the entire Public Art Board for their time and energy on this Board.

C. QUARTERLY REPORTS

Public Safety Committee Chairman Report

Councilman Russell, Chair of the Public Safety Committee, said that the purpose of this memorandum is to provide you with information highlighting the activities of the Public Safety Committee during the second quarter of FY 2009-2010. Please consider that this only includes the months of October and November, as the December committee meeting was cancelled due to the holidays.

- Gun Buy-Back Program: Prior to the Christmas holidays the City of Asheville took steps to initiate a Gun Buy Back program. The Committee successfully secured funds from Eblen Charities ($5,000), Asheville Housing Authority ($5,000), and the APD's Community Outreach fund ($5,000) to implement this program. Through the four community meetings in December, we were able to purchase 256 rifles and pistols as well as two assault rifles for a total of $13,000 in cash expended.
- Newly Enacted Law Giving Local Governments Increased Authority to Regulate Smoking: The committee heard a report from the Legal Department, discussed enforcement difficulties, and suggested potential revisions to the City's smoking ordinance prior to the formal City Council presentation.
- Nuisance Court: The committee received an update from staff on initial Nuisance Court activity as it was implemented.
- A Policy to Incrementally Initiate Annual Fitness Tests for Police Officers and Firefighters: Dr. Mumpower presented this report. Following the presentation the committee discussed the issue in detail, then agreed to place the issue on the November 24, 2009 City Council Agenda.

In response to Mayor Bellamy, Police Chief Hogan said that we are continuing to have on-line solicitation investigations.

Councilman Russell gave a brief update on the City Council Finance Committee meeting held earlier today. He noted that all of Council will be receiving a copy of the numerous fees and charges and urged all of Council to review the information and give their input to the Committee members as soon as possible.

Strategic Operating Plan

Assistant City Manager Jeff Richardson briefly reviewed with Council the Second Quarter of Fiscal Year 2009-10 following five focus areas: (1) Affordable; (2) Green; (3) Safe; (4) Sustainable; and (5) Fiscal Responsibility.

Regarding Affordable, he briefed Council on the following items: (1) Civic Center Parking Deck Monthly Pass Volume Discounts; (2) Bulk Parking Voucher Discounts; and (3) 2009 Housing North Carolina Award.

Regarding Green, he reported the (1) Energy Efficiency and Conservation Block Grant Program (a) Home Energy Rating System training; and (2) Bicycle Master Plan Implementation (a) Sustainability Outreach Partnerships.

Regarding Safe, he explained the (1) Downtown Patrol Unit (a) Business and Public Contacts: 10,694; (b) Citations/Arrests: 523; (c) Hours of patrol: 2,780; and (d) Budget for 29 Haywood Retrofit; and (2) Fire and Rescue (a) October: Fire Prevention Month; and (b) Fire Station Six Energy Reduction. He then reviewed the calendar year of crime counts excluding unfounded cases. In response to Councilman Smith, Police Chief William Hogan explained what he felt was attributable to the decrease in crime.

Also regarding Safe, Mr. Richardson explained that the nuisance court had (1) Cases: New: 48 and Revisited: 25; and (2) Community Service Hours: New: 435 and Completed: 327. Mayor Bellamy noted that there has been positive feedback from the District Attorney's Office as well as from downtown residents.

Regarding the ARRA Grant success, he explained the (1) NCDOT Contracts; and (2) Five projects totaling $1.3M from original award amount of $3.1M (a) Downtown Streetscapes: $81,400; (b) Sidewalk Gaps: $436,900; (c) Resurfacing and Restriping: $214,200; (d) Kimberly Sidewalks: $540,000; and (e) Fairview Road Signal Upgrades: $58,700 *Of these projects, four (4) part-time jobs were created & 46 full-time job were retained, with an average wage of $12.85.*

Regarding Sustainability, using a chart he showed permit activity from October – December, 2009. He explained the partnership with UNC-Asheville at McCormick Field. Also he explained that the feet of pipe replaced by the in-house construction crew for neighborhood enhancement.

Also regarding Sustainability, he reviewed with Council the following Water Resources: Customer Service Data:

	FY-09	FY-10	Difference
Calls Abandoned	6,558	4,519	31% down
Requests for Adjustments	447	396	11% down
Average Wait Time	6:23	4:53	23% down
Average Abandon Time	1: 54	1:44	9% down

He also provided Council with the economy report for this quarter. Using charts, he showed employment change by major industry; unemployment rates; monthly home sales – units; monthly home sales – average price; residential building permits – units; residential building permits – value; City business licenses; and Asheville Metro total nonfarm employment.

Quarterly Financial Report

Chief Financial Officer Ben Durant provided Council with the following overview: (1) Current year budget trends show a $1.0 million General Fund revenue shortfall; (2) Available Fund Balance is projected to decline to 14.5%; and (3) The FY 2010-11 budget forecast continues to show a significant imbalance between revenues and expenditures. He showed a summary of the current General Fund budget. He then provided Council with a chart of the General Fund budget amendments, totaling $789,057.

General Fund revenue highlights include (1) Sales tax revenue down 9.5% through the first six months of the fiscal year; (a) December was down 1.6%; and (b) Projected to fall $1.35 million short of budget; (2) Property tax budget estimates are on target; (a) Received official FY 2009-10 tax base data from County; (b) Tax base grew 3.5% and (c) Growth driven by

Ridgefield/Airport Road annexation and Biltmore Town Center; and (3) Overall, general fund revenues are projected to fall short of budget by $1.0 million.

General Fund expenditure highlights include: (1) Public Works budget strained by winter storms; (a) Storm control expenses $300,000 over budget; (b) March budget amendment; and (c) Possible FEMA reimbursement after July 1; and (2) Overall operating budgets are tight and we expect $341,000 in savings.

Using a chart, he showed the Fiscal Year 2010 current year estimate (fund balance).

Regarding the Health Care Program, (1) Health Care Reserves: $1.13 million as of June 30, 2009; (2) Trends continue to indicate that expenses will exceed revenues by $1.0 million; and (3) March 9 overview of Insurance Fund and FY 2010-11 budget alternatives.

Using a chart, he showed the enterprise funds (water, civic center, transit, parking, festivals, golf and stormwater) revenue estimates, expenditure estimates and revenue over or under expenditures.

Capital improvement update includes (1) Reid Center (a) $1.8 million construction amendment; and (b) Debt proceeds & donations; (2) 5% Sullivan Act Funding (a) $1.6 million for street & sidewalk projects; and (b) Project list under development; (3) ARRA Funds (quarterly operating update); and (4) City Hall Roof Repairs (a) Report due March 9th.

Quarterly report conclusions (1) General Fund expenses will exceed revenue by $1.0 million (a) Sales tax revenue below estimates; (b) Snow removal/storm clean ups costs; (c) Limited savings opportunities; and (d) Continued reliance on fund balance; and (2) Fund balance below policy level; and (3) Budget balancing for FY 2010-11 will be challenging given existing conditions.

He provided Council with the following executive summary of financial information which reflects the City's overall financial position for the fiscal year through December 2009.

Amendments. The General Fund budget presented in this second quarter report reflects the adopted budget of $92,688,293; plus $1,097,031 in prior year encumbrances that rolled over from FY 2008-09; along with thirteen budget amendments approved by Council since the start of the fiscal year that total $789,057. Three budget revisions involved the appropriation of fund balance: 1) $366,812 was used as the City match for transportation improvement projects that were partially funded with an ARRA grant; 2) $60,000 was used to expand the number of early voting sites; and 3) $71,451 was used to cover civil service board expenses that arose from a General Assembly mandate. The other amendments were funded with various grants and donations.

Adopted Budget	92,688,293
Encumbrances	1,097,031
13 Budget Amendments*	789,057
12/31/2009 Budget	$94,574,381

* Fund balance appropriations since July 1 total $498,263

Revenues. Through December 31, 2009, the City collected $19,897,697 in General Fund revenue, which represents approximately 21.8% of the total General Fund revenue budget. Sales tax collections continue to under perform budget estimates and are down 9.5% compared to the same time last fiscal year. As a result, sales tax revenue is expected to come in under budget in the current year by $1,350,000. The City received its official FY 2009-10 property tax

data from Buncombe County in January, which confirmed that property tax revenue should come in at budget. Based on current year-end estimates, staff is projecting that ***FY 2009-10 total General Fund revenue will come in under budget by $1,039,000.***

Expenditures. General Fund expenditures through December 31, 2009 total $40,946,086 or 43.3% of the budget. ***Due to an unusually high number of winter storms, the Public Works Department budget has absorbed approximately $300,000 in unplanned expenses. Staff will bring a budget amendment to City Council in late March to cover these costs. Based on spending in the first half of the year and historical trends, staff is currently estimating that the overall General Fund budget will end the year with a budget savings of $341,089. Staff, however, is estimating that expenditures in the Health Care Fund will exceed revenues by approximately $1.0 million. It is anticipated that health care reserves, which ended FY 2008-09 at approximately $1.13 million, will be used to cover this shortfall.***

Fund Balance. The City ended FY 2008-09 with available fund balance of $16,696,979, which equated to 18.7% of FY 2008-09 expenditures. ***Based on current year-end revenue and expenditure estimates for FY 2009-10 staff is projecting that available fund balance will decrease to $13,705,410, which will equate to 14.5% of estimated year-end expenditures.***

Mr. Durant responded to various questions from Council, some being, but are not limited to: what is the projection of sales tax revenue for the next 6 months; is there some reason to be optimistic that the sales tax revenue will rise over the next 6 months; with Asheville's budget and our shortfall being less than 1%, how does that compare to cities across the state; explanation that for the current year, we are projecting a $1 Million shortfall and a $5 Million shortfall is projected for next fiscal year.

Mr. Durant then briefed Council on (1) update on assumptions; (2) Identify emerging trends; (3) Review budget calendar; and (4) Set March 9 Budget Worksession agenda.

November 24, 2010, preliminary budget forecast is as follows:

• Revenues flat	
• No fund balance appropriation:	$1,900,000
• Health care increase:	$1,500,000
• Decreased federal transit funding:	$500,000
• Allocation for inflation*:	$1,200,000
• TOTAL BUDGET GAP:	$5,100,000

* Includes 2% ($500,000) employee cost of living adjustments

Current outlook cost increases are as follows: (1) State approved increase in retirement contribution (a) General employees: 4.8% to 6.35%; (b) Law Enforcement employees: 5.27% to 6.82%; (3) Citywide cost: $800,000; and (4) General Fund cost: $650,000; and (2) Revised health care forecast; (a) Additional $600,000 increase taking total estimated increase from $1.5 million to $2.1 million.

Current outlook cost reductions include: (1) Departmental Cost Reductions (a) Departmental targets of 4% & 8% cost reduction; (b) $2.0 million with indirect service impact; and (c) $2.5 million with direct service impact; and (2) Health Care cost reductions: (a) $300,000 to $700,000 with plan alterations.

Current outlook revenue increases: (1) Cost recovery/fee recommendations - $200,000; and (2) Financial Crossroads paper alternatives.

Emerging trends and issues include: (1) Economic Recovery; (2) City Hall Building repairs; (3) Domestic Partner Benefits; (4) Unfunded Mandates; and (5) ARRA Grants Phase II.

The budget calendar is as follows: (1) March 9 Worksession - Budget Policy direction & Cost recovery/fee increases; (2) May 11– Budget Presentation; (3) May 25 – Budget Worksession/Public Hearing; and (4) June 22 – Budget Adoption.

Council policy direction is needed at the March 9 worksession for the following: (1) General Fund Operating & Capital Budget; (2) Parking Fund; (3) Transit Fund; (4) Water Utility Fund; (5) Insurance (Health Care) Fund; (6) Parks Subsidies; and (7) Outside Agencies.

Throughout the presentation, Mr. Durant and Public Works Director responded to various questions from Council, some being, but are not limited: what is included in the allocation for inflation; how does the $1 Million projection shortfall for the current year play into the next years budget; are there other salary increases planned for City employees other than the 2% cost of living adjustments; and financial information due to the recent storm events.

In response to Mayor Bellamy, Mr. Durant clarified that on March 9, staff will need enough direction from Council to prepare a balanced budget.

Vice-Mayor Newman asked staff provide Council with a range of different options to close the gap for a balanced budget.

Mayor Bellamy asked for additional information on the ABC distribution of 25% going to the County and the reason behind that 25/75 distribution. She felt that if that is special legislation, then we should ask our legislators to allow the entire 100% be directed to the City of Asheville.

Mayor Bellamy felt that on March 9 it might be a good time to begin discussions about re-building our Fund Balance. She understood that the state recommendation is 8%; however, she felt it would need to get higher in order to maintain our good bond rating. Personally, she felt 8% is too low for a city our size.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL ZONING APPROVAL FOR THE PROJECT IDENTIFIED AS SILVERMAN MIXED USE DEVELOPMENT LOCATED ON SWANNANOA RIVER ROAD

ORDINANCE NO. 3827 - ORDINANCE TO AMEND THE CONDITIONAL ZONING APPROVAL FOR THE PROJECT IDENTIFIED AS SILVERMAN MIXED USE DEVELOPMENT LOCATED ON SWANNANOA RIVER ROAD

Mayor Bellamy opened the public hearing at 6:20 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the conditional zoning approval for the project identified as Silverman Mixed Use Development located on Swannanoa River Road to increase the residential units from 125 to 200 units. This public hearing was advertised on February 12 and 19, 2010.

She said the project site is located at 48 Swannanoa River Road on four parcels totaling approximately 4.5 acres. Two of the parcels are located across Swannanoa River Road Swannanoa River Road and are to be the dedicated open space for the project. This project was approved in June of 2008 as a development of 125 residential units (in two buildings east and west on the site) and approximately 26,000 square feet of commercial space including space for a grocery store (approximately 14,000 square feet) which forms the center of the development. The remaining commercial space (approximately 11,000 square feet) was proposed for the

second level of the western wing structure. The approval granted at that time by the Asheville City Council was for rezoning from River District to Urban Place Conditional Zoning with an approved concept plan. Council also approved a setback modification to allow a greater setback (up to 45 feet as opposed to the required maximum of 15 feet) along Caledonia Road due to the topography in that area. The project was never submitted for final TRC approval. The project at that time was also approved by the City's River District Design Committee for compliance with the River District Design Guidelines. The project is in the flood hazard area and is subject to the requirements governing development in the area.

The developer is returning to seek an amendment to the conditional zoning approval received for this project. The developer seeks to add an additional 75 units to the project. The addition of these units will add approximately 11,144 square feet (gross floor area) to the building at two points to the north. The proposal reduces the number of two- and three-bedroom units and adds studio and one-bedroom units to the residential mix. The proposed mix of units is for: 141 one-bedroom and studio units; 47 two-bedroom units; and 12 three bedroom units. Ten percent (10%) of the units (20) are proposed to meet the City's affordability standards. The development will actually consist of three separate structures with rated firewalls separating them. The height of the residential structures is 77 feet (five stories plus ground parking level). The grocery structure is 24 feet in height.

Parking for the project (327 spaces) is shown to be provided on the first two levels of the building. All parking areas are connected. Access to the development is proposed from both Swannanoa River Road and Caledonia Road. Truck traffic will be routed from Swannanoa River Road easterly through the site and will exit onto Caledonia Road. A revised traffic impact study was provided to the City's Traffic Engineer on February 10, 2010.

Ms. Cogburn asked that if Council approves this project that the recommendations in the Traffic Impact Study be included as a condition of approval and also that the width of Caledonia Road be increased to 20-feet wide at all points along the developer's property line.

Even though there are minor adjustments to materials in this project, it was determined that this amendment did not need to return to the River District Design Committee for additional review. This decision was made after conferring with the Chair and Co-Chari of the Committee and the City's Planning Director.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet health and safety requirements of local and state ordinances. The project will be elevated as required by the flood hazard ordinance to protect life and property.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The site is a former service yard for an industrial supplier and has been graded for this use. The river edge however will be un-developed and remain in a natural state and may be improved at a future date as a part of greenway and buffer development. The project will be elevated as required by flood hazard ordinances to minimize damage from flooding and prevent water pollution. With these features in place, the current design will be compatible with the significant natural and topographic features of the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The investment in this mixed-use project is expected to improve the values of surrounding properties. The proposal is consistent with the adopted goals and plans for the area to create places for mixed-use commercial and residential development. The site was accepted into the NC Brownfields Study area that will assess the site for any contaminants that may need remediation.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   This site is located at the edge of the Swannanoa River and the Kenilworth Neighborhood sits on the bluffs and knoll above the river. The project should not create a negative impact or affect the character of Kenilworth because its focus is the Swannanoa River. The City Council adopted *Wilma Dykeman Riverway Master Plan* outlines a new vision for the river area with higher density mixed-use projects at appropriate locations as a way to bring new life, opportunity and energy to the river areas. In consideration of the Dykeman Plan goals, the proposal is in keeping with the harmony, scale, bulk, coverage and density and character of the river area.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The comprehensive plan encourages redevelopment of infill sites to support multi-modal transportation, greenways and vertical development with greater residential densities. The Dykeman plan is a vision plan with many goals: redevelopment of infill sites with mixed-use buildings, economic development, transportation improvements, environmental protection, among many more. The Silverman proposal includes many of these goals through the specific features of the project. The proposal will provide residential units with some of the units offered at an affordable rate. In addition the project will seek Energy Star and Healthy Built for the residential portion of the project to contribute to sustainable development goals adopted by the City. The project will conform with the comprehensive plan and meets many goals and policies adopted by the City.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The project is located along Swannanoa River Road which is a state highway. The location in the center area of the city means that the public infrastructure is in place to service the development. The project is located close by to commercial and employment centers and recreation areas.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The revised traffic impact study was submitted on 2/10/10. The City's Traffic Engineer will be at Council to discuss the study and make recommendations. Commercial traffic is not permitted to use Caledonia Road into Kenilworth already.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The project is mixed-use and meets many goals of the Dykeman Plan.

- The project could become a destination place within the river area.
- The project will meet NC Healthy Built Homes standards.
- Affordable units will be provided in the project meeting City of Asheville guidelines.
- Sufficient infrastructure is in place to support the project.
- The project should act as a catalyst for further redevelopment in the area.
- The site has been accepted into the NC Brownfields Study Area to identify any environmental contaminants.

Cons:

- Construction work can temporarily create congestion in the area.
- New vehicle trips will be added to Swannanoa River Road and possibly Caledonia Road.

The Technical Review Committee reviewed and approved this amendment (with the conditions noted on their report) at a meeting on February 1, 2010. The amendment did not have to go to the Planning and Zoning Commission.

Mr. David Madera, developer, felt this is a greener and a more sustainable project than the original project. He explained how they are only increasing the space by 10% and not changing the footprint at all. He urged Council to approve his project.

Mr. Alan Ditmore spoke in support of the project, but was concerned that widening the road will increase the amount of impervious surface.

Mr. Terry Meek, representing the Kenilworth neighborhood, supported the project; however, outlined the following concerns related to traffic: (1) due to limited parking for patrons at the Antique Tobacco Barn, request for curb and gutter on the western side of Caledonia Road adjacent to the Silverman property; (2) commercial traffic be right-turn only out of the project on Caledonia Road; (3) traffic light at the intersection of Caledonia Road and Swannanoa River Road; and (4) the project go back to the Technical Review Committee for permitting to make sure it does comply with all the conditions.

Mr. John Pomeroy, owner of the Antique Tobacco Barn, supported the project and explained how they have been addressing the limited parking with signs and how they also have expanded the parking for their clients and dealers. He even offered to donate some of their property at the corner of Swannanoa River Road for the turn lane onto Caledonia Road in order to be better neighbors for the new development and Kenilworth residents.

Mr. Robert Todd, Kenilworth resident, supported the proposal.

At 6:48 p.m., Mayor Bellamy closed the public hearing.

Director of Transportation Ken Putnam addressed the concerns raised by Mr. Meek, noting that all concerns will be, or have been, addressed. He noted that since Swannanoa River Road is a State maintained road, all improvements will ultimately have to be approved by them. He also noted that the State will need to make the decision regarding a traffic signal at the intersection of Caledonia Road and Swannanoa River Road and suggested the appropriate time to request a study would be after the project is built out and traffic patterns are settled in that area.

Mr. Madera responded to questions raised by Councilman Smith regarding the Healthy Built Certification and the affordable units.

Mayor Bellamy asked that the motion include a request that our Director of Transportation contact the N.C. Dept. of Transportation and ask that they study the intersection at Caledonia Road and Swannanoa River Road for a possible traffic signal.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Based on the findings and analysis provided in the staff report, Councilman Russell moved for the adoption of Ordinance No. 3827, to amend the conditional zoning approval for the project identified as Silverman Mixed Use Development located on Swannanoa River Road to increase the residential units from 125 to 200 units, subject to the conditions as set forth in the staff report and the following standard conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance; (3) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (4) This project will undergo final review by the TRC prior to issuance of any required permits; (5) the recommendations in the Traffic Impact Study be included as a condition and the width of Caledonia Road be increased to 20-feet wide, meeting city standards, at all points along the developer's property line; and (6) the Director of Transportation request the N.C. Dept. of Transportation study the intersection at Caledonia Road and Swannanoa River Road for a possible traffic signal. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 - PAGE 38

Closed Session

At 7:00 p.m., Mayor Bellamy announced a short break, at which time they would conduct a closed session. Councilman Smith then moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authorization is contained in G.S. 143-318.11(a)(4); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 7:34 p.m., Councilman Smith moved to come out of closed session. This motion was seconded by Vice-Mayor Newman and carried unanimously.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. CONSIDERATION OF A RESOLUTION AUTHORIZING THE CITY TO SUBMIT A STATEMENT OF INTEREST FOR THE NATIONAL ENDOWMENT FOR THE ARTS MAYORS' INSTITUTE ON CITY DESIGN PROGRAM GRANT

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this item is a selection of a competitive project that meets the grant requirements with a plan to provide the matching funds required. Various groups, including the HUB and the Downtown Master Plan Cultural Arts Implementation team, have come forward with proposals on projects.

Each year, the National Endowment for the Arts (NEA) offers numerous grants in a variety of art and design categories. This year, the Mayors' Institute on City Design (MICD) grant has been created to showcase and celebrate the goals of the MICD and that arts and culture

contribute greatly as core components in building livable and sustainable communities. Applications will be reviewed on the basis of artistic excellence and artistic merit.

The NEA anticipates awarding fewer than 15 grants. Organizations must designate a grant request in one of the following categories: $25,000, $50,000, $100,000, $200,000, or $250,000. All grants require a nonfederal match of at least 1 to 1 dollar for dollar.

Projects may include planning, design, and arts engagement activities such as:

Planning

- The planning of arts districts.
- The mapping of cultural assets and related developmental potential.
- The promotion of the arts and artists as integral components of community life and essential to community planning.
- The exploration of innovative approaches that maximize the economic growth of a community's creative sector.

Design

- The promotion of design and the arts to enhance livability and as central components for the development and enhancement of new or existing public spaces -- such as parks, public buildings, libraries, memorials, streets -- through architecture, streetscapes, pedestrian bridges, neighborhood gateways, and sustainable parks and landscapes.
- Design competitions or charettes (design workshops) for arts or cultural vitality projects.
- The revitalization of neighborhoods that focuses on preserving the historic value and heritage of existing buildings and/or the adaptive reuse of structures to be used as cultural facilities or for mixed use purposes (i.e., for cultural facilities and other entities). This includes affordable housing for artists and others, artist studios or live/work space, and entrepreneurial new creative sector business development.

Arts Engagement

- The transformation of community sites into public spaces for cultural activities.
- Projects which contribute to cultural vitality and a sense of place such as innovative community engagement projects, including festivals, community-wide celebrations, outdoor exhibitions, and learning opportunities; and the commissioning of temporary and/or permanent site-specific public art such as murals and sculptures, sculpture gardens, and waterfront art walks.
- New media or technology projects that connect citizens to cultural activities or engage them in participating in city planning or design projects.

Deadlines:

March 15, 2010: Statement of Interest which is to include:

- Budget Outline (No pre-award costs are allowable in the project budget. Project costs that are incurred before the project start date will be removed from the project budget.)
- Major Project Activities
- Goals
- Schedule (by month or by quarter)
- Partners, key organizations, individuals, and works of art that will be involved in the project.
- Target community (impact, past experience, number served, etc.)

- Plans for promoting, publicizing, and/or disseminating the proposed project, as appropriate
- Plans for monitoring the project and assessing the degree to which you achieve your goals
- Evidence of impacts achieved

April 8, 2010: Invitation to Apply Issued
May 10, 2010: Formal Application Deadline

Project Start Date: between July, 2010 – December 2010
Project Completion Date: one year after start date

Staff have been approached by multiple groups, which includes the HUB and the Downtown Master Plan Cultural Arts Implementation task team, with potential project options for City Council to consider.

Downtown Master Plan Option

The Downtown Master Plan Cultural Arts Implementation task team has asked the City to review possible projects from the Downtown Master Plan including the creation of an arts alliance, the creation of an artist resource center, and the planning of Pack Square Cultural District, all of which would be supported by the grant. However, the matching funds have not yet been identified.

HUB Creative Cluster Option

The HUB through its Creative Cluster leadership is asking to apply for this NEA grant as the single proposal the "HUB Creative Cluster. 1.29.10." to represent the City of Asheville. They would like the city to be the "sponsor" and applicant but HUB would provide the matching funds for the project's Arts & Culture Cluster initiative.

Public Art Board Projects Option

Staff have identified other possible projects as outline in the departments master plan for a direct grant. The Public Art Board has endorsed two public art projects: the Reed Creek Greenway gateway on Broadway as part of the Public Artist of the Year and Riverbend Park (at Wal-Mart). Both of these projects have $25,000 each in privately raised funds that would be used for the one-to-one match. The completion of these projects would support the Parks, Recreation & Cultural Arts Master Plan goal #11 (Support public expectation for public art of the highest quality with public engagement) and goal #13 (Create a coherent, comprehensive, and exciting municipal collection of public art). The public art fund did not receive an allocation for FY10 and this grant would help the projects move forward.

This action complies with the City's Council Strategic Operating Plan in that it supports Job Growth & Community Development. It also complies with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides opportunity to partner with community groups to implement community master plan priorities.

Pros:

- The grant provides support for a variety of projects and activities;
- The arts are an integral part of the City of Asheville;
- Provides additional funding for a project or activity.

Cons:

- The City has limited ability to match funds and will be fiscal responsible for private funds not raised.
- The City has limited resources to administer a federal grant;
- The application deadline is March 15, 2010.

The current FY 2009/2010 operating budget does not include matching funds for an NEA grant. If City Council authorizes the City to submit an application for a grant and the City is a successful applicant, matching funds ranging from $25,000 to $250,000 would be required, depending on the grant project submitted.

Staff's plan for identifying necessary matching funds is to require the appropriate community group seeking to partner with the City for a grant project to raise matching funds through private donations. To the extent that such private matching funds are raised, there would be no fiscal impact to the City. If private funds are not raised, however, the financial impact to the City would range from $25,000 to $250,000, depending on the grant project submitted. The City could further be impacted if the program or project for which grant funds are being sought is on-going in nature, requiring continued operating support from city sources.

Staff recommends that City Council provide guidance on whether to should submit a grant and for what project from the options identified.

Councilman Russell, Chairman of the Finance Committee said that due to time limitations, the Finance Committee did not have an opportunity to give Council their recommendations at their meeting earlier today and suggested the full Council hear the presentations.

Ms. Kitty Love explained the proposal from the Arts & Cultural Sub-Committee of the Downtown Master Plan Action Committee. In summary, they propose that we access the multiple data resources available and compile the evidence that supports the conclusion that arts and cultural institutions (for-profit, not-for-profit, public) help build vibrant, sustainable, and economically viable communities. From this collection of data, a feasibility study can be designed to leverage the necessity of the following action steps (1) perform the first annual state-of-the-art audit to (a) identify existing artists and organizations; (b) compile each agency's mission and programs; (c) inventory each agency's resources, e.g., staff, budget and equipment; (d) identify existing spaces, uses and needs; (e) inventory unmet needs; (f) identify all arts-related, creative, and art-based businesses; (g) project economic impacts derived from for-profit and non-profit organizations; (h) assess Asheville's per capita public support for the arts in relation to programs in other cities; (i) establish metrics, goals, and benchmarks for awareness, sustainability, and growth; (j) seek national models and case studies; and (k) develop an in-depth searchable database to be fed by the data collected from the start-of-the-arts audit as well as other master plan recommendations as the framework for continuing development of an Artists' Resource Center; and (2) once the audit is complete, stage the first annual cultural "summit" at a major downtown arts venue in cooperation with the Tourism Development Authority, Convention and Visitors Bureau, Mountain Bizworks, A-B Tech, the HUB Initiative, UNC-Asheville, Pack Square Conservancy, and other major players. The summit should (a) create cohesiveness within the arts community; (b) develop common advocacy points; (c) plan national marketing; (d) identify strategies to avoid cannibalizing funding sources; and (e) encourage partnership grant applications for state, federal and foundation funding.

Ms. Love said that having evaluated the HUB proposal and noting that the goals and expected outcomes are closely aligned with those that the DTMP Action Committee is putting forth, she hoped that they will be able to meet with the HUB representatives to discuss a possible merger. A part they feel is appropriate to blend is doing a compilation of data resource assessment of our local and regional arts resources for the purpose of compiling them into a database that can have many uses, but also for the purpose of the recommendation of having a state-of-the-arts audit.

Mr. William P. Massey briefly explained the proposal for a Creative Cluster initiative. The Creativity Cluster of Asheville HUB makes this proposal with the understanding that matching support will be secured by members of the HUB Alliance from private community sources. The City of Asheville is *not* asked to provide matching funds. The Arts & Culture Cluster of HUB will endeavor to use a 12-month period beginning July 2010 to facilitate and create evidence-based findings that demonstrate the economic development value-add of arts and cultural programs in Asheville and Buncombe County. This will be accomplished through 4 major components as follows: (1) National research to support the claim that arts and cultural institutions (for profit, not-for-profit, public) help build vibrant, sustainable communities and present specific communities, projects, partnerships and financial outcomes; (2) Undertake local research to map Asheville/Buncombe arts and cultural assets; (3) Engage a wide range of local community conversations around the questions: *"How can arts and culture bridge communities that historically have been separated by race, age, income, or health disparities? How can arts and culture contribute to creating a more civil, just and caring community?"*; and (4) Convene a two-day forum of representatives from 4 or 5 U.S. cities/metropolitan areas that are distinguished for using arts and culture as economic development tools. Regarding the budget, because NEA grants require a 1:1 match, they anticipate project cost of $200,000, with $100,000 from Federal NEA funds. (The project is scalable if less funding is available.) The balance will be secured locally by HUB leadership through contributions and in-kind support. A breakdown for each component described above is: Part I (national research) $25,000; Part II (local research/analysis) $25,000; Part III (convening local community conversations) $25,000; Part IV (Forum & published outcomes) $125,000.

After a brief discussion, Mayor Bellamy felt that since the Finance Committee will not have an opportunity to review this prior to the March 9 agenda to give Council their recommendation, she felt it would be appropriate for the three proposal representatives to meet and discuss if there is any agreement for collaboration. She said that this item can then be placed on the March 9, 2010, meeting for action.

B. RESOLUTION NO. 10-39 - RESOLUTION OF CONSIDERATION IDENTIFYING AREAS WITH POTENTIAL FOR FUTURE ANNEXATION

Urban Planner Julia Cogburn said that this is the consideration of a Resolution of Consideration identifying areas with potential for future annexation and reducing current map of consideration.

State law provides that a Resolution of Consideration may be adopted by cities as a preliminary step in the annexation process. The Resolution of Consideration serves the purpose of providing citizens with advance notice that certain areas in proximity to the City may, in the future, be subject to annexation. After being in effect for at least one (1) year, the Resolution of Consideration also has the benefit of reducing the time period required between adoption of any annexation ordinance and the effective date of that ordinance from a minimum of one (1) year to a minimum of seventy (70) days. Each Resolution of Consideration is effective for two (2) years. The initial City of Asheville Resolution of Consideration was adopted on April 9, 2002, and revised maps were adopted by Council on March 9, 2004, March 7, 2006, and February 26, 2008. At the time of adoption of the last resolution/map in 2008, Council directed staff to look at creating a map for future consideration that covered less area and was more representative of areas that might qualify for annexation. Staff has incorporated these thoughts into the resolution/map now presented to the Asheville City Council.

Urban Planner Blake Esselstyn said that the map staff has prepared to accompany this resolution substantially reduces the area compared to what was previously included. Areas have been taken out that were recently annexed by Asheville or other municipalities. Major changes were made to take out areas that were sparsely populated due to: steep slopes, little infrastructure (water, sewer, roads), and large parcel size. In addition, areas within one-half mile

of the annexation agreement boundary with the Town of Woodfin have been excluded. The total area of consideration is now 33.1 square miles. 32.2 square miles have been eliminated. The areas that remain are areas that are urbanized or have potential for urbanization, such as the areas along major thoroughfares, areas within the City's extraterritorial jurisdiction, areas with existing infrastructure, or areas where utility extensions are feasible. This map does not preclude incorporation of municipalities in these areas nor does it preclude annexation by another municipality.

Pros:

- Gives residents and property owners within the area advance notice of possible annexation.
- Allows the time period between passage of an annexation ordinance and the effective annexation date to be shortened to a minimum of seventy (70) days.

Con:

- The reality of annexing some parts of the area may not be realized for a number of years.

City staff recommends that the Resolution of Consideration be adopted.

Vice-Mayor Newman felt this is a good step in the right direction, but 95% of the land will not be actively be contemplated for annexation in the next 2-4 years. He wondered if it would be possible to create a map that identifies the areas that are clearly ready for annexation.

Ms. June Patterson, Arden resident whose property is in the area for consideration, explained why her property did not meet the criteria necessary for annexation.

Mr. Alan Ditmore voiced his concerns regarding annexation.

Ms. Betty Jackson urged Council not to use forced annexation to make itself a better city. She provided Council with information on how forced annexation is good for municipalities but bad for the public.

Rev. Christopher Chiaronmonte urged Council to prepare a map that is more realistic on what can possibly be annexed in the next two years.

Mayor Bellamy noted that Asheville is respecting our conversations with the Town of Woodfin in that this map does not identify property in the Leicester Township. The City made a commitment not to annex into Leicester Township for at least three years contingent upon the same commitment by the Town of Woodfin.

Councilman Russell is not a proponent of annexation but understands the City's position. However, he could not support forced annexation.

Councilman Bothwell urged people to lobby the state legislature to allow Asheville to operate as every other city in North Carolina that runs their own water system, so Asheville would not have to use forced annexation.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 10-39. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Councilman Russell voting "no".

RESOLUTION BOOK NO. 32 – PAGE 352

C. ANNEXATIONS

RESOLUTION NO. 10-40 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 301 LONG SHOALS ROAD AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-41 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 380 LONG SHOALS ROAD AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-42 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 1 VOLVO DRIVE, 42 SCHENCK PARKWAY AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-43 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX DORSET DRIVE AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-44 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 67 MOUNTAINBROOK ROAD AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-45 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 73 AND 75 WATERS ROAD AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-46 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 26 ROCKING PORCH ROAD AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-47 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 40 KEASLER ROAD AND 23 SUNNYCREST DRIVE AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-48 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 617 UPPER SONDLEY DRIVE AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-49 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX 1445 TUNNEL ROAD AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-50 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX WILLOW WINDS LANE AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

RESOLUTION NO. 10-51 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX PORTIONS OF AIRPORT ROAD AND SETTING THE PUBLIC INFORMATION MEETING ON APRIL 12, 2010, AND THE CITY COUNCIL PUBLIC HEARING ON MAY 11, 2010

Urban Planner Julia Cogburn said that this is the consideration of resolutions stating the intent of the City to annex twelve (12) areas contiguous to the current boundaries of the City of Asheville.

The City's policy is to include within its corporate boundaries areas that are urban in nature and meet State of North Carolina qualification requirements. Staff has identified twelve (12) areas that meet the state requirements. All of these areas are contiguous to the current municipal boundary and are mostly small in size. The rationale for annexing these areas is to clean up split jurisdiction issues and to improve service delivery.

Under State law, the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

Staff has provided the following proposed schedule for these annexations. The effective date for all would be September 30, 2010. The following steps and dates meet the process required by State law:

- Council Adoption of Resolution of Intent – 2/23/10
- Council Adoption of Services Plan – 3/9/10
- Public Information Meeting – 4/12/10
- City Council Public Hearing – 5/11/10
- Annexation Ordinance Adopted – 5/25/10
- Effective Date – 9/30/10

Pros:

- Supports City of Asheville's Smart Growth Annexation program (regular program of annexations) as set forth in the City's 2025 Plan.
- Provides for an urban level of service for developed and developing areas adjacent to the existing city limits and includes those benefiting from existing City services in participation in the costs of such services.
- Fills in service delivery gaps and split jurisdiction issues on the edge of corporate limits.

Con:

- Residents of proposed annexation areas may object to such annexation.

The fiscal impact of this round of annexations will be addressed in the Plan for Services document, which is scheduled to come before City Council on March 9, 2010.

Urban Planner Blake Esselstyn reviewed in detail the following twelve areas and the rationale for annexation:

301 Long Shoals Road (Ingles)
Behind 380 Long Shoals Road (Schenck Parkway)
1 Volvo Drive, 42 Schenck Parkway (Farleigh Street)
Dorset Drive (Deerfield)
67 Mountainbrook Road
73 and 75 Waters Road

26 Rocking Porch Road
40 Keasler Road and 23 Sunnycrest Drive
617 Upper Sondley Drive
1445 Tunnel Road
Willow Winds Lane
Airport Road (portions of shopping center; developed property on edge of municipal service area, including Airport Road right-of-way to Brian Boulevard and County line as well as part of Rockwood Road)

City staff recommends that City Council adopt the resolutions of intent stating the City's intent to annex these twelve (12) annexation areas.

In response to Mayor Bellamy, Mr. Esselstyn said that Deerfield does pay some property tax; however, annexing this portion would not any additional tax revenue for the City.

In response to Mayor Bellamy about expenses to bring these properties into the City, Mr. Esselstyn said that they are currently working on a plan for services which will be coming to Council on March 9.

Mayor Bellamy questioned if there will be a need for an additional fire station in the southern part of the City if those portions of Airport Road are annexed. Fire Chief Scott Burnett said that based on the current call volume, this area will probably add 50 more calls for request for services, which is not significant.

Mayor Bellamy said that she could not support these resolutions of intent until she sees the plan for services identifying the up-front costs for the City to annex these areas.

Ms. Betty Jackson felt Council should let people decide if they wish to be annexed.

Mayor Bellamy that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-40, with the public information meeting being held on April 12, 2010, and the City Council public hearing being held on May 11, 2010. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Mayor Bellamy and Councilman Russell voting "no".

RESOLUTION BOOK NO. 32 – PAGE 354

Vice-Mayor Newman moved for the adoption of Resolution No. 10-41, with the public information meeting being held on April 12, 2010, and the City Council public hearing being held on May 11, 2010. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Mayor Bellamy and Councilman Russell voting "no".

on May 11, 2010. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Mayor Bellamy and Councilman Russell voting "no".

RESOLUTION BOOK NO. 32 – PAGE 398

D. RESOLUTION NO. 10-52 - RESOLUTION APPOINTING A CHAIR TO THE CIVIL SERVICE BOARD

Vice-Mayor Newman said that John Miall currently serves as Chairman of the Civil Service Board. The Civil Service Law for the City of Asheville, Section 2, Chapter 303 of the 1999 Session Laws of the North Carolina General Assembly provides that the Chair of the Civil Service Board shall be appointed annually by the City Council.

Mr. Miall was appointed Chairman to the Civil Service Board on March 9, 2009.

Current members of the Civil Service Board include: Chairman John Miall; Virginia Robinson, Larry C. Harris Jr., Marvin Rosen and Charlotte Tell.

Upon inquiry of Councilwoman Manheimer, City Attorney Oast said that Councilwoman Manheimer did not have a disqualifying conflict of interest just because Mr. Harris works at the same law firm.

Councilman Davis moved to appoint Larry C. Harris Jr. as Chair of the Civil Service Board effective February 23, 2010, for a one-year term or until his successor is duly and annually appointed by the City Council, as provided by law. This motion was seconded by Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 403

E. RESOLUTION NO. 10-53 - RESOLUTION APPOINTING A MEMBER TO THE ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Asheville-Buncombe Community Relations Council.

The term of William Moore, as a member on the Community Relations Council, expires on December 31, 2011.

Also at the February 9 City Council meeting, it was the consensus of Council to interview Mike Hahn and Curry First. Mr. First was interested in the appointment; however, was unable to attend the interview.

Councilman Bothwell felt Mr. First's credentials would be an asset to the Community Relations Council and would support his appointment.

Councilman Russell moved to appoint Mike Hahn as a member of the Asheville-Buncombe Community Relations Council to serve the unexpired term of Mr. Moore, term to expire December 31, 2011, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 404

F. RESOLUTION NO. 10-54 - RESOLUTION APPOINTING MEMBERS TO THE DOWNTOWN COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Downtown Commission.

The terms of Jesse Plaster, John Rogers and Peter Alberice, as members of the Downtown Commission, expired on December 31, 2009.

On February 9 it was the consensus of Council to interview Bruce Hazzard, Matt Sprouse, Tony Fraga, Rachael Bliss and Bill Allison. Mr. Fraga was interested in the appointment; however, was unable to attend the interview. Mr. Allison withdrew from consideration.

Councilman Davis, member of the Downtown Commission, said that Mr. Brad Galbraith has resigned from the Commission, thus leaving an unexpired term until December 21, 2011. Since this resignation came after City Council met and made the interview appointments with the three specific vacancies in mind, they felt Council should re-open the application process, specifically looking for a person representing the development and property owner community along with vested interest in the downtown.

Councilman Davis moved to (1) appoint Matt Sprouse and Bruce Hazzard as members of the Downtown Commission to each serve a three-year term respectively, terms to begin on March 1, 2010, and expire December 31, 2012, or until their successors have been appointed; and (2) re-open the application process for the remaining expired term as well as Mr. Galbraith's term. This motion was seconded by Councilman Russell and carried unanimously.

Mayor Bellamy reminded Council to look for diversity with this Commission.

RESOLUTION BOOK NO. 32 – PAGE 405

G. RESOLUTION NO. 10-55 - RESOLUTION APPOINTING A MEMBER TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Sustainable Advisory Committee on Energy & the Environment.

The term of Sylvia Farrington, as a member on the Sustainable Advisory Committee on Energy & the Environment, expired on December 31, 2009.

At the February 9 Council meeting, it was the consensus of Council to interview Susan Garrett, Sherry Ingram and Dane Barrager. Ms. Garrett withdrew from consideration.

After Council spoke highly of the candidates, Councilman Bothwell moved to appoint Dane Barrager as a member of the Sustainability Advisory Committee on Energy & the Environment to serve a three-year term, term to expire December 31, 2012, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 406

H. ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Asheville-Buncombe Historic Resources Commission.

Mr. Todd Williams and Mr. Brad Brock have both resigned as members of the Historic Resources Commission, thus leaving two unexpired terms of July 1, 2010, and July 1, 2012, respectively.

At the February 9 Council meeting, it was the consensus of Council to interview Susan West, Amanda Warren and Ashley Black. Ms. West was unable to attend the interview.

At the request of Vice-Mayor Newman, it was the consensus of Council that these appointments be delayed since Council has requested the Boards & Commissions Committee review the report from City Attorney Oast on the membership size of the Committee.

Councilwoman Manheimer, liaison to the Asheville-Buncombe Historic Resources Commission, said that she would be happy to contact the Chair of the Commission and Buncombe County to let them know about the possible downsizing of the Commission and to seek their input. In addition, she suggested City staff look at historic resource commissions throughout North Carolina to see if there is a better working model than the existing 14 members.

I. RESOLUTION NO. 10-56 - RESOLUTION APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Planning & Zoning Commission.

The terms of Steve Sizemore and Tom Byers expired on August 14, 2009.

On September 8, 2009, it was the consensus of Council to extend the terms of Steve Sizemore and Tom Byers for an additional six months, term to expire February 14, 2010, or until the stormwater and erosion control ordinance has been adopted by City Council, whichever occurs earlier.

At the Council meeting on February 9, it was the consensus of Council to interview Joe Minicozzi, Mark Brooks, Holly Shriner and Russ Towers.

After Council spoke highly of the candidates, Joe Minicozzi received 3 votes, Mark Brooks received 5 votes, Holly Shriner received 4 votes and Russ Towers received 2 votes. Therefore, Mark Brooks and Holly Shriner were appointed as members to the Planning & Zoning Commission to each serve a three-year term respectively, terms to begin on April 1, 2010, and expire on August 14, 2012, or until their successors have been appointed.

RESOLUTION BOOK NO. 32 – PAGE 407

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Alan Ditmore spoke to Council about the First Amendment and the panhandling ordinance.

Rev. Christopher Chiaronmonte spoke about revising the panhandling ordinance.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:21 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – March 9, 2010 - 3:00 p.m.
Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

BUDGET POLICY DIRECTION

City Manager Jackson explained how staff will be asking for clear direction on how to build the next budget.

City Attorney Oast explained the budget adoption process rules on voting.

Chief Financial Officer Ben Durant explained that we are at a financial crossroads. He said that it will take a strategic and structural approach in addressing the budget situation. Staff is prepared to present any analysis that Council needs to help them make the tough decisions. Council may have to consider service level reductions in some areas, a tax rate increase or some combination of both, in addition to the typical balancing strategies.

Budget Update

Budget Director Tony McDowell said that he will provide a brief overview of the: (1) Water Fund; (2) Stormwater Fund; (3) Parking Fund; (4) Transit Fund; (5) Compensation & Health Care Program; (6) General Fund Operating Budget; and (7) General Fund Capital Budget.

Using a chart, he explained the Water Fund Financial Trends from Fiscal Year (FY) 2000 to FY 2009. The Water Resources FY 2010-11 budget forecast is (1) Declining revenues due to current economic conditions; (2) $1.65 million (5% annually) transferred from Water Resources Revenue to General Fund per Sullivan Act Amendments; (3) Water Resources commodities and materials purchases subject to global market conditions and inflation; (4) Water Resources experienced a 50% increase in debt service payments from FY 2007 to FY 2009; and (5) FY 2011 expenditures are projected to equal revenues.

Water Fund policy recommendations include: (1) Based on bond covenants and debt service obligations a 4% rate increase is needed to meet those commitments; (2) Additionally, a 5% rate increase is needed to offset the Sullivan Act transfer of revenue to the General Fund; (3) Proposed rate increases would apply to consumption charges and the capital improvement fee; and (4) Without a substantial rate increase the alternative approach is to extend the time frame (delay) to accomplish capital improvements.

Using a chart, he explained the Stormwater Fund financial trends. The Stormwater Fund FY budget forecast is (1) Current budget deficit of $278,000; (2) $2.3 Million bond for stormwater projects – annual debt service $190,000; (3) No stormwater rate increase proposals; and (4) $62,500 expenditure toward street repairs (1/2 year), $135,000 each year thereafter.

Stormwater Fund policy recommendations include: (1) Eliminate two positions $78,000; (2) Reduce salary line item by $100,000 to be paid by ARRA funding for inspections of projects; and (3) Reduce salary line item by $100,000 to be paid from bond projects that are completed by in-house crews.

Using a chart, he explained the Parking Fund financial trends – operating results. The Parking Fund FY 2009 anticipated revenue includes (1) parking deck & surface lots revenue = $1,140,000; (2) meters & on-street monthly permits revenue = $960,000; and (3) parking citations & late fees = $700,000. Parking Fund FY 2010-11 budget forecast is (1) $500,000 is included for possible debt reserve on a new parking garage; (2) funding for transit will remain at $248,116; and (3) revenues will exceed expenses by $358,000. He explained that there are certain limitations on the use of parking revenues. The primary restriction is revenue that is collected from enforcement of on-street parking must be used to support that operation. Once you fully fund that part of the parking operation with the parking revenue, we have determined that the rest of the money would be free to use for any other public purpose.

Parking Fund policy recommendations include (1) per Parking Plan, continue to build fund balance to $3,000,000 for future deck construction; and (2) continue Transit Fund transfer at current level or increase by $51,884 to $300,000.

Using a chart, he explained the Transit Fund trends – increasing costs and decreasing federal support. The Transit Fund FY 2010-11 budget forecast is (1) Current Forecast: $880,000 budget imbalance (a) $390,000 or 8.4% increase in operating expenses; (b) $457,000 decrease in federal funding; and (c) $33,000 decrease in fare revenue; and (2) Implement Short-Term System-wide Changes Recommended by the Transit Master Plan (a) Estimated additional annual cost of $780,000.

Transit Fund policy recommendations include (1) Eliminate all evening service and Saturday service along Routes 4,5,12, and 16 = $599,000; (2) Limit General Fund Subsidy; (3) Defer implementation of short-term system-wide changes recommended by the Transit Master plan until funding source is identified; (4) Pursue Other Revenue Sources (a) - New fare structure: reduce existing discounts = $47,000; (b) Transfer additional funding from Parking Fund = $51,884; and (c) Seek legislative authority to increase motor vehicle fee from $10 to $15 under GS# 20-97 = $310,000; and (4) Work with County Commissioners to establish a motor vehicle fee under GS# 105-557 = $434,000.

Using a chart, he explained the compensation and benefits financial trends for health care. Compensation and benefit trends include: (1) Salary Increases for Employees: (a) FY05: 3% Merit and 1% COLA; (b) FY06, FY07, FY08: Merit (3-4%) and Market adjustments (0-10%); (c) FY09: 0 %; and (d) FY10: PROPOSED 2% COLA; and (2) Healthcare Cost Increases to Employees: (a) FY 05: 15%; (b) FY 06: 0%; (c) FY 07: 18%; (d) FY 08: -5% (major plan design and category changes); (e) FY09: 0%; and (f) FY10: PROPOSED 5%. Compensation and benefit trends include: (1) Increases in Claims Costs Trending Downward on a Per Person Basis; (2) Average Cost Per Employee is At or Below National Average; and (3) Current Projection of 7% increase which equals 2.1M in revenue and cost reductions.

Compensation and benefits policy recommendations include (1) 1.5M from General Fund and 700K from Employee Contribution and Plan Changes to Cover Projected Costs; (2) 2% cost of living adjustment for employees; and (3) Domestic Partner Benefits Implemented July 1, 2011.

Using a chart, he then showed the Parks subsidies, along with outside agency funding (funding list for current year is $95,700), (1) Outsourcing/contracting out of parks facilities & programs; (2) Full cost recovery for rental/lease of facilities & parks; (3) Establish a baseline cost recovery for recreational, athletic, & other parks programs; (4) Expansion of non-resident fees; and (5) Reduce outside agency funding by 4% & 8%.

Chief Financial Officer Ben Durant then used charts to review the General Fund Operating Budget financial trends for property tax; sales tax; revenue vs. expenditures; and Fund Balance. The General Fund Operating Forecast for FY 2010-11 includes (1) Current budget gap forecast: $3.5 million or 3.7% (a) assumes $2.0 million in departmental cost reductions; (2) Revenues will be flat compared to current budget; (3) No fund balance appropriation; (4)

Expenses will increase due to: (a) Health care & retirement benefit cost increase; and (b) Inflation & employee cost of living adjustment; (5) Subsidies to other funds: (a) $880,000 increase in Transit subsidy and (b) All other subsidies budgeted at existing levels; and (6) Outside agencies currently projected at existing budget levels.

The General Fund Operating Budget Policy considerations/recommendations include: (1) Pursue additional revenue enhancement opportunities (a) Examples: business privilege licenses, athletic fees, motor vehicle fee; (2) Apply 4% & 8% reduction to outside agencies; (3) Reduce subsidies to other fund & propriety-type funds; (4) Maintain existing funding for core/basic services; (5) Pursue further cost reductions for non-essential services; (6) Preserve fund balance for one-time or emergency use only; and (7) Seek legislative partnerships/additional revenue authority.

He provided Council with a history of the business privilege licenses. Business privilege options (1) restore retail, service & wholesale rates to previous levels (a) additional revenue would be $100,000 (i) $80,000 retail; (ii) $15,000 service; and (iii) $5,000 retail; (2) typical (median) business would see $15 annual increase; and (3) if manufacturing were adjusted back to prior levels there would be a $6,000 revenue gain.

The General Fund Capital Budget financial trends include (1) Capital program enhanced in FY07 & FY08 with the use of fund balance & increased General Fund support; (2) Since the onset of the economic downturn, General Fund capital support has declined by **16%**; (3) Discretionary funding for capital improvements is limited; and (4) Debt service projected to decline by **$1.0 million** in FY12 & by another **$1.0 million** in FY14.

He used a chart to show the debt service trends.

The General Fund Capital Budget FY 2010-11 budget forecast:

Current General Fund capital allocation:	$7.8 million
Less existing debt service:	- 5.2 million
Resources left for equipment, facility maintenance & major capital improvements	**$2.6 million**

Additionally, $1.6 million is available in Sullivan Act funding for street & sidewalk improvements related to water projects.

General Fund Capital Budget FY 2010-11 budget forecast immediate infrastructure and equipment needs consist of (1) City Hall exterior repairs - $5.5 Million; (2) vehicle replacement- $4.5 Million; (3) annual paving program - $752,300; (4) annual sidewalk maintenance- $150,000; (5) Civic Center maintenance and repairs - $400,000; (6) Municipal Building maintenance - $250,000; (7) and Parks centers and facilities - $500,000.

General Fund Capital Budget policy recommendations include (1) Staff will "zero-base" the capital budget to determine most effective use of the limited funding; and (2) Recommend that future debt service savings be earmarked for capital improvements: (a) FY 2011-12: $1.0 million; and (b) FY 2013-14: Additional $1.0 million.

In summary, (1) the General Fund budget and the Capital Improvement Plan gaps are structurally in nature; (2) discretionary funding is limited; and (3) Council policy direction on staff recommended budget balancing strategies.

The budget calendar is as follows: (1) March 23 – adoption of fees; (2) March 24 – April 23 - staff finalizes proposed budget; (3) May 11 – budget presentation; (4) May 25 – budget worksession/public hearing; and (5) June 22 – budget adoption.

Throughout the presentation, Mr. McDowell and Mr. Durant responded to various questions/comments from Council, some being, but are not limited to: concern of the Transit Fund's operating costs continually increasing; the City is improving transit; however, the community is not seeing the benefits; request to contact Representative Shuler and Senators Burr and Hagan to work on the City's behalf to keep the $457,000 of federal funding for the transit system; should the City switch from an 80/20 plan to the 70/30 state plan to save money; what is the ratio of City contributions to health care vs. employee contributions; what does a 5% increase in premiums mean to the employees; why are transit costs increasing so much; what is the annual cost of 1% salary increase; what is our current debt service for; could the water rate structure be adjusted to build in an exemption so that small businesses would not see their rates go up; what is the schedule of rate increased promised to bond holders and what does it mean if we don't raise rates; when will the Housing & Community Development Committee make recommendations on outside agencies; and what type of budget problem do we have, e.g., is a tax increase needed in order to provide new services or rather is it needed for continuation of our existing services; has the City looked at the state's plan regarding smoking and obesity; over the near future do we have enough projects that will meet the criteria for the use of the 5% annual transfer per the Sullivan Act amendments; and has staff performed an analysis of reducing garage collection to bi-weekly in order to reduce fuel consumption and extend the life of the vehicles.

Each Council member expressed their preference on outside agency funding, noting that the Housing & Community Development Committee will bring their recommendations forward to the full Council.

There was a brief discussion regarding the water rate increase and each Council member voiced what percentage, if any, they would be willing to support. At Mayor Bellamy's request, it was the consensus of Council to instruct Water Resources Director Steve Shoaf to provide additional information to justify the need for a rate increase, in addition to a schedule showing the impacts by rate class.

Council members then voiced whether they would be supportive of a tax increase or possibly reducing Fund Balance to balance the budget. In addition, Council would like to see the City Manager's vision of the budget.

Councilwoman Manheimer moved to continue this budget worksession until Tuesday, March 23, 2010, at 2:00 p.m. in the First Floor North Conference Room of City Hall. This motion was seconded by Councilman Russell and carried unanimously. Mayor Bellamy asked that Council be provided as much information as possible prior to the worksession.

Tuesday – March 9, 2010 - 5:00 p.m.
Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Manheimer gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Councilman Russell asked that Consent Agenda Item "G" be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 23, 2010

B. RESOLUTION NO. 10-57 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY SANITARY SEWER EASEMENTS AT THE WEST ASHEVILLE PARK TO THE METROPOLITAN SEWERAGE DISTRICT FOR THE MORRIS STREET AND TALMADGE COURT SEWER REHABILITATION PROJECT

Summary: The consideration of a resolution authorizing the Mayor to convey sanitary sewer easements at the West Asheville Park, identified as PIN # 962891984800000, to the Metropolitan Sewerage District for the Morris Street and Talmadge Court Sewer Rehabilitation Project.

The Metropolitan Sewerage District (MSD) is preparing to make improvements to existing sanitary sewer lines on Talmadge Court and Morris Street. The project arose when the City of Asheville planned to replace the water lines and follow up with street improvements which are greatly needed. MSD would like to coordinate their sanitary sewer line improvements prior to the pavement replacement.

In order to do execute this work, MSD needs to replace a lateral sewer line that connects the aforementioned right-of-way upgrades to the main sewer line that is located within West Asheville Park. MSD replaced this main sewer line within West Asheville Park last year which the City Council approved on February 28, 2006. MSD will replace the 6 inch clay sewer line with an 8 inch ductile iron pipe.

This line replacement is located at the southeastern corner of the park where it would not impact the site or the activities that are programmed within it. MSD is requesting a permanent easement for the line that is being replaced in the park, being approximately 1514 square feet (0.03 acre). MSD is also requesting a temporary construction easement being approximately 1550 square feet directly adjacent to the permanent easement. The park property will be restored upon the completion of the work by MSD. Work for the project is scheduled for April of 2010.

Pros:

- Improved sanitary sewer service for the community
- Minimal impact to the park property
- Proposed line replaces the existing, poor line
- Work is being coordinated with other utilities and agencies

Con:

- Easement is being dedicated

No monetary consideration involved in this conveyance.

City staff recommends City Council to adopt the resolution authorizing the conveyance a sanitary sewer easement at the West Asheville Park to the Metropolitan Sewerage District for the Morris Street and Talmadge Court Sewer Rehabilitation Project.

RESOLUTION BOOK NO. 32 – PAGE 408

C. RESOLUTION NO. 10-58 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY SANITARY SEWER EASEMENTS AT THE MURPHY OAKLEY PARK TO THE METROPOLITAN SEWERAGE DISTRICT FOR THE LIBERTY STREET SEWER REHABILITATION PROJECT

Summary: The consideration of a resolution authorizing the Mayor to convey sanitary sewer easements at the Murphy Oakley Park, identified as PINs # 965758112100000, 965758140200000, 965748833600000, and 965758350700000, to the Metropolitan Sewerage District for the Liberty Street Sewer Rehabilitation Project.

The Metropolitan Sewerage District (MSD) is preparing to make improvements to existing sanitary sewer lines adjacent to Liberty Street. Part of this project includes the replacement of sewer lines located in Murphy Oakley Park. Currently, the 6 and 8 inch clay lines in the park are in poor condition and have resulted in sewer overflows and numerous maintenance issues. MSD plans to replace these existing lines with new 8 inch ductile iron pipe.

The existing and proposed line replacement is within the eastern side of the park. MSD is relocating the placement of some of the existing lines in portions of the site to avoid impacting existing park features such as the playground. The proposed lines will not impact the site or the activities that are programmed within it except for the loss of some parking spaces temporarily. MSD is requesting a permanent easement containing approximately 19,001 square feet (0.249 acre) for the line that is being replaced in the park. MSD is also requesting adjacent temporary construction easements that total approximately 26,483 square feet. The park will be restored upon the completion of the work by MSD. Bids for the project are scheduled for July of 2013.

Pros:

- Improved sanitary sewer service for the community
- Minimal impact to the park property
- Proposed line replaces the existing, poor line

Con:

- Easement is being dedicated

No monetary consideration involved in this conveyance.

City staff recommends City Council to adopt the resolution authorizing the conveyance a sanitary sewer easement at the Murphy Oakley Park to the Metropolitan Sewerage District for the Liberty Street Sewer Rehabilitation Project.

RESOLUTION BOOK NO. 32 – PAGE 410

D. RESOLUTION NO. 10-59 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE PROPERTY OFF SHORT STREET

Summary: The consideration of a resolution directing the City Clerk to advertise an offer to purchase property off Short Street (PIN # 9649-11-8703-00000).

The City of Asheville is the owner of a 0.12+/- acre lot located off of Short Street at Cumberland Place in the Montford Neighborhood. The lot is level and the current zoning of the parcel is RM-8. The land off of Short Street was acquired by the City as part of the Head of Montford Redevelopment Project. On January 7, 2010, the City received a bid for this property from BK Property Partners in the amount of $71,000. This bid was generated with input from two

separate appraisals: one appraisal, dated August 5, 2009 procured by the potential buyer, at $60,000; and the other appraisal, dated October 30, 2009 procured by the City of Asheville, at a price point of $86,000. The bid put forth by BK Property Partners at $71,000 is slightly below the average of the two appraisals. Approval of the resolution will initiate the sale of the property through the upset bid process as provided in N. C. G. S. 160A-269.

This action complies with the strategic operating plan in that income from the sale of this property will directly benefit the Community Development Block Grant (CDBG) Program, thus providing funding towards affordable housing.

Pros:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

Con:

- There is no negative impact.

Once final, the proceeds from the sale of this parcel will be CDBG Program Income.

Economic Development staff recommends City Council approve a resolution directing the City Clerk to advertise an offer to purchase property off of Short Street, (PIN # 9649-11-8703-00000).

RESOLUTION BOOK NO. 32 – PAGE 412

E. RESOLUTION NO. 10-60 - RESOLUTION AUTHORIZING PRIMARY AND SECONDARY AGENTS REPRESENTING THE CITY OF ASHEVILLE TO APPLY FOR ASSISTANCE AND OBTAIN FINANCIAL ASSISTANCE FOR THE SEVERE WINTER STORM DURING THE PERIOD DECEMBER 18-25, 2009

Summary: The consideration of a resolution authorizing primary and secondary agents for the City of Asheville to apply for assistance and obtain financial assistance for the severe winter storm during the period, December 18, 2009 thru December 25, 2009, designated as a disaster and identified as FEMA–1871–DR–NC.

During the period December 18, 2009 thru December 25, 2009 Western North Carolina including Buncombe County and the City of Asheville experienced a sever winter storm.

Staff met with the North Carolina Division of Emergency Management, Federal Emergency Management Agency Administration (FEMA) and Buncombe County and concluded Buncombe County would be eligible for assistance through FEMA. Reimbursable include brush collection and removal, emergency generator use at the water plants and some emergency services. Actual removal of snow from the roadways was not eligible. On the basis of the information gathered, Governor Beverly Purdue signed an emergency declaration to help fifteen (15) Western North Carolina Counties. Governor Purdue subsequently received a federal disaster declaration on February 2, 2009, from FEMA for the snow and ice storms in December.

North Carolina's Division of Emergency Management requires primary and secondary agents representing the City of Asheville be authorized by resolution to execute and file applications for federal and/or state assistance on behalf of the City of Asheville for the purpose of obtaining certain state and federal financial assistance under the Robert T. Stafford Disaster Relief & Emergency Assistance Act (Public Law 93-228 as amended) or as otherwise available.

This action complies with the City Council Strategic Operating Plan, Fiscal Responsibility by proactively pursuing funding with state and federal governments.

Pro:

- Recovery of costs associated with a declared disaster.

Con:

- Failure to designate primary and secondary agents representing the City of Asheville will result in a loss of eligibility to recover disaster costs.

Funds received will offset general fund expenditures, preliminary estimated at approximately $200,000.

City staff recommends City Council adopt a resolution authorizing Richard Grant, Administrator of Public Works Services, and Cathy Ball, Director of Public Works, as primary and secondary agents to apply for assistance and obtain financial assistance for the severe winter storm in December.

In response to Mayor Bellamy, Public Works Director Cathy Ball explained that we have incurred approximately $700,000 (using FEMA rates) in expenses; however, under FEMA guidelines we are eligible to apply for reimbursement of $200,000 only. So far this year we have spent approximately $550,000, which is approximately $300,000 more than we have. She clarified that some of the $200,000 reimbursement will have to go back in to the Water Fund.

RESOLUTION BOOK NO. 32 – PAGE 413

F. RESOLUTION NO. 10-61 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE, ON BEHALF OF THE CITY OF ASHEVILLE, A FEDERAL AVIATION GRANT AGREEMENT FOR FISCAL YEAR 2010 PART A

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $902,490.

Due to the current continuing resolution in place for the FAA, the grants for Fiscal Year 2010 are being issued in two separate phases, Part A and Part B. The final grant agreement for Fiscal Year 2010 Part A, which is still being prepared by the FAA – Atlanta Airports District Office, must be executed and returned to the FAA by March 17, 2010.

The Fiscal Year 2010 Part A grant is anticipated to total $902,400 and will be used as a reimbursement of design and professional costs related to the recent terminal renovation project at the Asheville Regional Airport. The Asheville Regional Airport Authority has fully funded this expense including the matching share and no financial assistance is required from the City of Asheville in the acceptance of this Grant Offer.

This is consistent with the City's Strategic Plan for 2010-11 in several ways: (1) leverages partnerships for capital improvements; (2) pursues funding opportunities with federal government; (3) promotes multi-modal transportation; and (4) promotes partnership in regional economic development strategies.

Pro:

- Supports service enhancements at Airport

Con:

- None noted

Staff recommends adoption of the resolution authorizing the Mayor to execute the grant agreement for Fiscal Year 2010 Part A.

RESOLUTION BOOK NO. 32 – PAGE 414

G. BUDGET AMENDMENT TO SET UP A PROJECT BUDGET FOR THE TRANSIT STREET FURNITURE IMPROVEMENT PROJECT

This item was pulled off the Consent Agenda for an individual vote.

H. ORDINANCE NO. 3829 - BUDGET AMENDMENT TO SET UP A PROJECT BUDGET FOR NEEDED REPAIRS TO THE TRANSIT OPERATIONS GARAGE ROOF

Summary: The consideration of a budget amendment, in the amount of $125,000, to set up the project budget for needed repairs to the transit operations garage roof.

The purpose of the project is to repair the roof at the transit operations garage. The subject building, which was constructed in 1971, is a one-story steel and masonry structure containing about 12,600 square feet. The current roof is an EPDM ballasted roof that was installed in 1985. The membrane on the roof has deteriorated to the point that leaking is occurring in the parking shed, vehicle maintenance area, and offices during rain events. This leaking not only creates a safety hazard with the electrical wiring and equipment in the garage but it has also caused the wood to rot around the skylights and flashing at the mechanical units.

The existing insulation has also been damaged and is therefore not energy efficient. It needs to be replaced in the areas where the water damage has occurred. We do not know at this time if any major structural damage has occurred.

The project would replace the existing roof with a new EPDM mechanically adhered roofing system, which would meet current energy conservation requirements and it would provide savings in energy consumption.

The total cost of the project is $125,000. Federal Funds would provide 80% of the cost, which equates to $100,000 and the remaining $25,000 would come from the Transit Capital Reserve Fund, which currently has a balance of $271,000 ($240,000 is earmarked for the purchase of five buses and $6,000 is earmarked for the purchase of two service vehicles during Fiscal Year 2010-11)

The project is scheduled to take place during the next five months.

This action complies with the City Council 2009-10 Strategic Operating Plan within the Sustainable Focus Area by leveraging funding from the Federal Transit Administration (FTA) to address the City's aging facilities.

The Transit Commission supports the subject project.

Pros:

- Provides needed maintenance to an aging facility.
- Helps to make the building safe and more energy efficient which should generate savings in energy consumption.
- Federal Funds will provide 80% of the total project cost, which equates to $100,000.

Cons:

- The total cost of the project is $125,000.
- The City's share of the total cost of the project is $25,000.

The total cost of the subject project is $125,000. Federal Transit Funds in the amount of $100,000 that are available for transit capital projects and preventive maintenance will cover 80% of the cost. City Funds in the amount of $25,000 that are available from the Transit Capital Reserve Fund will cover the remaining 20% of the cost. A budget amendment is provided to appropriate these funds.

Staff recommends that City Council adopt a budget amendment, in the amount of $125,000, to set up the project budget for the Transit Operations Garage roof repairs.

ORDINANCE BOOK NO. 26 – PAGE 43

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEM PULLED OFF CONSENT AGENDA FOR INDIVIDUAL VOTE

G. ORDINANCE NO. 3828 - BUDGET AMENDMENT TO SET UP A PROJECT BUDGET FOR THE TRANSIT STREET FURNITURE IMPROVEMENT PROJECT

Summary: The consideration of a budget ordinance, in the amount of $60,000, to set up the project budget for the Transit Street Furniture Improvement project.

The purpose of the project is to install transit street furniture in high demand locations serving low-income areas and/or employment areas along the main corridors served by the transit system.

The Asheville Transit System (ATS) is a consolidated bus service that has been operating for more than 30 years. Currently, the fleet serves primarily transit dependant groups (low-income level groups represent 91% of the ridership). The geographic coverage of the Asheville Transit System (ATS) includes 90 percent of the households in high-density areas are within ¼ mile of a transit route.

During the last three fiscal years, the Asheville Transit System (ATS) has experienced an annual growth rate of 5.3% in ridership. New routes have been developed and new bus stops have been installed to accommodate the growing demand along the routes. Most of the bus stops do not offer comfortable facilities or protection from the weather; therefore, creating an unfriendly environment that directly impacts the riders. This project will improve transit infrastructure resulting in a positive impact to the riders.

The project will be financed with funds received from a Community Development Block Grant (CDBG) in the amount of $60,000 that was approved during March 2009. The project includes purchasing five bus shelters, trash cans, and signs and installing the bus shelters including concrete pads and accessible routes (if needed). The project also includes installing concrete pads at Top-A-Stop locations.

The bus shelters are proposed to be located at the following locations:

- US 25 (Hendersonville Road) and Caribou Rd.

- US 19-23 (Patton Avenue) and Florida Avenue
- US 70 (Tunnel Road) and SR 2002 (Riceville Road)
- SR 3548 (Haywood Road and Ridgelawn Avenue
- Granada Street at Pisgah View Apartments

The project is scheduled to occur later this year after completion of the permit process with the North Carolina Department of Transportation (NCDOT) and the City's Building and Safety Department.

This action complies with the City Council 2009-10 Strategic Operating Plan within the Sustainable Focus Area by leveraging funding from other funding sources for regional transportation improvements.

The Transit Commission supports the Transit Street Furniture project and the use of CDBG monies to fund it.

Pros:

- Helps supports the overall transit services experience.
- Provides a friendly environment (comfortable facilities and protection from the weather) to the riders.

Cons:

- The project has a total cost of $60,000.
- There will be ongoing future maintenance and/or repair costs for the street furniture.

The current Transit capital budget does not include funding for the street furniture project. Thus, Transit's capital budget will need to be increased in the amount of $60,000 through a budget amendment. The source of funds for the capital budget amendment is $60,000 transfer from the Community Development Block Grant (CDBG) Funds. As result of the CDBG funding, there is no net financial impact on the Transit Fund.

Staff recommends that City Council adopt a budget ordinance, in the amount of $60,000, to set up the project budget for the Transit Street Furniture Improvement project.

In response to Mayor Bellamy, Public Works Director Cathy Ball explained the term street furniture.

Councilman Russell could not support the motion due to our deficit in transportation increasing over the last several years.

Vice-Mayor Newman moved to adopt Ordinance No. 3828. This motion was seconded by Councilwoman Manheimer and carried on a 6-1 vote, with Councilman Russell voting "no."

ORDINANCE BOOK NO. 26 - PAGE 41

III. PRESENTATIONS & REPORTS:

A. BOARD OF ADJUSTMENT UPDATE

Mr. Robert Middlemas, Chair of the Board of Adjustment, updated Council on the Board of Adjustment's key accomplishments for 2009 and their goals for 2010. He said that the Board of Adjustment for the City of Asheville is governed by the terms of N.C. Gen. Stat. Sec. 160A-388.

The Board is a "quasi-judicial" administrative body that operates on a level between the enforcement officers and the courts. This Board is charged with hearing and deciding

applications for approval of variances from the terms of Chapter 7 of the Code of Ordinances except where this Chapter places responsibility for hearing or considering such a variance with another body. The concurring vote of four-fifths of the members of the Board is necessary to reverse any order, requirement, decision, or determination of any administrative officer charged with the enforcement of Chapter 7 of the Code of Ordinances.

The Board of Adjustment for the City of Asheville includes five regular members and seven alternate members. Four regular members and five alternate members who are residents of the City of Asheville are appointed by the Asheville City Council. The other regular member and two alternate members are by the Buncombe County Board of Commissioners and reside outside the corporate boundaries of the city but within the city's extraterritorial planning area.

The Board of Adjustment convenes once a month for public hearings. Mr. Robert Middlemas was elected Chairman and Ms. Esther Manheimer was elected Vice-Chair for the 2009 – 2010 calendar year.

Tally of cases heard before the Board for 2009 include: 11 regular meetings; no special meetings; 1 meeting cancelled; 17 zoning variances granted; 1 zoning variance denied; 4 sign variances granted; 5 sign variances denied; 1 appeal upholding the Planning Director's decision; no appeals overruling the Planning Director's decision; 1 appeal tabled pending possible court litigation; and 28 (out of 29 cases) rules consistent with staff's recommendation.

He then explained the criteria used for zoning variances and sign variances.

On behalf of City Council, Mayor Bellamy thanked Mr. Middlemas for his leadership and the entire Board of Adjustment for their service on this Board.

B. RECREATION BOARD UPDATE

Mr. Scott Barnwell, Chair of the Recreation Board, said that the mission of the Recreation Board is to advise the City of Asheville in matters affecting recreation policies, programs, finances and land acquisition related to total community recreation programs.

Key accomplishments include: (1) The Executive Committee revised the board by-laws that were first approved by City Council in 1964 with various updates since then, and participated in designing the overall board orientation and development program, including the New Board Member Mentoring program; (2) Supported capital improvement priorities at the WNC Nature Center as requested by the Friends of the Nature Center; (3) Approved the revision to the Recreation Division snow day and inclement operation policy to consolidate operations to be more cost efficient, effective in responding to customer needs, and considerate to the safety of staff and participants during potentially hazardous weather conditions; (4) Approved and recommended to City Council the proposed layout of the 2009 Bele Chere festival boundaries; (5) Approved the revisions to the facility rental fee adjustment policy so staff and the Recreation Advisory Board have clear guidelines when responding to such requests from outside organizations; (6) Approved and recommended to City Council the proposed rental fees for the first phase of Pack Square Park; (7) Recommended to City Council the fee schedule adjustment for the Asheville Municipal Golf Course beginning FY 2010-2011 that will include a range in fees. The adjustment provides the opportunity to deal with seasonality and weather issues that occur at the golf course, and to position the course to remain competitive with other golf courses in the area; (8) Recommended to City Council the creation of the proposed Riverfront Redevelopment Commission to be charged with upholding the sustainability and continued development of Asheville's riverfront; (9) Recommended to City Council to prohibit smoking in all City of Asheville parks and greenways in response to the North Carolina General Assembly enactment of a law giving local governments increased authority to regulate smoking, and signed by Governor Bev Perdue; and (10) Enhanced the partnership with the WNC Disc Golf Club by recommending the addition of an 18-hole disc golf course at Richmond Hill Park with no fiscal impact to the City.

2010 Goals include (1) Board development; (2) Involvement in the budget process; (3) Relationship building; (4) Advocacy; and (5) Develop and maintain partnerships with Asheville Parks and Greenways Foundation, Friends of Nature Center, Buncombe County Parks and Recreation, and Pack Square Conservancy.

In response to Councilman Bothwell, Mr. Barnwell explained the partnership with WNC Disc Golf Club and how they have donated equipment and materials.

In response to Mayor Bellamy, Parks, Recreation & Cultural Arts Director Roderick Simmons explained our relationship with the Parks and Greenways Foundation. He said that he would be happy to provide Council with a list of projects they have helped raised funds for or funded over the years.

On behalf of City Council, Mayor Bellamy thanked Mr. Barnwell for his leadership and the entire Recreation Board for their service on this Board.

C. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 10-62 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MATRIX SYSTEMS FOR A CARD ACCESS AND CAMERA SECURITY SYSTEM FOR THE CITY OF ASHEVILLE

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of city staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council approval of the following:

- A resolution authorizing the City Manager to enter into a Contract with Matrix Systems for the Card Access and Camera Security System for the Municipal Building, APD Firing Range, Public Works and City Hall. The total bid estimate is $239,049. The portion for the Municipal Building and Firing Range is $200,945 which will be covered by the 2009 JAG ARRA Grant. The JAG ARRA Grant Budget was approved by Council August 11, 2009. The balance of the bid, $38,104 will cover Public Works and City Hall and will be paid from the budgeted Capital Project for security.

- Update on the Local Energy Assurance Planning (LEAP) grant from the Department of Energy which was awarded to the City of Asheville.

Card Access & Camera Security System

The upgrade to the Municipal Building key card access system, surveillance cameras, and alarm systems will greatly increase controlled access and security for Police Headquarters. Installation of access controls for the firing range and security cameras will increase the security and accountability associated with APD's firing range/training building.

Other locations are leveraging the investment being made at the Municipal Building to allow for an integrated access control and camera security system for City facilities. The system is capable of significant expansion in the future as the city grows, and will provide more efficient and cost effective maintenance and operations.

This action complies with City Council's Strategic Operating Plan in the Focus Areas - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

The purchase and implementation of a card access and security camera system will greatly enhance the safety of our Citizens and City of Asheville Staff. These enhancements will also assist in the accountability for city property as a theft deterrent.

Pros:

- Increase safety for City Employees and facilities
- Increased safety for our communities
- Increased security of city property

Con:

- Maintenance cost

Funds are currently included in the budget to cover the acquisition costs of this system. The total bid cost of $239,049 will be covered by $200,945 in ARRA funds and $38,104 in city capital project funds. The equipment comes with a two year warranty plus an extended warranty through five years. Beyond this period the City of Asheville will be required to maintain the overall operations and maintenance of the equipment. The Municipal and Firing Range enhancement will be fully covered by the ARRA Grant funding. The balance will be funded by the Security Project Capital, which has already been budgeted.

It is estimated that service extentions would run $15,000 per year. These costs will be added to the departmental operating budget at the beginning of the sixth year.

The expected useful life of these systems are 10-15 years. The replacement costs will be at the expense of the department associated with the security equipment.

Local Energy Assurance Planning (LEAP) Grant Award - $209,940

After the fuel shortage in 2008, Land-of-Sky Regional Council was asked to take advantage of its position as an intergovernmental agency with established partnerships with the region's five county governments and 17 municipal governments to aid in the fuel planning process with preliminary work occurring in January 2009. In response to NC League of Municipalities Emergency Fuel Use Survey conducted in the fall of 2008, the Land-of-Sky Regional Council hosted a meeting to address the most recent regional fuel shortage. The survey showed that over two thirds of the local governments expressed interest in a regional collaboration to mitigate the effect of future fuel shortages.

The governments all wanted to ensure that emergency services would be able to continue to offer fire protection, ambulance service, and police protection. They hoped a plan could be developed for better communication between municipalities to ensure continuation of services, and they were willing to work together as a region to establish conservation in times of crisis, levels of fuel alters, and other specific details.

A goal of the American Recovery and Reinvestment Act, in part, is to "facilitate recovery from disruptions to the energy supply" and "enhance reliability and quicker repair of outages." The "Local Energy Assurance Planning" (LEAP Initiative) focuses on developing new, or refining existing, plans to integrate new energy portfolios (renewable, befouls, etc.) and new applications, such as SMART Grid technology, into energy assurance and emergency preparedness plans. The grant encourages regional participation and requires a city to be the grant applicant. For this grant, the City of Asheville is the grant applicant and fiscal agent for the grant with the Land-of-Sky Regional Council would manage implementation of the project.

The City of Asheville, in partnership with 22 local governments, designed the Regional Fuel Project to plan for economic and emergency service disruptions caused by the fuel shortages in Western North Carolina. This funding will further allow our region to address dramatic, recurring and anticipated future fuel shortages and the need for revised and new

energy assurance plans. Being multi-jurisdictional, this planning process has the following objectives:

- Improve the region's readiness for a fuel emergency
- Integrate emergency fuel planning components as recommended by the Public Technology Institute and N.C. State Energy Office into local emergency response plans.
- Develop a Regional Strategic Fuel Plan to integrate critical elements of the emergency energy plans in the five-county region
- Establish local expertise in emergency fuel management and alternative fuels
- Diversify the region's fuel portfolio, reduce carbon emissions, and air pollution and reduce impacts from energy supply disruptions
- Create and maintain jobs through grant support, project management and transfer of expertise

Pros:

- The Regional Strategic Fuel plan will enable the region to better endure a fuel shortage without breaks in vital services such as law enforcement, volunteer and municipal fire protection, and other emergency services.
- The LEAP grant if funded, will give the region the tools to better manage future fuel crisis and mitigate the reliance on fuel from a single source for a more energy independent future.
- Creation of more current or up-to-date energy assurance plans.

Con:

- The City of Asheville will be bear responsibilities as the fiscal agent of the grant for a regional project. This will include ARRA reporting requirements.

This is a 100% non-matching grant.

City staff recommends City Council adopt the resolution authorizing the City Manager to enter into a contract with Matrix Systems for a Card Access and Camera Security System for The City of Asheville.

Ms. Mills responded to Councilman Bothwell when he asked what kind of staff report will be necessary in administering the LEAP grant.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 10-62. This motion was seconded by Councilman Bothwell and carried on 6-1 with Councilman Russell voting "no."

RESOLUTION BOOK NO. 32 – PAGE 415

D. SUPPORT OF ASHEVILLE AREA BROADBAND STIMULUS REQUEST

Mr. Wally Bowen, Executive Director of Mountain Area Information Network, explained the Community Cloud Computing (CCC) Project which will be the nation's first open-source "Community Cloud Computing" platform.

He made the following points to Council:

- Cloud computing allows a user to operate software and services via remote servers rather than their own computer. Instead of purchasing a CD loaded with software, the user accesses the application via the Internet for free, or at greatly reduced cost. Google's email and other free applications are basic examples of "cloud computing."

- A community-based cloud computing platform can level the playing field for individuals, local businesses, and nonprofits which, unlike Fortune 500 companies, do not have affordable access to advanced information technology (IT) expertise and infrastructure. As the nation's first cloud platform designed for a grassroots community, CCC is a strong example of the innovative uses Google is seeking for its Gigabit broadband demonstration network.

- For example, the CCC will provide advanced services like routine data-backup (hourly, daily, weekly, etc.) to prevent the catastrophic loss of one's business or personal data when a computer hard drive fails. Another possible offering is merchant credit-card services (in partnership with a local bank) with a "buy local" points/rewards program to encourage support of locally-owned businesses.

- Imagine a local artist who wants to build her own website but cannot afford an expensive website- builder program (e.g. DreamWeaver) that will be used once and then put on the shelf. The CCC will provide a free open-source alternative, or purchase multi-user licenses of DreamWeaver. The local artist could then access the software via the CCC for only the amount of time she needs it, paying just a fraction of the full purchase price.

- This same scenario applies to other professionals (e.g., videographers, web programmers) and at-risk populations (e.g. citizens with disabilities and special needs students) who could benefit from advanced Web applications and greater computing power, if only they could afford them.

- The CCC will provide a low-cost "collaboration" platform for our digital media producers and web developers. For example, local videographers could collaboratively assemble and edit "shared-source video," allowing them to tackle more complex projects and complete them faster and more efficiently. The bandwidth required for large, complex video productions – especially in high-definition – exceeds the capacity of most local professionals. The CCC will provide this additional bandwidth "as-needed," plus advanced editing and other production tools that – if purchased or leased individually – would be cost-prohibitive for most local video professionals.

- A major CCC goal is to empower a region-wide shift from "outsourcing" to "local-sourcing" among business, nonprofit, and governmental sectors. The CCC will employ "single sign-on authentication" so that users can move easily and securely through the entire CCC ecosystem without having to repeatedly provide a username and password. As privacy concerns nationwide continue to rise, this locally-controlled CCC will be increasingly valued as a privacy oasis.

- We are currently seeking input from key agencies and organizations to determine specific needs the CCC platform could meet in the project's 24-month phase-one implementation.

- Federal broadband stimulus is also available for Public Computing Centers (PCC) and Sustainable Broadband Adoption (SBA) projects to expand broadband access and adoption. The CCC will host tools, applications, and training modules for PCC and SBA projects to help extend broadband access and digital-literacy training to citizens bypassed by the digital revolution. Basing these tools and services on a CCC platform

will reduce project start-up and operating costs, thereby enhancing their long-term sustainability – a primary requirement for federal broadband stimulus funding.

- The PCC and SBA projects will also include an innovative use of low-cost "thin client" (stripped down) laptops configured for exclusive use only when connected to the CCC platform. The laptops will feature a GPS-enabled (and/or IP-based) tracking capability to ensure that vulnerable populations can use these laptops with a reduced concern for theft.

- Asheville and WNC are well-positioned to sustain complementary PCC/SBA stimulus projects beyond the 24-month funding period. We may be the only region in the United States with both a nonprofit "last-mile" wireless broadband provider (Mountain Area Information Network, founded in 1995) and several nonprofit "middle-mile" fiber providers (NC-REN, ERC Broadband, Pangaea, and French Broad Electric Co-Op). These complementary wireless and fiber networks have the IT security expertise and robust, scalable infrastructure to implement sustainable CCC and PCC/SBA projects.

- Key phase-one sectors include:

    - Vulnerable populations (public housing residents, citizens with disabilities, the homeless, at-risk youth, special needs students, native American and immigrant communities, elderly, and other at-risk residents);
    - Public libraries and community centers;
    - Local job-creation, "buy local" and "smart-grid" efforts and agencies, locally-owned businesses, microenterprises and "green" enterprises;
    - Local digital media entrepreneurs and web developers;
    - Local nonprofit and for-profit media (newspapers, bloggers, public access TV, low-power FM radio, and community broadband providers).

- Participating agencies (to date) are: Housing Authority of the City of Asheville (HACA), Asheville City Schools, City of Asheville, Asheville-Buncombe Library System, Asheville-Buncombe County Christian Ministries (ABCCM), Children First, ERC Broadband, Partners Unlimited Inc., Burton Street Community Center, Western Alliance, WNC Media Center, and Mountain Area Information Network (MAIN).

- Public Computing Centers (PCC) will be expanded at the Burton Street Community Center, the ABCCM Job Training Center, Western Alliance (citizens with disabilities), and at city-run and/or public housing neighborhood centers [preliminary list; more sites possible].

- Sustainable Broadband Adoption (SBA) programs will be based at the proposed PCC sites, at public library sites, and other locations (e.g. after-school study sites operated by the Asheville City Schools and Children First). MAIN will also offer digital storytelling and community journalism training in partnership with select PCC sites and MAIN-FM, a community-based low-power FM radio station serving Asheville and WNC.

- Broadband network capacity, support and project management will be provided by MAIN, which has a 14-year record as a nonprofit ISP and technology partner for Asheville and western North Carolina region. MAIN launched in 1995 via a grant from NTIA's original Technology Opportunities Program (TOP) and is one of NTIA's longest-surviving grantees. Red Hat will produce a case study of the CCC project and will assist MAIN in developing a replicable model to share with communities nationwide.

- In summary, a coalition of local agencies and organizations, including the Housing Authority of the City of Asheville, Asheville City Schools, Buncombe County Health

Department, and Mountain Area Information Network (MAIN), plan to submit federal stimulus requests to expand broadband access and digital literacy training to the city's underserved neighborhoods and at-risk populations.

Information Technology Services Director Jonathan Feldman provided Council with the following information on MAIN's presentation:

The grant referred to by Mr. Bowen's materials is BTOP (Broadband Technology Opportunity Program). BTOP was first conceived as a part of the American Recovery and Reinvestment Act in the second quarter of 2009, with an application deadline for the first round of funding of August, 2009. The program has three distinct types of permitted applications:

1. Comprehensive Community Infrastructure projects.
2. Sustainable broadband adoption projects
3. Public computing centers projects

City Council approved staff in-kind support of a collaborative MAIN and ERC (Education and Research Consortium of the Carolinas) infrastructure (type #1) grant application. Months of work (demographic research, GIS support) went into helping ERC and MAIN apply for the grant. That grant application was specifically targeted at middle and last mile fiber optic connectivity. MAIN and ERC ended up applying separately based on differences in last- versus middle-mile grant criteria. Both were disqualified on technical issues.

BTOP was a long shot for the City in any event, as a cash or in-kind match of 20% was required, with "waivers" possible but highly discouraged. With a $5.5M ask, this would have meant over $1M of grant match, something the City was not in a position to fund. I'm not aware of a grant recipient whose match was waived, and press releases made it a point to highlight grant match funding.

Round two of BTOP, with the late March deadline, also requires a match, but preference is given to >30% match.

As Council is already aware, PCC (type #2) is something that MAIN is currently working on. As of this writing, there is no willing applicant to move forward on this application.

Mr. Feldman said that he had the opportunity to meet with Wally Bowen from MAIN and Hunter Goosmann from ERC, and was able to learn a little bit more about their plans for moving forward with BTOP.

Status of "Round 1" application & requested infrastructure:

- Our existing application will not be re-submitted due to changes in requirements for BTOP infrastructure.
- ERC will be working with MCNC (a not-for-profit based in RTP, and one of the successful "round 1" applicants) to apply for various fiber optic assets, including the AFD fire station redundant "ring" that we included in the first round's application. The match is being sought from the Golden Leaf Foundation, but ERC does not yet know whether this will be approved.
- MAIN will be applying for all the fiber that the City included in the first round (including HACA). ERC is evaluating their ability to include community center fiber in their application, and also working with MAIN to expand other fiber assets in Asheville. Either entity's success would be good for the City. He will be following up to see how the City can continue to support this effort through a letter of support.
- For the current round, MAIN is interested in co-location of their wireless assets at community centers, fire stations, and other city structures that would be conducive to their 'mesh' topography.

- MAIN is also looking for the 20% match associated with approximately $4M of infrastructure. Some of this may take the form of in-kind support, such as allowing MAIN to co-locate on City-owned telecommunication towers if the grant is awarded.

Cloud Computing Effort

- MAIN is submitting a Sustainable Broadband Adoption BTOP proposal for the cloud vision that Mr. Bowen is sharing with Council
- From the discussions, Mr. Feldman believes that the only thing that MAIN is looking for from the Council is an endorsement of the project, possibly taking the form of a Council resolution.
- MAIN is planning on acting as the grant administrator and applicant.
- They plan on funding at least part of the match through in-kind support of the software vendor they're working with (RedHat, a provider of Linux operating system software based in RTP.) MAIN is interested in an in-kind match from the City, possibly in the form of space for training at community centers.
- They discussed potential fits for upcoming public safety applications to be hosted by the cloud environment. At this time, Mr. Feldman didn't see a fit. Although he is enthusiastic about the effort in general, public safety applications tend to use proven and mature technologies due to the life-safety nature of public safety delivery systems. He will keep an open mind going forward, particularly concerning any enhanced departmental or citizen services that we don't currently have funds for.

In response to Mayor Bellamy, Mr. Bowen said that he is requesting the City to collaborate in moving the application forward and also an in-kind match requirement. The minimum match is 20% up to 30% and they know they have 14% with the infrastructure wireless project. He is not expecting a cash match, but the in-kind match is very important. He felt there are a number of ways the City can help them meet the matching threshold. He said that because of the changes in the guidelines from the first round to the second round, ERC is going to be making its fiber request in conjunction with the state network. He said there may be some in-kind match with that. He said that short-term MAIN needs tower space and that is some of the in-kind match. He said that City staff estimates that tower space to be approximately $20,000. Mr. Feldman suggested Council set a not-to-exceed in-kind dollar match.

Mr. Hunter Goosmann, representing ERC broadband, said that they would like to work with the City and explore any opportunity to provide in-kind match to expand the network around the City to support government services, education, health care, etc.

In response to Councilman Smith, Mr. Bowen explained how the CCC is a strong example of the innovative uses Google is seeking for its Gigabit broadband demonstration network.

In response to Mayor Bellamy, Mr. Feldman felt that it would be great for Asheville to have a high speed network. He didn't see a downside to the Goggle pilot project.

Councilman Russell felt he would need additional information prior to making any commitment, especially regarding the in-kind match.

In response to Councilman Smith, Mr. Bowen said that he wants the City's endorsement of the application proposal and whatever value the tower space is, we can forego that.

There was clarification that the motion on the floor did not include any financial support at this time.

Councilman Smith moved to endorse the grant application. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Councilman Russell voting "no."

E. MAYOR UPDATE FROM N.C. METRO MAYOR'S COALITION BOARD

MEETING

Mayor Bellamy updated Council on her recent trip to the N.C. Metro Mayor's Coalition Board meeting. She provided Council with information from the luncheon with the Governor – (1) economic/budget review; (2) N.C. Dept. of Transportation (NCDOT) federal stimulus update; and (3) N.C. Dept. of Juvenile Justice and Delinquency Prevention. This year's agenda includes (1) to defend against attempts to shift state responsibility to local governments and to protect local revenues; (2) continue to improve the relationship between the N.C. Dept. of Transportation and local governments; (3) explore ways to partner with the State to build and maintain a robust transportation system; (4) reduce gang violence; (5) strengthen the state's judicial system; (6) support efforts to advance North Carolina's bio-tech industry and grow related jobs; (7) preserve local governments ability to engage in communication and public enterprise; and (8) maintain a cost-effective way to manage growth, provide services and ensure all who benefit from the heart of their community and also share in the cost. Regarding the NCDOT, there is about $10 Billion in available revenue for projects that NCDOT has on the table for the future, but there is almost $30 Billion of requests. She felt we need to look at our transportation needs and see how we can get in line with our transportation planning, knowing there are limited dollars. She also highlighted juvenile justice issues and gang prevention. She invited Council to the N.C. Metro Mayor's Coalition Board meeting on September 23-24 here in Asheville.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING 65 LONG SHOALS ROAD FROM OFFICE BUSINESS DISTRICT TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 3830 - ORDINANCE TO REZONE 65 LONG SHOALS ROAD FROM OFFICE BUSINESS DISTRICT TO COMMUNITY BUSINESS II

Mayor Bellamy opened the public hearing at 6:13 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone 65 Long Shoals Road from Office Business District to Community Business II District. This public hearing was advertised on February 12 and 19, 2010.

This 1.5-acre site will be familiar to many as the site of the now-closed Boathouse restaurant. The parcel was voluntarily annexed into City Limits in 2000. At that time, the area to the east and west on this side of Long Shoals Road was subject to Buncombe County's Limestone Township zoning, and this property, as well as the neighboring properties to the west shared the R-2 residential zoning classification. The initial zoning of this parcel to Office Business sought to provide a lower-intensity zoning to ensure compatibility with the neighboring residential area.

Since 2000, this area has experienced major changes, most notably the widening of Long Shoals Road. In addition, the south side of Long Shoals Road to the west of this site was also annexed into the City's corporate limits in 2007. At the request of the property owners in that area, a commercial zoning (CBII) was assigned in place of the residential zoning initially proposed by staff. Further, the parcel immediately to the west was developed with the Overlook office condo project, and other sites farther west, not least of which is the Biltmore Park Town Square project, added to the level of development and traffic along the corridor.

The subject property hence is now an island of Office Business zoning adjacent to two other higher-intensity zoning classifications to the north (Institutional) and west (CBII). The areas to the south and east are the Lake Julian Progress Energy Plant Property, zoned by Buncombe County for Public Service. Agents seeking a new restaurant occupant for the property noted that the Office Business zoning district has the following restriction under *Design and operation*

standards: "All activities associated with non-residential uses, including deliveries and refuse collection, shall be conducted between the hours of 7:00 a.m. and 10:00 p.m." The petitioner then submitted an application for the rezoning to make this property consistent with the CBII zoning and Institutional zoning across the road (neither of which imposes limits on hours of operation).

The stated intent of the Office Business district, according to the UDO, is "to reserve an area for the development of office uses and related support uses. This district will reserve areas for medium scale offices and a limited range of business uses and may serve as a transition area between commercial and residential areas." Given the current absence of nearby residential zoning, and the increase in development along the corridor, staff finds the existing zoning designation to be less than apt for the current conditions.

The Community Business II zoning district was "established to provide areas for medium-to-high-density business and service uses ... [and] ... is designed to be located primarily along minor and major thoroughfare streets which serve multiple residential neighborhoods." The CBII district does have a parking standard which is not applicable under the current zoning: "Parking shall be provided at the side or rear and not closer to the street than the edge of the structure." The current development does have an outbuilding which extends north to the edge of the parking lot, technically meeting the requirement, but further expansions to the main building, or new buildings would be required to adhere to this standard.

As of this writing, staff has received two communications from the public regarding this rezoning: one simply seeking more information, and one from the owner of the residence across Long Shoals Road, who expressed his support for the proposed change.

At their February 3, 2010, meeting the Planning and Zoning Commission recommended approval of the rezoning with a unanimous vote.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Proposed zoning district is highly compatible with the surrounding area.
- Would eliminate a small, isolated zoning district.
- Could encourage reuse of a currently unoccupied property.

Con:

- Site's original design was under a district which did not have the CBII requirement for the building to be oriented along the street.

Staff sees the proposed rezoning as an improvement over the existing situation and recommends approval.

Mr. Robin Boylan, representing the property owner, explained how this rezoning will help them move the project forward and asked for Council's support.

Mayor Bellamy closed the public hearing at 6:17 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3830. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 45

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 10-63 - RESOLUTION TO APPLY FOR THE NATIONAL ENDOWMENT FOR THE ARTS MAYORS' INSTITUTE ON CITY DESIGN PROGRAM GRANT

Ms. Diane Ruggiero, Superintendent of Cultural Arts, said that this is a selection of a competitive project that meets the grant requirements with a plan to provide the matching funds required. Various groups, including the HUB and the Downtown Master Plan Cultural Arts Implementation team, have come forward with proposals on projects.

Each year, the NEA offers numerous grants in a variety of art and design categories. This year, the MICD grant has been created to showcase and celebrate the goals of the MICD and that arts and culture contribute greatly as core components in building livable and sustainable communities. Applications will be reviewed on the basis of artistic excellence and artistic merit.

At their February 23, 2010 meeting, City Council asked that the proposals be brought back with additional information and to give the HUB and the Downtown Master Plan team the opportunity to talk about a possible collaboration. Since that time, the HUB has withdrawn their proposal.

Pros:

- The grant provides support for a variety of projects and activities;
- The arts are an integral part of the City of Asheville;
- Provides additional funding for a project or activity.

Cons:

- The City has limited ability to match funds;
- The City has limited resources to administer a federal grant;
- The application deadline is March 15, 2010.

The Public Art project has $25,000 in donated funds for a cash match. The remaining $25,000 comes from the NEA Grant for a total project budget of $50,000. The Downtown Master Plan project match is $50,000 from in-kind services including staff time and $50,000 from the grant for a total project budget of $100,000. Due to limited staff resources, the City may wish to consider hiring a part-time contracted worker to implement the grant for the Downtown Master Plan. This would require the cash match from the city of $25,000.

She provided council with grant guidelines and the timetable.

Staff recommends that City Council provide guidance on whether to submit a letter of intent and for what project from the options identified below:

Public Art Proposal

Ms. Ruggiero said that this project helps to implement numerous goals of the Parks, Recreation, Cultural Arts and Greenways Master Plan approved by Asheville City Council in early 2009.

The project would include community conversations with residents of the historic Montford neighborhood about the location of the artwork. Other stakeholders would include Momentum Science and Health Adventure Park (currently Health Adventure) whose future home is located one mile north along the Reed Creek Greenway.

This project would also require strong collaboration with the City of Asheville Public Art Board and the City of Asheville Greenway Commission.

The project would be part of the city's Public Artist of the Year program and to ensure the best possible artwork for the location, this call will be open to artists within the Southeast region of the United States as defined by the Southern Arts Federation (Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee).

Budget: Total Budget: $50,000; Cash Match: $25,000; In-Kind Services Match: $25,000

$40,000 will go towards artist fees for the design and installation of the public art project. The remaining $10,000 will be used for community charettes, artist travel, etc. The site has already been prepped and is ready for the design and installation of public art.

Downtown Master Plan Proposal (portions)

Ms. Jennifer Gordon said that having reviewed the implementation strategies outlined by our Downtown Master Plan (DMP) as well as noting similar action steps in our Parks, Recreation, Cultural Arts, & Greenways Master Plan (PRCA&GMP) we feel that our city would benefit significantly from receiving this grant. In May of 2009, the City of Asheville adopted the DMP, which culminated from a community process involving thousands of local citizens working with planners from a nationally recognized consultancy, Goody Clancy of Boston. The $170,000 investment created a working document to guide the community in five major areas, including Arts & Culture.

Asheville is committed to artistic excellence and the proposed project would enhance the community by first, promoting the arts and artists as an integral component of community life and an essential part of the public process - The importance of the arts is apparent in the heart of our city, where public/private partnerships are creating exciting new spaces for the celebration of the arts: Pack Square Park (committed to working with the best nationally - La Quatra Bonci, Overland, Valley Crest Landscape, the best locally - sculptor Hoss Haley and ceramicist Kathy Triplett - and tomorrow's artists - 400 middle school students who contributed original tiles), and currently, the expansion of the Asheville Art Museum with Polshek Partnership Architects and the Diana Wortham Theater renovation with PBC&L architect are underway. Secondly, mapping Asheville's cultural assets and identifying developmental potential in the cultural sector - The strength and breadth of the arts offerings in Asheville will benefit from the inclusion of our local art entrepreneurs and presenters (often sole proprietors and low income individual performers and artists) in a cultural needs assessment, thereby nurturing the continued excellence of the artistic community. Cooperation amongst our arts organizations, artists, non-profits, and businesses fosters communication and the creation of opportunities for collaboration, sharing of resources, and networking. This allows us to represent the full spectrum of the creative sector from civic institutions to grassroots art representatives such as individual artists, independent galleries, coffee shops, and clubs.

The evolution and sustainability of Asheville is dependent upon the success of arts & culture in our city. To this end, we are working to implement the strategic directives outlined by the Downtown Master Plan. This project celebrates our cultural vitality, harnesses our entrepreneurial spirit, and explores the economic tenacity that defines our creative community.

In summary, this is the production of a public cultural arts specific search engine that allows access to an in depth catalogue of the city's cultural programs and resources. Essentially they would be moving forward with the incubation of the Artists Resource Center.

Budget: Search Engine – 50%; Arts Alliance – 25% and Cultural Mapping – 25%. Grant funds will support contractual staff to execute research, data collection and search engine design.

Partners identified and matching funds to support the cultural asset mapping an search engine development include: $3,500 cash from Arts2People, $5,000 from the Asheville Design Center, $30,000 from the Diana Wortham Theatre in association with Cultural District planning and design; and in-kind support of staff time and/or design development. The total budget of $100,000 is $50,000 grant funds and $50,000 matched funds.

In response to Councilman Russell, Ms. Ruggiero explained the budget mix for the Public Art proposal noting that no taxpayer dollars are involved.

Ms. Gordon noted that the Downtown Master Plan proposal is also not asking for City funds. The staff report before Council indicated $50,000 from in-kind services including staff time; however, they have been able to find matches and now they do not require City funds.

Vice-Mayor Newman noted these are two good projects and felt that as we continue to look at the Downtown Master Plan we need to be clear on what the City's staff responses in supporting the Plan will be.

In response to Councilman Smith, Ms. Gordon explained that the Downtown Master Plan proposal has several phases and this is initial planning and research.

Councilman Smith would support the Public Art proposal at this time; however, he suggested the Downtown Master Plan committee submit this proposal to the Tourism Product Development Fund.

When Councilwoman Manheimer suggested a partnership with the already existing art scene entities, Downtown Master Plan Project Manager Sasha Vrtunski said that all those entities are part of the committee. Mayor Bellamy suggested a representative from the opera.

Due to the short timeframe and the confusion about in-kind services, Mayor Bellamy suggested we look at some best practices to see how this process might flow more smoothly in the future.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved to adopt Resolution No. 10-63 with the Public Art proposal being submitted. This motion was seconded by Vice-Mayor Newman and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 416

B. UPDATE ON 10-YEAR PLAN TO END CHRONIC HOMELESSNESS

Director of Community Development Jeff Staudinger said that the 10-Year Plan to End Homelessness sets out goals and strategies which are intended to drastically reduce homelessness in Asheville. For example, as an outcome of the Plan, housing stabilization services have been developed which reduce the impact that homelessness has on the Asheville and Buncombe County community. After five years of implementation, the Plan is being assessed by the Homeless Initiative Advisory Committee. They will make recommendations to the Housing and Community Development Committee for the Homelessness element of the 2010-2015 Consolidated Plan. The Advisory Committee, in partnership with other stakeholders, seeks to understand what is working, what remains to be addressed, and how to better measure progress.

January 2005: The 10-Year Plan was adopted by the City of Asheville and Buncombe County. The overall goals of the plan are:

- Reduce the number of people who become homeless through prevention,
- Decrease the length of homeless episodes, through rapid re-housing,
- Reduce the number people who experience chronic homelessness through permanent housing, and
- Provide community-based services and supports that support housing stability.

February 2008: The City of Asheville and Buncombe County Commissioners jointly established the Homeless Initiative Advisory Committee. The Committee's vision is to support the 10-Year Plan's implementation process, which will end chronic homelessness and reduce all types of homelessness over the next decade by investing resources in a coordinated, sustained effort that addresses the underlying causes of homelessness. The committee further focused the 10-Year Plan implementation, developing these four strategic directions:

- The Homeless Initiative will improve collection, coordination, and dissemination of data.
- Homeless and formerly homeless individuals have greater access to permanent, supportive housing, employment, education, health care benefits, and support services.
- The Homeless Advisory group will inform and advise public and private funders to ensure that resources are utilized effectively.
- The Homeless Initiative will support the community in providing permanent, supportive housing for 180 people experiencing chronic homelessness.

January 2010: While there is now unprecedented collaboration among providers, there are also growing economic pressures. Additionally, the 10-Year Plan in its 5th year and the Community Development Office is currently engaged writing the 2010-2015 Consolidated Plan.

With that backdrop participating planning groups, agencies, and advocates are now reviewing what has been accomplished, what has been most effective, and what specific actionable steps need to be established to measure if and to what degree the stated goals of the 10-Year Plan are being achieved.

As with other master plans, measurable strategies are important for measuring progress toward goals. The strategies of the 10-Year Plan need ongoing evaluation to ensure that the stated goals of the plan are indeed being met. Community data from local agencies, county, and city services (including the Homeless Prevention and Rapid Re-Hosing Program) will augment findings from a UNC-Chapel Hill research study on housing in Asheville, which is planned to be released in June. At the next Homeless Initiative Update to City Council, results from this data collection will be available.

Proposed Process:

- The Homeless Initiative Advisory Committee will monitor and report on activities regarding the 10-Year Plan evaluation process.
- An executive team made up of a City and County Representatives, the originator of the 10-Year Plan, and the Chair of the Advisory Committee will closely oversee the process and report out to the Advisory Committee and community stakeholders.
- Through the Community Development's Consolidated Planning process, 10YP goals will be reviewed and updated.
- HMIS, County, City, Agency, and UNC Chapel Hill data will inform evaluation of goals.
- Homeless Initiative staff, in partnership with the Homeless Coalition, continue to meet with stakeholders to gather community input.

- The Homeless Initiative Advisory Committee will review the 2010-2015 Consolidated Plan and continue to evaluate data, making recommendations to the Housing and Community Development Committee and City Council as appropriate.
- Results from this process will be reported for the Homeless Initiative's next update to Asheville City Council and Buncombe County Commissioners.

Pros:

- Review and discussion will incorporate local data and the vast experience of community members, offering a strong evaluative tool that will allow agencies and funders to further improve the housing crisis response system.
- Consideration of measurable strategies for achieving goals will allow the City and County to better consider progress toward those goals.
- The process will offer direction in challenging economic times. The ability to direct and utilize existing resources efficiently and effectively is now, more than ever, a key to successfully addressing community issues like homelessness.
- The City of Asheville's Community Development office will incorporate the 10-Year Plan into the 2010-2015 Consolidated Plan.
- As awareness of homelessness increases in the community, specific community-derived, evidence-based action steps will offer people who want to help real opportunities to impact homelessness.

Cons:

- The issues of homelessness are deep and wide; balancing the need to focus efforts in order to create action and also providing space for all avenues to be explored will be a challenge.
- Without strong leadership, the public discourse on homelessness could become focused on the failings of specific individuals instead of the community's systematic approach to people who have no home.

This process directly supports the City's Strategic Operating Goal of Affordable; supporting the Council's objective to end chronic homelessness.

No action is requested at this time. The results of the process described above will be incorporated into the 2010-2015 Consolidated Plan.

Mr. David Nash, Chairman of the Homeless Initiative Advisory Committee, focused on the key elements of the Ten-Year Plan which is to end chronic homelessness. We explained how they have made progress in reducing the chronic homeless. We need to think creatively about ways to increase one specific service – case management resources for that population. We are currently looking at reallocating existing resources within our own agencies.

Councilman Bothwell felt that one thing many homeless experience a lack of transportation. He suggested exploring offering bus passes to those who register with the HMIS system or some other participation in programs, since we are running the buses anyway. Vice-Mayor Newman suggested the Transit Commission review that suggestion.

Councilman Smith said that in our conversation with our legislators regarding what our community mental needs are, case management services should be kept in mind.

Mayor Bellamy noted that Asheville is a leader across the country in keeping people in housing and wrapping services around them. However, another discussion needs to be held on the behavior of some who are praying on the homeless. She felt we will be hearing more from service providers who are willing to work with our homeless population. She supported case management resources.

In response to Councilman Davis, Mr. Staudinger said that various homeless statistics are coming together to understand what is happening in our community over time.

Councilman Smith thanked the community partners who have signed onto and are utilizing the HMIS system. He felt that if we can point people in the right direction we can provide a path out of homelessness.

C. SHORT-TERM ACTION PLAN ON THE TRANSIT MASTER PLAN IMPLEMENTATION

RESOLUTION AUTHORIZING CITY STAFF TO IMPLEMENT CERTAIN OPERATIONAL CHANGES TO THE TRANSIT SYSTEM INCLUDING SYSTEM-WIDE ON-TIME PERFORMANCE CHANGES AND 30-MINUTE FREQUENCY

RESOLUTION AUTHORIZING CITY STAFF TO MOVE FORWARD WITH DEVELOPING A MARKETING STRATEGY TO PROMOTE THE OPERATIONAL CHANGES AND CREATING A NEW "BRAND" FOR THE TRANSIT SYSTEM

BUDGET AMENDMENT TO SET UP THE PROJECT BUDGET FOR THE MARKETING STRATEGY PROJECT

Director of Public Works Cathy Ball said that this is the consideration of (1) a resolution authorizing City staff to implement certain operational changes and a new fare structure to the transit system, based on recommendations included in the Transit Master Plan; and (2) a resolution authorizing City staff to move forward with developing a marketing strategy to promote the operational changes and creating a new "brand" for the transit system.

The Transit Master Plan (TMP) was approved by City Council on October 27, 2009. As a part of the plan's approval, City Council asked staff to meet with the Transit Master Plan Steering Committee and the Transit Commission to develop an action plan to begin the implementation process for the Transit Master Plan. City staff met with both groups during November and December 2009 and developed the action plan. The complete report was sent to City Council members on March 2, 2010. The action plan focuses on three operational areas; specifically, operational changes, fare structure, and marketing. The specific recommendations for each area are listed as follows:

- Operational Changes

In order to provide better service to our customers, 30-minute frequency is recommended along the main corridors. In order to accomplish this task, existing routes would be staggered in four corridors; namely, Patton Avenue – Routes 15 and 16, Haywood Road – Routes 1 and 9, Biltmore Avenue – Routes 4 and 8, and Tunnel Road – Routes 13 and 26. Merrimon Avenue would remain at hourly service.

System-wide on-time performance changes are also recommended. Currently, one of the biggest challenges the transit system faces is keeping the buses on-time mainly due to route deviations and Dial-A-Ride service. In order to accomplish this task, existing route deviations will be reduced or eliminated and Dial-A-Ride service will be stopped. The subject action will address driver's concerns with the current route schedules and the pressure they constantly receive from riders to be on-time. First Transit, the City's management company, stresses safety and has an extensive ongoing training program for the bus drivers. This training includes defensive driving, state laws regarding safe driving, accident reporting and investigation, and regular safety meetings. The overall purpose of the training is to ensure that the rider's safety is always the main consideration when using an Asheville Transit bus.

The total cost to implement the 30-minute frequency on four of the five major corridors and the system-wide on-time performance changes is $44,000. $31,000 of the cost is due to the production and printing of new maps and is included in the marketing section. The remaining $13,000 will be absorbed in the current fiscal year's operational budget.

The timeline to implement these changes would be 120 days beginning after City Council approval.

Although the action plan recommends implementing the system-wide short-term recommendations as proposed in the Transit Master Plan including Sunday service, 30-minute frequency on all five main corridors, more evening service, and eliminating the evening gap, City staff is not asking for specific action at this time. This recommendation should be considered as a part of the overall ongoing budgetary process for Fiscal Year 2010-11.

- New Fare Structure

During the developmental process of the Transit Master Plan, it was determined that the current discounts for ticket books, monthly passes, and annual passes were far in excess of typical discounts offered throughout the United States. The average discount offered by American Public Transportation Association (APTA) members ranges from 15% to 25%. The current discount is 36% for ticket books, 62% for monthly passes, and 76% for annual passes. To be more reflective of industry practice, the Transit Master Plan recommends reducing the current discounts offered to riders who purchase ticket books and passes. During Fiscal Year 2010-11, the discount would be set at 18% for ticket books, 50% for monthly passes, and 55% for annual passes. If approved, the new rates would be $9.00 for ticket books, $20.00 for monthly passes, and $220.00 for annual passes compared to $7.00, $15.00, and $120.00 respectively.

It should be pointed out that no changes to the actual cash fare of $1.00 are recommended at this time.

The cost to implement this recommendation would be absorbed by the marketing component of the operational areas.

The Asheville City Council Finance Committee will be reviewing the new fare structure on March 4, 2010, and if approved, the recommended changes will move forward with other citywide changes to the Fees and Charges Manual to be considered by City Council as a part of the overall budget approval process.

- Marketing

One of the most important elements to enhance the Asheville Transit System, as expressed in the Transit Master Plan, is to develop a marketing strategy that focuses on the creation of a new image for the system and promotion of route changes including system "branding" (logo), color schemes for the buses, signs, and new maps. The City would hire a consultant to support and assist in the implementation of the marketing strategy. Marketing is an eligible expense under the annual Federal allocation, with an 80%/20% ratio (Federal/Local).

The total cost to implement the subject marketing strategy is a maximum of $150,000, with $120,000 being paid by Federal Funds and $30,000 paid by City Funds. The Transit Enterprise Fund currently does not have the $30,000 Local match available; therefore, the City Council would need to approve a transfer from the General Operating Budget Fund Balance. The consulting work represents 33% of the cost, which equates to $50,000. The balance of the cost, $100,000, will be used to produce and print the appropriate schedules and maps.

The timeline to complete the subject task would be 120 days beginning after City Council approval.

This action complies with the current City Council's Strategic Operating Plan for Fiscal Year 2009-10 by helping to support a sustainable community through a strong commitment to long-term planning and fiscal responsibility; and helping to establish a multi-modal transportation plan by making needed transit system improvements.

The Transit Commission and the Transit Master Plan Steering Committee support the subject actions. Both groups actively participated in the process to suggest the recommendations.

Pros:

- On-time performance changes will increase the transit system's reliability and will have a positive impact on the drivers and riders.
- 30-minute frequency on four of the five main corridors will give riders more mobility options and will potentially attract choice-riders to the system.
- The new fare structure will help bring fares more in line with industry practice.
- The marketing strategy will give a fresh image to the transit system, promote the operational changes, and highlight the new buses that the City should receive towards the end of the current calendar year.
- Federal Funds will provide 80% of the total cost of the marketing task, which equates to $120,000.

Cons:

- The total maximum cost of the subject project is $163,000.
- The $13,000 cost to implement the operational changes would be absorbed by the current fiscal year's transit operational budget.
- A 20% local match, which equates to $30,000, is required for the marketing task.
- The new fare structure might produce a decrease in ridership (approximately 8% for monthly pass holders) during the first several months after implementation.

The total anticipated cost of the subject project is $163,000. The $13,000 operational changes cost will be absorbed by the current fiscal year's transit operational budget. The marketing strategy cost of $150,000 will be funded with Federal Funds at the rate of 80% or $120,000 and the balance of $30,000 by the City. Since the Transit Enterprise Fund currently does not have the $30,000 Local match available, the City Council would need to approve a transfer from the General Fund Fund Balance. The specific impact of the new fare structure, which involves reducing the discount rate for special fare packages, is unknown at this time but should have an overall positive effect on revenue.

City staff recommends that City Council adopt (1) a resolution authorizing City staff to implement certain operational changes to the transit system, based on recommendations included in the Transit Master Plan; (2) a resolution authorizing City staff to move forward with developing a marketing strategy to promote the operational changes and creating a new "brand" for the transit system; and (3) a budget amendment, in the amount of $150,000, to set up the project budget for the Marketing Strategy Project.

Vice-Mayor Newman said that there is only a certain amount of federal government that Asheville gets for the transit system. He wondered if we use this 80% match ($120,000) for marketing, would our certain amount of federal funding be decreased. Ms. Ball explained that the transit deficit is on the operational end. The $120,000 for the marketing strategy could not be used for operations; however, we could use it for other capital things.

Vice-Mayor Newman expressed concern about changing the fare structure vs. the relatively modest revenue gains.

In response to Vice-Mayor Newman, Ms. Ball said that said that there are no additional fare changes in the Transit Master Plan.

Councilman Russell was concerned about the rising expenses related to transit and since the marketing strategy would have to come out of the General Fund Fund Balance, he could not support the action.

When Mayor Bellamy asked if the market study would be eligible from Community Development Block Grant (CDBG) Funds, it was noted by Community Development Director Jeff Staudinger that the marketing strategy could possibly be an eligible expense but would requires a lot of discussion. Ms. Ball noted that going through the CDBG process will impact delaying the schedule on the bus delivery.

There was discussion about the $30,000 recommended to come out of the City's General Fund Fund Balance. Mayor Bellamy asked if there was a way for staff to find another option to come up with the $30,000. Ms. Ball said that she would be happy to delay action on these items for approximately 4 weeks (without holding up bus production) and provide Council with another option to fund the $30,000, noting that there will be something else that will have to be delayed.

Transit Services Manager Mariate Echeverry responded to Councilwoman Manheimer when she asked if Merrimon Avenue is included in the 30-minute frequency.

Councilwoman Manheimer asked that the fold-out map schedules at the bus stops be reconfigured to be user-friendly.

Mayor Bellamy said that we will lose some of the riders by increasing the fares and asked if staff could reconsider some other options to fund these issues.

Vice-Mayor Newman moved to adopt the resolution authorizing City staff to implement certain operational changes and a new fare structure to the transit system, based on recommendations included in the Transit Master Plan. This motion was seconded by Councilman Bothwell. Ms. Ball noted that if we do the rate structure, we will have to change the maps and that would be the $30,000 figure. Vice-Mayor Newman then withdrew his motion.

Councilman Smith suggested earmarking a portion of the Parking Fund money toward a marketing effort going forward.

Ms. Hanna Raskin, Chair of the Asheville Transit Commission, supported the actions staff is requesting.

Mr. Michael Soule, representing Get There Asheville, strongly supported staff's recommendations and highlighted the importance of marketing.

Rev. Christopher Chiaronmonte suggested asking the Tourism Development Authority for the $30,000.

Vice-Mayor Newman moved to continue these items until April 13, 2010. This motion was seconded by Councilman Davis and carried unanimously.

At 7:24 p.m., Mayor Bellamy announced a short recess at which time Council would conduct a closed session.

Closed Session

At 7:24 p.m., Councilman Smith then moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the property is approximately 11 acres at Shelburne Road and Hominy Creek Road. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Russell and carried unanimously.

At 7:37 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilwoman Manheimer and carried unanimously.

D. **RESOLUTION NO. 10-64 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 301 LONG SHOALS ROAD**

RESOLUTION NO. 10-65 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS BEHIND 380 LONG SHOALS ROAD

RESOLUTION NO. 10-66 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 1 VOLVO DRIVE, 42 SCHENCK PARKWAY

RESOLUTION NO. 10-67 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS DORSET DRIVE

RESOLUTION NO. 10-68 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 67 MOUNTAINBROOK ROAD

RESOLUTION NO. 10-69 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 73 AND 75 WATERS ROAD

RESOLUTION NO. 10-70 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 26 ROCKING PORCH ROAD

RESOLUTION NO. 10-71 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 40 KEASLER ROAD AND 23 SUNNYCREST DRIVE

RESOLUTION NO. 10-72 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 617 UPPER SONDLEY DRIVE

RESOLUTION NO. 10-73 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS 1445 TUNNEL ROAD

RESOLUTION NO. 10-74 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS WILLOW WINDS LANE

RESOLUTION NO. 10-75 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN PORTIONS ALONG AIRPORT ROAD

Urban Planner Julia Cogburn said that this is the consideration resolutions approving the Annexation Services Plan for twelve (12) areas contiguous to the current boundaries of the City of Asheville.

Staff has identified twelve (12) areas with potential for being annexed: Ingles; Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road. Under State law, the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

The following steps and dates meet the process required by State law:

- Council Adoption of Resolution of Intent – 02/23/10
- Council Adoption of Services Plan – 03/09/10
- Public Information Meeting – 04/12/10
- City Council Public Hearing – 05/11/10
- Annexation Ordinance Adopted – 05/25/10
- Effective Date – 09/30/10

The second step in the annexation process is for the City Council to consider and approve an Annexation Services Plan for the areas to be annexed. The Annexation Services Plan includes a demonstration of how each area proposed for annexation meets the statutory qualifications for annexation and further demonstrates the capability of the City to provide urban services to these areas.

Pros:

- Supports City of Asheville's Smart Growth Annexation program (regular program of annexations) as set forth in the City's 2025 Plan.
- Provides for an urban level of service for developed and developing areas adjacent to the existing city limits and includes those benefiting from existing City services in participation in the costs of such services.
- Fills in service delivery gaps and split jurisdiction issues on the edge of corporate limits.

Con:

- Residents of proposed annexation areas may object to such annexation.

The fiscal impact of this round of annexations is found in the Financing Plan for Annexation Areas section (Section 3) of the Plan for Service.

City staff recommends that City Council adopt the resolutions approving the Annexation Services Plan for the twelve (12) areas.

Urban Planner Blake Esselstyn reviewed the annexation standards. In summary, the 2010 annexation areas are (1) 12 areas identified; (2) adjacent to south and east areas of the City; (3) principal aim is clean-up, closing gaps, resolving split jurisdictions and addressing inconsistencies; and (4) mostly commercial and residential uses.

Using maps, Mr. Esselstyn summarized the Plan for Services as follows: (1) Ingles area (a) 1.2 parcels; (b) 3.6 acres; (c) commercial land use; and (d) meets nonresidential urban use text; (2) Schenck Parkway area (a) portion of 1 parcel; (b) 0.7 acres; (c) commercial land use; and (d) meets nonresidential urban use text; (3) Farleigh Street area (a) portions of 2 parcels; (b) 0.6 acres; (c) commercial and residential land use; and (d) meets development test; (4) Deerfield area (a) portion of 1 parcel; (b) 29.3 acres; (c) institutional land use; and (d) meets nonresidential urban use text; (5) Mountainbrook area (a) 1 parcel; (b) 4.4 acres; (c) approximately 65 residents; (d) institutional land use; and (e) meets nonresidential urban use test and population density test; (6) Waters Road area (a) portions of 2 parcels; (b) 0.6 acres; (c) approximately 2 people; (d) residential land use; and (e) meets population density test, subdivision test, and development test; (7) Rocking Porch Road area (a) portions of 1 parcel; (b) less than 0.1 acres; (c) one dwelling; (d) approximately 2 people; (e) residential land use; and (f) meets development text; (8) Keasler/Sunnycrest area (a) 2 parcels; (b) 1.4 acres; (c) 2 dwellings; (d) approximately 4 people; (e) residential land use; and (f) meets population density test, subdivision test, and development test; (9) Upper Sondley area (a) 1 parcel; (b) 0.98 acres; (c) 1 dwelling; (d) approximately 2 people; (e) residential land use; and (f) meets subdivision test and development test; (10) Tunnel Road area (a) 1 parcel)b) 1.5 acres; (c) commercial land use; and (d) meets nonresidential urban text; (11) Willow Winds area (a) 1 parcel; (b) 12.1 acres; (c) commercial land use; and (d) meets nonresidential urban use test; and (12) Airport Road area (a) 18 parcels; (b) 122.1 acres; (c) mostly commercial land use; and (d) meets development test.

Ms. Cogburn then reviewed the Plan for Extension of Services for police protection (2 new police officers), fire protection, solid waste collection, street maintenance (no new streets in plan), water distribution (no waterline extensions), sewer collection (1,632 linear feet of 8-inch sanitation sewer in the Airport Road area), and administration and other services.

Revenue summary for all areas total (1) ad valorem - $222,354; (b) state utility taxes - $45,514; (c) sales tax - $80,586; (d) Powell Bill - $4,594; (e) fees, charges and permits - $2,210 for a total of $353,258.

Annually recurring expenditures totals (1) police - $84,016; (2) fire - $40,110 (5-year duration for rural fire districts); (3) solid waste - $1,741; (4) recycling - $212; (5) street maintenance – zero; and (6) street lighting – zero for a total of $126,079. After five years total - $85,969.

Capital expenditures are $13,000 (Police); $17,354 (Fire); $358,560 (sewer lines); $765 (rollout containers) for a total $389,679.

In response to Mayor Bellamy, Ms. Cogburn said that the sewer line capital expenditure of $358,560 is to extend sewer lines.

When Mayor Bellamy asked about fire protection, Assistant Fire Chief David McFee said that all the areas touch an existing parcel and we are already responding. The rural fire departments presently serve 7 of the annexation areas and each of the affected fire departments will be offered negotiated contract opportunities for five years to reimburse them for lost revenue from fire taxes within the territories they respectively served prior to annexation. Mayor Bellamy noted that because of how sales taxes are distributed, technically we are paying them twice.

In response to Councilman Bothwell regarding stormwater fees, Public Works Director said that if you live within the City limits, you pay a stormwater fee based on your amount of impervious surface. There will be some increase in revenue that would go into the Stormwater Utility Fund.

After a short discussion about MSD sewer lines and at Vice-Mayor Newman's request, it was the consensus of Council to ask the Planning & Development Committee review the current Council policy of extending sewer lines.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that the Airport annexation area is the largest capital expense where we will have to invest over $300,000. The report states that it will be paid by utilizing current and anticipated surplus General Fund revenues. Since we don't have any surplus General Fund revenues, she would vote against the motion.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-64. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Russell voting "no".

RESOLUTION BOOK NO. 32 – PAGE 428

VI. NEW BUSINESS:

A. FRENCH BROAD WATER RESOURCES STUDY COMMITTEE

Mr. Joe McKinney, Executive Director of the Land-of-Sky Regional Council, said that the Land-of-Sky Regional Council's (LOSRC) Executive Committee has recommended that the City Council undertake a broad study of water resources in the region, the capacity of water systems, future water supplies, water quality conditions and other key water resource issues.

The State is investigating water resource issues including how to allocate water within river basins across the state. LOSRC's Executive Committee members believe that we need a regional forum to educate ourselves on water resource issues and to discuss strategies. We want to be proactive and not reactive to state and federal actions affecting our water resources.

Please note that the establishment of a regional water systems is not being proposed, but our elected officials believe that there are opportunities for communities to work together cooperatively to supply and manage water for their citizens.

LOSRC has recently received a $26,108 grant from the N.C. Division of Water Quality that will help to establish a French Broad Water Resources Study Committee. Once established, the group will hold a series of monthly meetings over the next year to study and identify key water resource issues and develop strategies to address these issues. A report listing key issues and strategies will be the final deliverable.

They have also made application to the N.C. Rural Center for $40,000 to assist in collecting detailed information on municipal water systems in the region. The Rural Center will announce the successful grant awards in the near future.

The French Broad Water Resources Study Committee will be comprised of a combination of local elected and appointed officials and key water stakeholder/experts in the French Broad River Basin. There will be at least three representations from each county in the LOSRC region:

two appointed by the County Commissioners and one appointed by the largest municipality in each county.

They requested that City Council appoint a person to serve on the Study Committee since the City of Asheville operates a large water system in our region. Please note that Buncombe County is also being asked to appoint two individuals – one representing the county's interests and one representing a large water user (industry, agriculture, etc.) or a smaller water system in the county. He hoped that all appointments would be made by the end of March, 2010.

The Study Committee meetings will be public meeting and others from the community are welcome to attend.

Mayor Bellamy felt it was good opportunity to talk with water partners in our region. She felt that our Water Resources Director Steve Shoaf would be a good addition to the committee.

In response to Councilman Smith, Mr. McKinney said the time commitment would be monthly meetings for 12 months.

Councilman Davis respected the Land-of-Sky Regional Council; however, we have spent significant time to dissolve the water agreement, bring it back in-house and improve our water system, and did not want to do anything to compromise the progress to date.

In response to Councilman Russell, City Manager Jackson said that staff is here to support collaborative efforts, lend our analyses, provide the benefits of our planning studies, and lend whatever level of staff necessary to help with that technical review. However, he felt this is a forum made up of a combination of elected officials. Beyond the level of technical support, which we would be happy to lend, he felt it might be more appropriate for Council to appoint a leader – not a manager or staff engineer. However, staff would be happy to participate in the appropriate way. He felt elected leadership, along with staff support, seems the best approach.

Mayor Bellamy spoke about the importance of this initiative and offered her assistance.

When Mayor Bellamy asked for public comment, no one spoke.

Vice-Mayor Newman moved to (1) support the City participating in this process; (2) appoint Mayor Bellamy and Councilman Bothwell as the Alternate to represent the City of Asheville to the French Broad Water Resources Study Committee; (2) authorize City staff support; and (4) authorize the City Manager or his designee to be appointed to the Executive Committee or establish a technical committee of technical staff. This motion was seconded by Councilman Bothwell and carried unanimously.

B. RESOLUTION NO. 10-76 - RESOLUTION APPROVING A HOUSING TRUST FUND LOAN

Mayor Bellamy noted that the original staff report and announcement included a loan from the Housing Trust Fund to Mountain Housing Opportunities (Larchmont). That has been deleted from Council's consideration at this time.

Councilman Davis moved to recuse Councilwoman Manheimer from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Bothwell and carried unanimously. At this time, Councilwoman Manheimer left the meeting room.

Community Development Director Jeff Staudinger said that this is the consideration of a resolution authorizing approval of a Housing Trust Fund loans to Beaucatcher Properties, LLC (Tunnel Rd).

Staff has received four (4) applications for HTF funding totaling $1,668,000. These applications were presented to the Housing and Community Development Committee (HCD) on January 28 and each was evaluated on its own merit. Resources were insufficient to approve all applications. The current available cash balance in the Housing Trust Fund is $446,400.

Of the four (4) applications presented, two have been recommended by the Committee for approval. An application from Mountain Housing Opportunities, Inc. (MHO) for the Larchmont project in North Asheville has been approved by HCD; however, the MHO proposal will not be submitted to the City Council for final approval until zoning approval has been received. The following application from Beaucatcher properties is presented for immediate consideration:

Beaucatcher Properties, LLC- Tunnel Road (address unassigned) $200,000.

Mr. Kirk Booth representing Beaucatcher Properties LLC has proposed a 12-unit rental project on the Tunnel Road corridor. The proposed project is a cottage development on 1.01 acres directly behind the Mountaineer Inn. The property is easily accessible to transit, employment, and services. The total anticipated project cost is $1,272,000. The terms requested are $200,000 at 2.00% interest for 30 years, representing 15.7% of total project cost. The application scored 96 out of a possible 130 points. The per-unit subsidy is $16,667.

The developer has committed to marketing the project to Section 8 tenants and has agreed to voluntarily deed restrict the property for thirty (30) years to align the project with the new policy guidelines adopted in January. One (1) unit will be ADA compliant and all units will be 3-bedroom residences. Mr. Booth has also agreed to sign a personal guarantee on the loan as required under the proposed underwriting and risk management revisions.

The developer was provided HTF financing on a similar project at 57 Nancy Street in February 2009. That project has performed well to date and is now 80% complete with nearly all completed units being occupied by Section 8 voucher holders. The quality of construction is very good and the project has been built in conformity with the original plans and specifications.

Pros:

- The development costs per unit are relatively low at $106,000.
- The cottage development style allows for added density and housing appropriate for families with children.
- The urban location provides easy access to employment, transit, and services.
- The developers' agreement to a 30 year Deed Restriction substantially exceeds the minimum requirements for affordability under the old guidelines, and is in line with the new guidelines.
- The developer has successfully completed other local projects of similar size and scope.
- Past performance with the Housing Trust Fund has been excellent.

Cons:

- Proposed rents are near the program maximum.
- The Housing Needs Assessment indicates that one and two bedroom units are most needed at the present time.
- The land has not yet been appraised.

The project directly supports the City's Strategic Operating Goals: (1) *Affordable*: The project proposal is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville; and (2) *Sustainable*: The proposed project provides new housing units located near transit lines, higher urban development densities, and encourages higher standards of energy efficiency. The project also addresses the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing

affordable rental units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

The current balance in the Trust Fund is $446,399.93. There are sufficient funds at the present time to fully fund the proposed development. The available fund balance will be reduced by $200,000 to $226,399.93 if the loan is approved. The project is new construction and is anticipated to add $1.2 million dollars in new development to the City tax base.

The Housing and Community Development Committee recommends City Council approve a resolution approving a loan of $200,000 to Beaucatcher Properties, LLC for the development of 12 rental units on Tunnel Road.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 10-76. This motion was seconded by Councilman Davis and carried unanimously (with Councilwoman Manheimer being recused).

RESOLUTION BOOK NO. 32 – PAGE 429

At this time, Councilwoman Manheimer returned to the meeting.

C. RESOLUTION NO. 10-77 - RESOLUTION APPROVING THE HOUSING TRUST FUND UNDERWRITING AND RISK MANAGEMENT POLICIES

RESOLUTION NO. 10-78 - RESOLUTION AMENDING THE FEES & CHARGES MANUAL

Community Development Director Jeff Staudinger said that the Housing and Community Development Committee has reviewed and is recommending approval of a resolution authorizing adoption of Housing Trust Fund underwriting and Risk Management policies.

Community Development Division staff and City Council's Housing and Community Development Committee (HCD) have been reviewing and revising the Housing Trust Fund's policies and procedures since June, 2009. At the January 26th meeting, Council formally adopted specific policies for the fund related to eligibility, loan terms, and fund priorities. Staff's focus has now shifted to the administrative concerns of fund management.

Housing Trust Fund programs both regionally and nationally have been researched to identify standard policies and procedures that may strengthen the underwriting and closing of approved HTF loans. In addition to web-based research, staff has conferred with a senior commercial lender at a local bank to assess the potential impact of the proposed policy recommendations on construction financing. This discussion also addressed other actions that could be taken to identify potential problems or areas of concern with subsidized developments.

In summary, the purpose is to (1) create underwriting policies for prudent decision-making; (2) strengthen the quality of loans; (3) reduce City risk; and (4) reflect best-practices in lending.

Policy recommendations related to underwriting and risk management were made by staff and discussed in detail by HCD at the February 18th meeting.

A. The following policy concerns have been noted by the Committee:

- No formal underwriting guidelines have been adopted since the creation of the fund;
- Due to the lack of clear guidelines, past decisions relating to the assumption of risk have been somewhat subjective. Consistency between applications is needed to run an effective program and protect the City's substantial cash investment.
- Formal written policies for the administration of the fund, underwriting of new applications, and long term risk management practices are needed to strengthen the quality of funded loans and to prevent the City from assuming a disproportionate amount of risk ;
- Administrative approaches to fund management should be proactive rather than reactive, and should incorporate best practices from other revolving loan funds.
- Lessons learned in the Fund's operations need to be translated into the Fund's underwriting and risk management processes.

B. In response to these concerns, the Housing and Community Development Committee is recommending nine (9) underwriting and risk management criteria to be incorporated into the Housing Trust Fund Guidelines. The Committee's recommendations are summarized below:

1. An application fee of $300 will be required to be paid at the time of application. The fee will be used to pay for credit reports on all principal partners (excluding LIHTC projects and non-profit organizations), project monitoring expenses, and criminal background checks if determined as necessary by the Community Development Director, and assist with other costs of administration.
2. The Housing Trust Fund loan must close in no less than 3rd lien position.
3. With the exception of land acquisition, all loans will close as a line of credit.
4. A property appraisal dated no later than six (6) months prior to closing will be required. If the appraisal reflects a total loan-to-value (TLTV) of more than 95%, the City may require a pledge of additional equity or other assets prior to closing.
5. Eligible costs will be limited to land acquisition and hard costs only. All draws, except those for acquisition, will be on a reimbursement basis only.
6. All financing commitments must be secured prior to closing.
7. All HTF funds must be drawn down proportionately with other financing sources.
8. With the exception of LIHTC projects and non-profit agencies, personal guarantees will be required for all principals, partnerships, and majority members holding more than 19.9% ownership in the organization.
9. If the risk of loss appears high, a loan may be denied despite the proposed project meeting other goals and objectives of the City.

Pros:

- Provides formal written policies and procedures for administration of the Housing Trust fund.
- Provides a proactive rather than a reactive approach to loan review.
- Draws upon the experience of other similar programs to strengthen the current risk management structure of the HTF.
- Eliminates subjectivity in the underwriting and closing processes.

Cons:

- The fund has not had clear underwriting guidelines in the past, and this may be seen by some as unnecessary or onerous requirements.
- No application fee has been charged in the past, and this may be perceived as limiting the fund's availability to small scale developers.

These changes directly support the City's Strategic Operating Goals: (1) *Affordable*: The policy proposals are supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville; and (2) *Sustainable:* The policy proposals ensure financial accountability by matching resources with strategic initiatives and creating meaningful performance measures. The policy recommendations are also supportive of the Consolidated Strategic Housing & Community Development Plan in that the adoption of risk management and accountability standards will directly impact the funds ability to assist in increasing the housing stock, providing affordable rental units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

Regarding the fiscal impact, the collection of an application fee, depending on the number of applications, may have an overall positive affect on the cost of fund administration. Generally, the proposed underwriting and risk management recommendations are intended to help protect the Fund from losses.

The Housing and Community Development Committee recommends City Council approve a resolution adopting the proposed underwriting and risk management changes to the Housing Trust Fund guidelines.

In response to Councilwoman Manheimer, Mr. Staudinger said that we have not gotten title insurance policies on our loans, but we will incorporate that as part of the process in the future.

Vice-Mayor Newman said that this is a good set of procedures while still making the process being user-friendly.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and they would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-77. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 430

Vice-Mayor Newman moved for the adoption of Resolution No. 10-78. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 431

D. CITY HALL WATER INFILTRATION REPORT

RESOLUTION NO. 10-79 - RESOLUTION AUTHORIZING CITY STAFF TO DEVELOP A REQUEST FOR QUALIFICATIONS FOR ENGINEERING DESIGN, PREPARATION OF CONSTRUCTION DOCUMENTS AND TO CONDUCT SPECIAL INSPECTIONS FOR THE REPAIRS TO THE CITY BUILDING

ORDINANCE NO. 3831 - BUDGET AMENDMENT FOR A PROJECT MANAGER POSITION FOR THE CITY HALL BUILDING PROJECT

Director of Building Safety Robert Griffin said that the purpose of this report is to present the City Council with the results and recommendations of a water infiltration study conducted on the City Building (Asheville City Hall), and seek Council action to initiate repairs to the building.

The Asheville City Building is recognized throughout the country as an Art Deco masterpiece. Douglas D. Ellington, an architect who came to Asheville in the mid-1920s, designed the eight-story building, which was completed in 1928. Ellington stated that the design was "an evolution of the desire that the contours of the building should reflect the mountain background."

Ellington chose building materials that presented a "transition in color paralleling the natural clay-pink shades of the local Asheville soil," according to the booklet that was printed for the dedication of the building on March 19, 1928. The unique octagonal roof is covered with bands of elongated triangular terra cotta red tiles. Between the two levels of the roof are angular pink Georgia marble piers, between which are precise vertical rows of ornamental green and gold feather motifs. The building façade is composed of brick veneer installed over a variety of backup materials including brick and tile.

Terra cotta is a building material that is cast from clay and then glazed. Terra cotta components add great color and detail to a building, but we now know that they are also highly susceptible to cracking and damage from impacts or freeze and thaw cycles. It is also often thought that old brick buildings will remain solid and sturdy forever, requiring little or no maintenance. However, the life expectancy for most mortars is up to 75 years. At the end of its life-cycle, mortar will require repair before moisture and water infiltration create damage to the interior of the building.

Over the last several years, the City of Asheville has implemented smaller repair and refurbishment projects to address water infiltration issues present on the upper floors of the building. However, when signs of major water infiltration became apparent, Asheville City Council approved Resolution Number 09-79 on April 28, 2009, authorizing a contract with Sutton-Kennerly & Associates to conduct an exterior inspection for water infiltration on Asheville City Building. The scope of this investigation was to evaluate the condition of the existing exterior of the building in an effort to determine the source of water leakage into the building, assess the existing condition of cladding materials on the building, and to develop recommendations for any repairs needed.

During the course of the investigation, scaffolding was erected on the north and south elevations of the building, and existing brick was removed from approximately 12 locations to evaluate conditions behind the brick veneer. In addition, several of the terra cotta sections were removed from the tops of the parapet walls at the corners of the building, as was one section of marble coping from the top of the parapet wall on the south side of the building.

Results and Recommendations: Sutton-Kennerly & Associates' report outlines the causes of water infiltration, damage as a result of freeze-thaw conditions, and weather related damage as a result of building construction techniques that are now known to be insufficient to control water infiltration. Causes of the water infiltration include the lack of flashing on the building; deterioration of mortar joints between the decorative terra cotta units as well as corrosion of the steel anchorage of the terra cotta to the building; corrosion of ties securing the brick veneer to the building; the corrosion of shelf angles that serve as lintels over window openings; warping and damage to upper floor windows; failure of existing sealants; cracks in the rising walls at the small roof on the upper floors, and; the absence of brick expansion control joints, among others.

The repair of these issues will be complex and costly. Damaged terra cotta sections must be removed and replaced with new tiles to prevent further water infiltration and structural damage. Replacement components must be created to replicate the design of the original piece, as well as the coloration that is acquired as the surrounding pieces age. Securing and repairing the brick veneer and other building components will require extensive hand work. The total time to complete the project, from developing construction documents and bidding the project to

completing the construction, is estimated to be in the range of 36 to 48 months or more. Staff estimates that it will take 12-14 months to prepare for construction, and that construction alone will take an additional 24-36 months. The project will be phased to assess the effectiveness and aesthetics of the repairs.

At this time, the total cost of the project is estimated to be around $5 million. Staff will be prepared to present City Council with a financing plan for the project when the contract for construction is considered by Council. Financing for the project will need to be in place by Fiscal Year 2010-2011.

Due to the magnitude and importance of this project, staff recommends the project budget include a project manager (PM) for the City of Asheville. This PM position will develop a full-scale project plan including detailed schedules and budgets and will work to ensure construction documents and specifications meet the City's requirements for quality control and operations. The PM will also formulate the bid package, schedule and conduct pre-construction meetings, complete progress reports, negotiate costs of the initial contract and change orders with the goal of minimizing change orders and cost increases, and provide communication to and from the City, contractors, and design firm. The project manager will ensure that the City of Asheville's sustainable and energy efficiency goals are met.

Pros:

- The City Building is an architectural treasure and the crown jewel of Asheville. Restoration of the building is essential to the city's historic and cultural fabric.
- Approving the resolution authorizing the development of a RFQ for construction and bid documents begins the project.
- The project manager position will improve the chances of the project's completion on time and on budget.

Cons:

- Administering a project of this size and following through on implementation will require significant staff time.
- Funding for the project is not currently budgeted and will impact the city's financial picture.
- A delay will further deteriorate the building and could threaten its structural integrity.

This project supports the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities.

The costs for hiring a project manager, as well as the cost for developing bid and construction documents, are not included in the current year's budget. The budget amendment for FY 10 in the amount of $19,842.50 will provide funding for the project manager for the remainder of the current fiscal year. For FY 11, a full year's cost is estimated to be $79,100, which will cover salary and fringe benefits. Staff is actively seeking federal support and grant opportunities that projects of this type would qualify.

The costs for a professional design firm to develop the bid and construction documents and special inspections conducted by the engineers are unknown at this time, but they are currently estimated to be $395,000. During a subsequent Council meeting when Council takes formal action to award the contract for the bid and construction documents, a second budget amendment will be presented to providing funding for the cost of the contract. Additional costs for construction above the cost estimates in the report could occur when actual bids are obtained.

Once debt financing is in place, the city could be reimbursed for design and project management expenses previously incurred through bond or bank proceeds. Additional costs could be anticipated as change orders during construction. Damage and repairs not found to this point could be found during construction, impacting the total cost of the project.

City staff recommends that City Council adopt a resolution authorizing City staff to develop a RFQ for an engineering design firm for the project, authorize the addition of the project manager position, and approve the associated budget amendment, in the amount of $19,842.

Using a PowerPoint, Mr. Griffin explained that City Hall is (1) an Art Deco design by Douglas D. Ellington; (2) Built 1926 – 1928; (3) on the National Register of Historic Places; and (4) Centerpiece in the Downtown Asheville National Register Historic District.

The scope of work necessary is to (1) Evaluate existing condition of the exterior; (2) Determine the source of water leakage into the building; (3) Assess condition of the existing cladding material; and (4) Develop recommendations for repairs that are needed.

The investigation will consist of (1) North and South elevations of the exterior accessed August & September 2009; (2) Existing brick removed at 12 locations allowing visual examination; (3) 2nd floor – 8th floor examined; (4) Terra cotta removed on parapet walls; (5) Marble coping removed from parapet wall on south side; (6) City Building construction was prior to State Building Codes; (7) Many of the construction practices would not meet code today (a) Lack of flashing; (b) Inadequate number of ties securing brick to structure; (c) Lack of expansion joints; and (d) Assumed the brick, terra cotta, marble, and mortar in joints would prevent water intrusion.

Conditions noted (1) Roof (a) existing roof membrane appears to be in good condition; (2) Terra Cotta (a) Significant damage to many of the sections around the upper levels; (b) Water beneath those removed; and (c) Moss growth indicating a consistent source of moisture exists; (3) Brick (a) Appears to be relatively sound; (b) Numerous and extensive cracks in various locations; (c) Corrosion of shelf angles supporting brick and corrosion to brick ties; and (d) Behind cement plaster (ground floor to grade on north wall) plaster has spalled off revealing extremely soft and deteriorated brick; (4) Marble Coping at 2nd Floor Parapet (a) Sealing material in joints very weathered and failed at most locations; (b) Water found below the coping stone on top of brick masonry below; and (c) Separation of ½" between outer Sythe of marble and the inner Wythe of bricks; and (5) Windows (a) Sealant installed between the window frames and brick have failed; (b) 7th floor windows operating mechanisms have failed; (c) Window panes are loose and easily removed by hand in places; and (d) Frames are warped.

Recommended repairs include (1) Repair existing terra cotta copings and install new flashing; (2) Install new stainless steel spiral ties to secure the brick to the building; (3) Remove existing brick at the shelf angles and repair, replace, extend shelf angles where needed, install flashing; (4) Replace brick as needed; and (5) Remove the existing plaster between ground floor level and existing grade on north elevation.

Below is the estimated costs:

• Repairs	$2,631,348
• Permits, insurance, etc.	$ 263,135
• Scaffolding, access	$ 400,000
• 20% contingency	$ 658,897
• Design fees/inspect	$ 395,000
• HVAC 7th & 8th floors	$ 743,000
• Up-fit Interior 7th & 8th	$ 500,000
• Total Estimated Cost	$5,591,380

Management and implementation consist of (1) Establish a Project Manager position; (2) Develop a full-scale project plan including detailed schedules and budgets; (3) Formulate the bid

package; (4) 12-14 months (a) select design professional; (b) bid documents; and (c) select contractor; and (5) 24-36 months construction.

Staff recommendations include: (1) Adopt resolution authorizing City staff to develop a RFQ for an engineering design firm to create construction documents; (2) Authorize the addition of a project manager position, and approve the associated budget amendment; (3) Direct staff to come back to Council with a detailed schedule and financing plan; and (4) Direct staff to continue to seek other sources of funding for the project including federal funds and grants.

Councilman Russell questioned whether the project manager position needed to be dedicated prior to coming back to Council with a financing plan. Mr. Griffin said that they are requesting approval for that position now in order that the project manager be on board to give input on the selection of the engineering design firm and to work with the design firm to understand the complexities of the project.

When Councilman Smith asked how many offices could be obtained on the 7th and 8th floors, Mr. Griffin said that the number is not known at this time because after completion of the project in 4 years, the needs of the City may change. The square footage is similar to the 6th floor and they feel portable walls will be used for flexibility as changes occur.

Thinking long-term, Mayor Bellamy hoped City Council would support having Council offices on either the 7th or 8th floors.

When Mayor Bellamy wondered why this is being brought forward at this time and not during the budget process, City Manager Jackson said that staff feels a sense of urgency. The sooner we get a project manager on board and get the engineering design firm selected, the quicker we can apply for federal funds.

Mayor Bellamy could not support the motion as she felt it should be reviewed in the context of the budget as a whole and start at the beginning of the budget year in July. She also felt Council should see the financing plan.

Councilwoman Manheimer felt it was important to have a dedicated well-qualified professional to do the project. When Council is finally being asked to dedicate $5.6 Million, she hoped we will have a better idea of what kind of federal funding will be available and also about whether we can consider the upfit parts in the later time in the project.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Russell moved for the adoption of Resolution No. 10-79. This motion was seconded by Councilwoman Manheimer and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 32 – PAGE 433

Vice-Mayor Newman moved for the adoption of Ordinance No. 3831. This motion was seconded by Councilwoman Manheimer and carried on a 6-1 vote, with Mayor Bellamy voting "no."

ORDINANCE BOOK NO. 26 – PAGE 47

E. SUPPORT OF TOWN HALL FORUM ON APRIL 19, 2010, ON THE ASHEVILLE ENERGY INDEPENDENCE INITIATIVE

Vice-Mayor Newman said that he would like to request that the Asheville City Council host a special Town Hall Forum on the proposed Asheville Energy Independence Initiative. The primary purpose of the forum would be to educate the community about the program concept, seek feedback on the substantive and technical issues involved and to gauge how much public interest there is in the initiative. He would also like for us to invite the Buncombe County Commissioners to be a Sponsor of the forum as well, as they are also analyzing the potential for a community-based energy efficiency initiative.

We may also want to invite Progress Energy's Community Energy Advisory Committee (CEAC) to be a Sponsor. There are also many other community groups, such as the WNC Green Building Council who he was sure will want to participate in the forum, Asheville GO and others that I am confident will want to actively participate.

Why a Town Hall Forum? The new PACE financing model (Property Assessed Clean Energy improvements) is an innovative concept that is operating in a relatively small number of communities across the nation. Prior to implementing such an initiative, it is important that the issue be fully vetted by the community in terms of costs and benefits. It is important for the City Council to get a sense of how much interest there may be in the idea. Clearly, this is an effort that cannot succeed without substantial public support and engagement.

Proposed date: Evening of Monday, April 19. If there is a problem with this specific date, other dates could be considered so long as they are before the NC Legislature reconvenes on May 12. We will want to invite our NC Legislatures to participate in the Town Hall Forum so we can thank them for their support of the clean energy enabling legislation. There may be some further clarifications to the enabling legislation that would be beneficial, so we want the legislators to be able to participate.

Location: To Be Determined.

Tentative Agenda:

- Welcome
- Overview of energy independence initiative and PACE model
    - Purpose and need
    - How the program could work
    - Examples of programs around the county
    - Financial issues
    - Legal issues
- Break-out sessions
    - Seeking community input on general concept
    - Seeking community input on technical issues
    - Seeking community input on marketing the initiative and determining how much public interest there is in participating in the program
- Reconvene – Report back on results & discuss next steps in community process
- Adjourn

Paul Bellows, Chairman of the Board of Directors of the Blue Ridge Sustainability Institute (BSRI), said that they would be a Sponsor of this event and help get the word out in the community about it. BSRI is also reaching out to the County Commissioners and the Progress Energy Citizens Energy Advisory Committee (CEAC) group to invite their participation. So the forum would have as its sponsors the City of Asheville and Blue Ridge Sustainability Institute as well as the County and Progress Energy CEAC committee, assuming they decide to participate as well. He explained that they currently hold month green Monday meetings for people to talk

about sustainable issues and the April 19 date would be the perfect forum date at approximately 5 or 6 p.m.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved to support the Town Hall forum on the Asheville Energy Independence Initiative on April 19, 2010. This motion was seconded by Councilman Bothwell and carried unanimously.

~~RESOLUTION BOOK NO. 32 - PAGE~~

F. DISCUSSION AND CONSIDERATION OF THE STATE LEGISLATIVE AGENDA FOR 2010

City Attorney Oast said that prior to Council's annual retreat, on January 8 and 9, 2010, Council was provided with a memorandum from me covering developments of interest from the 2009 session of the North Carolina General Assembly, and outlining a schedule and important deadlines for the 2010 session of the General Assembly. The session convenes on May 12 and the deadline for submission of legislative requests to bill draft is May 19. The deadline for introduction is May 26. He provided a copy of the memorandum, along with a copy of the joint resolution setting the schedule and establishing other important limitations regarding local legislation.

The 2010 session of the North Carolina General Assembly is a "short" session. As Council is aware, there are limitations on the matters that may be considered in a short session. As to local legislation, the chief limitation is that the bill must be "non-controversial." Our local delegation is typically willing to discuss any legislative proposal with us and looks to such indications as community interest and whether the request is unanimously supported by the City Council.

Since his previous memorandum, he explained the following matters that have come to his attention as possibilities for legislative action:

1. Woodfin/Asheville Boundary Realignment. This has been a recurring issue. Asheville and Woodfin are adjacent to one another and, in many places, have a common boundary. In some places, however, the boundaries diverge such that there are pockets or "islands" of unincorporated area that are surrounded by incorporated area under the jurisdiction of either Asheville or Woodfin. In addition, there are some properties located in one jurisdiction that can be more effectively provided with police, fire, and other services by the other jurisdiction. The unincorporated areas include the Broadway/Riverside Drive/US 19-23 interchange and parts of the UNC-A campus. The most dramatic example of the jurisdictional confusion is that the UNC-A track is transected by Asheville City limits such that part of the track is inside the City and part of it is not.

   Further with respect to UNC-A, there are some properties adjacent to the campus that are owned by the State of North Carolina and planned for eventual future use by UNC-A. This property is in Woodfin's jurisdiction.

   In previous discussions with Woodfin, UNC-A, and the State, there is general agreement that all of the UNC-A property and the Broadway/19-23 interchange should be in Asheville's jurisdiction. Because this property is government owned, there is no tax

consequence, and Asheville is in a better position to provide necessary services to these areas.

In order to accomplish this realignment in a way that makes sense and accomplishes the governmental objectives, however, some privately owned property is necessarily affected. Previous attempts to realign the boundary have met with objection from some of the private property owners who do not want to change jurisdictions or have their property taxes increase. It may be possible, through interlocal agreements or otherwise, to provide for certain properties in one jurisdiction to be served by another jurisdiction that can provide the services more effectively. If such an agreement can be reached, it may be possible to realign the boundaries of Asheville and Woodfin such that the jurisdictional issues with respect to the government owned property are addressed, the service delivery issues as to the privately-owned properties are addressed, and no negative tax consequences are experienced. To the extent that specific legal authority does not exist for such agreements, legislative authorization for such an agreement could be obtained as part of the boundary realignment.

More recently, as Council is aware, discussions with Woodfin have indicated that the developer of Reynolds Mountain proposes to locate an entrance to the development on Merrimon Avenue in the vicinity of its intersection with Elkwood Road. For many reasons, it is preferable that this entrance be located entirely within one jurisdiction or another, and since most of Reynolds Mountain is in Woodfin, this intersection should be as well.

2. Clarification of Energy Improvement Assessment Authority: Through a series of legislative enactments in recent years, North Carolina communities have obtained the ability to use the property assessment process to finance the installation of energy efficiency measures (solar panels, etc.) on private property. Some communities interested in implementing such a program may request further enhancement or clarification of their authority to do so through the assessment process. Since Asheville has been involved in this concept from an early stage, our assistance may be requested in seeking or supporting additional legislation.

3. Clarify ABC Allocation: At a presentation to Council on February 23, there was some discussion of the allocation of revenues generated by the local ABC system among Asheville (75%) and Buncombe County (25%). Our review of the law indicates that this 75/25 allocation is established by the local act establishing the City's ABC Board. The general law pursuant to which most ABC systems operate provides that all of the revenue goes to the general fund of the government that operates the system. However, pursuant to N.C.G.S. 18B-805(e), the allocation may be altered at any time by the governments receiving the revenue. This is true whether the system operates pursuant to local act or general law. Thus, the current 75/25 allocation could be changed by agreement with Buncombe County. If, however, the City wishes to change the statutory default allocation, an amendment to our local ABC law would be necessary.

4. Revenue Stream for Civic Center: Council has from time to time explored the possibility of a dedicated stream of revenue to fund improvements to and maintenance of the Civic Center. In other communities that operate public auditoriums and similar facilities, such dedicated revenue streams are typically in the form of occupancy taxes or taxes on prepared food and drink. These possibilities have been discussed in the past with members of the local delegation. When these discussions have occurred, the proposals have not been viewed as "non-controversial", and our legislators have asked for a plan as to how the City proposes to use the revenues. While the short session may not be the time to request that such legislation be introduced, it may be the time to begin discussions with the delegation about how to present such a request, and what supporting information should be available.

5. Cable Franchise/Intranet Issue: Pursuant to the Video Service Competition Act of 2006, local franchises for cable television transition to a state franchise upon their termination. This is true whether the termination occurs by expiration, or by the provider giving notice of termination as provided for in the statute. Last year, the City's cable provider, Charter, gave notice of termination of its franchise, effective October 31 of 2009. The franchise was set to expire by its own terms in 2010.

   In connection with some local cable franchises, in North Carolina and elsewhere, the installation and maintenance of a local intranet was provided for. The intranet, or "I-net" is a fiber-optic/data transmission link between government facilities and is used for routine and emergency operations.

   In connection with Asheville's franchise with Charter (or its predecessor in interest), an I-net was provided for. When Charter gave notice of termination of the franchise, there was no specific provision made for the I-net. Moreover the Video Service Competition Act makes no provision for the I-net or similar peripheral services. Clarification of this issue may warrant discussion with our local delegation.

As is usually the case in any legislative session, bills get introduced that the City is interested in, either in obtaining similar legislation, or in joining other local governments in supporting or opposing. Revisions to the annexation laws, introduced in 2009, remain eligible for consideration in the 2010, and this is one example of legislation that Council may be interested in monitoring or in taking a position on. Another big issue may be the economy and we need to be careful that the State does not reduce any of our income streams. Council may also want us to follow-up on items on the N.C. Metro Mayor's Coalition agenda, community mental health and legislative agenda from the Chamber of Commerce. Our office receives daily reports on legislation that is introduced. If we see matters of interest to the Council we will bring those forward for your consideration. He said that he would be getting the sense of Council and bring back a legislative proposal for Council consideration on April 13. He felt we need to engage our legislators on matters that are of interest to us prior to convening of the legislative session.

Throughout the presentation, City Attorney Oast responded to various questions/ comments from Council.

Councilman Davis said that he did not want to give up on the revenue stream for the Civic Center but explained why this might not be the right time to include that in our legislative agenda.

In response to Vice-Mayor Newman, City Attorney Oast said that he would research whether Asheville is the only city in the state that has a 75/25 allocation with the County of ABC revenues.

When Councilman Smith suggested exploring an increase in the occupancy tax go through the Tourism Product Development Fund and be earmarked for the Civic Center or other municipal infrastructure project. City Attorney Oast said that we will explore all avenues before taking this to the legislators.

There was a brief discussion, initiated by Vice-Mayor Newman, to add the voluntary annexation issue regarding whether the properties needed to be contiguous.

In response to Vice-Mayor Newman, Mayor Bellamy said that if Council members have items they would like for Council to consider (not specifically Asheville-related issues) to have them to City Clerk Burleson prior to Monday, April 5, with a copy to all Council.

G. BOARDS & COMMISSIONS

It was the consensus of Council to instruct the City Clerk to arrange interviews for Kathleen Lyons, Honor Moor and Jaan Ferree for a vacancy on the Public Art Board.

Vice-Mayor Newman said that the Boards & Commissions Committee discussed (1) the process for requesting that people who apply for boards and commissions disclose possible conflicts of interests they may have in serving; and (2) voting process.

Regarding potential conflicts of interest, it's not usually for people to have conflicts and we don't want to discourage them from applying as they can recuse themselves from voting on any particular issue. We do want active people in the community to be active on our boards. City Attorney Oast and City Clerk Burleson have been instructed to revise the Boards & Commissions Application for that kind of disclosure statement for the Committee's review at their next meeting. Councilwoman Manheimer suggested language be incorporated that they disclose their business or land ownership in the City.

Regarding the voting process, the Committee discussed two processes to make appointments after interviews (1) poll members of Council and appoint whichever person gets the most votes (if multiple appointments); and (2) someone makes a motion and if the motion passes, the person gets appointed. Both processes were discussed and since no resolution was reached, the Committee felt we needed to keep both options available. The Committee welcomed feedback from Council and will discuss this item again at their next meeting.

In response to Councilman Bothwell in making the process more public, Vice-Mayor Newman said that it is appropriate for any member of Council to speak about of the applicants during the voting process.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilman Smith explained the Google gigabit broadband pilot program and how Asheville is a good candidate for their program. He urged the community to go to the Google Asheville site and fill out an application to nominate Asheville for the program. He also suggested a resolution of support for the municipal application be considered by Council on March 23.

Councilman Russell was pleased to note that Habitat for Humanity is closing on their 200th house in the community.

Rev. Christopher Chiaronmonte prophesied about a terrible disease that was going to strike all the children.

Mr. Jerry Summers expressed disappointment about Council's appointment of Ms. Holly Shriner to the Planning & Zoning Commission.

The following claims were received by the City of Asheville during the period of February 19-25, 2010: Vanessa H. Garris (Transit), PSNC (Water), Driss Bentaleb (Water), Yolanda L. Tierson (Water), Irene Wright (Water), Danny Donaldson (Transit), Robin Merrell (Police), Progress Energy (Water), AT&T (Water), Motor Parts of Asheville (Police). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:18 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – March 23, 2010 - 2:00 p.m.
Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilman William A. Russell Jr. (participating via speaker phone); Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Esther E. Manheimer (in trial)

Mayor Bellamy announced the resignation of Chief Financial Officer Ben Durant. On behalf of City Council, she wished Mr. Durant the best of luck in his future career.

BUDGET POLICY DIRECTION

Mayor Bellamy noted that this worksession is a continuation of the budget direction to staff which began on March 9, 2010.

City Manager Jackson focused on the following three items: (1) coping with financial stress; (2) balancing General Fund revenues and expenditures; and (3) setting water system rates.

Two positive actions in hard times recommended strategy include (1) well-managed organizations are capable of dealing with events before, during and after crises; (2) they are able to adapt in the short-term within a cycle and over the long term of several business cycles.

Coping well with financial stress recommended strategies include (1) short-term tactics – reign in expenses and adjust revenue mix; and (2) long-term adaption – educate leaders and stakeholders and pursue structural solutions.

Positive actions in hard times short-term tactics include (1) reign in controllable expenses; (2) improve productivity and financial management practices; (3) shed activities, invest or eliminate; (4) adjust the revenue mix and tax rates; (5) introduce or increase charges for services; (6) bolster residents' willingness to share risks; and (7) improve political acceptability of cutbacks.

The City of Asheville's short-term tactics for Fiscal Year 2008 included (1) reduced capital; (2) cut training, travel, services and equipment; and (3) targeted hiring freeze. In Fiscal Year 2009 those tactics included (1) deferred capital; (2) salary freeze; (3) reengineering – One Stop Shop; (4) early retirement program; (5) managed vacancies; (6) fee increases/cost recovery; and (7) aggressive pursuit of ARRA grants.

Positive actions in hard times long-term adaption include (1) avoiding excessive commitments to fixed expenses; (2) diversifying revenue sources; (3) engaging in long-term financial planning; (4) maintaining adequate reserve; (5) using charges for services and taxes for capital improvements; and (6) educating stakeholders.

The City of Asheville's long-term adaption include (1) avoiding fixed expenses – postponed bond program (2008 & 2009); (2) long-term financial planning/diversifying revenues – structural issues identified in 2008 and financial white paper released in 2009; (3) maintaining reserves – retained 15% General Fund balance; and (4) recommended community meetings to educate stakeholders – February 9, 2010.

For Fiscal Year 2010 budget planning, balancing revenues and expenditures include (1) General Fund initial forecast - $5.1 Million gap (a) flat revenues; (b) loss of transit funding; (c)

inflation in operating and health care costs; (d) cost of living adjustment for employees of 2%; and (e) no Fund Balance use; and (2) Increase for State pension - $5.75 Million gap.

Tier 1 expense reductions/managed ($2.3 Million) include (1) freeze vacancies in development services; (2) reduce overtime and temp services; (3) reduce contracts and services; (4) reduce other training, tuition reimbursement, printing, other line items; (5) reduce transit subsidy; and (6) savings from expired annexation agreements.

Tier 2 expense reductions/services ($1.5 Million 8-10 full-time and 12-14 part-time positions) include (1) delay Master Plan implementation; (2) reduce police and fire overtime; (3) re-engineer brush collection; (4) reduce programming at centers; (5) other re-engineering efforts; (f) reduce outside agency; and (6) cost-sharing for co-sponsored events.

Tier 1 revenue enhancements total $975,000 and include (1) fees and charges - $200,000; (2) street cut enterprise - $150,000 net; (3) Parking Fund recurring transfer - $125,000; and (4) Parking Fund one-time transfer - $500,000. The adjusted budget gap is $1 Million.

Tier 2 revenue enhancements include (1) increase business licenses - $100,000; (2) reduce General Fund reserves to 14% - $1 Million; and (3) 1-cent property tax increase - $1 Million.

Tier 3 expense reductions/services include (1) transit service reductions - $600,000; (2) 4/10's for non-emergency facilities (energy) - $75,000; (3) second year salary freeze - $500,000; (4) further health insurance cost shifting - $200,000; and (5) eliminate additional positions 10-12 - $600,000.

The recommended strategy, including Tier 1 and Tier 2 expense/service reductions, and Tier 1 revenue enhancements, leave a planning gap of approximately $1 Million. He asked Council if (1) there any elements of the strategy that Council would alter; (2) they had any substitutes an alternate revenue increase or expense reduction; (3) for any guidance they may provide on preferences for closing the remaining gap; and (4) what is preferable or untouchable?

Council raised several questions throughout the course of the presentation with expectations for responses from staff regarding some Tier 1 ($2.3 Million) and Tier 2 ($1.5 Million) expense reductions.

In summary, the following was the consensus of Council: (1) Council did not rule out the increase in business licenses (except for small businesses and manufacturing businesses); (2) Council rejected reducing the General Fund reserves; (3) Council rejected the 1-cent property tax increase; (4) Council was cautiously receptive to limiting transit service reductions; (5) Council expressed interest in seeing additional details on the 4/10's for non-emergency facilities but was concerned about closing City Hall on Fridays; (6) Council was open to City management recommendations on (a) second year salary freeze; (b) further health insurance cost shifting; and (c) eliminate additional 10-12 positions; and (7) Council agreed to reduce the Housing Trust Fund by an additional $50,000.

Water Resources Director Steve Shoaf explained different alternates for the water rate increase. Discussion surrounded the type of projects we could use with the Sullivan Act transfer of 5%, along with a request for information on the projects, including cost estimates, identified as candidates for use of the water utility fund 5% transfer.

It was the consensus of Council to instruct the City Manager to provide Council with a memo on the planning for the General Fund capital budget.

At 4:30 p.m. Councilman Davis moved to continue this worksession, if needed, until Tuesday, April 27, 2010, from 3:30 – 4:30 p.m. in the First Floor North Conference Room. This motion was seconded by Councilman Smith and carried unanimously.

Tuesday – March 23, 2010 - 5:00 p.m.
Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer (arrived at 5:53 and excused at 10:25 p.m.); Councilman William A. Russell Jr. (arrived at 5:53 and excused at 10:25 p.m.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Evergreen Community Charter School Kindergarten Classes led City Council in the Pledge of Allegiance and the Earth Pledge. Mayor Bellamy recognized Mr. Stuart Miles who was chosen Charter School Teacher of the Year in North Carolina. She wished him luck in competition for the N.C. Teacher of the Year.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING APRIL 1, 2010, AS "CENSUS DAY" AND APRIL 10, 2010, AS "MARCH TO THE MAILBOX DAY"

Mayor Bellamy read the proclamation proclaiming April 1, 2010, as "Census Day" and April 10, 2010, as "March to the Mailbox Day" in the City of Asheville. She presented the proclamation to Mr. Ken Richards who briefed City Council on some activities taking place during the Census.

B. PROCLAMATION PROCLAIMING APRIL, 2010, AS 'CHILD ABUSE AWARENESS MONTH"

Councilman Davis read the proclamation proclaiming April, 2010, as "Child Abuse Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Bill McGuire, with Child Abuse Prevention Services, and a representative of the Community Child Protection Team, who thanked City Council for their support in this effort and briefed Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING APRIL 2010 AS "JAZZ APPRECIATION MONTH"

Vice-Mayor Newman read the proclamation proclaiming April 2010, as "Jazz Appreciation Month" in the City of Asheville. He presented the proclamation to Mr. Dwight Williams, Music Director at the YMI Cultural Center, who briefed Council on some activities taking place during the month.

II. CONSENT AGENDA:

At the request of Councilman Smith, Consent Agenda Item "G" was removed from the Consent Agenda for discussion and/or an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 9, 2010

B. RESOLUTION NO. 10-80 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY PROPERTY OFF SHORT STREET TO BK BROADWAY PARTNERS

Summary: The consideration of a resolution authorizing the sale of property off Short Street to BK Broadway Partners.

The City of Asheville is the owner of a 0.12+/- acre lot located off of Short Street (PIN # 9649-11-8703-00000) at Cumberland Place in the Montford Neighborhood. On January 7, 2010, the City received a bid for this property from BK Broadway Partners in the amount of $71,000. This bid was generated with input from two separate appraisals: one appraisal, dated August 5, 2009, procured by the potential buyer, at $60,000; and the other appraisal, dated October 30, 2009, procured by the City of Asheville, at a price point of $86,000. The bid put forth by BK Broadway Partners at $71,000 is slightly below the average of the two appraisals.

This bid was advertised in the Asheville Citizen-Times on Friday, March 12, 2010. No upset bids have been received for this property. Approval of the resolution will accept the bid from BK Broadway Partners as the winning bid and authorize the conveyance of the property.

This action complies with the strategic operating plan in that income from the sale of this property will directly benefit the Community Development Block Grant (CDBG) Program, thus providing funding towards affordable housing.

Pros:

- The sale will be at fair market value as established by the upset bid process.
- It will return property not needed for public use to the tax rolls.
- It will transfer responsibility for maintenance to the private sector.

Con:

- There is no negative impact.

The $71,000 in proceeds generated from the sale of this parcel will be accounted for as CDBG program Income in the amount of $71,000." This additional income is currently unbudgeted, but it will be available to the Housing & Community Development Committee to allocate and include in the FY 2010-2011 Consolidated Action Plan.

Economic Development staff recommends adoption of the resolution which will authorize the conveyance and sale of property off Short Street.

RESOLUTION BOOK NO. 32 – PAGE 434

C. MOTION SETTING A PUBLIC HEARING ON APRIL 27, 2010, FOR ADOPTION OF THE CONSOLIDATED ACTION PLAN FOR FISCAL YEAR 2010 WHICH SETS OUT THE PROPOSED USE OF FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENT PARTNERSHIP ACT FUNDS

Summary: The consideration of a motion setting a public hearing for April 27, 2010, to obtain citizen input on the Consolidated Action Plan for Fiscal Year (FY) 2010-2011, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds.

The Community Development Division is responsible for the receipt and management of federal Community Development Block (CDBG) and HOME Investment Partnership Act funds. Applications from public, private and non-profit entities are solicited annually for these funds. Staff receives and evaluates applications for eligibility and prepares summary evaluations for the Housing and Community Development Committee (for CDBG funding) and the Asheville Regional Housing Consortium board (for HOME funds). These committees review the applications and make recommendations for funding. After a public review period of the proposed funding allocations, City Council approves an annual Consolidated Action Plan, which is submitted to the US Department of Housing and Urban Development (HUD). Upon HUD's approval of this plan, contracts are signed with the funded agencies. In order to meet HUD's submittal deadline, City Council must approve the annual Action Plan on or before May 15 of each year.

HUD requires two public hearing during this process. The first public hearing is held in November or December, to receive citizen comment about the application process. The second hearing is held prior to the submittal to HUD of the annual Action Plan. According to the City of Asheville "Public Participation Plan," public hearings for this process must be warned 30 days in advance of the hearing date. Key dates for this year's process are:

Public Hearing warning published	March 28, 2010
Public Hearing	April 27, 2010
City Council resolution to Approve Action Plan	May 11, 2010
Action Plan Submitted to HUD	May 15, 2010

The Action Plan directly relates to the Council's Strategic Goal of "Affordable." This plan directly supports the City's affordable housing plan, and will increase the supply of workforce housing. It supports initiatives to end homelessness in Asheville.

Pro:

- The public hearing process gives citizens the opportunity to comment and affect public decision-making regarding the use of public funds.

Con:

- There are no cons to this public hearing process.

Through timely following of the public process, Asheville continues to be eligible for these CDBG and HOME entitlement funds, projected to be approximately $3 million for 2010-2011. Once the City receives approval for the plan, the entitlement funds will be included and authorized for expenditure as part of the annual budget ordinance adopted by City Council. No City cash match is required to receive the entitlement funds.

Staff recommends that Council set the public hearing for the 2010-2011 Consolidated Action Plan for April 27, 2010.

D. MOTION SETTING A PUBLIC HEARING ON APRIL 27, 2010, FOR THE ADOPTION OF THE CONSOLIDATED STRATEGIC HOUSING AND COMMUNITY DEVELOPMENT PLAN FOR 2010-2015

Summary: The consideration of a motion setting a public hearing for April 27, 2010, to obtain citizen input on the Consolidated Strategic Housing and Community Development Plan for 2010-2015, which establishes the priorities, strategies and targets for the use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds.

The Community Development Division is responsible for the receipt and management of federal Community Development Block (CDBG) and HOME Investment Partnership Act funds. Every five years, we must prepare and submit to HUD a Consolidated Plan (accompanied by

research, including the Housing Needs Assessment and Market Analysis) that details our priorities, strategies and performance targets for the next five years.

The development of this plan began last summer. The Asheville Regional Housing Consortium board reviewed the Plan development process, and agreed to act as the steering committee for that process. The Housing and Community Development Committee also agreed to act in an advisory capacity during the process. We procured and contracted out the writing of the Housing Needs Assessment and Market Analysis, which was completed in early December. Staff conducted a public participation process in November and December, including the first of two required formal public hearings. The Plan is now in draft form, with a publication draft due to be completed by the end of this month. The draft Plan will be presented in public meetings in each of the four counties participating in the Consortium in mid-April. It will be recommended for approval to City Council by the Consortium Board and the Housing and Community Development Committee.

In order to meet HUD's submittal deadline, City Council must approve the Consolidated Plan on or before May 15.

The second hearing is held prior to the submittal to HUD of the Consolidated Plan. According to the City of Asheville "Public Participation Plan," public hearings for this process must be warned 30 days in advance of the hearing date. Key dates for this year's process are:

Public Hearing warning published	March 28, 2010
Public Hearing	April 27, 2010
City Council resolution to Approve Consolidated Plan	April 27, 2010
Consolidated Plan Submitted to HUD	May 15, 2010

The Consolidated Plan relates to the Council's Strategic Goal of "Affordable." This plan directly supports the City's affordable housing plan, and will increase the supply of workforce housing. It supports initiatives to end homelessness in Asheville.

Pro:

- The public hearing process gives citizens the opportunity to comment and affect public decision-making regarding the use of public funds.

Con:

- There are no cons to this public hearing process.

Through timely following of the public process, Asheville continues to be eligible for these CDBG and HOME entitlement funds, projected to be approximately $15 million for 2010-2015. Once the City receives approval for the plan, the entitlement funds will be included and authorized for expenditure as part of the annual budget ordinance adopted by City Council. No City cash match is required to receive the entitlement funds.

Staff recommends that Council set the public hearing for the 2010-2015 Consolidated Strategic Housing and Community Development Plan for April 27, 2010.

E. RESOLUTION NO. 10-81 - RESOLUTION SETTING A PUBLIC HEARING ON APRIL 13, 2010, TO CONSIDER THE VOLUNTARY ANNEXATION OF 97 AND 99 UNDERWOOD DRIVE

Summary: The consideration of a resolution fixing the date of a public hearing on April 13, 2010, for voluntary annexation of property located at 97 and 99 Underwood Road.

Larry Holbert and Ronnie Gray (L & R Rentals) have petitioned the City of Asheville for the annexation of one (1) lot located at 97 and 99 Underwood Road in South Buncombe County containing a total of approximately 8.95 acres. The area is not contiguous to the primary corporate limits but is contiguous to the satellite corporate area at the Asheville Regional Airport. The area is subject to the standards for annexation of noncontiguous areas contained in NCGS 160A-58.1.

Pursuant to NCGS 160A-58.2, such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed.

The next step in this process is for City Council to fix the date for the public hearing on this matter. Should City Council decide to proceed with this request, the effective date for the annexation would be May 31, 2010.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.
- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Con:

- Marginal costs for rural fire department debt service and calls for service/patrol.

At the City's current tax rate, the property, valued at $1,354,300, would generate approximately $5,688 in ad valorem tax revenue annually. The required debt service payment to the Skyland Fire Department is estimated to be $1,300 which must be paid within forty-five (45) days of the annexation effective date. This is a one time payment. Other marginal costs would come from calls for service or patrol.

City staff recommends that City Council accept the petition and adopt the resolution setting the date for a public hearing on the annexation petition for April 13, 2010.

RESOLUTION BOOK NO. 32 – PAGE 436

F. RESOLUTION NO. 10-82 - RESOLUTION SETTING A PUBLIC HEARING ON APRIL 13, 2010, TO CONSIDER THE VOLUNTARY ANNEXATION OF 411 DEAVERVIEW ROAD

Summary: The consideration of a resolution fixing the date of a public hearing for annexation of City-owned property at 411 Deaverview Road for April 12, 2010.

In 2009, the City of Asheville obtained two parcels at foreclosure auction. One of the parcels had been previously annexed into the City as a requirement for obtaining Housing Trust Fund loans for the Villas at Cedar Hill development. As part of the financing, the senior lender, Blue Ridge Savings Bank, secured the other parcel (PIN 9628274164) at 411 Deaverview Road as collateral. When the developer defaulted on the senior lien, the bank put the parcels up for sale at foreclosure auction. The City bid on the parcels to protect its investment in the property and was able to purchase the land at below market value. It is the intent of City staff to sell the properties and use the proceeds to repay the Housing Trust Funds advanced on the property. The collateral parcel is not yet a part of the City. The City proposes to annex this parcel to allow any future development on the site to contribute to the City tax base.

The parcel is 6.38 acres in size and has a tax value of $162,000. It contains a vacant residence.

The first step in the process for annexing a City-owned parcel is to approve a resolution of intent to annex the property and to set a public hearing on the matter. It is proposed that this hearing be held on April 13, 2010.

Pros:

- Provides for an urban level of service for areas adjacent to the existing city limits.
- Brings in a parcel currently in City of Asheville ownership avoiding later involuntary annexation.

Con:

- Marginal costs for rural fire department debt service.

Because the property is owned by the City, there would be no immediate ad valorem tax revenue generated. Once sold, the property would contribute to the tax base at an amount determined by the development of the property. The required debt service payment to the West Buncombe Fire Department is estimated to be $150.00, which must be paid within forty-five (45) days of the annexation effective date. This is a one-time payment.

City staff recommends that City Council adopt the resolution stating its intent to annex property at 411 Deaverview Road and setting the public hearing on this annexation for April 13, 2010.

RESOLUTION BOOK NO. 32 – PAGE 439

G. RESOLUTION OF SUPPORT TO BECOME A TARGET CITY FOR THE GOOGLE FIBER FOR COMMUNITIES FIBER-TO-THE-HOME PROJECT

This item was removed from the Consent Agenda for an individual vote.

H. RESOLUTION NO. 10-84 - RESOLUTION SUPPORTING THE GREEN OPPORTUNITIES' PROPOSAL TO THE U.S. CONFERENCE OF MAYORS/WAL-MART FOUNDATION GREEN JOBS TRAINING INITIATIVE PILOT AWARDS

Summary: The City of Asheville has enjoyed a successful partnership with Green Opportunities, Inc. through two grant-supported activities: Asheville GO, and the GO Energy Team.

The Asheville GO program prepares unemployed, low-income youth and young adults for living wage, green collar jobs through technical skills training, life-skills training, academic training and support, case management, and hands-on service projects. Members who successfully complete a four-month preparatory training program are placed in a five-month paid apprenticeship with local employers.

In July of 2009, the City of Asheville awarded a Community Development Block Grant to Green Opportunities, passed through Mountain Housing Opportunities. The pass-through relationship was necessary because the activities that Green Opportunities proposed to deliver could only be done through an organization with a certification as a Community-Based Development Organization (CBDO). Regardless, the responsibility for performance, reporting and accountability has been Green Opportunities'. In that time, they have demonstrated that they possess the capacity to manage the contract effectively and to perform the intended job training and placement outcomes. They are in compliance with all the provisions set forth in our contract. Because of their performance and capability, we have encouraged them to seek certification as a CBDO in their own right. They have almost completed this process, and I expect to certify them in this regard before the new program year that begins in July.

The City has also supported the GO Energy team, which has been a key component of the CDBG-funded "Weed and Seed Weatherization Program," managed by the Western North Carolina Green Building Council. In a unique partnership, The Green Building Council contracts with Green Opportunities to provide the labor to weatherize the homes of low-income homeowners in the West Riverside Weed and Seed area. Community Action Opportunities, funded through the US Department of Energy, provides the materials and also contracts with other businesses to perform code-related work such as furnace replacements. Green Opportunities GO Energy Team is one of the apprenticeship opportunities provided to GO members, one making a direct, measurable improvement to the lives of low-income families in our City.

Green Opportunities' staff is competent and professional and, to my knowledge, their Board of Directors maintains adequate oversight of the organization's operations and finances.

The City and Mountain Housing Opportunities took a risk last year entering into a contract with such a relatively new organization. Before doing so, we made certain that Green Opportunities had the infrastructure in place to be successful and both Mountain Housing Opportunities and the Community Development Division have invested our time and resources into helping the organization become established. Nearly a year later, I feel confident that Green Opportunities has a solid foundation from which to begin having a real and lasting impact on our community.

RESOLUTION BOOK NO. 32 – PAGE 443

I. RESOLUTION NO. 10-85 - RESOLUTION AFFIRMING CONTINUED SUPPORT OF THE WNC PASSENGER RAIL INITIATIVE

Summary: The consideration of a resolution affirming the City of Asheville's continued support of the Western North Carolina (WNC) Passenger Rail Initiative.

The WNC Passenger Rail Initiative is a long term partnership between several municipalities in the region and the North Carolina Department of Transportation, Rail Division. The proposed service will connect Asheville to the Amtrak station in Salisbury, NC. The purpose of this initiative is to enhance regional and local economic development, and to improve the state's transportation infrastructure.

The City of Asheville's past involvement in the initiative was driven by several (former) City Council resolutions and adopted strategic plans. Past staff involvement was coordinated by Mac Williams, former Economic Development Director and culminated with the site selection and purchase of the future Asheville passenger rail depot at 81 Thompson Street in Biltmore Village.

The WNC Rail Corridor Committee, a representational body made up of elected officials, municipal staff, and citizen advocates from the proposed corridor (including staff from the City of Asheville), continues to meet and work towards the establishment of passenger rail service from Salisbury to Asheville. On April 7th, 2010, members of the Corridor Committee will briefly meet with State Representative Ray Rapp, Chairman of the House Select Committee on Comprehensive Rail Service Plan for North Carolina. The Committee, led by Judith Ray, is supportive of Council adoption of this resolution, and appreciates the timeliness of Council's consideration of this matter.

The Office of Economic Development, via the Urban Planner/Riverfront Redevelopment Coordinator, will coordinate the interdepartmental resources to support this initiative. In the coming weeks, the Riverfront Redevelopment Coordinator will work closely with legal staff to provide Council with relevant Rail Service information as part of Council's upcoming review of state legislative priorities.

Pros:

- The City of Asheville's renewed support for the initiative will facilitate the timely implementation of the Passenger Rail Initiative when implementation funding becomes available at the State and/or Federal level.
- Will precede a Corridor Committee meeting with state representatives.
- Will provide a timely signal regarding the City's continued support for state priorities.

Cons:

- None known.

This action aligns with the following goals from Council's strategic operating plan: (1) Job Growth and Community Development (a) Partner in regional economic development strategies; (b) Expand partnerships with institutions to achieve common goals; and (c) Support the riverfront redevelopment partnership; and (2) Green and Sustainable (a) Integrate and implement a multi-modal transportation plan.

There is no fiscal impact associated with this action. Subsequent actions, including City collaboration with NCDOT rail on the preplanning for a multimodal station at 81 Thompson Street, will eventually require a financial contribution from the City. The amount of this contribution is unknown at this time. In order to best prepare for any future capital needs Economic Development staff recommends that Council receive regular updates on the WNC Passenger Rail initiative, especially in regards to funding alternatives for the development of the multimodal station facility at 81 Thompson Street.

If Council approves of the resolution, adoption of it is recommended.

RESOLUTION BOOK NO. 32 – PAGE 444

J. RESOLUTION NO. 10-86 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO JOIN THE MUNICIPAL ENVIRONMENTAL ASSESSMENT COALITION AND PARTICIPATE IN OBTAINING A STUDY OF PROPOSED WATER QUALITY STANDARDS

Summary: The consideration of a resolution authorizing the City of Asheville to enter into an agreement to participate in the Municipal Environmental Assessment Coalition (MEAC), and assist in obtaining an engineering analysis for proposed water quality standards.

In response to a mandate from the United States Environmental Protection Agency, the Division of Water Quality of the North Carolina Department of Environment and Natural Resources has initiated a review and modification of State surface water standards. This review could result in revised standards, which in turn could cause cities to undertake expensive upgrades to their wastewater and stormwater treatment facilities in order to comply.

The Municipal Environmental Assessment Coalition (MEAC) of the North Carolina League of Municipalities has proposed that cities work together to engage a consultant to produce an engineering analysis that may be used to assist the League in working with members of the General Assembly to ensure that municipal interests are appropriately considered in connection with these proposed revisions, and that there is scientific data to support the League's arguments.

The City of Asheville has been asked to support the League in this effort, and in the analysis, to join the MEAC. The cost of joining MEAC and participating in the engineering analysis is $2,500 for a city of Asheville's size. This cost may be paid half in this fiscal year, and half in the next fiscal year.

Pros:

- The engineering analysis will be helpful to the League in representing municipal positions on proposed water quality standards.

- The proposed cost sharing arrangement lowers the potential cost to the City for obtaining and participating in such a study.

Cons:

- Analysis may not address issues relating to particular cities.

There is a cost of $2,500 to join the MEAC and participate in the study. Funds are included in the FY 2009-10 Public Works Department Stormwater Services budget to cover this cost. In view of the substantial costs that may potentially be associated with revised water quality standards, as well as other community impacts, such as riparian buffers, this cost seems reasonable.

Staff recommends that the City Council approve the resolution authorizing the Mayor to sign an agreement to join MEAC and to participate in the engineering analysis.

RESOLUTION BOOK NO. 32 – PAGE 445

K. ORDINANCE NO. 3832 - BUDGET AMENDMENT FROM THE U.S. DEPT. OF THE INTERIOR FISH AND WILDLIFE SERVICE GRANT FOR RED WOLF HABITAT IMPROVEMENTS

Summary: The consideration of a budget amendment, in the amount of $179,000, for a grant from the U.S. Department of the Interior Fish and Wildlife Service Grant.

In November 1973, the U.S. Department of Interior established a red wolf captive-breeding program as part of the overall red wolf recovery program in the United States. The Nature Center is approved as an off-site holding facility for the red wolf and has had red wolves in its collection since 1991, and a new red wolf educational exhibit opened in 2009.

As part of the 2008 federal legislative process, Representative Heath Shuler introduced a bill to provide funding for the national Red Wolf Recovery Program located at the Point Defiance Zoo in Tacoma, Washington, and at the Nature Center. The bill was approved which allocated $179,000 to the City for the red wolf recovery program at the Nature Center.

The funds will be used to enhance the red wolf exhibit educational and display areas as well as to enhance the veterinary and isolation facility to assure quality health care for the red wolves.

The action complies with the City Council 2010-2011 Strategic Plan in that it supports fiscal responsibility of exploring alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding sources ensuring a high level of service in parks and facilities by addressing capital maintenance of existing parks and facilities to meet community standards.

Pros:

- Provide funds to support the overall operating cost of the Nature Center
- Provide funds to enhance special projects and services to Nature Center visitors

- Provide funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums

Con:
- None

Planned expenditures in the amount of $179,000 to enhance the Red Wolf exhibit at the Nature Center reflect one-time project costs and are fully funded with a grant in the amount of $179,000 from the US Department of Interior Fish and Wildlife Service Grant. Thus, there is no net fiscal impact to the City's budget.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget of $179,000 for the WNC Nature Center with a grant from the United States Department of the Interior Fish and Wildlife Service Grant.

ORDINANCE BOOK NO. 26 – PAGE 49

L. ORDINANCE NO. 3833 - BUDGET AMENDMENT FROM THE STATE OF N.C. DEPT. OF ENVIRONMENT & NATURAL RESOURCES THROUGH THE GRASSROOTS SCIENCE MUSEUMS COLLABORATIVE, FOR GENERAL NATURE CENTER IMPROVEMENTS

Summary: The consideration of a budget amendment, in the amount of $77,434.70, for the remainder of a grant from the State of North Carolina Department of Environment and Natural Resources through the Grassroots Science Museums Collaborative.

Each year the State of North Carolina allocates funds to the 25 to 30 member museums, science centers and nature centers in North Carolina for the Grassroots Science Museums Collaborative as supported by North Carolina Senate Bill 1741. WNC Nature Center is a member of the collaborative.

In FY 2009-2010, the City received $113,055.70 for the WNC Nature Center. City Council approved a budget amendment of $35,621 in November 2009 for a portion of the FY 2009-2010 grant to enhance Nature Center operations and to make improvements to the facility and animal exhibits at the Nature Center. This budget amendment will appropriate the remaining $77,434.70 to be used for the same purpose.

The action complies with the City Council 2010-2011 Strategic Plan in that it supports fiscal responsibility of exploring alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding sources ensuring a high level of service in parks and facilities by addressing capital maintenance of existing parks and facilities to meet community standards.

Pros:
- Provide additional funds to support the overall operating cost of the Nature Center
- Provide funds to enhance special projects and services to Nature Center visitors
- Provide funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums

Con:
- None

The existing project budget for one-time operational and facility improvements at the Nature Center will increase by $77,434.70. This increase is funded by a grant from the State of

North Carolina Department of Environment and Natural Resources through the Grassroots Science Museums Collaborative. Thus, there is no net fiscal impact to the City's budget.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to increase the project budget for Nature Center operational and facility improvements by appropriating $77,434.70 in remaining grant funds from the State of North Carolina Department of Environment and Natural Resources through the Grassroots Science Museums Collaborative.

ORDINANCE BOOK NO. 26 – PAGE 51

M. ORDINANCE NO. 3834 - BUDGET AMENDMENT TO COMBINE TWO PROJECT BUDGETS FOR THE CLINGMAN AVENUE STREETSCAPE PROJECT

Summary: The consideration by Council of a technical budget amendment, in the amount of $407,251, to combine two project budgets for the Clingman Avenue streetscape project into one single project to allow for more effective accounting and reporting of revenues and expenses.

In January 2004, Council approved a budget amendment to the City's Grant Fund in the amount of $172,131 to recognize a grant from the N.C. Dept. of Transportation (NCDOT) for West End/Clingman Avenue pedestrian improvements. In July 2005, City Council approved an additional budget amendment to the Grant Fund in the amount of $235,120 to recognize a second grant from NCDOT for the West End/Clingman Avenue project. This amendment brought the total budget in the Grant Fund for this project to $407,251.

With adoption of the FY 2007-08 capital improvement budget, Council approved an additional $500,000 from the City's General Fund for the West End/Clingman Avenue project. This $500,000 is budgeted in the City's General Capital Projects Fund. To allow for more effective accounting and reporting of revenues and expenses, staff is requesting that Council approve a technical budget amendment to move the $407,251 currently budgeted in the Grant Fund over to the General Capital Project Fund.

This action complies with the City Council Strategic Operating Plan to operate the City of Asheville's organization to the highest fiscal responsibility.

Pro:

- Will allow for more effective accounting and reporting of revenues and expenses

Con:

- None

The budgets for the Clingman Avenue Streetscape project were previously approved by Council so there is no fiscal impact with this action. Combining the two project budgets into one will allow for more effective accounting and reporting of revenues and expenses.

City staff recommends City Council approve the technical budget amendment.

ORDINANCE BOOK NO. 26 – PAGE 53

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Bothwell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

G. RESOLUTION NO. 10-83 - RESOLUTION OF SUPPORT TO BECOME A TARGET CITY FOR THE GOOGLE FIBER FOR COMMUNITIES FIBER-TO-THE-HOME PROJECT

Summary: The consideration of a resolution of support to become a target city for the Google Fiber for Communities fiber-to-the-home project.

The Economic Development Coalition has been working on responding to Google's RFI (Request For Information) for approximately a month.

The Google fiber project represents an opportunity for residents of Asheville to connect to the Internet at 100 times faster than incumbent telecommunications providers allow for. The RFI itself is available on the Internet: http://www.google.com/appserve/fiberrfi/.

This action ties in with City Council's strategic operating plan, specifically the "Job Growth" and "Economic/Community Development" areas.

Pros:

- Being a target city will add significant possibilities to Asheville's residents and businesses, such as enhanced telemedicine
- May provide significant economic development impact to the area
- Significant citizen interest

Con:

None noted at this time.

Fiscal Impact:

- No "in kind" match or other city funds are being sought by Google.
- Economic development / tax base improvements are thought to be fairly significant.
- Construction of the fiber network will likely bring jobs to the area
- The continued presence of the fiber network will also likely bring jobs and opportunities to residents and businesses

City staff recommends City Council adopt a resolution of support to become a target city for the Google Fiber for Communities fiber-to-the-home project.

Councilman Smith moved adopt Resolution No. 10-83 with the following language: "And to proclaim 1:30 p.m. on Thursday, March 25 a 'Google Moment.' At this time on the 25th the Asheville City Council invites all citizens, including our school children, employees, and business leaders to pause and fill out a community application in an effort to make Asheville the home of the Google Fiber Initiative." This motion was seconded by Councilman Bothwell and carried unanimously.

Mr. Ben Teague briefed Council on the efforts made to date on this effort. He urged the community to fill out an application at www.googleavl.com by March 26 to make Asheville the next home of the Google Fiber Network.

III. PRESENTATIONS & REPORTS:

A. CITIZENS-POLICE ADVISORY COMMITTEE UPDATE

Citizens-Police Advisory Committee Chairman Charlie Hume said that their mission is to (1) Serve as a liaison between the police department and community; (2) Mediate problems or conflicts; (3) Advocate for programs, ideas, and methods to improve the relationship between the police and community; and (4) Disseminate information to the community and government officials of Asheville.

He introduced the members from the Committee being Angelica Reza – North; Bob Smith – Central; Caesar Romero – West; Charlie Hume – South / Chairman; and Ron Maynard – East / Secretary. Asheville Police Department (APD) support includes Melissa Williams – Comm. Relations Mgr.; Chief Bill Hogan; and Lt. Sean Pound – Professional Standards. City Council's liaison is Councilman Jan Davis.

Some 2009 accomplishments include (1) Press Release (AC-T, La Voz); (2) Local Telephone (333-4801); (3) Email (ashevillecpac@gmail.com); (4) Community Outreach Meetings (a) Residents Council (Housing Authority); (b) Kenilworth Neighborhood Association; (c) Montford Neighborhood Watch; and (d) Gene Bell (Housing Authority - Dir.); (5) Bi-Monthly Meetings; (6) Increased Diversity; and (7) Youth Representation (Asheville High School).

Some 2010 goals include (1) Enhance Knowledge Base (a) Each member has committed to participating in Citizens Police Academy; (2) Quarterly Meetings (a) Feb, May, Aug, Nov; and (3) Taking It To The Streets Initiative (a) Minimum of (8) Community Meetings and (8) Each CPAC member is responsible for selecting target group and coordinating logistics.

Program focus will be (1) Disseminate Information (a) Tax dollars at work; and (b) Services provided; (2) Enhance Knowledge Base (a) Committee Members; and (b) Citizenry; (3) Facilitate Feedback (a) Concerns, ideas, methods; and (4) Build Relationships (a) Raise awareness; (b) Trust and (c) Continuity.

Target groups include homeowner associations, neighborhood watch groups, civic organizations, service clubs and special events.

Using the S.W.O.T Analysis, internal positive strengths include APD/Council support, Citizens Police Academy, Diversified Committee, City Neighborhood Coordinator and Community Resource Officers. Weaknesses include member participation, member attendance and knowledge of the APD.

Using that same analysis, external positive strengths include align with community policing, offer varied perspective of citizen needs, build relationships/trust; and continuity of communication. Weaknesses include mission duplication, unrealistic expectations and poor community awareness.

On behalf of City Council, Mayor Bellamy thanked Mr. Hume and the entire committee for their service.

At the request of Vice-Mayor Newman, Mr. Hume said that he would be happy to contact Councilman Russell, Chair of the Public Safety Committee, to have time set aside in the Public Safety Committee meetings to hear more about what the Committee is hearing from the community.

B. RIVER DISTRICT DESIGN REVIEW COMMITTEE UPDATE

Former Chair Pattiy Torno of the River District Design Review Committee said that their committee consists of seven volunteer community members and was created to promote redevelopment of Asheville's riverfront as an economic hub for the City and WNC. In addition, they review all major works projects within the City's River District, in accordance with the River District Design Review (RDDR) Guidelines utilizing a "mandatory review/voluntary compliance" structure.

Using a short film, she reviewed the items on their agenda in 2009, including (1) staff updated them on their project to digitize the RDDR Guidelines; (2) they met with the N.C. Dept. of Transportation regarding the new Biltmore Avenue bridge; (3) they worked with the Land-of-Sky Regional Council Brownfields Advisory Group and its site selection committee for both the RBI and City of Asheville Brownfields grant funds; (4) Mark Allison and Pattiy Torno toured the Swannanoa Watershed with the Flood Damage Reduction Task Force and RECNI; (5) staff updated them on the adoption of the new Digital Flood Insurance Rate Map (DFIRM) and the need for a new flood ordinance; (6) staff and WPC member Pattiy Torno updated them on the WPC Stormwater Ordinance recommendations to City Council; (7) Dan Baechtold reported on the N.C. Dept. of Transportation $600,000 grant for preliminary engineering on the City's roadways within the scope of the Wilma Dykeman Riverway Plan; (8) they encouraged and helped facilitate the development of the Asheville Riverfront Redevelopment Commission; and (9) they re-visited the Silverman project.

In response to Councilman Bothwell, City Attorney Oast explained the "mandatory review/voluntary compliance" structure.

On behalf of City Council, Mayor Bellamy thanked Ms. Torno and the entire Committee for their service.

C. GIFT FROM THE FRIENDS OF THE WNC NATURE CENTER

ORDINANCE NO. 3835 - BUDGET AMENDMENT FROM THE FRIENDS OF THE WNC NATURE CENTER TO RENOVATE THE OTTER EXHIBIT

Mr. Bob Pierce, Board member of the Friends of the WNC Nature Center, was pleased to present the City of Asheville with a check in the amount of $59,400 to be used for renovation of the existing otter exhibit and to create the new Brandon's Otter Falls Exhibit which will be completed in 2001. This gift was given by a former Friends member, Rennie Habel, whose beloved son Brandon died prematurely in November 2009. She and he loved nature together and they spent much of his growing up visiting the WNC Nature Center and neighboring facilities using the Friends' Reciprocal Zoo and Science Center Membership Benefit. She remembers this time fondly and wanted to memorialize Brandon's passion for nature by giving this wonderful donation to our community.

Ms. Sarah Oram, Executive Director, said that the Friends is happy to facilitate such gifts as well as use the money raised by selling memberships to provide further needed enhancements or improvements in 2010. This past year they have provided funds for a designer to upgrade all the major exhibit signs, purchased a new Reptile Habitat to replace the former Nocturnal Hall, bought materials for weatherization by AmeriCorps members of the two main indoor buildings at the Center, renovated the Education classroom from floor to ceiling, secured the donation of a $250,000 Laser Map exhibit from the now closed Grove Arcade Heritage Gallery and we have contributed funds to its installation at the Nature Center. They have applied for and received a grant from REI to start a hands-on "Science Backpack" program for both visitors and our local schools and contributed funds for a Visitor Survey for use by the Tourism and Development Authority to quantify the financial impact of the Center on our local economy. They have pursued non-funded grants from the Cannon Foundation, Vulcan quarry and others throughout this year.

Mr. Pierce said that additionally, the Friends have purchased advertising, printed newsletters and rack cards, developed and managed the website, wildwnc.org, and worked hard to raise the profile of this gem in our community, the Western North Carolina Nature Center. Since July 1, 2005 (when the City took over the Nature Center), the Friends have contributed $837,656 in items and services to support the Center and this does not count the work of their staff and their AmeriCorps intern in helping run an efficient operation for the Center's 2,500 member households, an estimated 11,000 individuals.

They appreciated being in partnership with the City of Asheville in improving the Nature Center and look forward to a non-competitive and efficient partnership in future efforts together.

At this time (5:53 p.m.), Councilwoman Manheimer and Councilman Russell arrived in the meeting.

Staff summary: The consideration of a budget amendment, in the amount of $60,375, for a contribution from the Friends of the Nature Center for the Nature Center.

The Friends of the Nature Center is a 501 (c) 3 non-profit organization whose purpose is to develop resources and raise funds to support the programs and enhancements at the Nature Center. The City has received a contribution of $60,375 from the Friends to include 1) $975 for the installation of the new lazar map exhibit, and 2) $59,400 for improvements to the otter habitat.

The action complies with the City Council 2010-2011 Strategic Plan in that it supports fiscal responsibility of exploring alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding sources ensuring a high level of service in parks and facilities by addressing capital maintenance of existing parks and facilities to meet community standards.

Pros:
- Provides funds to support capital improvements at the Nature Center
- Provides funds to enhance special projects and services to Nature Center visitors
- Provides funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums

Cons:
- None

A project budget authorizing one-time improvements to the Otter Habitat and a new lazer map exhibit will be established with approval of this staff report. The project budget will authorize expenditures up to $60,375. These expenditures will be fully funded with a donation from the Friends of the Nature Center in the amount of $60,375 that has been received; thus, there is no net fiscal impact to the City's operating budget.

City staff recommends City Council to adopt a budget amendment authorizing the City Manager to establish a budget for funds received from the Friends of the Nature Center in the amount of $60,375 to support installation of the lazar map exhibit, and to support improvements to the otter pond habitat.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 3835. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 55

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO AMEND A PREVIOUSLY APPROVED SIGN PACKAGE FOR THE ASHEVILLE REGIONAL AIRPORT

ORDINANCE NO. 3836 - ORDINANCE AMENDING A PREVIOUSLY APPROVED SIGN PACKAGE FOR THE ASHEVILLE REGIONAL AIRPORT

Mayor Bellamy opened the public hearing at 5:54 p.m.

Urban Planner Shannon Tuch said that this is the consideration of an ordinance amending the previously approved sign package for the Asheville Regional Airport. This public hearing was advertised on March 12 and 19, 2010.

On November 10, 2009, the Asheville City Council reviewed and approved an application from the Asheville Regional Airport for a variety of signage designed to accommodate the unique operational needs of the airport.

The overall request included:

- Parking lot & traffic control signs
- Wayfinding monument signs
- Monument entrance signs
- Vehicular directional signs

The follow-up applications for the approved signs included two free-standing monument signs that were larger than what had been previously approved through the sign package.

The following summarizes the request:

Approved North (S-A)
96 square feet total, including base & frame
8 feet-8 inches tall

Proposed:
111 square feet total, including base & frame (16% increase)
8 feet, 10 inches tall (nominal increase)

Approved South (S-P)
30 square feet total, including base & frame
5 feet tall

Proposed:
61.5 square feet total, including base & frame (105% increase)
6 feet, 8 inches tall (33% increase)

The requested increase came about as a result of testing and mock-ups where concern over the size and readability of the text for motorists resulted in a desired increase in the size of the sign overall. Staff will typically administratively flex final plans that deviate 10% or less from the originally approved plan. Sign S-A is not dramatically outside this parameter; however, sign S-P is more than twice as large and would require re-consideration by Council.

As discussed in the original report, the airport would normally be limited to one free-standing sign at 125 square feet and one attached sign of the same size. Given that the main sign falls within what would normally be permitted, staff supports this request and finds it reasonable. Additionally, given the size of the airport property and the unique nature of its operations, the additional sign square footage requested for the south (S-P) sign also appears reasonable.

In order for the airport to adequately and safely direct travelers in and out of the airport, staff finds this request to be reasonable.

Regarding the Strategic Operating Plan, this proposal most closely supports the goal of sustainability through improved identity and wayfinding supporting the economic viability of the overall project.

Pro:

- Provides a sign with text that will be more readable from a vehicle.

Con:

- None identified.

No direct fiscal impact to the City has been identified.

Staff recommends approval of the amendments to the sign package as proposed.

Mr. Alan Ditmore felt people should take train or buses, which will not use massive petroleum consumption.

Mayor Bellamy closed the public hearing at 5:59 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Newman moved for the adoption of Ordinance No. 3836. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 57

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL ZONING REQUEST FOR THE PROJECT IDENTIFIED AS THE LARCHMONT, LOCATED AT 785 MERRIMON AVENUE, FROM INDUSTRIAL DISTRICT TO URBAN RESIDENTIAL/CONDITIONAL ZONING DISTRICT FOR THE DEVELOPMENT OF A 60-UNIT APARTMENT COMPLEX, WITH A REQUEST FOR MODIFICATIONS OF THE DESIGN STANDARDS FOR ENTRANCE LOCATION, FRONT SETBACK AND BUFFER WIDTH RESTRICTIONS

ORDINANCE NO. 3837 - ORDINANCE APPROVING THE CONDITIONAL ZONING REQUEST FOR THE PROJECT IDENTIFIED AS THE LARCHMONT, LOCATED AT 785 MERRIMON AVENUE, FROM INDUSTRIAL DISTRICT TO URBAN RESIDENTIAL/CONDITIONAL ZONING DISTRICT FOR THE DEVELOPMENT OF A 60-UNIT APARTMENT COMPLEX

Mayor Bellamy opened the public hearing at 6:04 p.m.

Urban Planner Julia Cogburn said that this is the consideration of a conditional zoning request for the project identified as the Larchmont, located at 785 Merrimon Avenue, from

Institutional District to Urban Residential/Conditional Zoning District for the development of a 60-unit apartment complex, with a request for modifications of the design standards for entrance location, front setback and buffer width restrictions. This public hearing was advertised on March 12 and 19, 2010.

She said the subject property, 2.29 acres, is located within the city limits off of East Larchmont, east of Merrimon Avenue behind the Grace Station Post Office. It has a current address of 785 Merrimon Avenue. The property is currently vacant, is zoned Institutional, and is owned by Buncombe County. The site was formerly occupied by the Naval Reserve Center.

Property to the north contains the Grace Covenant Presbyterian Church and is zoned RS8 (Residential Single-Family, High Density District). To the south are properties zoned CBI (Community Business I) and RM8 (Residential Multi-Family Medium Density District) containing a financial institution, small commercial center, and a City of Asheville fire station and community center. The property to the west is zoned INST (Institutional) and contains the branch post office. To the east are single-family homes facing Melrose Avenue, zoned RS8.

The applicant, Mountain Housing Opportunities, Inc., is requesting the conditional zoning of the property. The request is for conditional zoning to URD (Urban Residential District - Conditional Zoning) CZ to allow for the development of a 60-unit residential rental community.

The sixty units in the proposed development are to be housed in two buildings, each with a footprint of 9,644 square feet. Each building has a total gross floor area of 28,725 square feet and is 29'6" in height (per the City of Asheville Unified Development Ordinance). At the highest point the structural height (as measured from the lowest point where the structure meets the ground to the top of the roof pitch) is 61 feet (Merrimon Avenue elevation). This structural height varies throughout the development.

The developer is proposing a mix of one- (32), two- (23), and three- (5) bedroom units for a total residential density of 28.4 units per acre, lower than the thirty-two (32) units per acre (up to 67 units) that could be permitted in the URD. Thirty-seven (37) units would be permitted under the current zoning of Institutional. A 1,120 square foot community building is also proposed for the development along with a play area and open space/courtyard. All of the units are proposed to meet the City's requirements for affordable housing.

The location of the boundary for the property has led to some confusion. Buncombe County mapping information shows the property line running alongside East Larchmont Road and indicates that there are 2.29 acres on the site. A recent survey (in plan documents) of the property shows the property contains 2.725 acres that includes the land containing East Larchmont and its right-of-way. For the purposes of computing density on the site and designing the project to meet City standards, the applicant did not include the .435 acres containing the road or road right-of-way. Should the project be approved the applicant is committed to working with the City of Asheville to resolve the lot size discrepancy so the development parcel will be as shown in Buncombe County mapping information.

In addition to deleting the .435 acres containing the road and right-of-way for purposes of calculating density, the developer also deleted from acreage figures a small portion of the site (.18 acres) located within a regulated steep slope area.

Access to the site is off of East Larchmont Road. Seventy-one (71) parking spaces are to be provided on site, although the URD zone would allow a minimum of thirty-three (33) parking spaces because the zoning district standards allow for a 50% reduction in required parking. In addition, the developer is proposing a sidewalk along its frontage which is intended to connect to Merrimon Avenue pending discussions with the postal service about obtaining an easement across their property to complete that connection. The developer has begun to initiate these discussions. The developer is also in discussion with Sun Trust Bank for overflow parking if it

becomes necessary. The developer has held several meetings with the neighborhood and adjoining property owners.

The developer is seeking three (3) development standard modifications for this project.

- The first request is for a reduction in the buffer width and plantings along the northern property boundary. The request is to reduce the buffer from the required thirty (30) feet to twenty (20) feet and to reduce some the of the required plant material (for plant health) in this reduced buffer. This plant material will be placed elsewhere on the site. This modification is requested due to site constraints and the desire of the developer to limit grading and work with the existing site layout. The parking in this area will be in line with the existing/former asphalt for the previous use of the site. This modification must be granted by the Asheville City Council.

- The second request is for a modification to the setback requirement for URD. The URD district standards provide for a maximum setback of fifteen (15) feet from the right-of-way. Due to topographic constraints, Building A and the Community Building would be placed from twenty-two (22) to six (6) feet further back from this maximum. The URD standards provide that the Planning and Development Director may increase the setback line based on an assessment of site constraints. Given the topographic constraints on the site this modification request has been granted.

- The final request is to the requirement for entrance locations in the URD. The requirement states that all buildings shall include a well-defined operable entrance at regular intervals not exceeding forty-five (45) feet. The proposed site plan shows two entrances along the front façade (one in Building A and one in the Community Building). There is also an access point along a covered walkway between these two buildings. Again, topographic constraints prevent additional entrances along the front building elevation. This modification must be addressed by the Asheville Planning and Zoning Commission. On March 3, 2010, the Planning and Zoning Commission granted this request.

Staff supports all of these modifications.

At their February 15, 2010, meeting, the City of Asheville Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation (with conditions) that the project be forwarded to the Asheville Planning and Zoning Commission. The developer has subsequently submitted additional information which addresses the bulk of the conditions.

At their March 3, 2010, meeting the City of Asheville's Planning and Zoning Commission (Commission) reviewed the conditional zoning request and made a positive recommendation (5-1) that the project be approved generally as submitted with the conditions as listed in the TRC staff report, the standard conditions listed on the staff report, and the following additional conditions:

- That the units be maintained as affordable units.
- That MHO escrow up to $9,000 to be used for traffic calming devices, including speed humps, along Edgewood Road between Merrimon Avenue and Kimberly Avenue. Conditions and procedures outlined in the existing City's Traffic Calming Policy still need to be followed as well as good traffic engineering principles related to the actual design and placement of traffic calming devices.

Thirty (30) people spoke at the hearing before the Commission. Sixteen (16) individuals spoke in favor of the development, and fourteen (14) people spoke against the development (with

four (4) of those representing groups). Most of the comments opposing the proposed apartments expressed concerns about traffic congestion and density.

This proposal has raised substantial community interest, both in support and opposition. Many attended both the TRC and Planning and Zoning Commission public hearing to express their views. The range of comments in support generally reflects the elements that support the 2025 Plan goals and the Council goals noted above. The range of comments in opposition to the proposal generally reflects concerns about traffic congestion and density.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**

   The project, if approved, must meet all the technical standards set forth in the City's Unified Development Ordinance and Standards and Specifications manual. The developer has been working closely with City staff to ensure compliance. The City of Asheville Fire and Rescue Department has been involved in the review of the project, particularly as it concerns the ability for rescue vehicles to gain ingress and egress from East Larchmont and are satisfied that life safety issues have been addressed. There is a traffic signal at the intersection of Merrimon Avenue and Larchmont Road that is equipped with emergency preemption. This allows Asheville Fire and Rescue to change the traffic signal to allow quicker egress onto Merrimon Avenue.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The proposed site is primarily flat, which appears to have been the result of grading when the Naval Reserve Center was built, resulting in significant topographic changes around the perimeter of the site. Given the already significantly altered terrain, the developer has been able to design the project to minimize further grading and maintain the existing land profile as much as possible.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

   The property as currently zoned (Institutional), allows a wide range of commercial, institutional or office uses, whereas, this proposal is to develop a multi-family residential community which is often viewed as an appropriate "buffer" between commercial corridor development and single-family housing. The property is surrounded by an equally wide range of use types and zones. The building design shown on the development plan depicts a project that should not injure the value of adjoining properties. The developer has worked with adjoining property owners to attempt to satisfy their wishes for landscaping of the development.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**

   The area surrounding the project site is varied in scale, bulk, and coverage of building firmly establishing a mixed use character in this general area (including a range of other

multi-family developments). The building footprints for the proposed development are comparable to many buildings along the Merrimon Corridor. Many non-Merrimon fronting developments contain larger footprints than the proposed development (Red Cross, SteinMart Center, Asheville Catholic School, Asheville Pizza and Grace Covenant Presbyterian Church). The proposal forms a moderate density residential transitional use between the mixed commercial/residential uses along and adjoining Merrimon, and the single-family residential neighborhoods beyond. Thus the proposed development contributes to the area's existing mixed use character, while providing a buffering use.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   The proposed use supports the 2025 goals and Council vision as follows:

   a. The goal of pursuing compatible infill development in places where infrastructure capacity exists or where it can be provided to accommodate a development.
   b. The goal of permitting and encouraging transit supportive density along and adjacent to major corridors and at logical transit nodes.
   c. The goal of promoting the use of green building techniques.
   d. The goal of providing affordable housing.

   Additionally, while not an officially adopted plan (City Council "accepted" the plan in June 2008) the *Affordable Housing Plan for the City of Asheville* identifies a number of strategic goals that the Larchmont project directly supports. Of important note is the very first recommendation outlined in the plan which reads:

   > *The City of Asheville, in partnership and collaboration with the entire Asheville community and area developers should set a goal to increase the supply of affordable housing units by 500 units a year over the next 20 years. Approximately 75% of these units should be rental units and many should be efficiency or 1-bedroom units.*

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**

   The proposed use is located off of a major thoroughfare in the City. Regular transit service is available along this corridor. Needed infrastructure is in place or can be provided to meet City standards.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

   The City Traffic Engineer has evaluated the project. Using accepted trip generation standards, it is projected that the project will generate a daily peak hour volume of 51 trips between 4-6 PM, and a morning peak hour volume between 7-9 AM of 33 vehicles. By comparison, recent turning movement counts and tube count data (taken along Larchmont and Long) show that currently, the daily peak hour in the area is between the hours of 12:00 noon and 2:00 PM. Since the projected peak hours for the project are at different times, the additional traffic should not cause an undue burden on Larchmont Road.

Pros:

- This project supports the City of Asheville's goal of pursuing higher density infill development along major traffic corridors with transit availability.

- The project provides for sixty (60) new affordable units.
- The project will be designed to meet a range of greenbuilding standards.
- The project will provide a new bus shelter and a sidewalk along its property frontage which is likely to be extended all the way to Merrimon Avenue.

Cons:

- The project will add traffic trips to Merrimon Avenue and increase traffic on Larchmont Avenue.
- The project may generate additional parking on Long and Larchmont.

Staff recommends approval of this conditional zoning request and the requested modifications. The TRC met to discuss this project on February 15, 2010, and recommended it to you with conditions, generally noted below, and as outlined in the TRC Report. The Planning and Zoning Commission held a public hearing on this matter and voted 5-1 to recommend this development to the Asheville City Council.

Additionally, based on the finding and analysis provided in the report, staff finds this request to be reasonable.

Ms. Cogburn said that there is a valid protest petition. In addition, Grace Covenant Presbyterian Church adopted a resolution of support for this development.

Mr. John Legerton, with Legerton Architecture, gave an overview of the design of the buildings from different views using a computer model. He also reviewed the elevation drawings.

Mr. Wyatt Stevens, attorney with Robert & Stevens, P.A., representing MHO, explained that MHO's proposal to change zoning from Institutional to Urban Residential District meets the criteria for conditional zoning. The proposed development is clearly compatible with all neighboring uses. He outlined some of the permitted uses in the current Industrial District noting that there is no height restriction, much higher potential impact and the only difference in density is units per acre – 16 (Institutional) vs. 32 (Urban Residential)/units per acre. Currently allowable 36 units might mean even greater density (1) 36 3-bedroom units equate to 108 bedrooms, more cars, more traffic, bigger parking problem and the same height issue vs. (2) MHO Larchmont equals 32 1-bedroom units, 23 2-bedroom units and 5 3-bedroom units = only 93 bedrooms, fewer cars, less traffic and no parking problem. He noted one concern raised was the project density was too much for north Asheville. The following is a list of properties north of I-240 placed in residential areas, noting that the density of the Larchmont is 27,022 sf/acre (1) 301 E. Chestnut - Princess Ann Hotel - 40,780 sf/acre; (2) 215 E. Chestnut, The Commodore – 48,473 sf/acre; (3) 116 E. Chestnut - 44,211 sf/acre; (4) 198 Kimberly - 26,205 sf/ft; (5) 30 Edgemont - Grove Park Apts - 63,984 sf/acre ; (6) 185 Macon - Longchamps - 28,135 sf/acre; and (7) 288 Macon - Fitzgerald - 28,978 sf/acre. He said this is not public housing and showed a picture of Aston Towers, which is public housing. Regarding affordability, he felt affordable housing will not be built under the existing zoning (1) development costs would be too high for only 36 units; (2) $1.8 Million purchase price for the land; (3) high quality, attractive construction costs money; (4) development would be ineligible for tax credits; (5) cost per unit could not be supported by affordable rents; and (6) would have to charge high rents to make the project cash flow. 2009 affordable housing developments approved for tax credits by NCHFA (1) average size for family development in cities > 50,000 population was 95.6 units; and (2) median size for family developments in cities < 50,000 population as 92 units. Using a chart, he explained that MHO doesn't buy land for less than 50 units for tax credit developments. He pointed out that the Urban Residential Zoning was "established to complement existing residential neighborhoods ... and is intended to be located on significant transit corridors and/or in high growth areas." He explained that the City Development Plan of 2025 specifically states that Merrimon Avenue should be Urban/Neighborhood Corridor from Hillside Street to Colonia Place. The definition of Urban/Neighborhood Corridor states in part "mixed-use structures, typically 2 to 4 stories in

height, contain retail, office, and residential uses that serve and are complemented by adjacent neighborhoods." From the 2025 plan it states that we need "increased accommodation of population growth within the City, particularly along commercial corridors." "It will require ... strong leadership and political courage, and an open and inclusive attitude on the part of its citizens to address this problem in an effective way." He then explained the low traffic input. According to the Institute of Transportation Engineers Trip Generation study, the 60 unit MHO Larchmont development would generate the following traffic impact: (1) average two way trip volume – 511 trips/day; (2) peak volumes for AM peak hour is 33 vehicles per hour (cars in and out) and peak volumes for PM peak hours is 51 vehicles per hour (cars in and out); and (3) maximum volume is less than one additional car/minute. He showed a comparison of the actual traffic flow in Northpoint Commons apartment complex, which has 9 more units and 48 more bedrooms than the Larchmont development, and it shows a lower vehicles per hour in both the AM and PM peak hours. He also provided information about comparable traffic for possible Institutional zoning projects (retail, medical offices and general office building) which showed higher traffic volumes during the peak hours. If City Council deems it necessary as a condition of the rezoning MHO is willing to escrow up to $10,000 to cover the cost of traffic calming on Edgewood, provided the City and the neighborhood can agree on the need for such devices. He said that MHO will escrow that amount, even if City Council does not make it condition. Regarding parking, he said it will not be a problem (1) under the City's guidelines for Urban Residential, only 33 parking spaces are required; (2) MHO Larchmont will have 71 spaces for 93 bedrooms in the complex; (3) according to the City's census statistics, 19% of people who rent apartments do not own cars; and (4) possible additional night-time parking at Sun Trust. He then explained the MHO parking study performed during March 5-9 for (1) Crowell Park which has 119 bedrooms and the average per night was 63 cars; and (2) Northpoint Commons which has 141 bedrooms with an average per night of 91 cars. The Larchmont will have 93 bedrooms with a predicted average per night of 57 cars and a predicted maximum number of 62 cars. He said the development will not materially endanger public health or safety in that (1) it meets all technical standards; (2) the Asheville Fire & Rescue Department approves the project and Fire Chief Burnette has no concerns; and (3) there is no crime or safety issue associated with MHO developments and Police Chief Hogan has no concerns. He explained that Partnership Property Management (who manages MHO's properties developed by MHO) utilizes a very through and complete screening process for prospective tenants. They obtain (1) criminal background check; (2) credit history check; (3) third party verifications of employment and income; (4) maximum number of occupants per unit; and (5) on-site property management and strict enforcement of lease requirements. He provided actual crime statistics for February 2009-February 2010 of crimes within 25 feet of MHO properties: (1) no crimes reported at Northpoint Commons; and (2) total of 16 crimes reported at 18 different MHO properties, including 394 living units. Typical crimes were larceny and vandalism. As a comparison, the Grace neighborhood had 88 crimes reported, including 33 crimes reported with 1,000 feet of the proposed development. The MHO Larchmont development is likely to improve the crime statistics in that neighborhood. He urged Council to support the project.

Mr. Larry Holt, property owner on Lockley Avenue, explained that he is a planner by education and has worked with housing, redevelopment, community and economic development programs for over 38 years. He has spent those years improving and developing affordable housing. He said the proposed conditional use rezoning and the increased density is a concern to the neighborhood. The developer's occupancy standards in the 60 1, 2 and 3 bedroom units would result in a maximum of 246 residents. The usable area of this property based on the Buncombe County survey is 1.65 acres. We feel the 60 units with the potential occupancy of 246 residents is excessive. The Plan indicates 71 parking spaces which is 1.1 car per apartment. This includes visitors, guests, management staff and maintenance staff. They indicated the requirement under this zoning would be 33 spaces and that is not realistic. Regarding the statistics noted by Mr. Stevens, he felt that 19% of apartment dwellers lease (not own) cars so they don't show up on the tax records. There are very few people who don't have cars. To achieve the proposed plan and provide minimal parking requires the construction of massive retaining walls which add significant visual mass to the development. Planning staff states that

the highest point of the structural height (as measured from the lowest point where the structure meets the ground to the top of the roof pitch) is 61 feet (Merrimon Avenue elevation). The actual height, based on the topographic information on the survey prepared by the developer indicates a height of 81 feet from above Merrimon Avenue. Regarding the property having a Merrimon Avenue address, the survey of the property indicates an appendage on the south side of the property that runs from the drive entrance of the fire station all the way down to Merrimon Avenue, between the Post Office and the bank. Mr. Stevens indicated that the developer did not intend to purchase this 40-foot appendage. When he checked with the County, there were not aware of that. Also the 20-foot easement for Larchmont is on the south side of this appendage. Less than half of Larchmont is within the 20-foot easement. We feel this matter should be resolved and the public property and legally dedicated right-of-way should be resolved before action taken rather than after the fact. Regarding traffic, City staff estimated the proposed development would generate an additional 500 trips per day. The traffic counts made were taken the last weekend in January and due to weather conditions, he questioned the accuracy of the counts. He felt the numbers are somewhat questionable but anyone traveling Merrimon Avenue is the morning, noon or early evening is aware of the congestion and adding this additional traffic will not solve that problem. He submitted that Council needs to resolve all TRC issues and determine how the corrections will be funded before you proceed with the rezoning. The only real control we have over the quality over the life of these residents is the density and what is proposed of 60 units on 1.65 acres is not acceptable and not in keeping with the 2025 plan. The older properties given as examples by Mr. Stevens were built 60-80 years ago and you would not be able to build them today. They have been accepted in the neighborhoods because they have been there for a long time. He also noted that until recently when making inquires about this proposed development has he been called several names. In summary, the development of affordable, workforce housing is not an issue. Their concern is the increased density, scale and mass of the proposal is not in keeping with the neighborhood. The increased traffic volume will exacerbate the existing traffic congestion and will create more vehicle and pedestrian conflicts and hazards.

Mr. James Gardner, resident of Lynmar Avenue, was speaking on behalf of those who signed the petition against the rezoning. "Over the past few months we learned about the developer's proposal, about the need for affordable housing, about the Larchmont site and the surrounding area. But there is much that we still don't know (1) whether or not the County seriously considered another public purpose for the land (perhaps at little or no cost to tax payers); (2) if the land was posted for sale for a fair amount of time or just for the sliver of time required for compliance; (3) if the estimated need for 744 units in North Asheville should be revised to reflect the current 2010 economy and housing situation rather than the 2008 projection; (4) the cost to taxpayers for infrastructure repairs and upgrades to accommodate such a large-scale project, in light of the growing deficit in the City's budget; and (5) why building 60 units is affordable but the developer, whose responsibility it is to maximize efficiency, cannot make less than 60 units work financially. They don't know because the process has not been entirely open to citizens. We do know that (1) there is no proposal for a strip mall, or a skyscraper, or a race track, or a gymnasium, or a space needle, or any other onerous red herring that some proponents want to throw in our path - and if there *were* such a proposal, City Council could exercise its authority to further restrict zoning for the site; (2) that the physical and social fabric of the neighborhood will be drastically and unnecessarily altered; and (3) that 60 apartments—two three-story buildings, one of which will tower over 60 feet in height—will be too big for the 1.65-acre site. Yet we are being asked to believe that the current zoning is incorrect, that a maximum of 32 units is somehow not dense enough for the site or for the goals of those crusaders for "urban density." That crusade should not come at the expense of the backbone of the city—residents of the old neighborhoods. Also, we should recognize that the drive toward urban density can have the unintended consequence of creating more sprawl because single-family housing is displaced or deemed less attractive to buyers who spread out to leave the density behind. The net carbon footprint is an increase, not a reduction. It is an awkward situation for the city. People of good will and good intentions on both sides of the debate are eager to do what's best. Many civic servants have devoted themselves to helping a worthy cause and a popular non-profit

organization. But the best solution, the best plan—a proposal that fits the current zoning—is not the one that is before the Council. It is an awkward situation, because the only germane issue is the scale of the project and whether or not it fits the site and the current zoning. What is before City Council is not a referendum on the greatness of the developer or on the socio-economic character and ideals of residents, or on the need for affordable housing. We have heard many (and we will hear more) glowing testimonials about the developer. While perhaps true, those are irrelevant smokescreens. The only relevant issue is the scale of the project. The City's technical review is riddled with troubling loose ends in every technical category, and at the end of the report suggested motions are offered for Council. How about a motion to insist that the developer submit an alternate plan that fits the scale of the site and the neighborhood? One thing the developer's proposal does get right: the addition of a bus shelter. Those of us who have ridden bus #2 know that there can be quite a wait for the next bus if you miss the hourly connection or if a bus is full. So it will be good to have shelter for that long wait (even though there is already a shelter a block away at the next stop). One member of City Council, in her campaign platform, bemoaned the lack of "strict development standards" in our zoning ordinances. Yet to conditionally rezone Larchmont would be a step away from that goal, not toward that goal. A developer's budget should not be the basis for zoning decisions. We must ask: What would be the risk of designing a 32-unit alternate plan, other than a bit of wounded pride in acknowledging that we initially were too ambitious? The site would then be used at its maximum density and for the worthy goal of providing affordable housing to more than 100 people. Neighbors who object to 60 units would support the smaller plan and join forces with the current proponents. New residents would not live in overcrowded conditions, and current residents would not have overly massive structures imposing over their backyards. Traffic—already congested—would not be maxed out beyond the limits of safety, and the concerned fire fighters at the Larchmont station would rest a little easier. The current zoning allows multi-family housing at a maximum of 16 units per acre. That zoning is meant to protect the character of old neighborhoods while allowing for reasonably moderate additions. That's the zoning that should be followed, the zoning that fits the "moderate density" designation of the current neighborhood. But, unfortunately, there is no alternate plan from the developer on the table. You don't have to read Henry David Thoreau to realize that a correct balancing of the moral equation tells us that the greater good does not always equal the greater mass. You know these planned buildings are too big for the site. Requesting conditional zoning is a clear, if implicit, admission that the plan is too big for the site. We all know the buildings are too big for the site. We should not act as if Asheville is twice as big as Asheville really is. Sixty units would be completely inconsistent with the residential neighborhood in that area. 'There is no similar use of the property anywhere in the vicinity. There is no good reason that this particular property should be conditionally zoned and placed into a category that would be unique for the area and is inconsistent with the surrounding and historical uses.' As two residents have written in the *Citizen-Times*, 'It is true that, with 37 units instead of the proposed 60, fewer tenants would be housed. One site, however, should not carry a disproportionate burden [to meet] the need for affordable housing in Asheville.' Please don't let the popularity and momentum of a successful non-profit enterprise rush the City into a bad decision. Let's heed the ancient proverb that says, *Before you buy shoes, measure your feet.* Despite all the mischaracterizations of those of us who question the scale of the project, and despite some hateful character attacks, the residents who live next to the site are working class people who have long contributed to the betterment of this city. They include: a special education teacher who is also a single mother; a high school teacher and his wife and children; an elderly Greek immigrant couple who are active gardeners and members of their church and who have lived there for 55 years. All those longtime residents and others have helped make the city the attraction it is to so many people who relocate here and need affordable housing. Do not ignore the neighborhood's root systems as you plant new residents. You have a dream opposition here—citizens who share your ideals and goals, citizens who voted for you, citizens who will be foot soldiers for you if you show willingness to compromise. What more could you want from an opposition? Think of us as a strange breed of friendly gadflies who don't sting but buzz just enough to make you choose a better course of action. Ignore us, however, and you risk losing the best allies you could have had. Do the right thing. Don't write your name in Asheville history as the City Council that refused to compromise on the Larchmont plan, which is too big for the site and too big for the neighborhood. Reject this

current plan, which reflects eagerness and good intent but ultimately lacks wisdom. Insist on a plan that puts us all on the same side of the issue and pushes us to work toward a more affordable, sustainable, neighborly city for all."

During the following public comment period, after the one hour limit (per Council's rules), it was the consensus of Council to continue with the public comment period; however, to limit speakers to 2 minutes.

The following individuals spoke in opposition to the conditional zoning request, basically noting that they are not opposed to affordable, workforce housing, but the increased density which will exacerbate the existing traffic congestion on Merrimon Avenue along with safety issues on Long Street and Edgewood Road:

Mr. Bill Van Cleve, resident on Melrose Avenue
Mr. Lawrence Hall, resident on Westall Avenue
Ms. Laura Bowers, north Asheville resident
Mr. Stan Taylor, resident on Colonial Place
Mr. John Combs, resident on Melrose Avenue
Ms. Tina Schwartz, resident on Edgewood Road
Mr. Gary Schwartz, resident on Edgewood Road
Ms. Sharon Moulds, resident on Melrose Avenue
Mr. Andrew Tashie, resident on Westall Avenue
Mr. Paul Willard, resident on Melrose Avenue
Mr. Dean Hittleman
Mr. Jack Krolak, resident on Woodward Avenue
Mr. Steve Rasmussen

The following individuals spoke in support of the conditional zoning request:

Mr. Mike Lewis, resident on Gracelyn Road
Mr. Robbie Sweetser, resident on Fenner Avenue
Mr. Danise Hauser, resident on Melrose Avenue
Mr. Paul Szurek
Mr. Steve Cochran, resident on Page Avenue
Ms. Robin Merrell, Sr. Housing Attorney at Pisgah Legal Services
Ms. Deborah Miles, resident on Westall Avenue
Mr. Christopher Dickson, resident on Reynolds Place
Mr. Dan March, resident on Woodvale Avenue
Mr. Robert Todd, resident on Lexington Avenue
Mr. George Peery, resident on Club Knoll
Ms. Beverly Nivens, resident on Melrose Avenue
Mr. Jonathan Stansell, resident on Piercy Street
Ms. Barber Melton, member of the Affordable Housing Task Force
Ms. Patty Beaver, representing the Council of Independent Business Owners
Mr. David Nash, member of the Affordable Housing Task Force
Ms. Beth Maczka, resident on Greenleaf Circle
Mr. Alan Ditmore, resident in Leicester
Mr. Mike Romero, resident on Sugerland Ridge

Mayor Bellamy closed the public hearing at 8:51 p.m.

City Attorney Oast said that a valid protest petition has been received and that 6 out of 7 Council members must vote in favor of the rezoning for it to occur. He said that remarks made about the County's sale of the property is not an issue before Council as it has nothing to do with land use. He reminded Council that if the property is rezoned the rezoning follows the land and MHO may not always be the property owner.

In response to Councilman Davis, Ms. Cogburn said that the property is still owned by Buncombe County.

In response to Councilwoman Manheimer, Director of Transportation Ken Putnam explained the City's effort to make the intersection of Long Street and Edgewood Road safer. He noted that mirrors are a fix for limited site distance and they have worked quite well. He explained the downside of making the intersection an all way stop (rubble strips are noisy) and another option of making Long Street one-way from Edgewood Road.

When Councilwoman Manheimer asked about MHO escrowing money for traffic calming on Edgewood, Mr. Putnam cautioned Council in setting a precedence of placing conditions to make traffic improvements on low impact projects (those that are anticipated to generate less than 100 vehicles per hour). If we do proceed with traffic mitigation, the City has a traffic calming policy (which may take several months) that will need to be followed. If this is a condition, then the devices should be put in before the Certificate of Occupancy is issued for the finished project.

Councilwoman Manheimer said that there are sidewalks only on a portion of Long Street and wondered if it is on the list of streets identified for future sidewalks. City Manager Jackson said that it is not on a list at this time.

Councilwoman Manheimer said that Public Works Director Cathy Ball has provided her with a figure of $25,000 for the sidewalks on Long Street. Ms. Ball also advised her that Long Street has varying widths and we may need to acquire some right-of-way to complete a sidewalk project.

Councilwoman Manheimer understood that MHO will try to put in a sidewalk on Larchmont from their site to Merrimon Avenue working with the Post Office. Mr. Putnam confirmed that if the Post Office gave MHO permission for the sidewalk, MHO could install the sidewalk to Merrimon Avenue.

In response to Councilwoman Manheimer about a sidewalk on Long Street, Mr. Putnam said that MHO's contractor could work with the City to put the sidewalk in, assuming the right-of-way was there. As a City, we can make the choice of building the sidewalk ourselves or allow a contractor to come in and do it.

In response to Councilman Bothwell, City Attorney Oast said that the City can work with the Post Office to ask if they can voluntarily address some of the back-up concerns regarding parking and the drop-boxes.

In response to Councilwoman Manheimer, Ms. Cogburn said that when City staff evaluates an application for a conditional zoning, they look at several things, including the number of bedrooms. Under the existing zoning, 37 units are allowed, which could be 37 3-bedroom units.

In response to Councilwoman Manheimer, Ms. Cogburn said there is a Housing Trust Fund loan proposal submitted by MHO, but that has not been reviewed by City Council. It will not come forward to Council unless this project is approved.

In response to Councilwoman Manheimer regarding notification, Ms. Cogburn said that we do more than required by State law. We have (1) sent notices to property owners within 200 feet of the project; (2) posted a "Z" sign to capture those that drive by; and (3) advertise in the newspaper. In this project, staff has spent an enormous amount of time communicating with people about this project. She feels that this has been a very open process with large turn-outs.

In response to Councilman Bothwell, Ms. Cogburn said Planning staff has reviewed the sketch-up images from the architect and felt confident in what was presented was accurate.

In response to Councilwoman Manheimer, Ms. Cogburn said that all infrastructure costs will have to be paid by the developer. When the developer goes back for final TRC approval, the waterline will have to be fully engineered to the satisfaction of the Water Resources Department.

In response to Councilman Russell, Mr. Stevens said that actual statistics on their occupancy show that their average residents per bedroom is 1.1 persons. In this development there will be approximately 103 people, not the 246 mentioned by Mr. Holt.

Councilman Bothwell felt this project might help to eliminate traffic congestion on Merrimon Avenue. He explained that when we get the higher density, we will be able to afford to run the buses every half-hour. Once we get half-hour buses, more people will use them. This is a piece of how we can build the City out to make transit work for everyone.

Councilman Smith felt the traffic concerns are important whether or not this project is constructed. He believed in increasing corridor density in order to incentivize affordable housing and sustainable growth in our community, especially on our transit lines. He felt this density will provide a buffer between the urban corridor and the established neighborhood. He felt these proposed buildings will come to be an integral a part of this neighborhood as those older buildings are to those neighborhoods. He felt this will provide a lot of people long-term affordability. To increase density on our urban corridors will decrease our energy use, decrease sprawl thereby preserving open spaces, decrease Asheville's carbon footprint, increase transit usage, increase our socio-economic diversity in downtown and fulfill some of the recommendations from the Affordable Housing Plan and the 2025 Plan. It will allow people who work in Asheville to be able to live in Asheville.

In response to Mayor Bellamy, Mr. Stevens reiterated the vetting process for applications.

When Mayor Bellamy asked if we could condition the project always have a reputable management company associated with the property, City Attorney Oast said that Council can specify that a property manager be there during the day along with a point of contact for all hours in order to respond to concerns.

Mayor Bellamy asked for a commitment that sidewalks would be constructed from the site all the way to Merrimon Avenue on Larchmont. Mr. Stevens said that they have spoken with the Post Office and they are open to the idea. Assuming the Post Office agrees, MHO will pay to install the sidewalk on Larchmont down to Merrimon Avenue.

In response to Mayor Bellamy, Mr. Tony Hauser, Civil Engineer for the project, explained the measures that would be installed to bring the site up to the City's stormwater standards.

In response to Mayor Bellamy, Mr. Stevens said that there was no way MHO could get tax credit financing for 36 units.

Councilman Davis felt that it was important to have overflow parking. Mr. Stevens presented a letter from Sun Trust Bank that they would look favorably upon leasing overflow parking spaces, however, they lease their property and their lease expires in October of 2012. They have been leasing that property since 1987 and they do have a lease extension available. He felt they can agree to the condition that we will negotiate in good faith with Sun Trust Bank to achieve extra parking, if needed. They will work in good faith with whoever owns the property.

In response to Councilman Russell, Ms. Cogburn explained as best she could of why the property is currently zoned Institutional. She recalled that when the UDO was being adopted in

the late 1990's staff was instructed to make as few non-conformities as possible. Because the Naval Reserve Center was on the property it was zoned Institutional.

Based on the findings and staff analysis provided in the report, Vice-Mayor Newman moved for the adoption of Ordinance No. 3837, approving the conditional zoning for the project identified as the Larchmont, located at 785 Merrimon Avenue to rezone from Institutional District to Urban Residential/Conditional Zoning District for the development of a 60-unit apartment complex, including approval for a request for modifications of the design standards for entrance location, front setback and buffer width restrictions, subject to the following conditions (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90-degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on the site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) That the units be maintained as affordable units; (7) That MHO escrow up to $10,000 to be used for traffic calming devices, including speed humps, along Edgewood Road between Merrimon Avenue and Kimberly Avenue. Conditions and procedures outlined in the existing City's Traffic Calming Policy still need to be followed as well as good traffic engineering principles related to the actual design and placement of traffic calming devices; (8) That sidewalk on Larchmont will be extended all the way to Merrimon Avenue contingent upon approval by the Post Office; (9) That MHO will continue negotiating in good faith to secure an option for overflow parking; and (10) That MHO provide a professional screening process for clients who apply to reserve a place at the development consistent with information presented at this meeting. This motion was seconded by Councilman Bothwell.

In response to Councilman Davis about resurfacing Larchmont, Mr. Putnam said that even though there are several pavements ahead of Larchmont, the developer will be making two utility crossings across Larchmont and when those repairs are made there will be some opportunity for road repair.

Councilwoman Manheimer asked City staff to make Long Street a priority for improvements, including a sidewalk.

Vice-Mayor Newman noted that in our pedestrian plan a street like Long Street would be a relatively low priority compared to some other areas. But, assuming this significant infill development is approved, he felt that Long Street would probably go up the prioritization list based on the demand compared to what was there in the past.

Mayor Bellamy was disappointed that throughout this process Mr. Holt and others were called names. When people have questions or don't always agree with something, people get upset. What makes Asheville great is to have people come to the table who have different opinions and be able to say what they believe. If people had not sent e-mails or voiced their concerns many of these questions would not have been asked about this project. She didn't want our community to become "one thought – one mind." It's not wrong to ask questions about who will be your neighbor. She apologized for the name-calling for those who stood up for a different opinion. She felt this project has been made better because of the dialogue. She felt this process was very transparent. She hoped that MHO will continue to communicate with their neighbors, perhaps with a newsletter, to let them know what is happening throughout the project.

The motion made by Vice-Mayor Newman and seconded by Councilman Bothwell carried unanimously.

At 9:50 p.m., Mayor Bellamy announced a short recess.

ORDINANCE BOOK NO. 26 – PAGE 62

It was the consensus of Council to move the new business items up to be considered before the unfinished business.

V. NEW BUSINESS:

A. RESOLUTION NO. 10-88 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPROVE THE USE OF DOWNTOWN STREETS FOR THE BELE CHERE FESTIVAL

Superintendent of Cultural Arts Diane Ruggiero said that this is the consideration of a resolution authorizing the City Manager to approve the use of downtown Asheville streets for the Bele Chere Festival.

The City of Asheville produces the annual Bele Chere Festival in downtown Asheville. The Festival requires that many downtown streets are closed prior to and during the three-day event and as downtown Asheville continues to develop adjustments to the festival layout are necessary.

The map shows the streets that will have festival activities as well as street closings and includes the use of the Ashville Civic Center.

The Festival layout is designed by the Parks, Recreation and Cultural Arts Department with approval by the Asheville Fire and Police Departments. This is the same footprint that was used at the 2009 Bele Chere Festival.

The Bele Chere Board considered the Bele Chere layout on October 7, 2009, and recommends its approval. The Recreation Board considered it January 1, 2010, and recommends to City Council to approve the Bele Chere layout.

The action complies with the City Council 2010-2011 Strategic Plan in that it supports fiscal responsibility of operating the city to the highest level of responsibility by identifying resources for strategic initiatives and creates meaningful performance measure for programs and services.

Pros:

- Allows the City the ability to communicate information about Bele Chere to the community in advance.

Con:

- It closes streets in downtown Asheville.

There is no fiscal impact to approving the festival layout.

Staff recommends City Council to approve a resolution authorizing City Manager to approve the Bele Chere festival layout as indicated by the festival map.

At the request of Mayor Bellamy, Ms. Ruggiero said that she would look at relocating the music stage from right in front of the Vanderbilt Apartments on Haywood Street.

At the request of Councilman Davis, Ms. Ruggiero said that they would work with the event organizer of the local sports car club, noting that the N.C. Dept. of Transportation would need to be included in the discussion as well.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 10-88. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 447

B. RESOLUTION NO. 10-89 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Public Art Board.

Ms. Jenny Bowen has resigned from the Public Art Board, thus leaving an unexpired term until December 31, 2011.

On March 9, 2010, City Council instructed the City Clerk to arrange interviews for Kathleen Lyons, Honor Moor, and Jaan Ferree.

After Council spoke highly of the candidates, Kathleen Lyons received 1 vote, Honor Moor received 5 votes and Jaan Ferree received 1 vote. Therefore, Ms. Moor was appointed as a member of the Public Art Board to serve the unexpired term of Ms. Bowen, term to begin immediately and expire on December 31, 2011, or until her successor has been appointed.

RESOLUTION BOOK NO. 32 – PAGE 449

Councilman Bothwell moved to rescind the appointment of Ms. Holly Shriner to the Planning & Zoning Commission because of the lack of transparency in the appointment process and the strong outcry from the community about that lack of transparency. This motion was seconded by Councilman Smith.

Vice-Mayor Newman raised the point of order that this item has not been noticed nor is it a part of the agenda. He would object to the motion as he felt we are violating the rules we have established as a Council on having items placed on the agenda. People who might have an interest in participating in this discussion have not been given the opportunity to come and participate.

Councilman Russell agreed with Vice-Mayor Newman. He understands the request; however, he felt Council should adhere to their rules for placing items on the agenda.

Councilman Bothwell said that under Roberts Rules of Order that you don't have to every potential motion on the agenda for a meeting. He deferred to City Attorney Oast as to whether or not he could make a motion.

City Attorney Oast said that the Mayor is the presiding officer and can rule motions in or out of order. Council's rules do provide for a motion to rescind as one of the motions a Council member can make. A motion to rescind is a main motion. Under Roberts Rules, if a motion to rescind is made without notice, as has occurred here, under some circumstances a supermajority would be required to adopt it. However, since all of Council is present, this will require a simple majority vote from Council. Ms. Shriner's appointment is not effective until April 1 and if Council wants to undue the appointment, they can rescind the action.

Mayor Bellamy said she would carry the motion through since there was a motion and a second. However, when we talk about transparency, this is contrary to the process.

Councilman Davis stated that Ms. Shriner received four votes and felt it wasn't proper to say she is not qualified because they were not transparent. Quite frankly, other candidates weren't any more transparent than she was. Council just didn't ask the right questions. He will not vote for removing Ms. Shriner.

Councilman Smith felt that points made are valid and in the future he will not be seconding motions that are brought to this body outside of the rules that we agreed upon at our retreat.

Mr. Steve Rasmussen felt that the Planning & Zoning Commission is an important body and one that the community needs to trust. He suggested Council rescind the appointment and allow Ms. Shriner to reapply.

Mr. Alan Ditmore felt that if applicants cannot serve on a board due to direct financial gain, the Council will never get anyone to serve on their boards.

Rev. Christopher Chiaronmonte felt there is an appearance of impropriety. He suggested Council rescind the appointment and let her reapply, after an evaluation of Council's appointment process.

Mr. Barry Summers said that since passion is created in land use issues, the bar for appointments needs to be set higher. He felt Council's appointment process was flawed and urged Council to rescind the appointment and start over again.

Mr. James Judd felt that Council should have diverse expertise on the board and noted that after reviewing all the potential candidates credentials, Ms. Shriner did not have any planning or zoning experience. He questioned Council's reasoning on why they voted in support of her appointment.

City Attorney Oast explained conflict of interest provisions.

Councilman Russell noted that all interviews were open to the public. Ms. Shriner stated that she was a property owner on Merrimon Avenue and was involved with local process during the Merrimon Avenue rezoning. If there is a project that falls under the conflict of interest provision she can recuse herself. He felt that she will be able to look at both sides without a predetermined position.

Vice-Mayor Newman objected to the assertion that the appointment process was not open. It is a process that is used all the time. Every single member of Council has the opportunity to interview any candidate who puts in an application. All candidate applications were before Council when interviews were decided on. The interviews held in an open, publicly announced meeting. Some members of the public do attend the interviews. The appointments are discussed in an open meeting and any member of Council has the opportunity to request the appointment be delayed and request more interviews. Ms. Shriner was not one of his votes; however, he rejected the insinuation that the appointment was not done in an open manner.

Councilman Bothwell wanted to make it clear that he made the motion not to remove Ms. Shriner per se. It's not that he's opposed to her serving on the Commission. What he found to be an affront was in the course of the interview she said that she was a property owner along Merrimon Avenue, but she didn't indicate that she had been attending meetings about the Deal Buick property at which the Unified Development Ordnance (UDO) was discussed. She seemed to present to him an innocence of any knowledge about the UDO, which he didn't think represented the facts. To the extent that that wasn't made clear, we were not participating in the kind of openness disclosure that the Governor and the legislature called for last year. As far as the potential for discussing it at the Council meeting, that was partly because he is a novice here

and didn't understand we were allowed to discuss it. Vice-Mayor Newman polled the members of Council without any nominations. That was his misunderstanding and had he known, he would have argued the case. He felt all that should have been done in a more public way. The interviews are a public meeting but no one attends them. The formal meeting is televised and this is where the information gets out to the people in the community. The interviews are not meaningful public, even though they are legally public. He has been getting a lot of feedback from the community who are real distrustful of the process. And it's because of that apparent lack of transparency that he made the motion. He then withdrew his motion and simply asked Ms. Shriner to withdraw her application and submit to reapplication. To him, this was not a transparent process.

VI. UNFINISHED BUSINESS:

A. RESOLUTION NO. 10-87 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A ONE-YEAR AGREEMENT WITH WNC COMMUNITY MEDIA CENTER (FORMERLY KNOWN AS URTV INC.) FOR THE MANAGEMENT OF PUBLIC ACCESS

At 10:25 p.m., Vice-Mayor Newman moved to excuse Councilwoman Manheimer and Councilman Russell from the remainder of the meeting. This motion was seconded by Councilman Davis and carried unanimously.

Director of Administrative Services Lauren Bradley said that this is the consideration of a resolution authorizing the Mayor to sign a one-year agreement with the WNC Community Media Center (formerly known as URTV, Inc.) for the management of public access.

At its meeting on January 26, 2010, the City Council directed staff to negotiate an agreement with URTV, now known as the WNC Community Media Center, for the management of public access. Council instructed staff to ensure the agreement clearly addressed (1) compliance with open meetings and public records law and (2) compensation and payment terms for the duration of the agreement. Council also requested staff provide information about the pros and cons of continuing to appoint members to the WNC Community Media Center board.

Staff has negotiated a one-year agreement with the WNC Community Media Center covering the period April 26, 2010, to April 26, 2011. Under the terms of the agreement, the City of Asheville will pay the WNC Community Media Center $60,000 for management of the public access channel. The City will disburse $60,000 in two equal payments of $30,000 on or before May 1, 2010, and September 1, 2010. In addition, the agreement includes clauses that require the WNC Community Media Center's compliance with standards set forth in North Carolina public records and open meetings laws. In exchange, the WNC Community Media Center will operate the public access cable channel and manage a media production facility available for public use.

Compensation

During the course of negotiating this agreement, the WNC Community Media Center originally requested $100,000 in compensation for managing the public access channel. The additional revenue was requested to hire a new full-time staff member and expand multi-media training and related services provided by the media center. This funding request, however, would exceed the total amount of PEG fees collected by the City during the contract period, and would require a General Fund allocation to make up the difference. Given current economic and budgetary conditions, staff recommends against increasing compensation beyond what PEG fees can support. They said that without the entire $100,000 they may not be able to sustain operations long-term into the future and that they will be seeking additional increase funding from Buncombe County.

Board Appointments

At the January 26, 2010, City Council meeting, staff recommended that City Council discontinue appointing members to the WNC Community Media Center board. Based on staff's recommendation, City Council asked for additional information about the pros and cons of appointing board members.

Programming on public access channels is constitutionally-protected by the First Amendment, and as such, governments cannot make editorial or content-based programming decisions. For this reason, public access channels are typically managed by third-party organizations like the WNC Community Media Center.

The WNC Community Media Center is a non-profit corporation with its own Articles of Incorporation and bylaws. The City of Asheville contracts with the WNC Community Media Center as a vendor to provide a service, management of the public access cable channel and media center. The contract serves as the city's mechanism to set forth performance requirements and standards for the WNC Community Media Center. Although the City has made appointments to the WNC Community Media Center board, those appointments do not make the WNC Community Media Center a public agency nor the board a public body.

The Council's appointments to the WNC Community Media Center board may give the City influence over decisions made by the board, including programming standards. Although this may be perceived as a benefit to the City, it also subjects the City to criticism and possible legal challenges arising from the Board's activities.

It is staff's recommendation that these decisions be made by a board that is entirely independent of city government. This recommendation is consistent with best practices in North Carolina. Staff has been unable to find another city in the state that makes appointments to the community's public access board.

A benefit of making appointments to the WNC Community Media Center board may be receiving regular updates on media center activities from appointees. Staff would recommend Council continue to name a Council liaison to the WNC Community Media Center for this purpose.

Pros:

- The agreement provides for the continued operation of a public access cable channel and public media center in Asheville.
- The agreement addresses concerns expressed by City Council regarding open meetings and public records, and clarifies the City's payment terms for management services.

Cons:

- The loss of the use of PEG funds for government television expenses currently covered by the City's General Fund.
- According to the WNC Community Media Center's director, the long-term financial sustainability of the facility will require increased revenue from the City and Buncombe County.

Under the proposed agreement, the City will pay the WNC Community Media Center $60,000 to manage the Public Access Channel. This payment will be offset by 60,000 in PEG fee revenue, which represents 60% of the total PEG fees collected by the City between FY 2009-2010 and FY 2010-11. Thus, there is no additional impact on the City's General Fund budget. PEG fees are collected from cable subscribers and must be spent on public, government, or education access activities.

City Attorney Oast said that under the federal law, the City is not permitted to exercise any control over content, with the exception of ensuring that content is not obscene. When there have been attempts made to do that, sometimes lawsuits are filed and the attempts to do that have been stricken down under First Amendment grounds. To the extent that the City would have appointments to a board like this, it might be seen as an attempt by the City to exercise some sort of editorial control over the content of the station and in his view would expose the City to being named as a defendant in one of the lawsuits, should something like that happen. We do have the ability, through the management agreement, if we think the station is being operated improperly, to exercise some degree of control over the contract, but he would not want us to be in a position of exercising editorial control.

Staff recommends that City Council approve the resolution authorizing the Mayor to sign the agreement with the WNC Community Media Center for management of public access. Staff further recommends removing the clause allowing City Council to make appointments to the WNC Community Media Center board from the agreement.

It was the consensus of Council to include in the management agreement the financial compensation of $60,000 with the inclusion of the language in the extension agreement related to open meetings and public records.

After a brief discussion, it was the consensus of Council to continue making appointments to the WNC Media Center Board and to include that as part of the agreement.

Mr. Alan Ditmore felt the membership fees were too expensive and the public records language should be retroactive.

Mr. Alan Rosenthal explained that he has a lifetime ban from entering the WNC Media Center offices. There is an appearance of impropriety and no transparency with this board. He urged Council not to extend this management agreement and asked for a letter of apology along with the trespass notice being rescinded.

Mr. John Blackwell noted that he too is banned from the WNC Media Center offices. He spoke in opposition to the current management of public access and hoped they would get a new manager.

Rev. Christopher Chiaronmonte spoke in support of the management agreement and felt staff is doing an excellent job. He said they are very busy and suggested Council appropriate the $100,000 they requested.

Mr. Steve Rasmussen urged Council to retain its membership on the board as the public does have the expectation of oversight.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 10-87, including (1) the $60,000 compensation; (2) language in the extension agreement related to open meetings and public records; and (3) Council to continue making appointments to the WNC Community Media Center Board. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 446

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Alan Ditmore urged Council not to cut family benefits, in order to provide same sex domestic partner benefits, because those benefits include health insurance, which include contraception.

The following claims were received by the City of Asheville during the period of February 26-March 18, 2010: Elaine Seymour (Water), David Hyatt (Water), Ryan Hanson (Streets), Robert Shroat (Sanitation), Mike Lintz (Water), Martha Calloway (Sanitation), Progress Energy (Streets), Bob Gelder (Streets), John Fry (Transit), Pat Huffernan (Fire) and Earl Lee Gray (Parks & Recreation).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:53 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – April 13, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

The Webelos Den of Cub Scout Pack 72 led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized (1) Dawa Hitch, Tim Jennings, Kevin Haughinberry, Dwain Taylor, Tony Chapman, Bernard McDowell, Battalion Chief John Presley, Captain Robert Singleton, Engineer Andy Randalls, Sr. Firefighter Carla Brank, Firefighter John Robertson, Captain Eric Velez, Captain Mike Russell, Lt. Wallace Welch, Lt. Jamee Crawford, Sgt. Stony Gonce, Megan Young, Jane Barbee, Mike Smith, Scott Sutton, Dwight Danner, Director Cathey Trimnal, Rick Thomas and Michael Kyle as key personnel that went above and beyond their job descriptions to deliver an exceptional level of public service during the major snow storm on December 18, 2009; (2) Assistant Fire Chief David McFee for the designation of "Chief Fire Officer" from the Commission on Professional Credentialing; (3) Athletics Program Supervisor Mark Halstead for receiving the Recreation and Parks Award by the N.C. Adult Soccer Association; and (4) Chief Financial Officer Ben Durant who is leaving Asheville after 12 years of service.

On behalf of City Council, Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

II. CONSENT AGENDA:

At staff's request, Mayor Bellamy pulled Consent Agenda Item "J".

At the request of Mayor Bellamy, Consent Agenda Item "D" was removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 23, 2010

B. RESOLUTION NO. 10-90 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO ACCEPT STATE FUNDS FOR THE OPERATING EXPENSES OF THE TRANSIT SERVICE ROUTE TO AND FROM THE TOWN OF BLACK MOUNTAIN

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to accept State Funds for the operating expenses of the transit service route to and from the Town of Black Mountain.

The NCDOT has agreed to contribute funds to be used for the operating expenses of transit service to and from Black Mountain and the Asheville Transit System has agreed to operate the subject service.

Route # 28 and the Black Mountain Trailblazer Route were established in 2002 following a collaborative effort between NCDOT and the Land-of-Sky Regional Council as a result of a number of the region's counties and municipalities who passed resolutions in 2000 asserting the need for fixed route bus service connecting urban areas not in close proximity to each other.

The subject service operates seven times a day, six days a week. All funding is provided by the State of North Carolina (maximum of $306,146), the Town of Black Mountain ($18,500), Mountain Mobility ($5,500), and Fare Box Revenue ($23,348). The total budgeted cost for Fiscal Year 2009-10 is $353,494 and the total cost also covers the pass-through funding to Mountain Mobility for the operation of their route in Black Mountain. These funds are programmed in the current transit operating budget, with no City funds being spent. Ridership on the subject route during FY 2008-09 was 55,038, up 30% compared to the prior year.

NCDOT is funding the route from November 1, 2009, to June 30, 2010, and has recently notified the City of Asheville that future funding for this route might be discontinued beginning next fiscal year. NCDOT has expressed concerns related to compliance with Intercity routes as defined in FTA Circular 9040.1F Section 5311 (f). The City of Asheville has made all efforts to address NCDOT concerns and to comply with such definitions. Following those criteria, the route was redesigned, including stops, scheduling, and fare structure, but proximity to the Town of Black Mountain makes it ineligible for Intercity funding (The Town of Black Mountain is in the same urbanized area as the City of Asheville).

City staff is currently exploring alternatives to be able to continue the route next fiscal year, but due to the level of funding, the route may suffer drastic service cuts or disappear completely.

This action complies with (1) the 2025 City Development Plan by helping to develop a transit system that is capable of meeting the needs of all residents and visitors to the region; (2) the current Strategic Plan by helping to establish and improve a multi-modal transportation plan including sidewalks, bicycle paths, traffic signal pre-emption, transit, and other system improvements; and (3) the Green Focus Area to "Establish a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit and other system improvements".

The Transit Commission supports the subject action.

Pro:

- Increased mobility for the citizens of Asheville both within and outside the city.

Con:

- There are no disadvantages to the City of Asheville.

The City of Asheville will receive State Funds in the maximum amount of $306,146 and other funds in the amount of 47,348 for a total of $353,494 to cover operating expenses of the

transit service route to and from the Town of Black Mountain. These funds are already programmed in the current transit operating budget, with no City of Asheville funds being spent. As such, no budget amendment is required.

City staff recommends adoption of the resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation for the acceptance of funds to be expended for service to and from Black Mountain.

Director of Transportation Ken Putnam responded to Mayor Bellamy's inquires regarding Warren Wilson funding for this route.

Mr. Putnam said that the funding is in danger on July 1 and they will be meeting with the N.C. Dept. of Transportation later this week.

It was the consensus of Council, at Mayor Bellamy's request, to send a letter to our federal legislators about Asheville not being recognized as an intercity route as it will affect the bigger funding issue of transit.

RESOLUTION BOOK NO. 33 – PAGE 1

C. RESOLUTION NO. 10-91 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN THE NATIONAL POLLUTION PREVENTION DISCHARGE SYSTEM PHASE II RENEWAL APPLICATION

Summary: The consideration of a resolution authorizing the City Manager to sign the National Pollution Prevention Discharge System (NPDES) Phase II Renewal Application in order to comply with the Environmental Protection Agency (EPA) Federal Non-Funded Mandate.

In 1998, EPA adopted a rule known as the NPDES Stormwater Phase II rule. This rule applies to all municipalities with a population less than 100,000 that own or operate a Municipal Separate Storm Sewer System. The City currently is a Phase II compliant city and must renew this permit. The permit is renewed every 5 years.

The NPDES Phase II requirements include continuing to implement the following: Public Education and Outreach, Public Participation and Involvement, Illicit Discharge Detection and Elimination, Construction Site Runoff Control, Post Construction Runoff Control and Pollution Prevention and Good Housekeeping measures.

This action aligns with the Green and Sustainable goal from Council's strategic plan, in that it (1) Provides environmentally sustainability by protecting water quality in our area; (2) Provides protection to downstream property owners by regulating the water quantity that discharges from developments; and (3) Provides community outreach and education related to stormwater quality for the community.

Pros:

- The City will satisfy all current State and Federal minimum requirements for participation in the NPDES Phase II program
- The City is already a Phase II city and will continue to promote water quality
- The City will promote water quality in our area

Con:

- The NPDES program is a non-funded federal mandate to the City.

This program is funded through the stormwater enterprise fund. The current cost to meet the requirements of this program is approximately $1.62 million. No additional impact is expected by the renewal.

City staff recommends that City Council adopt the resolution authorizing the City Manager to sign the National Pollution Discharge Elimination System Phase II Renewal Permit Application and any other paperwork necessary to comply with the EPA Federal Non-Funded Mandate.

RESOLUTION BOOK NO. 33 – PAGE 2

D. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE DOWNTOWN AFTER 5 EVENTS ON MAY 21, JUNE 18, JULY 16, AUGUST 20 AND SEPTEMBER 17, 2010

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE ALL GO WEST FESTIVAL ON APRIL 24, 2010

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE ASHEVILLE EARTH DAY EVENT ON APRIL 17, 2010

These items were removed from the Consent Agenda for individual votes.

E. RESOLUTION NO. 10-95 - RESOLUTION AUTHORIZING THE MAYOR TO RENEW THE JOINT COOPERATION AGREEMENT WITH THE ASHEVILLE REGIONAL HOUSING CONSORTIUM

Summary: The consideration of a resolution authorizing the Mayor of the City of Asheville to renew the Joint Cooperation Agreement with the Asheville Regional Housing Consortium.

Recertification of the Consortium is necessary to access US Department of Housing and Urban Development HOME Partnership Act funds. The City of Asheville receives approximately $1.4 million annually from this source. These funds directly support affordable housing projects in Asheville and the four county Consortium, and leverage an average of $9 of other funds for every $1 of HOME funds invested.

A. Asheville Regional Housing Consortium

A consortium of area local governments is entitled to receive funding from the U.S. Department of Housing and Urban Development under the HOME Investment Partnerships Act that they would be unqualified to receive individually. A cooperative regional approach to providing housing avoids duplication of effort and promotes a more effective delivery of services.

In 1993, the City of Asheville and other units of local governments in Buncombe, Henderson, Madison, and Transylvania Counties formed the Asheville Regional Housing Consortium, enabling the City of Asheville to receive and administer HOME funds on behalf of the Consortium.

B. Recertification

In order to the Asheville Regional Housing Consortium to continue to receive federal funding, The U.S. Department of Housing and Urban Development requires such Consortia to be

formally re-designated every three years. The Mayor must execute the agreement re-designating the City of Asheville as a member of the Consortium for another three year period.

This resolution supports City Council's Strategic Plan in the area of affordable housing. Renewing the Joint Cooperation agreement with the Asheville Region Housing Consortium will continue the City of Asheville's efforts to offer a standard of living that is affordable and attainable for people of all income levels, life stages and abilities."

Pros:

- The City of Asheville will continue to receive approximately $1.4 million in HOME Partnership Act funds that directly support affordable housing projects.
- The City of Asheville will maintain its status of lead entity for an additional three years in the Asheville Regional Housing Consortium continuing a joint cooperation with local municipalities avoiding a duplication in effort and promoting a more effective delivery of services.

Con:

- There are no cons to renewing this Agreement.

Participation in the Asheville Regional Housing Consortium will allow the City of Asheville continued access to approximately $1.4 million in funds that directly support affordable housing projects.

City staff recommends the Mayor support the continuation of participation in the Asheville Regional Housing Consortium for a further three year period by executing the Recertification Agreement.

RESOLUTION BOOK NO. 33 – PAGE 12

F. RESOLUTION NO. 10-96 - RESOLUTION AMENDING THE 2010 CITY COUNCIL MEETING SCHEDULE TO BEGIN THE MAY 11, 2010, FORMAL CITY COUNCIL MEETING AT 4:00 P.M.

In response to Councilman Bothwell, Economic Development and Civic Center Director Sam Powers explained that on May 11 there is an opportunity to showcase the Civic Center in full function. He said that the Civic Center Commission will be sending out an invitation to various elected officials to a reception (with sponsors underwriting the cost of the event) to observe the economic impact that a sold-out concert has on the downtown area on a Tuesday night.

RESOLUTION BOOK NO. 33 – PAGE 13

G. RESOLUTION NO. 10-97 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE ANY AND ALL DOCUMENTS RELEASING COMMUNITY ACTION OPPORTUNITIES FROM THE DEED OF TRUST AND PROMISSORY NOTE FOR PROPERTY LOCATED AT 25 GASTON STREET UPON COMPLETION OF THE REID CENTER ANNEX ROOF REPLACEMENT

Summary: The consideration of a resolution authorizing the City Manager to execute any and all documents that will release Community Action Opportunities (formerly known as Opportunity Corporation of Madison-Buncombe Counties) (herein "CAO") from the Deed of Trust and Promissory Note for property located at 25 Gaston Street upon CAO's successful completion of the roof replacement of the Reid Center Annex.

By Resolution No. 98-36, City Council authorized the exchange of real property between the City and CAO which involved the real property owned by the City located at 25 Gaston Street in March of 1998. Pursuant to the terms and conditions of the purchase agreement, CAO was to provide: 1) $10,000 payable at the time of transaction, and 2) a promissory note of $26,000 consisting of $10,000 cash plus a donation of building materials in the equivalent of $16,000 for a foot bridge to span Town Branch as a connector to the future Town Branch Greenway. As part of that exchange, CAO executed a Promissory Note and a Deed of Trust against the property, recorded in Deed Book 2010 Page 579, in order to secure the payments to be made to the City. CAO fulfilled the cash payment totaling $20,000 but has not fulfilled the donation of $16,000 in building materials since the Town Branch Greenway has not been constructed. The greenway corridor was reconfigured and the foot bridge is no longer needed.

CAO leases the Reid Center Annex from the City in which it operates the Lonnie Burton Head Start Center. The annex is located at 133 Livingston Street adjacent to the 25 Gaston Street property. The roof on the center has outlived its useful life and leaks during rain events causing interior building damage.

CAO proposes utilize the value of the $16,000 in building materials stated in the promissory note and Deed of Trust and Promissory Note and apply it to the roof replacement cost of the Reid Annex. CAO will use the $16,000 value plus a grant they will receive from the American Recovery Reinvestment Act to pay for the Reid Annex roof replacement at no cost to the City.

Once the project is complete, CAO will donate the roof to the City. Upon donation, the City would release CAO from the Deed of Trust and Promissory Note.

The action complies with the City Council 2010-2011 Strategic Plan in that it supports fiscal responsibility of exploring alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. The action further complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department resources with alternative funding sources ensuring a high level of service in parks and facilities by addressing capital maintenance of existing parks and facilities to meet community standards.

Pros:

- Provide a funding source to support capital improvement to the Reid Annex, a city-owned building.
- Supports the standards of maintenance and capital improvement to meet community expectations.

Con:

- None

The expenditure for the roof replacement will be fully funded by CAO and with no expense to the City; thus, there is no net fiscal impact to the City's operating or capital improvement budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute any and all documents that will release CAO from the Deed of Trust and Promissory Note for property located at 25 Gaston Street, upon CAO's successful completion of the roof replacement of the Reid Center Annex.

RESOLUTION BOOK NO. 33 – PAGE 14

H. ORDINANCE NO. 3838 - BUDGET AMENDMENT TO COVER THE COST OF SNOW STORMS

Summary: The consideration of a budget ordinance amendment, in the amount of $295,020, from Fund Balance to cover the cost of snow storms.

During the period December, 2009 to the end of February, 2010 the City of Asheville experienced higher than expected snow fall and prolonged freezing temperatures. We received 29.4 inches of snow whereas the median snowfall for Asheville is 13.3 inches.

During the budget process we estimate winter event costs based on the median snowfall and what we have experienced the past few years. During the winter storms for 2009 – 2010 budget estimates were over expended in order to pay overtime, purchase salt and sand, and repair and fuel vehicles. Funds were transferred from accounts which normally would be utilized for repairing and maintaining infrastructure needs such as concrete curb, concrete sidewalks and paving etc. Without reimbursement to these affected accounts, further detrimental effects will occur to our infrastructure.

The winter storm from December 18 – 23, 2009 was declared a disaster under declaration number FEMA 1871 DR NC. Staff have completed consultations and calculations with FEMA field staff and arrived at a total of $368,035.62. There are additional checks and balances FEMA is required to perform, before approving, however, there usually isn't much difference if any to the initial totaled submitted. In an ideal situation the FEMA funds would offset the additional expenditures if received immediately, unfortunately, the funds probably will be received the latter part of the current fiscal year or the beginning of the next fiscal year. The reimbursement time frame will not allow planned repairs and maintenance to our infrastructure in our current fiscal year. Allowing a budget amendment utilizing fund balance will allow maintenance and repairs to continue in a timely manner, with the end result fund balance will be reimbursed when FEMA funds are received.

Table of Costs

	Budget	**Actual**	**Estimate**	**Total**
Material	$70,000	$191,037		($121,037)
Overtime	$46,577	$94,890		($48,313)
Fleet	$41,000	$117,687	$17,000	($93,867)
Tip Fees	$7,917	$22,265		($14,348)
Other			$17,455	($17,455)
Totals	$165,494	$428,391	$34,455	($295,020)

This action complies with the City Council Strategic Operating Plan, Fiscal Responsibility sustaining meaningful performance levels for programs and services.

Pros:

- Maintenance and repair of infrastructure will be maintained at initial budget levels allowing for repair and maintenance needs.
- FEMA funds received will offset the transfer of funds from fund balance.

Cons:

- Without transfer of funds to the identified accounts infrastructure will further deteriorate.
- Fund balance is temporarily reduced $295,020.

Fund balance is temporarily reduced by $295,020 but will be replenished when FEMA funds are received.

City staff recommends City Council adopt the budget amendment to appropriate fund accounts.

Administrator of Public Works Services Richard Grant responded to Mayor Bellamy when she asked about state and federal reimbursements.

ORDINANCE BOOK NO. 26 – PAGE 67

I. ORDINANCE NO. 3839 - BUDGET AMENDMENT TO SUPPORT RECREATION PROGRAMS

Summary: The consideration of a budget amendment, in the amount of $10,543, from a contribution from the Asheville Parks and Greenways Foundation, to support recreation programs.

The City of Asheville in the Parks, Recreation & Cultural Arts Department received a contribution of $10,543 from the Asheville Parks and Greenways Foundation. These funds flow to the designated programs at the request of the donors. These funds will go to support programming in the following areas:

$2,726 to support general programming at the Aston Park Tennis Center.

$7,817 to support general programming in the Recreation Division.

This action complies with the Parks, Recreation, Cultural Arts & Greenway Master Plan in that it makes use of diverse funding sources for successful implementation in the delivery of parks, recreation and cultural art services.

Pro:
- Provide funds to support parks, recreation and cultural arts programming enhancements

Con:
- None

The City's Fiscal Year 2009/10 budget for Parks, Recreation and Cultural Arts will increase by $10,543. This increase is funded by $10,543 in contributions from the Asheville Parks and Greenway Foundation. Thus, there is no net fiscal impact to the City's budget.

Staff recommends City Council to adopt a budget amendment authorizing the City Manager to increase the Parks, Recreation & Cultural Arts budget by $10,543 consisting of $2,726 for Aston Park Tennis Center, and $7,817 for the Recreation Division.

ORDINANCE BOOK NO. 26 – PAGE 69

J. MOTION SETTING A PUBLIC HEARING ON APRIL 27, 2010, TO CONSIDER AN INSTALLMENT PURCHASE CONTRACT FOR CONSTRUCTION OF THE LIVINGSTON COMMUNITY CENTER, SWIMMING POOL IMPROVEMENTS AND THE ACQUISITION OF LARGE VEHICLES

This item was deleted from the Consent Agenda for consideration.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Manheimer moved for the adoption of the Consent Agenda, with a letter being sent to our federal legislators regarding Asheville's designation of an intercity route. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

D. RESOLUTION NO. 10-92 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE DOWNTOWN AFTER 5 EVENTS ON MAY 21, JUNE 18, JULY 16, AUGUST 20 AND SEPTEMBER 17, 2010

RESOLUTION NO. 10-93 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE ALL GO WEST FESTIVAL ON APRIL 24, 2010

RESOLUTION NO. 10-94 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE ASHEVILLE EARTH DAY EVENT ON APRIL 17, 2010

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the (1) "Downtown After 5" outdoor special events; (2) All Go West Festival on April 24, 2010; and (3) Asheville Earth Day event on April 17, 2010.

- The Asheville Downtown Association has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at "Downtown After 5" and allow for consumption at this event.

  "Downtown After 5" will be held on Friday, May 21, June 18, July 16, August 20 and September 17, 2010, from 5:00 p.m. to 9:00 p.m. within the boundaries of the 100 block of Lexington Avenue, as per the event area limits referenced on the accompanying site map.

- Dogwood Alliance in conjunction with Yellow Dog Entertainment, LLC has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the All Go West Festival and allow for consumption at this event.

  The All Go West Festival will be held on Saturday, April 24, 2010 from 12:00 p.m. to 10:00 p.m. within the boundaries of Westwood Place, Waynesville Ave. & Michigan Ave. and will be free and open to the public.

- Lake Eden Arts festival in conjunction with Mountain Roots Management has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at "Asheville Earth Day" and allow for consumption at this event.

  "Asheville Earth Day" will be held on Saturday, April 17, 2010 from 11:00 a.m. to 10:00 p.m. within the boundaries of Martin Luther King Jr. Park and will be free and open to the public.

These actions have no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for the Asheville Downtown Association, the Dogwood Alliance and the Lake Eden Arts Festival

Con:

- Potential for public safety issues

For the "Downtown After 5" events, the fiscal impact will be overtime pay for Asheville Police officers per City co-sponsorship agreement. There is no fiscal impact to the All Go West Festival or the Asheville Earth Day festival.

City staff recommends City Council adopt the resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the "Downtown After 5" events, the All Go West Festival and the Asheville Earth Day Festival.

Vice-Mayor Newman moved for the adoption of Resolution Nos. 10-92, 10-93, and 10-94. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION NO. 10-92 - RESOLUTION BOOK NO. 33 – PAGE 3
RESOLUTION NO. 10-93 - RESOLUTION BOOK NO. 33 – PAGE 6
RESOLUTION NO. 10-94 - RESOLUTION BOOK NO. 33 – PAGE 9

III. PRESENTATIONS & REPORTS:

A. CIVIC CENTER COMMISSION UPDATE

Mayor Bellamy was saddened to note that long-time Civic Center employee Freddie Chapman has passed away unexpectedly earlier this week. Mr. Chapman was a great employee and a great person, and he will be missed by his co-workers and family. She asked everyone to keep Mr. Chapman's family in their thoughts. On behalf of City Council, she expressed Council's deepest sympathy to Mr. Chapman's family.

Chairman Mike Burke introduced the Commission members of John West, George Keller, Elizabeth Jones, John Broadbooks, J.L. Thompson and Joel Storrow.

The Commission aligns with Council's strategic plan under financial sustainability; facility improvements; event quality and diversity; community relations; and job development.

Using a chart, he showed the 2009 venue usage along with the breakdown of the diversity in the 2009 events.

He highlighted the partnership with Bele Chere for facility usage. Their image enhancement supports the strategic plan and targets local and regional media.

The Go Green Initiative includes (1) biodegradable cups; (2) increased recycling of plastics; (3) increased recycling of containers; and (4) grant application for pilot project between Civic Center/Sustainability Office.

Regarding the Thomas Wolfe Auditorium, we are building relationships with the Asheville Area Center for the Performing Arts.

Regarding the Capital Improvement Program (CIP), (1) The Commission was instrumental in launching the much needed roof project which is expected to be completed in May 2010; and (2) Civic Center CIP is critical to continuing capital improvements that are required to obtain high attendance, high visibility, events, etc.

Cooperative actions include (1) Working with the City Manager, the Commission helped define the qualifications to be used when evaluating applicants for the Civic Center's Director position; and (2) In conjunction with the Civic Center staff, the Commission assisted with prioritizing items for future Capital Improvement Plan requests; customer input was gathered through patron facility questionnaires.

Social media includes (1) Additional marketing and public relations as per strategic plan; (2) Social media is a key platform; and (3) Special offers for Facebook fans.

Regarding economic impact, regional events draw 50% from ≥ 75 miles. Local events create impact for restaurants and retail. A key event was the Avett Brothers Concert on New Year's Eve.

Significant future opportunities include (1) Southern Conference bid; (2) possible future Big South bid; and (3) increased programming from promoters.

The future is bright for the Civic Center.

In response to Vice-Mayor Newman, Mr. Burke explained the Southern Conference bid and said that short-term we need locker rooms, scoreboards, electrical and seating in the arena.

Councilman Davis said that they are developing a coalition of different partners for the Southern Conference bid and will be bringing it forward to Council soon.

On behalf of City Council, Mayor Bellamy thanked Mr. Burke and the entire Commission for their efforts on the Commission.

B. ECONOMIC STIMULUS PACKAGE UPDATE

ORDINANCE NO. 3840 - BUDGET AMENDMENT TO SET UP PROJECT BUDGETS FOR AN ARRA-FUNDED COMMUNITY DEVELOPMENT BLOCK GRANT AND A COMMUNITY DEVELOPMENT BLOCK GRANT FOR THE CONSTRUCTION OF SIDEWALK ON NORTH LOUISIANA AVENUE

American Recovery & Reinvestment Project Manager Brenda Mills updated Council on the following applications for the economic stimulus package.

She said that as part of City staff's recurring American Recovery & Reinvestment (ARRA) staff is seeking approval of two technical budget amendments, in the amount of $123,648, for an ARRA-funded Community Development Block Grant and a regular Community Development Block Grant, in the amount of $117,000, for construction of sidewalk on North Louisiana Avenue.

The grant of CDBG-R and CDBG funds for these projects was approved by City Council in May 2009. Because the City is considered a sub-recipient of these CDBG grants, a technical budget amendment is needed to set up these project budgets so that the city can spend the granted funds.

The City has received funding from an ARRA-funded Community Development Block Grant (CDBG-R) and a regular Community Development Block Grant Department for the N. Louisiana sidewalk project. The portion of the project using the CDBG-R funds is ready for construction. City Public Works crews will install sidewalk, curb and gutter, and underground drainage structures along the west side of N. Louisiana Avenue from Patton Avenue north to the cemetery entrance. The next phase of this project will extend the sidewalk to the existing stretch of sidewalk at 370 N. Louisiana Avenue. That phase is not yet ready for construction. Funding to

continue the sidewalk north to the city limits has not yet been identified. These sidewalk segments are part of a larger cooperative project to eventually bring sidewalk from Patton Avenue to Mosswood Road near Emma Elementary School. City Council has already approved the budget amendments for the three other grants that have been awarded to the city on behalf of the larger project.

This project supports the City Council's strategic plan sustainability goal of fully leveraging funding from the State and other funding sources for regional transportation improvements.

The grant will cover 100% of the costs of the N. Louisiana Avenue Sidewalk Project, so there is no impact on the City's current General Fund budget. Additional funding is being sought to continue the sidewalk north to the city limits as this has not yet been identified.

Pros:

- Improves city transportation facilities by building sidewalk and by improving pedestrian connections to transit routes.
- Provides long term investment in the City's infrastructure.

Con:

- None

City staff recommends City Council adopt these technical budget amendments, in the amount of $123,648, for an ARRA-funded Community Development Block Grant and a regular Community Development Block Grant, in the amount of $117,000, for construction of sidewalk on North Louisiana Avenue.

In response to Vice-Mayor Newman, Mayor Bellamy noted that the sidewalk would be from Patton Avenue all the way up to Emma Elementary and a little beyond that into the residential area – noting the different sources of funding.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3840. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 71

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF 97 UNDERWOOD DRIVE

ORDINANCE NO. 3841 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE BY ANNEXING ONE LOT AT 97 UNDERWOOD DRIVE

Mayor Bellamy opened the public hearing at 6:03 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance extending the corporate limits of the City of Asheville by annexing one lot at 97 Underwood Drive. This public hearing was advertised on April 2, 2010.

Larry Holbert and Ronnie Gray (L & R Rentals) have petitioned the City of Asheville for the annexation of one (1) lot located at 97 Underwood Road in South Buncombe County containing a total of approximately 1.96 acres. The area is not contiguous to the primary corporate limits but is contiguous to the satellite corporate area at the Asheville Regional Airport. The area is subject to the standards for annexation of noncontiguous areas contained in NCGS 160A-58.1.

The petition as submitted was for the annexation of a much larger parcel at both 97 and 99 Underwood Road (8.95 acres). The petitioner has since subdivided the property and desires to have only the 1.96 acre portion containing 97 Underwood Road annexed. The parcel meets all applicable requirements for annexation of noncontiguous areas contained in the North Carolina General Statutes.

Pursuant to N.C. Gen. Stat. sec. 160A-58.2, a public hearing must be held prior to adopting any ordinance for voluntary annexation. If City Council decides to proceed with this request, it is proposed that the annexation become effective on April 30, 2010.

Pros:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.
- Complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Con:

- Marginal costs for rural fire department debt service and calls for service/patrol.

As the property was recently subdivided there is no tax value assigned to the property. An estimate taking a proportionate value of the previously unsubdivided property projects a value of $296,584. Such a valuation would generate approximately $1,246 in ad valorem tax revenue annually. The required debt service payment (one time payment) to the Skyland Fire Department is estimated to be $280.95. Any other marginal costs would come from calls for service or patrol.

City staff recommends that City Council adopt the ordinance annexing the property at 97 Underwood Road.

Ms. Marcel Andrews, representing the property owners, looked forward to being a part of the City of Asheville.

Mayor Bellamy closed the public hearing at 6:06 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3841. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 73

B. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF CITY-OWNED PROPERTY AT 411 DEAVERVIEW ROAD

ORDINANCE NO. 3842 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE BY ANNEXING A CONTIGUOUS AREA AT 411 DEAVERVIEW ROAD

Mayor Bellamy opened the public hearing at 6:07 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance for annexation of City-owned property at 411 Deaverview Road. This public hearing was advertised on April 2, 2010.

In 2009, the City of Asheville obtained two (2) parcels at foreclosure auction. One (1) of the parcels had been previously annexed into the City as a requirement for obtaining Housing Trust Fund loans for the Villas at Cedar Hill development. As part of the financing, the senior lender, Blue Ridge Savings Bank, secured the other parcel (PIN 9628274164) at 411 Deaverview Road as collateral. When the developer defaulted on the senior lien, the bank put the parcels up for sale at foreclosure auction. The City bid on the parcels to protect its investment in the property and was able to purchase the land at below market value. It is the intent of City staff to sell the properties and use the proceeds to repay the Housing Trust Funds advanced on the property. The collateral parcel is not yet a part of the City. The City proposes to annex this parcel to allow any future development on the site to contribute to the City tax base.

The parcel is 6.38 acres in size and has a tax value of $162,000. It contains a vacant residence.

Pursuant to N. C. Gen. Stat. sec. 160A-31, a public hearing must be held prior to adopting an ordinance annexing City-owned property. If City Council decides to proceed with this request, it is proposed that the annexation become effective on May 31, 2010.

Pros:

- Provides for an urban level of service for areas adjacent to the existing city limits.
- Brings in a parcel currently in City of Asheville ownership avoiding later involuntary annexation.

Con:

- Marginal costs for rural fire department debt service.

Because the property is owned by the City, there would be no immediate ad valorem tax revenue generated. Once sold, the property would contribute to the tax base at an amount determined by the development of the property. The required debt service payment to the West Buncombe Fire Department is estimated to be $150.00, which must be paid within forty-five (45) days of the annexation effective date. This is a one-time payment.

City staff recommends that City Council adopt the ordinance annexing the property at 411 Deaverview Road.

Mayor Bellamy closed the public hearing at 6:08 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 3842. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 75

V. UNFINISHED BUSINESS:

A. MOTION APPROVING THE FEE WAIVER REQUEST FOR PACK SQUARE CONSERVANCY FOR THEIR EVENT ON APRIL 17, 2010

Director of Parks, Recreation and Cultural Arts Roderick Simmons said that this is the consideration of a fee waiver for use of Reuter Terrace in Pack Square Park by the Pack Square Conservancy (PSC) to conduct the Painting to Percussion event.

At its meeting on April 12, 2010, the Recreation Board considered a joint partnership agreement between the City, County of Buncombe and PSC for the maintenance and operations of the Pack Square Park. The partnership agreement will make the park available to PSC for its events, activities and programs, and waive all facility rental and city permit fees associated with the use of the park.

The Recreation Board recommended considering the partnership agreement at a later date once it can obtain more information and be better prepared to make such recommendation. In lieu of the agreement, PSC wishes to request a fee waiver. The fee amount surpasses the fee waiver authority of the Recreation Board.

PSC will conduct the Painting to Percussion at Reuter Terrace in Pack Square Park on April 17, 2010, at 10:00 a.m. to 2:00 p.m., and requests a fee waiver of City fees associated with the park use totaling $1,378 ($1,300 facility rental fee and $78 building safety inspection fee).

PSC is a non-profit 501 (c) 3 organization that resides within the Asheville city limits whose mission is to create a vibrant town square and public park providing citizens and visitors to the region with a social, economic and cultural center that celebrates the area's unique character.

In return, PSC leads the process and funding to construct Pack Square Park and will donate the park to the City, and continue to create new programming to keep the park vibrant and active for citizens and visitors.

Pro:

- Facility rental fee waiver request meets all the required criteria associated with the recreation facility rental fee adjustment policy.

Con:

- Reduce the annual revenue budget for City facility rental fees and permits.

The lost revenue for facility rentals and permits is $1,378.

Staff recommends City Council approve the PSC request to waive $1,378 in facility rental and building safety inspection fees for the use of Reuter Terrace at Pack Square Park on April 17, 2010, at 10:00 a.m. to 2:00 p.m. for the Painting to Percussion event.

Mr. Gary Giniat, Executive Director of Pack Square Conservancy, said that the entire Park is open and urged Council to waive their facility rental and building safety inspection fees.

In response to Councilman Russell, Mr. Simmons said that the joint partnership agreement (including fee waivers) will be coming to Council in the near future for action.

Councilman Davis moved to approve the fee waiver request of $1,378 for Pack Square Conservancy for their event on April 17, 2010. This motion was seconded by Councilman Smith and carried unanimously.

B. RESOLUTION NO. 10-98 - RESOLUTION ADOPTING THE CITY OF ASHEVILLE'S LEGISLATIVE PROGRAM FOR THE 2010 "SHORT SESSION" OF THE NORTH CAROLINA GENERAL ASSEMBLY

City Attorney Oast said that this is the consideration of a resolution establishing the City of Asheville's Legislative Agenda for the 2010 Session of the North Carolina General Assembly.

On March 9, a presentation was made to Council with some suggestions for legislative consideration in the 2010 Session of the North Carolina General Assembly. That report also contained an explanation of some of the limitations on matters that could be considered in the 2010 "short session."

Since that meeting, further information has been assembled with respect to some issues of local interest, and we have obtained information from the League of Municipalities and other cities regarding their legislative priorities and agendas. In addition, several Council members have asked about possibilities for legislative action.

We obtained a package from the League of Municipalities containing the League's "Advocacy Agenda" and "Core Principles" for 2009-2010. That package also contained the legislative agendas for 17 North Carolina municipalities for 2009-10. These local agendas did not follow a standard format. Most of them contained both federal and State legislative requests. A substantial portion of the federal requests were for appropriations or earmarks for specific projects (e.g., road improvements, sewer outfall). Some State legislative agenda items were addressed to issues particular to the requesting municipality (e.g., de-annexation, fire truck purchase). Most if not all of the local legislative agendas stated positions on State legislative matters, such as annexation and collective bargaining; in some cases, local legislative agendas adopted or endorsed the League's agenda in whole.

Drawing on the information and sources referenced above, a proposed legislative agenda has been developed that addresses local issues, as well as matters of state-wide concern. Because of the limitations on local legislation in the short session, the items as to which local legislation is requested are those that have been discussed before (Woodfin), or where clarification of existing law may be needed (energy efficiency, intranet).

Some Council members have suggested that Council seek or support legislation as to other matters, such as public financing of local elections. Depending on Council's direction, these items can be added to the resolution currently before Council, or may be the subject of a later resolution after appropriate research. Finally, the Chamber of Commerce will not adopt its legislative agenda until May, and Council may wish to express its position as to some items on that agenda in any consideration of matters of general or regional concern.

These legislative requests are consistent with multiple objectives of the City's Strategic Operating Plan, including (a) working with other local governments to address service delivery and public safety issues, (b) supporting green building and energy conservation, (c) working cooperatively with legislators to implement practical water system management and voluntary annexation policies.

City Attorney Oast then reviewed the following local issues:

1. Introduce a local bill to reconfigure the boundaries of Asheville and Woodfin to:

    a) Eliminate pockets of unincorporated area between the two municipalities;

    b) Resolve jurisdictional confusion in the area of UNC-A (including land set aside for future growth), and Broadway/I-26/River Road interchange;

    c) Authorize agreements regarding service delivery to affected private properties.

    It was the consensus of Council to include this in the 2010 Session.

2. Introduce a local bill or support general legislation to clarify status of local intranet facilities in connection with the Video Service Competition Act of 2006.

It was the consensus of Council to include this in the 2010 Session.

3. Clarify recent legislation regarding financing of energy efficiency improvements [note: staff is currently drafting the program design, which includes recommendations for financing, administration, and project eligibility. This program is scheduled for Council consideration for May 25. Other municipalities are involved in similar efforts, and legislation may be requested to clarify local authority.]

   City Attorney Oast responded to questions raised by Mayor Bellamy regarding whether this includes commercial property and clarity on the disclosure of funding.

   It was the consensus of Council to include this in the 2010 Session.

4. Introduce a local bill providing for annexation agreements for certain developments that receive city water service.

   It was the consensus of Council to include this in the 2010 Session.

5. Support of passenger rail service to Western North Carolina (which resolution was adopted by City Council on March 23, 2010).

   It was the consensus of Council to include this in the 2010 Session.

He said that Councilman Bothwell has suggested that Council seek or support legislation as to public financing of local elections. With Council's direction, he would be happy to research that, noting that it can be added to the resolution currently before Council, or may be the subject of a later resolution after appropriate research.

He added a few items of State-wide interest, such as annexation and municipal incorporation reform where the League of Municipalities is working to represent municipal interests, and has drafted the resolution to state that Council supports the League's position on these items. However, the State-wide issues have not been the subject of much consideration by Council, and are not subject to the same time constraints or other limitations as local bills. Also, there are some issues of State-wide concern that are not reflected in the League of Municipalities' material, such as collective bargaining by public employees, regulation of electronic gaming, and preservation of municipal revenues. Accordingly, Council may wish to defer consideration of some or all of these items, or add to them. Those State-wide issues are as follows:

1. Support League of Municipalities 2009-10 advocacy agenda as to the following issues:

   a) Annexation
   b) Air Quality
   c) Water Resources
   d) Municipal Incorporation
   e) Infrastructure Financing
   f) Energy Sustainability
   g) Local of Alcohol Establishments
   h) Sanitary Sewer Overflows
   i) Stormwater Fees
   j) Electronic Notices

An issue of State-wide concern is collective bargaining by public employees. It would require local governments to recognize collective bargaining with respect to public safety employees. North Carolina, by law, prohibits collective bargaining with public employees. He understands this new law would require the recognition of labor unions and require collective

bargaining for police, fire and emergency personnel. With Council's direction, he would research this further. If there is any interest in addressing this legislatively, he felt contact should be made to the federal congress and senate

Mayor Bellamy said that the League of Municipalities is opposed to the bill (H.R. 413), not on the basis of a position on collective bargaining, but on the basis that such employment policy is best made at the state and local level. The League is asking for the City's position on this bill and our thoughts on the League joining in on a case saying that the federal government may have overstepped its boundary if the bill passes. Communications from the League request action with 48 hours. She felt it would be appropriate for Council to direct the City Attorney to research this further on how it will have big implications on how we do business in the City of Asheville and the future of our organization.

After discussion, it was the consensus of Council to (1) instruct City Attorney Oast to provide Council with additional information on the bill regarding the legislation of collective bargaining by public employee; and (2) instruct the City Manager to provide information on the impact on our organization if the bill passes.

Councilman Bothwell explained his request for Council's support of a bill that has already passed the state house which would permit a municipality to consider public financing of local elections. It does not commit to anything, but just gives cities the opportunity to consider public financing of local elections.

After discussion, it was the consensus of Council to instruct City Attorney Oast to provide Council with additional information on the bill permitting a municipality to consider public financing of local elections.

After discussion, it was the consensus of Council that while the League is a great advocate for cities, City Council could not endorse all issues in their 2009-10 advocacy agenda and requested the City Attorney to provide Council with more information on their various issues.

When Mayor Bellamy brought up the non-consensual towing legislation that was introduced last year, it was the consensus of Council to instruct the City Attorney to investigate if that legislation needs to remain active of if the bill is no longer necessary.

At the request of Vice-Mayor Newman, it was the consensus of Council to instruct the City Attorney to a bill that would create a prohibition on local decision-making regarding use of wind energy within local jurisdictions in the western half of the State.

It was the consensus of Council to have Mayor Bellamy (and two other Council members) meet with Senator Nesbitt and Representative Goforth regarding a local bill providing for annexation agreements for certain developments that receive city water service.

RESOLUTION BOOK NO. 33 – PAGE 15

Closed Session

Mayor Bellamy announced a 20-minute recess at which time Council will conduct a closed session.

At 6:57 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property

located on Shelburne and Sand Hill Roads, and known as the Waller Tract, and property located on Swannanoa River Road near the intersection of Fairview Road, by purchase, option, exchange or lease. The property is Villas at Cedar Hill. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 7:27 p.m., Councilman Russell moved to come out of closed session and return to the formal meeting. This motion was seconded by Councilman Smith and carried unanimously.

VI. NEW BUSINESS:

A. ORDINANCE NO. 3843 - ORDINANCE ADOPTING FISCAL YEAR 2010-11 FEES & CHARGES, EFFECTIVE JULY 1, 2010

Budget Director Tony McDowell said that this is the consideration of an ordinance approve proposed fee adjustments for the FY 2010-2011 budget.

The proposed FY 2010-11 fee adjustments have been reviewed by the Council Finance Committee. If the full Council approves the Finance Committee's fee recommendations, it will add an additional $218,000 in revenue to the FY 2010-11 General Fund budget.

In addition to the General Fund fee adjustments, the Finance Committee also reviewed proposed increases to the prices of the annual pass, monthly pass, and eleven (11) ticket books in the Transit Fund. These price increases were recommended by the Transit Master Plan and would bring in approximately $47,000 in additional revenue.

Finally, staff is requesting that Council approve the FY 2010-11 Water Resources Fees. Staff initially proposed a 9.0% fee increase for the water utility charge and the capital improvement fee. Based on feedback received from Council, staff developed alternatives to the 9.0% increase that was initially proposed. Staff is now recommending that Council adopt a 5% rate increase for Capital Improvement Fee and Consumption charges for FY 2010-11. This rate increase will allow for a 1% transfer of Water Resources revenue to the General Fund per the Sullivan Act Amendment. This 1% transfer will provide approximately $341,000 in revenue for water-related infrastructure projects in FY 2010-11. He provided Council with a list of possible projects that could be funded with Sullivan Act monies over the next five years if the 5% water rates increases are continued in future years. This recommendation is consistent with the "Alternative 1" water rate structure that was presented to Council at its budget worksession on March 23, 2010.

Staff is requesting that Council take action tonight on the fee recommendations so that the additional revenue from the fee adjustments can be included in the Manager's Proposed Budget, which is scheduled for presentation to Council on May 11th. The additional time will also allow staff to begin communicating fee changes to citizens, customers and stakeholders so they are aware of changes that will be implemented with the adoption of the budget. Every department will be responsible for developing and implementing a communications plan to let citizens know about fee changes.

As noted above, the General Fund fee changes recommended by the Finance Committee would produce approximately $218,000 in additional revenue, which will be used to help close the projected budget gap in FY 2010-11.

Staff recommends that Council adopt the Finance Committee recommendations regarding fees and charges, including recommendations for transit passes and water rates.

Councilman Russell, Chair of the Finance Committee, felt that some of the fees are practical changes and fees are a good way to tax the end users. However, as the Finance Committee discussion on the fees became more complicated, he pulled back his support. He could not support any fee increases.

Vice-Mayor Newman questioned if Council votes on these fees now, will there be opportunity for additional discussion since the budget won't be finally adopted until June. Mayor Bellamy felt that staff needs approval of these fees as they need to notify the community of the changes prior to July 1. Councilman Russell also noted that by Council endorsing these fee changes, it will allow the City Manager to bring Council a balanced budget. If the fees are not endorsed, staff will need to find another $218,000 for the General Fund somewhere else.

Councilman Bothwell moved to approve the General Fund fee adjustments (including the Transit Fund fee adjustments). This motion was seconded by Councilman Smith.

Mr. Fred English urged Council to save wherever possible and then reach out to the City taxpayers.

Councilwoman Manheimer said that departments looked at what their true overhead costs were for providing specific services and in many cases they found that they were not recovering the true cost. That was the concept in looking at these fees – cost recovery. In that regard, she supported the fee increases.

Vice-Mayor Newman clarified that the motion does not address the business license fee.

Mayor Bellamy did not support the motion as most of them affect the building industry which is being hit the hardest during this economic climate. Regarding transit fee increase, 70% of the riders have no other means of transportation. Even though the fees are minor, for a person barely making it, they will feel the increase.

Each Council member voiced their opinion on why they could or could not support the fee increases.

The motion made by Councilman Bothwell and seconded by Councilman Smith carried on a 5-2 vote, with Mayor Bellamy and Councilman Russell voting "no."

Councilwoman Manheimer moved to approve the 5% water consumption fee. This motion was seconded by Councilman Davis.

Councilman Russell understood the need for a consistent stream of revenue for improvements; however, we just did $40 Million of improvements over the last 4-5 years. Since our estimates on contracts are coming in lower than expected, he felt we should work with those cost reductions. He could not support the motion to increase the water consumption fee.

Mayor Bellamy supported the motion because when we issued the $40 Million bonds, we told the Local Government Commission that we had a plan to repay back those dollars. We need a dedicated source to pay back the bonds and make the improvements necessary to the system.

Councilman Bothwell hoped that Council will look at a graduated rate which will encourage further water conservation.

Councilwoman Manheimer explained how Asheville is managing their water system in a thoughtful way. As a member of City Council, she felt an obligation to make sure we have a balanced budget and that we are not running our water system into the ground.

Councilwoman Manheimer felt to not support the motion on raising fees places an unfair burden on the rest of Council as they must do the responsible thing and pass a balanced budget for the City. It is not a luxury to vote no for the rate increases.

The motion made by Councilwoman Manheimer and seconded by Councilman Davis carried on a 6-1 vote, with Councilman Russell voting "no."

Councilwoman Manheimer moved to approve the 5% water Capital Improvement Plan fee. This motion was seconded by Councilman Bothwell.

In response to Mayor Bellamy, Water Resources Director Steve Shoaf explained that at the March 23 worksession, he presented a 5% increase this year for the consumption charge and a 5% increase for the Capital Improvement Fee, but no further increases in the Capital Improvement fee in subsequent years until the budget is out of balance. This year, in order to generate the revenue we need (due to the loss of large water customers) we included the 5% Capital Improvement Fee.

Councilman Davis could not support the Capital Improvement Fee as he felt it affects the smaller businesses.

Vice-Mayor Newman felt that in the next year we need to look comprehensively at where we are going with this long-term. We have high residential water rates but these are user fees that directly affect the cost of living in this community. He felt it was important to look at the overall rate structure that is as fair to families that live in Asheville and we need to be careful about some of rates where it could affect the employment. He is also encouraged that we will be looking at a rate structure that does encourage conservation.

Councilman Bothwell said that thanks to the Sullivan Acts, water rates are one of the only way we can draw revenue from outside the City limits.

Councilman Smith agreed that we need to re-examine the rate structure with an eye on conservation. Small businesses and medium-size employers will be affected by the rate increase and we need a plan to support then.

Mayor Bellamy could not support the motion. She recalled a different conversation at the March 23 worksession, but requested that going forward, we develop a clear plan to let people know about future rate increase so they are aware that the rates will rise in future years.

In response to Vice-Mayor Newman, City Manager Jackson said that regarding the projects that could be funded with Sullivan Act monies staff will work from the list of projects provided to Council that add up to $1.9 Million (assuming the rate increase of $341,000 and the $1.6 Million already in the budget).

The motion made by Councilwoman Manheimer and seconded by Councilman Bothwell carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no."

Vice-Mayor Newman did not support an increase in business license fees for small businesses or manufacturing; however, he would not be opposed to increasing the fees on some large retail facilities that bring people into Asheville from all of western North Carolina.

ORDINANCE BOOK 26 – PAGE 77

B. RESOLUTION NO. 10-99 – RESOLUTION OF SUPPORT FOR UNIVERSITY OF NORTH CAROLINA SCHOOL OF PHARMACY SATELLITE CAMPUS IN ASHEVILLE, N.C.

City Manager Jackson said that the University of North Carolina Pharmacy School will develop a satellite campus in Asheville. The program is to accomplish that through a partnership with community and long-standing regional partners including Buncombe County, Economic Development Coalition, University of North Carolina-Asheville, Mission Hospitals, MAHEC (Mountain Area Health Education Center), and WNCHN (Western North Carolina Health Network -- a consortium of 16 western North Carolina hospitals. To accomplish this, in addition to having that mix of partners collaborating in a lot of different ways to make the curriculum feasible involves preparing facilities for what will eventually be a revenue neutral educational degree program. There is a wrap-up program with this to create this school and the 50+ professional jobs associated with that. The wrap-up cost is approximately $2.5 Million – investing in the science building at UNC-A, creating the classroom and the laboratory space necessary and to provide for the attraction and employment of the start-up costs associated with building the school. Buncombe County has pledged $600,000 to that $2.5 Million effort which will be spearheaded by the Chamber of Commerce. Based upon our past participation in this type of job creation, staff recommends City Council authorize the Mayor of the City of Asheville to sign the resolution of support, and to direct the City Manager to include an amount of up to $100,000 in economic development support funding in the city's 2010-11 budget process if required to help in the initial capital costs for starting the branch campus in the City of Asheville.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-99. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Bothwell voting "no."

RESOLUTION BOOK 33 – PAGE 17

C. BOARDS & COMMISSIONS

The following candidates applied for a position on the Downtown Commission: Rachael Bliss, Robert Winner, David Hitch, Henry Watts, Tony Fraga, Michael Tietz, Rebecca Hecht, Alan Levy, Merry Caplan, Hillary Cole, Luke Perry, Jeremy Gillespie, Eric Rainey, Bill Allison, Terry Meek, Rodney Hardy Porter, Philip Ellis, William Langdon, Jimi Rentz, Woody Kloesel, Joseph Bernard Malki, Jared Breneman, Erin Mosher, David Nutter, Karen Kotiw, Claire Reeder, Susan Griffin and Laurie K. Miller. Out of those candidates, it was the consensus of Council to instruct City Clerk Burleson arrange interview for Rebecca Hecht, Henry Watts, David Nutter, Jimi Rentz and Karen Kotiw.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Jeff Meadows alleged that his retirement (as seen in Resolution No. 93-74) has been breached. Mayor Bellamy instructed City Manager Jackson to contact Mr. Meadows regarding his allegations.

Ms. Maria Lomeli-Garcia, Junior at Asheville High School, and Mr. Terrell Muetta, 7th grader at A.C. Reynolds Middle School, said they were youth advocates representing Teens Taking Action, which is a peer education program through the Planned Parenthood Health Systems. They said that the month of April is "Sexually Transmitted Infections Awareness Month" and they wanted everyone in the community to understand the risks of unsafe practices and to recognize the dire consequences. They spoke about the importance to raise awareness. Mayor Bellamy said it was troubling to hear the numbers. She thanked the students for increasing Council's awareness and suggested they attend meetings of the Buncombe County School

Board, Asheville City School Board, and Buncombe County Commissioners as they can address the funding necessary to educate our students.

Mr. Fred English spoke about the national debt and the amount every person owes.

Rev. Christopher Chiaronmonte spoke about the homeless issue in Asheville and the location of the police sub-station on Haywood Street.

Vice-Mayor Newman invited the public to a town hall meeting in the Public Works Building on Monday, April 19, 2010, from 5:30 p.m. – 7:00 p.m., for a public discussion about the Asheville Energy Independence initiative.

Mayor Bellamy urged the community to support Asheville as Google's Gigabit broadband demonstration network by going to googleavl.com to nominate Asheville.

A civil action has been commenced in Federal Court on March 26, 2010, from Cherie C. Byrd v. City of Asheville, Asheville Police Department and Eric Lauffer. The complaint is for discrimination based on sexual harassment. This matter will be handled by an attorney outside the City Attorney's Office through Asheville Claims Corporation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:28 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – April 27, 2010 – 3:30 p.m.
Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Director of Administrative Services Lauren Bradley explained that this is a follow-up worksession from March 23 worksession. She then summarized all the major building blocks that staff is planning on building into the proposed budget. After today staff will spend the next days putting together the budget document which will be presented to Council on May 11. If there is any feedback from Council, today would be the time to advise staff. This is not the last time for Council to provide feedback as there is another budget worksession on May 25. The budget is proposed to be adopted by City Council on June 22.

Ms. Bradley gave a quick recap of the March 23 worksession and advised Council of the following mix of strategies to balance the budget: (1) **Expense Reductions/Managed Savings - $2.3M** (a) Reduce overtime, temp services, contracts and other line items; and (b) Savings from expired annexation agreements; (2) **Expense Reductions/Service Impacts - $1.5M** (a) Re-engineer Brush Collection; (b) Reduce hours at community centers; (c) Reduce Outside Agency funding; and (d) Cost-sharing for Co-sponsored Events; (3) **Revenue Enhancements - $825,000** (a) Fees and Charges - $200,000; (b) Parking Fund recurring transfer - $125,000; and (c) Parking Fund one-time transfer - $500,000. The **Adjusted Budget Gap as of March 23 - $1M**

She then summarized the budget balancing strategies. Regarding revenues: (1) Fees and Charges - $200,000; (2) Parking Fund Transfer – $625,000 (a) $125,000 in revenue to offset increases in cost of transit service; and (b) $500,000 from parking fund reserves to offset the loss of federal funding; (3) No fund balance appropriation; and (4) No tax rate increase. **Total Revenue Increase = $825,000.** New information is that Asheville is eligible for $480,000 from the Federal Transit Administration that can be used toward operational transit expenses in Fiscal Year 2010-11.

Regarding expenditures for the selective hiring freeze (1) Actively manage vacancies to fill only essential positions; (a) Includes equivalent of 15 management and development review positions (i) Examples: Assistant Transportation Director, Superintendent of Recreation, Budget Research Analyst, CEO Supervisor, etc.; and (2) Does not include public safety positions or Public Works field positions. **Total Savings from Selective Hiring Freeze = $878,000**

Regarding expenditures for managed savings (1) Includes savings from line items and re-engineering (a) Reduce overtime, temp services, and contracts; (b) Reduce training, printing, other line items; (c) Savings from expired annexation agreements; (d) Fire Department Vacation Deferral Program resulting in overtime savings; and (e) Re-engineering of street patching through Street Cut Enterprise Fund. **Total Managed Savings = $2,293,000**

Regarding expenditures for employee compensation (1) Original budget projections included a $500,000 compensation pool for cost of living adjustment; (2) Across-the-board cost of living adjustment was sacrificed to avoid layoffs; and (3) FY 2010-2011 budget proposal includes funding for a $300 pay supplement for approximately 629 full-time employees who earn $41,722 (area median income) or less (a) Total cost of the pay supplement is $190,000; (b) **Net savings from proposed compensation package = $340,000.**

Current year health care (1) Expenditures are expected to exceed original budget estimates by $2.5 million; (a) 25% increase in claims costs in 2009; (2) Revenues are projected to exceed budget by $800,000; (3) Staff is recommending a budget amendment to adjust health care budget (a) $1.7 million from insurance fund reserves; and (b) $800,000 in additional revenue; and (4) Strategies to reduce health care costs in FY 2010-2011 (a) Creation of a Blue Ribbon Task Force on Health Care.

Regarding health benefit expenditures (1) Healthcare Benefit Changes (a) 5% increase to premiums; and (b) Increases in co-payments for primary care, specialists, ER and urgent care visits; and (2) Plan Changes – "High" Option (a) Implementation of a $300 deductible and (b) Introduction of 90/10 co-insurance, where employees are responsible for 10% of the cost of services (i) Maximum annual out-of-pocket for co-insurance set at $500 for individuals, $1000 for families. **Total Savings from Healthcare Changes = $300,000**

Also regarding health benefit expenditures (1) Staff is seeking Council consensus approval on FY 2010-11 Healthcare Program changes today; (2) Council approval of creation of Blue Ribbon Task Force on Health Care and current year budget amendment at formal meeting; (3) Open enrollment for employees to take place in mid-May; and (4) Opportunity to inform and educate employees about program changes.

Regarding expenditures, service reductions include (1) Reduction in Community Center hours ($385,000) (a) Programs will be rescheduled and managed by full-time staff or discontinued; and (b) Reduction in part-time and temporary staff; (2) Evening transit service optimization ($174,000) (a) The gap between daytime and evening transit service will be closed and evening service will stop at 10:30 p.m. (b) Discontinue evening service on the least utilized route (affects a daily ridership of about 45 people); and (c) consider the availability of federal funds and parking reserves to continue this route; (3) Brush Collection once per month ($250,000) (a) Brush will be collected once per month and (b) Later in the year, the City will launch on demand collection via telephone or Website; (4) Reduction in Outside Agency funding ($40,000) (a) 20% reduction in total Outside Agency allocation; (5) Reduction in co-sponsored event support ($50,000) (a) Events would pay 50% of the costs for permits and labor; and (6) Reduction in APD overtime ($215,000). **Total Savings from service reductions = $1,114,000.**

She then explained the Capital Improvement Program and the use of the $925,000 discretionary funding for projects.

After the presentation, Council members discussed the different mix of strategies used to balance the budget.

Due to the one-time $480,000 from the Federal Transit Administration, Mayor Bellamy initiated discussion of whether Council wanted to keep the $500,000 in the Parking Fund and use the $480,000 to offset the loss of federal funding or continue on the path of using the $500,000 from the Parking Fund to offset the loss of federal funding and use the $480,000 for something else.

Possibilities for using the $480,000 included (1) half-hour bus service on Merrimon; (2) seed money to get the Transit Master Plan furthered in the next budget year; (3) use some of this money to suspend some of the Park fees across the board for this budget year as we help the for-profit and non-profit sectors adjust to the new fee schedule; (4) get through this budget year and then decide on the use of the $480,000; (5) possible capital needs; and (6) keep the Parking Fund monies in the Parking Fund for future parking downtown.

After discussion, it was the consensus of Council to not transfer the $500,000 from the Parking Fund reserves to offset the loss of federal funding. The $480,000 would be used for transit services.

Councilman Smith was concerned that Council just adopted a fee policy and now we are talking about fee waivers.

It was the consensus of Council to proceed with the strategies outlined in the selected hiring freeze (total savings of $878,000).

Regarding managed savings, Mayor Bellamy was concerned with the reduction of overtime, temp services and contracts, in particular the 50% cut in the Parks, Recreation & Cultural Arts Department part-time labor, and how the additional burden of responsibilities will affect existing employees and programming, in particular afterschool and summertime programs. She suggested reducing the General Fund contribution to the Parks capital budget as other budgets have taken cuts, e.g., Housing Trust Fund and Civic Center. Parks, Recreation & Cultural Arts Director Roderick Simmons said that the $534,000 in the Parks capital budget is for deferred maintenance. Budget Director Tony McDowell explained that the $300,000 for the golf course irrigation project was on a list, along with a couple of other projects, that the City was going to borrow money for; however, that financing did not move forward. Since that financing did not happen, he said that over a 20 year period, the minimal debt service savings would be approximately 10% ($30,000 a year).

It was the consensus of Council to proceed with the strategies outlined in managed savings (total savings of $2,293,000); however, Mayor Bellamy could not support this due to concerns expressed above (additional burden on staff).

It was the consensus of Council to proceed with the strategies outlined in the employee compensation (total savings of $340,000).

Regarding health care, Councilman Russell, Chair of the Finance Committee, said that the Committee reviewed this information and was comfortable with the health care benefits as outlined by Ms. Bradley. It was the consensus of Council to proceed with the health care strategies as outlined by Ms. Bradley (total savings of $300,000).

Vice-Mayor Newman, Chair of the Housing & Community Development Committee (HCD), briefly reviewed the following 2010 outside agency program recommendations, noting that the Committee was challenged this year to make significant cuts to this program. The maximum amount the HCD recommends to be made available is $163,400, which is 80% of last year's funding. They have adopted four funding principles for this year's program: (1) No new organizations will be accepted into the program this year; (2) Only organizations providing a direct service to the City of Asheville or providing direct youth and family services will be eligible for funding this year; (3) No organization will be eligible for more than last year's funding level (he explained the three exceptions); for most organizations, the maximum funding level is set at 80% of last year's award; and (4) Applications will be required from eligible organizations (ones that perform various afterschool functions – Children First, One Youth at a Time, YWCA and Housing Authority Youthful HAND). Those four applications are being considered for funding, but they are not recommended for funding at this time. After they submit their applications, then there will be a secondary round of specific recommendations made on those four agencies.

The list of eligible organizations and maximum funding eligibility is provided below, as are the names of organizations funded last year but not recommended for funding this year. The HCD proposes to reconsider the nature and extent of the Outside Agency Program next spring.

Outside Agency Analysis
Funding Eligibility Roster and maximum Available Amount
Eligible for 2010 Funding

Outside Agency	Summary Statement	2009 Funding	2010 Maximum Funding
Child Abuse Prevention Services, Inc.	General operating support targeted to parenting education and outreach ($6,000)	$ 6,000	$ 5,000
Children First /Communities in Schools	Project MARCH: after-school safe-haven program at three housing complexes in the City	$ 22,500	$ 17,800
Design Center	Coordinating community and design professional work on public infrastructure projects	$ 5,000	$ 5,000
Homeward Bound of Asheville-AHOPE	A HOPE Day Center outreach, intake and support for homeless persons. Operates mornings seven days a week, and afternoons Monday through Friday	$ 20,000	$ 20,000
One Youth at a Time	Provides mentoring, job training and placement assistance to at-risk students	$ 7,000	$ 5,600
YWCA of Asheville and WNC	Support Our Students (SOS) is an afterschool and day-long summer camp for at-risk students; with screening and intervention services for students involved with gangs	$ 10,000	$ 8,000
Housing Authority-Youthful HAND	After-school program for children residing at Lee Walker Heights housing development will purchase lap-top computers for the students' use	$ 5,000	$ 4,000
ABCRC	Fair Housing	$ 50,000	$ 50,000
Economic Development Coalition	Economic development services	$ 50,000	$ 40,000
Asheville Greenworks	Graffiti removal; tree planting	$ 10,000	$ 8,000
Not Eligible for 2010 Funding			
Asheville Art Museum		$ 5,000	0
Center for Diversity Education		$ 1,200	0
Hall Fletcher PTO		$ 5,000	0
Kids Voting Buncombe County		$ 1,000	0
Meet the Geeks		$ 3,000	0
United Way 2-1-1 and Hands On		$ 5,000	0
Total		$ 205,700	$ 163,400

Regarding outside agency funding, Mayor Bellamy felt the Design Center should be reduced to be consistent with the other agencies that are not directly linked to City services.

Councilman Davis felt the City should contract with the Design Center as needed rather than providing them outside agency funding.

It was the consensus of Council to proceed with the outside agency funding as recommended by the HCD Committee, except to reduce the Design Center 2010 funding from $5,000 to $4,000 (total savings of $40,000)..

Councilman Bothwell said that since brush collection will be once a month it should be coordinated with street sweeping.

It was the consensus of Council to proceed with the service reduction of brush collection (total savings of $250,000).

It was the consensus of Council to proceed with the reduction in co-sponsored event support; however, Mayor Bellamy did not support this action (total savings of 50,000).

It was the consensus of Council to proceed with the reduction of the Asheville Police Department overtime; however, Mayor Bellamy did not support this action (total savings $215,000).

It was the consensus of Council to proceed with the Capital Improvement Program and use of discretionary funding as outlined by Ms. Bradley.

In response to Mayor Bellamy, City Manager Jackson said that when the budget rolls around this time next year, Council will see significant improvements in the way the capital budget is laid out.

Councilman Russell wanted staff to make it very clear what are one-time expenditures vs. payments over the years.

There was a brief discussion, initiated by Mayor Bellamy, about asking our state legislators to allow the City to use 2.5% out of the 5% transfer from the Sullivan Act monies for streets and sidewalks. Although all Council supported this request, it was the consensus of Council that now is not the right time to make the request.

Additional information Council requested included: (1) how much would it cost to provide half-hour bus service on Merrimon Avenue; and (2) what is the least utilized route and details on what we would be losing; (3) what the programming would look like with the Parks, Recreation and Cultural Arts 50% part-time labor cuts, especially related to after school care and summertime programs; (4) where can Parking Fund monies be applied; (5) information in the budget that clearly explains how we invest in sidewalks and a breakdown of those costs; (6) description of what on-going work the City does on an annual basis with state and federal grants for sidewalk construction; and (7) clearly identify in the budget book, without having to go to another section, what projects are pay as you go vs. financing.

At 4:38 p.m., Mayor Bellamy adjourned the worksession.

Tuesday – April 27, 2010 - 5:00 p.m.
Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Newman gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY AS "MOTORCYCLE AWARENESS MONTH"

Mayor Bellamy read the proclamation proclaiming May, 2010, as "Motorcycle Awareness Month" in the City of Asheville. She presented the proclamation to Mr. Roger Williams who briefed City Council on some activities taking place during the month.

B. PROCLAMATION PROCLAIMING MAY AS "FOSTER CARE MONTH MONTH"

Vice-Mayor Newman read the proclamation proclaiming May, 2010, as "Foster Care Month" in the City of Asheville. He presented the proclamation to Ms. Becky Kessel who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING MAY AS "HISTORIC PRESERVATION MONTH"

Councilman Davis read the proclamation proclaiming May, 2010, as "Historic Preservation Month" in the City of Asheville. He presented the proclamation to Mr. Paul Reeves, President of the Preservation Society of Asheville and Buncombe County, and others, who briefed City Council on some activities taking place during the month and explained the importance of historic preservation.

Mr. Reeves presented the City of Asheville the 2009 Griffin Award for their renovation of 364 Charlotte Street, E.W. Grove's Office.

D. PROCLAMATION PROCLAIMING MAY 16-23, 2010, AS "NATIONAL PUBLIC WORKS WEEK"

Mayor Bellamy read the proclamation proclaiming May 16-23, 2010, as "National Public Works Week" in the City of Asheville. She presented the proclamation to Parks, Recreation & Cultural Arts Department representatives: Kathy Connor and James Ball; Public Works Department representatives Jennifer Mazza and Bryant Williams; Transportation Department

representatives Yuri Koslen and Barb Mee; and Water Resources Department representatives Michelle Massey and Amy Eckel.

II. CONSENT AGENDA:

At the request of Council, Consent Agenda Items "B", "D", "E", "H", "I" and "J" were removed from the Consent Agenda for discussion and/or individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 13, 2010

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE 2011 TRANSPORTATION DEMAND MANAGEMENT GRANT PROGRAM AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR ADMINISTRATION COSTS OF THE PROGRAM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

C. RESOLUTION NO. 10-100 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER INCREASING BROWN & CALDWELL'S AGREEMENT FOR ENGINEERING SERVICES FOR THE WILLIAM DEBRUHL WATER TREATMENT PLANT BACKWASH LAGOON PROJECT

ORDINANCE NO. 3844 - BUDGET AMENDMENT FOR THE WILLIAM DEBRUHL WATER TREATMENT PLANT BACKWASH LAGOON PROJECT

Summary: The consideration of a (1) resolution authorizing the City Manager to sign a change order increasing Brown and Caldwell's agreement for engineering services to $123,335.24 for the William DeBruhl WTP Backwash Lagoon project; and the associated budget amendment, in the amount of $15,570.

Brown and Caldwell was originally hired by the City through a competitive process to provide the Design, Permitting, Bidding, and Construction Services for the William DeBruhl Water Treatment Plant Backwash Lagoon project in the amount of $49,088.00. The initial contract dated June 5, 2009, provided for the Design, Permitting, and Bidding services only. Change Order # 1 in the amount of $58,678.00 allowed Brown and Caldwell to perform Construction Services, which included a preconstruction meeting, inspections, record drawings, and other construction-related tasks. Due to the complexity of the construction, additional site inspections are required for the duration of the contract. Change Order # 2 in the amount of $15,569.24 will allow Brown and Caldwell to perform additional site visits. The original contract amount, Change Order # 1, and Change Order # 2 add up to $123,335.24.

This project is part of City Council's strategic plans to improve city infrastructure.

Pro:

- Approval of the engineering change order will allow the City to move forward with the project in the current fiscal year in order to ensure compliance with applicable state/federal laws.

Con:

- Failure to award the engineering change order may delay the project beyond the current fiscal year, which may result in fines from NCDENR for being out of compliance with applicable state/federal laws.

The funds needed for this change order ($15,569.24) will be reallocated from another capital project that will receive replacement funding in a future fiscal year.

City staff recommends City Council (1) approve the City Manager to sign a change order increasing Brown and Caldwell's agreement for engineering services to $123,335.24 for the William DeBruhl WTP Backwash Lagoon project; and (2) approve of the budget amendment in the amount of $15,570.

RESOLUTION BOOK NO. 33 – PAGE 18

ORDINANCE BOOK NO. 26 - PAGE 91

D. RESOLUTION AUTHORIZING AN INSTALLMENT PURCHASE CONTRACT BETWEEN RBC BANK AND THE CITY OF ASHEVILLE TO FINANCE THE PURCHASE OF TWO FIRE TRUCKS

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. RESOLUTION AUTHORIZING NEGOTIATION OF AN INSTALLMENT PURCHASE CONTRACT FOR THE CONSTRUCTION OF A COMMUNITY CENTER ON LIVINGSTON STREET AND SETTING A PUBLIC HEARING ON MAY 25, 2010

This item was removed from the Consent Agenda for discussion and/or an individual vote.

F. RESOLUTION NO. 10-103 - RESOLUTION APPROVING SETTLEMENT WITH SWANNANOA CLEANERS FOR PROPERTY DAMAGE AT 165 COXE AVENUE

Summary: The consideration of a resolution approving settlement of a claim for property damage.

In the Spring of 2009, Swannanoa Cleaners discovered that the foundation of the southwest corner of its building on Coxe Avenue had settled as the apparent result of underground soil erosion. Because the claim involved property damage, it was referred to the Asheville Claims Corporation (herein "ACC"). The building is located on Coxe Avenue, but backs up to Federal Alley, a publicly maintained alley that has city storm water facilities buried within it. One of the storm drainage pipes runs very close to the rear wall of the Swannanoa Cleaners building, and the building is actually constructed over part of the pipe and encroaches into the alley by about three feet. An investigation revealed a downstream blockage in the pipe that caused water to back-up and leak out of the pipe, causing the erosion.

A crucial issue in determining whether the City has liability for damage of this nature is whether the City had notice of the condition causing the problem, in this case, the blocked pipe. The evidence of such notice in this case is conflicting, but would be enough to survive a motion to dismiss and a motion for summary judgment, in the opinion of the City's and ACC's legal counsel, necessitating a trial at which the outcome would be uncertain.

The cost to Swannanoa Cleaners for repairs to its building was approximately $100,000. After review and investigation of this matter by Risk Management and ACC, a settlement was negotiated with Swannanoa Cleaners for $75,000. Since this amount exceeds the City Manager's settlement authority of $25,000, City policy requires Council's approval of the settlement.

In addition, in order to address the encroachment issue, the City will initiate proceedings to close the part of Federal Alley immediately adjacent to the Swannanoa Cleaners building. This closure will not affect the public's ability to use the alley.

Pros:

- Resolves a disputed issue of property damage.
- Avoids the cost of a trial with an uncertain result.
- Maintains relations with downtown business community.

Con:

- Cost to the City (Asheville Claims Corporation).

This $75,000 settlement will be paid from funds already budgeted in the Insurance Fund.

Adoption of the resolution, approving the proposed settlement, is recommended.

RESOLUTION BOOK NO. 33 – PAGE 24

G. RESOLUTION NO. 10-104 - RESOLUTION CONFIRMING CITY COUNCIL SUPPORT OF PARTICIPATION IN THE YWCA'S "STAND AGAINST RACISM" EVENT ON APRIL 30, 2010

Summary: The consideration of a resolution for City Council support for the City's participation in the YWCA's "Stand against Racism" effort

The YWCA of Asheville is participating in a nationwide "Stand against Racism" event to be held April 30, 2010, and has requested community organizations plan events in support of the overall effort to acknowledge racism still exists in our community.

An organized relay walk for City of Asheville employees and other interested participants is being proposed. City employees would use their lunch hour to sign up for time slots throughout the day in which they would walk a predetermined route, in groups, through the Eagle/Market Street area of downtown.

Each group would use a pedometer to log how far they walked. At the end of the day a measurement of the number of miles the City of Asheville walked in a "Stand against Racism" would be released.

Short video interviews in which participants share what standing against racism means to them would be taped as groups complete their leg of the relay walk. The interviews would then be posted of City of Asheville websites.

Pros:

- Participation in the event will allow individuals the opportunity to express their desire to stand against racism during their lunch hour.
- The relay walk and associated videos will make a visual statement about the City's support of YWCA of Asheville's mission of ending racism.

Con:

- Eradicating racism involves much more than making a visual statement.

As participation in the event would take place during employee lunch hours, there is no significant fiscal impact involved in organizing the relay walk.

City staff recommends City Council adopt a resolution of support for a City of Asheville relay walk in support of the YWCA's "Stand against Racism" effort.

RESOLUTION BOOK NO. 33 – PAGE 25

H. RESOLUTION APPROVING THE LIST OF EVENTS FOR SUPPORT FOR OUTDOOR SPECIAL EVENTS IN ASHEVILLE FROM JULY 1, 2010 TO JUNE 30, 2011

This item was removed from the Consent Agenda for discussion and/or an individual vote.

I. BUDGET AMENDMENT TO AMEND THE HEALTH CARE BUDGET

CONSIDERATION OF A MOTION CREATING A BLUE RIBBON TASK FORCE ON HEALTH CARE TO REVIEW BENCHMARKS AND POLICY DECISIONS RELATED TO THE CITY'S HEALTH INSURANCE PROGRAM

These items were removed from the Consent Agenda for discussion and/or an individual vote.

J. BUDGET AMENDMENT TO INCREASE THE BUDGETED AMOUNT FOR OUTSIDE LEGAL SERVICES

This item was removed from the Consent Agenda for discussion and/or an individual vote.

Mayor Bellamy asked for and received public comments on all items on the Consent Agenda, prior to any of them being removed by City Council.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Manheimer moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE 2011 TRANSPORTATION DEMAND MANAGEMENT GRANT PROGRAM AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR ADMINISTRATION COSTS OF THE PROGRAM

Summary: The consideration of a resolution authorizing the City Manager to apply for the FY 2010-11 Transportation Demand Management (TDM) grant program and enter into an agreement with the N.C. Dept. of Transportation (NCDOT) for administration costs of the program.

TDM programs are programs which promote an alternative transportation option to the single occupant vehicle. Included among these alternatives are carpooling, vanpooling, telecommuting, transit, bicycle, flexible work hours, compressed work weeks, and parking policies and price structures.

NCDOT's Public Transportation Division is funding TDM programs across the state to support the provisions of the Ambient Air Quality Improvement Act of 1999, Senate Bill 953, to address growing concerns over ground level ozone pollution from motor vehicles and the need to

deal with increasing vehicle miles traveled (VMT) and NOx emissions. This bill established the goals of reducing emissions of nitrous oxides (NOx) from motor vehicles by 25% by 2009 and reducing the growth of VMT in the State by 25% by 2009.

This program funds up to 50% of the total administrative costs including salaries, fringe benefits, marketing, etc.

There are six TDM strategies that the City of Asheville's TDM program is required to employ in order to accomplish the TDM Program Goals set by NCDOT. They are:

1. Conduct marketing efforts/activities identified in a marketing plan.
2. Coordinate with local transportation and land use planning efforts.
3. Facilitate ridematching services through the ShareTheRideNC website.
4. Promote the Best Workplaces for CommutersSM Program.
5. Collect and calculate data on VMT and NOx reductions through TDM activities.
6. Operate in a manner consistent with the NCDOT goals regarding making our transportation network safer, move people and goods more efficiently, and making our infrastructure last longer.

The City's TDM program began in August 2005 and was administered under the French Broad River Metropolitan Planning Organization (MPO) and the City of Asheville's Transportation and Engineering Department. When the functions of the MPO were relocated to the Land of Sky Regional Planning Council, the TDM program remained as part of the City's Transportation Planning Division. The North Carolina Department of Transportation (NCDOT) is currently evaluating the future of the TDM program in Western North Carolina and during FY 2010-11, a visioning study will be prepared. This study will be funded by Federal and State Funds at an 80/20 ratio.

Programs currently being administered are, but not limited to:

- The PASSport (employer bus pass) Program
- The Emergency Ride Home Program
- Strive Not to Drive – annual promotional event
- Share the Ride NC – Statewide ridematching program

During April 2010, the City of Asheville will apply for the FY2011 TDM Grant. In June 2010, the Board of Transportation will vote on whether or not to approve the funds in the maximum amount of $99,979 for the City of Asheville's TDM Grant. The 2010/11 budget for this program is currently in the City of Asheville's budget process.

This TDM program supports the City of Asheville's 2010/11 Strategic Plan by helping to promote emission-reducing options, as well as supporting multi-modal transportation promoting the use of transit through programs such as the PASSport program.

Pros:

- The current 50% match is reimbursed by NCDOT.
- To date, these statewide programs have reduced the growth of VMT by 24.6% - the goal for Senate Bill 953 was 25%.
- This program funds 50% of the TDM Coordinator position.

Con:

- The City is required to provide a 50% match which equals $49,989.

The total project cost is $99,979; 50% of this total will be paid by NCDOT and 50% by the City. Funds to cover the required 50% City match are included in the Transportation Department's budget request for the FY 2010-11 Annual Operating Budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to apply for the 2011 TDM grant program and enter into an agreement with the NCDOT for administration costs of said program.

Transportation Director Ken Putnam responded to various questions from Council, some being, but are not limited to: confirmation that this funds a staff position; responsibilities of the staff position; information on the results seen and results that could be produced as a result of this position; statistics to show the reduction of vehicle mile travelled are a result of these programs; and is the City's 50% match coming out of the General Fund.

Vice-Mayor Newman moved to approve the City Manager to apply for the 2011 Transportation Demand Management grant program and enter into an agreement with the N.C. Dept. of Transportation for administration costs of the program. In addition, he requested staff produce an analysis for Council going forward on what results we are seeing from the various Transportation Demand Management initiatives that fall under this program so Council can continue to evaluate whether the program is meeting with success or it might be logically placed elsewhere. This motion was seconded by Councilman Bothwell.

Councilman Davis felt that due to our economy, we should have that analysis prior to approving this action.

Vice-Mayor Newman and Councilman Bothwell withdrew their motion.

Councilman Smith moved to continue this action until May 25, 2010, in order to give staff enough time to produce the analysis requested by Vice-Mayor Newman above. This motion was seconded by Vice-Mayor Newman and carried unanimously.

D. RESOLUTION NO. 10-101 - RESOLUTION AUTHORIZING AN INSTALLMENT PURCHASE CONTRACT BETWEEN RBC BANK AND THE CITY OF ASHEVILLE TO FINANCE THE PURCHASE OF TWO FIRE TRUCKS

Summary: The consideration of a resolution authorizing execution of a $1.29 million installment purchase financing contract for fire trucks.

The City of Asheville Capital Improvement program (CIP) includes $1.29 million previously appropriated by City Council to finance the acquisition of two fire trucks.

The Finance Department sought proposals from 5 local and regional banks. Three proposals were received, the best of which was submitted by RBC Bank at an initial taxable interest rate of 3.58% per annum for a term of 5 years. RBC's proposal makes use of the Build America Bonds Program, which provides a rebate from the Federal Government in an amount equal to 35% of the interest paid on the loan. Taking into consideration the federal rebate of 35% from the Build America Bonds program, the effective interest for the City is **2.327%**

The proposed resolution authorizes an installment purchase contract between the City of Asheville and RBC Bank for the purchase of the fire truck and authorizes the City Manager, City Attorney and Finance Director and City Clerk to execute and deliver any and all necessary documents. Pursuant to a previously adopted reimbursement resolution, proceeds from this financing contract will allow the City to reimburse itself for the cost of the two fire trucks, which have already been procured.

Pros:

- Provides funding of capital expenditures at a very favorable effective interest rate.
- Financing capital purchases spreads the cost of acquisition over several years of the useful life of the asset.
- Reimbursing this capital purchase with the proceeds of the financing, as opposed to paying for the purchase by using the City's available cash balances, increases the currently available funds by allowing the restoration of fund balance.

Con:

- Financing the purchase slightly increases the lifetime cost of the acquisition due to the payment of interest on the amount financed.

The annual debt service payment for this financing is approximately $289,000 per year. Funds are already included in the City's proposed debt service budget to cover this cost.

City staff recommends City Council adopt the resolution authorizing the City Manager to execute an installment purchase contract and closing process with RBC Bank for the acquisition of the fire trucks.

Councilman Russell noted that fire trucks are very expensive and hoped that we look carefully at these big purchases going forward.

In response to Mayor Bellamy's confirmation that we are purchasing three fire trucks in two years and the needs in upcoming years, City Manager Jackson said that on May 11 during the budget presentation Council will have the opportunity to review that information in detail. He will provide Council with the prioritized replacement schedule for police cars, fire trucks, brush trucks, and other major pieces of equipment. He said that he will also provide Council with a memorandum on what meets the criteria from the School of Government for financing.

Councilman Russell moved to adopt Resolution No. 10-101. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 19

E. RESOLUTION NO. 10-102 - RESOLUTION AUTHORIZING NEGOTIATION OF AN INSTALLMENT PURCHASE CONTRACT FOR THE CONSTRUCTION OF A COMMUNITY CENTER ON LIVINGSTON STREET AND SETTING A PUBLIC HEARING ON MAY 25, 2010

Summary: The consideration of an initial resolution authorizing negotiation of an installment purchase contract and calling for a public hearing on May 25, 2010.

The current capital improvement plan includes funds previously appropriated by City Council to finance the construction of a community center on Livingston Street in Central Asheville.

The proposed initial resolution asks Council to confirm that it is in the City's best interest to enter into an installment purchase contract with a financial institution to fund the Livingston Street Community Center and to provide for a public hearing on these matters. This resolution is a legal formality required by North Carolina General Statutes before the process of securing financing can officially begin.

Pros:

- Allows the City to comply with the legal requirements of the Local Government Commission (LGC) regarding installment purchase financing

Cons:

- There are no cons associated with ensuring that legal requirements have been met before securing financing for the Livingston Street Community Center.

The City will secure approximately $1.07 million to finance approximately half of the construction costs associated with the Livingston Street Community Center. The remaining construction costs will be financed primarily with grants and donations. The projected annual debt service costs associated with the $1.07 million in debt proceeds ranges from $120,000 to $95,000. Funds are already included in the City's proposed debt service budget to cover this cost.

City staff recommends City Council adopt an initial resolution authorizing negotiation of an installment purchase contract and calling for a public hearing on May 25, 2010.

In response to Councilman Russell, Treasury Services Manager Pat Liguori said that this will be a 15-year note.

Councilman Russell requested that future staff reports outline the terms of the notes in the fiscal impact statement.

Councilman Davis moved to adopt Resolution No. 10-102. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Russell voting "no."

RESOLUTION BOOK NO. 33 – PAGE 20

H. RESOLUTION APPROVING THE LIST OF EVENTS FOR SUPPORT FOR OUTDOOR SPECIAL EVENTS IN ASHEVILLE FROM JULY 1, 2010 TO JUNE 30, 2011

Summary: The consideration of a resolution approving the attached list of events for support for outdoor special events in Asheville valued at **$114,295.40** for support of outdoor special events from July 1, 2010 – June 30, 2011.

During the recent Request for Proposals (RFP) process, 33 organizations met the eligibility requirements for outdoor special event support for events from July 1, 2010 – June 30, 2011.

Given current economic limitation, staff recommends support for six events based upon the historical tradition, economic impact, and uniqueness of the event. These events are Asheville Drum Circle, Asheville Greek Festival, Asheville Holiday Parade, Downtown After 5, Goombay Festival, and Shindig on the Green. Support for events includes permit waivers (i.e. park usage permits, building/fire safety permits, etc.) and labor costs (i.e. police support, sanitation, public works).

Staff is further recommending that the city recover $57,148 (50% of the total requested support costs) from these event organizers for each event. Moving to this tiered program would create a business model where the City of Asheville is not providing a 100% level of subsidy for outdoor special events but where the City would share in the costs with event organizers, thereby saving the City of Asheville a total of $57,148 for FY10/11.

This does not support a specific goal, objective, or action item of the City Council Strategic Operating Plan. This does support the current Parks, Recreation, Cultural Arts and Greenways Master Plan by making organizations aware of the value of their support from the City and by providing clear criteria for support.

Pros:

- Events stimulate the local economy.

- Helps local organizations raise money.
- Provides additional quality cultural programming and diversity.
- Expands and enhances special events and festivals in Asheville.
- General Fund will recover 50% of event support cost.

Cons:

- Events have labor costs to the City in the amount of $85,617.
- Events put a strain on City resources such as Police, Fire, Sanitation, Park Maintenance, etc.
- Lost revenue from permit fee waivers in the amount of $28,678.
- Events contribute to decline on infrastructure such as parks.
- Some events close streets.

The fiscal impact to the City for the six events after recovering 50% of the cost from event organizers is $42,808.50 in labor costs and $14,339.50 in forgone permit fee waiver revenue for a total of **$57,148** of city support between July 1, 2010 – June 30, 2011. Funds are included in the projected FY10/11budget to cover this impact.

Staff recommends that City Council approve the list of outdoor special events below support based on the available budget for FY10/11 and recover 50% of cost from event organizers.

	total requested permit fee waivers FY11	total requested labor cost FY11	total requested support FY11	Permit & Labor Cost for Event Organizers	City Subsidy
Asheville Drum Circle	$3,875	$0	$3,875	$1,938	$1,938
Asheville Greek Festival	$10,742	$1,342	$12,084	$6,042	$6,042
Asheville Holiday Parade	$1,562	$39,462	$41,024	$20,512	$20,512
Downtown After 5	$2,143	$14,780	$16,923	$8,462	$8,462
Goombay Festival	$2,942	$26,869	$29,811	$14,906	$14,906
Shindig on the Green	$7,414	$3,164	$10,578	$5,289	$5,289
Anchor Event Total	$28,678	$85,617	$114,295	$57,148	$57,148

Ms. Mary Shirley urged Council to co-sponsor the 2010 Mountain Area Memory Walk.

Ms. Oralene Simmons, representing the Martin Luther King Association of Asheville and Buncombe County Inc., urged Council to waive fees for the annual Martin Luther King celebration.

Mr. Bryon Greiner, President of the Downtown Association, urged Council to waiver fees for the Downtown After 5 events and the holiday parade.

Ms. Kitty Love, Executive Director of Arts2People, encouraged Council to support their interest in maintaining quality cultural programming content.

Councilman Bothwell moved to adopt a resolution approving the list of outdoor special events from July 1, 2010, through June 30, 2011. This motion died for a lack of a second.

Mayor Bellamy noted that some members of the community didn't have the opportunity for feedback prior to City Council and wondered if there was an opportunity to get that feedback and talk about some transitional programs opposed to straight cuts. She also felt that the City needs to do a better job of communicating and giving ample notice of changes so they can plan their activities accordingly.

Director of Parks, Recreation and Cultural Arts Roderick Simmons said that the Finance Committee reviewed this action, as well as the Recreation Board. Both bodies are open to the public. Direction is needed so departments know how much to allocate for these services. The effective date of this action would be July 1, 2010.

Council member each voiced their thoughts on co-sponsorship of the different organizations, noting the difficult budget year. Council has looked at this issue for the past two years and have looked for a fair way to support organizations while managing costs.

Vice-Mayor Newman agreed with Mayor Bellamy and suggested a transition process where this year there be a 25% cut and then next year a 50% cut so it will give the organizations more time to plan for that.

Councilwoman Manheimer suggested staff explore the concept of a partnership with some of the organizations so they can advertise the City's endorsement.

Mayor Bellamy also felt we need to revisit our policy on costs, e.g., using volunteers in some public safety roles, the number of City public safety people are needed, or having to pay permit fees for bagging meters during a City holiday. We need to try to help the organizations be successful if we can't give them the tools.

Vice-Mayor Newman moved to continue this matter until May 25, 2010, in order to give staff time to come back with alternatives based on Council feedback. This motion was seconded by Councilman Russell and carried unanimously.

I. ORDINANCE NO. 3845 - BUDGET AMENDMENT TO AMEND THE HEALTHCARE BUDGET

MOTION CREATING A BLUE RIBBON TASK FORCE ON HEALTHCARE TO REVIEW BENCHMARKS AND POLICY DECISIONS RELATED TO THE CITY'S HEALTH INSURANCE PROGRAM

Summary: The consideration of two items related to the City of Asheville's Health Insurance Program including (1) an amendment to increase the budget for the Health Care Program by $2,500,000 to cover costs in the current fiscal year that have exceeded original budget estimates and (2) a recommendation to form a Blue Ribbon Task Force on Health Care to review benchmarks and policy decisions related to the city's health insurance program.

(1) FY 2009-2010 Healthcare Budget Amendment

As discussed with City Council during the Quarterly Financial Updates and recent Budget Worksessions, the City has experienced a significant increase in healthcare costs over the last five years due to several factors, including overall general inflation in health care costs, the occurrence of a number of high dollar claims, and the impacts of an aging workforce. In calendar year 2009 alone, the City experienced a 25% increase in the cost of medical, vision and drug claims.

With costs rising so dramatically in the past year, the adopted fiscal year budget for the health care program ($11.2 million) has proven to be inadequate. Based on expenditure trends through the first nine months of the fiscal year, staff estimates health care expenses will end the

year at $13.7 million, or $2.5 million above the original budget. There are also several health care related revenues, such as employee contributions and insurance recoveries, that will exceed the original budget estimates by $800,000.

To cover health care costs in the current fiscal year that are projected to exceed budget, staff recommends that City Council appropriate:

- $800,000 in additional revenue, and
- $1.7 million from the Insurance Fund's fund balance.

(2) Blue Ribbon Task Force on Healthcare

Staff is recommending a number of program changes, including increases to employee premiums and adjustments to plan benefits, to address the trend of rising health care costs. Additionally, city staff also recommends that City Council consider forming a Blue Ribbon Task Force on Healthcare. The task force's work may include an evaluation of best practices to determine the optimal range of health insurance-related benefits afforded to employees, cost-for-service comparisons, employer-employee cost-share analysis, review of the Asheville Project, as well as other areas of interest.

The task force would convene and meet July-December, and the group's work and final recommendations would coincide with the onset of the FY 11-12 budget process (January-February, 2011). City staff, including the Human Resources director, as well as employee benefits staff, would support the task force's work.

Staff would recommend that membership on the task force be comprised on three to five citizens with a background in Human Resources and health insurance management in a medium to large organization. City Council could call for applications to be made through the City Clerk's office, and staff would review and recommend appointments to City Council by June 22, 2010.

Information about the health care budget amendment and associated changes to the health care plan have been reviewed by the City Council Finance Committee and will be discussed at the City Council budget worksession on April 27, 2010.

Pros:

- Provides an adequate budget for the projected FY 2009-10 expenditures in the Health Care program.
- Support staff efforts to make structural changes to the city's health care program to curtail the impact of rising costs.
- Creates a citizen-led task force by which best practices and innovation can be recommended to ensure the city's health care program is efficiently and effectively managed.

Con:

- Reduces the available fund balance in the Insurance Fund.

The Healthcare Program is a part of the City's Insurance Fund, which also includes the Workers Compensation and Liability insurance programs. As of June 30, 2009, the available fund balance in the Insurance Fund totaled $10.4 million. The $1.7 million appropriation requested tonight will lower the estimated June 30, 2010 Insurance Fund fund balance to $8.7 million. Based on standard benchmarks, fund balance should generally equal 6 to 9 months of a fund's operating expenses. At the current rate of expenditure in the Insurance Fund, 6 to 9 months worth of expenses equates to $7.74 to $11.62 million. Thus, the Insurance Fund's estimated fund balance of $8.7 million on June 30, 2010 will remain within the range of an acceptable level.

City staff recommends City Council: (1) approve the budget amendment to appropriate $2,500,000 to fund expenses in the Health Care Program, and (2) approve the creation of a Blue Ribbon Task Force on Health Care and call for applications to the Task Force through the City Clerk's office by May 31 so that staff can make recommendations for appointments to Council no later than June 22, 2010.

Councilman Russell, Chair of the Finance Committee, said that they felt it was a good idea to create a Task Force to look at our health care package.

In response to Mayor Bellamy, Director of Administrative Services Lauren said that this budget adjustment does not include General Fund dollars.

Due to past experience with the Blue Ribbon Civil Service Board Task Force, Mayor Bellamy felt it was important to have a staff component in the Blue Ribbon Healthcare. During the discussion on domestic partner benefits, she asked for, and it was supported by Council, to develop a task force of staff members to talk about health insurance, policies and plans. She hoped that was in place and that a representative from that committee be on the Blue Ribbon Healthcare Task Force.

City Manager Jackson said he is in the process of forming an employee benefits committee and at their first meeting he will ask them to nominate someone to serve on this Blue Ribbon Healthcare Task Force. He felt the committee will be formed next week.

Councilman Russell felt we definitely need to have a Human Resources representative on the Task Force.

Mayor Bellamy agreed that a Human Resources representative should be on the Healthcare Task Force, but also an employee representative (as was an oversight by Council when the Civil Service Board Task Force was established). She could not support the motion creating the Task Force if it does not include an employee representative.

Councilman Russell said that the Blue Ribbon Task Force needs to be an absolutely non-biased group of people that have no personal interest in this discussion. He suggested the Human Resources representative communicate to the City employees. At the end of the process, the Task Force will present a report to Council.

City Manager Jackson suggested five people in the business that manage health benefit plans in the community. We would also have someone there from the Manager's office and someone from the Human Resources Department to aid, assist and offer input. He felt the Mayor had a good suggestion to have someone participate and observe from an employee standpoint. The voting members should come from the five people in the business.

Councilman Smith suggested Councilman Russell serve as the City Council liaison to the Blue Ribbon Healthcare Task Force as he is one of those professionals we would be seeking input from.

Councilman Bothwell moved to adopt Ordinance No. 3845. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 93

Councilwoman Manheimer moved to create a 5 voting member Blue Ribbon Task Force on Healthcare (consisting of people in the business that manage health benefit plans in the community) with Councilman Russell being the City Council liaison and someone from the City Manager's Office and the Human Resources Department to aid, assist and offer input. This

motion was seconded by Councilman Russell and carried on a 6-1 vote, with Mayor Bellamy voting "no."

J. ORDINANCE NO. 3846 - BUDGET AMENDMENT TO INCREASE THE BUDGETED AMOUNT FOR OUTSIDE LEGAL SERVICES

Summary: The consideration of a budget amendment, in the amount of $15,000, to increase the budgeted amount for outside legal services.

The City Attorney's Office budget includes an item for legal services provided by retained attorneys (outside counsel). This includes assistance for such matters as complex litigation, complex real estate, and patent/trademark matters, where the City Attorney's Office does not possess the appropriate expertise on staff, or where professional/ethical conflicts arise. Outside attorneys are usually from local law firms.

Since December of 2009, the City Attorney's Office has experienced some unanticipated staff shortages that have resulted in an increased use of outside counsel. Also the trial of the Biltmore Lake annexation case, which involved outside counsel assistance, took substantially longer than expected.

It is anticipated that $15,000 additional will cover outstanding invoices, and provide enough funding to get through the last quarter of the fiscal year.

Regarding the City Council Strategic Operating Plan, this action ensures operational effectiveness, and uses local services.

Pros:

- Facilitates provision of legal services not available on staff.
- Enables legal staff to address professional conflict issue.

Con:

- Further reduces an already tight annual budget.

This action will reduce Fund Balance by $15,000.

Adoption of the ordinance is recommended.

Councilman Bothwell moved to adopt Ordinance No. 3846. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 - PAGE 95

III. PRESENTATIONS & REPORTS:

A. CIVIL SERVICE BOARD UPDATE

Mr. Larry Harris, Chairman of the Civil Service Board, outlined their mission as defined by the N.C. General Statutes and updated Council on their three basic functions. Goals and objectives for 2010 are (1) to fulfill their statutory responsibilities by conducting grievance hearings when filed and conducting investigations when warranted; and (2) to review the substantive rules regarding employment as outlined in Section 5 of the Civil Service Act and recommend any changes to City Council.

On behalf of City Council, Mayor Bellamy thanked Mr. Harris and the entire Board for their efforts on this Board.

B. ECONOMIC STIMULUS PACKAGE UPDATE

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of City staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is providing an update to City Council on the Energy Efficiency and Conservation Block Grant (EECBG) program performance.

As part of the EECBG program staff is implementing an environmental education program for the community. The focus areas of this program include: recycling, stormwater, energy and climate. The first phase of this educational program focuses on recycling by partnering with the 21st Century Program to work with youth at the Burton Street Community Center. Students developed the community center's recycling station and designed the recycling posters to educate center visitors about the do's and don't of recycling. In addition the students wrote, choreographed and stared in an educational music video about recycling.

Ms. Rachael Doebber showed the music video about recycling and introduced the students who participated in the video.

C. SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT UPDATE

Mr. Matt Raker, Chair of the Sustainable Advisory Committee on Energy & the Environment Committee (SACEE) said that the conclusion of 2009 marks the three year anniversary of the Sustainability Advisory Committee on Energy and the Environment (SACEE). Since then, SACEE has helped the city chart a course towards sustainability through LEED standards, energy reduction goals and advising on policy issues. Our mission explains how we strive to continue on this path:

SACEE's mission is to support the Mayor and Asheville City Council in their charge to integrate sustainable principles related to energy and the environment into City operations and the broader community consciousness, while promoting economic viability, environmental stewardship, and social responsibility - with the intent to improve quality of life for this and future generations, through the following:

- *Policy Guidance*: Provide technical assistance to the Mayor and Council on institutionalizing environmentally sustainable practices by evaluating and developing current and future policies in support of City sustainability commitments.

- *Education:* Increase awareness of matters related to energy and environmental sustainability by developing and implementing outreach and education activities aimed at changing behaviors across a diverse cross-section of the community.

- *Partnership:* Provide leadership and support in creating synergy among public and private partners in the region to maximize efforts towards a more environmentally sustainable future.

The committee reflected upon the mission frequently this past year while the city's sustainability office and program experienced tremendous growth and transition. SACEE, along with the Office of Sustainability, moved from the Department of Public Works to the Administration Services Department. The transition was a smooth one, and resulted in an increased presence of the sustainability office within the city structure and day to day function of city operations. Around the same time SACEE provided policy guidance to Council regarding the

use of the $804,700 of entitlement Energy Efficiency and Conservation Block Grant (EECBG) funds. The EECBG dollars are currently being spent on energy retrofits and renewable energy projects and have created 2 jobs to date.

Early summer 2009 marked a pivotal point in the city's commitment to sustainability when Council, with SACEE's support, adopted the Sustainability Management Plan (SMP). The SMP is the document to guide city operations as they work towards the City Council goal of reducing the municipality's carbon footprint 80% by 2050 at a rate of 2% each year. SACEE is proud to share that The City of Asheville has more than doubled that goal with an annual decrease of 5% from FY 2007-2008 to FY 2008-2009. The most recent carbon footprint is expected from the Office of Sustainability in fall 2010.

Lastly, SACEE worked closely with the Affordable Housing Working Group (AHWG) on green development incentives that the City of Asheville was authorized to develop in 2007 by the State of North Carolina. The SACEE and AHWG partnership efforts in 2009 were focused on a density bonus for developers. The bonus would be offered to developers who design projects with sustainability and affordable housing as a priority. SACEE looks forward to Council reviewing and considering the density bonus.

A full list of SACEE 2009 accomplishments are below as well as the concise goals and objectives of the committee for 2010.

- Worked on Green Density Bonus proposal, including research, determining point values, structure, accountability and rationale. The Committee made a motion in which SACEE supports a joint initiative with the Affordable Housing Working Group that incorporates density bonuses in areas where infrastructure exists to support increased density and services for the greatest number of citizens.

- As an activity of the climate change partnership with Warren Wilson, SACEE co-sponsored the College's conference, "Headwaters Gathering: Southern Appalachia at the Cross Roads." In addition, SACEE sponsored a discussion of local leaders with Majora Carter which focused on developing a green labor force. Attendees included city and county officials, local legislators, Representative Heath Shuler and other local leaders.

- Reviewed and gave input on the Sustainability Management Plan for City operations, endorsed the plan before it was presented to City Council.

- Supported and worked with Council members Cape and Newman on the proposal, now known as the Asheville Energy Independence Initiative. SACEE heard presentations on the initiative as it was being developed and before it was presented to City Council. SACEE sent a resolution to City Council endorsing a phase one pilot program for 2010 for the Asheville Energy Independence Initiative as well as a resolution supporting the use of bonds for fixed asset investment for public facilities for substantial increase in energy efficiency.

- SACEE has made efforts in educating the public and itself about sustainability issues. This included having an internal presentation and discussion about Environmental Justice, and presenting at the Earth Day event at the Public Works building, April 22.

- Regularly heard updates about the Sustainability office, and the progress on grants, community partnerships and internal planning & implementation. Also, SACEE heard regular reports on the data collection of city energy usage and efforts to increase efficiency. Staff kept SACEE up to date on Stimulus funding as it relates to Energy Issues.

- Presenting visitors at regular SACEE meetings included Shannon Tuch (City of Asheville), Margo Flood (Warren Wilson College), Michael Leahy (Asheville HUB), Adam Laucher and Beth Porter (UNCA Interns to City Sustainability Office) and Sherry Ingram of Water Werks.

- The City of Asheville has reduced energy consumption compared to the 2006-2007 baseline. These results will be detailed in the annual report produced by the Sustainability Office.

2010 Goals and Objectives

- Evaluate land use management components of the UDO to provide recommendations for better alignment with City goals and sustainability principles

- Support the City providing leadership and partnering with community partners to develop a plan for community-wide greenhouse gas emissions reduction
  -Need community action plan similar to Berkley, Pittsburg, and many others
  -Model the City of Asheville's internal plan to whole community
  -Ex: 80% in XX years.

As a conclusion SACEE would like to thank City Council for their continued leadership and prioritization of sustainability and climate change concerns.

In response to Councilman Bothwell, liaison to SASEE, Mr. Raker said that the City has an opportunity to send 2-4 voting representatives from our Building Safety Department to the International Building Code revision meeting to help shape the Code.

Vice-Mayor Newman noted that our sustainability results are getting noticed elsewhere and others are hoping to replicate our success.

On behalf of City Council, Mayor Bellamy thanked Mr. Raker, the entire Committee and Maggie Ullman for their efforts and leadership.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING A PORTION OF PROPERTY LOCATED AT 18-20 MEADOW ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN PLACE DISTRICT

ORDINANCE NO. 3847 - ORDINANCE REZONING A PORTION OF PROPERTY LOCATED AT 18-20 MEADOW ROAD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN PLACE DISTRICT

Mayor Bellamy opened the public hearing at 6:50 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone a portion of 18-20 Meadow Road from RS-8 Residential Single-Family High Density District to Urban Place District. This public hearing was advertised on April 16 and 23, 2010.

Mr. Esselstyn said that the property under review with this application is split zoned between Urban Place District (UP) and Residential Single Family High Density (RS-8). The UP portion of the property is located at the bottom of the slope adjacent to Meadow Road. The line dividing the two zoning districts appears to have been established years ago, at a time when this parcel contained tracks for a rail spur, and the railroad right-of-way was used as the dividing line. The railroad tracks have long since been removed, and while the zoning district boundary exists

in zoning maps, it would be extremely difficult, if not impossible, to locate with "survey grade" precision on the ground.

One of the applicant's primary objectives in pursuing this rezoning is to re-establish the line with a description that can be precisely located on a modern survey. Potential developers of the property often wish to know exactly how much of the lot is commercially zoned, and at present, the property owner can not furnish that information, owing to the situation described above.

Another objective of the rezoning is to shift the zoning district boundary north, not all the way to the property line, but far enough up the slope that some retention of the slope could be undertaken without a Conditional Use Permit (CUP) process. A retaining wall related to a commercial development, but within the residential zoning, would constitute an ancillary non-residential use in a residential district, which requires review as a CUP. According to the applicant, the prospect of additional substantial review steps and public hearings, even for a small wall, has discouraged potential developers.

The applicant has requested that the zoning boundary be shifted north to an alignment 30 feet south of the northern property line. Under this proposal, then, a 30-foot strip of residential zoning would be preserved at the highest part of the lot, and the zoning district boundary could be precisely mapped relative to the property boundary. The additional area zoned UP would be roughly one-third of an acre. The northern boundary of the property is also separated from the adjacent residential uses by a 30 foot unopened right-of-way (created for Roebling Circle).

Staff feels that if a substantial retaining wall were to be proposed for this site, it is appropriate that it be reviewed as a CUP. Staff analysis suggests that any wall larger than a modest wall would require modification of the slope on the portion of the property which is proposed to be residentially zoned, triggering the higher standard of review.

Staff also recognizes the sensitivity of the St. Dunstan's historic residential district up the hill from the site, and feels that a significant separation should be maintained between the subject property and those lots. In staff's estimation, the combination of the vertical gap between the areas, the unopened right-of-way, and the proposed 30-foot-strip, as well as the landscape buffering which would be required, would combine to provide a suitable separation.

As of this writing, staff has received one communication from a neighboring property owner regarding this rezoning, and the citizen was simply seeking more information.

At their April 7, 2010, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the request.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Amount of property to actually change zoning designations is small.
- Proposed rezoning would allow location of the zoning boundary with high precision.
- Could encourage development and improvement of an underutilized property.

Con:

- Rezoning would allow commercial development slightly closer to the historic residential district than is currently allowed.

Staff views the proposed rezoning as an appropriate remedy and recommends approval.

Mr. Joe Miller, applicant, explained their concern is erosion for any potential development. He showed various pictures of the elevation difference between this property and St. Dunstan's Circle. He urged Council to approve this rezoning request.

Mayor Bellamy closed the public hearing at 6:55 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3847. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 97

B. PUBLIC HEARING TO CONSIDER ADOPTION OF THE CONSOLIDATED ACTION PLAN FOR FISCAL YEAR 2010 WHICH SETS OUT THE PROPOSED USE OF FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENT PARTNERSHIP ACT FUNDS

RESOLUTION NO. 10-105 - RESOLUTION ADOPTING THE CONSOLIDATED ACTION PLAN FOR FISCAL YEAR 2010 WHICH SETS OUT THE PROPOSED USE OF FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENT PARTNERSHIP ACT FUNDS

Mayor Bellamy opened the public hearing at 6:56 p.m.

Community Development Director Jeff Staudinger said that this is a public hearing will be conducted to receive comments regarding the proposed Consolidated Action Plan for Fiscal Year (FY) 2010-2011, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds for the coming fiscal year., followed immediately by Council's consideration of a resolution authorizing submission of this Consolidated Action Plan to the US Department of Housing and Urban Development. This public hearing was advertised on April 16 and 23, 2010.

The City will have available approximately $1.6 Million in CDBG funds and approximately $1.4 Million in HOME funds in the fiscal year beginning July 1, 2010. The City's Housing and Community Development Committee has made recommendations for the use of CDBG funds, which must be used in housing or community development programs in Asheville, and the Asheville Regional Housing Consortium has recommended uses for the HOME funds, which must be used for housing programs within the four-county Consortium area (Buncombe, Henderson, Madison, and Transylvania counties). A total of 36 programs are recommended for funding. Allocations are consistent with the proposed Strategic Housing & Community Plan for 2010-2015.

If approved, the HOME funds and some CDBG funds will assist in creating or improving 271 housing units and helping an additional 182 households afford housing Consortium-wide. CDBG funds will also benefit more than 8,500 low-income City residents through homeless services, housing counseling, small business assistance, and other needed services. Our partner agencies will contribute over $29,000,000 of other funding to these programs, leveraging $9.60 for every $1 of HOME and CDBG funds.

A public hearing will be held at the Council meeting of April 27. Comments received at the meeting will be incorporated into the Plan, as will comments submitted in writing. The plan is due to be submitted to HUD by May 15.

This Annual Action Plan directly supports Council's Strategic Goals of: (1) Affordable: This plan directly supports the City's affordable housing plan, uses innovative public-private

partnerships to incentivize affordable housing development, and supports initiatives to end chronic homelessness emphasizing the Housing First model; (2) Green and Sustainable: works with regional partners creating green buildings and energy conservation; (3) Safe: Supports employment alternatives for youth at risk of gang exposure; and (4) Job Growth and Community Development: Supports diversified job growth and small business development; promotes sustainable high-density infill growth; and attracts and retains quality employees.

Pros:

- Approval of the Action Plan paves the way for the receipts of over $3,000,000 of HUD funding to the City, which will be used to create affordable housing, create jobs, and improve public infrastructure.
- HUD funding will leverage $29,000,000 of additional funding for these projects.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee and the Asheville Regional Housing Consortium.

Con:

- It is not possible to fund all the applications received, and most of those funded will receive less than the amount requested.

The Action Plan is fully funded from federal CDBG & HOME entitlement grants, unused funds from previous completed projects, and estimated program income. Staff costs to administer the program are also fully paid from federal sources. The funded programs will provide new construction and other economic activity in the City and region, creating and sustaining employment. New assisted housing units to be constructed in Asheville will add significantly to the City's tax base. Staff will bring the FY 2010-11 CDBG and HOME budgets to City Council for adoption in June along with the rest of the City's FY 2010-11 Operating Budget.

Staff recommends approval of the resolution authorizing submission of the City's Consolidated Annual Action Plan for 2010-11 to the U. S. Dept. of Housing and Urban Development.

Mr. Roy Harris urged Council to support the Plan.

Mayor Bellamy closed the public hearing at 7:03 p.m.

In response to Councilwoman Manheimer, Mr. Staudinger explained what falls into the administration category.

Councilman Smith felt that all the projects deserve more attention and funding; however, we had less funds than last year to allocate. For those groups that did not receive funding, he encouraged them to reapply knowing they have worthy projects.

Vice-Mayor Newman noted that the Asheville Regional Home Consortium is a great model of regional cooperation.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-105. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33– PAGE 26

C. PUBLIC HEARING TO CONSIDER ADOPTION OF THE CONSOLIDATED STRATEGIC HOUSING AND COMMUNITY DEVELOPMENT PLAN FOR 2010-2015

RESOLUTION NO. 10-106 - RESOLUTION ADOPTING THE CONSOLIDATED STRATEGIC HOUSING AND COMMUNITY DEVELOPMENT PLAN FOR 2010-2015

Mayor Bellamy opened the public hearing at 7:08 p.m.

Community Development Director Jeff Staudinger said that a public hearing will be conducted to received comments regarding the proposed Consolidated Strategic Housing and Community Development Plan for 2010-2015, which sets out the proposed priorities, strategies and performance targets for the use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds for 2010-2015, followed immediately by Council's consideration of a resolution authorizing adoption of the Plan and submission of this Consolidated Strategic Housing and Community Development Plan for 2010-2015 to the US Department of Housing and Urban Development. This public hearing was advertised on April 16 and 23, 2010.

Every five years, the City is required to prepare a Consolidated Strategic Housing and Community Development Plan to set out broad priorities, strategies, and targets for the use of Community Development Block Grant (CDBG) and HOME funds. This Strategic Plan covers not just the City of Asheville, but also the four-county Asheville Regional Housing Consortium (Buncombe, Henderson, Madison, and Transylvania counties) within which HOME funds are used.

Under the direction of the Consortium Board, staff commissioned a detailed Housing Needs Assessment for the entire Consortium, and prepared a more limited assessment of non-housing community development needs for Asheville. Nine public meetings and 12 focus groups were held to gather community input on priorities and strategies. An on-line poll on priorities received 289 responses.

He reviewed with Council Buncombe County's highest priorities: (1) affordable rental housing, particularly for households earning 60% of median income or less; (2) coordinate housing development with transportation, jobs and services and make efficient use of land and infrastructure; (3) emphasize high quality, energy efficient, environmentally friendly designs; and (4) house those with special needs – the homeless, the frail elderly, persons with mental illness, and people with disabilities and help them succeed through support services coordinated with housing development. Addition priorities include (1) target low wealth neighborhoods for improvements that will improve housing conditions and create strong communities; (2) preserve existing housing and focus preservation efforts to make rental and homeownership housing affordable to promote long-term affordability; and (3) promote homeownership.

He also provided the highest priorities for Henderson County, Madison County and Transylvania County.

He explained the housing achievements for the Consortium for 2005-09 and the housing projection targets for the next five years (annual target is 240 total units and five-year target is 1200 total units).

He provided Council with the homelessness priorities and non-housing community development's highest priorities for the next five years.

Using numbers from the past five years of 2005-09, he provided Council with a list of non-housing outcomes assisted with CDBG funds. He also provided them with non-housing targets for the next five years.

The draft Plan was published on March 28, to allow for a 30-day public comment period. A final public hearing is required during this comment period. Staff will then seek Council's approval of the Plan.

The Annual Action Plan for 2010-2011, which allocates CDBG and HOME funds to specific activities over the next 12 months, is the subject of a separate public hearing and resolution, also on April 27.

This Consolidated Strategic Housing and Community Development Plan directly supports Council's Strategic Goals of (1) Affordable: Directly supports the City's affordable housing plan, uses innovative public-private partnerships to incentivize affordable housing development, supports the Housing Authority goals to redevelop public housing, and supports initiatives to end chronic homelessness emphasizing the Housing First model; (2) Fiscal Responsibility: Identifies resources for strategic initiatives and creates meaningful performance measure for programs and services, provides opportunity to leverage partnerships for capital improvements and infrastructure projects, and proactively pursues funding opportunities; (3) Green and Sustainable: Outlines how we work with regional partners creating green buildings and energy conservation, and supports implementation of a multi-modal transportation plan; (4) Job Growth and Community Development: Supports diversified job growth and small business development; promotes sustainable high-density infill growth; and attracts and retains quality employees; and (5) Safe: Supports recreation and employment alternatives for youth at risk of gang exposure.

Pros:

- The Consolidated Strategic Housing and Community Development Plan enables the City to access federal funding for affordable housing and community development, estimated at $15,000,000 of direct funding over the next five years;
- These funds are used for projects that create affordable housing, create jobs, and improve public infrastructure.
- Other public and private investment in these projects has historically averaged over 9-1, potentially resulting in additional investment of over $135,000,000 in the next five years;

Cons:

- Decision-makers and administrators must recognize that the Plan is a guide, not an unalterable dictate, and should stay alert to changing economic and social conditions. The Plan should not be an impediment to innovation.
- The use of the federal funds is regulated, and care must be taken to ensure compliance in the use and administration of the funds.

The Consolidated Strategic Housing and Community Development Plan provides the mechanism for receipt of significant federal funds by the City and region. These funds are used to primarily benefit low and moderate income persons through affordable housing, economic development, public services and public facilities. Staff costs to administer the program are fully paid from federal sources. The funded programs will provide new construction and other economic activity in the City and region, creating and sustaining employment. Projects constructed using these funds have the potential to add millions of dollars to the City's tax base.

Staff recommends approval of the resolution authorizing adoption and submission of this Consolidated Strategic Housing and Community Development Plan for 2010-2015 to the US Department of Housing and Urban Development.

Mayor Bellamy closed the public hearing at 7:18 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-106. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33– PAGE 27

At 7:20 p.m., Mayor Bellamy announced a short recess.

V. UNFINISHED BUSINESS:

A. SHORT-TERM ACTION PLAN ON THE TRANSIT MASTER PLAN IMPLEMENTATION

RESOLUTION NO. 10-107 - RESOLUTION AUTHORIZING CITY STAFF TO IMPLEMENT CERTAIN OPERATIONAL CHANGES TO THE TRANSIT SYSTEM INCLUDING ON-TIME PERFORMANCE CHANGES, 30-MINUTE FREQUENCY, AND CONSOLIDATING EVENING ROUTES INTO DAY ROUTES

RESOLUTION NO. 10-108 - RESOLUTION AUTHORIZING CITY STAFF TO MOVE FORWARD WITH DEVELOPING A MARKETING STRATEGY TO PROMOTE THE OPERATIONAL CHANGES AND CREATING A NEW "BRAND" FOR THE TRANSIT SYSTEM

ORDINANCE NO. 3848 - BUDGET AMENDMENT TO SET UP THE PROJECT BUDGET FOR THE MARKETING STRATEGY PROJECT

Director of Transportation Ken Putnam said that this is the consideration of (1) a resolution authorizing City staff to implement certain operational changes to the transit system, based on recommendations included in the Transit Master Plan; (2) a resolution authorizing City staff to move forward with developing a marketing strategy to promote the operational changes and creating a new "brand" for the transit system; and (3) a budget amendment, in the amount of $150,000 amending the capital projects budget to account for the $150,000 marketing strategy cost.

As requested by City Council on March 9, 2010, the subject staff report has identified an alternative method to fund the 20% Local match for the marketing strategy cost.

The Transit Master Plan (TMP) was approved by City Council on October 27, 2009. As a part of the plan's approval, City Council asked staff to meet with the Transit Master Plan Steering Committee and the Transit Commission to develop an action plan to begin the implementation process for the Transit Master Plan. City staff met with both groups during November and December 2009 and developed the action plan. The complete report was sent to City Council members on March 2, 2010. The action plan focuses on three operational areas; specifically, operational changes, fare structure, and marketing. The specific recommendations for each area are listed as follows:

- Operational Changes

In order to provide better service to our customers, 30-minute frequency is recommended along the main corridors. In order to accomplish this task, existing routes would be staggered in four corridors; namely, Patton Avenue – Routes 15 and 16, Haywood Road – Routes 1 and 9, Biltmore Avenue – Routes 4 and 8, and Tunnel Road – Routes 13 and 26. Merrimon Avenue would remain at hourly service (In order to achieve 30-minute frequency along Merrimon Avenue, an additional bus would be needed and that is cost prohibitive at this time).

System-wide on-time performance changes are also recommended. Currently, one of the biggest challenges the transit system faces is keeping the buses on-time mainly due to route deviations and Dial-A-Ride service. In order to accomplish this task, existing route deviations will be reduced or eliminated and Dial-A-Ride service will be stopped. The subject action will address driver's concerns with the current route schedules and the pressure they constantly receive from riders to be on-time. First Transit, the City's management company, stresses safety and has an extensive ongoing training program for the bus drivers. This training includes defensive driving, state laws regarding safe driving, accident reporting and investigation, and regular safety meetings. The overall purpose of the training is to ensure that the rider's safety is always the main consideration when using an Asheville Transit bus.

Finally, consolidating the evening routes with the day routes, eliminating the gap, and ending the evening routes earlier is recommended. This change will eliminate the current gap existing between day and evening routes and will provide service to 10:30 pm as recommended in the Transit Master Plan. The evening routes will replicate the day routes as much as possible making system navigation smoother for the rider. This change will save about $65,000 per year.

The total cost to implement the 30-minute frequency on four of the five major corridors and the system-wide on-time performance changes, and the changes to evening service is $44,000. $31,000 of the cost is due to the production and printing of new maps and is included in the marketing section. The remaining $13,000 will be absorbed in the current fiscal year's operating budget.

The timeline to implement these changes would be 120 days beginning after City Council approval.

Although the action plan recommends implementing the system-wide short-term recommendations as proposed in the Transit Master Plan including Sunday service, 30-minute frequency on all five main corridors, and more evening service, City staff is not asking for specific action at this time. This recommendation should be considered as a part of the overall ongoing budgetary process for Fiscal Year 2010-11.

- Marketing

One of the most important elements to enhance the Asheville Transit System, as expressed in the Transit Master Plan, is to develop a marketing strategy that focuses on the creation of a new image for the system and promotion of route changes including system "branding" (logo), color schemes for the buses, signs, and new maps. The City would hire a consultant to support and assist in the implementation of the marketing strategy. Marketing is an eligible expense under the annual Federal allocation, with an 80%/20% ratio (Federal/Local).

The total cost to implement the subject marketing strategy is a maximum of $150,000, with $120,000 being paid by Federal Funds and $30,000 paid by City Funds. $13,000 of the Local match will come from a settlement with Professional Transit Management, the former management company and the remaining $17,000 will come from projected savings in the current fiscal year's transit operating budget. The consulting work represents 33% of the cost, which equates to $50,000. The balance of the cost, $100,000, will be used to produce and print the appropriate schedules and maps.

The timeline to complete the subject task would be 120 days beginning after City Council approval.

This action complies with the current City Council's Strategic Operating Plan for Fiscal Year 2009-10 by helping to support a sustainable community through a strong commitment to long-term planning and fiscal responsibility; and helping to establish a multi-modal transportation plan by making needed transit system improvements.

The Transit Commission and the Transit Master Plan Steering Committee support the subject actions. Both groups actively participated in the process to suggest the recommendations.

Pros:

- On-time performance changes will increase the transit system's reliability and will have a positive impact on the drivers and riders.
- 30-minute frequency on four of the five main corridors will give riders more mobility options and will potentially attract choice-riders to the system.
- The elimination of the evening gap and consolidating the day routes will make system navigation smoother for the rider.
- The marketing strategy will give a fresh image to the transit system, promote the operational changes, and highlight the new buses that the City should receive towards the end of the current calendar year.
- Federal Funds will provide 80% of the total cost of the marketing task, which equates to $120,000.

Cons:

- The total maximum cost of the subject project is $163,000.
- The $13,000 cost to implement the operational changes would be absorbed by the current fiscal year's transit operational budget.
- A 20% local match, which equates to $30,000, is required for the marketing task.

The total anticipated cost of the subject project is $163,000. The $13,000 operational changes cost will be absorbed by the current fiscal year's transit operational budget. The marketing strategy cost of $150,000 will be funded with Federal Funds at the rate of 80% or $120,000 and the balance of $30,000 by the City. The Local match is funded through monies that will come as a $13,000 settlement from the former management company and $17,000 in projected savings from the current fiscal year's Transit Fund operating budget. Throughout the current fiscal year, City staff has been projecting that the Transit Fund operating budget would finish the year with better than budget performance of approximately $56,000. Even by absorbing the subject $30,000 in the current fiscal year's operating budget, Transit should still finish the year about $26,000 better than budget. No additional funding from the General Fund is required for this project.

City staff recommends that City Council adopt (1) a resolution authorizing City staff to implement certain operational changes based on recommendations included in the Transit Master Plan; (2) a resolution authorizing City staff to move forward with developing a marketing strategy to promote the operational changes and creating a new "brand" for the transit system; and (3) a budget amendment amending the capital projects budget to account for the $150,000 marketing strategy cost.

Mr. Mike Fryar did not support spending $150,000 for marketing.

Ms. Hanna Raskin, Chair of the Transit Commission, spoke in support of these short-term initiatives.

Mr. Paul Van Heden, Vice-Chair of the Transit Commission, felt these actions are a start and urged Council to support them.

Councilman Russell felt that he could not support spending $150,000 for a marketing plan.

Mayor Bellamy noted that 80% of the budget will be federal funds and was pleased to see that staff has found an alternative way to raise the City's 20% ($30,000) portion. Transit is an important asset to our community as 17% of our transit users don't have any other means of transportation to get to school and work. We do subsidize the transit system, but we also subsidize other programs that provide services as well.

Councilman Bothwell felt transit benefits the workers and also the businesses that hire the workers. He felt that using transit is cheaper than building new parking spaces.

Mayor Bellamy said that Council has been previously furnished with copies of the resolutions and ordinance and they would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-107. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 28

Vice-Mayor Newman moved for the adoption of Resolution No. 10-108. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Russell voting "no".

ORDINANCE BOOK NO. 26 – PAGE 100

B. PARKING DECK RATES UPDATE

Transportation Director Ken Putnam said that purpose of the subject memorandum is to provide City Council a final report regarding the impact that the new variable parking rate structure is having on after hour's customers to the City's three parking decks *(The term "after hour's customers" refers to the activities that take place in the City's three parking decks after 7:00 pm on weekdays and on weekends).*

In addition, City staff will provide an update regarding the discount rates for parking in the decks that were approved on October 13, 2009 (Resolution # 09-217).

Prior to the equipment upgrade that was completed in the City's parking decks during September 2009, a flat $1.00 fee was charged to customers exiting the Civic Center Deck and the Rankin Avenue Deck and a flat $2.00 fee was charged to customers exiting the Wall Street Deck after 7:00 pm on weekdays and on weekends *(not including times when the special event fee was in effect)* because the old equipment could not support variable rates. Some customers quickly learned that they could enter one of the City's parking decks anytime during the day and if they waited until 7:00 pm to leave, they would only pay either a $1.00 or $2.00 *(in the Wall Street Deck)* instead of the appropriate fee up to the daily maximum. Not only did this practice decrease potential revenues to the City, it created an unequal rate structure compared to daytime customers.

City staff began the process to replace the old equipment in late 2005. Originally, the equipment upgrade project was going to be included with the Haywood Street Parking Deck project. When that project did not materialize, City staff recommended and City Council approved the funds for the equipment upgrade project in FY 2008-09. In addition, City Council approved the variable rate structure and eliminated the flat fee as a part of the FY 2008-09 budget process. Given the downturn in the economic climate that began in late 2008 and continued in 2009, City staff decided that it would be a good idea to revisit the new variable rate structure before it was

implemented. They met with the Asheville Downtown Association and the Downtown Commission and both groups agreed that City staff should move forward with implementation. City Council also agreed that City staff should move forward and as a result, the new rate structure became effective on September 8, 2009.

Within the first 30 days that the new rate structure became effective, citizens began sharing some concerns with City Council members. The primary concern included the conclusion that long-term customers *(nighttime workers)* were now being "forced" out of the parking decks and onto the streets where on-street parking is free after 6:00 pm. As a result, these long-term customers are now using on-street parking spaces that should be used by restaurant patrons and shoppers.

In order to analyze the primary concern in a fair, logical, and reasonable manner, City staff suggested that parking activity be monitored closely for a six-month time period between October 1, 2009 and March 31, 2010 and then compare the results with the same time period a year ago. City Council agreed with this suggestion and asked that an interim report be presented on February 9, 2010 and the final report to be presented on April 27, 2010.

According to our records, 47,100 after hour's customers used the City's parking decks between October 1, 2008 and December 31, 2008 compared to 46,700 after hour's customers between October 1, 2009 and December 31, 2009. The data indicates that the after hour's parking deck usage has virtually remained at the same level with a decrease of only 400 customers. Much of the decrease could be attributed to the major snowstorm that hit Asheville on December 18, 2009.

Under the old flat rate structure, the City would have received a minimum of $47,100 in revenue *(not accounting for the $2.00 fee in the Wall Street Deck)*. With the new variable rate structure, the City actually received $65,400 in revenue. It should be noted that 44% of the after hour's customers paid less than $1.00 to exit the parking decks. 65% of the after hour's customers *(44% + 21%)* paid less than $2.00 to exit. The total "stay" for these customers was less than three hours with the first hour being free. The remainder of the after hour's customers stayed in the parking decks for three hours or more *(93% stayed in the parking decks for a total time period of less than eight hours with the first hour being free)*.

FINDINGS – FINAL REPORT - According to our records, 86,700 after hour's customers used the City's parking decks between October 1, 2008, and March 31, 2009, compared to 81,300 after hour's customers between October 1, 2009, and March 31, 2010. The data indicates that the after hour's parking deck usage has virtually remained at the same level with a decrease of 5,400 customers. Much of the decrease could be attributed to the major snowstorms that hit Asheville during the winter months. In an effort to encourage citizens to keep their vehicles off of the streets during the snow cleanup periods, free parking was offered to anyone at the three City parking decks. During four of the major snow events, the City experienced a decrease of 8,200 customers in the parking decks, which exceeds the overall total decrease for the six-month test period. Based on this information, a reasonable conclusion can be made that if the snow events had not occurred, the after hour's customers would probably have been higher than the previous year.

Under the old flat rate structure, the City would have received a minimum of $86,700 in revenue *(not accounting for the $2.00 fee in the Wall Street Deck)*. With the new variable rate structure, the City actually received $119,800 in revenue, a 38% increase. It should be noted that 45% of the after hour's customers paid less than $1.00 to exit the parking decks. 66% of the after hour's customers *(45% + 21%)* paid less than $2.00 to exit. The total "stay" for these customers was less than three hours with the first hour being free. The remainder of the after hour's customers stayed in the parking decks for three hours or more *(93% stayed in the parking decks for a total time period of less than eight hours with the first hour being free and 7% stayed in the parking decks for more than eight hours)*.

PARKING DECK DISCOUNT RATES

City Council approved the following discount rates for parking in the decks on October 13, 2009 (Resolution # 09-217):

- A 15% discount for 10 or more monthly parking spaces owned by one individual or agency in the Civic Center Parking Deck.
- A 10% discount of five to nine monthly parking spaces owned by one individual or agency in the Civic Center Parking Deck.
- A 15% discount for 300 or more bulk vouchers purchased at one time by the same individual or agency for hourly parking in any of the City Parking Decks.

Currently, five individuals and/or agencies are taking advantage of the 15% discount affecting 145 parking spaces in the Civic Center Parking Deck and seven individuals and/or agencies are taking advantage of the 10% discount affecting 46 parking spaces in the Civic Center Parking Deck *(During October 2009, a total of 13 individuals and/or agencies took advantage of the discounts)*. Three to four agencies are taking advantage of the 15% discount for 300 or more bulk vouchers purchased at one time for use in any of the City Parking Decks.

CONCLUSIONS

As stated earlier, the purpose of the subject memorandum is to provide City Council with information *(based on actual use of the parking decks for the six-month period from October 1, 2009, through March 31, 2010)* regarding the impact that the new variable parking rate structure is having on after hour's customers. Although, we cannot measure how many customers are now using on-street parking spaces because of the new rate structure, the data suggests that the usage is virtually the same or higher when compared to the time period from October 1, 2008, through March 31, 2009, when the major snow events are removed. The City is currently experiencing a strong demand for parking spaces during the evening hours especially on the weekends.

Another issue that City staff has been monitoring is how well the new parking deck equipment responds to special event activities. This equipment, which now accepts credit and debit cards, responds well during times of normal exiting activity throughout a typical day. It does not respond well during exiting activities for a special event when everyone is leaving at the same time with only one available exit access point for the Rankin Street and Wall Street Parking Decks. Typically, during special events, a special event-parking fee is charged and is collected when the customers enter a parking deck. That way, no time is lost for fee collection as customers leave a parking deck. City staff has experimented with having a special event fee at the Civic Center Parking Deck but not at the Rankin Street and/or Wall Street Parking Decks in an effort to provide choices for all of the customers coming to downtown including the ones that are not attending the special event. Based on customer feedback, that experiment has not worked in a satisfactory manner. In an effort to improve the customer experience, we are now staffing the Rankin Avenue and Wall Street parking decks until 11:00 pm on Fridays and Saturdays throughout the summer *(we also provided an extended service during the months of November and December 2009)*. City staff continues to look for ways to improve the customer experience and we will continue to make appropriate changes.

Based on this information, City staff does not recommend any specific changes at this time. We can and will continue to monitor the parking activity to identify any unusual trends that might develop.

In response to Councilman Smith, Mr. Putnam said that the City Attorney will be bringing a report to Council regarding handicapped parking policy downtown.

Councilwoman Manheimer felt that to park in our decks is a good deal, and felt the City should continue to evaluate whether we are charging a market rate for a destination city such as Asheville.

Mr. Putnam responded to Mayor Bellamy when she suggested providing incentives for handicapped people to park in our parking garages.

VI. NEW BUSINESS:

A. MOTION TO APPROVE DOWNTOWN ASSOCIATION FEE WAIVER REQUEST THROUGH DECEMBER 2010 FOR CULTURAL ARTS PROGRAM IN PRITCHARD PARK

Superintendent of Cultural Arts Diane Ruggiero said that this is the consideration of a request from Asheville Downtown Association (ADA) to waive park rental fees in the amount of $21,650 and to waive fire, zoning and technical review fees in the amount of $11,076 for a total fee waiver in the amount of $32,726 for a cultural arts program at Pritchard Park.

ADA proposes conducting a cultural arts program at Pritchard Park during the park's regular operation hours according to the dates listed on the attached documents.

The mission of the ADA is to be a voice of the downtown community and to promote and support quality economic, cultural and residential development of downtown Asheville. All of the events conducted by ADA will be free and open to the public.

In 2008, the City supported the cultural arts program in Pritchard Park in which the City allocated $10,000 in cash and waived the park rental fee and fire, zoning and technical review permit fees for a total value of $17,585. In 2009, the City continued to support the cultural arts program and waived park rental fees and fire, zoning and technical review permit fees for a total value of $9,011.

For 2010, the ADA is requesting permit and fee waivers for a total of 117 event days from May 2010 until June 2011. The total event permits include park rental fees (valued at $21,650) as well as fire, zoning and technical review permit fees (valued at $11,076) for a total fee waiver in the amount of $32,726 for the said events.

This would represent a 41% increase in the number of events from last year held by ADA for programming in the park.

The additional events days will put a strain on City resources such as Police, Fire, Sanitation, Park Maintenance and will have a greater impact on the availability and usage of the park by other citizens and groups.

Pros:
- Enhances ADA's ability to provide cultural arts programming in Pritchard Park
- Supports recommendations of the Downtown Social Issues Task Force

Cons:
- Lost revenue from permit fee waivers in the amount of $2,964;
- Lost revenue from park rental fees in the amount of $6,275;
- Reduces the use of the park by other groups or individuals;
- Limits park reservation availability to only Monday's and Wednesdays.
- Events put a strain on City resources such as Police, Fire, Sanitation, Park Maintenance, etc.

Under staff's proposal, the lost revenue to the General Fund for facility rentals, permits and technical review will be $9,239.

City staff recommends City Council to approve waiving of the requested park rental fees for May and June, 2010 in the amount of $6,275, and the fire, zoning and technical review permit fees in the amount of $2,964 for a total value of $9,239; and that the Parks and Recreation Advisory board develop a recommendation for council consideration for the cultural arts program in Pritchard Park for the remaining dates requested by ADA.

Vice-Mayor Newman moved to waive the requested park rental fees for May and June, 2010 in the amount of $6,275, and the fire, zoning and technical review permit fees in the amount of $2,964 for a total value of $9,239; and that the Parks and Recreation Advisory board develop a recommendation for council consideration for the cultural arts program in Pritchard Park for the remaining dates requested by ADA. This motion was seconded by Councilwoman Manheimer.

Mr. Bryon Greiner, representing the Downtown Association, briefly explained the history of programming in Pritchard Park. He said they are not asking for cash, but for fee waivers to program the park 4 days a week. He felt that there would not be a strain on others using the park because not a lot of people are scrambling to rent the Park. Their budget is planned per calendar year, noting the programming includes the holiday parade, and asked Council to waive the fees for 2010 and the programming dates in May/June 2011.

Ms. Kitty Love also explained the history of how the program in the Park first started in 2008. City Council was concerned with how the Park was being used and after a group of citizens looked at best practices and successes in other places, it was determined if you bring more people in the Park it will be used. City Council then appropriated $10,000 seed money to get the programming started. She encouraged Council to approve these fee waiver requests because we have had success with this program. It also benefits the lives of grassroots artists in our community.

One of the artists in the Pritchard Park programming, the Hoop Jam, urged Council to waive the fees. She showed pictures of how her particular business has brought people into the Park.

Mr. Adrian Vassallo, Treasurer for the Asheville Downtown Association, said that they want to not only complement the program but partner with existing businesses downtown. He hoped Council would look favorably upon their request.

Councilman Bothwell wondered if these fee waivers should be a part of the conversation of co-sponsorship that was continued to May 25. He also wondered if we will be setting aside other events in Pritchard Park since the Downtown Association is booking up all Saturdays and Sundays.

Councilman Smith supports the Downtown Association and acknowledges the benefits for downtown, but we are raising fees at one meeting and then waiving them for one organization without consideration of other organizations in other parks. He felt this should be discussed in the other conversation about fee waivers and event subsidies in general. He did not want to look at these fee waiver requests on a case by case basis. As a compromise this time for the Downtown Association he would offer that we waive all fees in Pritchard Park for the entire year for all groups.

In response to Councilman Smith's compromise, Vice-Mayor Newman felt we need to think through all the groups that use Pritchard Park because there might be some that we would have a trouble explaining to taxpayers why we waived their fees for their event. He would not support Councilman Smith's suggestion to waive all fees in Pritchard Park for the year.

In response to Vice-Mayor Newman, Mr. Greiner said that in the fall of 2009 the Downtown Association agreed to take over the programming aspect. They were under the impression that the Friends of Pritchard Park's permit ran until May 31 of this year so they applied for the period of June 1, with the idea that this year's programming would start under their permit. However, they now understand that their permit expired on December 31. They thought everything was in place when they did planned their budge for the entire year.

Vice-Mayor Newman supported waiving the fees through the end of December, 2010. He felt these are different events than co-sponsorship events. We should support this because we are trying to reclaim our space that has been troubled in the past. If we don't support this programming in this Park, we will spend more money for law enforcement.

Councilman Bothwell noted that the nationally known Drum Circle brings in far more people than probably all four days of events to downtown and they are talking about raising fees for them.

Councilman Smith looked forward to discussions of a clear policy as to what we want to do with our parks.

Councilwoman Manheimer noted that some entities who apply for grants for a certain amount of money have to prepare a thorough grant application with all kinds of scrutiny to demonstrate that they are a sound organization to receive the funds. That may be something we need to adopt so we can maintain a more objective posture in what we fund, recognizing that there is value in funding a lot of different programs through fee waivers.

The motion made by Vice-Mayor Newman to waive the requested park rental fees for May and June, 2010 in the amount of $6,275, and the fire, zoning and technical review permit fees in the amount of $2,964 for a total value of $9,239; and that the Parks and Recreation Advisory board develop a recommendation for council consideration for the cultural arts program in Pritchard Park for the remaining dates requested by ADA and seconded by Councilwoman Manheimer carried on a 6-1 vote, with Councilman Smith voting "no."

Mayor Bellamy said that staff has been directed to come back to Council on May 25 regarding co-sponsorships. When staff comes back with whatever is recommended, she asked that the formula not be just for this fiscal year but at least for two years. While we are on a fiscal year calendar (July 1-June 30), others in the community may not be. We need to let the community know what to expect. If we are clear up front with the rules, we won't have so many exceptions at the end.

Councilman Davis moved to waive the requested park rental fees and the fire, zoning and technical review permit fees through the end of December, 2010, with a larger on-going conversation how we deal with Pritchard Park. This motion was seconded by Councilman Russell.

Mayor Bellamy noted that we have volunteers and community partners helping us with our problems. We changed the rules when we stopped giving money and fee waivers without letting them know in advance. She felt that programming in Pritchard Park and the Nuisance Court has really transformed Pritchard Park.

Discussion occurred, initiated by Councilwoman Manheimer, about a long-term partnership agreement with the Downtown Association.

City Attorney Oast said that as a result of the negotiations there is some need for the fee waiver structure between now and the end of the year to change, it can be covered in the partnership agreement.

Councilman Smith could not support the fee waivers; however, he would support a partnership agreement between the parties.

The motion made by Councilman Davis to waive the requested park rental fees and the fire, zoning and technical review permit fees through the end of December, 2010, with a larger on-going conversation how we deal with Pritchard Park and seconded by Councilman Russell carried on a 5-2 vote, with Councilman Bothwell and Councilman Smith voting "no."

B. RESOLUTION NO. 10-109 - RESOLUTION APPROVING A HOUSING TRUST FUND LOAN TO MOUNTAIN HOUSING OPPORTUNITIES (LARCHMONT)

Community Development Director Jeff Staudinger said that this is the consideration of a resolution authorizing approval of a Housing Trust Fund loan to Mountain Housing Opportunities - Larchmont.

Staff has received an application from Mountain Housing Opportunities (MHO) requesting $400,000 from the Housing Trust Fund (HTF) for the development of sixty (60) affordable rental units at 785 Merrimon Avenue. The application was presented to the Housing and Community Development Committee (HCD) on January 28 and was recommended for approval. A zoning change request from Institutional to Urban Residential Conditional Zoning was heard and approved by City Council on March 23rd.

A. Available Funds

The current available balance in the Trust Fund is $282,909.24. Given the limited resources available, HCD has chosen to commit funds contingent on the anticipated receipt of future program revenue. Disbursements for the Larchmont project are not expected to occur until early 2011. Scheduled HTF payments for the remainder of the calendar year are projected at $146,591. This estimate includes regular monthly payments of principal and interest and scheduled loan payoffs.

Due to uncertainty about continued support from the general fund, this estimate does not include any new appropriations that may be allocated during the annual budget process. Additional program income may be realized through land sales, release fees, and/or early loan payoffs but have not been considered in these projections as the payments would be speculative and the timing of receipt is unknown. Late year construction loan payments have also been excluded given the potential for delays in construction that may require a short-term extension.

B. Project Proposal

The proposed project is a multifamily development on 2.29 acres bordering East Larchmont Rd, east of Merrimon Avenue and directly behind the Grace Station Post Office. The site was formerly occupied by the Naval Reserve Center which has since been demolished. The property is easily accessible to transit, employment, and services and meets many of the City's strategic goals and objectives. The total anticipated project cost is $8.2 million.

The application scored 118 of a possible 130 points. The terms requested are $400,000 at 2.00% interest for 30 years, representing 4.9% of total project cost. Payments will be interest-only with principal deferred. The per-unit subsidy is very low at $6,667. The project will be heavily leveraged with tax credit financing and all units will remain affordable to those below 60% AMI for a minimum of 30 years. There will be a variety of 1, 2, and 3-bedroom floor plans. In response to current community needs, more than 50% of the units will be one-bedroom units. Three (3) units will be ADA compliant and an additional three (3) units will be handicapped visitable.

The project directly supports the City's Strategic Operating Goals in the following areas (1) *Affordable*: The project proposal is supportive of the City's goal of providing safe and decent

affordable housing units to the citizens of Asheville; and (2) *Sustainable*: The proposed project provides new housing units located near transit lines, higher urban development densities, and encourages higher standards of energy efficiency. The project also addresses the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing affordable rental units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

Pros:

- A large number of affordable units will be created.
- Low per-unit subsidy.
- Development team has been successful on similar projects.
- The urban location provides easy access to employment, transit, and services.
- 30 years of guaranteed affordability.
- Very low site development costs.
- The development will obtain Energy Star certification.
- Addresses the need for additional one-bedroom units.
- The project is heavily leveraged with other funding.

Cons:

- The estimated land cost is very high at $30,000 per unit. The developer is confident that they can absorb this cost as a result of the very low site development expense.
- Final sales price of the land has not yet been established (lesser of $1.8 million or the appraised value).
- Land has not yet been appraised.
- The projected rate of sale for tax credits is very optimistic. Failure to find an investor at the projected sales price of .76 cents could substantially reduce equity and create a financing gap that would need to be filled through other sources.

The current balance in the Trust Fund is $282,909.24. There are insufficient funds at the present time to fully fund the proposed development; however, anticipated program revenues in the amount of $146,591 are expected prior to disbursement of the $400,000 to MHO in early 2011. This forward commitment allows the City to support an additional project and utilize existing resources to the fullest extent possible.

If the loan is approved as requested, the available fund balance will be reduced by $400,000 to -$117,090.76; however, additional funds anticipated in the new budget year will return the fund to a positive balance. All disbursements from the Housing Trust fund for the proposed project will be subject to the availability of funds and will be made only upon receipt of program income equal to or greater than $117,100.

The project is new construction and is anticipated to add $8.2 million dollars in new development to the City tax base.

The Housing and Community Development Committee recommends City Council approve a resolution approving a loan of $400,000 to Mountain Housing Opportunities for the development of 60 rental units at 785 Merrimon Avenue.

Vice-Mayor Newman felt this is a good way to utilize our Housing Trust Fund dollars to leverage private investment.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Manheimer moved for the adoption of Resolution No. 10-109. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 30

C. ORDINANCE NO. 3849 - ORDINANCE REGULATING SMOKING IN MUNICIPAL BUILDINGS AND ON MUNICIPAL GROUNDS

Assistant City Attorney Kelly Whitlock said that this is the consideration of an amendment to Chapter 11 of the City's Code of Ordinances pertaining to smoking as a result of the new state law giving local governments increased authority to regulate smoking on municipal grounds and public places.

In 2009, the North Carolina General Assembly enacted a law that creates a statewide prohibition of smoking in restaurants, bars and certain lodging establishments, and also gives local governments increased authority to regulate smoking on municipal grounds and public places. The new law went into effect on January 2, 2010.

Previously, local governments could regulate smoking in government buildings and vehicles but this authority did not extend to parks or other municipal grounds. The new law extends the local government's authority to regulate smoking to "grounds", which is defined as an unenclosed area owned, leased, or occupied by local government, and "public spaces" which is defined as an enclosed area to which the public is invited or in which the public is permitted. While this is a significant expansion of regulatory jurisdiction, it does not include streets or sidewalks within the public right-of-way. The new law specifically prohibits local governments from regulating smoking in certain private premises, including residences and vehicles, tobacco shops, the premises of tobacco products processors/manufacturers, designated smoking guest rooms in lodging establishments, cigar bars, private clubs, and motion picture, television or theater sets.

For counties, a prerequisite to local government action is that a rule or policy must be adopted by the local board of health after July 1, 2009. Pursuant to this provision, the Buncombe County Board of Health adopted a resolution recommending that smoking be prohibited in all County facilities and on all County property. On August 4, 2009, Buncombe County passed an ordinance which extended its smoking prohibition to include Buncombe County grounds and Buncombe County vehicles. Buncombe County's prior ordinance only prohibited smoking in County buildings.

On October, the new law was discussed with the City's Recreation Board and the Public Safety Committee. The Recreation Board recommended that smoking be prohibited in parks and greenways; the Public Safety Committee expressed concern with the enforceability of an ordinance that encompassed so many properties and so much area. In addition to these formal reviews, there have been informal discussions regarding other public facilities, such as Pack Place and the airport, where the City owns the property but does not directly operate the facility. The Civic Center is directly operated by the City but is included here because of its function. Under the current ordinance, smoking in these facilities is regulated by the operating entities. City staff also attended an on-line program sponsored by the School of Government where the effect of the new law was discussed.

On the basis of this information, the following changes have been incorporated into the proposed ordinance:

1. Prohibition of smoking in all City parks and greenways, as recommended by the Recreation Board.

2. Prohibition of smoking on other municipal "grounds" directly controlled or operated by the City (e.g., City Hall, Public Works) except in areas designated by the City Manager (as in current ordinance).

3. Prohibition of smoking within or on grounds of other facilities owned by the City, but operated by other entities (e.g., airport, Pack Place, Civic Center Commission) except as allowed by facility management.

4. Substantial revision of Sec. 11-34 which regulated smoking in businesses to conform to State law, which is more restrictive and pre-empts the local ordinance. Also, replaces the word "business" with the words "public place" to conform to State law usage.

5. Revision of penalties section to conform to State law.

6. Deletion of Sec. 11-32(2) because the Transit Authority no longer exists, and the transit facilities are directly controlled by the City. Transit Commission may be the appropriate agency to delegate.

7. Deletion of Sec. 11-32(6) because the law gives local boards of education authority to adopt and enforce policies regarding smoking in school buildings and grounds.

Continuing to smoke in violation of this ordinance constitutes an infraction, and the person committing the infraction may be punished by a fine of not more than ($50.00).

Pros:

- Provides a healthier environment for City employees and public on municipal grounds
- Eliminates the potential for secondhand smoke on municipal grounds
- Reduces litter of cigarette butts on municipal grounds

Cons:

- Reduces the number of smoking areas available to smokers
- Enforcement challenges due to limited staff and the extensive number of areas affected by the regulations
- Enforcement challenges involving greenways located on private property
- Need for additional staffing
- Need for additional signs

This action complies with the City Council Strategic Operating Plan in the focus area of "green" by increasing downtown cleanliness and beautification efforts.

The changes could potentially have a fiscal impact due to the need for additional staffing and signs. Staff is not able to accurately estimate the impact at this time.

If Council approves of the proposed changes, adoption of the ordinance is recommended.

In response to Councilman Bothwell's concern about enforcement, Ms. Whitlock said that we do recognize that enforcement will be a challenge. The enforcement will be self-policing and the City will have to rely upon complaints by citizens, similar to other regulations that affect our parks, e.g., no drinking, no public urination, not being in the park after hours, etc.

Councilman Smith said that the County has not written a single citation since adoption of their ordinance in August of 2009. Their idea is that it is a community policing effort and where they have found people smoking they are trying to find a way to do better signage. Since there

may be people in violation who do not have the $50 fine, perhaps they could be referred to the Nuisance Court.

City Attorney Oast said that our agreement with the Nuisance Court allows us to specify the kinds of offenses that we can take there and this could certainly be one of them.

When Councilman Smith asked if we choose to police this at Pritchard Park, for example, can we direct some or all of that money to a fee waiver fund, Ms. Whitlock replied that we cannot.

In response to Councilman Smith, Mr. Byron Greiner, representing the Downtown Association, said that they are in favor of banning smoking in parks.

City Attorney Oast said that staff recommends an effective date of July 1, 2010, in order to allow staff to notify the public and put up appropriate signage.

Mr. Dwight Butner felt that any restaurant that has had smoking in the past would want to allow any guest to be able to smoke outside. He suggested if there is going to be active enforcement of the ordinance that we target those aspects of the ordinance which might have an increased risk of public health.

In response to Councilman Bothwell, City Attorney Oast explained that the ban does not include streets and sidewalks, unless the sidewalk runs through the park.

When to Councilman Bothwell asked about the cost of signage, Director of Parks, Recreation and Cultural Arts Roderick Simmons said that he would have to get that information for Council, but we will save some costs because they will be on the same pole as other signs.

Vice-Mayor Newman noted that the Civic Center Commission is an advisory board. He wondered if Council is specifically delegating the authority to them to decide the smoking policy at the Civic Center. Mr. Whitlock said that it does give the authority to the Civic Center Commission to delegate no smoking areas and that they have had this authority since 1993. Councilman Davis noted that the Civic Center has a smoking patio outside.

When Vice-Mayor Newman questioned what the City Manager's approach will be to prohibit smoking on City property, City Manager Jackson said he does not plan to make any revisions to what we have in our buildings at this time. We have limited options available to lessen the risk of second hand smoke, lessen the impact upon non-smokers, out of public view and not near a ventilation intake. He would be happy to take a comprehensive look at what we currently do in City facilities, but it hasn't been an issue.

Vice-Mayor Newman didn't see the logic in saying that on a greenway route where you interact with very few people you can't smoke, but you can stand next to City Hall and have a cigarette. This may be something that the City Manager should report back to Council and look at the County's and Mission Hospitals' experience is going and think through if we should consider a more comprehensive ban on smoking on City properties.

Councilman Russell noted that smoking was prohibited on State Farm facilities nationwide in the 1990's and operation managers designated a small area, usually in the back door, for smokers. He felt this approach has worked well.

Councilman Smith noted that the greatest problem with our air quality is coming from vehicle emissions. From a public health standpoint, banning smoking will help a little.

In response to Mayor Bellamy stressing the need to notify the public about the prohibition and penalty, City Attorney Oast said that education will be on-going and staff will put notice on the

City's website, notices on Parks kiosks, use the City's government channel, possibly insert a flyer with employee's pay stubs, etc.

Ms. Mary Ann West spoke in support of the ordinance.

Mr. Jeff Turner, veteran, felt that Council was taking away people's rights.

Mayor Bellamy said that the City is not prohibiting people from smoking on streets, sidewalks or their homes, only in what they do in the public parks and the public buildings.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3849. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Bothwell voting "no".

ORDINANCE BOOK NO. 26 - PAGE 102

D. RESOLUTION NO. 10-110 - RESOLUTION APPOINTING MEMBERS TO THE DOWNTOWN COMMISSION

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Downtown Commission.

The term of John Rogers, as a member of the Downtown Commission, expired on December 31, 2009.

In addition, there currently exists a vacancy from Brad Galbraith, whose term expires December 31, 2011.

On April 13, City Council instructed the City Clerk to arrange interviews for Rebecca Hecht, Jimi Rentz, Henry Watts, David Nutter and Karen Kotiw.

After Council spoke highly of the candidates, Rebecca Hecht received 3 votes, Jimi Rentz received 6 votes, Henry Watts received 2 votes, David Nutter received 2 votes and Karen Kotiw received 1 vote. Therefore, Rebecca Hecht was appointed as a member of the Downtown Commission to serve a three-year term, term to expire December 31, 2012; and Jimi Rentz was appointed as a member of the Downtown Commission to serve the unexpired term of Mr. Galbraith, term to expire December 31, 2011. Both terms are until their successors have been appointed.

RESOLUTION BOOK NO. 33 – PAGE 31

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy was pleased to announce that our Sister City group delegation from Osogbo will be in Asheville May 1-10, 2010. She provided Council with an itinerary for the delegates and urged them to participate in as many events as possible.

Mayor Bellamy thanked City staff for their efforts during President Obama's visit to Asheville. His visit will have an impact on our community for years to come.

On behalf of City Council, Mayor Bellamy thanked City staff for their excellent teamwork and quick response during the recent bus accident on College Street. She expressed Council's sympathy to the victims and the family that was impacted.

Mr. Larry Merrill, 62 Cumberland Circle, spoke about the need to pick up brush on his street. Mayor Bellamy advised Mr. Merrill that City Manager Jackson will investigate the concern and follow-up with him.

In response to Mayor Bellamy, City Manager Jackson said that he would reinforce our efforts to notify people of their responsibilities concerning sidewalks in front of their homes or businesses.

Mr. Jeff Turner felt that Asheville's economy will lean more towards entertainment and tourism in the future and appreciated Council's fiscal responsibility.

Mr. Dwight Butner, Chair of the Downtown Commission, suggested Council charge the Downtown Commission to explore the pros and cons of waiving fees.

The following claims were received by the City of Asheville during the period of April 9-22, 2010: Elisha Resper (Parks and Recreation), Douglas Styles (Parks and Recreation), Catherine Wallenborn (Streets), David Jenkins (Engineering), Courtney Dute (Police), Dottie Lawing (Civic Center), Kristy Martinez (Water), Jennifer Coyle (Transit), Margaret C. Estes (Transit), Pete Apostolopoulas (Transit), Susan J. Zakanycz (Transit), Mediterrian Restaurant (Transit), Spa Theology (Transit), Stella's (Transit), PSNC Energy (Water), Sondra Allison (Police), Eugene Paul – Wonderland (Transit), and PSNC Energy (Transit). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:31 p.m.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – May 11, 2010 - 4:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Bothwell gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 23, 2010

B. RESOLUTION NO. 10-111 - RESOLUTION SETTING A PUBLIC HEARING ON JUNE 8, 2010, TO CONSIDER PERMANENTLY CLOSING A PORTION OF FEDERAL ALLEY

Summary: The consideration of a resolution of intent to permanently close a portion of Federal Alley, near 165 Coxe Avenue, and setting a public hearing for June 8, 2010, to consider the closing.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners, Swannanoa Laundry Inc., and the City of Asheville have requested the City of Asheville to permanently close a portion of Federal Alley. The Greenway Commission will review the proposed closure at their meeting on May 13, 2010

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close a portion of Federal Alley and setting a public hearing on June 8, 2010, to consider the closing.

City Manager Jackson said that the Chairman of the Greenway Commission is in favor of moving forward with this but he requested an opportunity to review the process and procedures for permanent closures.

RESOLUTION BOOK NO. 33 – PAGE 32

C. RESOLUTION NO. 10-112 - RESOLUTION SUPPORTING H.R. 2746 WHICH WOULD PROVIDE FOR INCREASED FLEXIBILITY IN THE USE OF FEDERAL TRANSIT FUNDS BY ALLOWING TRANSIT SYSTEMS OF ALL SIZES TO USE A PERCENTAGE OF THEIR FORMULA FUNDS FOR OPERATIONS

Summary: The consideration of a resolution supporting H.R. 2746 which would provide for increased flexibility in the use of Federal Transit Funds by allowing transit systems of all sizes to use a percentage of their formula funds for operations.

As a result of the 2000 Census, the City of Asheville was reclassified from serving an urbanized area of less than 200,000 in population to one serving more than 200,000 in population. Crossing that threshold meant that the City of Asheville could no longer receive Federal Funds allocated to it through the State Governor's Apportionment Program. Instead, the City of Asheville became a direct recipient and now receives Federal Funds directly from the Federal Transit Authority. However, none of the Federal Funds can be used for operating expenses.

About 40 transit systems throughout the country were affected by the subject reclassification which became effective during Federal Fiscal Year (FFY) 2002-03. In order to ease the financial burden caused by the loss of Federal Funds for operating expenses, exceptions were granted to the affected transit systems. These exceptions began during FFY 2002-03 and have continued through FFY 2009-10. The exceptions have been limited to an amount not to exceed the amount of funding that was apportioned during FFY 2001-02. Table 1 shows the amounts that have been available for the City of Asheville.

Table 1

Federal Fiscal Year	Operating Cost Limitation
FFY 2001-02 (Base Year)	$968,044
FFY 2002-03	$968,044
FFY 2003-04	$703,518
FFY 2004-05	$963,137
FFY 2005-06	$484,022
FFY 2006-07	$242,011
FFY 2007-08	$484,022
FFY 2008-09	$484,022
FFY 2009-10	$484,022

Although the City of Asheville has been able to reduce the financial impact to transit operations by using Federal Funds for preventive maintenance and ADA eligible expenses, we are now facing a deficit of about $500,000 because the exceptions are set to expire at the end of FFY 2009-10. This impact could easily jeopardize the service that has been provided to our citizens for the past several years including evening service and a continual increase in ridership.

The Amalgamated Transit Union along with the Community Transportation Association of America has been working on legislation to allow transit systems of all sizes to use operating assistance as they deem appropriate.

H.R. 2746, presented by Representative Russ Carnahan, D-Mo, would provide for increased flexibility in the use of Federal Transit Funds by allowing transit systems of all sizes to use a percentage of their formula funds for operations. This legislation incorporates the entire "100 Bus Coalition" bill (H.R. 734, 110th Congress), which would allow transit systems in areas above 200,000 in population to use their federal transit formula funds for operations if they are operating less than 100 buses during peak service hours.

In addition, the bill would dispense of the "cliff" that is reached when the population reaches 200,000 by allowing systems in all areas to use at least a portion of their funds for operations – the larger the population, the smaller the percentage that would be able to be used for operating.

Significantly, the bill would encourage state and local governments to invest in transit through a unique incentive program. The legislation provides for the conditional use of federal formula funds for operating purposes based on whether non-federal sources of revenue for a particular transit system increase from one fiscal year to the next. For example, if a transit system receives a five percent increase in state/local investment compared to the previous year, it would be eligible to use up to five percent of its federal formula funds for operations (in addition to the fixed percentage it would be able to use under the new rules discussed above).

Finally, the bill would take advantage of a new program created under the American Recovery and Reinvestment Act (ARRA) known as the "Transit Investments for Greenhouse Gas and Energy Reduction" (TIGGER) program. If a transit system receives a grant under this initiative and can demonstrate that it has reduced its greenhouse gas emissions or energy usage through the use of the grant, it would be eligible to use even more of its federal formula funds for operating assistance.

In summary, this bill would provide transit systems with local control of their Federal Transit Funds, allowing them to preserve critical service and hold down fares during tough economic times so that working people may be offered quality, affordable public transportation. The bill strikes the necessary balance given the challenges facing the Highway Trust Fund. It does not create any new revenue stream for transit operations.

The subject action complies with the City Council Strategic Operating Plan by fully leveraging funding from the State and other funding sources for regional transportation improvements.

Pros:

- The subject action would enable the use of Federal Funds for transit operating expenses for transit systems serving urbanized areas greater than 200,000 in population.
- The subject action would not commit the City of Asheville to any specific action.

Con:

- None

The continued receipt of Federal Funds (Section 5307) for transit operating expenses is crucial for maintaining current service levels and for minimizing the General Fund contribution to the Transit Fund. If the Federal Funds (Section 5307) are not received in future years, the negative financial impact to the City would be approximately $500,000.

City staff recommends that City Council adopt a resolution affirming the importance of allowing urbanized areas with a population of 200,000 or more to be able to use Federal Funds (Section 5307) for transit operating expenses. If approved, City staff will communicate the City of Asheville's support for this bill to our Federal Legislative representatives.

RESOLUTION BOOK NO. 33 – PAGE 33

D. RESOLUTION NO. 10-113 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN EASEMENT FOR PROGRESS ENERGY ON CLINGMAN AVENUE

Summary: The consideration of a resolution authorizing the Mayor to execute an easement for electric power lines at Owens-Bell Park.

In connection with improvements being made to Clingman Avenue, a bicycle path/lane is proposed for the east (uphill) side of Clingman Avenue. In order to accommodate this bike path, Progress Energy has agreed to move its existing power transmission lines from the east side of Clingman Avenue to the west side, where it will use existing poles already used by AT&T/Bell South, along the western edge of Owens-Bell Park. Owens-Bell Park is City owned property, and an easement is required because Progress Energy's lines would be in addition to the other utility lines already there.

This action complies with the City's Strategic Operating Plan in that it facilitates the implementation of a multi-million transportation plan and indirectly supports the River Front redevelopment efforts. This action also assists the State in the implementation of its plans. In addition, this action is also in compliance with the City's comprehensive bicycle plan, which calls for the installation of a climbing lane on Clingman Avenue, the main bicycle route to and from West Asheville.

Pros:

- Facilitates installation of climbing lane on Clingman Avenue (main bicycle route to/from West Asheville).
- Will consolidate overhead utilities on one side of street.

Cons:

- Will increase number of utility lines on west side of Clingman Avenue.
- Lines not being installed underground.

There is no fiscal impact.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 33 – PAGE 34

E. RESOLUTION NO. 10-114 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH PATTON CONSTRUCTION GROUP INC. FOR THE PATTON AVENUE SIDEWALK NORTH SIDE PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute on behalf of the City of Asheville a contract and any change order within the budgeted amount with Patton Construction Group, Inc. for the project known as Patton Avenue Sidewalk-North Side, City of Asheville Project # PW-03-04-007.

The City of Asheville will receive $150,000 from the N.C. Dept. of Transportation (NCDOT) and has set aside $300,000 of its own funds for this project. A formal request for bids was issued on March 18, 2010, and bids were opened on April 14, 2010. Patton Construction Group, Inc. was the low bidder at $190,500. Presumably due to the current economic conditions, this was well under the original estimate of $547,000. The disadvantaged business enterprise (DBE) goal of 10% was exceeded at 26%. Upon acceptance of the project, NCDOT will pay all $150,000 of their funds. This is a unit price contract and not a lump sum contract.

This project will build a much needed sidewalk along Patton Avenue from Regent Boulevard to New Leicester Highway. The project also includes a small section of North Louisiana Avenue, from Patton to the entrance of The Rush fitness center. Current conditions are unsafe for pedestrians traveling along this route, especially a section on Patton where a steep embankment forces them to walk along the back of curb or even on the street itself. The scope of work includes sidewalk, curb and gutter, drainage, retaining walls, wheelchair ramps, a bus stop, and driveways.

This action complies with the City Council Strategic Operating Plan in fully leveraging funding from the State and other sources for regional transportation improvements. This action also complies with the City of Asheville Pedestrian Master Plan in that it provides sidewalk on a street identified in the plan as a need.

Pros:

- Implements a project in the City's adopted pedestrian plan.
- Provides long term investment in the City's infrastructure.
- Improves pedestrian safety.
- Encourages walking, thereby reducing carbon emissions, and promoting physical fitness.

Cons:

- The City will be responsible for future maintenance of the project.
- Project management and contract administration will consume staff time.

The approved budget for this project totals $450,000. As noted earlier in the staff report, this budget consists of $150,000 in funding from an NCDOT grant and $300,000 in City pay-as-you-go funding. The low bid for the project came in at $190,500. With the NCDOT grant covering $150,000 of this cost, the City's share of the cost for the project will be only $40,500. Therefore, it is anticipated that once this project is complete, there will be savings to the City of $259,500 which can be rolled into the City's capital reserve fund and be re-appropriated for other Council-approved capital projects.

City staff recommends City Council adopt the resolution awarding the contract to Patton Construction Group, Inc. and authorizing the City Manager to execute on behalf of the City of Asheville the contract and any change order within the budgeted amount.

RESOLUTION BOOK NO. 33 – PAGE 36

F. ORDINANCE NO. 3850 - BUDGET AMENDMENT TO RECEIVE DONATED MONEY FROM CITIZENS FOR PROCUREMENT OF SUPPLIES FOR THE PURPOSE OF FIREFIGHTER RECOGNITION

Summary: The consideration of a budget amendment, in the amount of $1,400, to receive donated money from citizens for procurement of supplies for the purpose of firefighter recognition.

The Asheville Fire Department has received donations from private citizens for the purpose of firefighter recognition. These donations have been received throughout fiscal year 2009/2010. The department would like to use these funds to purchase supplies for the newly

formed Pipes and Drum Corp. A number of firefighters have voluntarily formed this Corp for the purpose of playing at firefighter recognition events, promotional and retirement ceremonies, and funerals. The Corp practices voluntarily on their own off duty time and is requesting to use these funds to purchase instruments and pay for instruction. The Asheville Firefighters Association is also separately donating money for this purpose.

This action complies with the City Council Strategic Operating Plan in that it helps to attract and retain quality employees and to ensure operational effectiveness by paying sound wages and benefits.

Pros:

- This action allows for recognition of firefighters without utilizing city tax funds. This action also provides for utilization of these funds as the donating citizens intended.

Con:

- None identified

These funds have been obtained through donations from private citizens for the purpose of firefighter recognition. No city tax funds will be utilized.

City staff recommends City Council approve the budget amendment to receive donated money from citizens.

ORDINANCE BOOK NO. 26 – PAGE 105

G, ORDINANCE NO. 3851 - BUDGET AMENDMENT THROUGH A PARTNERSHIP WITH WARREN WILSON COLLEGE FOR PAYMENT OF TWO PART TIME/TEMPORARY INTERNS

Summary: The consideration of a budget amendment, in the amount of $3,000, to appropriate revenue and budget expenditure accounts associated with the payment for one part time temporary intern in the Office of Sustainability and one part time temporary intern the Transportation Department.

The City of Asheville and Warren Wilson College formed a strategic partnership in June 2007 to collaborate in our efforts to reduce green house gas emissions. As the City of Asheville continues to focus on affordability, sustainability, and fiscal responsibility, with the City's new Transit Master Plan and the Sustainability Management Plan is looking to provide an integral service to meet these plans goals and serve the citizens of Asheville and the region. Warren Wilson College will provide the funds for payment to these interns upon approval of this budget amendment request.

- The Transportation Internship will provide the student with an opportunity to be involved in the details of implementing significant route changes with the first stage of the Transit Master Plan as well as assist with other office projects.
- The Sustainability Policy Intern will learn about local government policy and administrative policy through working with staff to support the Sustainability Advisory Committee on Energy and the Environment (SACEE) and the City's internal Green Team.

This action complies with the City Council Strategic Operating Plan in the following ways: (1) Expand partnerships with UNC-Asheville, AB Tech and other institutions; and (2) Attract and retain quality employees with an emphasis on local labor pool development opportunities.

Pros:

- Internship supports the Transportation Department in implementing the Transit Master Plan

- Internship supports the City Office of Sustainability efforts to reduce carbon footprint of city operation

Con:

- None identified.

The $3,000 to payment of intern wages will be provided by Warren Wilson College to be paid through the City of Asheville to the intern.

City staff recommends City Council adopt the budget amendment to appropriate revenue and budget expenditures associated with payment of intern stipends.

Mayor Bellamy is proud of our partnership with Warren Wilson College.

ORDINANCE BOOK NO. 26 - PAGE 107

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. FISCAL YEAR 2010-11 ANNUAL OPERATING BUDGET PRESENTATION AND MOTION SETTING THE PUBLIC HEARING ON SAID BUDGET FOR MAY 25, 2010

Director of Administrative Services Lauren Bradley said that the budget goals are (1) Address structural issues within the city's budget so that Asheville can continue to achieve long-term fiscal stability (*Asheville 2010: A Financial Crossroads);* (2) Maintain the current tax rate to support financial stability for Asheville families and businesses.; (3) Continue to support our workforce as well as the stability of the region's economy by avoiding layoffs, salary cuts, and furloughs; and (4) Align resources with strategic planning and core services while minimizing service reductions to other areas.

The General Fund overview is (1) overall General Fund budget is decreasing by 1.1% compared to Fiscal Year 2009-10 budget; (2) overall staffing level will decrease by the equivalent of 17.26 full-time positions (including frozen positions); and (3) budget challenges have presented transformational opportunities – innovation, efficiency, strategic planning.

Regarding revenues (1) no property tax increase; (2) 1.5% growth projected in property tax revenue; (3) sales tax budget adjusted downward by $1.0 million; and (4) no Fund Balance appropriation. Revenue enhancements include (1) Council-approved fee adjustments of $200,000; and (2) Parking Fund transfer of $225,000 (a) revenue to offset increases in cost of transit service; and (b) preserves evening service route.

Regarding expenditure reductions (1) managed savings and re-engineering - $2,293,000 (a) reduction in overtime, temp and contract employment; and (b) reduction in travel, training, other line items; (2) service reductions - $975,000 (a) reduction in community center hours and 7 part-time positions; no impact on summer programming; (b) reduce brush collection to once per month; and (c) reduction in outside agency funding; (3) selective hiring freeze - $878,000; (4)

salary freeze - $340,000 (a) pay supplement ($300) for employees at or below area median income (629 employees); and (5) healthcare plan adjustments - $300,000.

Regarding the Water Fund (1) cost savings strategies include freezing 3 vacant positions, delaying vehicle purchases, and other line item reductions; (2) 5% increase in water rates and the capital improvement fee necessary to continue current operations and meet debt service obligations; (3) even with the rate increase, water revenues will be flat compared to the current year budget (a) 9% decrease in water consumption; and (b) 47% decrease in tap/connection fees; and (4) capital budget includes $5.6 million for water capital improvement projects.

Other funds (1) Parking Fund includes $500,000 for a possible debt service payment for a new parking deck on Biltmore Avenue; (2) General Fund subsidy to the Transit Fund will be reduced by $230,000 and replaced by an allocation from Parking Fund revenue and reserves (a) no reduction in Transit Service levels; (3) General Fund subsidy required to balance the Civic Center fund budget will remain essentially unchanged; (4) stormwater fees remain unchanged (a) debt will be issued in FY 1020-11 to fund $2.3 million in major capital stormwater projects; (5) General Fund subside to the Festivals Fund will be reduced by $22,000 (a) staff recommends suspending the Film Festival in 2010 and is exploring the possibility of privatizing the festival in 2011; and (6) a new Street Cut Utility Fund is being created to streamline and optimize the repair of street cuts needed by utility companies (a) the City will repair street cuts and charge the utilities companies for the work; and (b) provides a streamlined and cost effective process for utilities; considered a "win-win."

Major capital projects and investments include (1) fleet replacement ($1.7 million) (a) $1.2 million obtained through financing for a new fire aerial ladder truck; (2) Azalea Road project ($1.9 million); (3) street, sidewalks, and pedestrian safety improvements ($1.14 million); (4) parks and recreation improvements ($535,000) (a) replacement and repair of parks and recreation centers; and (b) $75,000 for land/easement acquisitions for greenways; and (5) Civic Center improvements ($250,000) (a) improvements to facility's lockers and dressing rooms.

Mayor Bellamy said that City Council will have another opportunity to give direction at the May 25, 2010, 3:30 p.m. worksession.

Councilman Davis moved to set the public hearing on May 25, 2010. This motion was seconded by Councilman Russell and carried unanimously.

Closed Session

At 4:16 p.m., Councilman Russell moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: Larry Roland and the City of Asheville. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Davis and carried unanimously.

At 5:10 p.m., Vice-Mayor Newman moved to come out of closed session and return to the formal meeting. This motion was seconded by Councilman Bothwell and carried unanimously.

IV. PUBLIC HEARINGS:

ANNEXATION PUBLIC HEARINGS

Urban Planner Julia Cogburn said that this is the consideration of public hearings to obtain comment on the following twelve areas: Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road.

On February 23, 2010, City Council adopted Resolutions of Intent beginning the annexation process for the following twelve areas: Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road. The Annexation Services Plan for these areas was approved on March 9, 2010, and a public information meeting was held on April 12, 2010. Two people representing businesses affected by the proposed annexations attended this meeting. Remaining steps include:

Adoption of annexation ordinances - May 25, 2010
Effective date of annexations – September 30, 2010

Staff will make a brief presentation concerning the annexation areas and the Mayor should then open the public hearing for the area. Council should hear from the public separately on each area. The staff will bring forward annexation ordinances for Council consideration at the May 25, 2010, meeting.

A. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE INGLES AREA (301 LONG SHOALS ROAD)

Mayor Bellamy opened the public hearing at 5:18 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of the Ingles area (301 Long Shoals Road). This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for the Ingles area – (a) 1.5 parcels; (b) 3.6 acres; (c) commercial land use; and (d) meets nonresidential urban use text.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:19 p.m.

Mayor Bellamy said that consideration of the ordinance to annex the Ingles area will be held on May 25, 2010.

B. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE SCHENCK PARKWAY AREA (BEHIND 380 LONG SHOALS ROAD)

Mayor Bellamy opened the public hearing at 5:19 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of the Schenck Parkway area (behind 380 Long Shoals Road). This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) portion of 1 parcel; (b) 0.7 acres; (c) commercial land use; and (d) meets nonresidential urban use text.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:19 p.m.

Mayor Bellamy said that consideration of the ordinance to annex the Schenck Parkway area will be held on May 25, 2010.

C. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE FARLEIGH STREET AREA (BEHIND 380 LONG SHOALS ROAD)

Mayor Bellamy opened the public hearing at 5:19 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of the Farleigh Street area. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) portions of 2 parcels; (b) 0.6 acres; (c) commercial and residential land use; and (d) meets development test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:19 p.m.

Mayor Bellamy said that consideration of the ordinance to annex the Farleigh Street area will be held on May 25, 2010.

D. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE DEERFIELD AREA

Mayor Bellamy opened the public hearing at 5:20 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of the Deerfield area. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) portion of 1 parcel; (b) 29.3 acres; (c) institutional land use; and (d) meets nonresidential urban use text.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:20 p.m.

Mayor Bellamy said that consideration of the ordinance to annex the Deerfield area will be held on May 25, 2010.

E. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF 67 MOUNTAINBROOK ROAD

Mayor Bellamy opened the public hearing at 5:20 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of 67 Mountainbrook Road. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) 1 parcel; (b) 4.4 acres; (c) approximately 65 residents; (d) institutional land use; and (e) meets nonresidential urban use test and population density test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:20 p.m.

Mayor Bellamy said that consideration of the ordinance to annex 67 Mountainbrook Road will be held on May 25, 2010.

F. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF 73 AND 75 WATERS ROAD

Mayor Bellamy opened the public hearing at 5:20 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of 73 and 75 Waters Road. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) portions of 2 parcels; (b) 0.6 acres; (c) 1 dwelling; (d) approximately 2 people; (e) residential land use; and (f) meets population density test, subdivision test, and development test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:21 p.m.

Mayor Bellamy said that consideration of the ordinance to annex 73 and 75 Waters Road will be held on May 25, 2010.

G. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF 26 ROCKING PORCH ROAD

Mayor Bellamy opened the public hearing at 5:21 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of 26 Rocking Porch Road. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) portions of 1 parcel; (b) less than 0.1 acres; (c) one dwelling; (d) approximately 2 people; (e) residential land use; and (f) meets development text.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:21 p.m.

Mayor Bellamy said that consideration of the ordinance to annex 26 Rocking Porch Road will be held on May 25, 2010.

H. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF 40 KEASLER ROAD AND 23 SUNNYCREST DRIVE

Mayor Bellamy opened the public hearing at 5:21 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of 40 Keasler Road and 23 Sunnycrest Drive. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) 2 parcels; (b) 1.4 acres; (c) 2 dwellings; (d) approximately 4 people; (e) residential land use; and (f) meets population density test, subdivision test, and development test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax

listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:21 p.m.

Mayor Bellamy said that consideration of the ordinance to annex 40 Keasler Road and 23 Sunnycrest Drive will be held on May 25, 2010.

I. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF 617 UPPER SONDLEY DRIVE

Mayor Bellamy opened the public hearing at 5:21 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of 617 Upper Sondley Drive. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) 1 parcel; (b) 0.98 acres; (c) 1 dwelling; (d) approximately 2 people; (e) residential land use; and (f) meets subdivision test and development test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:22 p.m.

Mayor Bellamy said that consideration of the ordinance to annex 617 Upper Sondley Drive will be held on May 25, 2010.

J. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF 1445 TUNNEL ROAD

Mayor Bellamy opened the public hearing at 5:22 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of 1445 Tunnel Road. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area - (a) 1 parcel (b) 1.5 acres; (c) commercial land use; and (d) meets nonresidential urban text.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:22 p.m.

Mayor Bellamy said that consideration of the ordinance to annex 1445 Tunnel Road will be held on May 25, 2010.

K. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE WILLOW WINDS LANE AREA

Mayor Bellamy opened the public hearing at 5:22 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of the Willow Winds Lane area. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area – (a) 1 parcel; (b) 12.1 acres; (c) commercial land use; and (d) meets nonresidential urban use test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy closed the public hearing at 5:22 p.m.

Mayor Bellamy said that consideration of the ordinance to annex the Willow Winds Lane area will be held on May 25, 2010.

L. PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE AIRPORT ROAD AREA (PORTIONS OF SHOPPING CENTER; DEVELOPED PROPERTY ON EDGE OF MUNICIPAL SERVICE AREA, INCLUDING AIRPORT ROAD RIGHT-OF-WAY TO BRIAN BOULEVARD AND COUNTY LINE AS WELL AS PART OF ROCKWOOD ROAD)

Mayor Bellamy opened the public hearing at 5:22 p.m.

Urban Planner Julia Cogburn said that this is the public hearing to consider the annexation of the Airport Road area. This public hearing was advertised on April 2 and 9, 2010.

She then made a brief presentation concerning the Services Plan for this area – (12) Airport Road area (a) 18 parcels; (b) 122.1 acres; (c) mostly commercial land use; and (d) meets development test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

Mr. Lou Bissette stated that his firm represents Norma Kushigian who owns two of the proposed annexation parcels on Airport Road. She also owns the parcel Normac Manufacturing is located on which is at the rear second parcel. They propose to leave the front parcel facing Airport Road in the annexation plan but to remove the second parcel out of the annexation plan. In return, his client would waive the requirement that the City construct the new sewer line to the front portion. They would agree that the waiver continue until such time as the owner of the front parcel would request that a sewer line be constructed to that parcel. When that occurs, the City would agree to construct the sewer line and his client would agree to voluntarily annex the rear portion. This proposal will reduce the financial burden on the property owner and will also allow the City to delay the expenditures for the sewer line to the front portion.

In response to Vice-Mayor Newman, City Attorney Oast said that in the future if the City decided to annex the rear portion, they would have to construct the sewer line.

Mayor Bellamy closed the public hearing at 5:28 p.m.

Mayor Bellamy said that in the past Council has had an informal policy not to annex manufacturing sites. City Attorney Oast said that at Council's request, we have not proposed the annexation of any areas that have concentration of manufacturing jobs.

In response to Councilman Bothwell, Mr. Greg Shuler said that if we do not need to construct the new sewer line, we would save approximately $185,000 out of the General Fund.

Upon inquiry of Vice-Mayor Newman, Ms. Cogburn said that City staff is supportive of this proposal.

Vice-Mayor Newman said that we need to be mindful of the informal policy regarding annexing manufacturing sites. He felt that if we are going to annex properties that have manufacturing on them, it may warrant us having some additional economic development incentive ideas.

City Attorney Oast said that on May 25, staff will bring an amendment to the Annexation Services Plan to Council to reflect this parcel deletion.

Mayor Bellamy said that consideration of the ordinance to annex the Airport Road area will be held on May 25, 2010.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. BOARD & COMMISSIONS

The following candidates applied for a position on the Recreation Board: Will Callaway, Michael Holgate, Nelson Sobel, Jason Gilliland, Joan Walker, Trina Mullen, Todd Dunnuck, Jeremy Gillespie and Mark Strazzer. Out of those candidates, it was the consensus of Council to instruct City Clerk Burleson arrange interview for Will Callaway, Michael Holgate, Todd Dunnuck and Mark Strazzer.

At the request of Mayor Bellamy, it was the consensus of Council to readvertise the vacancy on the Transit Commission for one month to try to reach those members of our community who ride the buses, especially those that ride the use as their only means of transportation.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy invited the public to attend the Governor's Logistics Task Force Meeting on May 17, 2010, from 1:00 – 5:00 p.m. in the Civic Center Banquet Hall to hear about transportation and economic needs for Asheville, Buncombe County and all of Western North Carolina.

Mayor Bellamy updated Council on the Streetsafe Task Force and one of the issues regarding the lack of housing for inmates after incarceration. She will ask the Housing & Community Development Committee to review some information and she may ask for an addendum to the Consolidated Strategic Housing & Community Development Plan for 2010-2015.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 5:46 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – May 25, 2010 – 3:30 p.m.
Worksession

Present: Mayor Terry M. Bellamy, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Brownie W. Newman

Budget Worksession Continued

Director of Administrative Services Lauren Bradley said that the purpose of this memorandum is to respond to questions submitted by City Council members after the proposed budget presentation on May 11, 2010 and to suggest alternatives for the remaining budget schedule.

Throughout Ms. Bradley's following discussion, City staff responded to various questions raised by City Council.

(1) Itemize the economic incentive allocation of $606,250.

This amount is allocated to three existing economic development incentive agreements. The Smith Aerospace allocation is contingent on a required level of job creation and is only paid out if that performance metric is achieved.

- UNC Eshelman School of Pharmacy $100,000
- Biltmore Town Center agreement $459,000
- Smith Aerospace agreement $47,000

(2) How much is budgeted for the Housing Trust Fund? What are the estimates for repayment into the fund during the fiscal year? How much will be available for loans in FY 2010-2011?

The FY 2010-2011 proposed budget includes a $300,000 allocation for the Housing Trust Fund. Estimates for the available loan balance in the upcoming fiscal year are included below.

$307,014	Current balance
-$400,000	Larchmont allocation
$134,123	Receipts from Loan Repayments
$300,000	FY 2010-2011 Appropriation from General Fund
$300,000	Estimated anticipated cash receipt for sale of land Acquired in Villas foreclosure
-$43,201	Administrative Expenses
$597,936	**Estimated Amount Available to lend in FY 2010-2011**

(3) How were reductions in the Parks and Recreation budget identified? Will reductions in community center hours affect staffing levels and after school/summer programming? How will site security be managed?

The goal of reductions in the Parks and Recreation Department was to identify operational efficiencies and cost reductions that would reduce overall operating costs of recreation programs while insuring minimal impact to children's services (afterschool and summer camps) and aquatic operations (i.e., opening of all three pools) and maintaining a focus on the long-term management of recreation services.

Strategies to attain these savings include:

1. Reducing seasonal and part-time staffing hours.
2. Freezing seasonal positions when possible.
3. Reducing hours of filled part-time positions.
4. Phasing out other part-time positions if and when needed.
5. Reducing operational hours of Community Centers and other special facilities (Aston Park Tennis Center, Food Lion Skate Park) while maintaining hours during peak usage times, especially for children's services.
6. Identifying programs that can be consolidated to attain economies of scale.
7. Continuing to cultivate partnerships with schools and non-profits to provide quality cost effective youth programming.

Impacts of these strategies include:

1. All three pools will remain open for the summer season with minor reductions in hours.
2. Community Center After School Programming and Summer Camp and Playground programs will experience minimal impact.
3. Community Centers and special facilities (except pools) will have reduced operating hours on the average of approximately 20-40%.
4. Community Center West will be phased to a turn key operation, similar to Community Center North, over the next six months.
5. Seeking partnerships to manage Licensed After School sites.

Community centers will utilize off-duty police personnel for security during large-scale events. Department staff will utilize security sign-in procedures during peak usage or high volume events.

These adjustments support the Parks and Recreation Master Plan as well as the department's goals for improving the quality of recreation services by focusing on core services (in this case, children's services); creating intentional, outcomes based programming, and; utilizing volunteers and partner agencies to support and expand programming options.

(4) Where is the debt service for City Hall roof and exterior repairs included in the budget?

It will take approximately 12 months to complete the planning and design phases stages of this project. Therefore, the City Hall renovation project is not part of the proposed FY 2010-11 budget. Instead, it is anticipated that the project will be financed through debt in FY 2011-12.

Mayor Bellamy suggested that City Council have offices on the 7th or 8th floors after renovation.

(5) Itemize all of the new debt that will be issued during this budget year.

FY 2009-2010

Due to project timelines and the debt issuance process, some financing packages are not issued in the same budget year that they were approved but will instead move forward in a subsequent year. However, these projects are not itemized in the following year's budget because they have already been approved by the Council. There are several projects approved for financing as part of the FY 2009-2010 budget that will move forward for issuance during budget year 2010-2011.

The budget for Livingston Street (Reid Center) construction was adopted by Council during the current year, and the process for securing the $1.1 million in financing for that project is already underway.

Other projects and purchases included in the current year adopted budget that will be financed during the next budget year include: 1) Auto loader garbage truck ($240,000); 2) Sardis Road Sewer ($1,086,000); and the 3) Airport Road Sewer ($250,000). Due to the timing of these other projects, the financing process has not yet begun for them. Staff anticipates bringing a financing package for these projects to Council in FY 2010-11. The debt service for these projects is included in the proposed FY 2010-11 budget.

FY 2010-2011

As for capital items in the FY 2010-11 proposed budget, only the fire aerial ladder ($1.2 million) and the stormwater projects are slated to be financed. Staff is currently working to finalize the list of stormwater projects and determine the amount of debt funding that will be required.

(6) Please explain the $1.26 million line-item increase in "Administrative Services."

As a part of a series of reorganizations during FY 2009-10, the following divisions were moved under the Administrative Services Department: purchasing, central stores, risk management, City Hall operations, and budget. The FY 2010-11 proposed budgets for each of these divisions is presented under the Administrative Services Department but prior year budgets for these divisions are presented in the departments in which they previously resided. The total budget amount for the divisions that were moved to Administrative Services totals $1,353,454 (see chart below). If the impact of the reorganizations is factored out, the Administrative Services budget would show a decline of $85,820.

Purchasing	360,409
Central Stores	162,216
Risk Management Admin	241,402
Budget & Research	188,839
City Hall Operations	400,588
TOTAL	1,353,454

(7) How do the city's economic development efforts compliment or duplicate the Chamber of Commerce/Economic Development Coalition?

The city's office of Economic Development actively works with numerous other regional organizations and networks to build quality, connected places to attract and retain people, jobs, investment, and innovative businesses. Partner agencies include AdvantageWest, Land-of-Sky and the Economic Development Commission.

The city's economic development efforts have also centered around strategic initiatives and collaborative partnerships to support businesses in the multiple clusters of business districts in the City. The office has stayed actively involved in city development processes, provides assistance for minority businesses, manages the city's real estate and redevelopment of city-owned property, and provides economic planning development services. The office is taking an active role in river redevelopment efforts, and the economic development director position was recently expanded to include management of the Asheville Civic Center.

(8) Outline the remainder of the budget schedule.

June 8 has been held as a tentative date for an additional budget work session if needed. City Council may wish to discuss the need for that worksession based on the public hearing and any outstanding Council questions.

If City Council determines the June 8 worksession is not needed, Council could consider moving budget adoption up from June 22 to June 8. This additional time would be beneficial for staff since they will be loading the budget onto the enterprise software system for the first time. Otherwise, staff will be ready to prepare and provide additional information as requested by City Council on June 8, with formal adoption considered on June 22.

Mayor Bellamy said that due to Council's agenda, she felt that adoption of the budget should remain on June 22.

At 4:07 p.m., Mayor Bellamy adjourned the worksession.

Tuesday – May 25, 2010 - 5:00 p.m.
Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

CHANGE OF AGENDA

At the request of City Attorney Oast, Mayor Bellamy said that a resolution authorizing execution of an agreement regarding extension of sewer service needs to be added to Unfinished Business, prior to the resolution amending the Annexation Services Plan.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 11, 2010

B. RESOLUTION NO. 10-115 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE FEDERAL FISCAL YEAR 2006-07 AND FEDERAL FISCAL YEAR 2009-10 FEDERAL TRANSIT ADMINISTRATION APPORTIONMENTS AND FOR THE MAYOR TO EXECUTE SAID GRANT

Summary: The consideration of a resolution authorizing the City Manager to apply for the Federal Fiscal Year (FFY) 2006-07 and FFY 2009-10 Federal Transit Administration (FTA)

apportionments in the amount of $1,628,856 and $1,922,849 respectively; and the Mayor to execute said grant.

The City of Asheville plans to apply for the FFY 2006-07 and FFY 2009-10 annual apportionments using a FFY 2006-07 FTA apportionments under the Revised Continuing Appropriations Resolution 2007 and the FFY 2009-10 Federal Transit Administration apportionments under the Hiring Incentives to Restore Employment Act. The annual apportionments (Section 5307) authorizes Federal funding to be used for capital expenses, preventive maintenance, and in some cases, for operating assistance, and planning activities for transit in urbanized areas. The City was reclassified to an urbanized area greater than 200,000 in population as part of the 2000 Census and therefore lost its ability to use Federal Funds for operating assistance. However, the Asheville Transit System will be allowed to use part of this year's and next year's allocation for operating assistance, in the amount of $484,022 each year.

As part of the reclassification Henderson County's Apple Country became part of the transit systems in the Metropolitan Area. As such the City and the County share the federal allocation. The County will receive approximately $799,000 of the total allocation. The City and the County had signed a Sub-recipient Agreement in which it is specified how the funds are disbursed as well as the oversight of these funds. The city is responsible before FTA of the use of these funds and owns all the capital items Henderson County purchases with the allocation.

The City intends to use these funds for expenses incurred during FY 2009-10 and for future FY 2010-11 expenses, such as operating assistance, and for capital items allowed under the Master Agreement, such as preventive maintenance, Americans with Disabilities Act (ADA) service, and for other minor capital items (marketing study, small equipment for the buses, etc.). 1% of the allocation must be used for security purposes.

This action complies with the Strategic Operating Plan proactively leveraging funding from the Federal Government and other funding sources for transportation improvements.

Pro:

- These funds were budgeted in the FY 2009-10 and FY 2010-11 City Budgets and they will offset costs related to operations, preventive maintenance, and ADA services.

Con:

- The City has to contribute a local match of 20% for capital items, including preventive maintenance and ADA services; and 50% for operating expenses. The City has already incurred the respective matches for FY 2009-10.

The total amount of FTA transit funding available to the City in FY 2009-10 and FY 2010-11 will be $3,551,705. Approximately $799,000 of this amount will be allocated to Henderson County, leaving $2,752,050 for City transit expenses over that two year time period. The FTA transit apportionments are already included in the FY 2009-10 adopted budget and the FY 2010-11 proposed budget.

City staff recommends City Council authorizing the City Manager to apply for the FFY 2006-07 and FFY 2009-10 Federal Transit Administration apportionments in the amount of $1,628,856 and $1,922,849 respectively; and the Mayor to execute said grant.

RESOLUTION BOOK NO. 33 – PAGE 37

C. ORDINANCE NO. 3852- BUDGET AMENDMENT TO RECEIVE DONATED MONEY FOR THE PURPOSE OF SPECIAL EVENTS AT THE CIVIC CENTER

Summary: The consideration of a budget amendment, in the amount of $5,250, to receive donated money from corporate partners for the purpose of Civic Center Commission events.

The Civic Center Commission has received donations from corporate partners for hosting events to educate key organizations and officials about the economic impact of the Civic Center.

This action complies with the City Council Strategic Operating Plan goal to leverage internal and external partnerships for pursuing capital improvements and infrastructure projects.

Pro:

- This action allows for recognition of the Civic Center with expenses being underwritten by corporate partners. This action also provides for utilization of these funds as the donating organizations intended.

Con:

- None identified.

City staff recommends City Council approve the budget amendment, in the amount of $5,250, to receive donated money.

ORDINANCE BOOK NO. 26 – PAGE 109

D. RESOLUTION NO. 10-116 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A LEASE AGREEMENT BETWEEN THE GROVE ARCADE PUBLIC MARKET FOUNDATION INC. AND THE CITY OF ASHEVILLE FOR THE RENAISSANCE COMPUTING INSTITUTE DOWNTOWN ENGAGEMENT SITE

ORDINANCE NO. 3853 - BUDGET AMENDMENT FOR LEASE AGREEMENT WITH THE GROVE ARCADE PUBLIC MARKET FOUNDATION INC. FOR THE RENAISSANCE COMPUTING INSTITUTE DOWNTOWN ENGAGEMENT SITE

Summary: The consideration of a resolution authorizing the Mayor to execute a Lease Agreement between the Grove Arcade Public Market Foundation, Inc. and the City of Asheville for real property located at One Page Avenue, Suite 116, Asheville NC within the historic Grove Arcade building; and the associated budget amendment in the amount of $69,805 with funding provided by the Renaissance Computing Institute at UNC Asheville (RENCI).

On June 1, 2009, the City of Asheville entered into a 12 month lease with the Grove Arcade Public Market Foundation, Inc. for space Suite 116 at the Grove Arcade. This space is utilized by the Renaissance Computing Institute at UNC Asheville (RENCI) for a Downtown Engagement Site. At this time, the City has the option to renew the lease for an additional two year term, at a rate of $2,908.51 per month, with no additional increase. RENCI will fully reimburse the lease cost to the City on a quarterly basis throughout the duration of the lease. RENCI will be responsible for any and all costs related to the occupancy, maintenance and operation of the Downtown Engagement Site.

This action complies with the City Council Strategic Operating Plan by supporting an ongoing collaborative partnership between the City of Asheville and the RENCI at UNC Asheville.

Pros:

- Optimum location for Downtown Engagement Site
- Supports RENCI at UNC Asheville partnership
- All rent payments are fully reimbursed by RENCI

Con:

- None

Fiscal Impact:

- There is no financial impact to the City. RENCI will reimburse the City on a quarterly basis for the full cost of the lease.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute the lease agreement with the Grove Arcade Public Market Foundation, Inc. on behalf of the City of Asheville, and the associated budget amendment in the amount of $69,805.

RESOLUTION BOOK NO. 33 – PAGE 38
ORDINANCE BOOK NO. 26 - PAGE 111

E. RESOLUTION NO. 10-117 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE MOUNTAIN SPORTS FESTIVAL ON MAY 28-30, 2010

RESOLUTION NO. 10- 118 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE BEER CITY BREWFEST ON JUNE 5, 2010

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the (1) Mountain Sports Festival on May 28, 29 & 30, 2010; and (2) Beer City Brewfest on June 5, 2010.

- The Asheville Mountain Center has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Mountain Sports Festival and allow for consumption at this event.

  The component of Mountain Sports Festival requesting alcohol will be held on Friday, May 28, 2010 from 4:00 p.m. – 10:00 p.m., Saturday, May 29, 2010 from 10:00 a.m. – 10:00 p.m. & Sunday, May 30, 2010 from 12:00 p.m. to 9:00 p.m. within the boundaries of Carrier Park, as per the event area limits referenced on the accompanying site map.

- Big Brothers Big Sisters WNC in conjunction with Beer City Festival, LLC has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Beer City Brewfest and allow for consumption at this event.

  The Beer City Brewfest will be held on Saturday, June 5, 2010 from 12:00 p.m. to 7:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, Spruce Street between the intersections of South Pack Square & College Street, and within the City Hall/Courthouse Parking Lot – backstage to festival operations.

These actions have no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for the Asheville Mountain Center and Big Brothers Big Sisters WNC.

Con:

- Potential for public safety issues

There is no fiscal impact.

City staff recommends City Council adopt the resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the Mountain Sports Festival and the Beer City Brewfest.

RESOLUTION NO. 10- 117 - RESOLUTION BOOK NO. 33 – PAGE 39
RESOLUTION NO. 10-118 - RESOLUTION BOOK NO. 33 – PAGE 42

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Russell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. MEMORIAL DAY

Mayor's Committee on Veterans' Affairs

Ms. Gayle Sovinee, Chair of the Mayor's Committee on Veterans' Affairs, shared with Council their following 2010 events: Memorial Day on May 31, Bele Chere booth on July 23-25; the Veterans' Forum on September 27; and Veterans' Day on November 11.

USS Asheville Celebration

Mr. Ken Vasilik, Chairman for the Subcommittee on USS Asheville, updated City Council on the history of the four USS Asheville's and related activities in Asheville.

Mayor Bellamy proudly invited the public to tour of the USS Asheville exhibit on the First Floor of the City Hall Building.

B. DOWNTOWN COMMISSION UPDATE

Mr. Dwight Butner, current Chairman of the Downtown Commission, reviewed with Council their accomplishments in 2009: (1) Downtown Design Review; (2) develop and recommend to City Council a Comprehensive Strategic Plan and other plans for downtown; (3) evaluate plans and recommendations to City Council; (4) encourage implementation of approved projects; (5) provide recommendations for effective management of the public resources for downtown; and (6) cooperate with and evaluate and represent the recommendations of other organizations, including, but not limited to, the Asheville Downtown Association, property owners, merchants, residents, businesses, tenants, institutions and other members of the downtown community. He then briefly explained their focus for 2010.

On behalf of City Council, Mayor Bellamy thanked Mr. Butner and the entire Downtown Commission for their efforts and hard work on the Downtown Commission.

C. DOWNTOWN MASTER PLAN UPDATE

Ms. Sasha Vrtunski, Project Manager for the Downtown Master Plan, said that the Downtown Master Plan was adopted by City Council in May, 2009. Implementation efforts began

in fall, 2009 and continue with the help of community volunteers serving on implementation committees.

Following the adoption of the Downtown Master Plan, the Downtown Commission decided to appoint an Action Committee to work on implementation. This Action Committee is made up of five subcommittees that correspond with the recommendations in the plan; Arts & Culture; Historic Preservation; Transportation & Parking; Urban Design & Development; and Downtown Management. Progress is underway in all the committees, as noted below:

Arts & Culture - Concentrating on the creation of an Artist Alliance and a forum is being planned for this fall to kick off the Alliance. Has also the subcommittee has discussed the potential for a Cultural Arts Commission and is currently engaged in background research and starting discussions with the Public Art Board about this idea. The Subcommittee is currently concentrating on 4 items from plan: (1) Artist Alliance creation; (2) Coordinating arts calendars; (3) Pack Square Cultural District; and (4) Potential Cultural Arts Commission. Many of the other items in the Plan will flow from the creation of the Alliance and the Commission.

Historic Preservation - Has taken the time to add detail to the recommendations in the plan as they were somewhat vague in this area. These ideas will focus on how our community relates our history to residents & visitors and using the arts, architecture and public places to tell those stories. Staff is pursuing an update of the National Register District of downtown – which could potentially add buildings to the register, which are then eligible for tax credits. The Subcommittee has worked on ideas which add "meat" to Item 1M. These really address the question of how we tell the stories in our downtown, and how we link programs, art and public spaces.

Transportation & Parking – Is bringing together advocates of all forms of transportation. The subcommittee is reviewing the different elements of the plan and giving input on the implementation actions by staff. The Subcommittee is reviewing and monitoring progress on Master Plan items. Federal stimulus funding has enabled the installation of bike lanes on Asheland, Hilliard, Coxe and a climbing lane on N. Lexington. Other items are on hold due to economic downturn or cost, e.g., shuttle, parking reservation system.

Urban Design & Development - This subcommittee had the clearest task, and a very diverse membership reflecting the multiple constituencies that supported the need for the Downtown Master Plan, and changes to regulatory requirements for development or redevelopment downtown. They completed an eight month, 20 meeting evaluation process reviewing the recommendations in the plan for UDO changes, reaching a consensus recommendation on most of the recommendations. On the very few issues where no consensus was reached, they will present the recommendations of both the majority and minority members of the subcommittee. The Subcommittee met 20 times from October 2009 to May 2010. The combed through every piece of Unified Development Ordinance changes recommended in the Plan. They considered benefits, consequences, long term issues and real world costs when looking at each item. The recommendations have been passed onto the Downtown Commission. The Committee is staffed by Jessica Bernstein and Alan Glines.

The findings of this subcommittee began to be presented to the Downtown Commission last week. The DTC may schedule a special meeting to finish their review later this month. The changes will subsequently be reviewed by the Planning & Zoning Commission, the Planning & Economic Development Committee of Council and then City Council. Staff expects recommendations to reach City Council this coming fall.

Downtown Management - Has been seriously exploring the possibility of a community improvement district or business improvement district for downtown Asheville. These

districts traditionally rely on funding through a self-imposed tax district to pay for specific services over and above city provided services. These services can include sidewalk sweeping, downtown ambassadors, additional security, and advertising. The committee is currently looking at the current services provided by the city and other entities and working to discuss what needs to be added to ensure that downtown remains a successful and thriving area. The Subcommittee is studying improvement districts and how it could work in Asheville. Staff has created a draft baseline of current city services to downtown. Over next 2-3 months, the Subcommittee will decide whether to continue pursuing the district, and if so, outreach and education of other downtown property and business owners will occur. A proposal will come to Council only after there is a critical level of agreement in the private sector.

In addition to work by the subcommittees, certain items fall under staff work and are being pursued accordingly. These items are noted in the accompanying Implementation Matrix. One example of this is a grant that has been obtained by the Historic Resources staff to fund updating the National Register Historic District in downtown. This is important because adding buildings to the register can expand the availability of Historic Tax Credits. Likewise, staff pursued and obtained federal stimulus funding to install bike lanes on several downtown streets including Coxe, Hilliard, and Asheland.

Long term items from Strategy 3, which addresses extending a design framework and developing neighborhoods in downtown, have not yet been addressed. Once the UDO and Design Guideline changes recommended in Strategies 4 to 6 are implemented, planning staff will have more time to work on the implementation of Strategy 3. It is likely that in 2011, the Downtown Commission may consider appointing a separate committee that is interdisciplinary in nature to work on implementing the long-term vision laid out in the plan.

Council's Strategic Operating Plan calls for the completion of the master plan and to begin implementation. This one-year update confirms that there has been substantial progress toward that goal. The ongoing energy and commitment of the Downtown Commission and the members of the subcommittees is to be applauded and appreciated.

In general the Downtown Master Plan relies mainly on the efforts of city staff and the non-profit and private sectors. There are specific items which call for public investment such as the Civic Center or transportation improvements. These items will proceed separately to Council as funding is available. No funding is requested at this time.

Ms. Vrtunski asked for Council's input on how they would like to be educated on the Urban Design & Development Subcommittee recommendations for UDO changes, e.g., being invited to a Downtown Commission worksession or hold a City Council worksession on this topic.

Mayor Bellamy thanked Ms. Vrtunski, the Downtown Commission and all the members of the subcommittees for moving this task forward.

In response to Mayor Bellamy about extending the Central Business District, Ms. Vrtunski said that some areas have been recommended for inclusion; however, staff wants to get the building form changes through and then evaluate the boundaries, e.g., the head of Broadway and on Asheland Avenue. Councilman Davis noted that the triangle corner on Broadway is on the Metropolitan Planning Organization list and they will try to move it up.

At Mayor Bellamy's suggestion, it was the consensus of Council that after the Planning & Zoning Commission review of the changes, that possibly two City Council worksession be scheduled (by-passing the Planning & Economic Development Committee).

D. TRANSIT COMMISSION UPDATE

Mr. Paul Van Heden, Chairman of the Transit Commission, said that the mission of the Commission is to be an advisory board to the Asheville Transit System on matters affecting the transit system and its operations.

He provided the Council with an historical overview of the Commission.

The year in review includes (1) new Transit Commission members; (2) Stream-lined the public comment process; (3) Continued to do outreach to riders; (4) Transit Master Plan: Transit Commission members played a critical role in encouraging the passage of the Transit Master Plan - and the first phase of it's implementation; and (5) Securing funding for the plan was one of the commission's top goal in 2010. The commission is extremely grateful for council's support of the precepts set forth by the plan, and looks forward to working with council to make its recommendations a reality.

Their focus for 2010-11 includes: (1) SERVICES/IMPROVEMENTS (OPERATIONAL) (a) Revise routes for better services; (b) Improving on time service; (c) Raising frequency of main corridor routes; and (d) Sunday Service; (2) MARKETING (a) Market to get more riders/unfunded marketing; (b) Ambassadorship; (c) Advertising/Marketing to Riders; (d) Increase rider involvement; and (e) Promoting advertising system to Council and voters; (3) FUNDING SOURCES (a) Exploring Funding Options; and (b) Promoting advertising system to Council and voters; and (4) TRANSPORTATION CONGRESS (a) Encouraging City to take more multi-modal approaches – combine various boards and commissions; and (b) Help other boards and commissions with structure.

In conclusion there is a lot to do, some being (1) Automatic vehicle locator system; (2) Federal livability policy (HUD, EPA, DOT); (3) I-26; (4) Bringing back trolleys; (5) 10 new buses; (6) Instituting transit oriented development; (7) Growing public awareness of transit's value (including bus are and mktg.); (8) Instituting bus rapid transit; (9) Sunday service; (9) Stable marketing budget; and (10) Better street furniture.

On behalf of City Council, Mayor Bellamy thanked Mr. Van Heden and the entire Transit Commission for their hard work.

E. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 10-119 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPROVE THE LOCAL ENERGY ASSURANCE PLANNING SCOPE OF WORK CONTRACT WITH THE LAND-OF-SKY REGIONAL COUNCIL

ORDINANCE NO. 3854 - BUDGET AMENDMENT TO RECEIVE FUNDS FROM THE LOCAL ENERGY ASSURANCE PLANNING GRANT

ORDINANCE NO. 3855 - BUDGET AMENDMENT INCREASING THE GRANT FUNDING FOR THE KIMBERLY AVENUE RESURFACING PROJECT

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of city staff's recurring ARRA update to Asheville City Council, staff is seeking Council consideration of three items for approval:

- Resolution authorizing the City Manager to approve the Local Energy Assurance Planning (LEAP) scope of work contract with the Land-of-Sky Regional Council; and the associated budget amendment, in the amount of $209,940, to receive funds.

- Approval of a budget amendment, in the amount of $154,594, increasing the grant funding to the Kimberly Avenue resurfacing project.

Local Energy Assurance Planning

The Local Energy Assurance Planning (LEAP) grant was awarded to the City of Asheville on April 28, 2010, in the amount of $209,940. This grant encourages regional participation in the development of energy assurance planning and requires a city to be the grant applicant. For this reason, as the largest city in the region, the Land-of-Sky Regional Council had requested that the City of Asheville be the grant applicant and fiscal agent. The Land-of-Sky Regional Council (LOSRC) would manage implementation of the project. This was approved by City Council at the regular meeting of September 22, 2009.

The Scope of Work for this grant is the agreement between the City of Asheville and the LOSRC to complete the requirements of this grant which is scheduled for completion in 2012. This Scope of Work includes the following:

- Analyzing the current fuel infrastructure and assess fuel use;
- Creating a regional emergency fuel plan to unify the energy plans in the five county region;
- Assisting governments without emergency fuel plans in developing a plan;
- Developing a plan to mitigate energy supply disruptions;
- Establishing a long range plan that incorporated local bio-fuels, electric vehicles, propane and compressed natural gas to reduce the reliance upon traditional vehicle fuels;
- To create a long range plan to assist in the development of a fuel plan that focuses on non-traditional vehicle fuels;
- Training on developing emergency fuel plans; and
- Compliance with all grant requirements and provisions for ARRA

Pros:

- The Regional Strategic Fuel plan will enable the region to better endure a fuel shortage without breaks in vital services such as law enforcement, volunteer and municipal fire protection, and other emergency services.
- The LEAP grant will give the region the tools to better manage future fuel crisis and mitigate the reliance on fuel from a single source for a more energy independent future.
- Creation of more current or up-to-date energy assurance plans.

Con:

- The City of Asheville will be bear responsibilities as the fiscal agent of the grant for a regional project. This will include ARRA and other additional reporting requirements.

This is a 100% non-matching grant.

City staff recommends City Council authorize the City Manager to approve the scope of work agreement between the City of Asheville and the Land of Sky Regional Council and adoption of the budget amendment in the amount of $209,940.

Kimberly Avenue resurfacing project

The Kimberly Avenue resurfacing project, which is currently underway, will provide milling, repair, resurfacing, and pavement markings on Kimberly Avenue from Edwin Place to Gracelyn Road/Griffing Boulevard. It includes the addition of a bicycle climbing lane on the northbound side of Kimberly within the project limits. The climbing lane is part of the infrastructure recommended for Kimberly Avenue in the city's bicycle plan.

This project was the last of the ARRA projects funded through the French Broad River Metropolitan Planning Organization (MPO) and has been the beneficiary of lower than anticipated

bids on other ARRA projects throughout the MPO. The original grant agreement and budget amendment were approved by the Asheville City Council on August 25, 2009.

The initial estimate for the amount of available ARRA grant funding for this project was $462,000. The budget amendment that City Council approved in August for this project, which totaled $577,500, included this $462,000, as well as $115,500 from the City's General Fund fund balance. Now that all the MPO project contracts have been let and grant amounts revised, the available grant funding for the Kimberly project has been revised upward to $616,594, which is a $154,594 increase over the initial estimate that was budgeted in August. It should be noted that the grant amount includes $17,600 in STP-DA funding. The $17,600 in STP-DA funding will reduce the City's FY 2014 funds awarded by the MPO for Hendersonville Road sidewalk.

This project supports the City Council's strategic plan goals of proactively pursuing funding opportunities with state and federal economic stimulus packages and leveraging funding for regional transportation improvements.

Pros:
- Potentially reduces the city's share of project costs
- Improves Asheville's transportation facilities
- Provides long term investment in the City's infrastructure

Con:
- Reduces the FY 2014 Hendersonville Road sidewalk project grant award by $17,600

As noted earlier in the staff report, the Kimberly Avenue project budget includes $115,500 in funding from the City's General Fund fund balance. Based on current cost estimates, it is likely that this entire amount will not be needed for this project. However, staff recommends that the $115,500 remain budgeted in the project to provide a contingency for any unanticipated costs that may arise. Once the project is complete, staff will report back to Council on the final cost of the project and the amount of savings that are available to be returned to the General Fund or used for other capital projects.

City staff recommends City Council adopt the budget amendment to increase the anticipated grant revenue.

When Mayor Bellamy asked for public comment, she received none.

In response to Councilwoman Manheimer, Director of Transportation Ken Putnam believed the Kimberly Avenue sidewalk project will be finished in approximately 3-4 weeks.

Vice-Mayor Newman said that if there are any funds left over from the Kimberly Avenue project that they go back to the Hendersonville Road sidewalk project.

Mayor Bellamy explained the Mobility Fund that the Governor is proposing. She urged the public to contact our legislators to know that we need that additional pool of money which will not negatively impact the Metropolitan Planning Organization funding.

Mayor Bellamy said that members of Council have previously been furnished with copies of the resolution and ordinances and they will not be read.

Councilman Smith moved for the adoption of Resolution No. 10-119. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 45

Councilman Bothwell moved for the adoption of Ordinance No. 3854. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 113

Councilwoman Manheimer moved for the adoption of Ordinance No. 3855. This motion was seconded by Vice-Mayor Newman and carried unanimously.

ORDINANCE BOOK NO. 26 - PAGE 115

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING ON THE FISCAL YEAR 2010-11 ANNUAL OPERATING BUDGET

Mayor Bellamy opened the public hearing at 5:56 p.m.

Director of Administrative Services Lauren Bradley said that the City Council conducts a public hearing each year to receive public input on budget issues before the Annual Operating Budget is adopted.

The Fiscal 2010/2011 Annual Operating Budget was presented to City Council on May 11, 2010. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on May 14 and May 21, 2010. The Fiscal Year 2010/2011 Annual Operating Budget is balanced with an Ad Valorem tax rate of $0.42 per $100 of assessed value. All essential City services are continued in the Proposed Budget.

Adoption of the Budget Ordinance is currently scheduled for June 22, 2010, at the regularly scheduled City Council meeting.

A copy of the Budget is available for public inspection in the City Clerk's office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the Budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the Ad Valorem Tax rate, which can not be changed once adopted.

Staff recommends City Council conduct the public hearing on the City of Asheville Fiscal Year 2010/2011 Annual Operating budget and include public input in considerations on the Budget.

Mr. Mac Swicegood, representing the Council of Independent Business Owners, said that the Stormwater Utility has not performed as promised. Although it appears that a small effort has been made to address a few stormwater infrastructure issues, the fund basically collects money on raindrops from all the citizens and businesses and funds 35 jobs. The utility was sold as a way to fix and repair a dilapidated system. It was never sold as a way to fund additional desk jockeys in the City. We all expect more. Although you plan a $2.3 Million bond this year paid mainly by this fund, the utility has primarily been and continues to be a bureaucratic effort with little to show for all the taxes collected from the City's property owners. Put the hard hats on and make repairs we all were promised. Secondly, Asheville is blessed with an abundance of water. With North Fork, the Mills River, and now Bee Tree as available resources, City Council needs to change its course on conservation and sell water. Now is your time to beat the Sullivan Act – not by legal disputes with Buncombe County and the State of North Carolina but by marketing and selling water to surrounding counties. Since we are not in a drought presently, this needs to be a priority to market and be ready for the next drought when the water is needed in areas that do not have it. Get ready – make the agreements with other systems and make connections to those

systems – and when the time comes – sell it. Ultimately this can help all of us later on by avoiding future rate increase. Finally, the City Council has emphasized and developed a large transit system. This system has the potential to service many citizens. However, as dollars dry up, you must evaluate the system for financial viability. This cannot be sustained as other priorities suffer.

Mr. Fred English felt we need to recruit more industry.

Mayor Bellamy asked City Manager Jackson to see if the City has any money invested in the Clingman Avenue project (which is N.C. Dept. of Transportation project) and to respond to the concerns raised by Mr. Swicegood.

Mayor Bellamy closed the public hearing at 6:03 p.m.

Mayor Bellamy announced that adoption of the budget will occur on the June 22, 2010, meeting.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADD A NEW LAND USE DESIGNATION FOR ELECTRONIC GAMING OPERATIONS AND ESTABLISHING SPECIAL STANDARDS FOR THEIR REVIEW AND REGULATION

ORDINANCE NO. 3856 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ADD A NEW LAND USE DESIGNATION FOR ELECTRONIC GAMING OPERATIONS AND ESTABLISHING SPECIAL STANDARDS FOR THEIR REVIEW AND REGULATION

ORDINANCE NO. 3869 – ORDINANCE AMENDING THE FEES AND CHARGES MANUAL TO ADD A NEW PRIVILEGE LICENSE FEE TO BE COLLECTED FOR ALL ELECTRONIC GAMING BUSINESSES

Mayor Bellamy opened the public hearing at 6:04 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of (1) amending the Unified Development Ordinance to add a new land use designation for Electronic Gaming Operations (EGO) and establish special standards for their review and regulation; and (2) adoption of a new privilege license fee to be collected for all electronic gaming businesses. This public hearing was advertised on May 14 and 21, 2010.

In 2006, the State of North Carolina adopted legislation that banned video poker and other gaming machines across the state and all machines were phased out by July 1, 2007. Proponents for the video gaming industry responded by adapting machines allowing them to fall under a special provision that allowed the NC State Education Lottery and other sweepstakes games made popular by national food chains (McDonald's, Pepsi Co., etc.). Since then, there have been several legislative attempts to ban or restrict EGOs, but at least two superior (lower) courts have held that the new forms of the games are not covered by the law, and have enjoined its enforcement. There has been no ruling from an appellate court, and the validity of the State law remains uncertain.

In the absence of criminal enforcement measures, numerous municipalities are responding and controlling the proliferation of these businesses through various controls, the most common of which includes the adoption of a Conditional Use or Special Permit process and/or the adoption of a new privilege license fee designed to reflect the profitability of the machines. The Unified Development Ordinance (UDO) is structured such that a use that is not specifically allowed in a zoning district—as a use by right, use by right, subject to special requirements, or conditional use—is not permitted. In the River District, however, all uses are

allowed unless specifically prohibited. Currently, the City does not define or regulate EGOs. As a result of this absence of regulation, several EGOs have attempted to locate in commercial districts in the City, under the umbrella of similar uses, such as "recreational uses, commercial indoor." At least one EGO has opened in the River District, but is subject to no regulations regarding its operation (parking spaces, etc.). Approximately ten (10) separate businesses have been established without permits and have been issued Notices of Violation. Most have complied and ceased their activity awaiting the adoption of new standards; however, several businesses have chosen to remain open after being cited for failing to comply and are currently accruing a $100 per day fine that will continue until compliance is achieved or, the use is ceased. Recently, the Board of Adjustment ruled that EGOs were not encompassed within the use classification of "recreational uses, commercial indoor," which is a permitted use in several districts, and upheld a notice of violation. Part of the basis for that ruling was that EGOs had the potential for substantial cash payouts, and their customers are limited to adults over the age of 18, which is a substantially different kind of business than the family-oriented establishments that typical of that use classification. In view of the regulatory uncertainty at the State and local levels, the need for some consideration as to whether and how to regulate EGOs is apparent. Local governments across the State are confronted with this same issue

After conducting a review of common practices, both locally and across the state, the City of Asheville staff feels that a reasonable response would be to pursue two separate actions.

1) Amend the City's code of ordinances to create a new business designation and some appropriate controls to help mitigate any potential impacts from the businesses, and
2) Adopt a new privilege/business license fee specific to these uses and consistent with other local municipalities.

The first action noted above would require an amendment to the City's *Unified Development Ordinance* and review by the Planning & Zoning Commission and City Council. The second action requires review by the Finance Committee and City Council.

City staff proposes to add the new land use designation to a number of commercial zoning districts that currently allow uses of similar impacts. While most other local governments that have adopted standards have permitted EGO's through a Conditional Use or Special Use permit process requiring approval by the elected officials, Asheville staff proposes to allow the new use as a Use by Right, Subject to special requirements. This would streamline the review process while still maintaining a high level of review and accountability.

After reviewing numerous ordinances from other cities and towns, the most common elements of the newly adopted ordinances include:

1) A new, or expanded, or clarified definition
2) A limit on the total number of machines
3) A limit on the hours of operation
4) A separation requirement from:
    - Residences
    - Other gaming establishments
    - Adult establishments
    - Places of worship
    - Parks, playgrounds, ballfields
    - Daycare centers, daycare homes
    - Schools
    - Libraries
    - Child or family venues (i.e. children's theaters, video arcades, etc.)

The wording amendment Ordinance proposes standards that the staff believes are appropriate for the Asheville community that would allow the freedom to pursue this new business opportunity while also providing for the necessary controls to mitigate any potential land use conflict or public safety concerns.

The fee component is expected to help offset potential impact and public safety/welfare concerns.

The proposed new definition would be:

> ***Electronic Gaming Operation*** means a business enterprise, whether principal or ancillary, where persons utilize electronic machines, including but not limited to computers and gaming terminals, to conduct games including but not limited to, sweepstakes, lotteries, games and/or games of chance where cash, merchandise, or other items of value are redeemed or otherwise distributed, whether or not value of such distribution is determined by electronic games played or be predetermined odds which have a finite pool of winners. This term includes, but is not limited to internet cafes, internet sweepstakes, or cybercafés. Electronic Gaming Operations do not include operations associated with the official NC State Education Lottery or any nonprofit operation that is otherwise lawful under State law (for example, church or civic organization fundraisers) nor shall it include arcade games of skill.

The proposed new standards are as follows:

Electronic gaming operations.

a. Use districts: Highway Business, Regional Business, Central Business District, River, Commercial Industrial.
b. Electronic gaming operations, whether ancillary or primary, with five or more machines shall comply with the following separation requirements:
    - 1000 feet from all other electronic gaming operations and adult establishments
    - 1000 feet from schools, libraries, places of worship, child care centers, public parks/playgrounds, public recreation or community center
    - 500 feet from all residentially zoned properties
    - 200 feet from all non-residentially zoned properties occupied by structures that include residential uses
c. Electronic gaming operations, whether ancillary or primary, with four or fewer machines shall comply with the following separation requirements:
    - 500 feet from all other electronic gaming operations and adult establishments
    - 200 feet from schools, libraries, places of worship, child care centers, public parks/playgrounds, public recreation or community center
    - 100 feet from all residentially zoned properties
    - 50 feet from any non-residentially zoned property occupied by structures that include residential uses
d. For the purposes of this subsection, the distance shall be measured from the closest point of the outer wall of the structure housing the electronic gaming operation to the nearest property line occupied by a protected use, zone, or by any other electronic gaming operation or adult establishment.
e. The Board of Adjustment may consider variances to the development standards found in articles VIII and XI. Variances to separation requirements may only be considered when major geological landforms, limited access highways, or other features that create a substantial divide separate the uses.

f. No electronic gaming operation shall not engage in business prior to 10 a.m. or after 10 p.m. Monday through Saturday and, not prior to 1 p.m. or after 10 p.m. on Sunday. During hours of operation, electronic gaming operations shall be open for direct, unobstructed access by all safety and enforcement personnel. All entrance doors shall remain unlocked while patrons are on the premises. All electronic gaming terminals/machines/computers/gaming stations shall be open and visible from the exterior of the exterior front of the establishment.
g. No person or entity engaged in electronic gaming operations shall allow, permit, or condone any person under the age of 18 to engage or play any game that is included in the definition electronic gaming operations.
h. The maximum number of gaming terminals/machines/computers/gaming stations within an electronic gaming establishment is twenty (20).
i. Any electronic gaming establishment existing prior to the effective date of this ordinance shall comply with the regulations contained within this subsection within 180 days after the effective date of this Ordinance Electronic gaming operations are prohibited in or as a part of any check cashing facility.
j. The machines/terminals must not be prohibited by the State or Federal law and must have all applicable State and local permits and business licenses prior to the opening of the business.
k. If food and/or beverages are served, the establishment must meet any State requirements and the requirements of the Buncombe County Health Department.

The proposed use does not align with stated goals or plans, predominately because it addresses a use intended to be prohibited that is now proliferating due to a judicial interpretation and, therefore, not considered when goals and plans were discussed and adopted. Regulating the use could, help control secondary impacts associated with criminal activity, nuisance complaints and other land use conflicts.

The proposed use does not align with stated goals or plans, predominately because it addresses a use intended to be prohibited that is now proliferating due to a judicial interpretation and, therefore, not considered when goals and plans were discussed and adopted. Regulating the use could, help control secondary impacts associated with criminal activity, nuisance complaints and other land use conflicts.

Pro:

- Regulates a new business that has judicially been interpreted as a legal use

Cons:

- Could eventually be "re-prohibited" by the State of North Carolina General Assembly (although it is unlikely to be taken up during the ensuing short session)
- Would require additional review and enforcement responsibilities when limited resources are available to accommodate new work
- May result in unanticipated impacts and concerns from citizen groups

Staff resources for review, inspection, and enforcement will be required; however, the number of applications is expected to remain relatively small and would not cause an undue burden on staff from a development review standpoint. It is less clear whether the uses could result in the need for additional public safety oversight which helps support the need for an individualized business fee to help offset the need for additional resources.

Before enforcement action was taken, it was estimated that the City of Asheville had up to ten (10) stand-alone EGO's; this does not include the number of establishments that currently support gaming stations as an ancillary use. Should this amendment be adopted, it is expected that many of the original gaming locations would not meet the proposed standards and would have to amortize their use over the proposed 180 days. Additionally, it is anticipated that several business would choose to remove the gaming use to avoid the fees. As a result, it is very difficult

to predict potential revenues but staff estimates that it could result somewhere between $25,000 to $50,000.

In February/March 2009, this proposal was reviewed by: (1) The Planning & Economic Development Committee; (2) The Finance Committee, and (3) The Public Safety Committee.

In all cases, the three committees recommended moving this proposal forward to the Planning & Zoning Commission and City Council for consideration. The Planning & Zoning Commission reviewed this item at their May 5, 2010, meeting and recommended approval 6-0. Interest in making the EGO use a Conditional Use Permit in the Central Business District was discussed but did not garner the support to be incorporate into the formal recommendation.

Staff recommends (1) adoption of the ordinance proposed that establishes a new land use designation and associated land use controls; and (2) adoption of a new privilege/business license fee of $2500 per establishment with a $500 per machine added to the base fee. Fee shall be renewed on a yearly basis.

Should the Council choose not to support this proposal or wish to consider other policy options a few alternatives could include:

- Adopt a new definition for *Electronic Gaming Establishments* and then adding them to the list of permitted uses in appropriate zoning districts. No special requirements included. (not recommended)
- Create a new Conditional Use Permit category for *Electronic Gaming Establishments.* CUP could be applied in certain districts only while remaining a Use by right, Subject to special requirements in other districts.
- Expressly prohibiting *Electronic Gaming Establishments* in the City of Asheville.

Mr. Fred English felt Council should charge the maximum fees.

Mr. William Withers, representing WPM Properties, did not support these regulations as his business is not a nuisance and they are properly run.

Mayor Bellamy closed the public hearing at 6:25 p.m.

In response to Councilman Russell regarding outreach to business owners or the public, Ms. Tuch said that even though the affected businesses are aware of this process as they have been following it from the beginning, she has not made an effort to inform the ancillary businesses. The proposed ordinance has been circulated to the Coalition of Asheville Neighborhoods as well as the other groups on their listserv.

When Councilman Bothwell asked if there are other separation requirements for other uses, Ms. Tuch replied that adult establishments have a stronger separation requirement. In addition, group homes and family care homes have separation requirements that are designed more to prevent a concentration of uses. Regarding the separation requirements for EGO's, we attempted to model that from what other municipalities were doing. She explained that on Sundays it is common for businesses to have shorter hours.

There was considerable discussion from Council. Amongst other things, the discussion surrounded the State's legislation and how other municipalities are dealing with the issue of proliferation and impact of the machines in communities; the rationale of the privilege license fee and cost per machine; the rationale of an implied criminal element of this type of business; whether we want a concentration of the businesses or have them spread to all areas of the city; should there be a cap of the number of machines at one location; and rationale behind the hours of operation, use districts, separation requirements, and 180 amortization period.

Mayor Bellamy said that members of Council have previously received a copy of the ordinances and they would not be read.

Vice-Mayor Newman moved to adopt a new privilege/business license fee of $2500 per establishment with a $2500 per machine added to the base fee. This motion was seconded by Councilwoman Manheimer and carried on a 4-3 vote, with Mayor Bellamy, Councilman Russell and Councilman Smith voting "no."

Councilman Davis moved to reconsider the motion of the new privilege/business license fee. This motion was seconded by Councilman Russell and carried unanimously.

After further discussion on the license fee, Vice-Mayor Newman moved to adopt Ordinance No. 3869, a new privilege/business license fee of $1000 per establishment with a $2500 per machine added to the base fee. This motion was seconded by Councilwoman Manheimer and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no."

ORDINANCE BOOK NO. 26 - PAGE 117

Councilman Davis moved to allow the EGO's in the following use districts: Highway Business, Regional Business, Central Business District, River, and Commercial Industrial. This motion was seconded by Councilwoman Manheimer.

After further discussion about the Community Business I and Community Business II Districts and in order to capture most ancillary operations, Councilman Davis and Councilwoman Manheimer agreed to amend their motion to include 4 or fewer EGO's in Community Business I and Community Business II Districts. The amended motion carried on a 6-1 vote, with Councilman Russell voting "no."

Councilwoman Manheimer moved to cap the number of machines at 20 per establishment. This motion was seconded by Vice-Mayor Newman and carried on a 6-1 vote, with Councilman Russell voting "no."

Vice-Mayor Newman moved to not adopt separation requirements and that staff report back to Council in six months to see if there have been any concerns raised. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Mayor Bellamy and Councilman Russell voting "no."

Vice-Mayor Newman moved to not adopt hours of operation and that staff report back to Council in six months to see if there have been any concerns raised. This motion was seconded by Councilman Bothwell and carried unanimously. Mayor Bellamy asked that staff pay particular attention to those establishments close to residential districts.

Councilwoman Manheimer moved to adopt an amortization period of 180 days. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Councilman Russell voting "no."

Councilwoman Manheimer moved to adopt all other provisions of the ordinance that do not conflict with the modifications made by Council. This motion was seconded by Vice-Mayor Newman and carried on a 6-1 vote, with Councilman Russell voting "no."

ORDINANCE BOOK NO. 26 – PAGE 158

Closed Session

At 7:25 p.m. Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including a lawsuit involving the following parties: Larry Roland and the City of Asheville. The statutory authorization is contained in G.S. 143-318.11(a)(3); (2) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The properties are located on the north side of Eagle Street, and the south side of Swannanoa River Road. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 8:23 p.m., Councilman Russell moved to come out of closed session and return to the formal meeting. This motion was seconded by Councilman Smith and carried unanimously.

C. PUBLIC HEARING REGARDING AN INSTALLMENT PURCHASE CONTRACT WITH BB&T TO FUND THE LIVINGSTON COMMUNITY CENTER PROJECT

Mayor Bellamy opened the public hearing at 8:30 p.m.

Treasury Services Manager Pat Liguori said that it is necessary for City Council to hold a public hearing authorizing the negotiation of the installment purchase contract with BB&T to fund the Livingston Street Community Center.

On April 27, 2010, City Council adopted a resolution authorizing negotiation of an installment purchase contract and setting a public hearing.

The current capital improvement plan includes funds previously appropriated by City Council to finance the construction of a community center on Livingston Street in central Asheville. This public hearing is a legal formality required by the North Carolina General Statutes before the process of security financing can officially begin.

Pro:

- Allows the City to comply with the legal requirements of the Local Government Commission regarding installment purchasing financing.

Con:

- There are no cons associated with ensuring that legal requirements have been met before security financing for the Livingston Street Community Center.

The City will secure approximately $1.1 million to finance approximately half of the construction costs associated with the Livingston Street Community Center. The remaining construction costs will be financed primarily with grants and donations. The projected annual debt service costs associated with the $1.1 million in debt proceeds ranges from approximately $123,000 to $76,000. Funds are already included in the City's Proposed FY 2010-11 debt service Budget to cover the debt service costs.

City staff recommends City Council hold the public hearing regarding an installment purchase contract with BB&T to fund the Livingston Street Community Center project.

Mayor Bellamy closed the public hearing at 8:31 p.m.

Mayor Bellamy said that a resolution approving an installment financing contract will be considered by City Council at their June 8, 2010, meeting.

V. UNFINISHED BUSINESS:

A. CONSIDERATION OF OUTDOOR SPECIAL EVENT CO-SPONSORSHIPS AND PARTNERSHIP AGREEMENTS FROM JULY 1, 2010, THROUGH JUNE 30, 2010

Director of Parks, Recreation and Cultural Arts Roderick Simmons said that this is the consideration of outdoor special event co-sponsorships and partnership agreements from July 1, 2010, through June 30, 2011.

At its meeting on March 4, 2010, staff presented a recommendation to the City Council Finance Committee to co-sponsor six anchor events (Asheville Drum Circle, Asheville Greek Festival, Asheville Holiday Parade, Downtown After 5, Goombay, Shindig on the Green) in the form of full permit fee waivers and in-kind labor support, a package valued at $114,295. In addition, staff recommended that 27 additional events be granted full permit fee waivers estimated in value at $26,032.

Subsequently, during the FY 2010-2011 budget process, staff received feedback from Council to seek opportunities for revenue enhancement and full cost recovery for services supported by fees. At the March 23 budget worksession, staff proposed an alternative cost-sharing proposal for event co-sponsorship as a way to enhance revenue and promote full cost recovery. At that worksession, Council asked for specific information about how a reduced event co-sponsorship model would work. Staff developed a proposal where organizers of the six anchor events would be responsible for paying 50% of their event costs (permit fees and/or in-kind labor costs) and no additional permit fee waivers would be granted, which was sent to City Council on April 9 and posted with the April 27 worksession agenda. The minutes of the April 27 budget worksession reflect that it was the consensus of Council to proceed with a reduced co-sponsorship program; however, Mayor Bellamy did not support that action.

The reduced co-sponsorship recommendation was brought forward for formal City Council consideration and adoption at its formal meeting on April 27, 2010. During Council discussion and public comment, four areas of concern were raised about the reductions, including:

- Loss of critical resources to event organizers;
- Providing adequate notice to event organizers to prepare for a reduced level of support;
- Fairness and clarity of eligibility requirements for events, and;
- Lack of consistency in the process for event organizers when support is considered and may change on a year-to-year basis.

City Council directed staff to develop alternatives for event co-sponsorship support based on the discussion at the April 27 meeting. Staff has broken down alternatives for each category of sponsorship below.

Community Event Programming Partnerships & Co-Sponsorships

The City of Asheville charges everyone a fee to permit and have priority use of parks, permitted amenities, or public facilities. These fees cover extra operational expenses associated with events and guarantee space for the permittee. At the same time, some events produced by non-profit agencies or other sister organizations - such as concerts, art shows, cultural celebrations, theater performances, health fairs, sports events, and others – can also directly further the department's core programs. Consequently, reducing or waiving permit fees and

considering in-kind support from city operational departments (i.e., Public Works, Asheville Police Department, Asheville Fire Department) can be an opportunity to leverage the city's ability to provide these programs while reaching a wider and more diverse audience, thus serving a public purpose. As a result, in recognition of the value these events bring the City of Asheville and the broader community, the city has historically offered support to events that meet certain criteria.

In recognition of the historical, economic, and community significance of certain events, staff would recommend developing three-year partnership agreements with the groups who produce six anchor events. These events include: Downtown After 5, Holiday Parade, Asheville Greek Fest, Drum Circle, Goombay and Shindig on the Green. The agreements would provide full support for permit fee waivers (i.e. park usage permits, building/fire safety permits, etc.) and labor costs (i.e. police support, sanitation, public works) not to exceed the dollar value of support established in FY 2010-2011 in future years (currently estimated at $114,295).

In addition to anchor events, the City of Asheville maintains partnerships with several sister agencies that provide programming and support at city parks or facilities targeted for a specific community purpose. These sister agencies include: Friends of the Nature Center, the Downtown Association (via Friends of Pritchard Park) and the Pack Square Conservancy.

To formalize these partnerships and support for specific initiatives, staff recommends developing multi-year agreements for these purposes:

Friends of the Nature Center
To collect fees on behalf of the City and to manage the Nature Center Membership program and special events as defined by the multi-year partnership agreement and approved by the Parks and Recreation Advisory Board.

Downtown Association/Friends of Pritchard Park
Facility use and permit fee waivers for programming in Pritchard Park. The dates and times of programming to be approved by the Parks and Recreation Advisory Board as defined by the multi-year partnership agreement.

Pack Square Conservancy
Facility use and permit fee waivers for programming in Pack Square Park. The dates and times of programming to be approved by the Parks and Recreation Advisory Board as defined by the multi-year partnership agreement.

Permit Fee Waivers

To address concerns about the consistency of fee waivers granted for certain events, staff recommends City Council adopt for FY 2010-2011 a non-profit level fee, which would amount to a 50% reduction in event permit fees, for events that meet the following criteria:

- The event is produced by a registered 501c(3) non-profit verified through documentation;
- The event is open to the general public;
- There are no fundraising activities or aspects to the program or event, and;
- The non-profit permit holder remains responsible for general liability insurance and other related event costs including police coverage, barricades, parking meter closures, and other labor costs and needs associated with the event.

During the year, any event meeting the stated criteria above would be eligible for the non-profit fee. If approved, staff would bring back a Fees & Charges Amendment at the next City Council meeting.

To address the concern that the 27 events that were previously considered for full fee waivers have not had adequate time to plan for reduced levels of support in the coming year, City

Council could consider granting these agencies fee waivers for one additional year, knowing that these events may be eligible for the non-profit level fee the following year.

This action supports the current Parks, Recreation, Cultural Arts and Greenways Master Plan by making organizations aware of the value of their events to the community and by providing clear criteria for support.

Pros:

- Strategic partnerships allow the city to leverage programming and events to reach a wider and more diverse audience.
- Events stimulate the local economy.
- Provides additional quality cultural programming and diversity.
- Reduces staff time in processing fee wavier requests.
- Provides multi-year consistency.

Cons:

- Anchor events have labor costs to the City in the amount of $85,000, which can put a strain on city resources (police, fire, sanitation, park maintenance, etc.)
- A 50% reduction in permit fees for non-profit organizations would result in lost revenue for the city; however, the city does not budget for this revenue since it tends to fluctuate from year to year.
- Events contribute to decline on infrastructure such as parks.
- Some events close streets.

Partnership agreements will result in lost revenue from permit fee waivers and in-kind labor costs. In-kind labor costs for the six anchor events will be absorbed in existing budgetary allocations. Overtime budgets in FY 2010-2011 have been significantly reduced, and meeting event obligations along with routine service levels may be challenging but not impossible. A non-profit event permit fee level will also result in lost revenue; however, this revenue is not included in the budget due to year-to-year fluctuations, and so there is no budgetary impact from this action.

Below is the event requests for permit waivers and in-kind support:

	total requested permit fee waivers FY11	total requested labor cost FY11	total requested support FY11
Anchor Events			
Asheville Drum Circle	$3,875	$0	$3,875
Asheville Greek Festival	$10,742	$1,342	$12,084
Asheville Holiday Parade	$1,562	$39,462	$41,024
Downtown After 5	$2,143	$14,780	$16,923
Goombay Festival	$2,942	$26,869	$29,811
Shindig on the Green	$7,414	$3,164	$10,578
Anchor Event Sub-Total	$28,678	$85,617	$114,295
Non-Anchor Events			
Asheville Citizen-Times Half Marathon/5K	$884	$3,300	$4,184
Asheville Earth Day	$3,342	$2,286	$5,628

Grand Total	**$54,710**	**$149,586**	**$204,296**

In order to move forward with the recommendations outlined above, staff is seeking Council policy affirmation for the four items listed below.

City Council then discussed at length each item, asking for clarification or further explanation when needed, in particular issues related to labor costs.

(1) City Council affirms that providing support community events and programming is beneficial to the City of Asheville and serves a public purpose.

It was the consensus of Council to provide support for community events and programming as they are beneficial to the City of Asheville and they serve a public purpose.

(2) City Council wishes to continue public support through three-year agreements for six specific events (Downtown After 5, Holiday Parade, Asheville Greek Fest, Drum Circle, Goombay and Shindig on the Green) produced by partner agencies that further the city of Asheville's goals and entail historical, economic and community significance.
   a. City Council is supportive of capping the value of in-kind support for anchor events at an annual amount not to exceed $114,000 for all six events.

Mr. Bryon Greiner, representing the Asheville Downtown Association, supported staff's recommendation for Council support.

Mr. Robert King, representing the Goombay Festival, supported staff's recommendation for Council support.

A representative from Blue Ridge Pride hoped they could be considered as one of the six anchor events in the future.

Vice-Mayor Newman felt it might be appropriate to discuss partnership opportunities with Buncombe County and the Buncombe County Tourism Development Authority to help support the six anchor events since they are beneficial to not only Asheville but all of western North Carolina.

Mayor Bellamy said that when staff comes back that the conversation about the cap for the anchor events that we need to be committed to the three-year period.

Councilman Davis moved to continue public support through three-year agreements for six specific events outlined above, capping the value of in-kind support at an annual amount not to exceed $114,000 for all six events. This motion was seconded by Vice-Mayor Newman and carried unanimously

(3) City Council affirms that partnerships with three sister agencies (Friends of the Nature Center, Downtown Association, and Pack Square Conservancy) warrant formalized community partnership agreements by which those organizations receive facility use and fee waivers for the purpose of providing programming that supports specific city goals or initiatives.

Mayor Bellamy asked that the Urban Trail be a part of the partnership agreement discussion with the Downtown Association.

Vice-Mayor Newman moved to direct staff to craft the partnership agreements with the Friends of the Nature Center, Downtown Association and Pack Square Conservancy to include facility use and fee waivers and to bring those back for Council consideration. This motion was seconded by Councilman Smith and carried unanimously.

(4) City Council endorses the concept of adopting a non-profit event permit fee level to become effective in FY 2010-2011 for any non-profit organization whose event meets certain criteria. The fee level would represent a 50% reduction in existing event permit fees.

a. City Council could consider grandfathering in 27 events for permit fee waivers for one year to allow for additional time to prepare for the new fee level.

Mayor Bellamy felt it would be appropriate to not charge non-profits for items that only the City can provide, e.g., street barricades. Regarding criteria for non-profits, she felt it was not necessary because we want all non-profits to fund raise in order to be sustainable. Mr. Roderick said that he would take a recommendation to the Finance Committee.

Ms. Sharon Farr, Coordinator of the Montford Community Arts Festival, was appreciative of being able to use the City of Asheville's name as a co-sponsor.

The Volunteer Sponsorship Coordinator for the Autism Society of North Carolina, Western North Carolina Chapter, thanked the City for being one of their co-sponsors and Hoped that could continue.

Councilman Russell moved to adopt a non-profit event permit fee level representing 50% reduction in existing event permit fees and to grandfather in 27 events for permit fee waivers for one year with a $20,000 cap for Fiscal Year 2010-11, to be reviewed annually by the Finance Committee. This motion was seconded by Vice-Mayor Newman.

Councilman Smith asked for a friendly amendment that we allow for non-profits to have

fund-raising activities and also that the registered non-profits include 501 c(4)s.

Councilman Smith and Vice-Mayor Newman accepted the friendly amendment to their original motion.

At Mayor Bellamy's suggestion, Councilman Russell moved to amend the amended main motion (1) to adopt a non-profit event permit fee level representing 75% reduction in existing event permit fees; (2) to grandfather in 27 events for permit fee waivers for one year with a $20,000 cap for Fiscal Year 2010-11, to be reviewed annually by the Finance Committee; (3) all for non-profits to have fund-raising activities; and (4) registered non-profits include 501 c(4)'s. This motion was seconded by Councilman Smith and carried on a 4-3 vote, with Vice-Mayor Newman, Councilwoman Manheimer and Councilman Davis voting "no."

The amended main motion carried unanimously.

It was the consensus of Council that any event that meets the criteria is eligible for this fee level beginning July 1, 2010.

B. RESOLUTION NO. 10-120 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR THE 2011 TRANSPORTATION DEMAND MANAGEMENT GRANT PROGRAM AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR ADMINISTRATION COSTS OF THE PROGRAM

Director of Transportation Ken Putnam said that this is the consideration of a resolution authorizing the City Manager to apply for the Fiscal Year (FY) 2010-11 Transportation Demand Management (TDM) grant program and enter into an agreement with the N.C. Dept. of Transportation (NCDOT) for administration costs of the program.

The subject staff report was first presented to City Council on April 27, 2010. Before action was taken, City Council asked staff to provide additional information about past accomplishments of the TDM program. He provided Council with a list of various local programs and/or accomplishments within the TDM strategies including FY 2009-10 goals, performance measures, and FY 2010-11 goals.

TDM programs promote alternative transportation options to the single occupant vehicle. Included among these alternatives are carpooling, vanpooling, telecommuting, transit, bicycle, flexible work hours, compressed work weeks, and parking policies and price structures.

NCDOT's Public Transportation Division is funding TDM programs across the state to support the provisions of the Ambient Air Quality Improvement Act of 1999, Senate Bill 953, to address growing concerns over ground level ozone pollution from motor vehicles and the need to deal with increasing vehicle miles traveled (VMT) and NOx emissions. This bill established the goals of reducing emissions of nitrous oxides (NOx) from motor vehicles by 25% by 2009 and reducing the growth of VMT in the State by 25% by 2009.

There are six TDM strategies that the City of Asheville's TDM program is required to employ in order to accomplish the TDM Program Goals set by NCDOT. They are:

1. Conduct marketing efforts/activities identified in a marketing plan.
2. Coordinate with local transportation and land use planning efforts.
3. Facilitate ridematching services through the ShareTheRideNC website.
4. Promote the Best Workplaces for CommutersSM Program.
5. Collect and calculate data on VMT and NOx reductions through TDM activities.

6. Operate in a manner consistent with the NCDOT goals regarding making our transportation network safer, move people and goods more efficiently, and making our infrastructure last longer.

The City's TDM program began in August 2005 and was administered under the French Broad River Metropolitan Planning Organization (MPO) and the City of Asheville's Transportation and Engineering Department. When the functions of the MPO were relocated to the Land of Sky Regional Planning Council, the TDM program remained as part of the City's Transportation Planning Division.

The NCDOT is currently evaluating the future of the TDM program in Western North Carolina and during FY 2010-11 a visioning study will be prepared. This study will be funded by Federal and State Funds at an 80/20 ratio.

The grant provides funds for up to 50% of the total administrative costs including salaries and fringe benefits (one full-time position), marketing, office expense, etc. The TDM coordinator is in charge of administering the grant which includes but is not limited to the following programs:

- The PASSport (employer bus pass) Program
- The Emergency Ride Home Program
- Strive Not to Drive – annual promotional event
- Share the Ride NC – Statewide ridematching program

In July 2010, the Board of Transportation will vote on whether or not to approve the funds in the maximum amount of $99,979 for the City of Asheville's TDM Grant. The 2010/11 budget for this program is currently in the City of Asheville's budget process.

This TDM program supports the City of Asheville's 2010/11 Strategic Plan by helping to promote emission-reducing options, as well as supporting multi-modal transportation promoting the use of transit through programs such as the PASSport program.

Pros:

- The current 50% match is reimbursed by NCDOT.
- As of April 30, 2010, these statewide programs have reduced the growth of VMT by 24.6% - the goal for Senate Bill 953 was 25%.
- As of April 30, 2010, these programs have reduced NOx by 7.55170944 tons.
- These programs promote alternatives to single vehicle occupancy (carpooling, vanpooling, transit, bicycles, and telecommuting).
- This program funds 50% of the TDM Coordinator position.

Con:

- The City is required to provide a 50% match which equals $49,989.

The total project cost is $99,979; 50% of this total will be paid by NCDOT and 50% by the City. Funds to cover the required 50% City match are included in the Transportation Department's budget request for the FY 2010-11 Annual Operating Budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to apply for the 2011 TDM grant program and enter into an agreement with the NCDOT for administration costs of said program.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis felt the $50,000 match was not a good use of dollars during this difficult budget year.

Mr. Putnam responded to Vice-Mayor Newman when he questioned if the vehicles miles travelled was due more to recession.

Councilman Smith moved for the adoption of Resolution No. 10-120. This motion was seconded by Councilman Bothwell and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no."

RESOLUTION BOOK NO. 33 – PAGE 46

C. RESOLUTION NO. 10-121 – RESOLUTION AUTHORIZING EXECUTION OF AGREEMENT REGARDING EXTENSION OF SEWER SERVICE

City Attorney Oast said that Ms. Norma M. Kushigian is the owner of two adjacent parcels proposed for annexation in the area known as the Airport Road Annexation, there was a request to remove Lot 1 from the annexation plan. In exchange the City will not have to install sewer to Lot 2 (currently in the annexation plan). Because Council cannot make promise with respect to their legislative discretion, he recommended Council authorize the agreement whereby if Council decides not to annex Lot 1 then certain consequences would take effect. If during the one-year non-annexation period Council decides to annex Lot 1 then we will be required to install sewer to Lot 2. Beginning after that non-annexation period there is a five-year period during which it is expected the owners will petition for the annexation of Lot 1. If and when that occurs, the City would be required to provide sewer to Lot 2. After the expiration of that agreement (6 years from now), we can annex Lot 1 but any obligation to provide sewer service to Lot 2 is gone.

In response to Councilman Russell, City Attorney Oast said that this agreement has been reviewed by the attorney representing the property owner.

Mr. Rick Jackson, attorney representing property owner Norma M. Kushigian, felt the agreement is in the best interest of the City and the property owner.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 10-121. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 47

C. RESOLUTION NO. 10-122 - RESOLUTION AMENDING THE ANNEXATION SERVICES PLAN FOR THE YEAR 2010 ANNEXATION AREAS

Urban Planner Blake Esselstyn said that this is the consideration of a resolution amending the Annexation Services Plan for the Year 2010 Annexation Areas.

In adopting an annexation ordinance, the City has the authority to annex all or some of an area proposed for annexation, as long as that area qualifies for annexation. The City may also amend the services plan for the proposed annexation area or areas, as long as the requirements for providing service to the annexation areas continue to be met.

City staff presented the Annexation Services Plan for the Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road,

520

Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road areas to City Council on March 9, 2010. The City Council adopted the plan on this date.

The staff is now proposing that nine pages, three maps, and the property index of this plan be amended. The changes proposed reflect the removal of one lot on which an industrial facility is located. The Asheville City Council discussed deleting this lot as part of an agreement with the property owner that sewer would not be extended to her property until the property is voluntarily annexed. The changes to the plan necessitated as a result of the removal of one lot and one sewer extension are as follows.

- The first amendments are to Page 21 – Statutory Standards Statement for the Airport Road Area. The revisions are to the total acreage in the area, to the measurements of the aggregate external boundary line of the area, to the contiguous portion of this boundary, to the percent of external boundary that coincides with the City boundary, to the total number of lots and tracts in the area, to the total number of lots and tracts used for industrial purposes in the area, and to the percentage of lots and tracts in the area used for commercial or industrial purposes.

- The second amendments are to Page 22 –Statutory Standards Statement for the Airport Road Area. The revisions are to the total acreage in the Airport Road Area, and to the percentage of area classified as non-urban.

- The third amendment is to Page 38 – Plan for Extension of Services – Sewer Collection. The revision is to the number of linear feet to be constructed in the Airport Road Area with added accompanying language.

- The fourth amendments are to Page 40 – Ad Valorem Property Tax Revenue. The revisions are to the real property valuation and total annual revenue for the Airport Road Area, and the real property valuation and total annual revenue for all of the annexation areas.

- The fifth amendments are to Page 41 – State Utility Tax Revenue. The revisions are to the property acres and total annual revenue in the Airport Road Area, and to the property acres and total annual revenue for all of the annexation areas.

- The sixth amendments are also to Page 41 – Local Option Sales Tax. The revisions are to the total tax levy and total annual revenue for the Airport Road Area, and to the total tax levy and total annual revenue for all of the annexation areas.

- The seventh amendments are to the revenue summary found on Page 43. The total annual revenue accruing to the City of Asheville from these annexations is $348,321 which reflects the removal of the one lot in the Airport Road Area.

- The eighth amendments are to the annually recurring expenses found on Page 44. The changes reflect the reduction in the financial impact payments to be made to the Skyland Fire District due to the deletion of the one lot in the Airport Road Area.

- The ninth amendments are to the capital expenditures summary found on Page 45. The total capital expenditures for the annexation areas were reduced by $184,740 due to the deletion of one sewer line extension. The capital expenditures are estimated to be $ 204,939.

- The tenth amendments are to the financial impact statement on Page 47. The valuation figure and the projected impact for the Airport Road Area are reduced due to the removal of the one lot.

- The final amendments are to the Present and Proposed Boundaries Map, the Generalized Land Use Map, the Sanitary Sewer Map, and to the Property Inventory for the Airport Road Area. The maps and inventory now reflect the deletion of the one lot and one sewer extension in the Airport Road Area.

As long as the Annexation Services Plan does not show the annexation area as qualifying under any additional statutory tests, no additional public hearing is required for this amendment to the Plan.

Pro:

- Clarifies details and provides more accurate information in the Annexation Services Plan for 2010.

Con:

- None seen.

The projected revenue for the twelve annexation areas is $348,321. The anticipated annually recurring expenses total $125,296 for five years and $85,969 for all following years. The one time capital expenditures are projected to be $204,939. None of the revenues or expenses are included in the FY 2010-11 Proposed Budget pending possible challenges from property owners in the annexed areas. Once the time period for appeals has passed, but prior to the September 30, 2010 effective date, staff will bring forward a budget amendment to City Council to recognize the revenues and budget for the expenses associated with these areas for the time period between September 30, 2010, and June 30, 2011.

City staff recommends City Council adopt a resolution amending the Annexation Services Plan to reflect revisions/corrections as presented.

Mr. Esselstyn asked that the Sanitary Sewer System Map language be added to the resolution as a page that was replaced.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 10-122. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Councilman Russell voting "no."

RESOLUTION BOOK NO. 33 – PAGE 48

D. ORDINANCE NO. 3857 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE INGLES AREA

ORDINANCE NO. 3858 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE SCHENCK PARKWAY AREA

ORDINANCE NO. 3859 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE FARLEIGH STREET AREA

ORDINANCE NO. 3860 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE DEERFIELD AREA

ORDINANCE NO. 3861 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 67 MOUNTAINBROOK ROAD

ORDINANCE NO. 3862 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 73 AND 75 WATERS ROAD

ORDINANCE NO. 3863 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 26 ROCKING PORCH ROAD

ORDINANCE NO. 3864 - - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 40 KEASLER ROAD AND 23 SUNNYCREST DRIVE

ORDINANCE NO. 3865 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 617 UPPER SONDLEY DRIVE

ORDINANCE NO. 3866 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 1445 TUNNEL ROAD

ORDINANCE NO. 3867 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE WILLOW WINDS LANE AREA

ORDINANCE NO. 3868 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE AIRPORT ROAD AREA

Urban Planner Blake Esselstyn said that this is the consideration of the adoption of ordinances to extend the corporate limits of the City of Asheville to include the following twelve annexation areas: Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road.

On February 23, 2010, the City Council adopted Resolutions of Intent beginning the annexation process for the following twelve areas: Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road. The Annexation Services Plan for these areas was approved on March 9, 2010, and a public information meeting was held on April 12, 2010. Public hearings on each of the annexation ordinances were held on May 11, 2010. Adoption of the annexation ordinances is the final step in the annexation process. Amendments to the Annexation Services Plan will be considered prior to discussion on the ordinances. The effective date for these annexations is proposed in these ordinances to be September 30, 2010.

The ordinances set forth this effective date and also reference a metes and bounds description attached to the ordinance. The staff has made revisions in the previously introduced metes and bounds description (those contained in the Resolution of Intent) for the Airport Road Area to reflect the recommended deletion of one parcel.

Pros:

- Supports City of Asheville's Smart Growth Annexation program (regular program of annexations) as set forth in the City's 2025 Plan.

- Provides for an urban level of service for developed and developing areas adjacent to the existing city limits and includes those benefiting from existing City services in participation in the costs of such services.
- Fills in service delivery gaps and split jurisdiction issues on the edge of corporate limits.

Cons:

- Residents of proposed annexation areas may object to such annexation.

The projected revenue for the twelve annexation areas is $348,321. The anticipated annually recurring expenses total $125,296 for five years and $85,969 for all following years. The one time capital expenditures are projected to be $204,939. None of the revenues or expenses are included in the FY 2010-11 Proposed Budget pending possible challenges from property owners in the annexed areas. Once the time period for appeals has passed, but prior to the September 30, 2010, effective date, staff will bring forward a budget amendment to City Council to recognize the revenues and budget for the expenses associated with these areas for the time period between September 30, 2010, and June 30, 2011.

City staff recommends City Council adopt the twelve annexation ordinances for the Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road Areas with the effective dates as established by ordinance.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinances and they would not be read.

When Councilman Russell asked if staff had any indication that an annexation area might be contested, Mr. Esselstyn said that he has received no such indication.

Vice-Mayor Newman moved for the adoption of Ordinance No. 3857. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Russell voting "no."

ORDINANCE BOOK NO. 26 – PAGE 151

Mayor Bellamy said that we do not have anticipated General Fund revenue for the capital expense in the Airport Road annexation and could not support the motion.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3868. This motion was seconded by Councilman Bothwell and carried on a 5-2 vote, with Mayor Bellamy and Councilman Russell voting "no."

ORDINANCE BOOK NO. 26 - PAGE 154

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-123 - RESOLUTION APPOINTING A MEMBER TO THE RECREATION BOARD

Vice-Mayor Newman said that Mr. Scott Barnwell has resigned as a member of the Recreation Board, thus leaving an unexpired term until June 30, 2011.

At the Council meeting on May 11, 2010, it was the consensus of Council to interview Todd Dunnuck, Mark Strazzer, Michael Holgate and Will Callaway. Due to a misunderstanding of the date, Mr. Dunnuck did not attend the interview.

After Council spoke highly of the candidates, Todd Dunnuck received 0 votes, Mark Strazzer received 2 votes; Michael Holgate received 0 votes; and Will Callaway received 4 votes.

Councilman Russell passed on voting due to his absence in the interviews. Therefore, Will Callaway was appointed as a member of the Recreation Board to serve the unexpired term of Mr. Barnwell, term to expire June 30, 2011, or until his successor has been appointed.

RESOLUTION BOOK NO. 33 – PAGE 63

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte was opposed to the no smoking prohibiting, especially in parks.

The following claims were received by the City of Asheville during the period of April 23 – May 13, 2010: PSNC (Water), Darrell R. Thomas (Water), Donna Fitzpatrick (Sanitation), Meghan S. Sumner (Building Safety); Ada B. Wilson (Building Safety), Phillip S. Camby (Water), Teresa Smith (Police), City of Asheville (Inspections), Jan Hart (Water) and Charter Communications (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:57 p.m.

Magdalen Burleson

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Manheimer gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF SCHOOL SUCCESS PROGRAM

Mayor Bellamy said that in the fall of 2006, the Asheville City Schools refocused their energy to change the image of dropout prevention. The effort embraced the old African proverb; *"It takes a village to raise a child."* As a result, the School Success Network Council was launched to engage our learning community stakeholders.

Their mission is to support Asheville City Schools and promote 21st Century Systems that reduce the dropout rate. Furthermore, the School Success Network Council will offer strategies for engaging students in the learning community in order to increase the number of high school graduates for Asheville City Schools.

The School Success Coordinator for Asheville City Schools was honored to be at the meeting in which the Mayor will recognize some exceptional students who have represented the School System and the School System to the utmost.

She was proud to acknowledge the following participants in the program, by presenting them with a certificate of recognition: Charles "Dre" Payton, Keyona Presha, Jalen Craig, Jarquis Fair, Jamil Hawes, Curtis Johnson, James King, Marcus Whitson, Bryanna Williams, Markes Jackson, Lisa Waters, Cayla Jiles, Joesci McIntosh, Erik Whitesides, Caleah Hallum, Promyss Wately, China Robinson, Na'Shayla Petty, Clementine Turner and Deandra "Dre" Bowden.

B. RECOGNITION OF CITY OF ASHEVILLE YOUTH LEADERSHIP ACADEMY

Ms. Erica Germer, Coordinator of the City of Asheville Youth Leadership Academy (CAYLA), was proud to announce the accomplishments of the City of Asheville Youth Leadership Academy and thanked Council for their support of this program.

Mayor Bellamy said that all of the CAYLA students successfully completed their summer internships last year, and were given high words of praise from their various supervisors. In addition to City departments, CAYLA students worked with community partners such as the United Way, UNC-Asheville, AB Tech, HomeTrust Bank, MAHEC, Sisters of Mercy, and the YMI Cultural Center. The CAYLA students completed more than 400 volunteer hours with local agencies including RiverLink, Asheville GreenWorks, Kids Against Hunger, Meals on Wheels,

ABCCM, and the Asheville Housing Authority. Since 2007, CAYLA students have accumulated 1,200 hours of community service. All 10 graduating CAYLA seniors will begin college at campuses across North Carolina (and one in South Carolina) this fall. More than $100,000 in academic scholarships were awarded to this year's CAYLA students, including: the Dell Scholars program, Paddison Family Foundation, Optimist Club, Rotary Club, and the Kesha Young Memorial Scholarship (Mission Hospital).

She then recognized the following City of Asheville Youth Leadership Academy Class of 2010 with a certificate of appreciation: Keevon Baten, Dre Bowden, Yelena Dariy, TJ Davidson, Dreama Davis, Darius Drummond, Anika Ellis, Gio Figaro, Andrea Griffin, Nakia Harrell, Roosevelt Harvin, Ceante Hudson, Martel Jackson, Tyler Jeffries, Satorria Jones, Simone Knotts, Sohna Njia, Dre Payton, Brianna Rock, Crystal Sherriff, Anice Smith, Jarrett Vernon, and Ariana Weaver.

II. CONSENT AGENDA:

At the request of Mayor Bellamy, Consent Agenda Item "K" was removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 25, 2010

B. RESOLUTION NO. 10-125 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH PATTON CONSTRUCTION GROUP, LLC, FOR THE VIEWMONT ACRES WATER SYSTEM EXTENSION PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with Patton Construction Group, LLC, in the amount of $294,950.00 for the Viewmont Acres Water System Extension Project.

Grant Funds from the North Carolina Department of Environment and Natural Resources (NCDENR) North Carolina Water Infrastructure Act of 2005 (N.C.G.S. 150G) are available to reimburse the City of Asheville Water Resources for this project and were approved by City Council on July 14, 2009, by Resolution No. 09-147.

The City of Asheville has received a grant from NCDENR to replace the existing, private, failing water system at the Viewmont Acres Mobile Home Park. Upon completion of the water system improvements project, the City of Asheville will own and maintain this new water system. The Water Resources Department (WRD) issued an Advertisement For Bids for the construction and installation of approximately 2,850 Linear Feet of a new 8-inch waterline, fire hydrants, valves, and other appurtenances as well as the installation of five (5) private residential booster pump stations. In response to the Advertisement For Bids, the WRD received five (5) bids.

Companies responding were:

1. Patton Construction Group, LLC – Asheville, NC
2. T & K Utilities, Inc. – Asheville, NC
3. Spur Construction, LLC – Waynesville, NC
4. Steppe Construction, Inc. – Mill Spring, NC
5. DPI Construction – Arden, NC

A review team, comprised of consulting engineers from McGill Associates and staff from multiple City Departments including James Lee, the City of Asheville Minority Business Coordinator, reviewed these bids and selected Patton Construction Group, LLC, as the lowest responsible bidder at a bid of $294,950.00.

This project is part of City Council's strategic plans to improve city infrastructure and provide local companies with labor opportunities.

Pros:

- This project will provide twenty three (23) customers with a safe reliable drinking water source and much improved fire protection.
- The contract amount is fully reimbursable by the committed NCDENR grant money.
- Approval of the construction contract to the lowest responsible bidder will invest City funds in the local economy.

Con:

- Failure to award a construction contract would lead to forfeiture of the NCDENR grant and the existing failing private water system would not be upgraded.

The Water Resources Department will initially fund the estimated construction costs of $294,950.00 for this project until reimbursement is received from the State. Funds for these upfront costs are already included in Water Resource's FY 2009-10 Capital Improvement Program budget.

City staff recommends City Council award the Viewmont Acres Water System Extension Project to Patton Construction Group, LLC, as the lowest responsible bidder at a bid of $294,950.00; and authorize the City Manager to execute any and all contracts and change orders up to the budgeted amount to implement the project.

RESOLUTION BOOK NO. 33 – PAGE 65

C. RESOLUTION NO. 10-126 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AND ENTER INTO AN AGREEMENT WITH THE N.C. HISTORIC PRESERVATION OFFICE FOR A GRANT TO UPDATE AND EXPAND THE DOWNTOWN ASHEVILLE NATIONAL REGISTER HISTORIC DISTRICT

ORDINANCE NO. 3870 - BUDGET AMENDMENT TO ESTABLISH A BUDGET FOR A NATIONAL PARK SERVICE GRANT PASSED THROUGH THE STATE HISTORIC PRESERVATION OFFICE FOR THE DOWNTOWN NATIONAL HISTORIC DISTRICT UPDATE PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Historic Preservation Office for a grant to update and expand the downtown Asheville National Register Historic District; and (2) a budget amendment, in the amount of $7,700 to accept a $4,500 federal pass though grant from the National Park Service Historic Preservation Fund via the North Carolina State Historic Preservation and to dedicate $3,200 in local matching funds received from Buncombe County for the update and expansion of the Downtown Asheville National Register Historic District nomination.

The Downtown Master Plan adopted by City Council in May, 2009, included a recommendation that Asheville review the existing National Register District, which was originally completed in 1978 and consider an expansion of the boundaries and period of significance. A study list application was prepared and approved by the Advisory Council on Historic Preservation in October, 2009. Staff has now successfully obtained a grant from the Historic Preservation Fund to complete the study and update the nomination.

This project is to update and expand the Downtown Asheville Historic District National Register nomination, originally listed on the National Register in 1978. Since 1976, there have been approximately 82 building rehabilitations in Downtown Asheville's National Register Historic District and a number of buildings have been demolished. The existing district encompasses

approximately 85 acres with 257 properties. The update will document twelve contributing resources within the existing boundary, which were not originally identified. It will also increase the period of significance to 1961. The proposed boundary increase is estimated to add ten acres with thirty-five structures clustered to the west and southwest of the existing district and will allow more properties to be considered for the rehabilitation tax credit.

This action complies with the City Council 2009-2010 Strategic Operating Plan Fiscal Responsibility Focus Area in that the City and County share in the services provided by the HRC and with the Sustainable Focus Area in that the funding will help support implementation of the Downtown Master Plan.

Pro:

- Funding will be made available to update the Downtown National Register District as identified in the Downtown Master Plan.
- Local matching funds have been provided by Buncombe County and are currently available.

Con:

- None noted.

The local match is already included in the FY 2009-10 Historic Resources division's budget. In Fiscal Year 2012 there will be additional advertising costs incurred prior to approval of the expanded district, which are not included in the grant.

The expansion of the national district could potentially be an economic development incentive as it would increase the number of structures available for the federal and state rehabilitation tax credit, thus spurring redevelopment. However; the expansion of the national district is completely separate from local district or landmark designation and will not result in the creation of any locally designated properties or associated local property tax reduction.

City staff recommends that City Council (1) adopt a resolution authorizing the City Manager to apply for and enter into an agreement with the N.C. Historic Preservation Office for a grant to update and expand the downtown Asheville National Register Historic District; and (2) approve a budget amendment, in the amount of $7,700, to accept a grant from the Historic Preservation fund, via the NC State Historic Preservation Office and to set aside local matching funds.

RESOLUTION BOOK NO. 33 – PAGE 67
ORDINANCE BOOK NO. 26 – PAGE 160

D. RESOLUTION NO. 10-127 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A CONTRACT WITH DIXON HUGHES, PLLC, CERTIFIED PUBLIC ACCOUNTANTS AND ADVISORS, FOR AUDITING SERVICES FOR FISCAL YEAR 2009-10

Summary: The consideration of a resolution authorizing the Mayor to execute a contract with Dixon Hughes, PLLC, Certified Public Accountants and Advisors, for auditing services for Fiscal Year 2009-2010.

N.C. Gen. Stat. sec. 159-34 requires that local governments of North Carolina have their accounts audited each fiscal year and submit a copy of the audit to the Local Government Commission. In response to the aforementioned general statute, staff recommends retaining the services of Dixon Hughes to conduct the basic audit of the city's accounts for the fiscal year ending June 30, 2010. Staff has previously worked with Dixon Hughes and they have consistently provided a thorough and high quality audit for the City,

Staff also recommends contracting with Dixon-Hughes to provide various auxiliary financial services that are beyond the scope of their basic audit engagement but are necessary for its completion. These services were added as an addendum to the audit contract for last year. These services include preparation of various city financial statements and production of the Comprehensive Annual Financial Report, which are traditionally performed in-house by various accounting staff. The staff is currently involved heavily in converting the City to a new core financial system. In addition the City is operating without a permanent Director of Finance and has one unfilled vacancy in the financial reporting section. As a result staff currently does not have the capacity to perform the auxiliary financial services without additional support from Dixon-Hughes. It is anticipated that next fiscal year the CAFR will be live on the new system and that outside assistance will no longer be needed.

This project complies with City Council's Strategic Operating Plan of operating the City of Asheville's organization to the highest fiscal responsibility.

Pro:

- Will help ensure the timely and successful completion of two high priority, critical projects.

Con:

- None noted.

A base fee of $110,000 has been proposed for the basic audit plus $43,450 for auxiliary services and is included in the Finance Department's portion of the Fiscal Year 2010-2011 proposed annual operating budget .The total cost for services for this year are the same as last.

City staff recommends adoption of the resolution authorizing the Mayor to execute a contract with Dixon Hughes PLLC, Certified Public Accountants and Advisors, for basic auditing services and auxiliary services in the amount of $153,450 for fiscal year 2009-2010.

RESOLUTION BOOK NO. 33 – PAGE 68

E. RESOLUTION NO. 10-128 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH ASHEVILLE FORD, KARS & KOLORS, INC., RUSSELL'S PAINT AND BODY, LLC., ANCHOR-RICHEY EVS INC., AND ENSLEY PAINT & BODY FOR AUTO BODY SHOP REPAIR

Summary: The consideration of a resolution authorizing the City Manager to approve multi-year contracts, with multiple vendors, for the repair of city owned vehicles and equipment by local Auto Body repair shops.

This contract is necessary to repair accident damage to city owned vehicles and equipment operated by City departments, such as: Police, Fire, Public Works, etc. Each individual contract shall not exceed $75,000 in any fiscal year for any one (1) vendor. This contract will expedite the repair of vehicles involved in accidents without having to wait for separate estimates each and every time there is an accident.

This contract is "Unencumbered" in nature and utilized to document the hourly rate labor charge as well as the cost of parts and any markup percentage. This contract will be established for a period of three (3) years with the possibility of two (2) - one (1) year extensions, if the city and appropriate vendor agree to maintain the current price structure.

Pros:

- Improve efficiency in overall process in vehicle accident repair
- Reduce staff labor by utilizing at least 5 blanket contracts in lieu of individual contracts

for each accident repair
- Reduce vehicle downtime by increasing turnaround efficiency in vehicle repair process
- Help ensure multiple vendors are involved in city vehicle repair process

Con:
- None

There is no increase in fiscal demands as vehicle repairs will be paid for out of the current, and future, budgeted Fleet Charge account for the appropriate division.

City staff recommends City Council adopt a resolution authorizing the City Manager to approve multiple contracts for Auto Body Shop repair.

RESOLUTION BOOK NO. 33 – PAGE 69

F. ORDINANCE NO. 3871 - BUDGET AMENDMENT TO COVER THE COST OF CURB INSTALLATION ON DOGWOOD GROVE ROAD PROJECT

Summary: The consideration of a budget ordinance amendment, in the amount of $87,440, to cover the cost of installing concrete curb along Dogwood Grove Road.

The City of Asheville Water Department installed a new six inch water line along Dogwood Grove Road, replacing a combination of old six inch and two inch water lines, having had numerous breaks over the years.

House Bill 702, Session Law 2009-114, adopted June 16, 2009, is an amendment to the Sullivan Act which allows the City of Asheville to use up to 5% water utility revenues for street and sidewalk improvements associated with waterline improvements. City Council approved the transfer of 5% of Fiscal Year (FY) 2009-10 water revenues for this purpose on November 24, 2009. The amount of the FY 2009-10 transfer totaled $1,657,481. The Dogwood Grove Road project will be the first project funded with Sullivan Act proceeds.

The curb at the time of the waterline installation was a mixture of concrete curbing and asphalt curbing in very poor condition with further degradation due to the new water line installation. The installation of approximately 7,000 feet of eight inch curbing is eligible to utilize the 5% utility fund.

The Public Works Department, Streets Division, solicited bids for the construction of 7,000 linear feet of curbing. The lowest responsible competitive bid was $87,440 submitted by Frogs Paving.

This action complies with the City Council Strategic Operating Plan, Fiscal Responsibility sustaining meaningful performance levels for programs and services.

Pros:
- Existing sub standard and poor condition curbing will be replaced by conforming concrete curbing.
- Utilization of the 5% utility revenues allows curb replacement in a timely manner.

Con:
- The 5% utility revenue balance is reduced by $87,440

As noted above, $1,657,481 in Sullivan Act funds were transferred from the Water Fund to the General Capital Projects Funds in FY 2009-10. With adoption of this amendment, the amount of Sullivan Act funds available for other projects is reduced by $87,440 to $1,570,041. The FY 2010-11 Proposed Budget includes a 1% water revenue transfer to the General Capital

Projects Fund, which will provide an additional $341,000 in funding for FY 2010-11. Therefore, the total amount of Sullivan Act funding available in FY 2010-11 will be $1,911,041. Staff is proposing that this $1.9 million be used for improvements along Azalea Road.

City staff recommends City Council adopt the budget amendment to appropriate fund accounts.

ORDINANCE BOOK NO. 26 – PAGE 162

G. RESOLUTION NO. 10-129 - RESOLUTION AUTHORIZING EXECUTION OF EASEMENT TO PROGRESS ENERGY CORPORATION FOR POWER LINES AT LIVINGSTON STREET COMMUNITY CENTER

Summary: The consideration of a resolution authorizing the Mayor to execute an easement to Progress Energy Corporation for electric power lines for the proposed Livingston Street Community Center.

The City plans to construct a new community center on Livingston Street. In order to accommodate this new facility with adequate and updated electrical power, a new service line is required. The line will cross Depot Street overhead, and then run underground to the actual building, as shown on the drawing attached to the resolution.

This proposal has been reviewed by affected City Departments, and no objections have been noted.

The easement will cover both Depot Street (public right-of-way) and the Livingston Street property (public property).

This action complies with the City's strategic operating plan in that it contributes to the development of a new community center and supports sustainable economic development.

Pros:

- Will facilitate provision of power to new center; and
- Lines will be underground on City property

Con:

- Overhead line crossing on Depot Street.

City not required to pay for this work.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 33 – PAGE 70

H. RESOLUTION NO. 10-130 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN THE CRIMESTOPPERS INTERLOCAL AGREEMENT WITH BUNCOMBE COUNTY

Summary: The consideration of a resolution authorizing the Mayor to sign the Crimestoppers interlocal agreement with Buncombe County.

On November 1, 1983, Crimestoppers of Asheville-Buncombe, Inc., a North Carolina non-profit corporation, was formed to assist law enforcement in catching suspects of crimes by offering cash rewards for tips which lead to arrests. The City of Asheville and Buncombe County

pledged support to the Crimestoppers program including appointing board members to the Crimestoppers' Board of Directors. The City and County have funded the program based on appropriations from each governmental agency's budget every fiscal year since 1983. The Crimestoppers budget is established each year as a part of the County's annual budget, and the City reimburses the County one-half of the budgeted amount.

With the City's recent conversion to a new financial software system which requires contract documentation before payments of this type can be made, City staff contacted the County to obtain a copy of the original 1983 interlocal agreement that established the Crimestoppers program. County staff was unable to locate a copy of the original agreement, so City legal staff recommended that a new agreement be drafted and signed by the City and the County. A copy of that agreement is attached to this staff report.

This action complies with the City Council Strategic Operating Plan to operate the City of Asheville's organization to the highest fiscal responsibility.

Pros:

- Provides the proper documentation to allow for the City's payment of its share of the Crimestoppers program.

Con:

- None.

$40,108 is budgeted in the FY 2009-10 Adopted General Fund Budget and $40,796 is included in the FY 2010-11 Proposed General Fund budget for the City's share of the Crimestoppers program.

City staff recommends Council authorize the Mayor to sign the Crimestoppers interlocal agreement with Buncombe County.

RESOLUTION BOOK NO. 33 – PAGE 72

I. RESOLUTION NO. 10-131 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ACCEPT FUNDING FROM THE FEDERAL TRANSIT ADMINISTRATION SECTION 5309 BUS AND BUS FACILITIES STATE OF GOOD REPAIR PROGRAM GRANT

Summary: The consideration of a resolution authorizing City staff to apply for a Federal Transit Administration (FTA) grant to purchase three 30-foot diesel buses and two 30-foot low floor hybrid diesel-electric buses and authorizing the Mayor to execute the appropriate documents to accept the grant, if it is awarded to the City of Asheville.

City Council approved Resolution No. 10-19 on January 26, 2010, authorizing City staff to apply for discretionary Section 5309 Bus and Bus Facilities grant funds in support of the Department of Transportation's Livability Initiative (Livability Bus Program). City staff has not received any notification regarding the status of the City's application; therefore, City staff does not want to miss the current opportunity to apply for the subject grant in order to get five new buses funded.

As previously shared with City Council, the City of Asheville's Transit System fleet consists of a total of 21 buses. Sixteen of these buses were purchased in 1996 and five were purchased in 2006. Since the typical life cycle for the existing buses is about 10 years, 16 buses are overdue for replacement. Five low floor hybrid diesel-electric buses have been ordered with an expected delivery date during November 2010 and five more are going through the procurement process. The subject grant would provide funding for three diesel buses and two

low floor hybrid diesel-electric buses. Assuming the subject grant is approved, only one bus would remain to be replaced.

The Federal Transit Administration (FTA) has announced the availability of discretionary Section 5309 Bus and Bus Facilities grant funds in support of its "State of Good Repair" initiative. The State of Good Repair (SGR) bus initiative will be funded with up to $775 million in unallocated Fiscal Year 2010 discretionary Bus and Bus Facilities Program funds to finance capital projects to replace, rehabilitate, and purchase buses. Funds may not be used for operating expenses or preventive maintenance. The deadline to apply for the subject grant is June 18, 2010.

The total cost to purchase the five buses is $2,400,000. Thanks to Congressman Heath Shuler's office, the City has already received $532,000 to be used to help purchase two hybrid diesel-electric buses. Therefore, the grant application would total $1,868,000 ($2,400,000 - $532,000). If awarded, the grant would fund 80% of the cost, which equals $1,388,000, the City would fund half of the 20% local match, which equals $240,000, and City staff would request the North Carolina Department of Transportation to provide the additional half of the 20% local match. Staff recommends using the Transit's Capital Reserve Fund to provide the local match. This reserve only allows us to fund five buses, instead of the six that need replacement.

This action complies with the current City Council's Strategic Operating Plan by helping to achieve short-term and long-term energy goals and reducing city carbon emissions, helping to establish a multi-modal transportation plan by making transit system improvements, and helping to fully leverage funding for transportation improvements. This action also complies with the capital improvement recommendations included in the Transit Master Plan that was accepted by the City Council on October 27, 2009.

The Transit Commission supports the subject action.

Pros:

- The subject grant, if awarded, would enable the City to replace most of its aged transit system fleet (15 out of 16 buses) that would produce savings in maintenance costs and fuel costs.
- The subject action would help reduce the City's carbon emissions.
- The Federal Transit Administration (FTA) would fund 80% of the subject project cost.
- The North Carolina Department of Transportation (NCDOT) would fund 10% of the subject project cost.
- The City of Asheville's local match has been identified and would not require any additional allocation of funds.

Con:

- A 10% local match in the amount of $240,000 is required.

The total anticipated cost of the subject project is $2,400,000. The City has already received $532,000 for two hybrid diesel-electric buses through the efforts of Congressman Heath Shuler's office. The grant application would total $1,868,000, with 80% to be paid by Federal funds, 10% by State funds, and 10% by City funds. The City's 10% match, which totals $240,000, is already included in the Transit Capital Reserve Fund.

City staff recommends City Council to adopt a resolution authorizing City staff to apply for the Section 5309 Bus and Bus Facilities State of Good Repair Program Grant to purchase three 30-foot diesel buses and two 30-foot low floor hybrid diesel-electric buses and authorizing the Mayor to execute the appropriate documents to accept the grant, if it is awarded to the City of Asheville.

RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE 2010 BELE CHERE FESTIVAL

These items were removed from the Consent Agenda for individual votes.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Manheimer moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

K. **RESOLUTION NO. 10-133- RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE 2010 INGLES 4TH OF JULY CELEBRATION**

RESOLUTION NO. 10-134 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND UNFORTIFIED WINE AT THE 2010 BELE CHERE FESTIVAL

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2010 Ingles 4th of July Celebration and the 2010 Bele Chere Festival.

2010 Ingles 4th of July Celebration

The Benevolent Patriotic Order of the Does have requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer at the 2010 Ingles 4th of July Celebration and allow for consumption at this event.

The 2010 Ingles 4th of July Celebration will be held at Pack Square Park on Sunday, July 4, 2010, from 4:00 p.m. to 10:00 p.m. The festival area will be open on Sunday, July 4 from 4:00 p.m. to 10:00 p.m.

The sale of malt beverages will end at 9:30 p.m. However, the possession of open containers of malt beverages or consumption of malt beverages will be allowed during the festival hours of 4:00 p.m. to 10:00 p.m.

2010 Bele Chere Festival

The following organizations: Asheville Ski Club, Benevolent Patriotic Order of the Does, Phi Beta Lambda, A-B Tech, Cataloochee Ski Patrol, Brother Wolf Canine Rescue, Xi Omega Chapter of Beta Sigma Phi, Wild South, St. Johns Episcopal Church, Asheville Area Paralegals, and Engineers Without Borders have requested through the Asheville Parks, Recreation & Cultural Arts Department that City Council permit them to serve beer and/or unfortified wine at 2010 Bele Chere Festival and allow for consumption at this event.

The 2010 Bele Chere Festival area will be open on Friday, July 23, 2010, from12:00 p.m. to 10:00 p.m.; Saturday, July 24, 2010 from 10:00 a.m. to 10:00 p.m.; and Sunday, July 25, 2010 from 12:00 p.m. to 6:00 p.m.

The sale of malt beverages and/or unfortified wine will end at 9:45 p.m. in all instances; however, the possession of open containers of malt beverages and/or unfortified wine or consumption of malt beverages and/or unfortified wine will only be allowed during the periods as follows:

Friday, July 23, 2010, from 12:00 p.m. to 10:00 p.m.
Saturday, July 24, 2010, from 10:00 a.m. to 10:00 p.m.

There will be no sales and/or consumption of malt beverages and/or unfortified wine permitted on Sunday July 25, 2010.

Pros:

- Allows for fundraising opportunities

Cons:

- Potential for public safety issues

Serving alcohol at the 2010 Ingles 4th of July Celebration and Bele Chere Festival does not contribute to a fiscal impact.

City staff recommends City Council adopt a resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at the 2010 Ingles 4th of July Celebration and the 2010 Bele Chere Festival.

Vice-Mayor Newman moved for the adoption of Resolution Nos. 10-133 and 10-134. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION NO. 10-133 - RESOLUTION BOOK NO. 33 – PAGE 75
RESOLUTION NO. 10-134 - RESOLUTION BOOK NO. 33 – PAGE 78

III. PRESENTATIONS & REPORTS:

A. BOARD OF ELECTRICAL EXAMINERS UPDATE

Mr. Harold Garland, Chairman of the Board of Electrical Examiners, said that the Board's membership consists of Fred Pratt, Tommy Wilson, Phil Wilson and Randy Osborne, who recently died on June 2, 2010. Building Safety Director Robert Griffin was honored to note that Mr. Garland has served the City of Asheville for almost 40 out of his 90 years.

Their mission is the examination of applications for journeyman electrical licenses for the City of Asheville.

The ordinance states the Licensed Electrician may employee a journeyman to work under their oversight and perform work meeting the N.C. State Electrical Code. The journeyman may have two helpers who are not required to have the journeyman license.

2009 highlights include (1) journeyman exam given 6 times; (2) 67 applicants (a) 33 passing grades (75 or higher); and (b) 34 not passing; and (3) highest grade 93.

2010 objectives include (1) continue issuing photo id's to all journeymen; (2) continue with Spanish exams when requested in association with A-B Technical Community College; (3) hold special exam dates when necessary; (4) maintain high standards; and (5) continue reciprocity with 7 North Carolina cities meeting our standards.

On behalf of City Council, Mayor Bellamy thanked Mr. Garland and the Board for their commitment to this Board.

B. TREE COMMISSION UPDATE

Mr. Bob Gale, Chairman of the Asheville Tree Commission, said that the purpose and need statement of the Tree Commission includes a number of aspects geared toward promoting a healthy tree population for Asheville. Its introduction offers a philosophical basis for the need for such protection and then offers an impressive list of goals that Council may not be aware of. I think it's appropriate to state them here.

(1) Encourage the preservation and health of existing trees, tree canopies, and other existing vegetation, and to replenish removed vegetation;

(2) Improve and protect the visual quality of the City of Asheville, city forests, and forested view sheds, and minimize potential negative impacts of development such as noise, dust, glare of lights, parking lots, traffic, heat, overcrowding, and odor;

(3) Provide environmental benefits, such as climate modification, decreased energy consumption, reduced storm water runoff, decreased erosion, improved water and air quality, and protection of wildlife habitat;

(4) Provide a transition between dissimilar zoning districts to protect abutting properties from potential negative impacts of neighboring development, particularly between residential-commercial interfaces, and to preserve the character and value of a property and provide a sense of privacy;

(5) Improve standards for quantity, location, size, spacing, protection, and maintenance of plants and other screening materials to assure a high level of quality in the appearance of Asheville while allowing flexibility to promote well designed and creative landscape plantings.

(6) Enforce the maintenance of landscaping installed to meet the requirements of these high standards to ensure that the landscaping continues to thrive and enhance the visual quality of the City of Asheville.

The Tree Commission continually works to try to meet these goals through its monthly meetings and through the work of its Citizen Review Committee, Alternative Compliance Subcommittee, and Education Committee.

For 2010-2011, the Tree Commission is pursuing a goal from previous years regarding public education about the existence of, and regulations regarding, the landscape and tree provisions of the Municipal Code. We are planning to make use of the City website for short

13

articles geared toward proper tree planting and care. We also believe we have a source of funding to cover the cost of inserts into water bills explaining to homeowners the need for proper pruning to avoid damage to their trees.

Also, from time to time, the Commission has seen a need to improve the landscape and tree provisions and make recommendations to City Council. For 2010-11, the Commission is looking at ways to address the problem of improper pruning in areas outside those currently addressed by the provisions, but which are near to and clearly visible from city streets. This issue of "tree topping" appears to be on the increase and the Commission is exploring solutions in addition to that of public education for this issue.

He thanked the Tree Commission members for their continued voluntary participation and commitment to this work. He also thanked the Public Works and Planning department staffs, who do an incredible job despite a lack of adequate resources. Together, with its other ex officio members from other agencies and the City Council liaisons, the Tree Commission has an amazing diversity of expertise, and he is honored to be able to serve with this group.

On behalf of City Council, Mayor Bellamy thanked Mr. Gale and the entire Tree Commission for their efforts on this very important Commission.

C. 2008-2012 BUNCOMBE COUNTY AGING PLAN UPDATE

Ms. Linda Kendall-Fields, Aging Services Consultant for the Area Agency on Aging at the Land-of-Sky Regional Council, updated Council on the Buncombe County Aging Plan.

She reviewed a chart of projected population growth by age group in Buncombe County from 2005 – 2030.

The federal and state planning context consists of (1) Older American's Act (1965) requires aging planning; (2) North Carolina *Livable and Senior-Friendly Communities* Initiative (2006); (3) NC Senate Bill 448 (2007) - Buncombe County one of 7 identified by NC to watch how we plan for aging demographic shift; and (4) Governor's Executive Order (2010).

The aging plan has a vision for a livable, aging-friendly community that (1) Environments are safe and support self-sufficiency; (2) The health care system maximizes wellness and meets older adult needs; (3) Resources and opportunities support and enhance financial wellbeing; (4) Living environments (built and natural) enhance functioning of older adults; (5) Social engagement enriches lives with people, places and programs; and (6) A collaborative network of services and supports are coordinated.

The ABC's of the Aging Plan are (1) Active Document; (2) Broadening base of buy-in; and (3) Community consequences.

The following is financial information for seniors (1) Response to current economic situation; (2) OnTrack statistics as an example; (3) Specific products: (a) Rack Cards; (b) DVDs – six segments; and (c) Financial Fraud, Scam & Exploitation Summit.

The following are partners for financial information for seniors: OnTrack Financial Education and Counseling; Pisgah Legal Services; Council on Aging of Buncombe County; SHIIP – Senior Health Insurance Information Program; Better Business Bureau; Pisgah Legal Services; Financial Social Work Program; Buncombe County Department of Social Services; Buncombe County Television Channel; Buncombe County Sheriff's Office; Land-of-Sky – Regional Ombudsman; AARP – Regional Office; North Carolina Attorney General's Office; North Carolina Secretary of State's Office; HomeTrust Banks and State Employee's Credit Union; AT&T; Senior Tarheel Legislature Representative; and Heath Shuler and Kay Hagan Representatives.

Community resource connections include (1) Aligning the aging planning process with the Community Resource Connections; (2) Uniform access for older adults and people with disabilities; (3) Utilizes United Way's 2-1-1; (4) Selected agencies to perform core functions; and (5) Quarterly cross-training for stakeholders.

Health and wellness include (1) Resource rich community; (2) Focus on awareness and access; and (3) Highlights (a) Wiki with monthly calendar of events; (b) Live phone access for health information; and (c) Programming and outreach to underserved areas.

Partners in health and wellness include Land-of-Sky Living Healthy Program; Council on Aging: Project EMMA & Nutrition Sites; North Carolina Center for Creative Retirement; UNC-Asheville WASA Program; Mission Hospital; Park Ridge Hospital; MAHEC; Buncombe County Health Center; YMCA/YWCA; and Givens Estates – Life Ministries Outreach.

What's next for 2010-11 includes (1) Continue ongoing work; (2) Broaden committee membership; (3) Launch housing/transportation work group; and (4) Establish liaisons to key planning efforts.

At Mayor Bellamy suggestions, Ms. Kendall-Fields said that she would provide the Mayor's Office with the updated Senior Resource Directory to be placed in City Hall for reference.

Mayor Bellamy thanked Ms. Kendall-Fields for this very informative update.

D. ASHEVILLE MOTOR SPEEDWAY MEMORIAL UPDATE

Councilman Davis said that the Asheville Speedway Memorial Committee has continued to work toward the goal of erecting a Memorial at the current Carrier Park Recreation Park, located on Amboy Road.

In the fall of 2007, the Asheville City Council and Buncombe County Commissioners jointly endorsed and supported efforts by an Asheville Motor Speedway Memorial Committee to raise money through private donation. The Committee's aim was to design and build an appropriate memorial commemorating the history of stockcar racing in the Asheville Buncombe Area. Since this time, he was pleased to report that the Committee has agreed on the historic photos and text that will be displayed to outline the history of stock car racing in Western North Carolina and that the project has officially broken ground. He hoped that the unveiling will be in late August or early September.

He explained the rich history of the Asheville Motor Speedway Memorial Project, being (1) From 1960 – 1999 this site was home to one of the most legendary tracks in the history of stockcar racing; (2) Legendary figures: Junior Johnson, Richard Petty, Jack Ingram, Bob Pressley, etc.; and (3) Not just part of the community, but a community itself. He said the Project should be completed this summer.

Carrier Park Today – (1) In 1999, the track was sold to Riverlink and the land donated to the City of Asheville; (2) Asphalt oval remains, incorporated into the park as a thoroughfare for bicyclists, joggers and walkers; and (3) The park has become the most used city recreational facility, has no admission fee, and offers a wide variety of recreational and educational opportunities.

In the fall of 2007, Asheville City Council and Buncombe County Commissioners supported efforts to raise money through private donations for the Speedway Memorial Park.

He showed (1) the final concept; (2) the front and back of the Memorial Wall; and (3) the revised site plan of the Asheville Speedway Memorial.

15

On behalf of City Council, Mayor Bellamy thanked Councilman Davis for his update on the key aspects of the Asheville Speedway Memorial Project and his leadership on this Project.

Mr. Fred English, NASCAR fan, urged Council to name a street or highway for Jack Ingram as he has brought a lot of recognition to Asheville.

E. DROUGHT MANAGEMENT PLAN UPDATE

Water Resources Director Steve Shoaf said that City staff has prepared an update on the status of the existing Drought Management Plan, and utilized Brown and Caldwell Environmental Engineers to incorporate necessary updates to the Plan.

In 2003, the City of Asheville Water Resources Department worked with Brown and Caldwell Consulting Engineers to develop a Drought Management Plan for the water supply reservoirs and two water treatment facilities. Since then, there has been a significant drought in 2007, the startup of the William DeBruhl Water Treatment Plant, and implementation of a Flood Management Plan. Water Resources has reviewed the impacts of these events and is updating the Drought Management Plan to include new, relevant information.

The Drought Management Plan is a planning tool to allow us to remain sustainable and meet the demands of our system. The plan models hydrologic conditions and is used to predict lake level response based on assumptions about the weather, soil, system water demands, past history, and other factors. Both real-time and historical data (1926 to 2009) is incorporated. The plan addresses operational strategies and includes estimates of how often we should expect to announce voluntary water restrictions, mandatory water use restrictions, and water conservation surcharges.

This initiative complies with the City Council's strategic plan to promote sustainability through long-term planning.

Pros:
- Manage our water resources to support a viable community.
- Provide a systematic response to water shortages that allows Asheville to be pro-active.
- Avoid declarations of water shortage when such a declaration may be a "false alarm".

Con:
- The plan balances the potential for drought with the potential for flooding thereby not maximizing the storage potential of our reservoirs.

The costs of the updates to the Drought Management Plan are budgeted and have been allocated. There are no other impacts to the budget. This plan should minimize our exposure to the negative impacts of droughts and reduce the needs for emergency water conservation measures, thus preserving our revenue stream generated from water consumption.

Using a PowerPoint, Mr. Shoaf said that the Asheville Drought Management Plan (1) Began development in 2003; (2) Provides guidance for reservoir operation; (3) Predicts when to declare voluntary or mandatory water conservation measures; and (4) Based on computer modeling that reflects current conditions and historical experience.

The 2004 Drought Plan constraints consisted of (1) North Fork water surface elevation when full = 2601 feet; (a) Target minimum water level 2580 feet to protect raw water quality; and (b) Treatment Plant Intake elevation at 2530 feet; (2) Acceptable frequency of drought restrictions (a) Once every 5 years for voluntary conservation; (b) Once every 5 - 10 years for mandatory measures; (c) Once every 10 years or more for conservation surcharge; and (d) Minimum of 30 days implementation between increments; (3) Incremental demand reductions of 2%, 2%, and 6 % under voluntary, mandatory, and surcharge restrictions; (4) Identify drought triggers based on

historical, current, and predicted conditions (a) Capture all drought events; (b) Must provide drought notice in advance to be effective; (c) Allow for phasing of remedial actions based on severity; (d) Minimize the number of false alarms; and (e) Based on probabilities of impacts of all factors; and (5) Evaluated various scenarios for North Fork Reservoir.

The 2007 North Fork Flood Operation Plan – (1) Based on computer simulations using historical and current conditions; (2) Establishes acceptable lake water levels to minimize flooding impacts downstream; (3) Maximum lake level 2598 feet or 3 feet below full; (4) Developed seasonal lake levels as "rule curve" to follow leading to water releases to adjust lake levels; and (5) Has measurable impact on Drought Management Plan.

The 2010 Drought Plan recommendations include: (1) Incorporate operation of William DeBruhl WTP and Flood Operation Plan; (2) Adjust projected future water demands based on master plan; (3) At average annual demand of less than 21.5 MGD (current): (a) No restrictions needed (based on repeat of 1926-2009 hydrology); (4) At average annual demand of 23.5 MGD (Year 2017): (a) This demand would result in declarations of voluntary conservation about every 20 years (based on repeat of 1926-2009 hydrology) with no mandatory or conservation surcharges; and (b) Longest duration of these events = 8 months; (5) At a demand of 26 MGD: (a) The declaration of voluntary conservation measures exceeds acceptable frequencies and the plan will need modification. Projected demand in Year 2037 = 28 MGD; (6) New drought triggers (a) Trigger 1: 20% chance of reaching 2570 feet in 10 weeks; (b) Trigger 2: 10% chance of reaching 2569 feet in 10 weeks; and (c) Trigger 3: 5% chance of reaching 2568 feet in 8 weeks; (7) The combination of risk, forecast horizon, and elevation minimized the number of trigger events while keeping North Fork at acceptable elevations; and (8) Refill consideration: Lift restrictions when North Fork refills to 2598 feet.

The following is what has changed:

- Include operation of William DeBruhl WTP and Flood Operation Plan
- Drought triggers changed:

	2004 Plan	2010 Plan
Phase I	2572 feet	2570 feet
Phase II	2571 feet	2569 feet
Phase III	2570 feet	2568 feet

- Need for declared conservation events decreased
  - More flexibility
  - Some operating decisions can be based on cost

Because this is an information item, no action is required by the City Council. The Drought Management Plan will be used as operational guidance during water shortages.

F. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 10-135 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT FUNDS FROM THE N.C. DEPT. OF HEALTH & HUMAN SERVICES TO FUND A SUMMER INTERN FOR THE ENGINEERING SERVICES DIVISION

ORDINANCE NO. 3872 - BUDGET AMENDMENT TO ACCEPT FUNDS FROM THE N.C. DEPT. OF HEALTH & HUMAN SERVICES TO FUND A SUMMER INTERN FOR THE ENGINEERING SERVICES DIVISION

American Recovery & Reinvestment Project Manager Brenda Mills said that this is the consideration of a resolution authorizing the City Manager to enter into an agreement to accept funds from the North Carolina Department of Health and Human Services (NC DHHS) to fund a

summer intern for the Engineering Services Division, and an associated budget amendment in the amount of $1,500 from NC DHHS's ARRA funds.

The Engineering Services Division has been working with the Human Resources Department to find an intern for the summer that had an interest in the field of engineering. Human Resources staff was successful in this endeavor, in that a current student at Asheville High School that plans to attend college next year in an Engineering discipline would like to work for the City this summer. The funds to pay the student would come from the American Reinvestment and Recovery Act (ARRA) from the NC DHHS, and the City is not required to pay any matching funds.

This action complies with the City Council Strategic Operating Plan in that we actively pursued funding opportunities with State and Federal economic stimulus packages, and that it expands partnerships with educational institutions to achieve common goals, such as workforce development.

Pros:

- The City will be able to add a seasonal employee at no direct cost to the City.
- The student will be able to obtain real life experience in their chosen field of study.
- Expanding relationships with Asheville High and NC DHHS for mutually beneficial agreements.
- Current staff will get much needed help to manage ongoing projects.

Cons:

- The student will use City equipment while employed over the summer, such as computers, tools and vehicles.
- City would be required to carry Workers Compensation on the employee.

There is no fiscal impact, unless injured while on the job.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with NC DHHS to accept ARRA funds to employ summer intern in the Engineering Services Division and adopt the budget amendment to appropriate fund accounts.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and ordinance and they would not be read.

Councilwoman Manheimer moved for the adoption of Resolution No. 10-135. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 83

Councilwoman Manheimer moved for the adoption of Ordinance No. 3872. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 164

G. QUARTERLY STRATEGIC OPERATING PLAN

Strategic Operating Plan

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the February 2009 strategic planning retreat and staff is providing its quarterly updates on progress of the five key focus areas.

City Council has asked City staff to provide quarterly updates on key strategic initiatives associated with the five primary focus areas of the City's Strategic Plan. Staff has tracked projects using performance indicators and measurement through the Fiscal Year 2009-10. In addition, staff provided Council with the Economic Development Key Indicator Report.

He then showed Council a video showing the staff's progress on the key strategic areas for the third quarter.

This information is to update City Council on key operational initiatives specific to City Council's Strategic Operating Plan. No action is necessary at this time.

Quarterly Financial Report

Mr. Richardson also provided Council with the City's overall financial position for the fiscal year through March 2010.

The executive summary is as follows:

Amendments. The General Fund budget presented in this third quarter report reflects the adopted budget of $92,688,293; plus $1,097,031 in prior year encumbrances that rolled over from FY 2008-09; along with sixteen budget amendments approved by Council since the start of the fiscal year that total $817,937. Four budget revisions involved the appropriation of fund balance: 1) $366,812 was used as the City match for transportation improvement projects that were partially funded with an ARRA grant; 2) $60,000 was used to expand the number of early voting sites; 3) $71,451 was used to cover civil service board expenses that arose from a General Assembly mandate; and 4) $19,842 was used to fund the cost of hiring a project manager for the City Hall building project. The other amendments were funded with various grants and donations.

Adopted Budget	92,688,293
Encumbrances	1,097,031
16 Budget Amendments*	817,937
3/31/2010 Budget	$94,603,261

* Fund balance appropriations since July 1 total $518,105

Revenues. Through March 31, 2010, the City collected $72,536,833 in General Fund revenue, which represents approximately 79.6% of the total General Fund revenue budget. Sales tax collections continue to under perform budget estimates and are down 8.2% compared to the same time last fiscal year. As a result, sales tax revenue is expected to come in under budget in the current year by $1,500,000. The City received its official FY 2009-10 property tax data from Buncombe County in January, which confirmed that property tax revenue should come in at budget. Based on current year-end estimates, staff is projecting that *FY 2009-10 total General Fund revenue will come in under budget by $1,309,000.*

Expenditures. General Fund expenditures through March 31, 2010 total $65,508,110 or 69.2% of the budget. *Based on spending through the first three quarters of the year and historical trends, staff is currently estimating that the overall General Fund budget will end the year with a budget savings of $583,000.*

19

Fund Balance. The City ended FY 2008-09 with available fund balance of $16,696,979, which equated to 18.7% of FY 2008-09 expenditures. *Based on current year-end revenue and expenditure estimates for FY 2009-10 staff is projecting that available fund balance will decrease to $13,657,479, which will equate to 14.5% of estimated year-end expenditures.*

When Mayor Bellamy questioned the 14.5% Fund Balance analysis and voiced support for raising that to 15%, Director of Administrative Services Lauren Bradley acknowledged the reduction from 15.1% and stated that staff will work to restore that level of reserve to 15% either through a savings plan or in the next year's budget.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING A PORTION OF FEDERAL ALLEY.

RESOLUTION NO. 10-136- RESOLUTION TO PERMANENTLY CLOSE A PORTION OF FEDERAL ALLEY

RESOLUTION NO. 10-137- RESOLUTION AUTHORIZING THE CITY MANAGER TO CONVEY BY NORTH CAROLINA NON-WARRANTY DEED ANY AND ALL INTEREST, IF ANY, THE CITY HAS IN THE CLOSED PORTION OF FEDERAL ALLEY ADJACENT TO SWANNANOA CLEANERS

Mayor Bellamy opened the public hearing at 6:26 p.m.

Mr. David Foster, Assistant Director of Public Works, said that this is the consideration of a resolution to permanently close a portion (35 sq. feet) of Federal Alley, near 165 Coxe Avenue. This public hearing was advertised on May 14, 21, 28 and June 4, 2010.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owners, Swannanoa Laundry Inc., and the City of Asheville have requested the City of Asheville to permanently close a portion of Federal Alley.

The Greenway Commission reviewed the proposed closure at their meeting on May 13, 2010, and supported the closure of a portion of Federal Alley.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution to permanently close a portion of Federal Alley. City staff also recommends that the City relinquish any and all rights it may have, if any, as a fee simple owner to the closed portion of Federal Alley by authorizing the City Manager to convey by North Carolina Non-Warranty Deed and all interest, if any; the City has in the closed portion of Federal Alley adjacent to Swannanoa Cleaners.

Mayor Bellamy closed the public hearing at 6:28 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolutions and they would not be read.

Councilwoman Manheimer moved for the adoption of Resolution No. 10-136. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33– PAGE 84

Councilman Russell moved for the adoption of Resolution No. 10-137. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33– PAGE 85

B. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF 97 UNDERWOOD ROAD TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3873 - ORDINANCE ZONING 97 UNDERWOOD ROAD TO HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:29 p.m.

Urban Planner Julia Cogburn said that this is the consideration of zoning 97 Underwood Road to Highway Business District. This public hearing was advertised on May 28 and June 4, 2010.

The City of Asheville recently completed the voluntary annexation (effective April 30, 2010) of a 1.96 acre tract located at 97 Underwood Road in Southern Buncombe County. The property is located to the west of the Asheville Regional Airport and is adjacent to I-26. Access to the property is off of Underwood Road. A single building (warehouse) is located on the site which previously housed a rental facility.

The property is currently unzoned and is surrounded by unzoned property. The airport property is zoned Institutional but other properties along Airport Road that are in the City's corporate limits are zoned Highway Business (HB). Staff proposes HB zoning for this parcel.

At a meeting on May 5, 2010, the Asheville Planning and Zoning Commission voted 6-0 to recommend the rezoning to the Asheville City Council. One person owning adjoining property (that is not in the City) spoke after the public hearing and vote had occurred to state that he was concerned as he had heard that a strip club was proposed. He was concerned about potential impacts to a large office building he planned to build on his property. The developers of the project on the property at 97 Underwood Road will be at the Council meeting to report that this is not their plan. [Such an establishment would not be allowed as it is too close to a residence.]

Pro:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's comprehensive plan.

Con

- None noted.

At a meeting on May 5, 2010, the Asheville Planning and Zoning Commission voted 6-0 to recommend the initial zoning to Highway Business to the Asheville City Council. Based on the analysis provided in this report, staff finds this initial zoning to be reasonable.

21

Mr. Aaron Dean, partner of the business at 97 Underwood Road, said they are looking at opening a live music venue, starting the first year with local bands.

Mayor Bellamy closed the public hearing at 6:32 p.m.

City Attorney Oast reminded Council that any if any property is rezoned to a specific classification, any use in that classification is allowed. He did note that Ms. Cogburn is correct in that a strip club would not be allowed as it is too close to a residence.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3873. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 166

C. PUBLIC HEARING TO CONSIDER AMENDING THE CODE OF ORDINANCES FOR THE PURPOSE OF CORRECTING CODIFICATION ERRORS AND RESOLVING DISCREPANCIES IN THE USES BETWEEN DIFFERENT SECTIONS OF THE UNIFIED DEVELOPMENT ORDINANCE

ORDINANCE NO. 3874 - ORDINANCE AMENDING THE CODE OF ORDINANCES FOR THE PURPOSE OF CORRECTING CODIFICATION ERRORS AND RESOLVING DISCREPANCIES IN THE USES BETWEEN DIFFERENT SECTIONS OF THE UNIFIED DEVELOPMENT ORDINANCE

Mayor Bellamy opened the public hearing at 6:33 p.m.

Technical Services Manager Kim Hamel said that this is consideration of a public hearing to amend the Unified Development Ordinance for the purpose of correcting codification errors and resolving discrepancies in the uses between different sections of the Unified Development Ordinance. This public hearing was advertised on May 28 and June 4, 2010.

The Planning & Development staff has been meeting regularly over the past 3 months to evaluate the UDO for consideration of consolidating permitted land uses into a comprehensive "Table of Uses" to add to the UDO. This evaluation has also identified a number of discrepancies and revealed errors when cross-referencing the list of "Permitted uses" and "Uses by Right Subject to Special Requirements", outlined in Article VIII, General Use Districts, to the uses identified in Article XVI, Uses by Right, Subject to Special Requirements and Conditional Uses.

This report proposes changes to correct these discrepancies and errors as a first step in the process of creating the consolidated table of permitted uses, and will provide a clearer document for the staff and the public to use.

This ordinance supports the Council goal of completing UDO amendments to improve clarity and address community goals.

On Wednesday, May 5, 2010, the Planning and Zoning Commission reviewed the proposed amendments to the UDO as outlined in this report and recommended approval by a unanimous vote (6-0).

Pros:

- Corrects discrepancies and codification errors.
- Provides consistent language and terminology for all uses listed throughout the UDO.

- Provides a "clean and consistent" template and text for creating a comprehensive "Table of Uses" document.

Con:

- None Noted.

The Planning and Development Department staff recommends approval of these wording amendments.

Mayor Bellamy closed the public hearing at 6:35 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 3874. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 168

D. PUBLIC HEARINGS REGARDING THE STORMWATER AND EROSION CONTROL ORDINANCE

ORDINANCE NO. 3875 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES (SECTION 7-12-1) PERTAINING TO ENVIRONMENTAL PROTECTION STANDARDS FOR SOIL EROSION AND SEDIMENTATION CONTROL AND STORMWATER MANAGEMENT

ORDINANCE NO. 3876 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES (SECTION 7-2-5) PERTAINING TO DEFINITIONS OF THE ENVIRONMENTAL PROTECTION STANDARDS

ORDINANCE NO. 3877 - ORDINANCE AMENDING CHAPTER 7 OF THE CODE OF ORDINANCES (SECTION 7-18-2) PERTAINING TO ENFORCEMENT OF THE STORMWATER AND SOIL EROSION PROVISIONS

RESOLUTION NO. 10-141 – RESOLUTION APPROVING THE TABLE OF USES FOR POST-CONSTRUCTION AQUATIC BUFFERS AS A GUIDELINE

Mayor Bellamy opened the public hearing at 7:24 p.m. and noted that one public hearing would cover all three ordinance revisions.

Public Works Director Cathy Ball said that this is the consideration of adopting the revised Stormwater and Stormwater and Erosion Control Ordinance, including all related sections of the Unified Development Ordinance that impact the Stormwater and Erosion Control Ordinance. These public hearings were advertised on May 28 and June 4, 2010.

In January 2010, a public hearing was scheduled for the revised Stormwater and Erosion Control Ordinance. (The January 12, 2010 Staff Report and attachments have been included for reference.) Council moved to table the Stormwater and Erosion Control Ordinances pending review by the City Council Planning and Economic Committee (PED).

The history of this action is (1) federal mandate through State required adoption of ordinance to address water quality issues; (2) City Council adopted the current stormwater ordinance on August 21, 2007; (3) adopted buffer requirements are 30' for all disturbed areas; and (4) City Council remanded the ordinance back to the Planning & Zoning Commission and the Watershed Policy Committee (WPC) for evaluation of the buffer, inspection and enforcement.

The WPC, staff, Planning & Zoning Commission and the Planning & Economic Development Committee recommended by consensus 17 changes to the ordinance.

Using charts, she outlined the consensus ordinance improvements.

On February 10 and March 10, 2010, the PED Committee met and discussed the ordinance with the focus on following:

- exemptions from the Post-Construction Stormwater Controls (Section 7-12-2(a)7.b and c found on page 4 of the ordinance); and,
- buffer requirements for during construction and post-construction buffers.

Exemptions from Post-Construction Stormwater Controls

The draft ordinance submitted for the January 12, 2010, public hearing was not clear regarding which development or re-development was exempt from post-construction stormwater measures and what measures these projects were exempt from.

The recent changes reviewed by the PED committee, clarify that the following projects are exempt from water quantity, water quality requirements **but not from buffer requirements or other special requirements.**

1. Development that disturbs less than one acre and will have a proposed impervious surface area of fifty percent or less of the total lot size, provided it is not part of a larger development.
2. Redevelopment that disturbs less than one acre and will have a proposed impervious surface area of fifty percent or less of the total lot size, provided it is not part of a larger development.
3. Development or redevelopment of a single one or two family dwelling that disturbs less than one acre and is not part of larger development.

The following types of development are exempt from all sections of the post-construction section of the ordinance **including exempt from any post-construction buffer** requirements.

1. Redevelopment that results in no net increase in impervious surface and provides equal or great stormwater controls than prior to redevelopment.
2. Activities that are exempt from the permit requirements of Section 404 of the Federal Clean Water Act, as specified in 40 CFR 302 (primarily, ongoing farming and forestry activity.)

Buffers

The draft ordinance submitted for the January 12, 2010, public hearing included a risk-based matrix referred to as "Pete's Matrix" for determination of the buffer width for during and post-construction buffers.

The PED Committee agreed that the matrix may be difficult for property owners to understand and therefore cause confusion and non-compliance with the ordinance. The PED Committee majority recommended a **30 foot post-construction buffer** for all properties that are not exempt from the buffer requirements (Section 7-12-2(f)3.1-3). The committee recommended going with the State law for during construction buffers (Section 7-12-2(e)2.1) for consistence.

The group also discussed two variations for post-construction buffer requirements. If Council votes to select one or both of these alternates, staff would need to add wording to the ordinances and come back to Council to approve the revised ordinances.

1. **Alternate 1**: 30 foot buffer in densely zoned areas and 50 foot buffer in all other less densely zoned areas. If Council recommend this alternate staff would work to define the higher density areas by transit corridors, etc., rather than by zoning districts, as these are likely to change. From a technical perspective, there is an inverse relationship between increased density and decreasing buffers.
2. **Alternate 2**: 30 foot buffers on parcels with slopes less than 15% and 50 foot buffers on properties with an average natural slope of 15% or greater. We have attached a map that depicts these areas in light purple. Some data regarding the number of parcels impacted by this option are below.

30 foot buffer for all properties less than 15% slope and 50 foot buffer for all properties 15% or greater

	30 foot for all parcels		**Additional 50 foot on parcels with slopes 15% or greater**	
	Acres	# of Parcels	Acres	# of Parcels
City Limits	2,471	10,933	765	803
ETJ	1,220	2,266	412	111
Total	3,691	13,199	1,177 (24% increase)	914 (6.5% increase)

Regarding buffers, the majority of the WPC recommended Pete's Matrix for buffers that included items related to a risk based approach (a) cross sectional slope; (b) total disturbed area and cumulative impervious area; and (c) type of adjacent stream (i) perennial – stream with continuous flow throughout the year; and (ii) intermittent – stream that flows for part of the year. This exceeds state minimum.

Using Pete's Matrix, she reviewed the WPC's recommended buffers. The buffer pros are (1) risk-based - considers physical conditions; (2) provides for buffers along all streams; (3) considers trade-off between development and environment; (4) supported by majority of WPC; and (5) allows greenways in the buffer with mitigation. The cons are (1) complication of the matrix; and (2) could not obtain consensus.

The Planning & Zoning Commission recommendation regarding buffers is the State minimum of 30 feet for 1 acre or more disturbance, with the following qualifiers: (1) Sustainable Development Practices (a) require "sustainable building practices" for 1 acre or more; (b) allow civil engineers to select two approved list of Best Management Practices "BMP"; and (c) LEED certified projects qualify as "sustainable building; and (2) Greenway Trails and Continuous Stream Side Access (a) require public greenway easement projects that require 30 foot buffer and are on the Greenway Master Plan; and (b) Allow greenways identified on the Greenways Master Plan by right.

She reviewed the pros and cons of the Planning & Zoning Commission recommendation. The pros are (1) complies with State minimum requirements for land disturbing activity; (2) simple; and (3) allows greenways in the buffer as a right. The cons are (1) loss of 112 miles of aquatic buffers; (2) LEED certification is not water quality based; (3) no authority for taking land under the authorizing legislation; and (4) not acceptable to NC Division of Water Quality.

The PED discussed this issue on February 10 and March 10, 2010, no official vote was taken. The PED review is (1) during construction (a) 30 foot minimum for all land disturbing activity except redevelopment; and (b) redevelopment – State standards; and (2) post-construction (a) 30 feet minimum except as exempted by ordinance.

25

Discussion by the PED also talked about two proposed alternates (1) Alternate 1: 30 feet in more densely zoned areas (transit corridors, etc.) and 50 feet in less densely zoned areas; and (2) Alternate 2: 30 feet on parcels with less than 15% slope and 50 feet on parcels with 15% or greater average natural slope. The PED Committee discussed this issue on February 10 and March 10, 2010, but no official vote was taken. The pros on the PED proposal are (1) exceeds State's minimum requirements; (2) simple; (3) allows greenways in the buffer with mitigation; and (4) provides more protection than WPC recommendation except in steep slopes. The cons on the PED proposal are (1) reviewed by PED but no official vote; and (2) one size fits all situations.

Regarding greenways in the buffers, the proposed ordinance allows greenways to be located in an aquatic buffer when there is no practical alternative and mitigation is achieved as described in the Table of Uses.

Other Changes

Some typos were corrected as well as providing consistency in terminology. Section 7-12-2(j)(2) was also modified to allow flexibility in the best management practices used for during construction protection provided that the same level of treatment, discharge and velocity control were maintained.

Other than the items mentioned above, the ordinance was not changed from the January 12, 2010, version.

Pros:

- Approval of the consensus items will improve efficiency and reduce both City and developer cost in the process without sacrificing water quality.
- The Watershed Policy Committee met every two weeks for four hours over a six month period to develop the recommended ordinance. The committee reached consensus on all but three issues.
- The revised ordinance is better organized and easier to follow than the existing ordinance. Staff has developed a "Citizen's Guide to the Stormwater and Erosion Control Ordinance" to assist non-technical customers.
- A standard 30 foot buffer with a possible exception for steep slopes will allow for easier compliance.

Cons:

- The WPC did not reach consensus on the buffers or on the definition of a Watershed Overlay Zone.
- The WPC did not consider and provide a recommendation on allowing impervious greenways in the Aquatic Buffer.
- The Committee struggled with the balance of the amount of buffer required versus the ability to develop land. It was difficult to develop the group beyond a win-loose solution.

A sub-committee of the WPC called the Cost/Benefit Analysis committee evaluated other consensus recommendations. In all cases, the implementation of the consensus items improves efficiency without significant adverse impacts to water quality.

Approval of the consensus items will improve the efficiency of the permitting process. The fiscal impact will result in a more efficient use of City staff as well as the individuals filling the appeals.

Staff recommends that City Council adopt the revised Stormwater and Stormwater and Erosion Control Ordinance, including all related sections of the Unified Development Ordinance. Staff recommends that Council consider increasing the buffer requirements to 50 feet on parcels with a 15% average natural slope or greater.

26

More specifically, staff asks that Council adopt staff's recommended changes to the Unified Development Ordinance Section 7-12-2 (Stormwater and Erosion Control Ordinance), parts of Section 7-2-5 (Definitions) and parts of Section 7-18-2 (Enforcement).

In summary, staff's recommendation is (1) Council recognize consensus items as a significant improvement to current ordinance; and (2) adopt 30 foot buffers for all disturbed areas as recommended in the proposed ordinance.

The following individuals voiced their varying opinions on the proposed ordinance:

Mr. Pete Hildebrand, member of the WPC
Ms. Julia Mayfield, Executive Director of the WNC Alliance
Mr. Rod Hudgins, President of Council of Independent Business Owners (provided Council with a statement)
Mr. Paul Szurek, member of the WPC
Mr. Mac Swicegood, Asheville resident (provided Council with a statement)
Mr. Scott Dedman, Executive Director of Mountain Housing Opportunities
Mr. Ned Gardner, Asheville resident
Ms. Barber Melton, Vice-President of Coalition of Asheville Neighborhoods and member of the WPC
Mr. David Herbert, member of the WPC
Mr. Jerry Sternberg, member of the WPC
Mr. Jerry Rice, Buncombe County resident
Mr. Robert Zieber, member of the WPC

At 8:22 p.m., Mayor Bellamy closed the public hearing.

Mayor Bellamy said that members of Council have previously received copies of the ordinances and the resolution and they would not be read.

Councilwoman Manheimer moved to adopt Ordinance No. 3876 (definitions). This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK 26 – PAGE 220

Councilwoman Manheimer moved to adopt Ordinance No. 3877 (penalties). This motion was seconded by Vice-Mayor Newman and carried unanimously.

ORDINANCE BOOK 26 – PAGE 225

Vice-Mayor Newman moved to adopt Ordinance No. 3875 (standards) recommended by City staff for continuous 30-foot buffer in the City of Asheville, with the definition of aquatic buffer being amended to dictate that it is "undisturbed". This motion was seconded by Councilwoman Manheimer.

Councilwoman Manheimer said that this ordinance addresses during construction and post-construction. The State tells us that our stormwater buffer must be 30-feet for parcels 1 acre or greater. This ordinance says the buffer will be 30-feet for during construction and post-construction for all parcels, regardless of size. However, there is an exception section, and some blanket exceptions for some redevelopment. The State defines what redevelopment means and it is included in this ordinance. She felt this ordinance represents a true compromise between those who wanted Council to go with the absolute State minimum and those that wanted Council to put in some requirements that far exceeded the State standards. In addition, staff will have the ability to allow an exception, so we won't have residential parcels in the City that would become unbuildable.

27

Throughout discussion, Ms. Ball responded to various questions/comments from Council, some being, but are not limited to: what pollutants are we trying to keep out of the streams; how do buffers keep the sediment out of streams; what happens downstream with the pollutants; why are downstream property owners concerned with pollutants; how did staff come up with the 30-feet buffer and the 15% slope; what is the science of the buffer size; at what level does the steep slope regulations begin and how the stormwater regulations and the steep slopes would interface; are pollutants from stormwater drains piped directly into the streams; how many miles of streams will be affected; how many exceptions have been granted since 2007; and has staff looked at maps comparing the steep slope regulations at 2230 and the lower elevations to see how much land this really will affect.

The motion made by Vice-Mayor Newman (staff recommendation for continuous 30-foot buffer in the City of Asheville, with the definition of aquatic buffer being amended to dictate that it is "undisturbed") and seconded by Councilwoman Manheimer carried on a 5-2 vote, with Councilman Russell and Councilman Smith voting "no."

ORDINANCE BOOK NO. 26 - PAGE 177

Councilwoman Manheimer moved for the adoption of Resolution No. 10-141. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Councilman Russell voting "no."

RESOLUTION BOOK NO. 33 – PAGE 91

Councilman Bothwell moved to amend Ordinance No. 3875 (standards) for 30-foot buffers up to 15% slope, 40-foot buffer between 15-25% slopes, and 50-foot buffers for more than 25% slopes. This motion was seconded by Councilman Smith and failed on a 2-5 vote, with Mayor Bellamy, Vice-Mayor Newman, Councilwoman Manheimer, Councilman Davis and Councilman Russell voting "no."

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 10-138- RESOLUTION AUTHORIZING EXECUTION OF A $1.1 MILLION INSTALLMENT PURCHASE FINANCING CONTRACT WITH BB&T FOR THE LIVINGSTON STREET COMMUNITY CENTER PROJECT

When Councilwoman Manheimer asked if she had a conflict of interest because her law firm represents BB&T, City Attorney Oast said that she did not have a conflict of interest.

Mr. John Smith, Interim Finance Director, said that this is the consideration of a resolution authorizing execution of a $1.1 million installment purchase financing contract for the construction of the Livingston Street Community Center.

The City of Asheville Capital Improvement Program (CIP) includes $1.1 million previously appropriated by City Council to finance the construction of a community center on Livingston Street in central Asheville.

The Finance Department sought proposals from five local and regional banks. Three proposals were received, the best of which was submitted by BB&T at a rate of 4.55% for fifteen years.

The proposed resolution authorizes an installment purchase contract between the City of Asheville and BB&T to finance the construction of the Livingston Street Community Center and authorizes the City Manager, City Attorney, Interim Finance Director and City Clerk to execute and deliver any and all necessary documents.

28

Pros:

- Provides funding of capital expenditures at a very favorable rate of interest.
- Financing capital assets spreads the cost of construction over several years of the useful life of the asset.

Con:

- Financing the asset slightly increases the lifetime cost due to the payment of interest on the amount financed.

The annual debt service payment for this financing will range from $76,000 to $123,000. Funds are already included in the City's proposed debt service budget to cover this cost.

City staff recommends City Council adopt the resolution authorizing the City Manager to execute an installment purchase contract and closing process with BB&T for the construction of the Livingston Street Community Center.

Mr. Smith responded to questions from Councilman Russell regarding the 15-year loan and the annual service.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-138. This motion was seconded by Councilman Bothwell and carried on a 6-1 vote, with Councilman Russell voting "no."

RESOLUTION BOOK NO. 33 – PAGE 86

B. RESOLUTION NO. 10-139 - RESOLUTION APPROVING THE RECOMMENDATIONS OF THE HOUSING & COMMUNITY DEVELOPMENT COMMITTEE FOR THE 2010 OUTSIDE AGENCY PROGRAM

Mr. Jeff Staudinger, Community Development Director, said that this is the consideration of a resolution approving the recommendations of the Housing & Community Development (HCD) Committee for the 2010 Outside Agency Program.

The HCD Committee received applications from 10 eligible organizations for Outside Agency funding for 2010. The Committee heard presentations from these applicant organizations on May 26, 2010.

The Committee recommends the following funding under this program for 2010:

Design Center	Coordinating community and design professional work on public infrastructure projects	$ 4,000
Homeward Bound of Asheville-AHOPE	A HOPE Day Center outreach, intake and support for homeless persons on weekends.	$ 20,000
Asheville Buncombe Community Relations Council	Fair Housing	$ 50,000

29

Economic Development Coalition	Economic development services	$40,000
Asheville Greenworks	Graffiti removal; tree planting	$ 8,000

The Committee took no action on the remaining five applications. These applicants were invited to return to the next HCD meeting to participate in a discussion about how the City can best support after-school, mentoring and other youth enrichment programs. Regardless, the Committee expects to allocate the $162,400 that were pre-budgeted for the program. Only individual agency funding recommendations decisions are being deferred until the next HCD meeting.

This action complies with the City Council Strategic Operating Plan in (1) Affordable: Supports an initiative to end chromic homelessness in Asheville; (2) Fiscal Responsibility: It provides resources for strategic initiatives and creates meaningful performance measures for programs and services; (3) Job Growth and Community Development: Creates more collaborative and effective working partnerships between the City of Asheville and key organizations to accomplish economic development goals; an (4) Safe: Supports recreation and employment alternatives for youth at risk of gang exposure.

Pros:

- Approval of Outside Agency Grants provides operating support to Asheville- based organizations that are providing direct services for Asheville residents.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee.

Con:

- Budget constraints have curtailed the availability of funds for this year, and organizations will need to find alternate sources of program support;

Outside Agency Grants are funded from the City's general fund. The funding recommendations are within the fiscal limits developed by Council during the budget working sessions. Except for one agency recommendation (ABCRC), all funding recommendations are made at 80% of last year's individual agency funding.

The HCD recommends approval of the 2010 Outside Agency Program budget, and individual grants as presented.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-139. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 89

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-140 - RESOLUTION FOR LOCAL CAMPAIGN FINANCE REFORM OPTIONS

30

Councilman Bothwell asked for consideration of the following resolution for local campaign finance reform options: "WHEREAS, the cost of running for local office should be attainable to everyday citizens in any North Carolina community; and WHEREAS, public financing programs that encourage small donations, voter participation, and voluntary spending limits are present at the federal and state level, including in North Carolina statewide judicial and executive branch elections; and WHEREAS, public financing programs increase voter contact with candidates, and allow elections to be "voter-owned"; and WHEREAS, the Town of Chapel Hill successfully implemented a public financing pilot in 2009, with participating candidates winning more votes than any of their non-participating opponents; and WHEREAS, a North Carolina city or town can only be implemented if State law is changed to give local governments the authority to pursue this option; and WHEREAS, the North Carolina House of Representatives passed HOUSE BILL 120, AN ACT TO ESTABLISH A PILOT PROGRAM FOR PUBLIC FINANCING OF MUNICIPAL ELECTION CAMPAIGNS, during the 2009 session. NOW, THEREFORE, BE IT RESOLVED THAT the City Council of the City of Asheville calls upon the North Carolina General Assembly and Governor to enact legislation that gives large towns, like Asheville, the authority to sponsor a public financing program for their elections, using local resources, with technical assistance from the State Board of Elections. AND BE IT FURTHER RESOLVED THAT such legislation should allow for the consideration of said financing by any qualifying municipality, but not mandate the implementation of such a plan."

He explained that this resolution urges the N.C. General Assembly to pass pending legislation that would permit cities to institute voter-owned election plans. This action doesn't commit Asheville to a voter-owned election system, but if the General Assembly passes the law, we would be able to choose such a plan in the future. Last fall Chapel Hill became the first North Carolina city to use such a finance plan and it has been deemed a success.

A representative from WNC for Change spoke in support of the resolution.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-140. This motion was seconded by Vice-Mayor Newman and carried on a 5-2 vote, with Councilman Davis and Councilman Russell voting "no."

RESOLUTION BOOK NO. 33 – PAGE 90

B. BOARDS & COMMISSIONS

Airport Authority

Mr. David Hillier is a seated member on the Authority and is eligible for reappointment. His attendance is 97% and he is interested in being reappointed. Mr. Rhett Grotzinger is not eligible for reappointment. The following candidates applied for a position on the Airport Authority: Nan Chase, Phillip G. Kelley and Bob Roberts.

Vice-Mayor Newman, liaison to the Airport Authority, recommended interviewing Mr. Kelley and Mr. Roberts, along with Mr. Hillier to talk with them about the issues the Airport is working on and issues the City has an interest in.

Mayor Bellamy supported interviewing Mr. Kelley and Mr. Roberts; however, she felt it would be appropriate to have Mr. Hillier meet with Council separately to talk about his vision for the Airport, especially since he is currently the Chairman of the Airport Authority. Therefore, Mayor Bellamy moved to reappoint Mr. Hillier to serve an additional 4-year term, term to expire June 30, 2014, or until his successor is appointed; and to interview Mr. Kelly and Mr. Roberts for

31

the vacancy left by Mr. Grotzinger. This motion was seconded by Councilman Davis and carried unanimously.

Civic Center Commission

The following candidates applied for a position on the Civic Center Commission: Dan Breneman, Bill Jones, Jeffory Quick, Jeremy Gillespie, Katrina Bragg, James Richards, Carol Ann McLendon and Linda Brandt. It was the consensus of Council to readvertise for the vacancies on the Civic Center Commission.

At the request of Councilman Russell, Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that his Committee will review Council's policy regarding city residency on our boards.

RESOLUTION NO. 10-142 – RESOLUTION REAPPOINTING A MEMBER TO THE WNC REGIONAL AIR QUALITY AGENCY

Vice-Mayor Newman said that the following candidates applied for a position on the WNC Regional Air Quality Agency: Rachael Bliss, Dennis Miller and Eric Rainey. Mr. Loyd Kirk is the seated member who has served one term with a 95% attendance. He has asked to be reappointed.

Councilwoman Manheimer said that she has been contacted by a group asking City Council to take a position on the very controversial concrete plant issue in northern Buncombe County which public hearing will be held before the WNC Regional Air Quality Agency. They are asking for City Council's position as we make appointments to that board. The Buncombe County Commissioners have taken a position against the project. She is bringing this up at this meeting because the public hearing on this will take place before the next City Council meeting.

After Councilman Davis spoke highly of Mr. Kirk and his involvement on the Agency, he moved to reappoint Loyd Kirk to serve an additional six year term, term to expire July 1, 2016, or until his successor is appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 101

RESOLUTION NO. 10-143 – RESOLUTION APPOINTING A MEMBER TO THE TRANSIT COMMISSION

Vice-Mayor Newman said that the candidates applied for a position on the Transit Commission: Rachael Bliss, Julie Mayfield, Brett McCall, Joan Gryscavage, Kevin Cross, David John Boshart and Pamela K. Fisher.

Councilman Smith moved to appoint Julie Mayfield to the Transit Commission to serve the unexpired term of Ms. Hanna Raskin, term to expire December 31, 2012, or until her successor is appointed. This motion was seconded by Councilwoman Manheimer and carried on a 6-1 vote, with Councilman Russell voting "no" in that he felt Council should interview Ms. Mayfield first.

RESOLUTION BOOK NO. 33 – PAGE 102

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Dr. Albert Anderson spoke about the need for better police protection. At the request of Mayor Bellamy, City Manager Jackson said that he would follow-up with Dr. Anderson, investigate his concerns, and report back to Council and Dr. Anderson with his findings.

32

Mr. James Latimore, representing Veterans for Peace, urged Council to place on their agenda (and adopt) a resolution advising North Carolina delegates in the U.S. Congress and Senate and President Obama to vote in support of a timely withdrawal plan for our troops in Afghanistan and Iraq.

Mr. Jerry Rice felt it was in Council's best interest to keep the programming of the WNC Community Media Center (formerly URTV) going and hoped that the audit and findings are made public.

Mr. John Blackwell urged Council to not shut down the WNC Community Media Center and outlined several options to keep their doors open using less money.

Dr. Herbert Johnson urged Council to make the financial records of the WNC Community Media Center transparent.

Ms. Davyne Dial, former WNC Community Media Center Board member, provided Council with a Federal Form 990 of URTV Inc. showing a deficit of $62,239 for 2007. She said there are other alternatives than closing their doors.

Councilwoman Manheimer felt Asheville may be missing funding opportunities and was interested in pursuing re-engaging a lobbyist on a federal and state level. Mayor Bellamy felt this issue should be an agenda item that ultimately will require staff input and suggested Councilwoman Manheimer follow the process for placing items on the Council agenda.

The following claims were received by the City of Asheville during the period of May 14 – June 3, 2010: John Vann (Streets), Sheila Plemmons (Water), Rachel Jernigan (Water), Brian Roberts (Sanitation), Bernadette Wolf (Parks & Recreation), Tanya McDaniel (Transit), Jean Beachboard (Civic Center), Michael Thomas (Water), Harry Woogon (Streets), and Laurel York (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:21 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – June 22, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: William A. Russell Jr. (family emergency)

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF ASHEVILLE SISTER CITY DELEGATION FROM CHIAPAS, MEXICO

Mayor Bellamy said that our relationship with San Cristobal is active and vibrant, filled with cultural, humanitarian and educational projects. Ines Paniagua Solis, as co-chair, has been to Asheville twice and is familiar with the City and its many amenities. She is also working with us on several art/craft project possibilities. The delegates have toured Asheville today visiting Handmade in America, the Folk Art Center, Warren Wilson College, Curbie Recycling and Mountain Bizworks. Tomorrow will be spent in Cullowhee with WCU and it's Cherokee Language Program. A delegation from ASCI and WCI travelled to UNC-Chapel Hill last fall to visit there and try to work out an agreement to exchange students and staff. They will be continuing this discussion that will also include performing arts, and local artisan programs. Friday will be spent at Mars Hill College to reconnect with long-time supporters there of San Cristobal indigenous peoples.

She presented the dignitaries each with a small token gift and a gift to send back to the Mayor, along with a letter of greeting.

She then recognized Asheville Sister Cities International President Andrew Craig who introduced Sarah Delcourt ASCI Chair for San Cristobal. Ms. Delcourt introduced Dely Paniagua - Mayor 's representative and Dir. of Recreation and Culture for the City of San Cristobal; Ines Paniagua Solis - Sister Co-chair for Asheville Committee in San Cristobal - and works with Grameen, Inc. for a Mayan Artisan Program; Dr. Andreas Fabregas Puig, Rector of Universidad Intercultural de Chiapas (UNICH); and Dr. Claudio Sartorello, Director of bi-lingual and Intercultural education at UNICH, She said that the 5th delegate who will not arrive until later is Hiram Marina - Producer of the production Palenque Rojo.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 8, 2010

B. ORDINANCE NO. 3878 - BUDGET AMENDMENT TO RECEIVE REIMBURSEMENT FROM THE N.C. DEPT. OF CRIME AND PUBLIC SAFETY

FOR OVERTIME EXPENDITURES RELATED TO THE FIRE DEPARTMENT'S REGIONAL HAZARDOUS MATERIALS TEAM

Summary: The consideration of a budget amendment, in the amount of $70,000, to receive reimbursement from the North Carolina Department of Crime Control and Public Safety, for overtime expenditures related to the Asheville Fire Department's Regional Hazardous Materials Team.

The Asheville Fire Department has received reimbursement funds from the North Carolina Department of Crime Control and Public Safety. These funds have been received in 2009 and 2010. The Department utilizes General Fund money to pay for overtime for hazardous materials training and emergency responses throughout the Western North Carolina region. The North Carolina Department of Crime Control and Public Safety reimburses the City of Asheville for these expenditures as they relate to regional hazardous materials responses. These funds that have been received will be used to reimburse the overtime expenditures that have come out of the General Fund.

This action complies with the City Council Strategic Operating Plan in that it helps to proactively pursue funding opportunities through state and federal economic stimulus packages.

Pro:

- This action allows for reimbursement of overtime expenditures without utilizing city tax funds.

Cons:

- None identified

These funds, which have been obtained through reimbursement payments from the North Carolina Department of Crime Control and Public Safety will be used to offset Fire Department overtime expenses.

City staff recommends City Council approve the budget amendment to receive reimbursement from the North Carolina Department of Crime Control and Public Safety, for overtime expenditures related to the Asheville Fire Department's Regional Hazardous Materials Team.

ORDINANCE BOOK NO. 26 – PAGE 29

C. RESOLUTION NO. 10-144 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN EASEMENT TO PROGRESS ENERGY CAROLINAS INC. FOR ELECTRIC POWER LINES ON PROPERTY LOCATED OFF OF BREVARD ROAD

Summary: The consideration of a resolution authorizing the Mayor to execute an easement to Progress Energy Carolinas, Inc. for electric power lines on property located off of Brevard Road, identified as PIN # 9636-10-3860-00000.

Henderson County owns a large acreage tract of property located off of Brevard Road in Buncombe County and according to Deed Book 2852 Page 775, the City of Asheville has certain reversionary interest in said property. Progress Energy Carolinas, Inc. (PEC) currently owns a power line easement through a narrow portion of this property measuring a total of 0.16 acres. Citing increased demand for electricity by PEC's customers, PEC requests that this easement area be expanded in width from 100 feet to 170 feet, thus increasing the overall easement area to 0.31 acres. This increased area would allow for an upgrade to the electric transmission line. Given the City of Asheville's reversionary interest in the property, PEC requests that the City of Asheville execute the easement alongside Henderson County.

This proposal has been reviewed by the affected City departments, and no objections have been noted. Henderson County has approved and executed the easement.

This action complies with the City's strategic operating plan in that it supports our local economy and capacity for sustainable development.

Pros:

- Improved electrical service for the community
- Minimal impact to the property

Con:

- None

No monetary consideration is being received by the City of Asheville in this transaction.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 33 – PAGE 103

D. RESOLUTION NO. 10-145 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR AND ACCEPT FUNDS IF AWARDED FOR THE 2010 BYRNE JUSTICE ASSISTANCE GRANT – LOCAL SOLICITATION

ORDINANCE NO. 3879 - BUDGET AMENDMENT TO ACCEPT FUNDS FOR THE 2010 BYRNE JUSTICE ASSISTANCE GRANT – LOCAL SOLICITATION

Summary: The consideration of (1) a resolution authorizing the City to apply for and accept funds if awarded for the 2010 Byrne Justice Assistance Grant – Local Solicitation and (2) the accompanying budget amendment in the amount of $89,881.

The Asheville Police Department (APD) requests permission to apply for and accept funds from the Byrne JAG 2010 – Local Solicitation. This is a predetermined amount of funds based on the Part 1 Uniform Crime Reporting Crimes. The Asheville Police Department and Buncombe County Sheriff's Department have been allocated $89,881 with Asheville receiving $64,389 and Buncombe County receiving $25,492. The distribution of funds has been approved by both entities through a signed Memorandum of Understanding.

APD plans to purchase 12 in-car video systems capable of wireless that will interface with our existing equipment (radar, computer, etc.). The resulting video recordings would generally serve as evidence to be utilized in court for the prosecution of criminal cases. However, these recordings could also be used to aid in resolving allegations of wrongdoing by officers. This would allow for an even greater level of protection of officers and citizens. The digital cameras provide high quality and high resolution video/audio recording of events in and around the patrol car. Recordings such as this help protect the interests of citizens as well as the interests of police officers. Recordings captured with these cameras could aid in mitigating potential civil liability for the City of Asheville by capturing in detail the actual events that transpired. The secure evidentiary storage and wireless upload capabilities of the system creates a user friendly system that is extremely secure and versatile.

The Buncombe County Sheriff's Department plans to purchase a robotic mobile surveillance system to enhance officer safety. The initial deployment of a robotic device will minimize the need for human exposure and potentially violent or hazardous incidents.

There will be an expense of $64,389 by the APD for the in-car video system. The Buncombe County Sheriff's Department will expend $25,492 for the purchase of a robotic mobile surveillance system. This accounts for the total allocation of $89,881 for this Grant.

This is a 100% non-matching grant that will enable the APD to increase officer safety, and video evidentiary value through documentation of incidents via in-car camera recordings.

This action complies with City Council's Strategic Operating Plan in the Focus Area - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Increasing In-Car video will allow for better documentation of police related incidents.
- Increases officer and citizen accountability through recorded interactions.

Con:

- None.

: There is no fiscal impact at this time for City Council to approve the resolution granting APD's application for and acceptance of funds if this grant is awarded. There will be maintenance and replacement costs for the equipment, which will need to be included in future fiscal year budgets. The average lifespan of the units is appropriate 5-7 years. Replacement cost per unit would be approximately $5,500.

City staff recommends City Council adopt (1) the resolution authorizing the City Manager to apply for and accept grant funds if awarded through US Office of Justice Programs; and (2) the associated budget amendment, in the amount of $89,881.

RESOLUTION BOOK NO. 33 – PAGE 104

ORDINANCE BOOK NO. 26 – PAGE 231

E. RESOLUTION NO. 10-146 - RESOLUTION APPOINTING RICHARD HALL AS THE RIVERLINK BOARD OF DIRECTOR'S MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Summary: Mr. Robert Shepherd is no longer on the RiverLink Board of Directors, thus leaving a vacancy for a member of the RiverLink Board of Directors on the River District Design and Review Committee until September 1, 2010. The RiverLink Board of Directors would like to replace Mr. Shepherd with Mr. Richard Hall, as one of the two members of the RiverLink Board of Directors, to serve the unexpired term of Mr. Shepherd, term to begin July 1, 2010, and expire September 1, 2010, and then a full three-year term, term to expire September 1, 2013, or until his successor has been appointed.

RESOLUTION BOOK NO. 33 – PAGE 105

F. RESOLUTION NO. 10-147- RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDMENT TO THE MEMORANDUM OF AGREEMENT WITH THE NORTH CAROLINA DIVISION OF THE FEDERAL HIGHWAY ADMINISTRATION, THE NORTH CAROLINA STATE HISTORIC PRESERVATION OFFICER AND THE ADVISORY COUNCIL ON HISTORIC PRESERVATION REGARDING PACK SQUARE PARK

Summary: The consideration of a resolution authorizing the City Manager to execute on behalf of the City of Asheville an amendment to the Memorandum of Agreement regarding the Pack Square Park.

In 2007, a Memorandum of Agreement (MOA) was executed amongst the Federal Highway Administration (FHWA), The North Carolina State Historic Preservation Office (SHPO), and the Advisory Council on Historic Preservation (ACHP), as signatories, and the Pack Square Conservancy (PSC), City of Asheville (City), and North Carolina Department of Transportation (NCDOT) as concurring parties.

This MOA was a requirement of the City receiving federal funding on behalf of the PSC for the construction of the Park. The MOA has eleven stipulations that cover various aspects of the Park's design, construction and administration. All of these stipulations have been satisfied except for three related to pavilion design, architectural survey and duration.

The FHWA is in agreement with extending the duration of the MOA for an additional five years. This will enable completion of the plan for installation of a pavilion.

This action complies with the City Council Strategic Operating Plan in that we leveraged internal and external partnerships for pursuing capitol improvements and infrastructure projects.

Pros:

- The City will fulfill its responsibility in the original MOA.
- The City will comply with the Federal requirements associated with receiving the construction funds.

Cons:

- The City will need to assist with coordination to assure the revised MOA is successfully completed. This will involve staff time.

None, unless the MOA isn't adhered to. If this is neglected, then it is possible that the City would have reimburse the entire Federal grant in the amount of $3,899,860.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign the amendment to the Memorandum of Agreement.

RESOLUTION BOOK NO. 33 – PAGE 106

G. RESOLUTION NO. 10-148 - RESOLUTION OF SUPPORT FOR ADOPTION OF THE NORTH CAROLINA MOBILITY FUND

Summary: The State of North Carolina is in need of new funding sources, generating revenues beyond the "Equity Formula" to help address North Carolina's critical transportation needs. The current funding levels at local, State and Federal levels are insufficient to meet the state's transportation needs, especially with respect to projects having regional, statewide and national significance. The State of North Carolina continues to grow at a rate higher than the normal average. The Asheville City Council supports adoption of the "North Carolina Mobility Fund" by the North Carolina General Assembly during its 2010 Legislative Session as a very positive means of providing upwards of $300 Million in additional funds for transportation projects of regional or statewide significance.

RESOLUTION BOOK NO. 33 – PAGE 107

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

ADDITION TO THE AGENDA - PEDESTRIAN WALKOVER BRIDGE AT HILLCREST APARTMENTS

Mayor Bellamy said that she added to the agenda, at the request of Councilman Smith, the issue of the pedestrian walkover bridge at Hillcrest Apartments, due to the recent pedestrian fatality adjacent to Hillcrest Apartments.

Councilman Smith felt this matter is of some urgency. His thoughts go out to Charlton Owens, father, and the entire family of Anthony Ray Gilmore who was the pedestrian that was killed crossing I-240. Mr. Owens has (1) collected 300 signatures on a petition asking that the pedestrian bridge be re-opened, (2) opened a fund to help pay for funeral costs; and (3) asked that the pedestrian bridge, if re-opened, be named in honor of his son. Councilman Smith felt that when the bridge was closed back in 1999, there was a different attitude towards community policing and containment of crime and drugs. He felt it was time to reassess whether the bridge should be re-opened. He felt the City should provide the Hillcrest residents with quality infrastructure that we would provide in any place in Asheville. Whether or not the bridge is re-opened, he felt the sidewalk should be repaired and cleaned, and urged all residents to use safe routes even if it means adding a little more time to your travel. He did thank Councilman Bothwell for his efforts with Asheville on Bikes to clean up the sidewalk on the south side of I-240.

Mayor Bellamy suggested we refer this issue to the Public Safety Committee for a comprehensive discussion about this issue. She said that the Housing Authority has already planned a Hillcrest community meeting on this issue. The West End/Clingman Avenue neighborhood needs to be included in discussions as they are impacted as well. She did note that there are sidewalks all the up Hill Street and there are the stairs that lead to Westgate Shopping Center.

City Manager Jackson felt staff needs further direction and possibly some assistance in facilitating a comprehensive discussion. He asked if Council was directing the Public Safety Committee to hold public forums or for staff to facilitate comprehensive community discussion and then bring the results of that discussion to Council. He felt that a comprehensive discussion would require a professional facilitation and that we consider engaging a private consultation for that purpose.

Councilman Davis felt it was important to realize that the pedestrian bridge was closed for a reason and agreed it was important to have a dialogue with the Housing Authority, the Hillcrest neighborhood, the West End/Clingman Avenue neighborhood, Police Chief Hogan and City staff. He wasn't sure if it was best facilitated in the Public Safety Committee or whether Council should devote a worksession to this issue, without a facilitator. We need to recognize that as tragic as the accident was, there is also the tragedy of lives affected and lost by drugs and crime, which had a lot to do with the original bridge closure.

Councilman Bothwell, while investigating the sidewalk, noted that there is a nice stairway down to Roberts Street from the little sidewalk. He felt that the sidewalk is worth opening up and even the Police bike patrol can use it.

Mayor Bellamy felt that the discussion will include the illegal activities in that area. She asked that we keep in mind that the gates installed and the checking ID's were put there for a reason.

Councilman Smith felt that we now have 12 more years of technology and there may be new solutions to address crime and drugs. We need to make sure that the Housing Authority and

law enforcement have a pivotal role in this comprehensive discussion. He supported referring this to the Public Safety Committee, without a facilitator, for action in 6-8 weeks

Vice-Mayor Newman agreed that the Public Safety Committee should review this matter initially, but felt ultimately the entire Council will want to comment on this. He felt the Committee could review this primarily for the purpose of gathering facts and maybe a recommendation will come out of it. He felt they could hold a meeting and hear from the key groups who have a perspective they want to hear. He knows that the decision to close the pedestrian bridge was closed for real reasons, but a long time has gone by and felt we should re-visit the issue without rushing through it.

Mayor Bellamy said the Public Safety Committee should invite representatives of the Housing Authority, N.C. Dept. of Transportation representatives, representatives of the Hillcrest neighborhood, and representatives of the West End/Clingman Avenue neighborhood. She asked if the Housing Authority Board would prepare minutes of the meeting for Council information. She also asked if the Housing Authority Board would offer their position (as owners of the property) on this matter as well.

Vice-Mayor Newman questioned if we needed an outside facilitator for this meeting since we deal with important issues all the time without outside facilitation.

City Manager Jackson said that if Council is looking for a comprehensive community discussion involving the N.C. Dept. of Transportation, the Housing Authority, community and other interests, then that is where we need facilitation. He felt City staff could engage Housing Authority staff, the N.C. Dept. of Transportation staff and law enforcement officials and do a physical assessment and bring that physical assessment and history to the Public Safety Committee. And, then determine what kind of community input Council might want to have at that point in time. If Council is interested in obtaining community interest first, then that would be a different process.

At Mayor Bellamy suggestion, it was the consensus of Council to (1) ask the Housing Authority to facilitate input from the Hillcrest residents, (2) ask the Chair of the West End/Clingman Avenue Neighborhood Association, with possible assistance from the Coalition of Asheville Neighborhoods, to help facilitate input on this issue; and (3) ask Ms. Pattiy Torno, Chair of the River District Design Review Committee, to hold a meeting with her stakeholders on this issue. Those organizations are asked to provide their minutes and other information on this issue to the Public Safety Committee. City staff will provide the statistical data to the Public Safety Committee.

Mayor Bellamy said that in order for these meetings to occur, she would place this item on the August 24 agenda, at which time the Public Safety Committee will update City Council.

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION UPDATE

This update was delayed.

B. WNC COMMUNITY MEDIA CENTER UPDATE

WNC Community Media Center Vice-Chair Bob Horn updated Council on the WNC Community Media Center and provided them with information about the WNC Community Media Center and their activities. He showed Council videos on the summer youth camp promotion and a promotion for the station. He thanked City Council, citizens and promoters for their support.

In response to Councilman Smith, Mr. Horn explained that they plan to continue with the Media Center at least until this time next year, with funding from the City and County.

C. ASHEVILLE ENERGY INDEPENDENCE INITIATIVE PILOT PROGRAM DESIGN AND DEVELOPMENT

Ms. Maggie Ullman, the City's Energy Coordinator said that Council directed staff in January 2010 to design a pilot PACE program for Council consideration. Staff is providing an update to Council on progress toward a pilot program.

The following is a progress update is on the feasibility analysis (1) median household income; (2) total housing stock; (3) age of housing; (4) availability of qualified vendors; (5) annual residential energy usage; (6) existing energy related financial incentive programs; and (7) available home retrofit financing options. There is adequate market opportunity for a pilot loan program that supports energy efficiency and renewable energy investments.

The following is a progress update on the pilot program design (1) in-house program administration; (2) residential loans; (3) 60-100 homes; (4) prescriptive measures list and a custom measure route; (5) quality control through special building permit; and (6) prequalified contractors. Program design 80% complete pending legislative authority and outstanding regulatory factors.

Outstanding issues are (1) Federal level: Mortgage companies (a) Prohibiting senior liens and limiting transferability with property; and (b) San Francisco and Boulder County have suspended programs until further agreement is reached; and (2) State level: Clear legislative authority - Impacts loan security, capitalization of the fund, and loan repayment methods. Pursue legislation to enable workable model within parameters supported by mortgage companies.

Based on Council's previous direction, staff is pursuing legislative amendment in 2010 Short Legislative Session. Legislative partners include UNC School of Government, City of Asheville, City of Charlotte, City of Raleigh, Town of Chapel Hill and Town of Carrboro.

By September 1, option 1 is with clear legislation, staff would present a final recommendation for a pilot program that takes into consideration parameters supported by mortgage companies. Option 2 is lacking clear legislation. Staff would pursue legislative authority in 2011 Long Session (January 2011). Staff would continue to track progress on the Federal level with mortgage companies.

Vice-Mayor Newman said that there is enthusiasm and support in Asheville for the City to create opportunities for homeowners and business owners to invest in clean energy for their businesses and their homes. He believed that what Asheville is doing is important to many cities across the state. He hoped that we can get a program operational this year, even if it is a pilot program. Regardless of what happens in the Short Session this year, it's clear that next year there will be a much larger legislative discussion about these community-based or even state-based clean energy financing models. The compelling need in the state is to get something going so that everyone else can learn how it's working and then replicate what is working well. He asked our City Manager, City Attorney and others involved to do everything they can to make sure we do come out of this Short Session with the ability to get something up and running. He will be in Raleigh next week and he will try to meet with our delegation and other legislators who are interested in this.

Mayor Bellamy said that she attended an event hosted by the Board of Realtors and discovered that we need to involve realtors in these discussions as they can be a potential partner to help the community understand and sell the products. They can also provide existing homeowners information on greening their homes.

In response to Vice-Mayor Newman, Ms. Ullman said that staff will report back to Council prior to September 1 if, and when, there is clear legislation.

D. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH TRIANGLE J COUNCIL OF GOVERNMENTS ACCEPTING SUB-GRANTEE FUNDS FROM THE DEPT. OF ENERGY CLEAN CITIES GRANT

BUDGET AMENDMENT ACCEPTING FUNDS FROM THE DEPT. OF ENERGY CLEAN CITIES GRANT

Mayor Bellamy announced that these items have been removed from the Agenda per staff's request.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON 902 SAND HILL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING TO CONVERT THE EXISTING RESIDENTIAL STRUCTURE TO OFFICE USE

ORDINANCE NO. 3880 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED ON 902 SAND HILL ROAD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO OFFICE DISTRICT/CONDITIONAL ZONING TO CONVERT THE EXISTING RESIDENTIAL STRUCTURE TO OFFICE USE

Mayor Bellamy opened the public hearing at 5:55 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone property located on 902 Sand Hill Road from RM-6 Residential Multi-Family Low Density District to Office District/Conditional Zoning to convert the existing residential structure to office use. This public hearing was advertised on June 11 and 18, 2010.

The applicant is requesting a Conditional Zoning for one parcel located at the corner of Sand Hill and West Oakview Roads from RM-6 (Residential Multi-Family Low Density District) to O (Office District) in accordance with Section 7-7-8 of the Unified Development Ordinance (UDO).

The site consists of a single parcel located at 902 Sand Hill Road with an area of approximately 1.02 acres (0.98 acres according to Buncombe County Tax records). The lot, located at the southwest corner of Sand Hill and West Oakview Roads, is currently zoned RM-6 and is similarly zoned to the west and adjacent to RS-4 to the south. Areas are zoned RS-4 across West Oakview to the east and CBI across Sand Hill Road to the north. There are single-family homes to the south, the Oak Forest Presbyterian Church across West Oakview to the east and a convenience store across Sand Hill Road to the north.

The lot contains a two-story brick and frame residential structure (2,080 square feet) and a detached frame garage (576 square feet). The applicant is proposing to maintain the existing structures and to convert the interior use from residential to office. Vehicular access to the structure will remain in the current location from West Oakview Road. A small gravel parking area is proposed and provides six spaces (including one accessible and one bike space).

Landscaping and open space are required on this site due to the rezoning and includes a Type A (20') property line buffer along the southwestern and southeastern boundaries adjacent to RM-6 and RS-4, street trees and parking lot landscaping. There is significant mature vegetation on the site that will be used as credits for much of the required landscaping around the perimeters. Fifteen percent of the site is required to be designated as open space and the applicant has provided more than 70%.

Both Sand Hill Road and West Oakview Road are identified as needed linkages for sidewalks and none currently exist, however the applicant has requested a fee-in-lieu under Section 7-11-8(e)(4) of the UDO, based on the cost of the sidewalk installation exceeding 15% of the total project cost. This request is granted by the City Traffic Engineer.

This project was recommended for approval with conditions by the Technical Review Committee (TRC) on May 3, 2010. No members of the public were present to speak on this proposal, however; staff has received notice of opposition from a nearby property owner. His concerns were regarding whether this action would make it easier for further non-residential uses to expand into the single-family residential neighborhoods and discomfort with the office incursion into the residential area.

The Planning & Zoning Commission recommended approval of this proposal at their meeting on June 2, 2010 (5-0 vote). No members of the public were present to speak. Staff has received one opposition who was concerned about non-residential uses in this established neighborhood.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   Aside from the creation of a small, six-space gravel parking area off of the existing driveway and turnaround, there is no proposed development of the land. A 20' Type A vegetated buffer will be installed along the southern property line, adjacent to the RS-zoned single-family house and is expected to mitigate any impact from the parking area. The existing building will remain and be used for the office use, resulting in very little visual change to the site and neighborhood.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The proposal is not expected to injure the value of adjoining or abutting properties. Since there is virtually no physical change to the site, there should be no impact to abutting properties.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The proposed office use is compatible with the other non-residential uses at this four-way intersection (church, convenience store and vacant parcel) and should be similarly compatible with the adjacent residential neighborhood. The heavy traffic and lights from the convenience store to the north result in a situation where non-residential use may be more suitable than residential.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The *Asheville City Development Plan 2025* provides strategies and goals that support this conditional zoning request, especially considering the proposal to retain the existing residential structure and convert it to office use, leaving the site largely unchanged. Although the *Plan* does recommend protecting and preserving residential neighborhoods and uses, the City recognizes that on high-traffic, non-residential intersections such as this one, allowing for a non-residential use may be appropriate.

   The *Plan* directly supports adaptive reuse of structures, stating that "it is important to find new, compatible uses for buildings if we are to preserve the architectural character of the community. In addition, if these buildings stand vacant and dilapidated, they promote neighborhood decline". While the use will be office, the house will remain and the site will not appear vastly different.

   Allowing for the proposed office use supports small business development, which directly aligns with City Council's goal of *Job Growth & Community Development.* Additionally, adaptive reuse of existing buildings is the most sustainable construction (according to the *2025 Plan,* p.74*),* supporting Council's *Green & Sustainable* goal.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The project site is located at an intersection with a major road (Sand Hill Road) and less than a mile from US 19/23 and I-40. In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for continued service to the site.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City Traffic Engineer and it should not cause undue traffic congestion along the existing street infrastructure. The anticipated traffic is expected to be less than one hundred (100) vehicles per hour during the morning and afternoon peak hours during a typical weekday.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposal retains the existing residential structure with minimal physical changes to the site, maintaining the residential character of the area while allowing for a new use.

- Significant mature landscaping will be retained on-site and additional landscaping will provide a buffer for the residential use to the south.

Con:

- The rezoning to Office use may be perceived as allowing non-residential encroachment into the residential neighborhood.

Based on the above findings, staff recommends approval of the conditional zoning as requested by the applicant.

Mr. Gerald Green, representing the applicant, explained how they will maintain the character of the house and site. He said they will convert the house into an accounting office, where most of the 6 employees will work remotely. He said that the only visible change will be in the parking area which will have a sidewalk up to the house with a ramp. He explained why they are requesting a fee in lieu of for the sidewalk, primarily due to the trees that would have to be removed to build the sidewalk.

Mayor Bellamy closed the public hearing at 6:01 p.m.

In response to Councilwoman Manheimer about the increased traffic in that area, Director of Transportation Ken Putnam said that he would check with the N.C. Dept. of Transportation about their plans for a traffic signal or a round-about at the intersection of Sand Hill Road and West Oakview Road. Mayor Bellamy asked that Mr. Putnam express Council's support for a traffic control device at that location.

Ms. Bernstein responded to Mayor Bellamy regarding the property being on a septic tank.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3880, to conditionally zone property located on 902 Sand Hill Road from RM-6 Residential Multi-Family Low Density District to Office District/Conditional Zoning to convert the existing residential structure to office use, to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) All activities associated with the office use, including deliveries and refuse collection, shall be conducted between the hours of 7:00 am and 10:00 pm; and (7) Signage should be limited to a residential scale, may not be internally illuminated and should not exceed six feet in height and 15-square feet per sign face. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF THE BUNCOMBE COUNTY COURTHOUSE LIFE SAFETY ADDITION LOCATED AT 60 COURT PLAZA FROM CENTRAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF A 33,542 SQUARE FOOT ADDITION TO THE EXISTING COURTHOUSE BUILDING AND ASSOCIATED ROADWAY RECONFIGURATION WITH A REQUEST FOR A LANDSCAPE MODIFICATION

ORDINANCE NO. 3881 - ORDINANCE TO CONDITIONALLY ZONE THE BUNCOMBE COUNTY COURTHOUSE LIFE SAFETY ADDITION LOCATED AT 60 COURT PLAZA FROM CENTRAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE CONSTRUCTION OF A 33,542 SQUARE FOOT ADDITION TO THE EXISTING COURTHOUSE BUILDING AND ASSOCIATED ROADWAY RECONFIGURATION WITH A REQUEST FOR A LANDSCAPE MODIFICATION

Mayor Bellamy opened the public hearing at 6:07 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone the Buncombe County Courthouse life safety addition located at 60 Court Plaza from Central Business District to Central Business District/Conditional Zoning for the construction of a 33,542 square foot addition to the existing courthouse building and associated roadway reconfiguration with a request for a landscape modification. This public hearing was advertised on June 11 and 18, 2010.

This is a request for review of a proposed Conditional Zoning in the Central Business District (CBD) to accommodate the construction of a life safety addition to the Buncombe County Courthouse.

The project area consists of 2 parcels with an approximate area of 1.06 acres. The site is located at 60 Court Plaza, at the southwest and southeast corners of College and Davidson Streets in the CBD and is the current location of the Buncombe County Courthouse and a small surface parking lot owned and operated by the County.

The proposal includes the construction of a 9-story tower addition onto the back (east) side of the Courthouse building and includes a consolidated entry / exit lobby, provides upgraded access to the upper stories of the Courthouse via four elevators and two separate stairways and includes two accessible bathrooms on each level through the 8th floor. The addition comprises 37,712 square feet overall with a 5,646 square foot footprint. The addition will be 139'2" in height (the Courthouse is 197' in height).

Currently all entry into the County Courthouse is through a small door and narrow hallway off of College Street. With this proposal, the main point of entry remains along College Street but will be enlarged to provide an entry vestibule (offering refuge during inclement weather), upgraded areas for security guards and a separate security office, entry points with two metal detectors and an handicapped accessible gate and an adjacent exit area. This consolidated ground level entry/exit lobby enhances security options for the Courthouse in a way to make for more efficient check-in and allows guards to monitor all coming and going from the building.

The existing plaza along College Street will be significantly enhanced and enlarged with benches, increased landscaping, pedestrian pathways, brick pavers and monumental steps leading up to the entry lobby. These improvements will aid in providing clear visual direction to pedestrians as to where to access the Courthouse as well as offering public gathering spaces. Sidewalks directly along College Street will remain less than the required 10' in width to preserve existing mature street trees but other larger, accessible pedestrian pathways are integrated throughout the plaza.

The applicant is requesting a modification to required landscaping requirements for street trees along Davidson due to existing utility and right-of-way constraints.

This project proposes the permanent closure of a portion of Davidson Street to private vehicles. Plans show the street as privately maintained and accessible only to police and associated personal via a security gate at the southern intersection with Marjorie Street and a smaller, diverted "exit-only" at College Street. While the life safety addition expands into the existing Davidson roadway, the resulting private street will remain wide enough for emergency fire access to the jail building. This action requires a separate review process, approved by City Council. This proposed closure has given City staff an opportunity to begin assessing the potential benefit of seeking out another connection in the vicinity, such as extending the Valley Street right-of-way for a future connection back into South Charlotte Street.

The applicant has provided a tentative construction plan and timeline, indicating 18-months to complete construction of the Life Safety Addition. Intent to submit a Phase II has been expressed, which would include a new structure fronting along College Street, spanning across the Davidson opening. The Phase II project would likely significantly alter the appearance of the entry and plaza and will require review by the Downtown Commission, TRC, P&Z and City Council.

The design for this project was reviewed and unanimously approved by the Downtown Commission on March 12, 2010. Additionally, The Buncombe County Courthouse (1927-1928) is listed on the National Register of Historic Places and the proposal follows the guidelines set forth by the Secretary of the Interior's Standards for new exterior additions to historic buildings (Chapter 14). The Commission granted a modification to increase setback from College Street to align with the façade of the existing Courthouse building and to provide more area for the enhanced public plaza. The Commission review also included demolition of the Courthouse Annex building, located at 189 College Street, with the applicant proposing to use that lot for staging and lay-down of materials during the construction process. The Commission did not support the demolition of this structure, asking for an alternative site to be used and/or for the building to remain standing until the future Phase was imminent. *The demolition of 189 College Street is not shown in the current plans submitted by the applicant.*

The Technical Review Committee evaluated this request on May 3, 2010, and it was approved with conditions. No opposition has been received as of the writing of this report. The Planning & Zoning Commission unanimously recommended approval of this proposal at their regular meeting on June 2, 2010. There was no public comment.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements and can be regarded to actually improve the public health and safety by providing improved access to and from the courthouse building. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate**

vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
The proposed development of the land is compatible with the topographic features on the site. There is a slight grade change (13') from north to south which is mitigated by the installation of a retaining wall along the Davidson ground-level frontage (similar to the existing conditions) and accommodated at College Street through the plaza design and monumental steps leading pedestrians to the entry point.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
The development is not expected to injure the value of adjoining or abutting properties. The use enhances and improves the existing government and public safety functions along this block (all adjoining and abutting parcels are owned by the County).

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The proposed development is compatible with the Buncombe County Courthouse in design and character. The proposal follows the guidelines set forth by the Secretary of the Interior's Standards for new exterior additions to historic buildings (Chapter 14) and the addition is not visible from Pack Square Park. The addition is appropriate to the area, which has evolved as a governmental "campus" location for City and County uses.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The *Asheville City Development Plan 2025* makes specific references to the importance of historic preservation and its role in smart growth (p. 80). The proposed life safety addition makes it feasible for the County to continue operating in the National Register Courthouse building, make use of inaccessible upper stories and keep these governmental functions in their historic, downtown location.

   Both the *Downtown Asheville Center City Plan* and the *Downtown Master Plan* stress that having a mix of uses – which includes civic (governmental) – is and asset and vital for the strength of downtown. Specifically, the City and County services are essential to bringing people downtown, providing employment and reinforcing downtown's status as the center of the region. The *Center City Plan* states that it is important to consolidate governmental uses to the existing "campus" location (p. 60-61).

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
This proposal is located near major road facilities and along multiple City bus routes in the walkable Central Business District. In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City Traffic Engineer and it should not cause undue traffic congestion along the existing street infrastructure. The anticipated traffic is expected to be less than one hundred (100) vehicles per hour during the morning and afternoon peak hours during a typical weekday, no traffic impact statement is warranted.

The proposed permanent closure of Davidson Street between College Street and Marjorie Avenue poses no significant impact for motor vehicle access. Both College Street and Marjorie Street will be accessible from Valley Street. The proposed gate for Davidson Street north of Marjorie Street is set back such that typical queuing for its operation will not interfere with Marjorie Street traffic flow.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Provides needed safety upgrades to the Buncombe County Courthouse building, prolonging the usability of this iconic historic structure.
- The permanent road closure improves security around the jail and courthouse areas.

Cons:

- Although more of a consideration than a concern, the future phase as shown on the master plan will dramatically alter the appearance of the current proposal (both structure and plaza) as seen from College Street.
- A permanent road closure slightly diminishes public vehicular access to this area of downtown, although this could easily be offset by modifications to other area road connections that could be considered in the future.

Staff recommends approval of the conditional zoning request as submitted by the applicant, including the modification to eliminate street trees along the Davidson frontage.

Assistant Buncombe County Manager Jon Creighton explained that this life safety addition will allow them to modernize the Courthouse. It will also allow them to use all the floors, which presently anything above the 10th floor is not in use. In the long-term the addition will give them a public entrance off College Street.

Mayor Bellamy closed the public hearing at 6:12 p.m.

City Attorney Oast said that the closure of Davidson Street will be coming back to City Council. He said that Council's vote on this conditional zoning should not affect Council's vote on the road closure, which is subject to separate consideration.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Newman moved for the adoption of Ordinance No. 3881, to conditionally zone the Buncombe County Courthouse life safety addition located at 60 Court Plaza from Central Business District to Central Business District/Conditional Zoning for the construction of a 33,542 square foot addition to the existing courthouse building and associated roadway reconfiguration with the approval for the landscape modification, to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Smith and carried unanimously.

V. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3882 - ORDINANCE ADOPTING FISCAL YEAR 2010-11 ANNUAL OPERATING BUDGET

Director of Administrative Services Lauren Bradley said that this report presents the Fiscal Year 2010/2011 Annual Operating Budget for adoption by City Council.

The Fiscal Year 2010/2011 Annual Operating Budget was formally presented to City Council on May 11, 2010. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on May 14, 2010, and May 21, 2010. City Council conducted a public hearing on the budget on May 25, 2010.

Budget Adoption

The net proposed FY 2010/2011 operating budget totals $136,095,766 and includes a General Fund appropriation of $91,635,962. There have been no changes to the Proposed Budget since it was presented to City Council on May 11th. The Proposed General Fund Budget is balanced with an Ad Valorem tax rate of $0.42 per $100 of assessed value, which represents no change from the current year tax rate. The Proposed General Fund budget also includes no appropriation from the City's fund balance. All essential City services are continued in the Proposed Budget.

Budget Ordinance Additions

Since the proposed budget was presented to City Council, based on recent developments, staff has identified two areas that warrant additional detail and clarification:

(1) 5% Sullivan Act Projects: As Council is aware, in FY 2009-10, the City received authorization from the State General Assembly to begin transferring up to 5% of Water Fund revenues to the general capital improvement program to fund water-related infrastructure projects. The City transferred the full 5% in FY 2009-10, which provided $1,657,481 in funding. At the June 8, 2010, meeting, Council approved the appropriation of $87,440 from this $1.66 million to cover the cost of installing concrete curb along Dogwood Grove Road. Therefore, the amount of Sullivan Act funds available to be carried over to FY 2010-11 total $1,570,041. Based on Council direction, an additional 1% of Water Fund revenue, totaling $341,000, will be transferred in FY 2010-11, which will bring the amount of Sullivan Act funds available in FY 2010-11 to $1,911,041. The budget ordinance includes authorization to make the following appropriations from this $1.9 million: 1) $1,710,000 for various infrastructure upgrades along Azalea Road, and 2) $110,000 for stormwater improvements along Ridge Avenue. The table below summarizes Sullivan Act funding and projects to date.

Revenue:	
FY 2009-10 Water Fund Transfer	$1,657,481
FY 2010-11 Water Fund Transfer	$341,000
Total Revenue	$1,998,481
Projects:	
Dogwood Grove (approved June 8)	$87,440
Azalea Road	$1,710,000
Ridge Avenue	$110,000

Total Projects	$1,907,440
Balance	$91,041

(2) Non-profit permit fee for special events: At its meeting on May, 25, 2010, the Asheville City Council affirmed that providing support to community events and programming is beneficial to the city of Asheville and serves a public purpose through economic and community development. As such, Council adopted a non-profit fee level, representing 75% reduction in any permit fees associated with producing an event on public property, which will take effect in FY 2010-2011. This fee will be available to any 501(c) organization recognized by the IRS. Staff has amended the Fees & Charges manual to reflect this addition.

(3) Capital Improvement Plan Street and Sidewalk Improvement Fund: Since the May City Council budget worksession, staff has been showing an allocation of fee-in-lieu of funds in the annual sidewalk program budget. However, the original proposed budget document did not reflect this appropriation. Staff has corrected the budget ordinance to include $143,000 from fee-in-lieu of funds in the annual sidewalk program budget. These funds will be applied consistent with the Council-adopted Pedestrian Thoroughfare Plan.

This action complies with the Fiscal Responsibility focus area of City Council's Strategic Operation Plan in the following ways: (1) Operate the City of Asheville's organization to the highest fiscal responsibility; (2) Ensure financial accountability by matching resources with strategic initiatives and creating meaningful performance measures; and (3) Sustain a healthy fund balance in accordance with recommended State standards.

Pros:
- Ensures City's compliance with North Carolina General Statutes that require local governments to adopt a balanced budget ordinance by July 1 of each year
- Proposed General Fund Budget is balanced with no tax rate increase or fund balance appropriation and all essential City services are continued

Con:
- None

As noted above, the Proposed FY 2010/2011 General Fund budget is balanced with no fund balance appropriation. Based on year-end projections for the current fiscal year and the planned expenses for FY 2010/2011, staff is estimating that at the end of FY 2010/2011 fund balance in the General Fund will equal 14.5% of expenses.

Staff requests that Council review the FY 2010/2011 Annual Operating Budget, including the changes noted above, and make necessary recommendations or adjustments followed by adoption of the Budget Ordinance.

Mayor Bellamy said that after speaking with City Manager Jackson and Ms. Bradley she asked them to report back to Council any remaining balances in our capital projects. That will come back to Council with staff's quarterly report in September. She hoped that Council would support her request to add any of those cost savings towards sidewalks because they are important to our community. She also noted that staff will report to Council in late July about our sidewalk maintenance policy.

Director of Transportation Ken Putnam responded to Councilman Bothwell by explaining how the amount per linear feet for sidewalks varies from $20 to $100. Councilman Bothwell noted that $1.6 Million will build approximately 4 miles of sidewalks.

Mayor Bellamy said it was appropriate for citizens to petition their government for priorities within their community. With that said, and since Tunnel Road is a state road, she

asked Council, after the motion for approval of the budget, to ask the N.C. Dept. of Transportation (NC DOT) to install sidewalks in east Asheville on Tunnel Road. The request is coming to Council as a need identified by our community, which is no different than asking for Metropolitan Planning Organization dollars for sidewalks on Hendersonville Road. City government can't meet everyone's needs at the same time; however, as the demands for City services grow, ways of paying for those services are diminished. She felt it's time for a conversation about a bond referendum if we can't get other funding sources to pay for the large ticket items. We must think about who we want to be as a City as we are the largest city in Western North Carolina with a nighttime population of 76,000 and a daytime population of 150,000. Council doesn't want to raise property taxes, but people want increased services - we are at a crossroads. We must continue our conversation with the County Commissioners and look within ourselves to see what we need to do to meet the growing demand of our citizens. She felt we must plan for Asheville's future. There have been some items in this budget she has not agreed with, but it's about the budget as a whole. She thanked Council for identifying early that property taxes would not be raised during this economic climate and thanked the management team for creating a budget that still meets the needs of the community. She will support the budget with the mind that she wants to see increased funding for sidewalks and look for creative ways to do that. At the same time she would like to see increased funding for affordable housing, but we have to talk about where we want to go as a community. We must work with our partners to see how we grow and meet the needs of our citizenry who want to be a cleaner, greener, affordable, safe, sustainable, fiscally responsible city. We need to do it in a transparent way that doesn't break the backs of the people who live in our community.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3882, with the three modifications outlined above by Ms. Bradley. This motion was seconded by Vice-Mayor Newman.

Regarding sidewalks, Vice-Mayor Newman urged people who want sidewalks to continue to speak up and make the case for it being a priority for City Council. However, there are other places we need to work together on to get funds for sidewalks. The City has a role to play with their General Fund, but sidewalks are transportation and a lot of transportation funding in North Carolina happens through the state. Plus, the City has used Community Development Block Grant funds for sidewalk funding. He encouraged representatives to attend the Metropolitan Planning Organization (MPO) meetings to speak up for pedestrian safety, noting that the City has tried to re-program some of the priorities of the MPO to be more supportive of sidewalks.

Councilwoman Manheimer said that when you look at the size of our budget (after cutting $5 Million) there is not much left for capital improvements. We have taken approximately $1.6 Million (maximum 5% from our Water Utility Fund) to allocate toward capital improvement projects that meet the criteria for those funds. To get an idea of what one road project costs the City is the Azalea Road project which is approximately $1.6 Million. She agreed with Mayor Bellamy that bonds make more sense to fund some of these projects comprehensively. She agreed that we do need sidewalks, but it needs to be put in perspective in dealing with an economic crisis.

Councilman Bothwell noted that the addition to the water rate pulls in money from Buncombe County residents on the City's water system to help pay for sidewalks.

Councilman Smith felt Council has decisions to make – lower City services or find different ways to find new revenue streams. We are seeing some lower community services since we had to cut $5 Million from this budget. He too supported Mayor Bellamy's thoughts for a bond referendum for capital improvements.

In response to Vice-Mayor Newman, City Attorney Oast said that City Council has held the required public hearing and the statutes set out a particular process. In view of that process, it would be his opinion that any public comment at this time would be out of order.

The motion made by Councilwoman Manheimer and seconded by Vice-Mayor Newman carried unanimously.

ORDINANCE BOOK NO. 26 - PAGE 244

Mayor Bellamy said that because of the outcry from residents for sidewalks on a portion of Tunnel Road in east Asheville, she asked if Council would be willing to show their support for the request by adopting a motion asking staff to prepare a resolution (to be brought back to Council for action) directing the Mayor to sign a letter asking the NC DOT to fund that request for sidewalks.

Councilwoman Manheimer moved to ask staff to prepare a resolution (to be brought back to Council for action) directing the Mayor to sign a letter asking the NC DOT to fund that request for sidewalks. This motion was seconded by Councilman Bothwell.

When Mayor Bellamy asked for public comment, no one spoke.

Vice-Mayor Newman was concerned that Council is being asked to take a position on a specific sidewalk project without it being on the formal agenda. He did support sidewalks on Tunnel Road, but he also supports them on Patton Avenue, Sweeten Creek Road, and other state roads that are high priorities in our Pedestrian Plan. He felt we need to think through what is the best way to be most effective in terms of our relationship with the NC DOT.

In response to Vice-Mayor Newman, Mayor Bellamy said that she has previously asked City Manager Jackson to prepare information on sidewalks, including our priority sidewalk projects, updates on our current sidewalk projects, etc. for Council discussion at the August 10 meeting. Since City Council is slated to hold a community meeting in East Asheville at the end of August she felt it would be appropriate for Council to hear the information first in order to provide feedback.

Councilman Smith supported sidewalks all over the City, but was concerned that this request is outside the process of getting items on Council's agenda for a vote.

Mayor Bellamy felt that since Ms. Bradley's e-mail to City Council regarding budget modifications included sidewalks, she felt it was appropriate to bring the subject up at this meeting. During the budget discussion earlier she noted that she would be asking for Council's support for NC DOT to install sidewalks on Tunnel Road since Tunnel Road is a state road. She felt this was not out of the norm in that Council routinely asks staff to follow-up with actions – noting this is only asking staff to craft a resolution for Council consideration at a later meeting. She questioned how we can direct staff to at least craft a resolution if Council doesn't vote on it.

Councilman Davis said that he and Vice-Mayor Newman are the City's MPO representatives and they meet with our Director of Transportation and our Public Works Director on a routine basis prior to their MPO meetings. He felt a good topic at that meeting might be to review the City's priorities.

Mayor Bellamy agreed that asking the MPO to consider this project is good; however, because this is specific to Asheville she felt Council should take a position on this issue. Instead of a motion, she asked for the majority of Council to support asking City staff to prepare a resolution to come back at Council's July 27 meeting. She saw no problem with the City of Asheville, who represents citizens, in asking the NC DOT to construct sidewalks in east Asheville.

Public Works Director Cathy Ball and Director of Transportation Ken Putnam responded to Councilwoman Manheimer when she questioned if we would be harming other sidewalk projects if we ask the NC DOT to fund this one.

The motion made by Councilwoman Manheimer and seconded by Councilman Bothwell, to ask staff to prepare a resolution (to be brought back to Council for action) directing the Mayor to sign a letter asking the NC DOT to fund that request for sidewalks, failed on a 3-3 vote, with Mayor Bellamy, Councilman Bothwell and Councilwoman Manheimer voting "yes" and Vice-Mayor Newman, Councilman Davis and Councilman Smith voting "no."

Regarding process, Mayor Bellamy said that the pedestrian walkway bridge at Hillcrest Apartments was not on the printed agenda; however, because there was request from the community to get that addressed, it was added to the agenda. However, as she understands it from Council, and to be clear of the process going forward, Council will discuss only what is on the printed agenda.

Councilman Smith felt that if Council is bringing something for a vote and they may need more information on it before casting their vote, it may be more helpful to have that information in advance. He did, however, appreciate Mayor Bellamy bringing up the Hillcrest pedestrian bridge at this meeting due to the urgency. Otherwise he would not have requested it.

Mayor Bellamy stressed that the motion was to ask staff craft a resolution only and that the resolution would be brought back to Council for a vote. The issue with the Hillcrest pedestrian bridge was directing staff to proceed with a specific process, so she was not sure if the issue Council is concerned about is process related or a larger issue.

Because Mayor Bellamy felt this issue is important, she would request two other members of Council to support bringing a resolution forward on an agenda, which resolution she would craft herself.

At this time, Mayor Bellamy announced a short break.

B. RESOLUTION NO. 10-149 - RESOLUTION AMENDING THE DOWNTOWN DEVELOPMENT AGREEMENT TO EXTEND IT FROM JULY 1, 2010, TO DECEMBER 31, 2010, INCLUDING AN EXTENSION OF THE OPTION TO PURCHASE 51 BILTMORE AVENUE FROM JULY 1, 2010, TO DECEMBER 31, 2010, AND AN EXTENSION OF THE OPTION TO PURCHAS THE HOT DOG KING PROPERTY FROM JULY 1, 2010, TO OCTOBER 31, 2010

Public Works Director Cathy Ball said that this is the consideration of a resolution amending the Downtown Development Agreement to extend it from July 1, 2010, to December 31, 2010, including an extension of the option to purchase 51 Biltmore Avenue from July 1, 2010, to December 31, 2010, and an extension of the option to purchase the Hot Dog King property from July 1, 2010, to October 31, 2010.

In October 2008, City Council approved a Downtown Development Agreement with McKibbon Hotel Group, Public Interest Projects and the City of Asheville for the purpose of constructing a parking garage. The design of the parking garage is complete. The architect is in the process of applying for all applicable permits.

As designed, the project consists of the following:

- four hundred ten (410) parking spaces;
- public restrooms;
- four (4) parking spaces for electric vehicles;
- ten (10) bike lockers; and,

- public art component.

In June 2009 and again in November 2009, City Council extended the Downtown Development Agreement (DDA) to June 30, 2010. The current DDA does not allow for an additional extension. Staff is requesting an amendment to the agreement to include another six months. The prior extensions were necessary because McKibbon Hotel Group has not been able to obtain funding due to current economic conditions. In recent months, McKibbon Hotel Group (MHG) is closer to obtaining financing for their portion of the project.

MHG wants to eliminate 28 rooms of the proposed hotel (the top floor). She provided a revised rendering of the project. As a result of this change, MHG would need 28 less parking spaces freeing spaces for public parking.

The Hot Dog King (HDK) property owners have agreed to decrease the cost of the option to purchase the property. The City has been paying $10,000 per month for the option to be applied to the purchase price. The HDK has agreed to $10,000 for 120 days but will not extend the option beyond that time.

This project is in alignment with the Strategic Plan by promoting sustainable, high-density, in-fill growth that makes efficient use of resources and by making environmentally efficient capital improvements. In addition, this action complies with the Parking Action Plan adopted by City Council.

Pros:

- According to the findings of the downtown parking study, this area has a deficit of public parking. This parking garage would address this need.
- Project should allow the development of workforce housing more feasibly due to reduced capital requirements for constructing private parking which in turn supports lower priced housing units.
- Capitalize on relationship with mixed use developer who is willing to partner with the City and make private property available for public use.
- Offer the opportunity to leverage public parking as an economic development tool.
- Offers community benefits such as additional jobs and tax base for the City created by the mixed use elements.
- Public parking helps sustain existing investments and future growth of retail and office uses in the area.
- Public parking is critical for downtown office job expansion.

Cons:

- Public-private partnerships tend to be complicated and require additional coordination between the City and the private sector than traditional stand-alone projects.
- Specific performance guarantees must be made by the City to third parties. Corresponding grantees are required of the developer to the City regarding the quality and sustainability of the mixed use components.
- The cost of the land is higher than the appraised value. Originally the owner did not want to sell the property but rather lease the property to the City for sixty years. After the City determined that it was a better financial decision for the City to purchase the property, the owner agreed to sell but with the restriction that they recoup the capital gains taxes.

The cost to extend the option for the property at 51 Biltmore Avenue for an additional six months is $5,000 and $10,000 for the option for the HDK for 120 days from July 1, 2010. The budget for these expenses is in the Parking Services Capital Project Fund.

Staff recommends City Council adopt a resolution amending the Downtown Development Agreement to extend it from July 1, 2010, to December 31, 2010, including an extension of the

option to purchase 51 Biltmore Avenue from July 1, 2010, to December 31, 2010, and an extension of the option to purchase the Hot Dog King property from July 1, 2010, to October 31, 2010.

Mr. Wes Townsend, representing McKibbon Hotel Group, said that the hotel business is improving. He explained they now have a signed term sheet from a lender and down to essentially one major item that needs to be resolved – the loan to cost ratio. With this extension, their goal is to complete the legal work necessary to close on the transaction, complete the financing commitment and revise the plan slightly as outlined by Ms. Ball.

Mr. Pat Whalen, representing Public Interest Projects, was excited to still be a part of this project and was pleased that it will bring parking to that part of the downtown that the City's study shows we have a parking shortfall. He hoped Council would support the extension.

In response to Councilman Bothwell, Ms. Ball said that there are several different components of the project. The City spent $400,000 on the design portion, but there have been other components such as the option to purchase the HDK property, as well as having an owner's representative that has provided oversight on the design of the parking garage.

In response to Councilman Bothwell, Ms. Ball said that the parking deck will have 411 parking spaces which includes parking for the hotel. In the Downtown Development Agreement we have specified that there would be 35 dedicated parking spaces and an additional 115 spaces as needed, but those spaces would also be available for the public when there was no need for them from the hotel. Because of the change in the number of rooms, it would be around 87 parking spaces that may be needed, but would not be dedicated to the hotel.

In response to Councilman Bothwell, Ms. Ball said that we currently have 100 surface spaces, but the City's concern is if Public Interest Projects (owner of that lot) decides to do a different project we would lose those 100 parking spaces.

Ms. Ball responded to Councilman Davis when he asked what our options would be when the option with the HDK property runs out on November 1.

Councilman Smith said that as we look to the future with our Downtown Master Plan which calls for a shuttle services that moves people around downtown and our Transit Master Plan, he hoped to see a move towards a more 21st Century way to get people into downtown and move them around once they get there. He wondered if there was a way to dedicate some of this revenue from the parking garage towards the future of Transit Master Plan or the Downtown Master Plan.

Ms. Ball said that all indications point to us getting a better pricing if we move forward on the parking garage now. She felt we need to look at a combination of parking and shuttle services together and if Council wants to move forward with serious consideration of a shuttle service, then she felt we need to do a feasibility analysis. She provided Council preliminary numbers on a shuttle service.

Councilman Bothwell explained why he could not support the extension in that this project will take all of the parking fund monies for 10 years. He also noted that we are already having to deal with financing issues from the Grove Arcade Public Market Foundation and the Pack Square Conservancy.

Councilwoman Manheimer said that having made a decision that we need more parking downtown, this is the best option for us.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-149. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Bothwell voting "no".

RESOLUTION BOOK NO. 33 – PAGE 108

VI. NEW BUSINESS:

A. MOTION TO DISCONTINUE PRODUCTION OF THE ASHEVILLE FILM FESTIVAL AND PRIVATIZE THE OPERATIONS BY ALLOWING THE EVENT TO BE PRODUCED ON THE OPEN MARKET AT NO COST TO THE CITY AND WITHOUT THE CITY PROVIDING ANY RESOURCES FOR THE PRODUCTION OF THE EVENT

City Manager Jackson said that the budget City Council adopted did not recommend staffing and continuing to produce the Asheville Film Festival. Even though we regret discontinuing the Festival, we are here to provide core services. Staff recommends City Council discontinue the operation of the Asheville Film Festival and direction on how we dispose of the festival service mark and logo.

Assistant Director of Parks, Recreation and Cultural Arts Debbie Ivester said that the Asheville Film Festival (AFF) began in 2003 to showcase western North Carolina as a strong film location and as a film festival destination for filmmakers and visitors while celebrating the development of emerging and established artists in the filmmaking industry. At that time, Asheville was home to Blue Ridge Motion Pictures Studios and had built a strong film and arts community, including the Asheville Film Commission, the managing group of AFF under the direction of the Asheville Parks, Recreation, and Cultural Art Department. Since then, the AFF has not met its responsibility as an enterprise fund by operating at a deficit.

The City's intent is to optimize production of festivals including Bele Chere, 4th of July and AFF as an enterprise fund by providing resources to support the events while securing revenue to offset the cost of event production. Recent economic conditions and budget constraints have reduced revenue particularly in corporate sponsorship resulting in budget reductions to support the events.

Even in good economic times AFF has experienced the greatest reduction in resources since potential sponsors increasingly do not find AFF a good match for their investment. Sponsorships have consistently decreased each year, resulting in an ever increasing shortfall in revenue and greater reduction in operating budget.

She provided a seven-year financial table which reports the actual AFF budget demonstrating a pattern of revenue reduction, along with reduction in expense as a means to minimize the City's subsidy while attempting not to negatively impact the quality of the event. The FY 2010 event shows a sharp decrease in actual revenue since sponsorships fell off sharply due to the added factor of the poor economy. The expenses were also significantly decreased that affected the quality of the event.

As a result of the AFF seven-year City subsidy pattern, and the need to manage corresponding expenses that impact the quality of the event, staff recommends City Council to make a policy decision regarding the future of the AFF.

Policy Questions

Staff is seeking Council's policy direction on choosing one of the following options:

1) City continues to produce AFF in house by city staff and continue to subsidize the operational budget loss of the event.

2) City discontinues production of AFF and privatize the operations by allowing the event to be produce on the open market at no cost to the City and without the City providing any resources for the production of the event.

   If Council chooses to discontinue producing the event, Council could assign or lease the AFF U.S. Service Mark and Logo to another party. Council could also sell the Mark and Logo to another organization or individual by:
   1) private negotiation and sale (if mark valued less than $30,000)
   2) advertisement for sealed bids
   3) negotiated offer, advertisement and upset bid
   4) public auction; or
   5) exchange

In 2003 the City purchased the rights to the AFF U.S. Service Mark and Logo for $5,000 from Tommy and Kathy Hildreth.

Pros:

- If Council chooses to discontinue producing the AFF in house and allow it to go on the open market for production:
  - AFF may expand beyond the City's capacity to produce the event and gain a greater community benefit.
  - The City will no longer subsidize AFF operations resulting in a budget benefit.
  - Festival staff will have the ability to dedicate their time and resources to other City produced festivals and special events.

Cons:

- If Council chooses to discontinue producing the AFF in house and allow it to go on the open market for production:
  a. There is no guarantee that someone from the community will produce the event.
  b. The City will have no operational control of the event.

- If Council chooses to continue to produce the AFF in house:
  a. Establish an annual operating budget at approximately $130,000 to support a quality event at a level valued by the community.
  b. The City will continue to subsidize the AFF.
  c. There will be no AFF in 2010 and it would resume in 2011.

If Council chooses to discontinue producing the AFF in house and allow it to go on the open market for production, it is projected there will be no fiscal impact to the City.

If Council chooses to continue to produce the AFF in house, Council will need to amend the Festival Fund budget to add approximately $130,000 to support AFF operations, and be prepared to subsidize the event on average at 70% each year.

Staff recommends discontinuing City production of the AFF and seeks City Council policy decision regarding the disposition of the AFF U.S. Service Mark and Logo.

Mr. Tom Anton said that he is creating the Asheville International Film Festival which will start in September of 2011. It will be a 10-day event primarily held downtown. They are not interested in obtaining the logo or the website, or any funding from the City. This will be a private event.

Rev. Christopher Chiaronmonte thanked City Council for their support of the Film Festival in the past.

Mr. Andre Gower, representing Cinema South, hoped we could find an alternative avenue to show just what Asheville has to offer as a premiere destination. Cinema South was created to develop and operate the best film festival in the southeast and with its unique ability to combine local relationships with decades of film industry experience, it allows him to achieve the essential components for a successful film festival. He felt that with the access to knowledge and resources, his team is able to put together a program of events and screenings that make its mark in the popular festival world and create the new exposure needed for the lucrative production value of WNC and the state.

Councilwoman Manheimer moved to discontinue production of AFF and privatize the operations by allowing the event to be produce on the open market at no cost to the City and without the City providing any resources for the production of the event. This motion was seconded by Vice-Mayor Newman and carried unanimously.

In response to Vice-Mayor Newman, City Attorney Oast said that Council can leave it up to staff to determine the best way to dispose of the non-real property from the options outlined above. He also noted that once staff determines the best option it may come back to Council for final approval.

Councilman Davis felt we need to be careful in the disposition of the logo in that we have spent quite a bit of money over the years into developing a festival. If the trademark is assigned to another party, we need to make sure that person makes it the festival we hope it would be. It is a service mark worth protecting.

Vice-Mayor Newman said that if we allow staff to take this to the next step, it should be with the understanding that if there is interest amongst one or more parties to continue build a successful film festival (and we hope that will happen) that the City taxpayers get as much value for our investments and work put into it to date.

At Mayor Bellamy's suggestion, it was the consensus of Council to instruct City staff to propose a plan of action and bring it back to Council so Council feels comfortable with that direction.

Councilwoman Manheimer moved to direct staff to determine the best way to dispose of the non-real property. This motion was seconded by Vice-Mayor Newman and carried unanimously.

Mayor Bellamy thanked Ms. Sandra Travis for her work with the Film Festival and especially her work on the Memorial Day event.

B. MOTION TO RESTRUCTURE THE GROVE ARCADE PUBLIC MARKET FOUNDATION'S CERTIFICATES OF PARTICIPATION PAYMENT

Assistant City Manager Jeff Richardson said that this is the consideration of restructuring the Grove Arcade Public Market Foundation's Certificates of Participation payment.

At its May 18th meeting, staff provided the Planning and Economic Development (PED) Committee information relating to the Grove Arcade Public Market Foundation's (GAPMF) yearly COPs payment to the City of Asheville. Given a number of financial challenges facing the Foundation (such as capital improvements and a tough economy), the Foundation may require additional assistance from the City of Asheville to continue to operate effectively.

The City of Asheville acquired the title to the Grove Arcade building in 1997 under the National Monuments Act and signed a 198 year lease with the GAPMF. This restored building includes shops, restaurants, offices, 42 luxury apartments, and provides 78 full-time and 111 part-time jobs, making it Western North Carolina's largest commercial building. Since the 1997 agreement, there have been challenges in the GAPMF business plan, but in general the Foundation has performed well.

The GAPMF approached the City of Asheville in the summer of 2009 with concerns of fulfilling their yearly debt obligation. With the exception of the 2007 payment being deferred, the Foundation has made all payments in full since the inception of the loan. The GAPMF made a presentation to the City's PED Committee on June 15, 2009, outlining on-going debt load and capital maintenance concerns at the Grove Arcade. The PED Committee directed City staff to explore options of restructuring the COPs payment to relieve their debt load concerns. As follow-up, City staff updated the PED Committee on May 18, 2010, and presented COPs payment restructuring options to include crediting Asheville City property and sales tax revenue generated from the property as a direct credit toward the yearly debt service payment.

However, due to other pending capital maintenance needs, to include roof replacement and terra cotta restoration, the tax credit may not lower the payment to a level that the building's cash flow will be able to meet over the next 3-5 year period. Therefore, the PED Committee recommended that additional analysis continue and additional options be presented to the City Council.

The GAPMF aligns with City Council's focus area of Affordable, specifically by supporting diversified job growth and small business development.

Pros:

- The GAPMF continues to support the rehabilitation of pocket areas in the central business district to enhance dense urban development and principles of highest and best use land management.
- Due to the ongoing success of this project, the City has successfully brought the largest dilapidated building in the central business district back to full restored use, with direct tax revenues to the City and to Asheville City Schools, totaling over $70,000 per year.

Cons:

- Debt load restructuring may be perceived by some citizenry as government subsidized loan restructuring because they may not fully understand the public/private partnership.
- State Statutes do not require any consideration for local City funding for the Asheville City Schools district, and therefore school tax revenue credit is not a direct offset to the City's budget.

The debt service payment that the City is required to make on the COPs is included in the FY 2010-11 Proposed Budget. However, the Proposed Budget does not include any direct payment from GAPMF to the City to help offset the City's debt service expense. GAPMF has recommended consideration of a "contribution credit" toward the payment that they owe the City based on the property, sales, and Asheville City Schools tax revenue generated by the Grove Arcade building. In addition, GAPMF has reviewed its current cash flow, taking into account the need for dedicated funding to repair the roof of the building, and has determined that it can make a direct annual payment to the City of $50,000 over the next five year period. Further, it's contemplated that within the next five years, Progress Energy will divest from participation of the second through fifth floors and has committed final debt load payment to the City at that time.

City staff recommends that the City Council consider COPs payment restructuring options as presented by the GAPMF.

Mr. Scott Hughes, Treasurer for the GAPMF, provided Council with a brief history of the project which began on December 2, 1985, when the Mayor of Asheville established an ad hoc Committee for Preservation of the Grove Arcade and charged it with investing the feasibility of restoring the Grove Arcade to its original construction and its original use. From that initial vision a plan was set into motion to restore the Arcade to its former and now current grandeur. Over the years this has been the purpose and goal of the GAPMF. He then showed Council before and after pictures of the Grove Arcade. The Foundation secured Progress Energy as a partner for the project. The Foundation has a 99 year lease from the City for the entire structure. The Foundation controls the first floor commercial space while the upper floors (2-5) are subleased and operated by Progress Energy. Common costs of operations are allocated between the Foundation and its partner. Since renovation, the following items are what this asset has done for the City: (1) paid $1.3 Million dollars toward the COPS debt; (2) generated over $130,000 per year in ad valorem taxes; (3) become the cornerstone for economic development in the western business district of downtown; and (4) turned a $1 investment on behalf of the City into an asset forth over $25 Million. Intangibles include (1) creating 74 new fulltime jobs and 110 part-time jobs; (2) draws visitors to the building who are fascinated with its ornate architecture and curious about the design, original purpose and history of the building; (3) consists of primarily Asheville grown businesses; (4) provides free of charge to the public one of the only public restrooms in downtown Asheville which is open 7 days a week, when stores are open; maintenance is over $20,000 annually; (5) is a local gathering spot; (6) has inexpensive meeting spaces; and (7) has the Portico Market which supports local farmers and craftspeople with an appropriate space to sell directly to the public. Some flaws in the original business model include (1) risk associated with targeted tenant population; (2) time necessary to reach full occupancy; (3) cost overruns resulted in additional bridge loan from Progress Energy of $1.85 million on top of the COPS loan; (4) annual building maintenance costs were originally projected at $180,000 annually – currently they exceed $300,000 per year; and (5) original plan had 5 employees – currently we employ 1.5 employee. Post renovation points consist of (1) the cost of the entire project exceeded $31 Million – our first tenants occupied the first floor in 2002; (2) once full occupancy was achieved, rents have remained fairly constant at about $900,000; (3) over 25% of their annual budget goes to shared maintenance cost each year, another 10% of their annual budget goes to market the facility, and adding to that is personnel costs, utilities, annual audits, janitorial, etc. and there is no way to accumulate funds for major capital repairs. Their immediate capital needs consist of (1) as a result of numerous leaks, the Arcade is in desperate need of a ne roof at a cost of almost $1.2 Million; (2) additional funds are needed to restore and protect the terra cotta exterior at a cost of $450,000; (3) our share of these costs is approximately $500,000. These repairs need to be done immediately. The Arcade simply does not produce enough resources to cover major repairs, COPS payments and repayment of the Bridge Loan to Progress Energy. Three years ago we proposed the following options (1) re-amortize the debt over a longer period of time that more closely fits the cash flow the asset generates; (2) have the parties agree to some forgiveness of the debt between the Foundation and Progress Energy and the City that allows the same result; or (3) find a means to divest the asset to a developer that would allow for the satisfaction of the existing debts of the Foundation and our partner Progress Energy, including the COPs loan. In June 2009, they went before the PED committee to seek guidance on how to fund the debt and maintain the asset. The proposal tonight they believe is a result of collaboration between our board, City staff and Progress Energy. In summary, the proposal would allow GAPMF to contribute to the debt service $50,000 in cash each year plus the tax being paid to the City and the City schools, while also addressing the continuing maintenance needs of the Arcade. Progress Energy has assured City staff that should they divest themselves of the asset, repayment of the COPs loan will be the first proceeds disbursed. We believe this proposal gives us the opportunity to keep the Arcade in a good state of repair while making a more reasonable schedule of debt retirement based on current economic conditions.

Councilman Davis, Chairman of the PED Committee, thanked the Foundation for being stewards of this amazing treasure. The Foundation has actually be paying for what the City should have been paying for themselves.

Mr. Richardson and Mr. Hughes responded to various questions/comments from Vice-Mayor Newman and Councilwoman Manheimer regarding the loan repayment terms.

In response to Councilwoman Manheimer, Mr. Hughes said that the City's contribution was $200,000 for sidewalks.

Councilman Bothwell felt these repayment terms shift the tax burden to the rest of City taxpayers, because if we credit the GAPMF with the taxes they paid, we have to make it up in our budget. The City is actually paying for the loan. If we apply it to the balance, it's reducing the price Progress Energy has to pay if they buy it out.

Mr. Hughes said that of the $31 Million, the first floor portion was about $12 Million and the remainder has been put into the project by Progress Energy. In looking at the original amortization of this loan, the payoff in 2017 is very close to what the payoff would be if all payments were being paid.

Mayor Bellamy applauded this public-private partnership because the Foundation is taking care of a building that the City of Asheville committed to support for 198 years.

Councilman Davis moved to restructure the GAPMF's Certificates of Participation payment to allow GAPMF to contribute to the debt service $50,000 in cash each year plus the tax being paid to the City and the City schools, as detailed by Mr. Richardson. This motion was seconded by Councilman Smith and carried unanimously. Note: Councilman Bothwell did not vote on the motion before Council and that, by operation of law, the vote was recorded as being in the affirmative.

C. RESOLUTION NO. 10-150- RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

Vice-Mayor Newman said that the terms of Mr. Rhett Grotzinger and Mr. David Hillier, as members on the Airport Authority, expire on June 30, 2010.

At the City Council meeting on June 8, 2010, City Council reappointed Mr. Hillier to serve an additional four-year term, term to expire June 30, 2014, or until his successor has been appointed.

Also at the Council meeting on June 8, it was the consensus of Council to interview Mr. Phillip Kelley and Mr. Bob Roberts.

Vice-Mayor Newman, liaison to the Airport Authority, said that both candidates interviewed had excellent credentials and noted that there are additional opportunities for appointment to the Authority through the Buncombe County Commissioners and the Airport Authority itself.

Mayor Bellamy felt that the Authority needs more aviation background representation.

After Council spoke highly of the candidates, Phillip Kelley received 1 vote and Bob Roberts received 5 votes. Therefore, Bob Roberts was appointed as a member to the Asheville Regional Airport Authority to serve a four-year term, term to begin July 1, 2010, and expire June 30, 2014, or until his successor has been appointed.

RESOLUTION BOOK NO. 33 – PAGE 115

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Steve Holland, coordinator of the video production for Central United Methodist Church, but speaking on his on behalf, he supported public access television on Channel 20. He believed the Media Center provides resources to assist groups and individuals in producing local shows. He detailed the two major issues regarding public access (1) the current contractor who manages the channel; and (3) the issue of funding. In summary because the City's agreement with Buncombe County has expired, he asked Council to appoint a joint task force consisting of one member of City Council, a Buncombe County Commissioner, a City staff person, a County staff person and perhaps up to three members of the public to chart a course for public access. He outlined the responsibilities the task force could be charged with. Mayor Bellamy felt it was appropriate for Council direct staff to draft a response to Mr. Holland and those he is representing on the interlocal agreement with Buncombe County. City Attorney Oast said that he would review the extended interlocal agreement with Buncombe County and report back to Council. Mayor Bellamy asked City Clerk Burleson to place this in a tickler file for further discussion as to where we are as a Council, if clarification is needed.

Rev. Christopher Chiaronmonte urged Council to be more compassionate to the homeless who sleep in public parks.

Mr. Fred English spoke in opposition of toll roads.

Councilman Bothwell said that we have an under-used parking lot at McCormick Field and felt that if we had a shuttle service to that lot we could cover a lot of our parking needs in the City immediately. We might even get a private contractor to operate the shuttle. When Councilman Smith asked if Councilman Bothwell was asking for support to put this on an agenda to direct staff formally, he replied that would be fine. When Vice-Mayor Newman felt the Transit Commission should review this first, Councilman Bothwell agreed and Councilman Smith (liaison to the Transit Commission) said that he would get this on a Transit Commission agenda.

Councilman Smith was pleased to note that Asheville High and TC Roberson were named among two of the top high schools in the United States. Out of the 27,000 high schools in the United States both of these schools are in the top 1600 as ranked by Newsweek Magazine.

Mayor Bellamy invited the public to attend the Ingles 4th of July celebration and thanked Ingles for this public/private partnership.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:01 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – July 27, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Newman gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF STRIVE NOT TO DRIVE AWARD WINNERS

Mayor Bellamy was pleased to recognize the following award winners: (1) Leadership Award – Tom Knaust - REI. Tom has begun designing an all store commuter map that shows where folks live in order for it to be easier to carpool. He also teaches bicycle commuter classes at REI. He lives in North Asheville and walks and bikes for most of his daily routines. He currently commutes 30+ round trip miles to work; (2) Golden Spoke Youth Award – Juliana Accles – 2nd Grader. Juliana is finished 2nd grade at Claxton Elementary School this year. She has walked 1.5 round trip miles to school every day since Kindergarten, even in rain and sub-freezing temperatures; (3) Golden Spoke Award – Sarah Keister – Mission Hospital's Child Development Center. After carefully contemplating ("threatening" as co-workers and supervisors saw it) to walk to work in so many of the snows we had this winter because she didn't have All Wheel Drive, she figured it was time to put her shoes where her mouth was! So in March 2010, Sarah started walking five round trip miles to and from work. She teaches 2-3 year olds at Mission Hospital's Child Development Center four days a week. She gets up extra early for a 10 hour shift just to walk 45 minutes to get there. To Sarah this means exercise, time to meditate, spends less money on gas, eating out, or errands, and consequently a lower carbon footprint. A former through-hiker of the 2,174 mile Appalachian Trail, Sarah is no stranger to long distances. In fact, she would much rather spend one hour round trip per day "afoot" in Asheville than in a car; (4) Golden Spoke Award – David Mathews – 4th Grader. David has been riding his bicycle with his dad since he was 2 years old. He rides five round trip miles up Edwin Place and Kimberly Avenue and behind Ira B. Jones to get to Asheville Catholic School from his home off Charlotte Street. He earned this privilege by demonstrating to his Dad that he knows all the rules of bicycling on the road – riding with the flow of traffic, using appropriate hand signals, and obeying all stop signs and traffic lights. He rides with a helmet and a helmet-mounted mirror, a highly reflective jacket and a reflective triangle on his back, and front and rear "blinkie" lights. After seeing David ride regularly to school, the Principal authorized the purchase and installation of a bike racks, and now, at least two other students periodically ride to school; (5) Golden Spoke Award – Jonathan Felson – Grove Park Inn. Jonathan has consistently chosen to ride his bicycle, or walk, everywhere he goes. He chose to purchase his house in West Asheville based on its proximity to his educational endeavors at UNC-Asheville, his 10+ commute miles to work at the Grove Park Inn, and many social options within West Asheville and downtown...all of which are a close bike-ride away! He inspires others to live an eco-life, not by preaching, but by leading a good example! (6) Golden Wheel Award – Georgia Burt – YWCA. Georgia lives in East

Asheville and attends AB-Tech daily for classes and still makes it to the YWCA 2-3 times a week to work. She does all of this on the City Buses. She is a great role model for folks that think they can't move around the city without a vehicle; and (7) 2nd Annual PASSport Award - The winner of the challenge for the 2nd year in a row is The Grove Park Inn Resort & Spa with an increase of ridership during Strive Not to Drive week of 1.3%.

B. PROCLAMATION ACKNOWLEDGING THE 20TH ANNIVERSARY OF THE AMERICANS WITH DISABILITIES ACT

Mayor Bellamy read the proclamation acknowledging the 20th Anniversary of the Americans with Disabilities Act.

C. PROCLAMATION PROCLAIMING TUESDAY, JULY 27, 2010, AS "NATIONAL KOREAN WAR VETERANS ARMISTICE DAY"

Mayor Bellamy read the proclamation proclaiming Tuesday, July 27, 2010, as "National Korean War Veterans Armistice Day" in the City of Asheville. She presented the proclamation to Mr. Bill Lack who accepted the proclamation on behalf of all the Korean War Veterans.

D. PROCLAMATION PROCLAIMING TUESDAY, AUGUST 3, 2010, AS "NATIONAL NIGHT OUT"

Mayor Bellamy read the proclamation proclaiming Tuesday, August 3, 2010, as "National Night Out" in the City of Asheville. She presented the proclamation to Master Police Officer Allen Dunlap, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

Additions and changes to the Consent Agenda:

- Consent Agenda Item "D" was removed from the Consent Agenda for discussion and/or an individual vote.
- Consent Agenda Item "F" was removed from the Consent Agenda for discussion and/or an individual vote.
- Removal of Consent Agenda Item "G" per City staff's request.
- Consent Agenda Item "J" was removed from the Consent Agenda for discussion and/or an individual vote.
- Addition of Consent Agenda "K" to the Consent Agenda to support the City of Asheville hosting a regional afterschool summit on November 4, 2010, as well as offer facility space and any in-kind staff support required for coordinating a successful summit.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 22, 2010

B. RESOLUTION NO. 10-151 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH SUTTON-KENNERLY & ASSOCIATES INC. FOR THE DESIGN AND DEVELOPMENT OF PLANS, DRAWINGS, DETAILS AND SPECIFICATIONS FOR THE REHABILITATION AND WATERPROOFING OF THE EXTERIOR OF THE ASHEVILLE CITY HALL BUILDING SO AS TO MITIGATE WATER INFILTRATION

ORDINANCE NO. 3883 - BUDGET AMENDMENT TO PROVIDE FUNDING FOR THE SUTTON-KENNERLY CONTRACT AND FOR PROTOTYPE REPAIRS AND TESTING TO BE PERFORMED BY ANOTHER CONTRACTOR

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into a contract with Sutton-Kennerly & Associates, Inc. for the design and development of plans, drawings, details, and specifications for the rehabilitation and waterproofing of the exterior of the Asheville City Hall Building so as to mitigate water infiltration; and (2) a budget amendment from Fund Balance in the amount of $450,000 to provide funding for the Sutton-Kennerly contract and for prototype repairs and testing to be performed by another contractor.

The Asheville City Building is recognized throughout the country as an Art Deco masterpiece. Douglas D. Ellington, an architect who came to Asheville in the mid-1920s, designed the eight-story building, which was completed in 1928. Ellington stated that the design was "an evolution of the desire that the contours of the building should reflect the mountain background."

Over the last several years, the City of Asheville has implemented smaller repair and refurbishment projects to address water infiltration issues present on the upper floors of the building. However, when signs of major water infiltration became apparent, Asheville City Council approved Resolution Number 09-79 on April 28, 2009 authorizing a contract with Sutton-Kennerly & Associates to conduct an exterior inspection for water infiltration on Asheville City Building. The scope of this investigation was to evaluate the condition of the existing exterior of the building in an effort to determine the source of water leakage into the building, assess the existing condition of cladding materials on the building, and to develop recommendations for any repairs needed.

During the course of the investigation, scaffolding was erected on the north and south elevations of the building, and existing brick was removed from approximately 12 locations to evaluate conditions behind the brick veneer. In addition, several of the terra cotta sections were removed from the tops of the parapet walls at the corners of the building, as was one section of marble coping from the top of the parapet wall on the south side of the building. Council was provided the results of the investigation on March 9, 2010. Council authorized staff to develop a Request for Qualifications for the engineering and repairs to City Hall. Staff consisting from the Public Works Department, Purchasing, Sustainability Office, and Building Safety reviewed the submittal and recommend Sutton-Kennerly & Associates be awarded the contract.

The contract specifies that Sutton-Kennerly and Associates shall, in compliance with the North Carolina State Building Code, develop a comprehensive set of construction drawings, plans and specifications containing sufficient elevations and details so as to address the recommendations set forth in the 2009 Engineer Report conducted by Sutton-Kennerly & Associates, Inc., to mitigate water infiltration. The drawings shall be prepared in sufficient detail to define the construction as follows:

a. Sutton-Kennerly and Associates shall prepare the design and drawings of the rehabilitation which shall clearly define all structural components, member sizes, dimensions, reinforcing sizes, lengths and schedules, waterproofing details, and any other details as needed to define the work to be completed.

b. General notes indicating material specification requirements, special construction procedures, construction notes, and design loads.

c. Details and sections, as required, to clearly define the construction requirements

Due to the complexity and historic nature of this project, a prototype for some of the repairs will be completed during the design process. The cost of the contractor to perform the testing and prototype repairs is beyond the scope of the services to be furnished by Sutton-Kennerly and Associates. The cost of the contractor for the prototype repairs is a City responsibility but Sutton-Kennerly and Associates shall provide all required engineering services

for the prototype repairs. Sutton-Kennerly and Associates estimates the total contractor cost for the prototype repairs and testing shall not to exceed $100,000. The prototype repairs and associated testing will take approximately 45 days. Sutton-Kennerly and Associates shall assist the contractor with the testing for the prototype repairs. The areas where the prototype repairs are to be completed will be tested for leakage before completing the prototype repairs and retested after the prototype repairs have been completed. The purpose of the prototype repairs is to ensure the effectiveness of the repairs to be included in this work and to establish a standard for the work. The prototype repairs can also be reviewed by the City and other governing agencies before the design package is let for bids.

The estimated schedule of design and construction continues over several fiscal years. Sutton-Kennerly and Associates shall to the extent weather conditions allow, diligently pursue the project to completion no later than November 15, 2013. The types of repairs that will be required on the City Hall are of sensitive nature and cannot be completed during freezing weather. There will be periods when the project will be shut down to accommodate inclement weather. This will allow the project work to be phased. Additionally this will also allow time for the reproduction of any sections of the existing terra cotta that are beyond repair. The lead time for reproductions such as these is 8 to 12 months. Based upon properly performed research, the project work can be completed in three phase with two inclement weather shut downs between the three phases.

This project supports the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities.

Pros:

- The City Building is an architectural treasure and the crown jewel of Asheville. Restoration of the building is essential to the city's historic and cultural fabric.
- Approving the resolution authorizing the contract for construction and bid documents begins the project.
- Performing a small section of repairs and testing prior to complete restoration provides confirmation that the work mitigates the water infiltration and that the repairs meet the historic nature and preservation for the building.

Cons:

- Administering a project of this size and following through on implementation will require significant staff time.
- Funding for the project is not currently in the budget and could impact the city's finances in future years.
- A delay will further deteriorate the building and could threaten its structural integrity.

The costs for a professional design firm to develop the bid and construction documents and special inspections conducted by the engineers are $395,000. An additional $100,000 is also needed for the prototype repairs and testing firm; for a total cost of $495,000. The funds for this portion of the project are not in the current Capital Improvement Program and will therefore need to be appropriated from Fund Balance. During a subsequent Council meeting when Council takes formal action to award the contract for the actual construction, a budget amendment will be presented for the full cost of the entire project with funding to be provided by debt proceeds. Once debt financing is in place, the city will reimburse Fund Balance for the $450,000 in costs associated with design and prototype repairs and testing.

City staff recommends that City Council adopt a resolution authorizing the City Manager to sign the contract with Sutton-Kennerly & Associates Inc. and the future contract with the construction firm selected by Sutton-Kennerly & Associates for the prototype repairs and testing; and adopt the associated budget amendment.

ORDINANCE BOOK NO. 26 - PAGE 253

C. RESOLUTION NO. 10-152 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH RIVERTOP CONTRACTING INC. TO PROVIDE MAINTENANCE SERVICES FOR PACK SQUARE PARK

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Rivertop Contracting, Inc. to provide maintenance services for Pack Square Park.

In preparation for the City to accept maintenance operations of Pack Square Park, staff evaluated the City's ability to deliver the expected high maintenance standards with in-house resources. It was determined the most efficient and effective means to meet the maintenance standard is to contract the maintenance service.

The City conducted a competitive bid process for Pack Square Park maintenance divided into three areas, Roger McGuire Green, Reuter Terrace and Pack Square. The City will assume responsibility for park maintenance in phases for trees, shrubs, ground cover, plants, and lawn maintenance after substantial completion of the one year warranty and maintenance period. Pack Square was transferred to the City on June 15, 2010, Roger McGuire Green will transfer on July 30, 2010, and Reuter Terrace will transfer on May 31, 2011.

Staff expected the bids to come in at approximately $120,000. The lowest responsive and responsible bidder came in at $71,354.88 or $48,645 lower than expected. Blue Ridge Landscaping was the lowest responsive and responsible bid but has withdrawn its bid. Rivertop Contracting, Inc., located at PO Box 1294, Black Mountain, North Carolina is the next lowest responsive and responsible bidder at a cost of $71,354.88 and is proposed to be selected to perform maintenance in Pack Square Park. Staff recommends adding an additional $18,645 beyond the base amount of the contract as a contingency for emergency and unforeseen activities such as sod and plant material replacement, fountain and irrigation repair, and excessive snow removal. If not needed, the contingency will revert back into the Pack Square Park maintenance budget. The contract will not exceed $90,000.

This action complies with the City's Strategic Operating Plan in that it supports making smart investments that accomplishes lasting and tangible returns by investing in quality maintenance of Pack Square Park. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides ongoing maintenance and care for the City's park system.

Pros:

- Investment to maintain and care for Park Square Park, a City-owned asset.
- Provide quality service for ongoing, core park maintenance services.
- Fulfill commitment for maintenance of park system.

Con:

- None

The $90,000 to support the Pack Square Park maintenance contract is budgeted in the FY 2010-2011 Parks, Recreation and Cultural Arts Department operating budget as part of the Pack Square Park budget. In addition to funding the park maintenance contract, the $300,000 Pack Square Park budget is designed to support utilities, security and supply costs associated with operating park. The City and Buncombe County will evenly split the operating costs associated with the Park. The Pack Square Conservancy will contribute to capital improvements in the park as needed.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Rivertop Contracting, Inc. not to exceed $90,000 to provide maintenance services at Pack Square Park.

RESOLUTION BOOK NO. 33 – PAGE 117

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE WACKENHUT CORPORATION TO PROVIDE CONTRACTED SECURITY SERVICES FOR THE CITY OF ASHEVILLE PARK SYSTEM

This item was removed from the Consent Agenda for discussion and/or an individual vote.

E. RESOLUTION NO. 10-153 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A LEASE AGREEMENT WITH ONTARIO INVESTMENTS INC. FOR GOLF CARTS AND MAINTENANCE EQUIPMENT AT THE ASHEVILLE MUNICIPAL GOLF COURSE

Summary: The consideration of a resolution authorizing the City Manager to enter into a lease agreement with Ontario Investments, Inc. for golf carts and maintenance equipment at the Asheville Municipal Golf Course.

In 2009, the City of Asheville entered into a one-year lease agreement with an option to renew for one additional year with Ontario Investments at a cost of $123,158 for golf carts and maintenance equipment at the Asheville Municipal Golf Course. The City wishes to exercise the one-year lease renewal option at a cost of $92,369 resulting in an annual savings of $31,789.

This action complies with the City's Strategic Operating Plan in that it supports making smart investments that accomplishes lasting and tangible returns by investing in quality equipment and maintenance at the Asheville Municipal Golf Course. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides ongoing maintenance and care for the City's park system.

Pros:

- Investment to maintain and care for the Asheville Municipal Golf Course, a City-owned asset.
- Provide quality service for ongoing, core facility maintenance services.
- Fulfill commitment for maintenance of the golf course.

Con:

- None

The one-year lease in 2009 cost $123,158. The one-year lease renewal is at a cost of $92,369 resulting in an annual savings of $31,789 in FY 2010-2011. The $92,369 to support the lease agreement is budgeted in the FY 2010-2011 operating budget in the Parks, Recreation and Cultural Arts Department in the Golf Course Fund for the leased golf carts and maintenance equipment.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a lease agreement with Ontario Investments Inc. for golf course carts and maintenance equipment at the Asheville Municipal Golf Course not to exceed $92,369.

RESOLUTION BOOK NO. 33 – PAGE 118

F. RESOLUTION SCHEDULING A CITY COUNCIL COMMUNITY MEETING ON TUESDAY, AUGUST 31, 2010, AT 6:30 P.M. IN EAST ASHEVILLE

This item was removed from the Consent Agenda for discussion and/or an individual vote.

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH BRIDGESTONE AMERICAS TIRE OPERATIONS, LLC, FOR THE LEASE OF TIRES TO THE ASHEVILLE TRANSIT SYSTEM

This item was removed from consideration at the request of City staff.

H. RESOLUTION NO. 10-155 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO CONSTRUCT AN INTERACTIVE RECYCLING STATION ALONG WITH COMMUNITY EDUCATION AT THE CIVIC CENTER

ORDINANCE NO. 3884 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO CONSTRUCT AN INTERACTIVE RECYCLING STATION ALONG WITH COMMUNITY EDUCATION AT THE CIVIC CENTER

Summary: The consideration of (1) a resolution authorizing the City Manager to accept grant awards from the North Carolina Division of Pollution Prevention and Environmental Assistance to construct an interactive recycling station along with community education at the Civic Center and (2) a budget amendment, in the amount of $12,000, accepting the funds.

The City of Asheville Office of Sustainability has been awarded a Community Waste Reduction and Recycling Grant to develop and implement a more comprehensive recycling and community outreach program at the Civic Center featuring an interactive recycling bin. Staff will collaborate with area universities and college partners including Asheville Buncombe Technical Community College (AB Tech) and University of North Carolina Asheville to design and construct an interactive recycling station that will educate the public on the benefits of recycling. The City of Asheville anticipates that by employing a more engaging approach to recycling, the public will want to recycle their plastic beverage bottles purchased from the Civic Center food and beverage vendors that are now banned from landfills in North Carolina. Staff anticipates a 30% waste stream reduction equaling 13 tons.

This action complies with City Council's Strategic Operating Plan in the following ways: (1) Expands partnerships with UNC-Asheville, A-B Tech, Mars Hill College and other institutions to achieve common goals including sustainable economic development; (2) Expands community education programs including climate awareness, recycling and sustainability; and (3) Reduces city solid waste.

Pros:

- Reduce landfill waste by 30% or 13 tons through diverting bottles to recycling
- Strengthen partnerships with area universities and colleges
- Increases community education program on recycling, climate awareness and sustainability.

Con:

- None

The two thousand dollars match funds are budgeted in the Office of Sustainability and Sanitation Division

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to enter an agreement with the North Carolina Department of Environment and Natural Resources Division of Pollution Prevention and Environmental Assistance; and (2) adopt the budget amendment in the amount of $12,000.

RESOLUTION BOOK NO. 33 – PAGE 120
ORDINANCE BOOK NO. 26 – PAGE 255

I. RESOLUTION NO. 10-156 - RESOLUTION AUTHORIZING THE CONVEYANCE OF INTEREST IN RIGHT-OF-WAY ENCROACHMENTS ON PANOLA STREET

City Attorney Oast provided Council with the slightly revised staff report: Summary: The consideration of a resolution authorizing the transfer by non-warranty deed of the City's interest in certain property to resolve in minor encroachment issue.

The house at 62 Panola Street, in Montford, was constructed in the 1920's. A recent survey has revealed that two of the porches on the house encroach slightly on the City's claimed right-of-way for Panola Street. One of the encroachments is 3.7 square feet, and the other is 3.8 square feet. Both of these porches have existed for many years; one has been recently repaired. The repair and construction to both porches was performed under permit issued by the City, and was approved by the City's Historic Resources office.

Although no record or plat establishes the City's claimed right-of-way in the area, the owner wishes to clear up any title issues regarding these encroachments, and has proposed the City execute a non-warranty deed for the two areas in question. The proposed conveyance is subject to the condition that, if the City were ever to widen Panola Street such that the two small encroachment areas would be needed to accommodate a street, the owner's interest in those encroachment areas would revert to the City without further consideration.

In view of the City's uncertain interest in these areas, and the potential for reversion to the City if the areas are actually needed for street purposes, the manner of conveyance could take several forms. As proposed, this transaction resembles an encroachment agreement from the City's standpoint, but using the non-warranty deed helps with the owner's title issues.

The consistency with plans is that the construction/repair of porches received approval from Historic Resources office.

Pros:

- Resolves an encroachment issue; and
- Minimal intrusion

Con:

- None noted.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 33 – PAGE 121

J. RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE ROCKIN RIVERFEST SAVE THE FRENCH BROAD EVENT ON AUGUST 14, 2010

K. MOTION SUPPORTING THE CITY OF ASHEVILLE HOSTING A REGIONAL AFTERSCHOOL SUMMIT ON NOVEMBER 4, 2010, AS WELL AS OFFER FACILITY SPACE AND ANY IN-KIND STAFF SUPPORT REQUIRED FOR COORDINATING A SUCCESSFUL SUMMIT

Summary: The purpose of this memorandum is to propose that the City Council support the City of Asheville hosting a regional afterschool summit this fall, as well as offer facility space and any in-kind staff support required for coordinating a successful summit.

Jamie Knowles, Director of the NC Center for Afterschool Programs presented to the NC Metro Mayors Coalition in February and received encouraging responses from the attendees. The NC Center for Afterschool Programs will be holding regional afterschool summits hosted by mayors across the state this fall. As a result of the City of Asheville's leadership and support for serving disadvantaged youth, I have been asked to serve as Chair and Host of a summit in Asheville on November 4. Similar summits will be held in Salisbury, Durham, Goldsboro, and Wilmington. Event organizers anticipate up to 250 attendees.

In addition to formally supporting this event as an elected body, I would respectfully recommend that the City of Asheville could offer in-kind facility space and staff support for coordination of the event. The expected attendance of the event would require a large meeting room space, in addition to smaller areas for breakout session workshops. The level of support would be at the discretion of the City Manager.

City Manager Jackson said that we have confirmed the use of the Civic Center Banquet Hall for this event on November 4.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Manheimer and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE WACKENHUT CORPORATION TO PROVIDE CONTRACTED SECURITY SERVICES FOR THE CITY OF ASHEVILLE PARK SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with The Wackenhut Corporation to provide contracted security services for the City of Asheville park system.

The City of Asheville has historically provided security in its 54 parks via one Park Warden to patrol all parks at 40 hours per week, one Park Ranger at Pritchard Park at 40 hours per week, and Asheville Police Department regular patrol schedule at all other times. The security plan left significant gaps in coverage due to the large number of parks located in a large geographic area, and did not provide sufficient round the clock patrol. The lack of park patrol resulted in a high incident of vandalism and graffiti in parks.

In preparation for the City to accept security and maintenance operations of Pack Square Park, and recognizing the limited resources to provide security in the entire park system, staff conducted a cost comparison to provide a sufficient level of park patrol in all parks with in-house resources verses contracted services. It was determined to re-engineer in-house park security resources and to contract security services to provide round the clock park security.

The re-engineered operations to provide full-time park security coverage include 1) Assign the two in-house park patrol employees to patrol downtown parks with an emphasis on Pritchard Park and Pack Square Park during most day-time hours, 2) Contract for security services to patrol all parks during night-time hours, and 3) Asheville Police Department supplement security operations. The cost of in-house park patrol employees and the contracted security service is shared between the Pack Square Park budget and the Park Maintenance budget in the Parks, Recreation & Cultural Arts Department.

To activate the contracted park security, the City conducted a competitive bid process for park security for the entire park system. The Wackenhut Corporation located at 9-H Drive, Arden, North Carolina, was the lowest responsive and responsible bidder at a cost not to exceed $76,445.32, and is proposed to be selected to perform contracted park security services within the City's park system.

This action complies with the City's Strategic Operating Plan in that it supports making Asheville one of the safest and most secure communities when compared to similar cities; and making smart investments that accomplishes lasting and tangible returns by investing in security services for the City's park system. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides ongoing maintenance and security for the City's park system.

Pros:

- Enhances making the City park system safe for park visitors.
- Re-engineer resources for ongoing, core park security services within same budget as previous year.
- Fulfill commitment for security of park system.

Con:

- None

The $76,445.32 to support the contract is budgeted in the FY 2010-2011 operating budget in Parks, Recreation & Cultural Arts Department, and shared by the Pack Square Park and Park Maintenance budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract to provide park security with the Wackenhut Corporation not to exceed $76,445.32.

Councilman Bothwell questioned if we should hand off safety and security to a private company since one of the City's core services is police protection. After a search on-line, he found that this particular corporation internationally has a pretty bad track record, but that does not reflect necessarily on the local company. He also felt that we are side-stepping our commitment of living wages as these people will clearly be paid less than the police. He questioned what the comparison is of contracting with this company vs. hiring two more employees. Finally, he was curious about what kind of police powers we are handing off to this company.

After Parks & Recreation Director Roderick Simmons responded to the basic concerns, it was the suggestion of City Manager Jackson, and the consensus of Council, to postpone action on this item until August 10 when more information related to living wages, role and details on law enforcement activity, references for Wackenhut and options to bring in-house would be made available to Council.

F. RESOLUTION NO. 10-154 - RESOLUTION SCHEDULING A CITY COUNCIL COMMUNITY MEETING ON TUESDAY, AUGUST 31, 2010, AT 6:30 P.M. AT ASBURY HALL IN THE GROCE UNITED METHODIST CHURCH LOCATED AT 954 TUNNEL ROAD, ASHEVILLE, N.C.

A brief discussion was held about the proposed meeting place of Haw Creek Elementary School gymnasium on August 31. It was noted that the gymnasium was not air conditioned and if fans were used, it would possibly create sound problems. City Manager Jackson said that staff has looked at other public facility alternatives for holding a capacity of 200 and were not successful in identifying a location in the east Asheville area.

When Mayor Bellamy said that City Council was offered meeting space in Asbury Hall in Groce Methodist Church, City Attorney Oast said that to the extent there is any concern about Council meeting in a church or other place of worship, he felt it was not an issue if Council met in the social or fellowship hall.

When Mayor Bellamy asked for public comment, she received none.

Vice-Mayor Newman moved to schedule the August 31 City Council meeting at 6:30 p.m. at Asbury Hall in the Grove United Methodist Church located at 954 Tunnel Road. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION NO. 10-165 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE CLIPS OF FAITH BEER & FILM TOUR ON SEPTEMBER 10, 2010

Summary: The consideration of resolutions making provisions for the possession and consumption of malt beverages and/or unfortified wine at the (1) Rockin Riverfest Save the French Broad event on August 14, 2010; (2) Goombay Festival on August 27 - 29, 2010; (3) Lexington Avenue Arts & Fun Festival on September 5, 2010 (4) American Institute of Architects Asheville Street Party on September 17, 2010 (5) Brewgrass Festival on September 18, 2010, (6)

Asheville Citizen-Times Half Marathon & 5K Race on September 18, 2010; (7) Oktoberfest on October 9, 2010; (8) Beer City Cup on September 5, 2010, (9) Clips of Faith Beer & Film Tour on September 10, 2010.

- Riverlink has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at Rockin Riverfest Save the French Broad event and allow for consumption at this event.

  The Rockin Riverfest Save the French Broad event will be held on Saturday, August 14, 2010, from 12:00 p.m. to 6:00 p.m. within the boundaries of French Broad River Park, as per the event area limits referenced on the site map and will be free and open to the public.

- YMI Cultural Center has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Goombay Festival and allow for consumption at this event.

  The Goombay Festival will be held on Friday, August 27, 2010, from 12:00 p.m. to 11:00 p.m., Saturday, August 28, 2010, from 11:00 a.m. to 11:00 p.m. and Sunday, August 29, 2010, from 10:00 a.m. to 6:00 p.m. within the boundaries of Eagle Street, South Market Street & Wilson Alley, as per the event area limits referenced on the site map and will be free and open to the public. The Goombay Festival will also be held on Friday, August 27, 2010 from 12:00 p.m. to 8:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, the City-County Parking Lot and within a designated area of Spruce Street between the intersections of College Street & Court Plaza, as per the area limits referenced on the site map and will be free and open to the public.

- Arts 2 People has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Lexington Avenue Arts & Fun Festival and allow for consumption at this event.

  The Lexington Avenue Arts & Fun Festival will be held on Sunday, September 5, 2010, from 11:00 a.m. to 9:00 p.m. within the boundaries of Lexington Avenue between the intersections of College Street and the I-240 overpass, Walnut Street between Lexington Avenue and Carolina Lane as per the area limits referenced on the site map and will be free and open to the public.

- American Institute of Architects (AIA) has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the AIA Asheville Street Party and allow for consumption at this event.

  The AIA Asheville Street Party will be held on Friday, September 17, 2010, from 6:00 p.m. to 8:00 p.m. within the boundaries of a partial sidewalk closure at 8 College Street as per the area limits referenced on the site map. This is a private event and is not open to the public.

- Big Brothers Big Sisters of WNC has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Brewgrass Festival and allow for consumption at this event.

  The Brewgrass Festival will be held on Saturday, September 18, 2010, from 12:00 p.m. to 7:00 p.m. within the boundaries of Martin Luther King Jr. Park as per the area limits referenced on the site map. This is a ticketed, gated event that is open to the public.

- Lend-a-Hand Foundation has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the

Asheville Citizen-Times Half Marathon & 5K event and allow for consumption at this event.

The Asheville Citizen-Times Half Marathon & 5K will be held on Saturday, September 18, 2010, from 5:30 a.m. to 1:00 p.m. within the boundaries of Otis Street as per the area limits referenced on the site map and is free and open to the public.

- The Asheville Downtown Association has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at Oktoberfest and allow for consumption at this event.

  Oktoberfest will be held on Saturday, October 9, 2010, from 12:00 p.m. to 6:00 p.m. within the boundaries of Wall Street between Otis Street and Battery Park Avenue as per the area limits referenced on the site map. This is a ticketed event that is open to the public.

- The Western North Carolina Soccer Foundation has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Beer City Cup and allow for consumption at this event.

  The Beer City Cup will be held on Sunday, September 5, 2010, from 12:00 p.m. to 7:00 p.m. within the boundaries of Memorial Stadium as per the area limits referenced on the site map and is free and open to the public.

- The Asheville Downtown Association has requested through the City of Asheville Development Service Center that City Council permit them to serve beer and/or unfortified wine at the Clips of Faith Beer and Film Tour and allow for consumption at this event.

  The Clips of Faith Beer and Film Tour will be held on Friday, September 10, 2010, from 6:00 p.m. to 10:00 p.m. within the boundaries of Pack Square Park's Roger McGuire Green, the City-County Parking Lot and within a designated area of Spruce Street between the intersections of College Street & Court Plaza, as per the area limits referenced on the site map and will be free and open to the public.

These actions have no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for Riverlink, the YMI Cultural Center, Arts 2 People, the American Institute of Architects, Big Brothers Big Sisters of WNC, the Lend-a-Hand Foundation, the Western North Carolina Soccer Foundation and the Asheville Downtown Association

Con:

- Potential for public safety issues

For the Goombay Festival, the fiscal impact will be overtime pay for Asheville Police officers per City co-sponsorship agreement. There is no fiscal impact to the Rockin Riverfest Save the French Broad, Lexington Avenue Arts & Fun Festival, AIA Asheville Street Party, Brewgrass Festival, Asheville Citizen-Times Half Marathon & 5K, and Oktoberfest, Beer City Cup, and Clips of Faith Beer & Film Tour events.

City staff recommends City Council adopt the resolutions authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages

and/or unfortified wine at the Goombay Festival, Rockin Riverfest Save the French Broad event, Lexington Avenue Arts & Fun Festival, AIA Asheville Street Party, Brewgrass Festival, Asheville Citizen-Times Half Marathon & 5K, Oktoberfest, Beer City Cup, and Clips of Faith Beer & Film Tour events.

Councilman Russell moved for the adoption of Resolution Nos. 10-157, 10-158, 10-159, 10-160, 10-161, 10-162, 10-163, 10-164 and 10-165. This motion was seconded by Vice-Mayor Newman and carried on a 6-1 vote, with Mayor Bellamy voting "no."

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION UPDATE

Ms. Diane Duermit, Chair of the Asheville-Buncombe Historic Resources Commission, updated Council on the mission of the Commission and their goals for the coming year.

She said that the mission of the Historic Resources Commission (HRC) is to preserve and protect the cultural and architectural resources of Asheville & Buncombe County. The HRC is responsible for the evaluation of historically significant neighborhoods and individual sites for both national and local historic designation. The HRC also adopts or modifies preservation design guidelines as necessary for local districts and evaluates new construction and alterations to existing structures and landscapes for congruence with the adopted guidelines. Additionally, the HRC serves as an educational resource providing technical assistance and general information on the process and benefits of historic preservation to area residents and property owners.

The Commission is a (CLG) as part of the Certified Local Government Program which is a preservation partnership between local, state and national governments focused on promoting historic preservation at the grass roots level. The program is jointly administered by the National Park Service (NPS) and the State Historic Preservation Offices (SHPOs) in each state. As a CLG, the local government must enforce appropriate legislation, establish and maintain a qualified review commission, maintain a system for the survey and inventory of historic properties, and provide for adequate public participation in the local historic preservation program, including recommendations to the National Register of Historic Places.

HRC staff prepared a report on the size of other Preservation Commissions across the state and has worked with the HRC Liaison and City Manager to reduce the size of the Commission from 14 down to 12 members. The Legal Department is working on the ordinance changes.

Asheville currently has four locally designated historic districts: Albemarle Park, Biltmore Village, Montford and St. Dunstan's. The HRC also has purview over a total of 46 local historic landmarks. Asheville also has 12 recognized National Register Districts, but only three of these are locally designated, thus there is no HRC purview over these areas.

The primary activities of the Commission for Fiscal Year 2010 revolve around design review of applications for Certificates of Appropriateness for alterations, demolitions, or new construction within historic districts, or for the alteration or demolition of designated local landmarks. The staff may approve minor works, while major works require review and approval by the HRC.

Certificates of Appropriateness issued

Minor works reviewed	149
Major works reviewed	27

Local Landmark applications reviewed

Bon Marche building (Haywood Park Hotel) - This designation has been tabled at the applicant's request.

Local Landmarks designated

Spinning Wheel - August, 2009

Local Landmarks lost

The Richmond Hill Inn was destroyed by fire in March 2009. The designation for this property is scheduled to be removed in August 2010.

National Register nominations reviewed

Biltmore High School
Blake House

The Commission and staff were also involved in a number of other projects during the year in fulfillment of their mission to preserve and protect the cultural resources of Asheville and Buncombe County, which are outlined below.

- **Montford Guidelines Update** – The HRC adopted the new design Guidelines for the Montford Historic District in April, 2010. The new document, developed with significant community input is more concise and user friendly and also provides more flexibility for the incorporation of "green technology" in historic homes. There is also greater emphasis on the inherent sustainability of Historic Preservation. The HRC hopes to use the Montford guidelines as a model for the other districts. The Guidelines are currently available on the City's website and will soon be available in a hard copy format as well.

- **Downtown National Register District Grant** – The HRC was awarded a matching federal pass-through grant from the NC SHPO for the update and expansion of the Downtown Asheville National register nomination. The project budget is $7,700 with $4,500 from grant funds and $3,200 from funding provided by Buncombe County.

- **Architectural Survey** - HRC staff continues to administer the architectural survey contract and coordinate with the NCDOT, the COA Engineering Services, and the NC SHPO on the survey update as required per the Memorandum of Agreement (MOA) between the Pack Square Conservancy (PSC) the City, the ACHP and the SHPO to verify work done and to meet all requirements of the MOA. The survey will include all structures that are more than 50 years old and will include a full database documenting all of the structures with a brief description and photographs. The survey is slated for completion in June 2011. Once the survey is completed, the HRC would like to pursue funding to have the survey published in a book form similar to Cabins & Castles, which was re-published in 2008.

- **Downtown Master Plan Implementation** - The HRC has contributed to the development of the implementation matrix for the Downtown Master Plan and is involved with the Historic Preservation sub-committee working on implementation strategies.

- **National Preservation Month Preservation Forum** – The HRC sponsored a Forum in May, 2010, as part of many activities occurring locally to acknowledge National Preservation Month. The Forum, held at the YMI was co-sponsored by the Downtown Commission and was attended by 35-40. Speakers included Ted Alexander from Preservation North Carolina, who discussed non-regulatory preservation options. Other topics included state and federal tax credit programs, National Register nomination criteria and local design review.

  Fiscal Year 2011 goals include:

- Proceed with RFP and contracting to secure firm to complete update and expansion of Downtown Asheville National Register District.
- Amend HRC Bylaws to address attendance issues and institute consent agenda to improve customer service experience at HRC meetings.
- Formulate work plan for new education sub-committee and landmark sub-committee.
- Hold annual community meeting within each of the historic districts.
- Begin working with Albemarle Park and St. Dunstan's communities to update design guidelines.
- Plan annual retreat for fall 2010.
- Work with Downtown Master Plan Implementation Committee on community storytelling event and Web-portal design.
- Work with other community preservation groups on May 2011 Preservation Month event.

Ms. Duermit responded to Vice-Mayor Newman when he questioned the proposal to reduce the membership from 14 to 12. She said they arrived at 12 members after looking at other commissions across the state, including looking at the amount of territory they cover. In addition, Councilwoman Manheimer she said that the Committee has a large work plan and they need enough members to spread the work around. She felt the membership size might again need to be reviewed in the next couple of years.

On behalf of City Council, Mayor Bellamy thanked Ms. Duermit and the entire Commission for their efforts on the Commission.

IV. PUBLIC HEARINGS: None.

V. UNFINISHED BUSINESS:

A. MOTION APPOINTING MEMBERS TO THE BLUE RIBBON HEALTHCARE TASK FORCE

Assistant City Manager/Interim HR Director Jeff Richardson said that the Asheville City Council, in conjunction with the passing of the FY 10-11 Annual Budget, instructed city staff to identify qualified candidates for appointment to a Blue Ribbon Healthcare Task Force, aimed at reviewing the City's Health Insurance Fund, and providing recommendations back to the Asheville City Council on improving the Fund's performance.

Due to the continued challenge of providing affordable healthcare to city employees, City Council approved staff to identify citizens in the Asheville community with commensurate education and professional experience who would consider serving as members of a Blue Ribbon Health Care Task Force for the next six month period.

This task force's work may include, but is not limited to, best practices comparison of similar cities to determine the normal range of health insurance-related benefits afforded to employees, cost-for-service comparisons, employer-employee cost-share analysis, external

contracts to include costs and scope of services provided, review of the Asheville Project Disease Management Program, as well as other areas of interest.

Once appointments are made, the group's work and final recommendations need to coincide with the onset of the FY 11-12 budget process (January –February, 2011). Once final recommendations are made, this task force's work is complete and is dissolved at that time.

City staff recommends consideration of the following candidates: (1) Vicki Banks - Ms. Banks is the Director of Benefits and Compensation at the Biltmore Estate where she has primary responsibility for the administration of Biltmore's employee benefits programs; (2) Bill Biddle - Mr. Biddle holds an MPA in Healthcare Management and has held various positions through his career in healthcare management. Mr. Biddle is active in Asheville in many community service areas; (3) Jim Christian - Mr. Christian served as a hospital CEO for 25 years and is retired as Medical Center Director for the VA Hospital in Asheville. He currently works at MAHEC as the Director of Regional Services and Continuing Education; (4) Bruce Elliston - Dr. Elliston is a retired physician who has practiced medicine in the Asheville area for over 35 years. Dr. Elliston remains active at a national level and has made several trips within the last year to Washington, D.C. to advise various government officials on national health care matters.

When Councilman Russell asked if we invited the Director of Human Resources from the Metropolitan Sewerage District to be a part of this Task Force, Mr. Richardson he had not in that he solicited members of the community who had experience in similar level funds. He did invite a representative from Grove Park Inn, but they declined.

In response to Councilman Russell, Mr. Richardson said that he would be happy to invite a representative from Buncombe County government (or another similar sized government) to be a part of this Task Force in order to balance the government vs. private sector.

In response to Mayor Bellamy, Mr. Richardson said that the domestic partnership issue is part of our 2010 business and work plan. Staff will come back to Council in conjunction with the budget process with the goal implementation date of July of 2011.

Councilman Russell, who was asked to be liaison to this Task Force, suggested an interim update to Council from the Chair of the Task Force, or himself, in approximately three months. At that time, Council can re-direct the focus of the Task Force, if necessary. At Councilman Russell's suggestion, Mr. Richardson said that detailed minutes of the Task Force meetings will be kept with support from staff in the Human Resources Department.

Vice-Mayor Newman said that while we will be looking at best practices compared to other similar cities, he also felt we should not limit the scope of comparison to just the public sector, but to look within our own community at our large set of employers.

When Mayor Bellamy asked for public comment, no one spoke.

Councilman Russell moved to appoint Vicki Banks, Bill Biddle, Jim Christian, Bruce Elliston and a representative from Buncombe County government (from Mr. Richardson's invitation) to the Blue Ribbon Healthcare Task Force with an update to City Council on October 26, 2010. This motion was seconded by Councilman Bothwell and carried unanimously.

B. RESOLUTION NO. 10-166 - RESOLUTION APPROVING THE RECOMMENDATIONS OF THE HOUSING & COMMUNITY DEVELOPMENT COMMITTEE FOR THE 2010 OUTSIDE AGENCY PROGRAM

Mr. Jeff Staudinger, Community Development Director, said that this is the consideration of a resolution approving the recommendations of the Housing & Community Development (HCD) Committee for the 2010 Outside Agency Program.

The HCD Committee received applications from 10 eligible organizations for Outside Agency funding for 2011. The Committee heard presentations from these applicant organizations on May 26, 2010. The Committee made recommendations, approved by Council, for funding for five of those organizations on June 9, 2010. The HCD invited the remaining five organizations to its meeting of June 26, 2010, to learn more about the programs in the community that support after-school and other education enrichment and child support services.

The conversation was wide-ranging, and provided insight into the array of existing services, funding mechanisms and emerging priorities. Besides the organizations applying for funding, representatives of the Asheville City Schools Foundation also participated in the discussion.

The Committee recommends the following funding under this program for 2011:

Child Abuse Prevention Services, Inc.	General operating support targeted to parenting education and outreach	$ 5,000
Children First /Communities in Schools	Project MARCH: after-school safe-haven program at three housing complexes in the City	$ 17,800
One Youth at a Time	Provides mentoring, job training and placement assistance to at-risk students	$ 5,600
YWCA of Asheville and WNC	Support Our Students (SOS) is an afterschool and day-long summer camp for at-risk students	$ 8,000
Housing Authority-Youthful HAND	After-school program for children residing at Lee Walker Heights housing development will purchase research based materials to implement the literacy component of the program	$ 4,000

This action complies with the City Council Strategic Operating Plan in (1) Fiscal Responsibility: It provides resources for strategic initiatives and creates meaningful performance measures for programs and services; and (2) Safe: Supports recreation and employment alternatives for youth at risk of gang exposure.

Pros:

- Approval of Outside Agency Grants provides operating support to Asheville- based organizations that are providing direct services for Asheville residents.
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee.

Con:

- Budget constraints have curtailed the availability of funds for this year, and organizations will need to find alternate sources of program support;

Outside Agency Grants are funded from the City's general fund. The funding recommendations are within the fiscal limits developed by Council during the budget working sessions. All of the funding recommendations above are made at 80% of last year's individual agency funding.

The HCD recommends approval of the 2011 Outside Agency Program grants as presented.

Vice-Mayor Newman, Chair of the HCD Committee, noted that these recommendations are consistent with the other recommendations previously approved in that they are made at 80% of last year's individual agency fund.

Mayor Bellamy noted that working through the United Way and the RICH Task Force, Asheville was approved for ten local agencies who service children to have outside evaluation tools to see how they can operate under best practices.

In response to Councilman Smith, Mayor Bellamy said that the United Way has an after school initiative that is focusing on after school services that are being provided in the community to make sure they are operating efficiently, eliminating redundancy and maximizing services. The RICH Task Force has adopted that initiative as well and the HCD Committee will be hearing more about this in the future.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-166. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 151

VI. NEW BUSINESS:

A. ECONOMIC DEVELOPMENT INCENTIVE GRANT REQUEST FOR THE MONTFORD COMMONS PROJECT

Planning & Development Director Judy Daniel said that local developer Frontier Syndicate is seeking an Economic Incentive Grant (ECI) to support Phase I of the Montford Commons Urban Village project. The Montford Commons project was approved and rezoned in September 2007, and amended in June 2009. That rezoning to Urban Village represents a substantial bonus for the developer through its added density and flexibility.

When the economy changed, they proposed a public/private partnership (requiring a cash contribution from the City) that would enable them to proceed with the first phase of their project; as private lending sources had become difficult to obtain. To assist with the analysis and evaluation of a potential public/private partnership, the City (at the developer's expense) contracted an independent advisor, Real Estate Research Consultants (RERC) to evaluate the qualifications of the developer, conduct a market supportability assessment of the project, and perform financial gap analysis. A presentation from the developer and an initial staff assessment of the RERC report were heard at the April, 2010 meeting of the Planning and Economic Development (PED) Committee. After some discussion, but no specific action, the PED Committee suggested that the proposal should also be heard by the Finance Committee.

On June 8, 2010, the Finance Committee heard the petition and a revised staff recommendation that did not recommend support for the request. The developers, however, then requested another type of support from the Finance Committee than had been requested at the PED meeting. They requested an ECI in the form of tax relief similar to (although for a longer timeframe) the agreement with the Biltmore Town Center development. Since the staff did not have any supporting materials for the revised request, the Finance Committee directed the

representatives of Frontier Syndicate to submit required materials to the staff in time to consider the request and prepare a recommendation for the Council for the July 27 Council meeting.

Following the direction of the Finance Committee, a letter was mailed to the developers on June 16 outlining the information needed to perform the required analysis and the timeline necessary to allow time for the review before the deadline for reports. It included the materials and presentations submitted by the Biltmore Town Center development, as examples of the type of information, evidence of extraordinary public benefit, and presentation the Council would expect. The report was submitted to the staff on Sunday afternoon, July 18, and the following staff analysis represents the analysis possible within that timeframe.

Developer Proposal: The July 18 submittal requested the Council to approve the following at its July 27 meeting to assist this project:

- An Economic Incentive Grant equal to the amount of anticipated property tax revenue generated by Phase I of the development for its first ten years after completion.
- Relief of permitting fees of $350 per dwelling unit ($87,500)
- Relief of water tap fees up to $103,012

They state that the ten year term of the relief is based on their need for a $3 million gap in financing for infrastructure and the requirements of the HUD financing for which they have been approved. The stated rationale for City support is that traditional lending institutions are not currently lending for such projects, despite their merit. The tax and fee relief is needed to cover a $3 million gap between an approved HUD loan and the resources of the developers. Further, they state that the proposal should cause little or no burden on existing city and county budgets as the assistance will be based on the revenues generated from the project when completed. They state that if the support is not provided, the City and County will lose the opportunity to take advantage of HUD's commitment and additional "workforce" housing being created.

The staff analysis includes an evaluation of the request submitted on July 18 and also includes analysis provided in the original RERC evaluation that is still pertinent.

RERC Report Elements - While the type of financial support requested has changed, certain key elements of the RERC evaluation remain pertinent for the Council to consider in making their determination. These include:

- Experience of Developers - The individual equity owners active in the Montford Commons project possess the necessary individual skill sets and qualifications for project planning and development; however, the ownership group as a whole has not completed a project of similar scope and scale and therefore cannot provide project references applicable to the group. Similarly, the ownership group does not have experience or references related to completion of projects in which public investments have been made to fill a financial gap; although individual owners possess some experience in this area.

- Private Equity Investment – According to the RERC report a current equity contribution of 13% of Phase I construction costs, lower than the 20% contribution generally expected from developers requesting public incentives. According to the July 18 assistance request, the equity investment is at 20%. Insufficient information was submitted for the staff to understand why the equity investment is now substantially greater than what was stated in the RERC report.

- Market Support for Project – The request relates only to Phase I of Montford Commons, which is to include 250 rental units and a parking structure with 300 spaces. The RERC evaluation concludes that the rental units in Phase I could be viable within the market at this time, although no need is found for the parking facility. Phases II and III contain

commercial space (and rationale for the parking facility) for which they do not see current demand.

- Public Support for Structured Parking – This request for tax and fee abatement will support the construction of the rental units and the parking facility. The RERC report, as noted above, concluded that public support for structured parking in Phase I is not substantiated for Phase I.

  RERC also concluded that including this structured parking deck in Phase I of the project is a key contributor to the financial gap. RERC concludes that surface parking could accommodate Phase I and substantially reduce the project's hard costs and debt service.

- Reasons for Financial Gap - The consultants suggest that key factors driving the Montford Commons financial gap are land costs and (as noted above) the structured parking facility. Frontier assembled land at the height of the real estate market, inflating their development costs.

  Also, their land acquisition costs included the purchase of a "ravine" for approximately $1.0 million that it planned to package with adjoining property and develop as part of the overall project. The adjoining property, however, is currently owned by a third party that is unwilling to sell. Without the adjoining property, the ravine by itself has low development potential and thus is unlikely to generate project income for Montford Commons.

Current ECI Economic Assistance Request Analysis – A basic tenant of public support for a development project is that it should only be considered if the project fulfills or exceeds policy goals established by the City. In this instance the basic policy question is whether the Montford Commons project has sufficient merits to justify consideration of fiscal support by providing significant public purpose benefits that warrant public investment when compared to other competing projects or projects that may be proposed in the future.

The Montford Commons project (as previously approved through the Planning & Zoning process) is consistent with the basic goals of the City's 2025 Plan, Smart Growth Policies, Strategic Operating Plan and other official plans of the City. Specifically, it encourages infill redevelopment; proposes an efficient use of land through promotion of density; provides a walkable community within the development and into the adjacent neighborhood and to downtown; and is located on an existing bus line which supports and encourages alternative transportation options and preserves the capacity of area roadways. These factors led to the rezoning approval to the Urban Village zone, with substantial density increase.

Since other development projects approved in recent years have met the basic goals of the 2025 Plan, smart growth policies, and other plans without receiving public assistance for their related infrastructure costs, the more complex policy question of whether it provides substantially more public benefits.

In summary, the primary benefits to the City of Montford Commons Phase I are that it will eventually enhance the tax base of the city and county (producing an estimated $150,000 and $180,000 annual property tax revenues for the City and County respectively after the 10 year abatement), will provide some additional multi-family housing on the edge of the CBD that is, by the terms of a HUD loan, is to be offered at rates affordable to the "workforce housing" market; and that it will address certain public infrastructure needs that are currently high priorities in this area of the City.

Major concerns are that Phase I does not provide any affordable housing component, markets to but is not confined to the "workforce housing" market, will not create but a few permanent jobs, does not guarantee a percentage of construction jobs for Asheville area contractors, is not in one of the City's two primary targeted redevelopment zones (underutilized

areas of the CBD and the River District), includes public support for a parking structure that is not needed for the housing project to proceed, tax benefits (and water fees) will be deferred for ten years (a precedent); and sets precedents for public support without adopted guidelines for subsequent requests for public support for "workforce" housing.

Affordability of Housing – A primary policy question for this request relates to whether public assistance should be given to a project that does not provide any defined "affordable" housing, although it will provide "workforce" housing. The city has a definition, policies, and incentives in place for "affordable" housing, but not for "workforce" housing.

The request states that the HUD loan, for which it has been approved, will require limits on rents ensuring that it will remain affordable at the "workforce" housing level. The Community Development staff is not, however, sure that this is a correct statement of HUD's participation. HUD does not control or require any rent affordability restriction, although there is a question about whether HUD may reduce a loan amount if the proposed rents after construction are higher than originally proposed. According to their research, the loan underwriting is based on anticipated cashflow so the proposed rents are taken into consideration at the time of application. Staff is looking into whether a report of higher than stated rents would make a project subject to audit and loss of loan funds.

Further, the developers posit that a Housing + Transportation Index should be used, rather than just the cost of housing. Such measures are being used more often, and relate the cost of housing to proximity to job centers. Using this measure, the housing being provided would be closer to the level defined as affordable; but the City has not used this measure before or developed a standard ratio to determine how much additional affordability is gained. Using this measure, before standards for measurement are researched and adopted, could lead to confusion.

Further, they state that affordability at the "workforce" level will be guaranteed because HUD's mission is to ensure that the apartments will be affordable at that workforce level. That is true to the extent that HUD monitors projects given this type of loan. They also state that although there are not to be any units specifically designated for civil service employees, the entire project is to be oriented to supporting that salary range. That is true, but with no standards for salary verification or limitation of at least some units to certain populations, such units could just as easily be rented by anyone looking for a nice new place near downtown for a weekend place. That is a problem faced in many cities with a lot of tourism and weekend visitors. New, relatively affordable housing, without rental restrictions, if often acquired (as are a substantial number of downtown condos) by those looking for affordable second homes.

Jobs Creation – As stated, very few permanent jobs would be created with Phase I; although construction jobs would be created. The intended general contractor is based in Charlotte. The request states that "to the greatest extent possible the project will use Asheville area contractors by employing a system identical to that used for Mountain Housing Opportunity's Glen Rock project". No percentage guarantee is offered. With substantial public support requested, some form of guarantee of local contractor use should be included.

Greenway/Ravine Status – The developer was asked to consider giving the City an easement on the ravine property for its eventual use in extending a greenway from Montford to the River District. The assistance request states that this is not possible at this time due to encumbrances on that property. With substantial public support requested, some advantages to the city beyond additional taxes ten years after the completion of the project should be offered.

Private Equity Investment – As stated previously, there is insufficient information provided to understand why there is a difference between the RERC report estimating that Frontier had a 13% equity investment and the statement in the developer's July 18 request indicating that they have a 20% equity investment.

LEED Certification – The developer was requested to provide information regarding the sustainability elements in the project, especially potential for LEED certification. The assistance request notes that LEED certification would not be fiscally viable as it would push costs up too much. They state that they will be using Energy Star appliances and some other sustainable elements in their construction, and they would already receive some relief for those choices.

Tax Relief Request – The developer states why they believe the tax relief request will not burden the City or County, since the relief will not start until completion of the project. Yet the City and County will have to start providing additional levels of service to these areas after the completion of the apartments and parking structure.

Permitting Fee and Water Tap Fee Relief Request – The City has never given relief of permitting or tap fees except for projects that meet the definition for "Affordable" housing. No standard for relief of "Workforce" housing has been established.

The project meets Council goals related to adding housing near downtown, but the staff does not believe that it exceeds those goals sufficiently to warrant public investment in the project in the form of extended tax and fee relief; without setting a precedent that would be an incentive for a number of similar projects to request similar support. As noted previously the project reflects the following:

Pros:

- If monitored by HUD, will provide long term workforce housing level rents;
- Area contractors to be used "to the greatest extent possible";
- Use of Energy Star appliances, and certain "green" building practices;
- Increased tax revenues ten years after completion; and
- Some currently needed public infrastructure improvements provided including upgrades to traffic signals (at the intersections of Cherry Street and Haywood Street with Montford Avenue) and improved pavement conditions on three streets within the project.

Cons:

- Does not offer any defined affordable housing, when other approved market rate developments have included up to 20% affordable housing units. Staff suggests that to meet a test of public investment, a project should include 25% to 50% affordable housing. The lower amount could relate to an offer of long term rent control assuring affordability for workforce level housing;
- Since workforce housing level rents are open to anyone willing to pay those rents, these units will offer the opportunity for affordable weekend/vacation housing for the "second home" market;
- Does not create permanent jobs in Phase I, and no guarantee of a certain percentage of contracting jobs for Asheville area contractors is given;
- Proposes a parking structure for Phase One that is not warranted for the rental units in proposed, only to subsequent phases with more commercial uses. Further, this is not in an area noted as a high priority in the 2008 Parking Master Plan, and the structure adds substantially to the fiscal burden of the project – and thus the length of time for tax abatement requested;
- Is not located in a targeted redevelopment area. Underutilized areas of the CBD or in the River District are the areas most targeted at this time for redevelopment support;
- Documents submitted do not provide sufficient information to determine the amount of private equity contribution from the developer, which should be no less than 20% before any public participation should be considered;
- No easement for future greenway construction is offered despite substantial public contribution;
- No LEED certification will be achieved due to need to keep costs down;

- The estimated added tax revenue (annually approximately $150,000 in City property tax revenue, and $185,000 in County tax revenue) would be deferred for 10 years, yet the need for added services would begin when project is completed; yet the tax relief for Biltmore Park began with the construction of the project. Since that project has just this month been completed, less than three years of a completed project valued at full value by the County will be given tax relief; and
- Permit and Water Tap fee waivers have never been offered to projects other than those meeting the definition of "affordable" housing, so this would set a new precedent without guidelines established for determining when and why and to what amount they should be offered. The City's affordable housing rebates on permit fees are limited to 50%; and the waivers on water taps are limited to 50% for units defined as "affordable", not the entire project. The infill and affordable infrastructure rebate is again 50% based on a percentage of "affordable" units. There are no 100% waivers given; and the affordable housing rebate for permit fees and therefore;
- Insufficient benefits are given to differentiate project from other projects that have been approved without public assistance or that may be proposed in the future.

Therefore, with the limited public purpose benefits noted, and the substantial concerns noted, the staff does not see this proposal as a transformational project in Phase I and therefore, the staff does not recommend public participation for this Phase. Especially in comparison to projects like the Biltmore Town Center which are easily definable as transformational, Montford Commons does not "raise the bar" on change for this area of the City. (And the Biltmore Town Center was only given a five year tax abatement) It is a good project, it is a project that should be built; and the reluctance of private sector lenders to participate in the project is unfortunate. But the staff does not believe that the request offers enough change, in a place that is not designated as vital for change by the Council, to warrant the loss of tax revenue for ten years given the amount of services the project will require after it is built; and to risk setting a precedent for similar requests for similar projects that are good, but not great.

The staff believes that with certain changes, the amount of public participation and the level of public purpose could be raised and/or the project costs lowered. These might include inclusion of a certain percentage of defined affordable housing, a guarantee of a certain percentage of work for local area contractors, and/or the elimination of the parking structure. Should the project go forward, there will be more elements that warrant public participation in subsequent phases. These include:

- Creating a substantial number of permanent jobs – subsequent Phases include substantially more commercial space.

- Future public parking - Public structured parking will be necessary to the development and the general public in subsequent Phases.

- Future greenway construction - Construction of a greenway segment when it becomes a higher priority of the Greenway Master Plan and more potential for connectivity after implementation of the Wilma Dykeman Plan along the river.

For the requested level of support, the staff does not see the level of public benefit that would be expected; but staff does see the potential for precedents without carefully evaluated and adopted guidelines for future requests. With more time to establish guidelines for support of "workforce" housing, support for elements of this project could be worked out; but the developers have asked for your decision at the July 27 meeting, due to certain deadlines they face.

As discussed above, under the proposal from Frontier Syndicate, the City would forego approximately $87,000 in permit fee revenue in FY 2010-11 and $103,000 in water fund tap fee revenue in FY 2011-12. Also, at the completion of Phase I, which is estimated to be FY 2013-14, the City would begin paying Frontier Syndicate an annual amount equal to the City property tax

revenue generated by the development. This payment would continue to 2023 for an estimated accumulated total of $1.5 Million and a net present value of $1.1 Million.

After reviewing the request from Frontier Syndicate, the staff concludes that we do not believe that the added housing and infrastructure improvements are sufficient to warrant the city's loss of tax revenue for ten years. This conclusion derives strongly from not seeing how this request could be differentiated from other development proposals that have been approved without public support. The staff believes that the 2007 rezoning to Urban Village (with its added density and flexibility) already represents the appropriate level of public support, given the level of contribution to furthering city goals and policies.

This request is made under the enabling authority for N.C. Gen. Stat. sec. 158-7 which has traditionally been used for commercial industrial development. This would be the first use of it for a residential project.

Mr. Lou Bissette, attorney representing Frontier Syndicate, LLC, said that Phase I is comprised of 254 workforce housing apartments and a 300 space parking garage. The total cost is estimated to be in excess of $30 Million. The project will be constructed on an approximately 20 acre tract of land located in Montford. Infrastructure improvements in and around the project are estimated to cost approximately $3 Million. The developer is requesting an economic incentive grant equal to the amount of the property tax revenue generated by the Phase I project during its first 10 years of operation. The 10-year period would commence only after a Certificate of Occupancy is issued for the project. It is estimated that the annual property tax revenue for Phase I will be $150,000 for the City and will yield a present value over that 10-year period of approximately $1,237,000. In addition, the developer is requesting $190,000 in reduced permitting and tap fees. The project has received preliminary approval for a HUD sponsored loan guarantee under the 221-D-4 program. This project meets many City Council goals including the creation of workforce housing near the Central Business District, which is adjacent to public transportation and promotes the goals of walkability and sustainability. We believe that this project meets the affordability standards of the Housing Plus Transportation Index which factors in a homes proximity to the urban center. This property has been unproductive and underutilized for many years. The location is probably one of the few tracts close to the Central Business District which can be used for workforce housing, due to the low cost of this land. The developers have a great deal of blood, sweat, tears and money in this site. It's made up of over 50 individual lots which were acquired over a 5-year period. The developers have never received any salaries, developer's fees or other forms of compensation and there is no profit built into the current projections for the project. It is his understanding that there has been very little, if any, neighborhood opposition to this project and he presented Council with a letter from the Montford Neighborhood Association in support of their request. This project simply cannot be done without this requested economic incentive grant. In today's world there is little private investment or credit available for projects of this type. For this reason, we believe the City should seek out opportunities for public/private partnerships in the provision of infrastructure. That is a quote out of the City's 2025 Plan. City staff has expressed some concern about the developer's equity investment in this project. The developers believe that they can obtain the additional equity and meet all of the terms of the HUD sponsored loan guarantee. However, if they can't, then the City's economic incentive grant will never be made. City staff has also expressed some concern about the precedent which might be set by granting such an incentive. However, a similar incentive was granted to the developers of Biltmore Town Center – developers with deeper pockets than those of his clients. In addition, that project was located more than 10 miles from downtown Asheville and does not appear to him to contain much affordable housing. It appears to him also that Montford Commons will provide much needed support to our downtown workforce community. It will provide much needed rental housing, will support our tourism industry, and increase downtown commerce. In addition the infrastructure improvements will benefit the general public and especially the urban core by reducing the need for vehicles and increasing the use of pedestrian and public transportation. The development of this grossly under-utilized property will, through future phases, greatly increase the City's tax base. It will

significantly enhance both revenue and livability in the downtown area, increase ridership on the region's mass transit and provide for more efficient utilization of numerous downtown resources. He would be more concerned about the precedent of the Biltmore Town Center grant than the precedent created by economic incentives for Montford Commons. This request, if granted, will not cost the City taxpayers one dime. If you turn this grant down, what will the City gain? If you approve it you will get a well-designed project that meets many of the Council's goals and will seek further development in this under-utilized area of our City. In addition, at the end of the 10 years, the City will get a perpetual ad valorem tax income stream. The great thing about this request is that if the developer doesn't deliver a completed project as advertised, they will get nothing from the City. Although the City's economic development incentive policy was initially designed primarily to promote industrial development, we believe it clearly permits, at the discretion of City Council and in accordance with N.C. Gen. Stat. sec. 158-7, other incentives outside of this policy on a case by case basis. We believe that this policy, as well as the grant request, would be permitted under state law. Finally, we all need to look at our current economy and the new normal. Very frankly there will be very few, if any, opportunities in the near term to meet your affordable housing and other goals. Unfortunately the days of industrial development in our community may be over. Our continued viability now depends on tourism and retail establishments in the downtown. The workforce for tourism and retail entities must be housed in affordable projects with access to the workplace. Montford Commons meets those goals. He respectfully requested that Council seize the day and make this very fine project happen for the good of our community.

Councilman Russell, Chair of the Finance Committee, said that the request came to them in a totally different form; and therefore, no recommendation can be made.

Councilman Davis, Chair of the Planning & Economic Development Committee, said that this request is different from what came to them to review; and therefore, no recommendation can be made.

Vice-Mayor Newman felt that this is a good project, however, he challenged the statement that this project will not cost the City taxpayers anything because once it is complete, it will require police protection, solid waste services, etc. The idea of putting this much pretty affordable rental housing this close to downtown is a unique opportunity. At this time the request for public support is beyond what he can support. He asked if there are any opportunities for a compromise on this in terms of what level of public support the development team is requesting. And, at least for this phase of the development, there does not appear to be the demand for this much parking. He questioned if there is a possible way to reduce the infrastructure costs on this to make that less expensive and bring down the level of the financial gap on this project.

Mr. Vince Smarjesse, representing Frontier Syndicate, said that the parking was analyzed in December last year for a four-story apartment building and a four-story parking deck to go with it. Some of the extra parking was (1) thinking about phases 2 and 3; and (3) thinking that at the amazing cost of $8,000 per space for structured parking we thought it was a good proposal for the City. Since that report was delivered in December, the top deck of the parking deck was completely removed. We now have parking slots commensurate with the Unified Development Ordinance – one slot per bedroom, plus whatever is needed for the commercial space, plus a small contingency. Again, the parking has been reduced from 4 decks to 3 decks.

In response to Vice-Mayor Newman, Ms. Daniel felt that the RERC report stated that the required parking could be handled through surface parking, and hopefully that would be interim until further phases are built out.

In response to Mayor Bellamy and after Community Development Director Jeff Staudinger explained the City's definition of affordable housing, Mr. Smarjesse said that some of their units fit that definition and some don't, depending on the square footage. The product may not fit exactly in the box of affordable, but its close, especially being this close to downtown.

Mayor Bellamy sees this as a win/win for our community, but maybe not for 10 years. She hoped we can find a way to structure something for the community. She wondered if we might be able to use some Housing Trust Fund dollars for the portion of the project that is affordable. She understands staff's concerns and suggested sending this back to get a possible win/win project, as it is workforce housing near downtown, on a transit route, and provides an opportunity for a second and third phase with neighborhood support.

In response to Councilman Bothwell, Mr. Smarjesse said that he did not have readily available the information of the cost of parking garage spaces vs. surface parking spaces. However, he did say that the parking garage space is $8,000 a slot. He explained that they planned a parking garage that was appealing to the eye and tucked into and behind the building. They listened to the community when they designed it.

Councilman Bothwell figured that the parking garage would be approximately $2.4 Million. He felt that if this model works and attracts people who want to walk to work and use transit, it could be that we need far fewer parking spaces than a similar project five miles out. Also, when you have a surface lot you have potential to use the space for something else later. A surface lot is more flexible than a parking deck. He also expressed disappointment with no LEED certification.

In response to Councilman Smith regarding the lack of LEED certification, Mr. Smarjesse said that they rely heavily on their builders and architects to counsel them on what they can include or not with greenbuilding vs. workforce-type rents. They take greenbuilding seriously, but it is an expense the project cannot afford given the current conditions.

In response to Vice-Mayor Newman, Mr. Staudinger said that HUD will require LEED certification for all new residential construction that is supported with HOME funds.

Vice-Mayor Newman felt the strongest points the developers make are the Housing & Transportation Index and the project's proximity to downtown. He would consider supporting the proposal, but not for 10 years. He felt the facts on the Biltmore Town Center project are very different, but it was a 5-year tax deferment. He would be open to consider something more of that nature. Personally he felt that greenbuilding is very important and urged the developers to take a harder look at maybe some basic certification.

Councilwoman Manheimer said that we don't have a set of criteria for public/private partnerships in the context of economic development and that's not fair to the applicant because they don't know the rules. She agreed with Vice-Mayor Newman that we need to see a proposal that at least helps the citizens and the City meet some of their shared goals. That might be a product that includes affordable housing, some green building and some sorely needed infrastructure needs that this project will assist with. She wondered if it would be possible for the developer to re-tool this project again and come back to Council.

Mr. Bissette said that even though the developers have been working on this project for five years and have spent a lot of money, they are willing to go back and work with Ms. Daniel again and see if there is a chance of re-tooling the project.

In response to Councilman Russell, Mr. Bissette said that they have received encouraging words from some of the Buncombe County Commissioners but they will delay their appearance before them.

Councilman Russell explained why this is not similar to the Biltmore Town Center project in that that was a large commercial aspect with a voluntary annexation. He felt we do need to come up with a policy in these new economic times of if this is the type of public/private partnership we are going to get into. He felt there is clear policy about this type of incentive in

conjunction with annexation. He hoped we can work together but due to the large amount of money it doesn't make sense in its current format.

Councilman Davis agreed with Councilman Russell in that there is a tremendous difference between the Biltmore Town Center project and this project. With the Biltmore Town Center project we got permanent jobs, mixed use development, retail and residential on a large scale. However, this does answer affordable housing (somewhat) and it's on a transit route. He struggled with the 10-year tax deferment.

Ms. Daniel asked for guidance on their request for 100% relief on the permit and tap fees, which we have never done before. We have done 50% in the past on affordable housing.

Mayor Bellamy felt it should be the same standard that we would give anyone else on workforce housing.

Vice-Mayor Newman felt we should always do 100% rebate on affordable housing in that he feels it's odd to give people loans but yet still charge them a fee to get a permit. He felt that is a broader policy discussion.

Mr. George Gabler, representative of Frontier Syndicate, explained that the changes along the way have been an attempt to respond to real concerns raised at each meeting. He requested City Council table this request in order to give them time to meet with City staff to see if they can address Council's concerns.

Vice-Mayor Newman moved to continue this discussion until August 24, 2010. This motion was seconded by Councilman Bothwell and carried unanimously.

B. REVIEW OF ON-STREET PARKING BY HANDICAPPED VEHICLES IN DOWNTOWN

City Attorney Oast said that this is a review of applicable law, policy and practices as to the parking of motor vehicles displaying handicapped placards or license tags in metered on-street parking spaces in downtown.

Earlier this year, in response to requests from several downtown businesses and organizations, staff was directed to review the State law, the City's ordinances, and the City's practices regarding the parking of vehicles displaying handicapped placards or license tags (herein "handicapped vehicles") on downtown streets in the spaces where parking meters are installed (herein "metered parking" or "metered space"). This staff report does not address parking in designated handicapped parking spaces, but rather the use of regular metered on-street parking spaces by handicapped vehicles.

Currently, the City of Asheville does not require the activation of parking meters by handicapped vehicles. This is not an ordinance, but is rather a practice, based on an interpretation of State law. The request to review this interpretation and practice grew out of observations that some of the owners of those handicapped vehicles, who are also downtown residents, were parking the vehicles on the street, in metered spaces, for days or weeks at a time because they could do so without limitation as to time and without paying. The contention is that this use takes up spaces that could be used by the customers of downtown businesses, who only need to park for a few minutes to transact their business.

The law regarding handicapped parking may be summarized as follows:

(1) Pursuant to N.C.G.S. 160A-301, cities may regulate parking on public streets within the city, including limiting the time that parking is permitted in any particular location. This same law also provides that cities may install parking meters at marked on-street

parking spaces. Typically, cities limit the time for which an on-street parking space may be used by an ordinance establishing a maximum time and/or by metering the space and requiring activation of the meter.

(2) N.C.G.S. 20-37.6 provides in essence that where cities limit the amount of time that an on-street parking space may be used, a handicapped vehicle may park in that space without limitation as to time. This exemption applies whether or not a space is metered. Thus, if a city limits the amount of time for which a space may be used (by establishing maximum time limits, or requiring activation of a meter, or both), that limit would not apply to handicapped vehicles. This exemption applies to any legal on-street parking space, not just spaces reserved for handicapped parking. Significantly, there is no language in the statute providing for activation of a meter by a handicapped vehicle, or providing that meter activation is not required.

(3) The Asheville City Code, Sections 19-161 through 19-170 and Appendix E, provides in essence that all of downtown is a metered parking zone, and that parking is allowed at metered spaces for up to the maximum amount of time allowed by the meter. Transportation Director Ken Putnam and Parking Services Director Harry Brown advised that the maximum amount of time allowed by most meters is two hours; some allow as much as three hours, and some as little as 15 or 30 minutes.

The absence of language in G.S. 20-37.6 regarding activation of meters has resulted in differing interpretations of the law. An informal survey of North Carolina cities indicates that most do not require activation of parking meters by handicapped vehicles. However, the City of Charlotte has long required meter activation by handicapped vehicles. More recently, the City of Raleigh has adopted the same practice, and adopted an ordinance to that effect.

The public purpose justifications for authorizing cities to regulate on-street parking include relieving traffic congestion, and ensuring turnover in on-street space utilization. This is consistent with the interests of the citizens and organizations who have recently brought this issue up in Asheville.

An informal survey conducted by parking services staff indicates that, out of approximately 743 metered spaces in downtown Asheville, 10 to 12 percent of them are occupied by handicapped vehicles at any given time. This does not include designated handicapped parking spaces. It is not known how long a particular vehicle remained in a particular space.

Another issue with downtown parking availability is that many metered spaces are frequently occupied by non-handicapped vehicles for periods of time that exceed the maximum amount of time allowed by the meter. The operators of these vehicles, many of whom work in downtown, activate or "feed" the meters at regular intervals to avoid having the time on the meter expire. The effect of this practice is the same as it is for handicapped vehicles that remain in on-street spaces for long periods of time: the space is being used for short term vehicle storage, and is not available for individuals who only need a few minutes to transact their business. This likewise defeats the public purpose, set out above, of relieving traffic congestion and ensuring turnover in on-street space utilization.

Several different options are available for increasing the availability of on-street parking spaces and limiting improper use of them:

1. Clarify the maximum amount of time for which parking is allowed in any space, and that "meter feeding" by non-handicapped vehicles is not allowed as a means to extend this time.

2. Clarify that the requirement to activate parking meters applies to handicapped vehicles and clarify that there is no limit as to the amount of time that such a vehicle may park in a particular space.

Implementing these changes may require some additional training or equipment so that parking enforcement staff can know when vehicles have exceeded the maximum amount of time for a particular space.

Council may also wish to explore some options for accommodating the parking of handicapped vehicles:

1. Permit vehicle storage on the top levels of designated parking decks, or other City lots, at reduced cost.

2. Designate more on-street spaces for parking of handicapped vehicles.

3. Investigate methods for allowing meter activation by the operators of handicapped vehicles without the need for making repeated trips to the meter.

Even if the practice of not requiring handicapped vehicles to pay for parking is not changed, an ordinance clarifying a maximum time limit for parking in on-street metered spaces should be adopted. This time can vary from street to street, and can be a relatively long time such as four hours, or as short as 15 to 30 minutes. An ordinance that reflected the current meter zones could be quickly implemented with a minimum of disruption to current parking patterns. If the ordinance or practice is changed, some time should be allowed for education of the public who use downtown parking, especially to the operators of handicapped vehicles.

Since this plan has not been looked at since 1996, the long-term options would be to review the downtown on-street parking patterns and adjust the ordinance accordingly.

The Strategic Operating Plan has consistently provided for improved management of transportation and congestion. In addition, the Downtown Master Plan calls for the development of new unified parking management strategies.

Staff's recommendation is for Council to establish time limits for parking in downtown metered zones, with delayed effective date to facilitate public education. In addition to monitor space utilization and turnover.

Since this does affect the handicapped community that any initiative that Council directs staff to take should be reviewed by the Mayor's Committee on Disabilities for input.

In response to Councilman Bothwell, City Attorney Oast reiterated that state law provides in essence that where cities limit the amount of time that an on-street parking space may be used, a handicapped vehicle may park in that space without limitation as to time. This exemption applies whether or not a space is metered. Thus, if a city limits the amount of time for which a space may be used (by establishing maximum time limits, or requiring activation of a meter, or both), that limit would not apply to handicapped vehicles. This exemption applies to any legal on-street parking space, not just spaces reserved for handicapped parking. Significantly, there is no language in the statute providing for activation of a meter by a handicapped vehicle, or providing that meter activation is not required.

When Councilman Bothwell questioned enforcement of the maximum time limit, City Attorney Oast said that there are methods for doing that. For most of the time, people who park in a metered space don't exceed the time that the meter allows. He felt that if it were clear that the maximum amount of time for parking is what the meter says, or what a sign placed near the meter said, then it would not be that big of a problem.

Councilwoman Manheimer clarified that if we decide to clarify the ordinance and limit the amount of time you can park in a spot, handicapped parking is still available for one individual the entire day, but we can elect whether or not to require that meter to be fed, currently it is not required.

In response to Councilman Smith, Mayor Bellamy said that part of the City Attorney's due diligence on this topic is to seek input from the Mayor's Committee on Disabilities and back to the Downtown Commission and the Downtown Association because they have been important in bringing this to the forefront. After that input has been received, the City Attorney will bring this back to City Council for public comment and consideration of adoption of an ordinance.

Councilman Davis understands the frustration of seeing several cars staying parked in regular spaces continuously and felt it needed fairly immediate attention.

City Attorney Oast said that without adoption of an ordinance we can direct the parking staff to start enforcing the meter activation requirement with respect to any vehicle. He did recommend that we clarify our own ordinance so that it's absolutely clear that parking is only allowed in a particular space for a certain amount of time, regardless of the time noted on the meter.

Mayor Bellamy noted that City Attorney Oast recommends is a delay of the effective date to facilitate public education. We need to have some time built into this process after we approve whatever we're going to do, to let the community know this is no longer an acceptable practice in downtown Asheville. She asked City Attorney Oast to research how many handicapped spaces we have in downtown Asheville to see if we are lacking marked handicapped spaces. Also, can we open up more handicapped spaces available in the parking decks for the handicapped? She questioned if we can partner with the Basilica on the parking a lot across from them since we have the Vanderbilt Apartments and the Battery Park Apartments so close.

Vice-Mayor Newman seems like either of these two policies can go a long way of addressing the problem of cars being parked for a long time. Based on the information he has at this time, he would support the option to clarify that the requirement to activate parking meters applies to handicapped vehicles and clarify that there is no limit as to the amount of time that such a vehicle may park in a particular space. He hears more concerns about cars being parked in prime spots downtown for long period of time with handicapped placards on them, rather than the problem of people feeding meters. That is really expensive and he felt the market itself would limit that to a very large degree. If we did say every vehicle, whether it's handicapped or not, has a maximum time limit, he felt that would be a lot of work for parking enforcement vs. seeing whose meter ran out. He agrees with the sentiment expressed by the Mayor that to encourage people to not just park in a spot downtown for a long time without having to pay anything to give people discount or even a free space in the parking deck. He noted that we have a lot of not prime on-street parking along the edges of downtown that we rent out for a low price. Maybe there are some other on-street parking options that are less valuable than our prime places downtown.

Councilwoman Manheimer leaned in the direction of the second option as well to clarify that the requirement to activate parking meters applies to handicapped vehicles and clarify that there is no limit as to the amount of time that such a vehicle may park in a particular space. However, she felt we needed to hear public input before that decision is made. She felt it might be worthwhile to research other tourist towns to see how they have dealt with parking issues to see if they have a good working model.

Councilman Davis said that one of the persistent problems is the cars with handicapped placards being stored in prime parking spaces. In some instances there are spaces provided by the facility where those folks live, but they choose to park on-street as a matter of convenience. It

would be fine to give them free parking spaces in the parking garages, but we will have to use more enforcement to get those people to use that option. We are certainly not trying to make it difficult for handicapped people and we have an aging population, but it is the persistent ones that we are having a problem with that use the parking spaces for car storage.

Mr. Dwight Butner, Chairman of the Downtown Commission, said that the substance of the Commission's motion essentially was to suggest City Council explore charging for any vehicle parked in a metered space. There was some concern expressed that that might drive people who are permanently parking in these metered spaces to our designated handicapped spaces. The simplest way to approach this issue, we believe, is to begin with financial influences. He felt we need to be both a compassionate city and a fiscal city; and we need to balance our general concern for the handicapped community with an overall just outcome economically for everyone concerned. They stand ready to advise Council in anyway they can.

When Mayor Bellamy noted that City Attorney Oast will be again seeking in put from the Downtown Commission, Mr. Butner said that they have a standing committee on transportation associated with the Downtown Master Plan. He asked if Council would like to put this issue on their agenda and maybe expand the scope of that committee somewhat to address this issue. He felt that would be appropriate since it would eventually come to the full Downtown Commission. Councilman Davis, member of the Downtown Commission, said that the transportation committee meets monthly and we may be able to move this issue forward a little more quickly if it is scheduled in both arenas.

Mr. Byron Greiner, President of the Downtown Association and member of the Downtown Commission, noted that the Downtown Commission did review this issue with a motion. The motion was to request the City pursue metering all parking spaces (except currently marked handicapped spaces) and to enforce collecting fees for parking in all metered parking spaces whether they have a handicapped placard or not. The Downtown Association, nor the Commission, does not support limiting the amount of time, other than the designations we currently have because we feel the meters will enforce that for us. We are ultimately looking for the turnover of parking spaces rather than the storage of vehicle.

Mr. Joe Minicozzi, Interim Executive Director of the Downtown Association, said that this issue has been going on for two years. They paid an intern to go out on various days (three times a day) to research if vehicles were being parked all day. He showed pictures of handicapped placard vehicles parking all day long in regular metered spots around the Grove Arcade, the City-County Plaza, College Street, Haywood Street, etc. If we use the figure of 10% of 700 spaces, this is a loss of revenue to the City in the amount of $160,650. To park in the parking deck is $70/month and the Vanderbilt residents are offered a discount of $35/month, but to park on the street is free. If someone chooses to feed the meter all day, it would be $190/month. They feel that if people park in a metered space, they should feed the meter.

Ms. Ruth Summers, Executive Director of the Grove Arcade Foundation, felt that while the City has 3 parking decks downtown they are often occupied and not available for public hourly parking. Due to 911, the federal building parking lot is not used due to national security issues and therefore, the federal building and the federal court system have basically taken over the Wall Street parking garage. She said the lot behind the Battery Park Apartments is owned by the Basilica. They have done research for about 4 years around the Grove Arcade and they lose between 25-35 spaces a day to people storing their cars, which is a lost revenue to the City of approximately $80,000 a year.

Mayor Bellamy said that she has recently met with the Director of Public Buildings for the U.S. Government and talked about the issue of their employees who have already been screened having the ability to park in their facilities and how that would help the City with their parking. She will continue to work in that direction.

C. RESOLUTION NO. 10-167 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX THE COOPERS HAWK DRIVE AREA AND SETTING THE PUBLIC INFORMATION MEETING ON SEPTEMBER 13, 2010, AND THE CITY COUNCIL PUBLIC HEARING OCTOBER 12, 2010

RESOLUTION NO. 10-168 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX THE ROYAL PINES AREA AND SETTING THE PUBLIC INFORMATION MEETING ON SEPTEMBER 13, 2010, AND THE CITY COUNCIL PUBLIC HEARING OCTOBER 12, 2010

Urban Planner Blake Esselstyn said that this is the consideration of resolutions stating the intent of the City to annex two areas contiguous to the current boundaries of the City of Asheville.

The City's policy is to include within its corporate boundaries areas that are urban in nature and meet State of North Carolina qualification requirements. Staff has identified two areas that meet the state requirements. Both of these areas are contiguous to the current municipal boundary. The Coopers Hawk Drive Area is 41.8 acres in size and is the last remaining residential portion of the Biltmore Park development to be brought into the City. The Royal Pines Area is 388.8 acres in size and is largely residential in nature. He explained a very small modification to the Royal Pines area map and description stating that there is a small sliver (unopened right-of-way) that was included on the map and in the description that is outside the area of consideration for annexation.

Under State law, the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

Staff has provided the following proposed schedule for these annexations. The effective date for both would be June 30, 2011. The following steps and dates meet the process required by State law:

- Council Adoption of Resolution of Intent – 7/27/10
- Council Adoption of Services Plan – 8/10/10
- Public Information Meeting – 9/13/10
- City Council Public Hearing – 10/12/10
- Annexation Ordinance Adopted – 10/26/10
- Effective Date – 6/30/11

After hearing this item at their July 20, 2010, meeting, the Planning and Economic Development Committee agreed by consensus that the item should move forward to the full City Council.

Pros:

- Supports City of Asheville's Smart Growth Annexation program (regular program of annexations) as set forth in the City's 2025 Plan.
- Provides for an urban level of service for developed and developing areas adjacent to the existing city limits and includes those benefiting from existing City services in participation in the costs of such services.

Con:

- Residents of proposed annexation areas may object to such annexation.

The fiscal impact of this round of annexations will be addressed in the Plan for Services document, which is scheduled to come before City Council on August 10, 2010.

City staff recommends that City Council adopt the resolutions of intent stating the City's intent to annex these annexation areas.

Ms. Betty Jackson said that the idea of people who live in the County that come into Asheville are users and abusers of City services is insulting to County residents. Those people work in Asheville, do business in Asheville and some even own businesses and properties in Asheville, which all contribute to the City's coffers. It is not realistic that County residents contribute nothing to the well-being of the City. She said the reality is that most streets County residents use are maintained by the N.C. Dept. of Transportation and even if they use City-maintained street, municipalities get gas tax and Powell Bill funds.

At the suggestion of Mayor Bellamy due to a lot of misinformation, it was the consensus of Council to have staff develop communications to educate the public on how the City receives a minor share of the sales tax revenues collected here. It might be appropriate to show (at the public information meeting) a comparison of Asheville vs. other cities in North Carolina to illustrate how Asheville does not get as much taxes as people think we do.

Councilman Russell could not support either annexation because he didn't feel they want to become a part of the City of Asheville and we are ready to double their taxes.

Mayor Bellamy that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-167, with the public information meeting being held on September 13, 2010, and the City Council public hearing being held on October 12, 2010. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Russell voting "no".

RESOLUTION BOOK NO. 33 – PAGE 152

Councilwoman Manheimer said that the Planning & Economic Development Committee reviewed these annexations and with regard to the Royal Pines area, and since it is an older subdivision, they questioned what benefit we would be bringing this development. They felt it was an appropriate annexation and one where we could demonstrate some of the benefits we could bring to this community. She believed it has some older roadways and the water and sewer infrastructure may need some enhancement. While there is normally some resistance to annexation, this could be am area that could see some return for their tax dollar long-term.

Mayor Bellamy could not support the Royal Pine annexation area in that she felt this annexation was not the right time due to the City's financial situation.

Councilman Bothwell moved for the adoption of Resolution No. 10-168, as amended deleting the small unopened right-of-way described by Mr. Esselstyn, with the public information meeting being held on September 13, 2010, and the City Council public hearing being held on October 12, 2010. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Mayor Bellamy and Councilman Russell voting "no".

RESOLUTION BOOK NO. 33 – PAGE 156

D. BOARDS & COMMISSIONS

RESOLUTION NO. 10-169 - RESOLUTION APPOINTING GUS SIMS TO THE BOARD OF ELECTRICAL EXAMINERS

At the recommendation of the Boards & Commissions Committee, Councilman Davis moved to appoint Mr. Gus Sims to fill the unexpired term of Mr. Randy Osborne on the Board of Electrical Examiners (as the licensed engineer), said term to begin immediately and expire on July 1, 2012, or until his successor has been appointed. This motion was seconded by Vice-Mayor Newman and carried unanimously

RESOLUTION BOOK NO. 33 – PAGE 162

RESOLUTION NO. 10-170 - RESOLUTION REAPPOINTING MEMBERS TO THE POLICE OFFICERS AND FIREFIGHTERS DISABILITY REVIEW BOARD

At the recommendation of the Boards & Commissions Committee, Councilman Bothwell moved to reappoint Stephanie Cooper, James Lewis and Dr. Stephen Hulkower to each serve an additional two year term respectively, terms to expire July 19, 2012, or until their successors have been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 163

Civic Center Commission

The following candidates applied for a position on the Civic Center Commission: Dan Breneman, Bill Jones, Jeffory Quick, Jeremy Gillespie, Katrina Bragg, James Richards, Carol Ann McLendon, Linda Brandt, Jeff Kenrick and Saul Chase. It was the consensus of Council to instruct City Clerk Burleson to arrange interviews for Dan Breneman, Bill Jones, James Richards, Carol Ann McLendon and Saul Chase (all City residents).

Civil Service Board

The following candidates applied for a position on the Civil Service Board: Daniel Bradshaw and Jacquelyn Hallum. Councilman Davis moved to appoint Jacquelyn Hallum, with said motion being seconded by Mayor Bellamy. However, due to the importance of this Board, it was the consensus of Council to instruct City Clerk Burleson to arrange interviews for both applicants.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte spoke about the issue of no sleeping in parks.

Mayor Bellamy thanked City Manager Jackson, his staff and the volunteers for the hard work during this year's Bele Chere festival.

The following claims were received by the City of Asheville during the period of June 4-24, 2010: Kenya Lee (Water), Robert C. Orth II (Parks & Recreation), Jameela Griffin (Water), AT&T (Water), AT&T (Water), Joey Webb (Fire), Otto Logan (Transit), Reginald Robinson (Sanitation), Loretta O'Hanlon (Streets), Caleb Whitaker (Streets) and Amber Schnar (Fire). These claims have been referred to Asheville Claims Corporation for investigation.

Closed Session

Mayor Bellamy announced that the formal meeting would be adjourned after the closed session. At 7:48 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the property is approximately 11 acres at Shelburne Road and hominy Creek Road. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (2) To prevent disclosure of information

that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 8:08 p.m., Councilman Davis moved to come out of closed session. This motion was seconded by Vice-Mayor Newman and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:08 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 10, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis (excused at 8:03 p.m.); Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilwoman Esther E. Manheimer

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Bothwell gave the invocation.

I. PROCLAMATIONS:

A. DONATION OF MEMORIAL WREATH BY WALTER PLAUE

Mayor Bellamy said that the City of Asheville is pleased to accept the gift of the Memorial Wreath from Mr. Walter Plaue. She thanked Mr. Plaue for his leadership, especially regarding veterans. She said this wonderful donation will be used for every patriotic holiday. Mr. Plaue said that this is a token from the Western North Carolina Veterans Memorial Board of Directors, in conjunction with Michael's craft store. He hoped the wreath would not just be used at the Veterans' Memorial, but at other places where there are patriotic ceremonies.

Parks & Recreation Director Roderick Simmons also thanked Mr. Plaue for the beautiful wreath and for Mr. Plaue's efforts in bringing light to the veterans.

B. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized (1) Fire Division Chief Mike Clark who has successfully completed the process that awards him the professional designation of "Chief Fire Officer" (CFO), one of only 680 CFO's worldwide; and (2) James Lee, Minority Business Program Coordinator, who was awarded, through a competitive application process, the North Carolina Economic Developers Association Scholarship to attend the N.C. Economic Development Institute held annually at UNC-Chapel Hill.

On behalf of City Council, Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

II. CONSENT AGENDA:

Mayor Bellamy asked that an item be added to the Consent Agenda regarding a Federal Aviation Administration grant offer to the Airport.

Mayor Bellamy said that Consent Agenda Item "I" will be removed from consideration to be rescheduled at a later date.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JULY 27, 2010

B. RESOLUTION NO. 10-171 - RESOLUTION IN SUPPORT OF THE CITY OF ASHEVILLE SUBMITTING AN APPLICATION FOR THE HUD SUSTAINABLE COMMUNITY CHALLENGE PLANNING GRANT

Summary: The consideration of a resolution in support of the City of Asheville submitting an application for the HUD Sustainable Community Challenge Planning Grant in the amount of $3 million.

HUD's *Sustainable Community Challenge Planning Grants* are available for local efforts to prepare for housing and economic developments that are connected to transportation projects. HUD funds of $40 million have been combined with DOT funds of $35 million to create a $75 million pool. Only government entities are eligible to apply. The maximum amount available per grant is $3 million. The grant requires that the Six Livability Principles adopted by HUD, DOT and EPA in the Partnership for Sustainable Communities be at the core of proposed activities.

The Housing and Community Development Committee recommends that Asheville seek $3 million to create a model for sustainable development in Asheville's East Riverside area. The proposed target area is roughly bounded by the French Broad River to the west, Patton Avenue (but including Hillcrest) to the north, the CBD and McDowell Street to the east and the Swannanoa River to the south. In summary, the proposed project outcomes are to complete pre-development activities that will lead to an increase in the supply and diversity of housing in that area, new economic opportunities and job creation along the riverfront, and an improved system of transportation that will connect residents of the area to jobs, training and services, and connect the city to the River. The goal is to advance projects to the point of being "shovel ready."

Specific activities proposed include:

- Create the regulatory environment for sustainable development by integrating existing master plans and revising ordinances and other codes to provide incentives for sustainability; and to create "form-based" zoning for the area;

- Conduct assessments of infrastructure, connectivity, vacant land and buildings, and general physical conditions in the east Riverside area to determine development capacity in that area;

- Complete pre-development surveys, engineering analyses, and other implementation readiness activities to enable construction of Town Branch and Clingman Forest greenways as soon as implementation funds are available; and to prepare for roadway and other improvements in that area;

- Complete pre-development surveys, engineering analyses, preliminary design, and other implementation readiness activities for City and other publicly-owned land in the east Riverside area;

- Assess public transit needs, potential ridership and other public transit factors to establish multi-modal and public-transit capital and operational plans specific to the east Riverside area;

- Assess the energy use in the area, and prepare for a multi-sectoral approach to reduce the use of non-renewable fuels and reduce the area's "carbon footprint;"

- Provide new capital to the City's Housing Trust Fund, to loan for land purchases for affordable housing development in the City's east Riverside area;

- Involve the community, especially residents, property owners and businesses operators in the east Riverside area, in determining the direction of development there;

- Support a broadly representative and effective partnership to perform the work under the grant, including City departments, non-profit organizations, the Riverfront Redevelopment Commission, Housing Authority and others

Pros:

- This grant could provide much needed funding to advance existing City plans. Often the most difficult funding to obtain is for the pre-development stage, to bring projects to the point of implementation;
- The practical partnership being formed will lead to projects that are comprehensive and coordinated;
- Targeting the east Riverside area will lead to "transformational investment" that will create new opportunities for people already living there, as well as incentivize new housing and economic development that will spur the sustainable reuse of existing property, including property now owned by the City;
- This grant will enhance the recommendations in the Wilma Dykeman Plan, and create opportunities for funding for implementation of the plan;
- The opportunity to fund the acquisition of land for future affordable housing development will enhance the ability of our partners to plan development that will be accessible to jobs, training and services, and for the City to plan for the efficient use of its resources to support that development.

Cons:

- There is a danger that unless grant-funded activities are carefully managed so that the planned implementation is feasible and allowable, plans will "sit on shelves."
- Although the nature of this grant lends itself to a targeted focus, targeting one area of the City may cause concern that other City areas are not being treated fairly;
- New resources can create expectations of immediate future funding; although HUD and other agencies have implied that this funding will be available, it will depend on the federal (and state and local) budget processes and constraints;
- New development brings inherent conflicts between competing interests. The success of any planning activity will be the ability to create win-win relationships.

This opportunity will support the following goals and objectives of Council's Strategic Plan:

- Affordable: this project will
  - Help create and preserve affordable housing by creating UDO and other code reforms to encourage and align affordable housing with access to transit;
  - Explore opportunities for public/private partnerships and innovative financing for affordable housing;
  - Provide new funding for the Housing Trust Fund;
- Fiscal Responsibility: This project will explore alternatives for master plan implementation and position the City to proactively seek funding opportunities for infrastructure maintenance and capital improvements;
- Green, Sustainable: This project will bring closer to reality the implementation of a multi-modal transportation plan in a strategic area of the City;
- Job Growth and Community development: This project will
  - Expand partnerships in economic development around common goals of sustainable economic development;

- Promote sustainable, high-density infill growth that makes efficient use of existing resources.
- Support the riverfront development partnership.

The City must provide evidence of commitment of 20% non-federal matching funds for specific transportation activities. Staff time and in-kind services will meet this match requirement. The non-transportation community development activities require evidence of at least 20% leverage, which can include federal, state, local and private funds committed to the purposes of the grant activities. No new funding is requested from the City to meet these match and leveraging requirements.

Because no new funding is requested from the City, and existing City staff are preparing the application, there is no immediate fiscal impact. If awarded, the City will assess the benefit and impact of accepting funding. By getting the proposed "pre-construction" steps done now, we will be better positioned to leverage future state and federal funding.

The Housing and Community Development Committee recommends that the City of Asheville apply for $3 million in funding from the HUD Sustainable Community Challenge Planning Grant program, for the outcomes described above.

In response to Mayor Bellamy, Community Development Director Jeff Staudinger briefly summarized the specific activities outlined above that are proposed to be included in the grant.

When Mayor Bellamy asked if there will be any benefits to the Hillcrest community in these efforts, Mr. Staudinger said that they are engaging the Housing Authority in this conversation. There are five public housing communities within or contiguous to this target area and we would be looking specifically at those communities and how they work into the opportunities for HOPE 6 or Choice Neighborhood funding and for other ways to improve the conditions for people living there.

RESOLUTION BOOK NO. 33 – PAGE 164

C. RESOLUTION NO. 10-172 - RESOLUTION IN SUPPORT OF THE CITY OF ASHEVILLE JOINING AS A CO-APPLICANT FOR A HUD SUSTAINABLE COMMUNITY REGIONAL PLANNING GRANT

Summary: The consideration of a resolution in support of the City of Asheville joining as a co-applicant (Consortium Partner) for a HUD Sustainable Community Regional Planning Grant in the amount of $2 million.

HUD *Sustainable Community Regional Planning Grants* are available for consortium of regional partners to create or improve a Regional Sustainable Development Plan. Consortia within metropolitan statistical areas (MSA's) or another defined region must include the largest city of the MSA, the next largest local government, the Metropolitan Planning Organization (MP) and at least one non-profit organization. For regions of Asheville's size the maximum grant is $2 million, and the minimum is $200,000.

Asheville will join with Buncombe County, UNC-Asheville/RENCI, Community Foundation of Western North Carolina and others as a necessary and required co-applicant of a regional consortium, with Land of Sky Regional Council as the lead applicant, to apply for $2 million of Regional Planning Grant funding.

Using the grant, the partners will unify elements of existing plans into a Regional Sustainable Development Plan with specific "Actionable Implementation Strategies," to be used to guide sustainable development within a five-county region, to include Buncombe, Henderson, Haywood, Madison and Transylvania Counties. The Plan builds upon the region's many local and

regional quality plans and the Western North Carolina Livable Community Vision, adopted by the Land of Sky Board in April of this year.

The proposed outcomes include:

- To forecast and model growth scenarios in development for 20 years, and to determine the integrated needs for affordable housing, transportation, job creation, energy, natural resource utilization and protection over that time period;
- To develop regional agreement about how the region will grow in a sustainable way;
- To establish regional priorities and criteria to guide development;
- To develop specific benchmarks to evaluate the region's progress towards sustainability;
- To engage as many stakeholders as possible in the development on this plan, including engaging and involving the general public and typically underrepresented or affected populations.

The Consortium will build this Actionable Implementation Strategy from the existing plans and work, and seek not to duplicate prior planning, so that the document and tools created support specific actions on the part of member governments, non-profit organizations and the private sector.

Consortia showing a threshold level of commitment in their application will receive a "Preferred Sustainability Status", whether their proposals are funded or not. HUD suggests that this designation will make these communities eligible for special funding in the future. Staff believes that future federal funding, led by HUD, EPA and DOT, will be contingent on developing sustainability plans.

Evidence of at least 20% in leveraged funds is required. This can include federal, state, local and private funds committed to the purposes of the grant activities and relevant and related activities. No new funding is requested from the City to meet these match and leveraging requirements. The grant application deadline is August 23.

Pros:

- Sustainable development could lead to growth that will support the City of Asheville and other partners in creating and preserving jobs, building affordable housing strategically located to transportation resources and job centers, and wisely using and protecting natural resources;
- Reaching a regional agreement about the definition and methods for sustainable development could lead to creative collaborations among local and regional entities;
- Federal "Preferred Sustainability Status" should benefit the region in obtaining future funding for development projects;
- Asheville will enhance its reputation as a sustainable community, and increase its attractiveness to businesses that will create new "green" job opportunities.

Cons:

- A new planning program could be perceived as duplicative of existing planning efforts and unnecessary;
- If governments and other organizations and communities of the region cannot agree about goals, objectives, definitions and benchmarks, regional consensus can be difficult to realize over time.

This opportunity will support the following goals and objectives of Council's Strategic Plan: (1) Affordable: this project will help create and preserve affordable housing by creating regulatory reforms and regional incentives to encourage and align affordable housing with transit; (2) Fiscal Responsibility: This project will align existing local and regional plans and position the City to proactively seek funding opportunities for infrastructure maintenance and capital

improvements as a "Sustainable Community;" (3) Green, Sustainable: This project will bring closer to reality the implementation of a multi-modal transportation plan for the region; and (4) Job Growth and Community Development: This project will (a) Expand partnerships in economic development around common goals of sustainable economic development; and (b) Promote sustainable, high-density infill growth that makes efficient use of existing resources.

The grant application requires evidence of at least 20% leverage, which can include federal, state, local and private funds committed to the purposes of the grant activities. No new funding is requested from the City to meet these match and leveraging requirements.

Because no new funding is requested from the City, and existing City staff are assisting in preparing the application (Land of Sky COG is doing the majority of the work), there is no immediate fiscal impact. If awarded, the City will assess the benefit and impact of accepting funding.

The Housing and Community Development Committee recommends that the City of Asheville join as a co-applicant for $2 million in funding from the HUD Sustainable Community Regional Planning Grant program, for the outcomes described above.

In response to Mayor Bellamy, Community Development Director Jeff Staudinger said that Buncombe County is also making an application. Staff is supportive of other applications as they are complimentary, not competing and not conflicting. We have been advised by HUD that the more applications from municipalities and governmental entities in this area, the more they are convinced we are ready to move towards these sustainable community activities.

RESOLUTION BOOK NO. 33 – PAGE 166

D. RESOLUTION NO. 10-173 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO A LICENSE AGREEMENT WITH SUNCOM WIRELESS PROPERTY COMPANY, LLC, FOR ANTENNAS AND RELATED EQUIPMENT ON CITY-OWNED PROPERTY AT 300 MERRIMON AVENUE

Summary: The consideration of a resolution authorizing the Mayor to execute a License Agreement with Suncom Wireless Property Company, LLC for antennas at 300 Merrimon Avenue, Asheville North Carolina.

The property located at 300 Merrimon Avenue is used primarily by the Asheville Fire Department, as the headquarters for the Asheville-Buncombe Arson Task Force. In 2001, the Asheville City Council authorized Triton PCS Wireless to install a concealed telecommunications tower and a concrete equipment shelter at this property. This tower is disguised as a flagpole and located on the rooftop of the fire training tower. For the past several years, Triton PCS and its subsequent designees have operated antennas and equipment at this site. The current license agreement between Triton PCS and the City of Asheville is now held by Suncom Wireless Property Company, LLC, and is to expire in January 2011. As such, Suncom has offered to enter into a new license agreement upon expiration based on the following:

(1) Term of five years, with a five year renewal.
(2) Annual license fee at an initial rate of $23,000 per year with 3% annual increases

The proposed License Agreement will enable Suncom to operate 3 panel antennas and 3 tower-mounted amplifiers, with 12 coaxial lines connecting to ground equipment. These facilities are separately metered and the tenant will continue to pay for the utility services. A tower analysis, to be paid for by Suncom, is required to assure that the roof is structurally capable of handling the load.

The initial rate was determined by gathering and comparing rates used by other municipalities across the state, including the Cary, Hickory, Charlotte and others. Formal findings were reviewed and endorsed by the Council's Planning and Economic Development Committee on August 20, 2008. Results indicate that base fee of $30,000 per annum represents fair market value for vertical stand-alone towers. For equipment located on top of buildings, as seen in this instance, a small decrease in the fair market rate is commonplace.

The Notice of Intent to enter into a License Agreement with Suncom was published on July 30, 2010, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the License Agreement is being requested.

This action complies with the City Council Strategic Operating Plan by contributing to fiscal responsibility. Strategic tower asset management, through the renewal and creation of new license agreements, presents the City with revenue enhancements to the General Fund.

Pro:

- Enhanced revenue through the license fee income

Con:

- None

In the initial year of the lease, FY 2010-2011, Asheville will receive $23,000 in revenue in the General Fund if the lease is approved by City Council. During the next four subsequent years, the lease rate will increase by 3 percent annually. Over the life of the five year lease, the city will realize more than $122,000 in revenue.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute the license agreement with Suncom Wireless Property Company, LLC on behalf of the City of Asheville.

City Manager Jackson responded to concerns raised by Mr. Douglas McDowell regarding this lease, noting that this is a continuation of a lease of equipment located on top of a building and the rate is comparable to other municipalities.

RESOLUTION BOOK NO. 33 – PAGE 168

E. RESOLUTION NO. 10-174 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR THE FEDERAL FISCAL YEAR 2007-08 AND FEDERAL FISCAL YEAR 2008-09 FEDERAL TRANSIT ADMINISTRATION ALLOCATIONS TO BE USED FOR THE PURCHASE OF TWO DIESEL BUSES AND TWO LOW FLOOR HYBRID DIESEL-ELECTRIC BUSES

Summary: The consideration of a resolution authorizing City staff to apply for the FFY 2007-08 and FFY 2008-09 Federal Transit Administration (FTA) allocations in the amount of $1,068,000 and $237,500 respectively to be used towards the purchase of two diesel buses and two low floor hybrid diesel-electric buses and for the Mayor to execute the appropriate documents to accept the grant.

The N.C. Dept. of Transportation (NCDOT) awarded the City of Asheville a FFY 2007-08 Federal Transit Administration allocation in the amount of $1,068,000 to purchase two diesel buses and to match previous earmarks that were awarded to the City through Congressman Shuler's office ($531,500) for the purchase of two hybrid diesel-electric buses. The City has already accepted $294,000 of the $531,500 in earmarks from Congressman Shuler's office, and now action is required to accept the remaining $237,500 as well as the $1,068,000 FTA allocation.

In total, the City will then have available $1,599,500 in federal funds toward the purchase of the four buses. The total cost of the four buses is approximately $1,999,375, so the federal funds will cover 80% of the cost. City funds will provide 10% of the cost, which equals $199,938, and City staff will request that the NCDOT provide the additional 10% of the required match. The City funding is already included in the Transit Capital Fund. Due to end of the fiscal year timing issues and the fact that the FFY 2007-08 funds are lapsing on September 30, 2010, staff moved forward and applied for the subject allocations which were approved by the NCDOT Board of Transportation meeting on July 1, 2010.

This action complies with the current City Council's Strategic Operating Plan by helping to achieve short-term and long-term energy goals and reducing city carbon emissions, helping to establish a multi-modal transportation plan by making transit system improvements, and helping to fully leverage funding for transportation improvements. This action also complies with the capital improvement recommendations included in the Transit Master Plan that was accepted by the City Council on October 27, 2009.

The Transit Commission supports the subject action.

Pros:

- The subject allocations would enable the City to continue replacing its aged transit system fleet which would produce savings in maintenance and fuel costs.
- The subject action would help reduce the City's carbon emissions.
- The FTA would fund 80% of the subject project cost.
- The NCDOT would fund 10% of the subject project cost.
- The City of Asheville's local match has been identified and would not require any additional allocation of funds.

Con:

- The City is required to fund 10% ($199,938) of the subject project cost.

The total cost of the subject project is about $1,999,375. The City has already been awarded $531,500 for two hybrid diesel-electric buses from Congressman Shuler's office. Federal Funds will provide 80% of the project cost, State Funds will provide 10% of the project cost, and City Funds will provide 10% of the project cost. The City's cost, which equals $199,938, is already included in the Transit Capital Fund.

City staff recommends City Council adopt a resolution authorizing City staff to apply for the FFY 2007-08 and FFY 2008-09 Federal Transit Administration allocations in the amount of $1,068,000 and $237,500 respectively to be used towards the purchase of two diesel buses and two low floor hybrid diesel-electric buses and for the Mayor to execute the appropriate documents to accept the grant.

RESOLUTION BOOK NO. 33 – PAGE 169

F. RESOLUTION NO. 10-175 - RESOLUTION AUTHORIZING THE MAYOR TO SIGN A GROUND LEASE AMENDMENT AGREEMENT WITH THE SKYLAND VOLUNTEER FIRE DEPARTMENT INC. FOR THE SOUTH ASHEVILLE POLICE SUBSTATION AT 9 MILLER ROAD SOUTH

Summary: The consideration of a ground lease amendment agreement, in the amount of $5,000 per year, between the Asheville Police Department and the Skyland Volunteer Fire Department, for office space at 9 Miller Road.

The Asheville Police Department has occupied office space on property owned by the Skyland Volunteer Fire Department since 1997. The ground lease amendment agreement has

expired and staff has negotiated a five year extension of this ground lease with the Skyland Volunteer Fire Department. City of Asheville Real Estate Manager Nikki Reid has conducted a detailed market analysis on the 2,000 square feet of office space and parking area and has determined its value to be $5,000 annually. The Skyland Volunteer Fire Department Board of Directors will meet at their regularly scheduled meeting in September to approve this ground lease. All documents are subject to approval of the City Attorney's Office to ensure adherence to Council's direction.

This action complies with the City Council Strategic Operating Plan goal to make Asheville the safest City in America based on approved metrics for similarly sized cities.

Pro:

- This action allows for the Asheville Police Department to continue operating its South Asheville Police Station with the most efficient use of tax dollars.

Con:

- None identified

Funding for this ground lease amendment will come from the Asheville Police Department's operating budget. The funds have already been budgeted within Council's Fiscal Year 2010/2011 adopted budget.

City staff recommends City Council approve the ground lease amendment agreement between the Asheville Police Department and the Skyland Volunteer Fire Department.

RESOLUTION BOOK NO. 33 – PAGE 170

G. MOTION TO EXTEND THE SERVICE HOURS FOR THE PUBLIC RESTROOMS THAT ARE LOCATED IN THE HALLWAY BETWEEN THE RANKIN STREET PARKING GARAGE AND HAYWOOD STREET TO 10:00 P.M. MONDAYS THROUGH SATURDAYS

Summary: The consideration of a motion authorizing City staff to extend the service hours for the public restrooms that are located in the hallway between the Rankin Street Parking Garage and Haywood Street to 10:00 pm Mondays through Saturdays.

During the Fall 2007, the City of Asheville opened public restrooms in the hallway between the Rankin Street Parking Garage and Haywood Street and they are available for use from 7:00 am until 6:00 pm Mondays through Saturdays. Currently, the Parking Services Division of the Transportation Department is tasked with the responsibility of cleaning and maintaining the restrooms.

Two full-time employees working four 10-hour shifts (Monday through Thursday and Wednesday through Saturday) clean and maintain the public restrooms. They also provide a presence to discourage possible vandalism. During the two overlap days, these employees also clean the City's three parking garages, which enabled us to cancel a $16,000 per year cleaning contract with an outside vendor. We typically budget about $60,000 per year to accomplish the task of cleaning and maintaining the restrooms.

The Parking Services Division currently has contracts with March Staffing and Asheville Staffing, two local companies, to provide temporary employees on an as-needed basis. Based on these contracts, the total cost to extend the service hours for seven months during the current fiscal year equals $9,828. The subject cost was calculated as follows:

- 4 hours per day times 6 days per week = 24 hours per week
- 24 hours per week times 52 weeks per year = 1,248 hours per year

- 1,248 hours per year times $13.50 per hour = $16,848 (yearly cost)
- $16,848 times 7/12 = $9,828 (cost for seven months)

Extending the service hours to 10:00 pm Mondays through Saturdays is possible and if approved, City staff recommends the following conditions:

- Use temporary employment services during the first year of operation to provide flexibility as it might be difficult to find people willing to work the subject hours (24 hours per week).
- Maintain the extended hours from September 1, 2010 through December 31, 2010 and from April 1, 2011 through June 30, 2011 (a total of seven months during the current fiscal year). City staff anticipates that usage for the extended service hours would be low during the winter months of January, February, and March.
- Collect customer usage data during the extended hours and share that information with the City Council during January 2011.

The Planning and Economic Development Committee approved the subject action on July 20, 2010, and recommended that it move forward to City Council.

Pro:

- The public restrooms would be open and available for use for a longer period of time Mondays through Saturdays.

Con:

- The total estimated annual cost equals $9,828.

The total estimated annual cost for this program is about $9,828. The cost of this program was not contemplated in the Parking Services Fund's FY 2010-11 budget. However, City staff believes that the cost of this service expansion can be absorbed within the existing Parking Services Fund budget, and is therefore not requesting a budget amendment at this time. City staff will monitor the impact of this program on the Parking Fund budget and report back to Council at a future Quarterly Financial Update if a budget amendment becomes necessary.

City staff recommends City Council approve a motion authorizing City staff to extend the service hours for the public restrooms that are located in the hallway between the Rankin Street Parking Garage and Haywood Street to 10:00 pm Mondays through Saturdays per the conditions set forth in the staff report.

H. RESOLUTION NO. 10-176 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO PURCHASE DIGITAL ALLY IN-CAMERA SYSTEMS BASED ON STANDARDIZATION NEEDS

Summary: The consideration of a resolution authorizing the Asheville Police Department to purchase Digital Ally in car camera systems based on standardization needs.

The Asheville Police Department (APD) currently has 16 Digital Ally DVM 550 plus In Car Camera systems installed. The APD has grant funds available to purchase additional wireless download camera systems through JAG 2007 (purchase request modified to cameras with remaining funds $49,554); JAG 2009 ($64,516), and JAG 2010 ($64,389) is pending approval. In order to maintain consistency with the operation of the camera systems; both in car and back end software management, it is necessary to maintain one product. The in car operation is an officer safety issue that requires consistent functionality among all cars equipped with cameras. This standardization will enable officers to utilize any cruiser equipped with a camera without any additional training on various camera systems.

This action complies with City Council's Strategic Operating Plan in the Focus Area - Safe - Asheville will be one of the safest and most secure communities when compared to similar cities.

Pros:

- Standardizing In-Car video systems will allow for consistent equipment operation and documentation of incidents.
- Increases officer and citizen accountability through recorded interactions.

Con:

- None.

The Standardization of Equipment will have not fiscal impact beyond what was requested with the original JAG grant authorizations. There will be maintenance and replacement costs for the equipment, which will need to be included in future fiscal year budgets.

City staff recommends City Council adopt resolution authorizing the Asheville Police Department to purchase Digital Ally in camera systems based on standardization needs with funding from JAG 2007($49,554), JAG 2009 ($64,516), and JAG 2010 ($64,389) pending approval of the grant.

RESOLUTION BOOK NO. 33 – PAGE 171

I. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH WASTE MANAGEMENT CAROLINAS INC. TO PROVIDE BULKY WASTE AND MUNICIPAL SOLID WASTE DISPOSAL SERVICES FOR THE PUBLIC WORKS DEPARTMENT, SANITATION DIVISION

This item was removed from consideration to be re-considered at a later date.

J. RESOLUTION NO. 10-178 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH HENSONS' INC. TO PROVIDE BRUSH AND LEAF DISPOSAL SERVICES FOR THE PUBLIC WORKS; PARKS. RECREATION AND CULTURAL ARTS; AND WATER DEPARTMENTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Hensons' Inc., to provide brush and leaf disposal services for the Public Works; Parks, Recreation and Cultural Arts; and Water Departments.

The City of Asheville Public Works Department, Sanitation Division provides year round, monthly collection of brush for residents in the City of Asheville. In addition, the Sanitation Division provides seasonal curbside leaf collection services during the period November 1st to January 31st. The Public Works Department Streets Division provides tree trimming and maintenance services for vegetation located within the City's rights-of-way The Parks, Recreation and Cultural Arts Department provides tree trimming services for their parks and recreational areas. The Water Department during the course of construction and maintenance generate a minimal amount of brush.

The City does not have a brush and leaf disposal facility and requires a permitted facility to accept the bush and leaves generated by City operations for disposal.

The City conducted a competitive bid process, receiving two (2) bids for the disposal of brush and leaves generated by the City. Hensons' Inc. was the lowest responsive and responsible bidder at a cost not to exceed $90,800.

This action complies with the City Council Strategic Operating Plan, Green & Sustainable and Safe by diverting brush and leaves from the landfill and processing in the form of mulch for reuse and by removing potentially dangerous vegetation in our parks and recreation facilities and from our right-of-ways.

Pros:

- Provides a key residential service for all residents of the City of Asheville.
- Provides a safe environment by trimming potentially dangerous vegetation in the City's parks and recreational areas and the City's rights-of-way.
- Provides a permitted facility to accept brush and leaves.
- Vegetation is kept out of the landfill and is ground into various types of mulch for reuse.

Cons:

- None

The $90,800 is budgeted in the FY 2010 – 2011 operating budgets of the aforementioned Departments.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract to provide leaf and brush disposal services with Hensons' Inc., not to exceed $90,800.

RESOLUTION BOOK NO. 33 – PAGE 173

K. RESOLUTION NO. 10-177- RESOLUTION AUTHORIZING THE MAYOR TO APPROVE A GRANT OFFER FROM THE FEDERAL AVIATION ADMINISTRATION FOR PROJECT NO. 3-37-0005-038-2010

Summary: The consideration of a resolution authorizing the Mayor to approve a Grant Offer from the Federal Aviation Administration (FAA) in the amount of $1,389,870.

The FAA has offered a grant agreement to the Asheville Regional Airport. This grant, in the amount of $1,389,870 is for (1) "A" Gates – Terminal Improvements and Renovations Project – Alternate 2 – Expansion of Holding area; and (2) "A" Gates – Terminal Improvements and Renovations Project – Alternate 3 – Expansion of Concessions Area (apron side).

RESOLUTION BOOK NO. 33 – PAGE 172

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Newman moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Smith and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. HOMELESS INITIATIVE UPDATE

Mr. David Nash, Chairman of the Homeless Initiative Advisory Committee, said that this is the annual update report on progress to date on the implementation of the 10-year Plan to End Homelessness.

He said that the Homeless Initiative Advisory Committee are appointed members representing public, private, non-profit, community at large members, and people who have experienced homelessness. Their goals are (1) adequate funding for housing and services; ()

housing and services reduce homelessness; (3) accurate data collection, evaluation, and dissemination; and (4) community collaboration.

Funding - In addition to $898,401 in renewal funding granted to the Asheville-Buncombe Continuum of Care for housing and services, HUD just announced an additional $44,503 in additional funding for housing and services.

While there was an increase in funding the community, it affords only additional financial assistance; associated funding for supportive services still must be developed.

Regarding private funding, key foundations and private donors continue to support agencies seeking to prevent and end homelessness. Regarding public funding, there is a continuum of care, Community Development Block Grant/HOME funding; recovery funding: HPRP; and Housing Authority subsidies.

Data Collection & Evaluation

UNC Study- A final copy of a longitudinal study from UNC is expected soon. Preliminary reports from the researchers suggest that emergency costs to the community decrease once people obtain housing.

HMIS – Our community's data quality allowed us to participate in the National Annual Homeless Assessment Report for the first time this year. Our participation makes us much more competitive for key federal homeless funds.

10 agencies currently enter data for 21 programs in HMIS. Within the past year, the community has increased the number of records in HMIS by 90%, and over 96% of those records are not missing data.

Housing Status is now included at intake at Jail and DSS allowing for early identification of people who are experiencing a housing crisis.

Evidence-Based Programs

SOAR: Asheville-Buncombe's SSI, SSDI. Outreach & Recovery Program (SOAR) leads the state in efficacy. Pisgah Legal Services is the lead agency, partnering five other local agencies to implement SOAR. The program works to help people who can not work due to a disability and who are experiencing homelessness access benefits within months instead of years. This past year, a $1:$62 return was measured for people accessing the SOAR program.

HPRP: The Homeless Prevention and Rapid Re-Housing Program (HPRP), funded by the American Recovery and Reinvestment Act offers agencies an opportunity to help people who are homeless or at imminent risk of homelessness by providing financial assistance and housing stabilization services.

Total number of people served to date:

112 people in 42 households have been prevented from becoming homeless
42 people in 26 households have left homelessness

HPRP spends an average of $1975/household to prevent or end homelessness. 60% of HPRP funds are used in direct financial assistance and 40% are used for housing stabilization services.

Community Collaboration & Outreach

In April, a Homeless Persons Memorial Day Service memorialized 25 who died while homeless in 2009.

A Faith Summit in February brought 70 people from a variety of faith groups together to strategize around how to end homelessness.

Landlord Lunch and Learn, scheduled for 8/13/2010, will offer landlords an opportunity to learn about housing programs managed by local housing agencies and learn about the legal rights and obligations of being a landlord.

Project Connect and the VA Stand Down are scheduled for September 10, 2010. It is expected that about 300 people will access barrier-free housing and services on that day. Volunteers are still needed.

Successes recognized are (1) unprecedented collaboration; (2) federal plan to prevent and end homelessness; and (3) focus on housing and services is yielding results. Challenges include (1) increased economic pressures; and (2) limited funding for services.

Ms. Amy Sawyer, Homeless Initiative Coordinator, reiterated that 10 agencies currently enter data for 21 programs in HMIS. Within the past year, the community has increased the number of records in HMIS by 90%, and over 96% of those records are not missing data.

When Councilman Bothwell asked how has this recession affected the number of chronic homeless, Ms. Sawyer said with our point in time count we have seen our numbers stay pretty stable. In fact, we have seen the number of people who are sleeping outside experiencing chronic homelessness decrease. We do know; however, that there are people who are experiencing homelessness and people who are in imminent risk of homelessness that if there isn't some type of prevention, their homelessness will become chronic.

In response to Mayor Bellamy, Mr. Nash explained the vet quarters and the positive difference it is making to our community.

On behalf of City Council, Mayor Bellamy thanked Mr. Nash, Ms. Amy Sawyer, and the entire Homeless Initiative Advisory Committee for their work on this very important Committee.

B. ASHEVILLE-BUNCOMBE CRIME-STOPPERS UPDATE

Mayor Bellamy said that this update will be rescheduled.

C. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 10-179 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH TRIANGLE J COUNCIL OF GOVERNMENTS ACCEPTING SUB-GRANTEE FUNDS FROM THE DEPT. OF ENERGY CLEAN CITIES GRANT

ORDINANCE NO. 3885 - BUDGET AMENDMENT ACCEPTING FUNDS FROM THE DEPT. OF ENERGY CLEAN CITIES GRANT

American Recovery & Reinvestment Project Manager Brenda Mills said that this is the consideration of (1) a resolution authorizing the City Manager to enter into an agreement with the Triangle J Council of Governments accepting sub-grantee funds from the Department of Energy's Clean Cities Grant to upgrade 29 fleet vehicles to CNG and upgrade the existing City of Asheville CNG station expand capacity; (2) a budget amendment, in the amount of $779,020, accepting the sub-grantee funds.

Through a grant in 2005 the City of Asheville installed the regions first compressed natural gas (CNG) fueling station. Mission Hospital and UNC-Asheville partnered with the City in this grant by investing in CNG fleets. Since that time the City of Asheville has also invested in CNG by growing the fleet to include 10 CNG vehicles. The Carolina Blue Skies Green Jobs grant will award the City of Asheville $779,020 to build upon the regions CNG leadership.

Regional partners who will also expand their CNG fleets through this grant include: The Biltmore Estate, Public Service of North Carolina (PSNC) Mission Hospital and the City of Hendersonville. To support this large scale effort the City of Asheville is also funded to expand the capacity of the existing CNG station.

This grant requires a 1:1 in-kind match with the City of Asheville. City of Asheville grant activities include:

Grant Activity	Grant Funds	In-Kind Match Funding
Upgrade 29 fleet vehicles to CNG	$425,326	$762,000 -- budgeted capital expenses for vehicle procurement in FY 10-11; FY 11-12; FY 12-13 coupled with the value of existing vehicles which will be converted through this grant
Increase capacity of existing CNG station	$353,694	$10,000 – project management costs
TOTAL	$779,020	$772,000

This action complies with City Council's Strategic Operation Plan in the following ways: (1) Leverage internal and external partnerships for pursuing capital improvements and infrastructure projects; (2) Continue to proactively pursue funding opportunities with state and federal economic stimulus packages; (3) Work with regional partners to create incentives for green building, energy conservation and energy independence; and (4) Identify strategies and costs for increasing the city's annual energy reduction goal to 4%.

Pros:

- Triple the city's CNG fleet
- Support municipal carbon reduction efforts
- Expand regional partnerships that support energy independence

Con:

- Matching funds of $10,000 project management costs

Matching funds of $10,000 for project management costs will be absorbed in the existing FY 2010-2011 Budget. As noted above, the remainder of the City's match requirement will be met from the value of vehicles that were previously purchased or are planned for replacement as a part of the five year Capital Improvement Program.

Staff recommends City Council (1) adopt a resolution authorizing the City Manager to enter in to an agreement with the Triangle J Council of Governments accepting sub-grantee funds from the Department of Energy Clean Cities Grant to upgrade 29 fleet vehicles to CNG and upgrade the existing City of Asheville CNG station expand capacity; (2) and approval of a budget amendment, in the amount of $779,020, accepting the funds.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-179. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 174

Councilman Smith moved for the adoption of Ordinance No. 3885. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 257

IV. PUBLIC HEARINGS: None

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 10-180 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE WACKENHUT CORPORATION TO PROVIDE CONTRACTED SECURITY SERVICES FOR THE CITY OF ASHEVILLE PARK SYSTEM

Parks & Recreation Director Roderick Simmons said that this is the consideration of a resolution authorizing the City Manager to enter into a contract with the Wackenhut Corporation to provide contracted security services for the City of Asheville park system.

On July 27, 2010, City Council reviewed the recommendation to enter into a contract with the Wackenhut Corporation for security services in the City's park system. Council requested additional information as outlined below, which is followed by the original information as presented at the July 27 Council meeting.

Below is the additional information requested:

- How does the cost of the contract compare to City employees providing the service?

  To provide the same level of park security as identified in the Wackenhut contract with in-house staff requires hiring two permanent and one temporary employee which is estimated to cost $104,399 per year including salaries and associated cost. It was determined to re-engineer to the contract security services at $76,445 resulting in a savings of $27,954.

- Will the employees of the security company be paid a living wage?

  Wackenhut employs skilled and well-trained security personnel. Wackenhut's bill rate for labor is $12.98 per hour.

- What kind of police powers are we handing off to the security company?

  Wackenhut will provide uniformed security officers to protect park property by maintaining a high visibility presence in parks and facilities to deter illegal activity and watch for signs of crime and disorderly conduct. Wackenhut officers have no police powers in that they do not carry a weapon, cannot make citations, and cannot make an arrest. In the event such action is needed, Wackenhut will contact the Asheville Police Department. The City currently contracts with Wackenhut for similar security services at City-owned parking decks and water pump stations.

The following is contract information: The City of Asheville has historically provided security in its 54 parks via one Park Warden to patrol all parks at 40 hours per week, one Park Ranger at Pritchard Park at 40 hours per week, and Asheville Police Department regular patrol

schedule at all other times. The security plan left significant gaps in coverage due to the large number of parks located in a large geographic area, and did not provide sufficient round the clock patrol. The lack of park patrol resulted in a high incident of vandalism and graffiti in parks.

In preparation for the City to accept security and maintenance operations of Pack Square Park, and recognizing the limited resources to provide security in the entire park system, staff conducted a cost comparison to provide a sufficient level of park patrol in all parks with in-house resources verses contracted services.

The re-engineered operations to provide full-time park security coverage include 1) Assign the two existing in-house park patrol employees to patrol downtown parks with an emphasis on Pritchard Park and Pack Square Park during most day-time hours, 2) Contract for security services to patrol all parks during night-time hours, and 3) Asheville Police Department supplement security operations. The cost of in-house park patrol employees and the contracted security service is shared between the Pack Square Park budget and the Park Maintenance budget in the Parks, Recreation & Cultural Arts Department.

To activate the contracted park security, the City conducted a competitive bid process for park security for the entire park system. The Wackenhut Corporation located at 9-H Drive Arden, North Carolina was the lowest responsive and responsible bidder at a cost not to exceed $76,445.32, and is proposed to be selected to perform contracted park security services within the City's park system.

This action complies with the City's Strategic Operating Plan in that it supports making Asheville one of the safest and most secure communities when compared to similar cities; and making smart investments that accomplishes lasting and tangible returns by investing in security services for the City's park system. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides ongoing maintenance and security for the City's park system.

Pros:

- Enhances making the City park system safe for park visitors.
- Re-engineer resources for ongoing, core park security services within same budget as previous year.
- Fulfill commitment for security of park system.

Con:

- None

The $76,445.32 to support the contract is budgeted in the FY 2010-2011 operating budget in Parks, Recreation & Cultural Arts Department, and shared by the Pack Square Park and Park Maintenance budget. This is a $27,954 savings compared to providing the security services in house via additional City employees.

6 City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract to provide park security with the Wackenhut Corporation not to exceed $76,445.32.

Councilman Bothwell noted that the Miami Transit System had to end their contract with Wackenhut Corporation because they were billing for ghost workers; however, he was not accusing the local provider of that behavior. He asked if our cost estimate includes oversight on the part of the City to make sure the workers are showing up. Mr. Simmons responded that the Parks, Recreation and Cultural Arts Department have a sensor that an id card must be swiped.

Councilman Bothwell noted that the company's billing rate is $12.98, but expressed concern that that is not what they are paying their workers.

When Councilman Bothwell asked if the Police Department was involved in this process, City Manager Jackson said that the Police Department was involved and if we use sworn officers, the cost would be significantly higher. This would not be the highest and best use of our sworn officers.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished a copy of the resolution and it would not be read.

Councilman Russell moved to adopt Resolution No. 10-180. This motion was seconded by Councilman Davis and carried on a 5-1, with Councilman Bothwell voting "no."

RESOLUTION BOOK NO. 33 – PAGE 175

B. RESOLUTION NO. 10-181 - RESOLUTION TO SUPPORT FEDERAL LEGISLATION IN PROPERTY ASSESSED CLEAN ENERGY (PACE) PROGRAMS

City Energy Coordinator Maggie Ullman said that this is the consideration of a resolution in support of Federal legislation allowing property assessed clean energy (PACE) programs.

At its January 12, 2010, meeting, the Asheville City Council directed staff to complete a feasibility analysis and pilot program design for the Asheville Energy Independence Initiative, a program that would allow citizens to invest in energy efficiency and renewable energy improvements on their private property through a loan issued by the City of Asheville and repaid through a property tax assessment. On June 22, 2010, staff provided an update to Council outlining state legislative and national regulatory home loan issues in relation to the PACE model. Since that time, the state legislative session has come to a close, and staff is providing an update on PACE progress.

- **State Legislative Update**: Although some barriers to implementing a PACE program in North Carolina were removed through the 2010 short legislative session (May- July 2010), some barriers remain. A state wide coalition of municipalities and stakeholders believes a legislative fix to these barriers is realistic during the 2011 long legislative session (January 2011- Summer 2011).

- **Home Loan Regulatory Update:** On July 6, 2010 the Federal Housing Finance Agency (FHFA) - the regulator and conservator of Fannie Mae, Freddie Mac, and the regulator of the 12 Federal Home Loan Banks - issued a statement explaining that a senior PACE lien is in violation of any Fannie Mae or Freddie Mac mortgage contract. The FHFA statement stated "significant safety and soundness concerns" with PACE liens assuming senior lien status since PACE liens may increase lenders' risk of non-repayment of mortgage loans.

- **Federal Legislative Update:** In response to the July 6 FHFA letter, a national coalition formed to pursue Federal legislation securing local governments' ability to implement PACE programs. On July 15, House Bill 5766 was introduced and has since referred to a committee. The national coalition is encouraging local governments to pass resolutions in support of federal legislation.

Pursuing a PACE model or other investments in renewable or energy efficiency improvements supports City Council's goal of becoming the southeastern leader in clean energy

and environmental sustainability, specifically the Council's objective to reduce energy consumption in the community.

Pros:

- Provides more time to gathers more data to best understand the local market and help better design a larger-scale PACE program
- Postpones expenditure of EECBG monies for use to leverage capital to begin a PACE program

Cons:

- PACE enabling legislation in not guaranteed
- Uses ARRA money in the long term

Up to $20,000 for the feasibility analysis to be used from EECBG funding and DOE technical assistance support.

Staff recommends City Council approve a resolution in support of Federal legislation that affirms local governments' ability to implement PACE programs.

Given the ongoing legislative action related to PACE, staff further recommends that City Council wait for clear legislative and regulatory authority to launch a PACE program in Asheville. By waiting for clear authority, Asheville would retain the remaining $250,000 in EECBG funds until the PACE model is deemed legally feasible, and then apply those funds toward launching a full-scale program. In the meantime, staff recommends conducting a formal market feasibility study intended to quantify the demand for a PACE program in Asheville, and thus scope any future capitalization of a PACE loan fund.

Alternatively, City Council could consider other opportunities for using the $250,000 in EECBG in the near-term, including funding a loan loss reserve fund in partnership with an existing loan service provider (local credit union or bank) to issue private loans for renewable and energy efficiency improvements; funding renewable and energy efficiency demonstration improvements through a grant process to residential or commercial properties; making energy efficiency investments in city-owned facilities; or other options.

Vice-Mayor Newman understood that laws take a long time to enact; however, he felt the next step is to talk with our local legislators to get their feedback and ask for their help. In terms of the $250,000 in EECBG funds, he felt we have at least three options. One option is to hold these funds in reserve in hopes that the legislative authority for the PACE programs will be worked out and we can begin implementation. The second option is that since the EECBG funds can be used for a revolving loan fund for clean energy community based financing, similar to what the PACE program would be, we could start a demonstration project using those funds for that purpose. It would be a good way to see how receptive the community is in getting involved in this effort. If there is strong community support we could go to our legislators and urge them to work this out. The third option would be to use those funds on our own facilities to make them energy efficient while we keep working on the PACE program. He is most inclined to get started with Option Two.

Councilman Davis could not support using the $20,000 on planning at this time. He could support Option Two with our own model but he would prefer to see a more clearly defined program outlined. On the other hand, we have $250,000 we could actually put to work now on our own facilities. He supported looking at all the opportunities and asking staff to report back to Council.

Throughout discussion, Ms. Ullman and City Attorney Oast responded to various questions/comments regarding the PACE program and the legislation, some being, but are not limited to: since we have adopted two resolutions to the state legislature requesting authority to

do this, why do you think this resolution will work; what is staff's thoughts on what is holding this up at the state level; it is unclear whether the City has the legal authority (even though it is a voluntary program) to have a special assessment placed on someone's property for this purpose; and a loan loss reserve fund would get the money into the community.

Councilman Smith supported the legislation moving forward as there is an urgency due to the climate change, necessity of reducing our carbon footprint, and reducing our energy demand. He suggested we get some sort of framework to look at the different options.

Rev. Scott Rogers, representing the Asheville-Buncombe Community Christian Ministries, explained why he felt the PACE program was important and supported Option Two. He urged Council to move forward as quickly as possible.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved to adopt Resolution No. 10-181. This motion was seconded by Councilman Bothwell.

Mayor Bellamy said that it is her understanding, from the N.C. League of Municipalities, that the hold-up is on the federal level and that is what stopped the momentum at the state level. She suggested a conversation with our federal legislators. She also supported looking at the Housing Trust Fund model and also the old Rehab Program model. The Rehab Program was a federally funded program that allowed cities to use CDBG funding to make investment in houses that were dilapidated on the rental side as well as the homeowners. Those are two successful models we have done in the past.

Councilman Russell could not support the motion in that the two largest issuers of these mortgage contracts are saying it can't be done. He understood the concept, but if someone wants to put solar panels on their roof they can get a home equity line of credit from their bank. He could not support government getting into the lending business for this program.

Vice-Mayor Newman felt that this is a new idea and there are high level discussions about the concept. He felt there are a lot of people in the housing financing institutions who would like to find a way to make this work. He felt that if these programs are run well, they should not have a negative impact on the strength of people who are homeowners.

Mayor Bellamy said that part of the issue with the PACE program is not having those regulations in place. She thought that was a main concern for the regulators in that they didn't want cities from all over the country developing their own PACE programs without any unified guidelines. She felt that by having the federal government look at some of the guidelines being put in place will provide some assurity that when a loan is issued that there are some stop-gap measures that the money will be recouped. She supports the program because we have been successful with the community with the Housing Trust Fund model and the old Rehab Program model. If we look at what is available to us and find a way that this loan program is paid back, it would help create jobs in the immediate future as well as pay us back in the revolving loan fund.

This motion made by Vice-Mayor Newman and seconded by Councilman Bothwell carried on a 5-1 vote, with Councilman Russell voting "no."

Vice-Mayor Newman moved to continue the discussion about the EECBG funds to September 14, 2010. This motion was seconded by Councilman Bothwell and carried unanimously.

C. RESOLUTION NO. 10-182 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS COOPERS HAWK DRIVE AREA

RESOLUTION NO. 10-183 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS ROYAL PINES AREA

Urban Planner Blake Esselstyn said that this is the consideration of resolutions approving the Annexation Services Plan for the Coopers Hawk Drive and Royal Pines annexation areas.

On July 27, 2010, the Asheville City Council passed resolutions of intent to annex two areas contiguous with the current corporate limits. These areas are the Coopers Hawk Drive Area and the Royal Pines Area. Staff had identified these areas as areas that meet the statutory requirements for annexation as set forth by the State of North Carolina and areas in conformance with current City annexation policy.

The second step in the annexation process is for the City Council to consider and approve an Annexation Services Plan for the areas to be annexed. The Annexation Services Plan includes a demonstration of how each area proposed for annexation meets the statutory qualifications for annexation and further demonstrates the capability of the City to provide urban services to these areas.

A public information meeting on the annexations is scheduled for September 13, 2010, and a public hearing is scheduled before the Asheville City Council on October 12, 2010.

Pros:

- Supports City of Asheville's Smart Growth Annexation program (regular program of annexations) as set forth in the City's 2025 Plan.
- Provides for an urban level of service for developed and developing areas adjacent to the existing city limits and includes those benefiting from existing City services in participation in the costs of such services.

Con:

- Residents of proposed annexation areas may object to such annexation.

The fiscal impact of these annexations is contained in great detail on pages 29-34 of the plan. General fund impact is enumerated on pages 33 and 34.

He said the annexation standards consist of (1) At least 1/8th of area's boundary must be adjacent to city; (2) Must meet 1 or more of 4 development tests: (a) Population density: estimated population of at least 2.3 persons per acre; (b) Subdivision: at least 60% of total acreage subdivided into lots of 3 acres or less, at least 65% of lots are 1 acre or less, and an estimated population of at least 1 person per acre; (c) Development: 60% of lots are developed, and 60% of total acreage in residential use or vacant consists of lots 3 acres or less in size; or (d) Nonresidential Urban Use: All lots within area are used for commercial, industrial, governmental, or institutional purposes; (3) May include non-urban area(s) provided: (a) Total of area(s) less than 25% of total annexation area; and (b) Each area must be adjacent on at least 60% of its boundary to existing city limit or area developed for urban purposes.

Using maps, Mr. Esselstyn summarized the Plan for Services as follows: (1) Coopers Hawk area (a) 31 parcels (or portions of parcels); (b) 41.8 acres; (c) 16 dwellings; (d) approximately 35 people); (e) residential land use; and (f) meets development test; and (2) Royal Pines area (a) 682 people; (b) 388.7 acres; (c) 670 dwellings; (d) approximately 1,595 people; (e) residential land use; and (f) meets population density test, subdivision test and development test.

Ms. Julia Fields, Urban Planner, then briefly reviewed the Plan for Extension of Services for police protection (one new police officer); fire protection; solid waste collection (additional automated truck, additional leaf truck and three additional positions, noting that there was an automated truck programmed in the 2007 annexations but never purchased pending the Biltmore Lake area litigation - even if the litigation is resolved favorably to the City, a truck will not need to be purchased as a new truck is programmed in these (2011) annexations); street maintenance in Royal Pines area includes minor repairs on Cedar Lane, Locust Court and Morgan Boulevard; overlays on Crestview Court and Fox Hollow Court; and reconstruction of Rosscraggon Court; water distribution (500' of 6" waterline and 3 additional fire hydrants in the Royal Pines area); sewer collection; and administration and other services.

Revenue summary for both areas total (1) ad valorem - $521,957; (b) state utility taxes - $90,361; (c) sales tax - $189,170; (d) Powell Bill - $40,112; (e) fees, charges and permits - $46,783 for a total of $888,383.

Annually recurring expenditures totals (1) police - $46,100; (2) fire - $97,914 (5-year duration for rural fire district); (3) solid waste - $224,645; (4) recycling - $24,284; (5) street maintenance – zero; and (6) street lighting – $2,520 for a total of $395,463. After five years total - $297,549.

Capital expenditure totals are $41,500 (Police); $82,526 (Fire); $45,500 (water lines); $594,277 (solid waste); $35,190 (rollout containers); $3,142 (street signs; $116,073 (street repair); and $4,000 (stormwater) for a total of $922,208. Further details are as follows: (1) Police capital costs include equipment ($6,500) and a vehicle ($35,000) for the new officer; (2) Fire costs show debt service to be paid to rural fire departments. Debt service to be paid after 5 years if debts still outstanding. Estimates are based on most recent information available from the rural departments. In most instances there is no outstanding debt and these expenses are never incurred by the City; (3) Water costs are for infrastructure improvements for fire protection (500' of 6" waterline and three additional fire hydrants). These expenses will be paid out of the Water Resources Fund; (4) Solid waste costs include potential economic loss (fifteen months) to private waste haulers ($209,277); additional automated truck ($270,000); and, additional leaf collection truck ($115,000). The payment to private waste haulers will occur in Year 1 ($197,651) and Year 2 ($11,626). It is proposed that both trucks be financed over a five (5) year period resulting in annual payments estimated at $90,000. [NOTE: An automated truck was programmed in the 2007 annexations but never purchased pending the Biltmore Lake Area litigation. Even if the litigation is resolved favorably to the City, a truck will not need to be purchased as a new truck is programmed in these (2011) annexations]; (5) Street Repair in Royal Pines includes minor repairs on Cedar Lane, Locust Court and Morgan Boulevard ($2,000); overlays on Crestview Court and Fox Hollow Court ($51,810); reconstruction of Rosscraggon Court ($61,463); and (6) Stormwater costs are for the replacement of six stormwater lids in Royal Pines. These expenses will be paid out of the Stormwater Enterprise Fund.

She then reviewed a comparison of the General Fund annual revenues/expenditures.

City staff recommends that City Council adopt the resolutions approving the Annexation Services Plan for the Coopers Hawk Drive and Royal Pines Areas.

Vice-Mayor Newman understood the state process but questioned at what time could Council amend the services plan if they hear compelling arguments or ideas in terms of services and infrastructure. Ms. Fields replied that Council can amend the services plan at anytime up to adoption of the ordinances on October 26.

Mayor Bellamy felt that staff should program information regarding needed sidewalks in the annexation services plan before the new residents are wrapped into the equation of all the other sidewalk needs in the City. Ms. Fields replied that typically those are dealt along with all the other needs of the City once the area comes into the City. The Royal Pines area would probably

become part of the Pedestrian Plan and staff would look at what their needs were and then they would be programmed in along with the rest of the City.

Mayor Bellamy said that as policy direction, she recommended instead of having over 600 people come to Council and say they want sidewalks, that staff program those into the annexation services plan so we will know what those expenditures are and get those done. She suggested the policy direction be changed to identify the annexation area sidewalk needs early on and factor that cost in.

Planning & Development Director Judy Daniel said that when staff assesses a need for sidewalks, a lot of factors are considered, i.e., density of the neighborhood, topography, access of the neighborhood to areas where people want to walk, etc. To do the assessment is a fairly complex matter which is why it is something done after the residents are brought into the City. Programming in sidewalk needs into the annexation services plan will add time into the process.

Mayor Bellamy said that if we don't include sidewalks in the plan then the projected expenditures are not true numbers. She felt sure that those residents will be asking for sidewalks because we provide sidewalks to other residents of the City. She felt if we approach it proactively by giving policy direction to program in sidewalks, then we will know that we will have to pay for those sidewalks over a given period of time. She felt that would be a good incentive to come into the City and have sidewalks.

Director of Transportation Ken Putnam said that we already have established policy direction under the Pedestrian Plan, but if we are looking at annexation and trying to consider that one of the perks that you would get as part of the annexation might be sidewalks, then we would look at them on a different tract. We already have in our Engineering Standards a policy that says if a street has less than 300 vehicles a day, then we probably would not put a sidewalk on that street at all. If it gets between 300-1,000 a day, there would be a sidewalk on one side of the street. If it's greater than 1,000 or if the street width is greater than 30 feet, then we would want sidewalks on both sides of the street. Given that criteria, we could certainly go through and create the potential costs for any kind of annexation area.

Mayor Bellamy reminded Council that the City spent $1.8 Million on a sewer line for the Brevard Road annexation area and immediately gave it to MSD and they are reaping the benefits. There's no guarantee that the sewer line will be used to its fullest extent, but we know that sidewalks will be used. That tells her that our policies need to be in line with what we want to occur.

Director of Public Works Cathy Ball said that this is a policy direction because it is not something that every citizen in the City has or a service that we provide every citizen. From an implementation standpoint she asked for Council's consideration of adding a provision that all of the property owners donate the right-of-way to install sidewalks. That is the biggest hurdle we have in going into neighborhoods to install sidewalks. Mayor Bellamy was agreeable to that provision.

Councilman Smith felt the sidewalks issue is an interesting idea and he would be interested in exploring this policy direction at perhaps an upcoming retreat.

Vice-Mayor Newman said there are a lot of neighborhoods that have been in the City for years that don't have sidewalks in places where people would like to have sidewalks. The houses were built at a time when developers did not build sidewalks or at a time when the City did not have regulations to require developers to build sidewalks. He didn't think it would be realistic to say that we can give everybody sidewalks. He reiterated that if there are some compelling arguments made that in key locations that sidewalks are really needed and if those are identified through this process he hoped we will do something about it.

Councilwoman Davis felt it was a good thought for future annexations. He felt that probably many of the streets in the Royal Pines area do not meet the criteria for sidewalks and felt we need to be careful about changing our annexation policy at this time in the process. He felt it was difficult to have staff assess the sidewalk needs this quickly, and to put that as one of our service provisions at this point is very difficult.

Mayor Bellamy felt that going forward the only way we will address the vast need of sidewalks in our community is to look at our policies to see how they can support the goal of meeting those needs. She asked for Council's support to direct staff to look at sidewalks as part of the annexation services plan and noted in the plan either as a reoccurring expense or a one-time capital expense for all new annexations.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-182. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Russell voting "no".

RESOLUTION BOOK NO. 33 – PAGE 177

Vice-Mayor Newman moved for the adoption of Resolution No. 10-183. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Russell voting "no".

RESOLUTION BOOK NO. 33 – PAGE 178

Closed Session

Mayor Bellamy then announced a short recess at which time City Council would conduct a closed session.

At 7:05 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 7:26 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-184 - RESOLUTION AUTHORIZING THE MAYOR TO DISPOSE OF CITY-OWNED REAL PROPERTY LOCATED ON PISGAH VIEW ROAD BY PRIVATE SALE TO ASHEVILLE AREA HABITAT FOR HUMANITY

Community Development Analyst Randy Stallings said that this is the consideration of a resolution authorizing the City to convey by private sale, an interest in real property acquired through an upset bid process in foreclosure proceedings for the Villas at Cedar Hill.

In summer 2003 and early 2004, a total of $217,000 was loaned from the Housing Trust Fund to Villas at Cedar Hill, LLC for the development of forty-two (42) units of affordable multifamily housing. Only ten (10) of the units were completed, and in May 2009 the City received notice that the senior lien holder had moved to foreclosure. The outstanding principal balance owed to the Trust Fund by Villas at Cedar Hill, LLC was $206,785.

The property went to auction, along with other property held as security by the senior lien holder. In an effort to protect the City's substantial investment, City Council authorized Staff to bid at the foreclosure auction for undeveloped parcels that could potentially be purchased below market value. In that auction, the property on which Phase I of the original development was sited, containing the ten (10) completed units and infrastructure, was purchased by Mr. Jim Hitt for $165,375. Although bidding as a private buyer at auction, Mr. Hitt is also Managing Member of Villas at Cedar Hill, LLC. Following the sale, the property was then immediately deeded from Mr. Hitt to a newly formed LLC (Resurgence Development LLC). Mr. Hitt, as Managing Member of Resurgence Development LLC, remains in control of that parcel.

The City purchased two parcels adjacent to the original site: a 9.806 acre parcel (PIN no. 9628.16-9767-00000) which was appraised in September 2008 at $461,000 and for which the City paid $270,000; and a 6.2 acre parcel (PIN no. 9628.27-4164-00000) with a deteriorated vacant home and barn with an estimated value of $291,400 and for which the City paid $115,500.

In total, new investment in the amount of $397,195 (which includes land purchase, payment of delinquent taxes, and attorneys' fees) was used to acquire the sixteen (16) acres of undeveloped land.

The estimated value for these sixteen (16) acres, based upon the appraisal of the 9.806 acre parcel in September 2008 was $752,000. The actual value in the current market is difficult to establish due to the lack of comparable sales. Assuming depreciation as high as 20%, the current market value would be in the vicinity of $600,000-$640,000. Additionally, that value assumes sewer and water access; currently, only water access is available. Sewer access is via an existing easement to an MSD-owned pump station. This station is located on the parcel controlled by Mr. Hitt. Once access to the pump station is obtained, an access fee of $107,000 will be payable to MSD. Total investment by the City to date, including the outstanding balance on the original HTF loans and the new investment used to purchase the subject property, is $603,980.

Letter of Intent: The property has been listed for sale by the City on the Karnes site since March 16, 2010. While there have been a handful of inquiries, no tentative offers had been received during the period of listing. On July 27, 2010, staff received a formal written offer from Habitat for Humanity to purchase the sixteen (16) acres from the City for the development of fifty-five (55) single-family homes. The homes would be sold to families below 80% of area median income. Habitat's offer is for a sales price of $450,000, with $300,000 at closing and an additional $150,000 to be applied as second mortgages to be held by individual homeowners as homes are completed and sold. A similar agreement was reached for the development of the Brotherton Subdivision. These second mortgages would be due and payable only when the houses were sold to families earning more than 80% of median income. The Housing and Community Development Committee reviewed the proposal at their July 29th meeting and have recommended that the offer be accepted.

The offer is contingent upon the City acquiring access to an existing easement which is needed to provide sewer access to the property. The MSD pump station is located on the parcel controlled by Mr. Hitt. If Council accepted the purchase offer from Habitat, City staff would prepare a formal offer letter to Mr. Hitt for purchase of the right-of-way at market value. If the offer is refused, the Housing and Community Development Committee is supportive of the City taking the necessary action to begin eminent domain proceedings. The condemnation would only apply to an existing easement and is less than 2,000 square feet.

Pros:

- Fifty-five (55) units of affordable housing will be created.
- All units will be constructed to Energy-Star and NC Healthy Built standards.
- The Housing Trust Fund will be partially repaid.
- Sale of the property provides additional liquidity for new Housing Trust Fund investments at a time when resources are extremely scarce.
- The creation of fifty-five (55) single family homes will increase the City tax base by an estimated $7.5-$8 million in new development.
- The proposed development complements other City investment in the area.
- A completed sale will end the ongoing expenses and responsibilities associated with owning the property (insurance, taxes, liability, legal fees).

Cons:

- The offer price may be less than the current market value.
- Approximately $155,000 of taxpayer funds will be written off as a loan loss to the Housing Trust Fund
- An additional $150,000 due to the Trust Fund will be deferred until homes are resold by the initial purchaser to a household below 80% of Area Median Income.
- The stated purpose of bidding on the property at auction was to protect the City Investment. The total City investment is $604,000; this sale would realize protection of 75% of the total investment.
- A potential condemnation for access to the sewer easement would require additional cash resources, and the City's role in that process may be questioned.

The project directly supports the City's Strategic Operating Goals: (1) *Affordable*: The development proposal is supportive of the City's goal of providing safe and decent affordable housing units to the citizens of Asheville; and (2) *Sustainable*: The proposed project provides new housing units located near transit lines, higher urban development densities, and encourages higher standards of energy efficiency. The project also addresses the priorities of the Consolidated Strategic Housing & Community Development Plan by increasing the housing stock, providing affordable homeownership units, building high quality energy-efficient housing, and coordinating development with transportation and jobs.

The current balance in the Housing Trust Fund is $210,776. Acceptance of the offer to purchase will increase the balance by $300,000 upon closing and incrementally when houses are sold over time to non-income qualified buyers. The total value of the fund (appropriations plus interest income less administration and loan losses) is currently $5,431,625. The total value of the fund will be decreased by approximately $155,000 when the actual loan loss is recorded.

The proposed development on the subject property is new construction and is anticipated to add approximately $7.5-$8 million dollars in new development to the City tax base.

The Housing and Community Development Committee recommends City Council approve a resolution authorizing the Mayor of the City of Asheville to execute documents and convey to Asheville Area Habitat for Humanity by private sale the City's interest in the real property located on Pisgah View Road, upon approval of the City Attorney at a final sales price of $450,000, of which $300,000 is due and payable upon closing and the remaining $150,000 to be applied as second mortgages to be held by individual homeowners as homes are completed and sold.

When Mayor Bellamy asked for public comments, none were received.

Vice-Mayor Newman said if that our plan was to sell this and get the highest market value. They were then approached by Habitat with a specific proposal and we thought that with

this proposal we would get a high percentage of our funds back sooner rather than later. The original purpose we made this loan to the developer was to encourage affordable housing, and he thinks this is a positive resolution while preserving most of the public investment. If this does not get approved, we will market it again and get as much value as we can.

In response to Councilman Russell, Mr. Stalling said that the Karnes site is a commercial listing site.

Mayor Bellamy was looking forward to getting this property back on the tax rolls. Also, the City did get 55 affordable single-family homes in our community. She was happy to be a partner with Habitat on this endeavor. She was also pleased to see the money being put back into the Housing Trust Fund for more affordable housing.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-184. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 179

B. SIDEWALK UPDATE

Director of Transportation Ken Putnam said that this is to update City Council on sidewalks within the City of Asheville including completed sidewalk projects, current sidewalk projects, and priority sidewalk projects prior to the East Asheville community meeting which is scheduled at the end of August.

Since the City of Asheville has more requests and needs for pedestrian facilities (sidewalks) than annual funding and staff resources can respond to, staff follows the recommended criteria included in the City of Asheville Pedestrian Plan (February 22, 2005) to prioritize projects. The city only has one surveyor and two Engineering Technicians that provide surveying and design services for all city departments.

According to information in the pedestrian plan, staff undertook a process of creating a sidewalk inventory and estimated that as of 1999 there were 132 linear miles of existing sidewalk (including state-maintained and city-maintained streets). Then in 2004, staff conducted a pavement condition rating survey (PCR) and through that process, estimated that there were 152 linear miles of existing sidewalk (including state-maintained and city-maintained streets). The pedestrian plan also identified about 108 linear miles of needed sidewalk linkages.

Staff has been working with March 2009 aerial photography over the past several months and to date, they have "mapped" about 165 linear miles of sidewalk (47 linear miles along state-maintained streets and 118 linear miles along city-maintained streets). This data confirms the data that is included in the pedestrian plan. Staff is also working towards creating a more accurate database for all future projects including tracking developer funded and constructed sidewalks to better track our progress.

As a part of that effort, staff has determined that during the past five fiscal years city funds and/or crews have been used to construct about 7.5 linear miles of new sidewalk at a total cost of about $1,371,000 (As staff's research continues, the subject numbers will continually be fine tuned).

City crews are currently constructing a new sidewalk along the east side of Beverly Road connecting to an existing bus shelter including revising the shelter to be ADA compliant. The project also includes a new sidewalk along the north side of US 70 (Tunnel Road) from

Governor's View Road to Lynnstone Court and then to Avon Road if the available funds hold up. The North Carolina Department of Transportation has partnered with the city and they are fully funding and installing the pedestrian signals and crosswalks at the intersection of US 70 (Tunnel Road) and Beverly Road. This project was developed as a result of the public meeting that was held on April 19, 2010, at Bell Elementary School and a priority listing of potential pedestrian improvement projects from the neighborhood groups that were represented at the public meeting. The subject project has a preliminary budget of $45,000 and when complete, it should increase the city's sidewalk inventory by about 1,200 linear feet.

A contract has been let to construct a new sidewalk along the north side of US 19-23 (Patton Avenue) from NC 63 (Leicester Highway) to Regent Park Boulevard. This project should be completed during November 2010 and when completed, it will increase the city's sidewalk inventory by about 4,800 linear feet.

As of July 1, 2010, available funds for new sidewalk construction total about $274,000 including $115,000 from the East Fee-In-Lieu-Of Fund, $109,000 from the West Fee-In-Lieu-Of Fund, and $50,000 from the CIP. Staff plans to spend the subject money during the next two fiscal years. Potential projects include, but are not limited to the following:

- US 70 (Tunnel Road), from SR 2032 (New Haw Creek Road)/Crockett Avenue to Avon Road – Total length = 3,400 linear feet +/- – Estimated Cost = $102,000 +/- (Project is currently in the survey and design phase).
- US 70 (Tunnel Road), from US 74-A (South Tunnel Road) to SR 2032 (New Haw Creek Road)/Crockett Avenue.
- NC 191 (Brevard Road), from I-26 to I-40 – TIP Project # U-3601 – Estimated Cost = $65,000 (Due to the NCDOT during FY 2011-12, project is currently under construction).

Given the city's limited resources, especially during the current economic climate, staff is committed to surveying, designing, and constructing new sidewalks in the most efficient manner possible including leveraging our resources with appropriate partners while making viable connections to existing infra-structure such as bus stops and/or shelters and community buildings, schools, parks, and libraries. Staff is currently looking at ways to revamp the CIP process and merging all of the approved master plans with the idea of putting together a realistic 5-year CIP plan.

The Pedestrian Plan identifies a priority policy and 6 criteria: (1) zoning jurisdiction; (2) proximity to schools, parks and community centers; (3) proximity to transit stops; (4) need linkages that complete a pedestrian thoroughfare or address a safety concern; (5) feasibility of construction; and (6) major thoroughfares and connector roads.

He asked for guidance of what Council would like him to present regarding sidewalks at the community meeting on August 31.

Mr. Putnam responded to various comments/questions from Council, some being, but are not limited to: is the 7.5 miles included in the 165 miles identified off the GIS maps; do we have a clear list of the top ten sidewalks we want to do based on available funding or does it continually shift based on engineering and other criteria; explanation of the $274,000 amount for sidewalks; and when does the Bicycle/Pedestrian/Transit Master Plan overlays come together for review.

Mayor Bellamy felt a list of top sidewalks would be helpful. For the community meeting she felt it would be helpful to explain the criteria used for determining if a sidewalk is warranted by the number of vehicles per day; the goat path and how much of that is the state's responsibility and how much is the City's; and information on the partnerships of the City, e.g., the N.C. Dept. of Transportation. She said that on the community meeting agenda there will be an item for our strategic plan and how this all ties together. She felt we should have some recognition that we

can approve resolutions supporting the N.C. Dept. of Transportation making sidewalks a higher priority within our City.

In response to Mayor Bellamy, City Manager Jackson said that we are working with Congressman Shuler's Office to provide estimates for construction of a link between the A-B Community Christian Ministries facility and the VA Hospital.

At 8:03 p.m., Councilman Russell moved to excuse Councilman Davis from the remainder of the meeting. This motion was seconded by Councilman Smith and carried unanimously.

C. CAPITAL IMPROVEMENT PLANNING

Administrative Services Director Lauren Bradley said that this is the consideration of scheduling a City Council Capital Improvement Planning Retreat in September 2010.

At the City Council retreat in January 2010, staff presented *Asheville 2010: A Financial Crossroads*, a paper that explored Asheville's financial structure in the context of meeting the community's expectations for services and capital improvements. Among other recommendations, the paper suggested that Asheville should begin to explore opportunities to diversify its revenue sources to achieve long-term capital investments, including exploring the feasibility of a bond program.

During the retreat, City Council updated its strategic plan for Fiscal Year 2010-2011and included a goal to "explore alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities," with a specific objective to "explore the feasibility of a bond program now or in future years, and [to] learn more about financing options outside of a property tax increase." In order to move this initiative forward, staff is seeking City Council approval to schedule a Capital Improvement Planning Retreat in September to gain Council feedback on the strategy and timing of expanding the city's capital program.

A municipality's capital improvement program (CIP) is a primary tool for implementing goals and priorities to achieve community transformation. The CIP plans for the construction and maintenance of the city's water and storm drain systems, roads, sidewalks, greenways, bridges, government buildings and facilities, parks, and other major projects and purchases. A comprehensive capital improvement program provides a framework for identifying and prioritizing these projects, a schedule for implementation, and a plan for financing the portfolio.

Communities with advanced capital improvement planning programs establish defined and recurring processes to identify projects and secure funding, typically for a five-year period. Projects are indentified and prioritized based on adopted master plans, needs assessments, citizen input and evolving community priorities. Funding policies that identify revenue sources, define how often the jurisdiction will pursue referenda and issue debt (biennially, every three years or every five years, for example), and how cash contributions (pay-as-you-go funding) will be used are established and adopted. Once a successful process is established, the jurisdiction repeats the capital improvement planning cycle as part of its annual budget process, and new debt is issued to fund emerging projects as old debt is retired.

Asheville has identified the need to enhance its capital improvement planning process and associated funding plans in order to meet the needs and expectations of a dynamic community. Asheville has a recent history of paying for capital needs through pay-as-you-go funding, meaning that most projects and improvements have been paid for on an annual cash basis. Project financing has been utilized on a small scale, case-by-case basis. The last successful General Obligation Bond referendum was passed in 1986 for street and sidewalk

improvements ($17,000,000) and Pack Place improvements ($3,000,000). This pay-as-you-go funding strategy has limited the size and scope of capital improvements the city has been able to make, particularly when compared to the scale of capital priorities indentified in the city's adopted master plans.

The fiscal impact of planning a half-day retreat will be minimal. Any associated costs will be covered by the existing City Council budget for meetings and retreats.

Discussions surrounding a comprehensive capital improvement program can be complex, and shared vision and support at the City Council level will be essential for a successful CIP that includes referenda as a part of the financing plan. In order to give the subject matter the policy dialogue it requires, staff is recommending that City Council schedule a capital improvement planning retreat on September 28, 2010, or another preferable date. Staff would propose scheduling the retreat for at least a half day at an off-site location, similar to January's retreat held at Warren Wilson College.

To take the city's capital planning process to the next level, staff would use time at the retreat to seek City Council's input on how a five-year capital improvement program should take shape along with direction on what funding strategies Council is prepared to pursue. Staff would be prepared to provide more information about specific items including:

- An overview of CIP best practices from other cities;
- Background on the city's past progress with capital projects;
- A review of the city's financial strength and debt capacity;
- An overview of current, internally identified and prioritized capital projects, and;
- Options for a financing plan.

Staff would seek Council input and direction on:

- Defining the criteria by which capital projects are identified and prioritized;
- The prospect of establishing a Capital Improvement Planning Committee made up of community leaders and citizens;
- Seeking additional citizen involvement and input on the CIP, and;
- Scheduling and financing options for the CIP, among others.

After the retreat, it would be staff's goal to take City Council's input and develop a comprehensive Capital Improvement Program and associated policies for City Council adoption later in the fall 2010. The adopted program would serve as the roadmap for Asheville's capital planning cycle in FY 2011-2012 as well as future years.

This recommendation was brought forward to and endorsed by the City Council Finance Committee on July 27, 2010. In addition to moving forward with a retreat, the Finance Committee recommended that City Council delegate the task of planning the retreat and its agenda to the Finance Committee.

Councilman Russell felt that instead of the Finance Committee planning the retreat and its agenda, he felt it would be more appropriate to have an ad hoc committee of Council.

After a brief discussion of the members, Councilman Russell moved to schedule a half-day capital improvement planning retreat with said planning of the retreat, the date, and its agenda be developed by an ad hoc committee consisting of Mayor Bellamy, Councilman Bothwell and himself. This motion was seconded by Councilman Smith and carried unanimously.

D. APPROVAL OF A WASTE STREAM REDUCTION PILOT PROGRAM

Director of Public Works Cathy Ball said that this is the consideration of a motion approving a Waste Stream Reduction Pilot Program intended to test the feasibility of a variable-rate waste program model in Asheville.

In January 2010, City Council developed a strategic plan that included a goal to continue to make Asheville the southeastern leader in clean energy and environmental sustainability. A specific action item under this goal states that staff should look for ways to take the city's sustainability program to the next level, specifically by seeking ways to reduce city-wide solid waste.

As part of the City of Asheville's Sustainability Management plan, special attention was focused on solid waste. The plan recommended that Asheville increase its role as a state leader in sanitation and recycling with an emphasis on expanding recycling by developing a market-based incentive program.

Variable-rate waste programs provide citizens with an economic incentive to reduce the waste they throw away because garbage bills increase as the volume of waste increases. Variable-rate pricing is being adopted in thousands of communities to create incentives for increased recycling in the residential sector.

Although above average when compared to other cities in the state, recycling over the last several years has been essentially flat in the City of Asheville. In order to be progressive stewards of our recycling service and increase waste diversion, staff has been investigating a variable-rate waste program that would include the benefit of single-stream recycling.

Analysis: The Waste Stream Reduction report outlines a variable-rate waste program model as well as a proposed pilot study (page 5) that will assess the viability of implementing such a program within the City of Asheville. The pilot program will involve 572 homes in three neighborhoods and will incorporate a detailed communication and outreach component. Analysis during the pilot study will provide additional details of the financial impact both to residents and the city which will in turn form baseline data for options to move toward a full or partial cost recovery model.

Pros:

- Reduction of land filled solid waste
- Increased awareness of recycled material for residents in pilot area
- Supports Council's sustainability goals

Con:

- Cost per month per household may increase if the single stream program is implemented citywide.

This action complies with City Council's Strategic Operating Plan in that Asheville will be the southeastern leader in clean energy and environmental sustainability by expanding community education programs and implementing ways to reduce city-wide solid waste.

Costs for the pilot program is $5,000, which will be funded through already budgeted funds in the Public Works Department.

City staff recommends City Council approve a Waste Stream Reduction Pilot Program. Results of the pilot program and recommendations for considering program expansion would be brought forward for City Council consideration in late 2010 or early 2011.

The pilot program will consist of (1) 572 homes pilot 95 gallon rollout recycle carts (a) Burton Street; (b) Norwood Park; and (c) Park Avenue; (2) single stream recycling; (3) bi-weekly collection; (4) 90-day pilot; and (5) October 1, 2010, to December 31, 2010.

The goals will be to reduce solid waste to landfill; more convenient for residents to recycle; provide data on the increase in amount of material recycled; evaluate effectiveness of the program; evaluate operation challenges with collection; and expand program in July 1, 2011.

Data collection will include a (1) increase in recycling; (2) decrease in solid waste; (3) participation in program; (4) specific hurdles to participation; (5) operational changes needed to facilitate program; and (6) willingness of customers to use varying can sizes with varying rates for trash collection.

The communication plan will consist of (1) pre-survey; (2) post-survey; (3) 90-day pilot for data collection purposes; (4) community meetings; (5) door hangers; and (6) Channel 11, press releases and social media.

Cost of pilot program is (1) $5,000 October 1, 2010, to June 30, 2011 (cost-plus to be recovered in reduced tipping fees; and (2) data collection for 3 months but customer will retain services until June 30, 2011, or full city-wide implementation date.

Future considerations (1) financially incentivize recycling; (2) implement a city-wide "variable rate waste" program; (3) utilize various sizes of trash containers; (4) evaluate the weekly/bi-weekly service; (5) city-wide implementation goal of July 1, 2011; and (6) Phase I of multi-phased approach to increase recycling.

City staff recommends approval of a waste stream reduction pilot program.

Mayor Bellamy felt we should have a street in east Asheville included in the pilot program.

In response to Councilman Russell, Ms. Ball said that the City pays the County $1.4 Million a year in tipping fees.

Councilman Bothwell suggested that when staff is collecting data, they should ask if people would be willing to go bi-weekly on their garbage collection.

It was the consensus of Council to approve a Waste Stream Reduction Pilot Program.

E. RESOLUTION NO. 10-185 - RESOLUTION APPOINTING MEMBERS TO THE CIVIC CENTER COMMISSION

Vice-Mayor Newman said that (1) the term of Mr. John Broadbooks expired on June 30, 2010; (3) Mr. J.L. Thompson has resigned as a member of the Civic Center Commission, thus leaving an unexpired term until June 30, 2011; and (3) Ms. Elizabeth Jones has resigned, thus leaving an unexpired term until June 30, 2011.

At the July 27 Council meeting, it was the consensus of Council to interview Dan Breneman, Bill Jones, James Richards, Carol Ann McLendon and Saul Chase. City Clerk Burleson was unable to make contact with Mr. Breneman or Mr. Chase to see if they were interested in being interviewed.

Vice-Mayor Newman moved to (1) appoint Bill Jones to serve a three year term, term to expire July 1, 2013; (2) appoint Carol Ann McLendon to fill the unexpired term of Mr. Thompson, term to expire July 1, 2011; and (3) appoint James Richards to fill the unexpired term of Ms. Jones, term to expire July 1, 2011. All terms are until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

Vice-Mayor Newman said that the Boards & Commissions Committee discussed County residents serving on City boards and it is the sense of the Committee to continue our policy of applicants being City residents. However, it was determined that it would be desirable to have County representation on two of our boards – the Civic Center Commission and the Transit Commission.

When agreement was expressed amongst Council, Vice-Mayor Newman moved to instruct the City Attorney to prepare an ordinance amendment (2) to the Civic Center Commission expanding it's membership by two individuals which will be appointed by the Buncombe County Commissioners; and (2) to the Transit Commission ordinance membership make-up to allow the Buncombe County Commissioners to appoint one member to the existing 7 member board when the next vacancy occurs. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 180

F. RESOLUTION NO. 10-186 - RESOLUTION APPOINTING A MEMBER TO THE CIVIL SERVICE BOARD

Vice-Mayor Newman said that Mr. John Miall has resigned as a member of the Civil Service Board, thus leaving an expired term until May 21, 2011.

At the July 27 Council meeting, it was the consensus of Council to interview Daniel Bradshaw and Jacquelyn Hallum. Ms. Hallum was unable to attend the interview date and time; however, she expressed interest on the Board.

After Council spoke highly of the candidates, Daniel Bradshaw received no votes and Jacquelyn Hallum received 5 votes. Therefore, Ms. Hallum was appointed as a member to the Civil Service Board, to serve the unexpired term of Mr. Miall, term to expire May 21, 2011, or until her successor has been appointed.

RESOLUTION BOOK NO. 33 – PAGE 181

G. BOARDS & COMMISSIONS

RESOLUTION NO. 10-187 – RESOLUTION APPOINTING A MEMBER TO THE AMERICAS WITH DISABILITIES ACT COMPLIANCE COMMITTEE

Vice-Mayor Newman said that the terms of William Madison and Kelly Rowe Rodriquez, as members on the Americans with Disabilities Act Compliance Committee (both representing the disabled community) expired on August 22, 2010.

The following candidate applied for the position: Mr. Kelly Stamey.

At the Boards & Commissions Committee recommendation, Vice-Mayor Newman moved to reappoint Mr. William Madison (representing the disabled community) to the Americans with Disabilities Act Compliance Committee for an additional three-year term, term to expire August 22, 2013, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

It was also the recommendation of the Boards & Commissions Committee and the consensus of Council, to postpone appointment of the second disabled representative seat (vacated by Ms. Rodriquez) until there is a need for the Committee to meet. It was noted that should there be a need for the Committee to meet the existing Committee can function.

At the suggestion of Mayor Bellamy, it was the consensus of Council for the Boards & Commissions Committee look at the potential of folding the Americans with Disabilities Act Committee's responsibilities into the Asheville-Buncombe Fair Housing Commission. City Attorney Oast said that he would research this issue.

RESOLUTION BOOK NO. 33 – PAGE 182

RESOLUTION NO. 10-188 – RESOLUTION APPOINTING MEMBERS TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

Vice-Mayor Newman said that the terms of Terry Meek (at large member), Pattiy Torno (owner of property within the River District), Rod Baird (member of the RiverLink Board of Directors), Marty Black (owner of property within the River District), and Jane Mathews (design professional) as members on the River District Design Review Committee expire on September 1, 2010.

The following candidates applied for the positions: Mr. Philip Ellis and Mr. Carleton Collins.

At the Boards & Commissions Committee recommendation, Vice-Mayor Newman moved to reappoint Terry Meek (at large member), Rod Baird (member of the RiverLink Board directors) and appoint Mr. Carleton Collins (design professional) to each serve a three-year term respectively, or until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

It was the consensus of Council to re-advertise for the two positions of owners of property within the River District. Mayor Bellamy suggested reviewing the Riverfront Redevelopment Commission's resource list for an applicable applicant and ask if they would be interested in serving on this Committee.

RESOLUTION BOOK NO. 33 – PAGE 183

BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Vice-Mayor Newman said that the term of Mr. Ron Storto (owner or operator of a hotel, motel or other taxable tourist accommodation with 100 or fewer rental units) as a member on the Buncombe County Tourism Development Authority expires on August 30, 2010.

The following candidates applied for a position on the Buncombe County Tourism Development Authority: Jared Breneman, Carol Ann McLendon and David Nutter.

At the recommendation of the Boards & Commissions Committee, it was the consensus of Council to delay consideration of this appointment until a confirmation is received that Mr. Ron Storto continues to be an eligible appointment.

RESOLUTION NO. 10-189 – RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Vice-Mayor Newman said that the terms of Marsha Shortell and Suzanne Jones, as members on the Asheville-Buncombe Historic Resources Commission, expired on July 1, 2010. In addition, two vacancies exist from Mr. Todd Williams (term to expire July 1, 2010, and Mr. Brad Brock, term to expire July 1, 2012.

The following candidates applied for a position on the Historic Resources Commission: Richard Fast, Susan West, Amanda Warren, E. Ashley Black, Jeremy Gillespie, Bill Allison and David Nutter.

City Council interviewed Ms. Amanda Warren and Ms. E. Ashley Black on February 23, 2010.

At the recommendation of the Boards & Commissions Committee, Vice-Mayor Newman moved to appoint Ms. Amanda Warren to fill the unexpired term of Mr. Brock, term to expire July 1, 2010; appoint Ms. E. Ashley Black to a three-year term, term to expire July 1, 2013, and appoint Mr. David Nutter, term to expire July 1, 2013 – all terms until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

In addition, after discussion at the Boards & Commissions Committee, Vice-Mayor Newman said that the Committee still feels that the Historic Resources Commission is too large (12 members) and suggested the membership size be re-considered to be further reduced next summer.

RESOLUTION BOOK NO. 33 – PAGE 184

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy encouraged all citizens to attend the North Carolina Dental Society free clinic on August 13 and 14; 2010, on the campus of the A-B Tech Community College to help meet the dental needs of our residents.

Councilman Russell congratulated Mr. Pat Thompson who qualified for the Senior U.S. Open.

Councilman Bothwell updated the Council on the volunteer sidewalk clean-up efforts.

Rev. Christopher Chiaronmonte questioned Council about the process to get unbanned from City parks. Mayor Bellamy asked City Manager Jackson to provide Council with the process in writing in order to provide it to Rev. Chiaronmonte.

Rev. Scott Rogers, representing the Asheville-Buncombe Community Christian Ministries (ABCCM), provided Council with the 2009 summary of the ABCCM homeless services. He said that the ABCCM provides homeless services in multiple settings which address: (1) homeless prevention and rapid re-housing; (2) day shelter; (3) shelter: emergency and transitional housing plus permanent supportive housing; (4) homeless education, training and employment; (5) incarceration services; and (6) medical, dental and pharmacy care. He said that the ABCCM is contributing the resources through a combination of church funding, community funds and government funds for a total resource amount of $2,628,000.

The following claims were received by the City of Asheville during the period of July 23 – August 5, 2010: Steven K. Stearns (Transit), Amanda Walker (Streets), Don Clayton (Water), Skyland Fire Department (Fire), Gregg Goodman (Water), Virginia Schmidt (Water), Cool Mountain Construction (Water), Progress Energy (Water), AT&T (Water), Darlene Hamlin (Parks & Recreation), Robert Sain (Water) and Casey R. Silvers (Fire). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:44 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 24, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman (arrived at 5:15 p.m.); Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 13-17, 2010, AS "MINORITY ENTERPRISE DEVELOPMENT WEEK"

Mayor Bellamy read the proclamation proclaiming September 13-17, 2010, as "Minority Enterprise Development Week" in the City of Asheville. She presented the proclamation to 2010 MED Week Board of Directors Chair Hope Huskey, who introduced other Board members in the audience briefed City Council on some activities taking place during the week.

B. PROCLAMATION RECOGNIZING THE 75TH ANNIVERSARY OF THE BLUE RIDGE PARKWAY

Mayor Bellamy read the proclamation recognizing the 75th Anniversary of the Blue Ridge Parkway. She presented the proclamation to Ms. Marla Tambellini, Marketing Chair on the Blue Ridge Parkway 75th Anniversary Board, who briefed City Council on some activities taking place during the anniversary celebration.

II. CONSENT AGENDA:

At the request of City staff, Consent Agenda Item "L" was removed from the Consent Agenda from consideration.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON AUGUST 10, 2010

B. ORDINANCE NO. 3886 - ORDINANCE INCREASING THE SIZE OF THE MEMBERSHIP OF THE ASHEVILLE RIVERFRONT REDEVELOPMENT COMMISSION AND TO CHANGE IT'S NAME TO THE ASHEVILLE AREA RIVERFRONT REDEVELOPMENT COMMISSION

Summary: The consideration of an ordinance approving the alteration of the Asheville Riverfront Redevelopment Commission's name and the expansion of Commission's membership.

At their regularly scheduled meeting on July 8, 2010, the Asheville Riverfront Redevelopment Commission (ARRC) unanimously passed a motion to ask Asheville City Council

to amend the ARRC ordinance's membership section to include an appointee from the Town of Woodfin. The motion was made by City Councilman Jan Davis and seconded by County Commissioner Bill Stanley. In discussion, ARRC members expressed interest in having the Commission reflect regional partnership in riverfront redevelopment efforts.

The ARRC subcommittee charged with recommending by-laws to the Commission met with City Attorney Bob Oast and Riverfront Coordinator Stephanie Monson on August 5, 2010. At this meeting, the by-laws subcommittee decided to ask the ARRC to consider altering the Commission's name from "The Asheville Riverfront Redevelopment Commission" to "The Asheville Area Riverfront Redevelopment Commission" in order to further reflect the intention for a regional partnership. At the ARRC's next regularly schedule meeting on August 12, 2010, the ARRC members were asked to consider said change. While no formal motion was made, the group unanimously agreed that altering the Commission's name to include the word "area" was a desirable change.

The proposed name change would make the Commission's official title "The Asheville Area Riverfront Redevelopment Commission" instead of "The Asheville Riverfront Redevelopment Commission".

The proposed membership change would increase the number of Commission members from thirteen to fourteen. The Town of Woodfin, as a new appointing board, would have one member on the Commission and would be exempted from the requirement that one half of any board's appointees shall own land or a business within the Riverfront District.

This action aligns with the following goals from Council's strategic operating plan: (1) Sustainable: Pursue a stronger riverfront redevelopment partnership and dedicated office; (2) Affordable: Support diversified job growth and small business development; (3) Green: Support open space preservation; and (4) Sustainable: Promote sustainable, high-density, infill growth that makes efficient use of existing resources.

Pros:

- Expansion of membership to the Town of Woodfin encourages participation by a more diverse stakeholder group towards the Commission's stated purpose: to support the sustainability and continued development of the Riverfront District.
- Alteration of Commission name better reflects a regional partnership on riverfront revitalization efforts.

Cons:

- Expansion of membership to the Town of Woodfin but not to other stakeholders may be perceived as exclusionary instead of inclusionary.
- Alteration of Commission name may not accurately reflect the Commission's current primary focus on the geographic area within the City's jurisdictional boundaries.

No fiscal impact is expected to occur as a result of these ordinance changes.

If Council approves of the ordinance adoption of it is recommended.

Councilman Davis spoke in support for the additional seat for the Town of Woodfin.

ORDINANCE BOOK NO. 26 - PAGE 259

C. RESOLUTION NO. 10-190 - RESOLUTION SETTING A PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF A PORTION OF DAVIDSON DRIVE

Summary: The consideration of a resolution of intent to permanently close a portion of Davidson Drive and setting the public hearing on September 28, 2010.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owner, Buncombe County, has requested the City of Asheville to permanently close a portion of Davidson Drive.

The Greenway Commission approved the closure, without restrictions, at their meeting on August 12, 2010.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close a portion of Davidson Drive and setting the public hearing on September 28, 2010.

RESOLUTION BOOK NO. 33 – PAGE 185

D. ORDINANCE NO. 3887 - BUDGET AMENDMENT FOR A GRANT FROM THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES FOR THE WNC NATURE CENTER

Summary: The consideration of a budget amendment, in the amount of $110,621, for a grant from the State of N.C. Dept. of Environment and Natural Resources through the Grassroots Science Museums Collaborative for the WNC Nature Center.

Each year the State of North Carolina allocates funds to the 25 to 30 member museums, science centers and nature centers in North Carolina for the Grassroots Science Museums Collaborative as supported by North Carolina Senate Bill 1741. WNC Nature Center is a member of the collaborative.

Funds will be used to enhance Nature Center operations and to make improvements to the facility and animal exhibits at the Nature Center.

The action complies with the City Council 2010-2011 Strategic Plan in fiscal responsibility in that it makes use of alternative funds to enhance the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements and public facilities. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative funding via grants.

Pros:

- Provide funds to enhance the well-being of the animals, operations and special projects, and services to Nature Center visitors
- Provide funds to assist in fulfilling standards and maintaining Nature Center accreditation with the Association of Zoos and Aquariums

Cons:

- None

The project budget for one-time operational and facility improvements at the Nature Center will increase by $110,621. This increase is funded by a grant from the State of North Carolina Department of Environment and Natural Resources through the Grassroots Science Museums Collaborative. Thus, there is no impact to the City's General Fund budget.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget of $110,621 for the WNC Nature Center with a grant from the State of N.C. Dept. of Environment and Natural Resources through the Grassroots Science Museums Collaborative.

ORDINANCE BOOK NO. 26 – PAGE 265

E. ORDINANCE NO. 3888 - BUDGET AMENDMENT TO RECEIVE DONATED MONEY FROM CITIZENS FOR PROCUREMENT OF SUPPLIES FOR THE PURPOSE OF FIREFIGHTER DONATION

Summary: The consideration of a budget amendment, in the amount of $3,527, to receive donated money from citizens, for procurement of supplies for the purpose of firefighter recognition.

The Asheville Fire Department has received donations from private citizens for the purpose of firefighter recognition. These donations have been received throughout fiscal year 2009/2010. The department would like to use these funds to purchase supplies for the annual 9/11 Memorial and Recognition program as well as to purchase holiday meals for on duty firefighters this fall and winter. The Fire Department's annual program allows employees to be recognized for professional accomplishments throughout the year. The meal purchases allow on duty firefighters to prepare a meal in their stations without securing these supplies on their own when many restaurants and stores are closed for the holiday.

This action complies with the City Council Strategic Operating Plan in that it helps to attract and retain quality employees and to ensure operational effectiveness by paying sound wages and benefits.

Pro:

- This action allows for recognition of firefighters without utilizing city tax funds. This action also provides for utilization of these funds as the donating citizens intended.

Con:

- None identified

These funds have been obtained through donations from private citizens for the purpose of firefighter recognition. No city tax funds will be utilized.

City staff recommends City Council approve the budget amendment to receive donated money from citizens.

ORDINANCE BOOK NO. 26 – PAGE 267

F. ORDINANCE NO. 3889 - BUDGET AMENDMENT FOR YEAR 3 FUNDING FROM THE N.C. DEPT. OF PUBLIC INSTRUCTION FOR THE 21ST CENTURY COMMUNITY LEARNING CENTER

Summary: The consideration of a budget amendment in the Grant Fund, in the amount of $104,000, for Year 3 funding from the N.C. Dept. of Public Instruction for the 21st Century Community Learning Center as part of the City of Asheville Weed and Seed Initiative.

In October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The program was introduced to the community via a series of public meetings to determine the concerns of target area residents and was received favorably with the understanding that residents would be integrally involved in the planning and implementation of the initiative. In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life.

Weed & Seed sites are required to leverage additional funds to carry out goals and objectives. The 21st Century Community Learning Center grant relates directly to the Weed & Seed prevention/intervention/treatment strategy and provides funds for afterschool programs serving youth who are academically at risk. Community-identified goals such as increased parent involvement in education and afterschool activities, and increased community input on programming are addressed through the programming.

The following sites will have 21st CCLC activities funded through this grant: Burton Street Recreation Center, Pisgah View Community Center, Shiloh Community Center, Asheville Middle School and Randolph Learning Center. Programming was initiated at the Shiloh Community Center last year as the Shiloh community has been identified as an area experiencing challenges similar to those in the Weed & Seed designated area.

Aboard Spaceship Earth (ASE) is one of many innovative teaching tools being used to engage students and improve academic performance through the program. ASE is a national academic based program using high tech tools and experiences to improve academic success. The use of certified teachers, law enforcement officers and community leaders ensures program participants are given opportunities to build trusting relationships in the community while at the same time improving self esteem. In 2009/2010, the City of Asheville 21st CCLC program provided services to 161 middle and high school youth with a majority of students (121) attending Asheville Middle School.

This action complies with the City Council Strategic Operating Plan in that it implements strategies to significantly improve public safety in neighborhoods in Asheville with the highest levels of crime and supports recreation and employment alternatives for youth at risk of gang exposure. This action also complies with the community-based Weed & Seed goals of 1) reducing crime and improving public safety, 2) enhancing the relationship between the community and law enforcement, 3) providing accessible programs for youth, 4) increasing parent involvement in education and afterschool activities and 5) increasing job readiness among youth and adults.

Pros:

- Program will bring much needed academic assistance to middle and high school students who are struggling in school and/or reside in high risk neighborhoods.
- Program works with community resources to affect change.
- Program will enhance the Weed & Seed strategy of providing a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs for residents of the targeted area.

Con:

- Additional funds will need to be leveraged during the 2011-2012 school year to sustain the program since funding decreases by 20% that year.

Grant revenue in the amount of $104,000 will cover all personnel and operating expenses related to the afterschool program at no additional cost to the City. Expenses include, but are not limited to: salary for a full time program director, part-time assistants, contracted teachers and resource providers, and supplies and transportation costs.

City staff recommends City Council adopt a budget amendment in the Grant Fund in the amount of $104,000, to establish a budget for Year 3 of the 21st Century Community Learning Center grant.

ORDINANCE BOOK NO. 26 – PAGE 269

G. ORDINANCE NO. 3890 - BUDGET AMENDMENT FROM THE N.C. ARTS COUNCIL TO SUPPORT THE PUBLIC ART 360 CONFERENCE

Summary: The consideration of a budget amendment, in the amount of $5,000, for a grant from the North Carolina Arts Council to support the Public Art 360 Conference.

Funding from the North Carolina Arts Council Creating Place grant will be used to support the Public Art 360 Conference, a Southeastern regional conference to be held in Asheville September 23 – 25, 2010 which celebrates and examines the collaborative benefits of public art for working artists, arts administrators, and the community as a whole.

The action complies with the City Council 2010-2011 Strategic Plan Goal of fiscal responsibility of exploring alternative funding for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department funding with alternative sources, enhance public confidence for and appreciation of the arts, and enhance facilitation and resources among arts interests.

Pros:
- Provides additional funds to support the Public Art 360 Conference

Con:
- None

The existing budget for a one-time project within the Cultural Art Program will increase by $5,000. This increase is funded by a grant from the North Carolina Arts Council. Thus, there is no net fiscal impact to the City's budget.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to increase the budget by $5,000 for a grant from the North Carolina Arts Council to support the Public Art 360 Conference.

ORDINANCE BOOK NO. 26 – PAGE 271

H. RESOLUTION NO. 10-191 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH MOTOROLA INC. TO PROVIDE MAINTENANCE COVERAGE FOR THE CITY'S RADIO SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with Motorola, Inc. to provide maintenance coverage for the City's radio system.

Motorola, Inc. has provided maintenance services for the City's radio communications system since installation of the system in 1992. The service agreements are renewed annually. The maintenance cost per unit of equipment for the renewal period of August 1, 2010 through

July 31, 2011 has increased by approximately three percent and this year we have included audio logging maintenance for unified and consistent maintenance support.

The renewal agreement reflects an annual charge of $142,877.40 and covers additional equipment purchased by the City that has come out of warranty during the past year.

This ties back to Council's goal of partnerships to improve critical services and supports the sustainable focus of maintaining our radio infrastructure. These partnerships also help the City recoup some of their investment in the system infrastructure through fees collected for use of the system.

Pro:

- By keeping the radio system in optimal condition the City is able to provide communication services to several outside agencies, thereby improving interagency communications.

Con:

- None noted.

Funding for this contract is included in the Adopted FY 2010-11 Information Technology Services and Police Departmental Budgets.

City staff recommends the adoption of the resolution for radio maintenance coverage for the term of August 1, 2010 through July 31, 2011.

RESOLUTION BOOK NO. 33 – PAGE 186

I. ORDINANCE NO. 3891 - ORDINANCE AMENDING THE CIVIC CENTER COMMISSION MEMBERSHIP SIZE TO INCLUDE TWO BUNCOMBE COUNTY APPOINTEES

Summary: The consideration of an ordinance expanding the membership of the Asheville Area Civic Center Commission to include two Buncombe County appointees.

The Asheville Area Civic Center Commission consists of seven members, all appointed by the City. This structure has existed since 1965, when the Commission was established.

Even though the Civic Center is operated by the City, it continues to be recognized as a regional facility. Expanding the membership of the Commission to include some county appointees reflects that regional status.

The Boards and Commissions Committee recommended expanding the membership of the Commission from seven to nine members, with two appointments to be made by the Buncombe County Commissioners. The terms would be for three years and shall be deemed to commence on July 1, 2010. Terms of current members would not be affected.

Pro:

- Recognizes regional status of Civic Center

Con:

- Some additional administrative cost.

The Strategic Operating Plan encourages the pursuit of regional partnerships to achieve common goals and pursue economic development strategies.

Adoption of the ordinance is recommended.

Councilman Davis stressed that this is an opportunity Buncombe County has afforded themselves by participating in partnership with the City. These two new appointments have been earned and not taken lightly. This is no less significant than a seat on any enterprise board. He felt it would be appropriate to put in place and then speak with the County Commissioners.

ORDINANCE BOOK NO. 26 – PAGE 273

J. RESOLUTION NO. 10-192 - RESOLUTION SUPPORTING THE ASHEVILLE FIRE DEPARTMENT'S PARTICIPATION IN MISSION HOSPITAL'S LIGHTEN UP 4 LIFE CAMPAIGN

Summary: The consideration of a resolution for City Council support for the Fire Department's participation in Mission Hospital's "Lighten Up 4 Life" campaign.

Mission Hospital is coordinating a regional "Lighten Up 4 Life" campaign to begin September 1, 2010, and has requested fire departments to participate in support of the overall effort to promote healthy diet and exercise in our community.

An organized kickoff event is being proposed to be held at the Municipal Building. Mission Hospital representatives will be there to kick off the event with Fire Department personnel.

Short video interviews in which participants share what healthy diet and exercise means to them would be taped. The interviews would then be utilized to advertise in media outlets to promote Mission's Lighten Up 4 Life campaign.

Pros:

- Participation in the event will allow individuals the opportunity to express their desire to promote healthy diet and exercise.
- The event and associated videos will make a visual statement about the City's support of health and wellness.

Con:

- None identified.

Participation in the event would require no significant fiscal impact involved.

City staff recommends City Council adopt a resolution of support for Asheville Fire Department participation in Mission Hospital's "Lighten Up 4 Life" campaign.

Ms. Maureen Skullen, representing Lighten Up 4 Life, thanked City Council and the Asheville Fire Department personnel for their support and participation in this program to get our community healthier.

RESOLUTION BOOK NO. 33 – PAGE 187

K. RESOLUTION NO. 10-193 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH SUNGARD, INC., FORMALLY HTE, TO PROVIDE MAINTENANCE COVERAGE FOR THE CITY'S HTE SOFTWARE

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with SUNGARD, Inc. formally HTE, to provide maintenance coverage for the City's HTE Software.

SunGard/HTE, located in Lake Mary, Florida, has provided maintenance services for the City's HTE Software since installation of the system in 1997. Since this company received the bid for this software in 1997 and its proprietary software, we must contract our maintenance though this company and they have no subsidiaries in North Carolina. The service agreements are renewed annually. This maintenance covers currently used critical applications such as payroll, banking, and other core financial services during the transition to the BTIP project. The maintenance cost of this software for the renewal period of July 1, 2010, through June 30, 2011, has been reduced due to transitioning to Munis.

This ties back to Council's goal of supporting a sustainable community through a strong commitment to infrastructure maintenance.

Pros:

- By keeping the HTE Software in optimal condition, the City is able to provide service that is more efficient to our city employee users, giving them the ability to do their jobs in a timely manner.
- This allows the City to provide excellent service to the customer of the City of Asheville and to the vendors who conduct business with the City of Asheville.

Con:

- None noted.

The renewal agreement reflects an annual charge of $118,342. Funds have been appropriated in the Information Technology Services Contracted Service and the Parking Services Interfund accounts.

City staff recommends City Council adopt the resolution for HTE software maintenance coverage for the term of July 1, 2010, through June 30, 2011.

RESOLUTION BOOK NO. 33 – PAGE 188

L. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN DOCUMENTS RELATED TO THE APPLICATION FOR AND IMPLEMENTATION OF TWO GRANTS FROM THE APPALACHIAN REGIONAL COMMISSION

This item was removed from the Consent Agenda from consideration.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Manheimer moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. HOUSING AUTHORITY UPDATE

Mr. David Nash, Deputy Executive Director of the Housing Authority of the City of Asheville (HACA), updated City Council on the following two focus areas: (1) HACA Five Year

Plan: Board of Commissioners has established priorities that are aligned with the Asheville Consolidated Strategic and Housing and Community Development Plan; and (2) Update on Recovery Act and Energy Performance Contract projects.

He explained the following City priorities and how they align with the HACA goals: City Priority #1: Provide affordable rental housing, particularly for households earning 60% of median income or less. (Greatest need is for one bedroom units.). HACA Goals: (1) Preserve Aston Park Tower with energy efficient and more attractive exterior (1-3 years), (2) Redevelop Aston garden apartments as workforce housing with emphasis on 1BRs (2-5 years); and (3) Replace burned Hillcrest units with 1BRs at another location (1-3 years). City Priority #2: Coordinate housing development with transportation, jobs, and services and make efficient use of available land and infrastructure. HACA Goals: (1) Collaborate with City on Sustainable Communities Initiative – including projects above (current); and (2) Expand job opportunities for HACA residents through programs like Asheville Green Opportunities (ongoing). City Priority #3: Help those with special needs – the homeless, the frail elderly, persons with mental illness, and people with disabilities and help people succeed through supportive services coordinated with housing. HACA Goals: (1) Participate on Homeless Initiative Advisory Committee – advocate for supportive services (ongoing); and (2) Include opportunities for the chronically homeless people with disabilities in all existing and future developments (ongoing). City Priority #4: Emphasize high quality, energy efficient, environmentally friendly designs. HACA Goals: (1) Complete Energy Performance Contract and Recovery Act work (ongoing - more below); (2) Complete implementation of green maintenance and operations commitments (1 year); and (3) Become an environmental and conservation leader in the Public Housing community (1-5 years). City Priority #5: Target low-wealth neighborhoods for improvements that will improve housing conditions and create stronger communities. HACA Goals: (1) Aston Park work above (1-3 years); and (2) Collaborate with City and other local partners on a Choice Neighborhoods or other major grant for Lee Walker Heights (2-5 years). City Priority #6: Preserve existing housing and focus preservation efforts to make rental and ownership housing affordable. HACA Goals: (1) Apply for additional Housing Choice Vouchers whenever possible (application pending); (2) Apply for renewal of Asheville Terrace Housing Assistance Contract (next 3 months); and (3) Complete Klondyke Homes comprehensive modernization project (3 years) (a) Refinance Woodridge Apartments to ensure long term affordability (next 3 months).

Energy Efficiency Projects include (1) Recovery Act ($5.9MM in grants): (a) 24 Klondyke Homes units complete; 18 more under construction; (b) Pisgah View Community Services Building complete; (c) Altamont roof - 29% complete; (d) Bartlett Arms roof -17% complete; (e) Hillcrest/Deaverview – prototype installed and approved; contractor to begin in September replacing ~3,450 windows; and (f) Pisgah View – contractor to begin in October replacing ~3,000 windows; (2) Energy Performance Contract ($3.6MM loan) (a) Water improvements 100% complete: 313 new dual flush toilets; 970 lower flow toilet retrofits; 3,600 lower flow aerators/showerheads; (b) Weatherization 55% complete: 970,000 square feet of living space in six developments; (c) Insulation 37% complete: 290,000 linear feet in walls; 350,000 square feet in attics – four developments; and (d) Livingston starting this month – 900 window replacements.

The Guaranteed annual energy savings: (1) Electricity - 680,000 kWh; (2) Natural Gas - 180,000 therms; (3) Water - 41 million gallons; and (4) Utility Bills - $757,000.

The Annual Carbon Dioxide Reduction: (1) Electricity - 490 metric tons; (2) Natural Gas - 900 metric tons; and (3) www.epa.gov/RDEE/energy-resources/calculator.htm.

When Mayor Bellamy asked if there was any way to begin to capture with those agencies related to us (e.g., Housing Authority, MSD, Airport) in some way all their carbon dioxide reductions, City Manager Jackson said that efforts are being made in the community to begin gathering that information on a community-wide and regional basis.

Mr. Nash responded to various questions from Council, some being, but are not limited to: are utility bills included in the rents; do the utility bill savings result in rental cost savings; how are crime statistics in our public housing developments; and how is the City progressing with the Weed & Seed program in Pisgah View.

Mr. Nash responded to Councilman Smith on the six grants the Housing Authority is exploring and gave more detail on the Lee Walker grant.

On behalf of City Council, Mayor Bellamy thanked Mr. Nash, Executive Director Gene Bell, Housing Authority Board Chair Brian Weinkle and the entire Board for their service.

B. ECONOMIC DEVELOPMENT COALITION UPDATE

Mr. Ben Teague, Senior Vice-Present of the Economic Development Coalition for Asheville-Buncombe County, said that the Economic Development Coalition (EDC) is a public-private partnership committed to: (1) Creating and retaining high quality jobs; (2) Serving as a trusted resource for better business decisions; and (3) Providing expertise and community leadership. They serve the Asheville Metropolitan Area which is a dynamic four-county region with a population of 412,672 and a workforce of 204,100+.

He said that the core services of the EDC enables businesses to thrive in Asheville. Using charts, he explained our region's industry employment patterns and how they chart the economic indicators.

Activities for Fiscal Year 2009-10 include (1) Business & Industry Services (a) announced six expansions totaling $16.4 Million in new capital investment and 304 new direct jobs; (b) made 130 industry visits; (c) hosted 4th Annual Homecoming Job Fair; (d) lead WNC Transportation Alliance; (e) launched Advanced Manufacturing Partners in Education; (f) conducted 4 educational business & industry seminars; and (g) facilitated Advocates for Industry Forum; (2) Small Business and Entrepreneurship (a) facilitated Business Healthcare Roundtable (i) HB 212 and ChamberCare; and (ii) actuarial cost comparison complete for HB 212 Demonstration Project; (b) five award programs; (c) nine Hot Tips educational seminars; (d) assistance to 600+ small business inquiries; and (e) leadership development training classes; (3) Research & Analysis (a) 400 detailed business research requests; (b) 20 presentations on business, industry, and economy for metro region; (c) 10th Annual Asheville Economy Outlook –audience of 350+; (d) six economic impact analyses; (e) green economy analysis; (f) data updates for 20+ public demographic and economic indicator reports; (g) Business & Industry Directory for 600+ local businesses; and (h) ACCRA cost of living index data for metro region; and (4) Marketing and Recruitment (a) 79 proposals in response to corporate RFI's; (b) hosted 62 new-to-area client visits representing 25 projects; (c) exhibited at 2 major aerospace and climate conferences; (d) five marketing missions to targeted communities; (e) aerospace direct mails and call campaigns to 48 companies; (f) real estate e-blast to 200 site selection consultants/brokers; (g) co-sponsored Asheville Metro site consultants "FAM" tour; (h) over 100,000 marketing exposures; and (i) solicited and assisted 6 firms with Recovery Zone Bond applications – RZ Bond allocations went to Ingles Markets and AVL Technologies.

Using a chart, he showed a June 2010 snapshot of active projects with a total investment of $327,250,000 and total jobs of 1,992. Also using a chart, he showed a June 2010 snapshot of lead development investment by sector for a total investment of $59,500,000 and total jobs of 537.

He explained the return on investment history since 2005-06 to the present. He also spoke about the alignment with the City's Strategic Plan in (1) Job Growth and Community Development (a) partnership with EDC fosters regional economic development strategies; (2) fiscal responsibility (a) EDC has demonstrated consistent positive return on investment; and (b)

EDC generates ongoing opportunities to attain community goals; and (3) Green and Sustainable, outlining several company examples.

In summary, he showed Council the EDC's success stories for Fiscal Year 2009-10, which amounted to a total of 549 jobs and an investment of $44,440,000.

Mr. Teague responded to various questions/comments from Council, some being, but are not limited to: review in detail of the June to June economic indicators; in the future, can the Board report back to Council on if they have any thoughts about things that the City of Asheville can do better in bringing in new business, and their thoughts on why are other companies are leaving; what things can we do as a City or a region to do a better job in the marketing and professional & business services areas; have you looked at what other regions in the country are doing in terms of marketing for specific areas; and does the economic indicator of the unemployment rate take into account people who have dropped out of looking for jobs; and further explanation of projects that are identified as active.

Mayor Bellamy said that AdvantageWest and representatives from Henderson County are preparing educational opportunities for us to look at the new norm when it comes to economic development and job growth.

On behalf of City Council, Mayor Bellamy thanked Mr. Teague and the entire Board for their service.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL USE PERMIT AT 105 BLEACHERY BOULEVARD

ORDINANCE NO. 3892 - ORDINANCE AMENDING A PREVIOUSLY APPROVED CONDITIONAL USE PERMIT AT 105 BLEACHERY BOULEVARD

Councilwoman Manheimer moved to excuse Councilman Davis from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Russell and carried unanimously. At this time Councilman Davis left the Council Chamber.

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

Regarding disclosure, Mayor Bellamy noted that she was on City Council when the overall development came to Council and Councilman Smith said that he was liaison to the River District Design Review Committee when this project came through that Committee. Both said they would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or

advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:00 p.m.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that the applicant is requesting review of site plans for a new retail structure at 105 Bleachery Boulevard. This project is being considered as an amendment to the previous Conditional Use Permit (Ordinance # 3275) which placed specific restrictions on any future development at this site.

The project site consists of a single parcel, 1.14 acres in size, located at 105 Bleachery Boulevard, just off of Swannanoa River Road. The area is zoned River District and located in the Riverbend Shopping Center. Other tenants include Wal-Mart, Kohl's, several restaurants and multiple smaller retail establishments. The eastern portion of the parcel (closest to the Swannanoa River and greenway) is within the 100 year floodplain (but no portion of the site is within the floodway) (City Exhibit 3 – Staff Report).

The applicant is proposing the construction of a 6,950 square foot building for retail tire sales and installation. The structure is a single-story with a mezzanine (30 feet to the tallest architectural element) and will be located towards the southwestern corner of the parcel (Attachment to City Exhibit 3 – Conceptual Landscape Plan).

Access to the site is proposed in two locations – an entrance (left-turn only) from the one-way Wal-Mart driveway on the eastern boundary of the parcel and a two-way entrance/exit on the western boundary into the existing Wal-Mart parking lot. The vehicular use area surrounds the structure to north and east and contains 42 parking spaces (including two accessible spaces and three bike spaces). The applicant is proposing elimination of parking lot lighting because of existing surrounding lighting. Staff approves of this request.

Landscaping required on the site and includes street trees, building impact landscaping, parking lot landscaping and a street buffer. 7,419 square feet of open space is provided (15% of the total site area). Sidewalks currently exist along two sides of the parcel and there is no change proposed.

The applicant has requested several modifications:

- *Number of Parking Spaces* – Number proposed (42) exceeds maximum allowance in UDO (20-35 for retail sales). Excess spaces will be pervious per 7-11-2(c.)2. and require additional landscaping. This request (per the UDO) has been reviewed by the Public Works department and granted approval by the Planning Director.

The following modifications need approval by City Council:

- *Front Setback* – A corner of the building encroaches approximately 5 feet into the front setback along Bleachery Boulevard. The building's placement on the lot is set to maximize internal site maneuverability of delivery trucks. Staff is supportive of this request.
- *Parking in Setback* – A portion of several parking spaces encroach into the front setback along Bleachery Boulevard. Staff is supportive of this request.

- *Interior Landscape Islands* – The applicant is proposing elimination of all required interior landscaping in order to provide an unobstructed area for maneuverability of large delivery trucks to and within the site. Although understanding of the applicant's concerns, staff feels there may be other design options available that would, at a minimum, allow for the placement of reduced interior islands that would not inhibit maneuverability of delivery trucks. Staff would be supportive of a request that reduces the number and/or size of interior islands and plantings but is not supportive of eliminating the requirement altogether. During the River District Design Review Committee discussion, the applicant offered to plant trees offsite (along the greenway) as a means of "alternative compliance." Alternative Compliance requests, however, are typically only considered when physical conditions or site constraints exist (not perpetuated by a preferred site or building design) and that the relocation and placement of landscaping elsewhere onsite will mitigate the impact created by the loss of plant materials, which would not be the case with the planting of trees offsite.

Ordinance No. 3275 was adopted by City Council on August 23, 2005, amending the original Riverbend Shopping Center Conditional Use Permit, conditioning the development of Outparcel 1 as "a 5,000 square foot high-turnover restaurant or similar use of an equal or lesser impact," with the primary concern being traffic impacts to the surrounding area.

Although the proposed development of the Discount Tire store is for a different use and a larger structure than the conditions specified for this outparcel, the number of trips generated is significantly less than would be generated by a 5,000 square foot high-turnover restaurant so there should be no expansion of the traffic impact.

The River District Design Review Committee reviewed the proposed design and their approval was granted on May 26, 2010. Details such as façade elements, materials, color scheme, landscaping and signage were discussed.

This proposal was recommended for approval with conditions by the Technical Review Committee on July 19, 2010. No members of the public were present to speak on this project and no comment has been received by staff. As an amendment to a Conditional Use Permit, this project was not required to be reviewed by the Planning & Zoning Commission.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The most notable natural feature in the vicinity of the site is the Swannanoa River, located more than 100 feet to the east. The easternmost half of the parcel is within the 100 year floodplain. Development on this portion of the site is proposed as surface parking, which is an acceptable use with the 100 year floodplain. Otherwise, the outparcel site is relatively flat, having been previously graded during demolition and

remediation of the Sayles Bleacheries site and development of the Wal-Mart / Riverbend Shopping Center. The proposed use and development of the land is compatible with natural and topographic features on the site and within the immediate vicinity.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
When the Riverbend Shopping Center was approved for development by City Council in 2002, development was included on this outparcel. Some retail / commercial use has always been intended for this site and it is expected to complement, not injure, the value of adjoining or abutting property.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The design for the proposed retail tire store has been evaluated by the River District Design Review Subcommittee, with specific attention given to façade materials, colors and landscape material for compatibility with the existing surrounding development. The building façade is proposed to match that of the nearby Walgreens and Aldi stores with a brick pattern and parapet design. Punched brick window openings with keystone detail will break up the predominant brick veneer siding. The site design is similar to this style of large retail shopping center layout.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
This outparcel development helps near the completion of a large retail development approved by City Council in 2002 that met multiple goals of the *2025 Plan* such as infill development on a previously disturbed site resulting in increased pervious area, environmental remediation from the Sayles Bleacheries use, siting commercial development at transportation nodes and other transportation elements such as the greenway, inclusion of bike lanes on the new bridge connection, improvements to Swannanoa River Road.

   The goal of *Job Growth & Community Development* recommends promoting infill development that makes use of existing resources – this proposal is situated on a outparcel of a large, existing retail development where infrastructure exists and has been improved in recent years.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The project site is located off of major transportation corridors (I-240 and Tunnel Road) as well as accessed via transit (Routes 12, 13, 26 & 29). Adequate water supply, fire and police protection, waste disposal and similar facilities are verified during the TRC review process.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The original traffic study's adopted condition outlines the allowable impact for the subject parcel as "the development of Outparcel 1 as 5,000 square foot high-turnover restaurant or similar use of an equal or lesser impact." The developer has provided an updated technical memorandum comparing the projected vehicular impacts for the 'High-Turnover Restaurant' category versus the 'Tire Store' category as described in the most recent edition of the ITE Trip Generation manual. Despite an increase of 1,950 square feet to the store footprint, the Tire Store development has significantly less new trips generated.

150

Therefore, this intended use is in accord with the outlined impact tolerance of the original traffic impact study.

Use	Size	Weekday Total	Weekday Peak Hour of Adjacent Street Traffic (7-9 am)	Weekday Peak Hour of Adjacent Street Traffic (4-6 pm)
High-turnover Restaurant	5,000 SF	635	58	55
Tire Store	6,950 SF	173	20	28

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pro:

- Proposed use (tire store) results in less traffic impact than originally intended use (high-turnover restaurant)

Con:

- Although the applicant has offered to plant trees along the greenway area as an alternative, elimination of interior landscape islands within the parking field is contrary to the stated goals of the landscape ordinance

Staff recommends approval of this amendment to the Conditional Use Permit for the construction of the Discount Tire use based on the lesser traffic impact. In addition, staff recommends approval of the modifications for parking in the front setback and for the encroachment of the structure into the front setback due to the somewhat irregular shape of the frontage along the roundabout. Staff is not fully supportive of the request to entirely eliminate interior parking islands and suggests a lesser modification to require reduced interior planting.

Mr. Charlie Robinson, representing the Civil Engineering Firm for this project, urged City Council for their support of this project.

After rebuttal, Mayor Bellamy closed the public hearing at 6:06 p.m.

Councilman Russell moved for the adoption of Ordinance No. 3892, amending the amendment to the Conditional Use Permit adopting the proposed plan for Discount Tire to include the modifications for parking in the front setback and for the encroachment of the structure into the front setback; and the modification request to allow a reduction in umber of plant materials and interior island size requirements that are required within the parking field with a condition that the plans be revised to show this reduction interior landscaping, subject to the conditions recommended by City staff; all subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) Plans shall be revised to include reduced interior island landscaping within the parking field. This mtoion was seconded by Councilman Bothwell and carried unanimously (with Councilman Davis being recused).

At this time, Councilman Davis returned to the Council Chamber and participated in the remainder of the meeting.

ORDINANCE BOOK NO. 26 - PAGE 275

V. UNFINISHED BUSINESS:

A. ENDORSEMENT OF ECONOMIC DEVELOPMENT INCENTIVE GRANT REQUEST FOR THE MONTFORD COMMONS PROJECT IN CONCEPT

At the request of Mayor Bellamy, City Attorney Oast said that Council has to make a policy decision on whether to extend the economic development policy to encompass residential housing developments.

Planning & Development Director Judy Daniel said that local developer Frontier Syndicate is seeking an Economic Incentive Grant (EIG) to support Phase I of the Montford Commons Urban Village project. The Montford Commons project was approved and rezoned in September 2007, and amended in June 2009.

When the economy changed, they proposed a public/private partnership (requiring a cash contribution from the City) that would enable them to proceed with the first phase of their project; as private lending sources had become difficult to obtain. A presentation from the developer and an initial staff assessment were heard at the April 2010 meeting of the Planning and Economic Development (PED) Committee. After some discussion, but no specific action, the PED Committee suggested that the proposal should also be heard by the Finance Committee.

At their June meeting, the Finance Committee heard the petition and a revised staff recommendation that did not recommend support for the request. The developers, however, then requested another type of support from the Finance Committee than had been requested at the PED meeting, an EIG in the form of tax relief similar to what was approved for the Biltmore Town Center development. The Finance Committee directed the representatives of Frontier Syndicate to submit required materials to the staff in time to consider the request and prepare a recommendation for the Council for the July 27 Council meeting.

The developers requested the Council to approve an EIG equal to the amount of anticipated property tax revenue generated by Phase I of the development for its first ten years after completion; and 100% relief of permitting fees and water tap fees. The staff report again did not recommend support for the proposal because it did not meet thresholds of expectations for projects requesting public support.

At the July 27 Council meeting, the development team was given suggestions by members of the Council about modifications they could consider to their request that would better align the request with Council adopted goals and policies, and past practice. Following that meeting the staff sent a summary of those suggestions to the development team, posed as a series of questions. Staff received answers to those questions (and a few more questions from the developers) on August 2, 2010. The staff assessment of those answers follow. On August 13, 2010, staff met with the developers to discuss their financial projections. At that time, the developers made the following revised request and an analysis by City staff of that revised request follows:

"Frontier Syndicate LLC plans to develop 250 rental units and 390 structured parking spaces that specifically targets Asheville's workforce by providing housing that is practically sustainable and affordable. The developer has previously requested economic assistance. In response to input from City Council at its July 27th meeting and subsequent communications with City staff Frontier Syndicate LLC is amending its request as follows:

1. The developer requests an economic incentive grant equivalent to:
    a. The City property taxes (in excess of currently assessed taxes) that will be generated by the project for the first five years after construction is complete.
    b. Relief of one-half of the permitting fees of $350 per unit. This represents an estimated consideration of $43,759 ($87,500 * 50%).
    c. Relief of one-half of the tap fees of $103,012 representing an estimated consideration of $51,506.
    d. The grant would also be subject to reduction to the extent of any costs incurred by the City to defend the grant.
2. The developer will incorporate significant green development strategies into the project but without burdening the project with certification costs.

Although the $3 million financial gap remains the same, the rationale for this revised request is that with the City's support, subsequent investment might be enticed.

Other Council Concerns

Parking

Our Lender has first deed of trust on all of the real property. In order for the HUD funding to close, our Lender must agree to release their property so that it will be owned outright by the Montford Commons development. They will do this for the six acres upon which the current design is located, but they will not do this for the 3+ acres of prime real estate along I-240 for its use as a surface lot. This would preclude their ability to market and/or sell this property to another interest.

Our HUD consultant, architect and builder all agree that changing the parking deck to a surface lot is not feasible and would be detrimental to our current Lender and the HUD Lender. Also, a surface lot is contrary to all community input to date. Our perception is that three and a half acres of surface parking right along Hill Street would create an unsightly project and ill-will with the community.

Regarding a reallocation of funds from a deck to surface parking, the financial structure in place does not allow for reallocation, per se. If the scope of the project was changed to remove the parking deck, then the financial structure would also change and the same basic "financial gap" dilemma would still exist, likely to a greater degree.

Green

There are at least four different options for obtaining defined "green" certifications. The most expensive is LEEDS but there are other choices (outlined in Exhibit A2a - A2c to the original proposal) including Energy Star and NAHB. The project gains many green points as it is presently designed due solely to its proximity, location and site plan (see LEEDS worksheet: A2c) but the administration costs of the "certification" process is prohibitive. We request that Council allow us to develop in a manner consistent with "getting the points" without the requirement to obtain formal certification.

Due to timing constraints we request that City Council consider and approve this request at its August 24, 2010, meeting."

Staff Analysis

The list of questions below reflects the comments the staff heard from the individual Council members, related to their concerns and to get their support for an ECI. The developer answers and the staff thoughts follow the questions:

1. *Would you be able to reduce the grant request from 10 to 5 years? If so, what changes to the project would result from that reduction?*

The developers state that there are two constraining dynamics that limit what they can do. Their HUD loan guarantee required commitment to a design, and the project was designed as minimally and functionally as they could. Because of that, it would be extremely difficult and costly to change the plan design. Second, because the lender (Carolina First Bank) has the first position on all the land holdings they have to release property to be used for development.

They suggested that they could reduce the term of the request from 10 to 6 years, but would need the City to pay for installation of the Phase I infrastructure, which would have a lower cost if the City did the work. They noted that this was the process used for the Biltmore Town Square development.

The staff does not recommend support for this suggestion, as it essentially reverts back to a proposal requiring initial fiscal outlay for the City for the infrastructure needs for the project, without providing substantial public benefit.

On August 13, the developers proposed reducing their request to $750,000, equivalent to the estimated increase in City taxes upon completion of the construction for a five-year period commencing upon receipt of the Certificate of Occupancy. This essentially reduces their request by 50%. It removes from consideration City up-front investment in infrastructure, as the EIG would only be payable upon completion of the project.

2. The EIG would mean the City would not have revenue for the established timeframe but would need to provide services to the project. In this time of very tight city budgets that will be problematic. Could you consider a lower percentage of relief from taxes to compensate for this?

The development team asked if the City could provide an estimate of the anticipated service costs from the project. A review found that there would be small increases to budgets of Public Works and Fire and Rescue, and a bit more for Police. Police estimates that a 250 unit complex with parking garage adjacent to the CBD could yield an appreciable need for service calls, with an average cost per year of somewhat over $25,000 per year – escalating higher over the years. The use of city facilities by residents of the complex are more difficult to estimate, but will also contribute to city expenses.

The developers note that private garbage service is a possibility, but private garbage service would be required anyway for a large multi-family project. They suggest that more could be considered if the City contributed to installation of the infrastructure.

The staff does not believe that the answer meets what we understood to be the concern expressed by the Council. It implies that something would be considered only if the City had more fiscal participation in the project.

As noted above, the developers have now proposed a significantly lower percentage of relief from taxes.

3. Can you reconsider and add additional "green" features, "Healthy Built" features, or LEED certification? Maybe things like solar panels for water heating? This seemed to be important to several members of the Council.

The developers state that there are four options for obtaining defined "green" certifications; and the most expensive is LEED. They state that the goals of Energy Star and NAHB are easier to reach. They state that the project as already designed "gains many green points" due to its location and site plan; but the administrative costs for getting LEED certification (developer estimate is $500,000) are prohibitive for them. No additional elements have been added; however, the developers state that the project already incorporates significant energy conservation elements, as well as green locational and siting elements.

They ask if the Council would agree that the points they get on the LEED forms are sufficient, without requiring the formal certification. They would invite staff inspections, or other third party inspections, if these could be provided at a nominal cost to the developers. The staff tends to agree with the request, as the cost of certification itself (not only the construction costs) can be prohibitive for a very large project. The request could be considered, but the design would need to include additional energy conscious elements.

4. Would you consider reducing your costs by converting from structured to surface parking for this Phase? The staff would support that change with a commitment to the garage in a future Phase. How much could your grant request be reduced if you did this? How would that reduction in your costs alter the pro forma submitted previously?

It appears that removing the parking garage from this Phase would allow reallocation of those funds elsewhere, improving your "bottom line" and perhaps allowing you to invest in city strategic elements like LEED certification, trail development, making a percent of units affordable or a percent of tax revenues to flow to the Housing Trust Fund.

The developers state that Carolina First Bank will not release any additional land for use by the development to be used for a surface parking lot, even if that is considered an interim use of the property. The rationale is that this would preclude the ability of the bank to market/sell the property elsewhere should the developers default because the area that would be suitable for surface parking is considered the most highly valued part of the assembled properties.

They state that they consulted with their HUD liaison and the bank and concluded that a change to a parking lot is not feasible, primarily because it would be fiscally detrimental to the bank. They further state that this would be contrary to community input they have received which strongly prefers structured parking. Finally, they state that the financial structure for this project will not allow modifying it.

The staff believes this to be a rational reason for their inability to consider an alternate form for parking for the development. They cannot act without support from HUD and the bank; and these partners appear to be unwilling to modify the terms of their participation. This is unfortunate, but is not an uncommon situation between developers and their lenders these days.

The staff does not believe, however, that this unfortunate situation changes the fact that it would be a substantial precedent for the City to give fiscal support through an EIG for a project that has only modest public purpose, and includes construction of a structure that is not really needed for the project to move forward. This is a financial bind for the developers, and it seems a short-sighted decision on the part of the bank, but the staff does not see that such a situation is sufficient reason for EIG participation by the City.

5. Would you reconsider allocating some units for affordable housing? Or would you consider an agreement to restrict a percentage of units to those at "workforce" housing income levels? Or could you accept a lower grant and suggest that Council earmark a percent of future annual tax revenue to the Housing Trust Fund?

The developers make a point that when the cost of transportation is factored into housing affordability, this project would likely to meet new indexes that measure affordability (45% of income toward housing and transportation costs).

Additionally, they have proposed to consider a form of "preference queue" that could be offered to civil service employees. They suggest that City staff would manage such a list. When a unit because available, the rental office would first call that list manager to find the next person on the wait list.

The staff believes that this proposal could work, and could address one of the concerns with the project – but would entail a cost for the City in allocating staff time to maintaining the list. It also raises a question as to whether it should be only government employees on such a list. It does not change the proposed rent structure.

6. Are there other ideas you may have to enhance the public benefits offered and thus enhance the potential for approval by the Council? You stated that you could not offer an easement on the "ravine" property due to encumbrances on that property; but do you have other ideas that add to the public benefits?

The developers restated the severe fiscal constraints the project faces; but offer as part of an agreement offered by the Council, they would make a formal proposal to Carolina First Bank to request a release of the "ravine" portion of the property for the purpose of creating a greenway connection. Rather than an "easement' they might be stronger interest from the bank in deeding a portion of the property to the City in exchange for a tax benefit.

They state that they might also consider working on a "green" public transportation shuttle (a multi-person golf cart type vehicle) to run a continuous route connecting the parking garages in the CBD and the development. They suggest that perhaps it could be run by volunteers.

The staff does not believe that these proposals go far enough to reach the expectations stated by members of the Council. The first depends on the support of the lender, who has already chosen to not allow use of some of the assembled land for a rational interim purpose as a parking lot; which might allow the bank to get a good return on their investment over time as the property developed. The second is an interesting idea, but is tied to the use of volunteers to run the shuttle. Neither, although intriguing, seem to have substantial chance of success.

7. Would you possibly reconsider your construction work position and guarantee a percent of construction contract work be committed to Buncombe County or WNC contractors and subs?

The developers confirm that they have a very strong interest in offering the construction work to local firms as much as possible, but feel that any "guarantee" would be problematic as they believe that there are few contractors in this area with the required capacity to complete a project of this size and scope in the required timeframe. And they believe that such an agreement might "create havoc with the costing" as they fear the local subcontractors would be inclined to bid higher. They stand by the process proposed previously, whereby local subs are given the first chance at the work. But they also state that cost and response time would be critical factors.

They also stand by their general contractor choice and architect because of their extensive experience with HUD and working together as a team.

Given all the constraints on this process, the staff can understand the reasons for their concerns, but again, the staff does not believe that the proposed process provides incentives for using local contractors sufficient to meet the expectations heard from members of the Council.

8. Given the potential for a legal challenge of this new type of use for the ECI statute, the Legal Department has asked if you would be willing to assume the risk of a legal challenge. If so, what entity would be assuming the risk? We would need to know the assets/collateral of that entity (LLC or corporation).

The developers agree to accept the risk of such a legal challenge, with a few "reservations"; but they believe this is something that should be negotiated after adoption of a formal resolution approving the support.

The staff agrees that details on such an agreement would need to be worked out if the Council should agree to the EIG requested.

9. Would you be willing to reduce your fee waiver request to the 50% level that is already established in Council policy for affordable housing?

The developers state that they are willing to accept the 50% reduction in the fee and permitting request. This is the level of reduction that has been established for defined "affordable" housing projects.

The staff notes that this would be the first time that the Council has authorized this level of reduction in fees to a project that does not contain any defined "affordable" housing; setting another precedent for future proposals.

10. We will need to see a revised pro forma, as it seems the Finance Department found an error in the original PV calculation that was submitted.

A pro-forma was submitted and reviewed by the Community Development Division staff. Their assessment notes that in this request, to enable a reduction in the number of years that assistance is being requested, the developers were calling for City assistance in two forms:

> First, they were requesting assistance through an interpretation of an EIG (a form of TIF) through the suspension of tax payments on the project for a period of six years, at an estimated cash value of $900,000 (from the City). (These numbers were also used in a net present value (NPV) calculation, which is not really relevant to an analysis of proposal.)
>
> Second, they were requesting the direct construction of infrastructure by the City or the equivalent in a grant. They seemed to be looking for this in direct assistance, paid out as cash during a period of construction, with a total amount provided (in actual construction or cash) of $789,000 (appearing in the table of values tab as $698,500 of actual infrastructure and $90,000 of fee rebate. This does include $89,500 of sewer system improvements, which is not a city controlled element.

The submitted data is incomplete and problematic in several ways:

a. This would be a first time use of the EIG authorization for a residential project, and is legally tenuous.

b. They reduced the years of tax relief requested from 10 to 6, not by reducing the amount of the request in any way, but rather by restructuring $700,000 of the request (the infrastructure) into a straight grant. The staff believed that this proposal defeated the intent of the Council request.

c. The submitted information appears to be incomplete in several ways, making interpretation of it somewhat confusing to interpret, and leading several unanswered questions:

> No capital or operating reserves are provided, or a projection of future net operating income provided. From what was submitted it appears that the project can be self-supporting without additional subsidy.
>
> The development budget, however, does not appear to be complete. No rationale is provided for the construction cost estimates. The infrastructure line item is $2.1 million compared to the $2.9 itemized costs estimate provided with the EIG request. Has the additional $800k been diverted to another line item or is this assuming final costs after a $790k contribution from the City?
>
> The land acquisition costs and total equity position are unclear. Total land cost is shown as $4.1 million, but the RERC report in March noted a $5.15 million acquisition loan with

a $4.9 million principal balance. It appears in this proforma that $2.4 million of the $4.1 million land costs will be financed with $1.7 paid in cash. Is there existing debt service on the $5.15 million? If so, what are the terms? Will there be additional debt service incurred following closing on the $4.1 million? Are these separate transactions or one in the same?

Can the developer provide additional clarification regarding the $2.4 million Builders & Sponsors Profit & Risk Analysis (BSPRA) equity contribution? Will this equity be realized at closing of the HUD financing, or at the end of construction? How will operational costs overruns be covered in future years without the benefit of deferred developer fees? [BRSPA is a financing mechanism used on HUD 221(d)(4) loans which allows a builder to decrease the hard equity requirement from 10% to 3% on HUD financing. We are not familiar with this process and have not heard the term before, but information found via a weblink suggests they are waiving future profits in exchange for creating an additional 7% equity investment on the front end of the deal. From the City's perspective this seems to be a fairly creative form of financing rather than a negative risk factor. Deferred developer fees, however, would not be available to cover any future operating losses which could create a future cash flow problem. It may be helpful to have the developer provide more information as to how and when this equity will be recognized given it is such a large component of the overall cash investment.]

Finally, clarification is needed regarding a stated $3 million in "new equity". Is this an additional cash investment by the development team or a reference to the requested City and County contributions?

To fully assess the fiscal status of the project, these questions noted above would need to be answered.

Staff met with the developers on August 13, 2010. Staff learned the following:

* The full project proforma does include capital and operating reserves. Although the actual reserve percentage was not confirmed, there was a mutual understanding that 5% of gross rents is normal and appropriate.

* Construction cost estimates appeared to be reasonable and customary.

* The cost of land acquisition was $7.5 million; $5.1 million of that was financed. Of the 20 acres purchased, approximately six acres will be used for the project. The estimated value of these six acres is $4.1 million. HUD will allow a value of $2.4 million for purposes of configuring their guarantee, because of the uncertain nature of land values in this economy. The bank financing for the land was intended to be taken out by the construction financing for the project. Since that has not yet occurred, the land not used for the project will still be held by the bank as security, and a new arrangement for its finance will need to be made.

* The BPSRA is an allowance made by HUD for developers' profit. It enables the HUD guarantee to be made on a total project cost that includes projected developers' profit. The developers will leave this amount, agreed to by HUD, in the project as equity.

* In order for the project to succeed, the developers will need to raise an estimated $3 million in new equity. They consider City participation a key factor in creating sufficient investor confidence in the project to incentivize additional investment.

d. According to what was submitted the project starts generating income as soon as lease-up is achieved (estimated by spring of 2013). The cash available would be sufficient to pay the taxes on the project, assuming that reserves were created through the financing to cash flow the

deficits until the project started making money. The project proforma shows cash of $28,000 monthly before the tax benefits kick-in, and before funding reserves. This is $336,000 annually.

The staff believes that while there could be some discussion on the availability of some participation by the City as a lender for the infrastructure segment; grant assistance does not appear to be necessary for the simple operational cash flow of the project. Knowing that lenders are quite conservative these days, the comfort of the lenders would probably be greatly enhanced by a City grant of almost $1.7 million, but that the project cash projections do not show this necessity if the project can get built and start generating cash flow.

If the City were to provide subsidy through tax deferments or through participation in the initial infrastructure costs, could we require those funds to be repaid over time at a nominal interest rate?

The developers believe that to raise the needed additional equity, they must provide a reasonable return on investment. They believe that no additional debt service can be carried without hindering their ability to offer a reasonable return to the new equity investors.

e. Support of the infrastructure might be justifiable in terms of cash flow. Looking at annual revenues of $3.4 million, a 5% reserve of $170,000 would be reasonable ($50/month for 250 units = $150,000 annually). This would eat up about half of the annual cash available. It might be difficult to get conventional financing for the $700,000 of proposed infrastructure.

The new request of five years of support equal to the incremental tax increase is roughly equal to the estimated cost of the infrastructure. No up-front City funds for infrastructure are requested, except for the 50% fee rebate, discussed above.

f. Since the property appears to produce a relatively healthy cashflow after lease-up, why cannot affordable units be required in exchange for City subsidy? Using the same proration of units for the entire project (8.4% 0 BR, 46% 1-BR, 45.6% 2-BR), a 20% affordability requirement would reduce the monthly gross rents by only $17,350 using the current HTF standards of $600, $650, and $780 respectively.

Given the limited information available for our analysis, it would appear the request for assistance is not needed. Perhaps the City could offer to finance $700k of the infrastructure in exchange for 20% affordability if there is a dedicated funding source other than the HTF.

The developers maintain that both because of the constraints of the HUD guarantee program (for market rate housing) and the need to provide a return for the additional equity investment, they cannot change their rate structure. This is contrary to Staff's discussion with HUD. In exchange for additional subsidy, the City can impose additional restrictions; however, the loan would need to be returned to HUD for underwriting and any change in the proposed rents could place their commitment at risk. Staff continues to believe that lower rents on affordable units could be absorbed thru very slight increases on the market rate units without substantially decreasing the total gross rents.

In summary, given the concerns noted, and with the analysis of information submitted; the staff does not recommend that the Council support the proposed request. The developer has responded positively to Council's request for significant changes in the amount and structure of the proposed City assistance. However, two key policy questions remain unresolved. First, is this a transformational project in terms of either creating housing affordable to low-income persons, and/or being a catalyst for redevelopment of a targeted area. Second, provided the first condition is met, is the level of assistance commensurate to the public value of the project and in line with past precedents or what we would similarly grant in the future.

Although the developers are getting closer on the second condition, the proposal is still missing the mark on the first and most critical condition.

In response to Councilwoman Manheimer, Ms. Daniels said that the infrastructure that would be construction would eventually be dedicated to the City.

In response to Vice-Mayor Newman, Community Development Director Jeff Staudinger explained that this is a HUD guarantee program (which is a very competitive program) which provides a level of security to the first lender. HUD does monitor the rents over the course of the guarantee situation (30 years) to make sure they are what was agreed to as part of the guarantee situation, which has the effect of capping rents so it is affordable to a workforce-type housing clientele.

Mr. Staudinger responded to Mayor Bellamy when she asked what the criteria is to get HUD backing.

When Councilman Smith asked for the range of rents, Mr. Staudinger believed for a 2-bedroom apartment it was in the range of $1,000-$1,200.

Councilman Bothwell noted that when the loan guaranteed by HUD is paid off, then there is no control on rents.

Vice-Mayor Newman noted that this is not a grant, but it really is a rebate on their property taxes for a period of time and some partial rebates on permit fees. He felt there are a lot of reasons to support this proposal, including smart growth, infill development, and the opportunity to have 250 units in middle-range housing within ½ mile of downtown. Luckily we have Mountain Housing Opportunities (MHO), and others, to build truly affordable homes in our community, but he doesn't see a lot of mid-range housing built. He felt the difficulty with this request is that it does not fit into our current policies. He felt this is a good time to create a policy with some incentives to encourage infill development near downtown and other key job centers.

Councilman Davis agreed with Vice-Mayor Newman in the need for a policy for workforce housing near key job centers.

Councilman Bothwell felt that we have other apartment projects that are not luxury which are being constructed without asking for City assistance. He was uncomfortable in providing incentives for one developer and not others unless there was a policy in place.

Councilwoman Manheimer felt there was consensus that a policy needs to be crafted and she imagined that it would reflect a lot of components of this application. But, what the developers are asking for with the Montford Commons project is that if it is completed, and if it results in an increase in property value, and if it results in an increase net benefit to the City in terms of future property taxes, can they be remitted 5 years worth of that increase to offset the cost of public infrastructure construction. The City gets a project supported by HUD for workforce housing which includes a green building component, urban infill development and walkability to the downtown. She felt that the City should be encouraging development of this type and to incentivize developers to do these types of projects. If the Montford Commons does not get built, it does not cost the City anything. If this project is approved, she would want the following conditions imposed: (1) the City's participation would be contingent upon approval by Buncombe County; and (2) reimbursement of any legal fees should there be a challenge to this tax structure reimbursement program.

When Councilman Bothwell wondered if we could intentionally limit the number of parking spots to make it a truly walkable development, Ms. Daniels understood that the developer has an agreement with the lender of a parking garage, which will be built to serve other phases of the project

Vice-Mayor Newman moved to endorse the public/private partnership request on the Montford Commons Project that would include 5 years property tax relief and 50% relief from permitting and water tap fees as outlined in staff's report. This motion was seconded by Councilwoman Manheimer.

City Attorney Oast understood the motion is (1) to endorse the Montford Commons proposal in concept; and (2) to direct staff to develop an agreement that incorporates those conceptual principles and bring it back to City Council for approval, which is the way we would do any other economic development agreement, contingent on Buncombe County approval and reimbursement of any legal fees should there be a challenge to this tax structure reimbursement program. He also noted that staff may come back with additional suggestions for protection of the City. Vice-Mayor Newman and Councilwoman Manheimer agreed with City Attorney Oast's interpretation of the motion.

Mayor Bellamy asked for a friendly amendment that Council delegate to staff the responsibility for incorporating Council policy direction into the final development agreement with the developer. Vice-Mayor Newman and Councilwoman Manheimer agreed to incorporate this friendly amendment into their motion.

Mr. Fred English did not support the City's participation in this project.

The amended motion made by Vice-Mayor Newman and seconded by Councilwoman Manheimer carried on a 4-3 vote, with Councilman Bothwell, Councilman Russell and Councilman Smith voting "no."

At Vice-Mayor Newman's request, it was the consensus of Council to direct the City Manager to begin crafting a policy to look at additional incentives to encourage infill development in the City for affordable and mid-range priced housing within walking distance of the downtown and potentially other key job centers in the City. Said policy should recognize the opportunities to partner with workforce or affordable housing in the private sector in the urban areas and walkable job centers. This draft policy should be reviewed by the City Council Planning & Economic Development Committee prior to being brought back to City Council for consideration.

At 6:59 p.m., Mayor Bellamy announced a short recess.

B. DISCUSSION OF PEDESTRIAN WALKOVER BRIDGE AT HILLCREST APARTMENTS

Director of Transportation Ken Putnam said that the purpose of the subject memorandum is to provide information to City Council to help them with their consideration of the potential reopening of the Hillcrest Pedestrian Bridge.

Using pictures, he showed several pictures of the pedestrian path to Hillcrest Apartments.

Whether or not the subject pedestrian bridge is reopened, the N.C. Dept. of Transportation (NCDOT) and the City of Asheville share the goal of minimizing or eliminating pedestrian fatalities along I-240 on the east side of the Smoky Park Bridges. In addition, both parties share the goal of providing good pedestrian and bicycle access between West Asheville and downtown Asheville.

Background: A tragic fatal pedestrian crash occurred on June 16, 2010, at 9:27 p.m. while a pedestrian was attempting to cross I-240 on the east side of the Smoky Park Bridges.

The pedestrian, a black male 25 years old, was walking to Hillcrest Apartments at the time of the crash.

According to information from the NCDOT, two similar fatal crashes have occurred in the same area during the past 20 years. The first one occurred on September 17, 1996, at 9:41 p.m. and the second one occurred on February 20, 1998, at 5:17 p.m.

The NCDOT closed the subject pedestrian bridge on November 28, 1994, at the request of the City of Asheville, the Asheville Housing Authority, and the residents of Hillcrest. After the second pedestrian fatality, City Council revisited the closing of the pedestrian bridge including a meeting at the Carl Johnson Hillcrest Community Center. City Council approved a motion *(with a 4 to 3 vote)* to keep the pedestrian bridge closed on July 9, 1998.

A report was presented to the Public Safety Committee on July 20, 2010, that outlined four possible solutions that could be considered. After receiving public comment, the committee agreed that the subject item should move forward to the City Council including the fiscal impact for the solutions.

Possible Solutions:

- Work with the NCDOT to "beef-up" the signing in the immediate area to emphasize to pedestrians that they are not to cross a controlled-access facility at points other than such designated points at which access may be permitted. Estimated Cost = $500
- Work with the NCDOT to repair any and all "breaks" in the controlled-access fencing to prevent pedestrians from crossing a controlled-access facility at points other than such designated points at which access may be permitted. Estimated Cost = $15,000
- Work with the Asheville Housing Authority and the residents of Hillcrest Apartments to emphasize alternative routes and modes of transportation. Estimated Cost = $0
- Reopen the pedestrian bridge *(Safety issues including bridge assessment, brush clearing, and lighting, sidewalk maintenance and repair, and fence repair need to be pursued in greater detail including determining applicable costs)*. Estimated Initial Cost = $178,725 and Estimated Annual Cost = $145,799

Fiscal Impact:

If the decision is made to reopen the subject pedestrian bridge, the tasks and their associated costs outlined in Table 1 would need to be accomplished. The total estimated initial cost equals $178,725 and the estimated annual cost equals $145,799. Depending on the results of the bridge inspection, the initial cost could be more due to the age of the bridge, which is 35 + years.

Table 1

Task Description	Initial Cost	Annual Cost
Inspect Bridge – NCDOT	$1,000	$0
Remove and install new fenced "cage" on the bridge (sloped top)	$86,525	$0
Remove and install new fenced "cage" on the bridge (flat top)	$80,410	$0
Remove the gates on either end of the bridge	$200	$0
Repair and install new fencing in the immediate area of the bridge (about 300 linear feet)	$15,000	$0
Perform heavy cleaning and maintenance of existing sidewalk (about 2,400 linear feet)	$500	$0

Rehab and replace sections of existing sidewalk (about 100 linear feet)	$5,000	$0
Clear cut and remove the vegetation in the wooded areas in the immediate area of the bridge including the stairs leading down to Roberts Street	$12,000	$3,000
Install area lighting along the existing sidewalk (about 2,400 linear feet) and the stairs leading down to Roberts Street (25 fixtures)	$4,000	$4,500
Provide APD presence from 6:00 am until 9:00 pm	$54,500	$138,299
Totals =	$178,725	$145,799

The highest known initial cost is removing and installing a new fenced "cage" on the existing bridge. Costs are listed for two options; specifically, one option with a sloped top and the other option with a flat top. The Asheville Police Department prefers the option with the sloped top to discourage citizens from climbing on top of the "cage".

The impact to the Asheville Police Department is based on the number of personnel resources (officers) that it would take to provide for the safety of the area from 6:00 a.m. until 9:00 p.m. seven days per week. It is estimated that it would take three full-time officers to accomplish the subject task.

In addition, the Asheville Police Department has a significant safety concern for the citizens and officers regarding the immediate area. Much of the vegetation including trees, bushes, underbrush, and over-growth should be cleared for the safety of everyone that would use the bridge and travel under it. Currently, the area is a secluded place of concealment that creates the opportunity for crime.

Community Input:

Prior to the July 20th Public Safety Committee meeting, there were several avenues for residents and property/business owners in the neighborhoods adjacent to the pedestrian bridge to have input on whether or not the bridge should be reopened. Community members in the West End Clingman Avenue Neighborhood (WECAN)/River Arts District area were invited to attend a meeting of the WECAN Board or to submit comments to Pattiy Torno, the WECAN Board Chairperson. Notes from the meeting including comments from those who could not attend the Board meeting were shared with the Public Safety Committee. Ms. Torno summarized these comments at the Public Safety meeting. In addition, approximately ten residents from the WECAN/River Arts District area attended the meeting and spoke during the public comment period.

A representative from the Housing Authority of the City of Asheville, David Nash, was available at the meeting to answer questions about input from Hillcrest residents. Since the meeting the Housing Authority determined it needed to conduct a survey of Hillcrest Apartment residents in order to get a more accurate reading of the level of support for reopening the bridge. The survey was distributed to residents on Monday, August 16 and the majority wanted the bridge re-opened.

Feedback from community members in the WECAN/River Arts District area was mixed. Many felt the bridge should be open to reconnect Hillcrest residents with their WECAN/Arts District area neighbors. An equal number voiced concerned that opening the bridge would result in an increase in the existing criminal behavior in the area near the bridge. The public comment indicates that there is a high level of agreement among all perspectives that if the bridge is reopened major improvements will need to be undertaken in the area on the south side of the bridge. These improvements should be aimed at increasing public safety through improved maintenance of the area and the implementation of crime prevention strategies such as increased lighting and police presence.

Summary – Action Steps:

- Staff agrees that providing good pedestrian and bicycle access between West Asheville and downtown Asheville is important and it can be a strong argument for the separation of local and non-local traffic regarding the I-26 Connector project. Staff will discuss these accessibility issues in detail during the public comment period for the I-26 Connector project after the draft Environmental Impact Statement document is released later this year.

- Staff is prepared to provide additional information to City Council if needed.

He asked for direction to (1) keep the bridge closed – work with the NCDOT to "beef-up" the signing and repair and/or replace controlled-access fencing; or (2) open the bridge – ask the NCDOT to perform an in-depth inspection of the bridge to determine any additional costs.

Councilman Bothwell questioned some of the expenses, noting that some are potential expenses but not necessary expenses, e.g., the fencing because it should be replaced whether or not the bridge is re-opened.

Mr. Putnam said that they have tried to identify any and all things that should occur for the bridge to re-open. We have not gotten to the point of who is going to pay for what. He would work closely with the NCDOT and feels that we can make a strong argument on some of these items that the responsibility rests with NCDOT.

When Councilman Bothwell asked why the cage needed to be replaced, Mr. Putnam said that we are faced with a very old structure and it has been shut down for 16 years. All the galvanized posts holding the cage in place were originally imbedded into the concrete and over years water has collected and the posts have rusted.

Regarding rehabbing the sidewalk, Councilman Bothwell found that approximately 5 feet of the sidewalk isn't wheelchair accessible, noting that there are broken sidewalks all over town. He felt the $5,000 estimate for rehab and replacement of sections of existing sidewalk is not a contingency for opening or closing the bridge. It's just another sidewalk that needs work. He doesn't feel that should be attributed to re-opening the bridge.

Regarding the installation of area lighting, Councilman Bothwell felt it would be nice to have that lighting but the sidewalk has been in use for many years without lighting. Again, this is a nice thing, but many of the expenses don't have any direct bearing on whether we re-open the bridge or not.

In response to Councilwoman Manheimer, Mr. Putnam said that the bridge was constructed in 1943 and closed in 1994. Regarding fatalities on the roadway similar to the three mentioned above, she asked how many other fatalities have been reported on that stretch of road. Mr. Putnam responded that he worked with the NCDOT and their records go back for 20 years only. Only the three mentioned above were fatalities close to the pedestrian bridge.

In response to Councilman Smith, Police Chief Bill Hogan said that the police presence recommendation came from captains and lieutenants in the Department who were probably officers and sergeants at the time that this bridge was opened and had some horrific experiences in terms of crime, everything from serious assaults, rape, armed robberies, in addition to the drugs, prostitution, gambling, etc. Their goal is to make the citizens the safest we can possibly make them. The ultimate solution is to staff it when people would be coming across the bridge and entering into Hillcrest Apartments. There are other things they can do on a lesser degree.

Councilman Smith said that the area underneath the bridge is also a gathering place for people up to no good, and also considered a drop spot for bodies. There are already several

things in that area that need to be addressed, so regardless of how we move forward on this issue, we need to address those.

Councilman Smith questioned on how the Police Department presence would affect the area underneath the bridge, the staircase, etc. to make it safe. Police Chief Hogan said if the City wanted to open the bridge tomorrow after the inspections clear, we could not staff it with three additional people for about one year. They would have to do other things. The first logical thing is they would ask their beat patrol officers to keep an eye on it, noting that they have other neighborhoods they have to police. That would not be a dedicated presence in the area. The second thing would be to have the Drug Suppression Unit spend as much time there as possible. When the bridge was opened, day in and day out there was criminal activity of a serious nature. That is why the recommendation is to staff it with dedicated officers for the safety of the community. We have the Crime Prevention through Environmental Design (CPTED) program, which is the trees and lighting – things that make it safer by increasing the visibility so that people can't jump out on you. The bridge created a natural escape route and many of the apartments on the back end were probably a less desirable place to live because of that traffic. Those apartments became abandoned and that is where a lot of people would go in and hang out. We would also start with a Neighborhood Watch Program where residents would call the police when they see suspicious circumstances. He didn't know what the resources are of the Housing Authority but they might add another guard. Again, we are looking for the safest alternative knowing the past history of that foot bridge.

Mayor Bellamy noted that Police Chief Hogan outlined the problems associated outside the gates when the bridge was open, but asked what was it like inside Hillcrest when the pedestrian bridge was open. Executive Director Gene Bell responded that the crime was horrific and the bridge was contributing to that crime. What's important to note is that the reason the bridge was closed was the Housing Authority surveyed the residents and the majority asked the bridge to be closed. They contacted the City and the NCDOT and the bridge was closed. We then put a gate on the Hillcrest side at first, but people were passing the drugs through the fence, so they installed a gate on the other side of the bridge too. After the Housing Authority surveyed the residents on August 16, 2010, the majority wanted the bridge to re-open, so they support the residents to re-open the bridge. The bridge was closed because it was a major vehicle for crime activity. Since the bridge was closed in 1994, they have seen a dramatic change for the better.

If the bridge is re-opened, Mayor Bellamy requested that a survey be conducted of the residents in Hillcrest again in one year on whether the residents continue to want the bridge opened or they want it closed. Even though we want to have police presence from 6 a.m. to 9 p.m., the reality is that 9:01 p.m. when the officer patrols the other areas at 9:02 p.m. we will have people up to no good. Her concern is we will open the bridge and the residents will like it for a little while, but there are some realities we will have to face. No amount of police presence will protect the residents of Hillcrest Apartments and the West End/Clingman Avenue area 24 hours a day. She felt there will be an increase of traffic of the kind the residents will not want on both sides. If the bridge is re-opened, she felt it was imperative that the survey be taken again in a year.

Mr. Bell committed to do the survey again in a year. He felt that another factor to add value to the information if the bridge is re-opened is to look at the statistics from the time we open the bridge 12 months out vs. the 12 months prior to the bridge being re-opened. That would give us a good comparison.

Mayor Bellamy also asked for a matrix of what we will study, as she felt it was important to look at not only the dollars, but the number of officers needed to patrol, the maintenance of the undergrowth, etc. The City has done a lot to clean up public housing and she didn't think this was in the residents' best interest long-term.

Mr. Bell said that the 12-month report should consist of not only the Housing Authority and the Police Chief statistics, but input from Asheville United Christian Church and others in the immediate area.

When Councilman Russell asked if there are interim steps that can be done for perhaps a 12-month trial of the bridge re-opening or if there are some things that can be put on hold, Mr. Putnam said that he would be glad to work with the NCDOT on that. He noted that when the NCDOT does the in depth inspection, they could unveil some other things that need to be done. If we are only going to do a year pilot of re-opening the bridge, he felt we could get their cooperation in working that out. NCDOT, as well as the City, wants to be sure that if they re-open it, it's safe structurally.

Councilman Russell moved to (1) re-open the pedestrian bridge for a 12-month basis with Mr. Putnam working with the NCDOT to control costs as much as possible; and (2) obtain feedback in 12-months from the Hillcrest Apartment residents and others in the immediate area. This motion was seconded by Councilman Bothwell.

The father of the boy who was filled on June 16, 2010, crossing I-240 to Hillcrest Apartments felt that people should have safe access to the pedestrian bridge. He supported opening the pedestrian bridge for a 12-month trial period.

Mr. Whit Rylee, resident on Roberts Street, supported re-opening the pedestrian bridge and cleaning up (not clear-cutting) the wooded area.

The Pastor of Asheville United Christian Church recalled instances violence, gang fights, vandalism, gun shots, and other criminal activity when the bridge was open. He felt that whether the bridge is re-opened or not, the woods and underneath the bridge needs to be cleaned up. The Police Department has done a wonderful job of cleaning up this area and he didn't want to see that disappear with the re-opening of the walkway. If the bridge is re-opened, he feared there will be more violence, rapes and killings.

Rev. Christopher Chiaronmonte felt Hillcrest Apartments should handle the security with the Police Department teaching them what to do.

A Leicester resident who routinely drives on I-240 near the bridge said that many times she almost hit someone crossing I-240. She felt this is about lives and safety and urged Council to make this area pedestrian friendly.

Mayor Bellamy asked that if the motion passes to re-open the bridge, that the woods, underneath the bridge, sidewalks, etc. be cleaned prior to re-opening the bridge.

Mr. Putnam said that the first step would be the NCDOT inspection process will be approximately 60 days to initiate the request and for them to report back to the City. Assuming that everything is a go and there are no other additional costs to worry about, then we can proceed to re-open the bridge. However, in that 60-day window, he will be working closely with the local NCDOT people to put things in order, e.g., the clearing. He believes that the NCDOT has a contractor for clearing and repair of the fencing. Some things can be worked on simultaneously and not wait until the final word on the bridge inspection.

Councilman Russell moved to amend his motion that the clearing begin before the bridge is re-opened for safe passage. Councilman Bothwell agreed to this amendment.

Mayor Bellamy also suggested the City use the CPTED principle of putting eyes on places that can harbor illegal activities. She felt that once we clean out the area, we should make a pedestrian and bicycle friendly path to encourage more pedestrian traffic so illegal activities diminish.

Councilman Smith felt that the CPTED principle is a good idea and to clean up and light underneath the bridge is important. As we go toward the riverfront redevelopment, this is an important part of our addressing the whole transformation of the River District. Once we make this area safe, then we have created a cornerstone in that area. He supported a community watch on both sides of the bridge to take ownership of what goes on in that area.

Councilman Davis agreed this area needs to be cleaned up, but he didn't think re-opening the bridge was the right solution. We have gone a long way to make it safe for the Hillcrest residents. It's not as safe as it could be, but it's better than it was before the closing of the pedestrian bridge. He felt that we are running a terrible risk of going back to the illegal activity in that area if we don't put adequate funds in for the police presence, cleaning up of the woods, lighting, etc., and that he felt we will uncover more expenses than anticipated. He felt the budget implication will require some study because we don't want to do it half-way. He doesn't want to see a body on the interstate, but no one should see their child being sold narcotics, and other illegal activities that can take lives just as readily as a speeding car on the interstate. He wants people to be able to have safe access across the interest, but feels this is a mistake to re-open the bridge at this time.

Councilwoman Manheimer supported re-opening the bridge because it will be reviewed in one year. She recalled a time when she delivered Meals on Wheels in the Hillcrest neighborhood in 1993-94 and she would hate to see those conditions exist again. She would defer to those residents in the Hillcrest community who by majority requested the bridge to be re-opened, but wondered how many of those residents lived there when the bridge was open 16 years ago. She was concerned that we now have an entrance that is staffed and a way to monitor who is going in and out of the community and without a security presence, we are changing that dynamic in this neighborhood.

Mayor Bellamy felt that even though the pedestrian bridge is opened, we will still have people utilizing the paths. She would support the motion to re-open the bridge because we received comments from the West End/Clingman Avenue neighborhood as well as the Hillcrest neighborhood requesting the bridge be re-opened. She asked that this issue be revisited one year.

Vice-Mayor Newman agreed that we need to take steps to get the area prepared before the re-opening happens. He understood that we are giving clear direction that we want $138,000 of additional police protection to keep this community safe if we re-open the bridge. He felt this is money well invested even if we don't re-open the bridge. He was, however, concerned about the sequence of hiring additional officers for that dedicated purpose. He suggested the Public Safety Committee continue to look at this to make sure we are doing everything we need to do from the day it's opened to make it as safe as we can. If there are additional things that the City Manager or Police Chief want to bring to us to make sure that's happening on the front end, he wants to make sure we hear and support that.

When Councilman Smith asked if we are asking that this issue be revisited one year from today or one year from when the bridge is re-opened, Police Chief Hogan said that he will report back to Council 6-months and then 12-months after the bridge is re-opened.

Mayor Bellamy said she has already been lobbied about the west Asheville bridge over I-240 at Pisgah View. The residents who have contacted her said they do not want that opened and she would not be supportive of opening that bridge.

The amended motion made by Councilman Russell and seconded by Councilman Bothwell carried on a 6-1 vote, with Councilman Davis voting "no."

When Mayor Bellamy said that since the NCDOT is looking at the possible realignment of the River District and the whole corridor, she wondered if they could look at what might be available for the Hillcrest area. Councilman Davis responded that the Asheville Area Riverfront Redevelopment Commission will be taking a field trip to look at the entire corridor; however, the realignment is not part of their prospective.

Mayor Bellamy suggested sending the appropriate group a letter asking to see how this area is configured and to see if there are any possibilities of joint partnership. Councilman Davis responded that this may be something the Asheville Area Riverfront Redevelopment Commission may want to do.

After a short discussion initiated by Mayor Bellamy, it was the consensus of Council to have Mayor Bellamy send a letter to the NCDOT to see if they can partner with the City in working to connect the Hillcrest community with the rest of the City of Asheville.

C. RESOLUTION NO. 10-194 - RESOLUTION APPOINTING A MEMBER TO THE BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY

Vice-Mayor Newman said that term of Ron Storto, as a member of the Buncombe County Tourism Development Authority, expires on August 30, 2010.

When Councilwoman Manheimer said that the law firm that she works for represents the Tourism Development Authority, City Attorney Oast said that he did not see a conflict of interest in her voting in this matter.

At the recommendation of the Boards & Commissions Committee, Councilman Russell moved to reappoint Mr. Storto, as a member of the Buncombe County Tourism Development Authority (as the owner or operator of a hotel, motel or other taxable tourist accommodation with 100 or fewer rental units), to serve an additional three year term, term to expire August 30, 2013, or until his successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 189

VI. NEW BUSINESS:

A. ORDINANCE NO. 3893 - ORDINANCE AMENDING THE ESTABLISHING OF THE PUBLIC ART BOARD

RESOLUTION NO. 10-195 - RESOLUTION ADOPTING THE PUBLIC ART POLICY AND IMPLEMENTATION GUIDELINES

Superintendent of Cultural Arts Diane Ruggiero said that this is the consideration of adoption of (1) an ordinance amending the establishment of the Public Art Board; and (2) a resolution adopting the Public Art Policy and Implementation Guidelines.

Ordinance No. 2609 was passed on September 14, 1999 establishing a public art board and a public art policy for the City of Asheville. The proposed updates to the ordinance and policy reflect advancements and best practices in the field of public art and changes within the Parks, Recreation and Cultural Arts Department structure.

The goal for updating the ordinance and policy is to provide more opportunities for public art throughout Asheville as outlined in numerous master plans including the Parks, Recreation, Cultural Arts and Greenways Master Plan and the Downtown Master Plan.

Members of the Public Art Board and staff worked closely with Janet Kagan, a public art consultant who worked on the Parks, Recreation, Cultural Arts, and Greenways Master Plan, to update the public art ordinance and policy, both of which were originally written and approved in September, 1999.

Updates to the ordinance include:

- Broadens the definition of public art to include temporary works of art and does not exclude performing arts;
- Adjusts the board size from seven members to nine and requires a majority of arts professionals;
- Adjusts the Purposes, Responsibilities, and Powers so that it does not overlap or interfere with City staff responsibilities (i.e. "Facilitate public art in buildings and spaces" replaces "Provides public art in buildings and spaces").

Updates to the policy include:

- Includes implementation guidelines for public art;
- Defines the roles of staff and community;
- Provides direction on artists selection, acquisitions, and deaccessioning;
- Provides a glossary of terms.

The updated public art ordinance and policy was approved by the Public Art Board at their monthly meeting in February 25, 2010.

The updated public art ordinance and policy was reviewed by the Boards and Commissions Committee at their meeting on August 10, 2010.

The Public Art Board held two community meetings on July 30, 2010, for public input about the updated public art ordinance and policy. The updated ordinance and policy were posted on the City of Asheville's website for public input and comment.

The updated public art ordinance and policy complies with the Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it 1) enables sustainable funding for permanent and temporary public art, 2) maintains and enhances Asheville as an arts destination, and 3) develops and expands the city's public art collection.

Pros:

- Follows best practices in public art;
- Allows for more public art opportunities throughout Asheville;
- Achieves goals of the Parks, Recreation, Cultural Arts and Greenways Master Plan.

Con:

- None.

Approval of the updated public art ordinance and policy has no direct fiscal impact to the City.

City staff recommends City Council adopt (1) an ordinance amending the establishment of the Public Art Board; and (2) a resolution adopting the Public Art Policy and Implementation Guidelines.

In response to Mayor Bellamy, Ms. Ruggiero explained the process for obtaining public art and the site selection process.

Mayor Bellamy recommended the Public Art Board work with the Civic Center Commission for a possible site inside the Civic Center lobby.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Smith moved for the adoption of Ordinance No. 3893. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 - PAGE 282

Councilman Smith moved for the adoption of Resolution No. 10-196. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 190

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Daniel Wallace, resident of Battery Park Apartments, urged Council not to change handicapped parking.

Rev. Christopher Chiaronmonte spoke about his fast in protest of the cruel and inhumane treatment of the poor and homeless.

Mayor Bellamy urged citizens to be careful of children walking, biking and riding the school bus since school has started.

Mayor Bellamy said that she has been invited to represent the City of Asheville to the Expo 2010 Shanghai UN Millennium Development Goals Urban Construction Forum in Langfang, China.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:49 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – August 31, 2010 – 6:30 p.m.
Groce United Methodist Church – Asbury Hall

Community Meeting – East Asheville

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman Jan B. Davis

Mayor Bellamy opened the meeting and welcomed the audience. She then introduced City Council members and explained the questions and answer process.

Mr. Chris Pelly, representing the East Asheville Sidewalk Initiative, showed City Council a video in which they expressed their desire to have sidewalks installed in east Asheville for safety reasons. The video showed that east Asheville has 7% of sidewalks, while north Asheville has 42%, west Asheville has 28% and south Asheville has 23% of sidewalks.

Director of Transportation Ken Putnam provided information on the prioritization process criteria used for sidewalks, completed projects over the last five years; comprehensive transportation planning, sidewalk funding and maintenance issue, current and potential projects in east Asheville; potential projects in other areas of the City; and action steps which include (1) continue the documentation process; continue implementing the Pedestrian Plan; (3) formalizing the prioritization process; (4) scoring the top 50 potential projects; (5) pilot projects and link to website; (6) continue working towards integrating all master plans; (7) implementing parking strategies (on-street and off-street); (8) provide bicycle awareness (signs and pavement markings); (9) installation of bicycle lanes; (10) improve bus stops (concrete pads, benches, shelters); (11) provide ADA compliance; (12) connect greenways; and (13) promote multi-modal aspects on major street projects (NCDOT).

Director of Administrative Services Lauren Bradley explained the City's strategic goals, financial realities and upcoming capital projects in east Asheville.

Mayor Bellamy then opened up the meeting for questions and answers explaining that all answered questions would be delegated to City staff for response and posting on the City's website.

Mayor Bellamy and Council members expressed their appreciation for the community involvement.

At 8:08 p.m., Mayor Bellamy adjourned the meeting.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – September 14, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Manheimer gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF DR. JACK TEAGUE

Mayor Bellamy recognized Dr. Jack Teague for his efforts in spearheading the Missions of Mercy free dental clinic, sponsored by the N.C. Dental Society, held in Asheville on August 13-14, 2010.

Dr. Teague gave a brief synopsis of the results of the free clinic. He said that they treated 755 patients with a dentistry value of $416,000; extracted 1,004 teeth, 226 of which were surgical extractions; 136 cleanings; 909 fillings; 18 root canals; and 38 partial appliances. He thanked the approximately 250 community volunteers and 50 dentists (2 endodontists and 4 oral surgeons).

B. PROCLAMATION PROCLAIMING SEPTEMBER 27, 2010, AS "FAMILY DAY – A DAY TO EAT DINNER WITH OUR CHILDREN"

Mayor Bellamy read the proclamation proclaiming September 27, 2010, as "Family Day – A Day to Eat Dinner with Our Children" in the City of Asheville. She presented the proclamation to Mr. Paul Vest, President and CEO of the YMCA, who thanked City Council for their support.

II. CONSENT AGENDA:

Mayor Bellamy said that Consent Agenda item "E" will be removed from the agenda for consideration at this meeting for a future public hearing.

Councilman Smith asked that Consent Agenda item "H" be removed for discussion and a separate vote.

A. APPROVAL OF THE MINUTES OF THE FORMAL MEETING HELD ON AUGUST 24, 2010, AND THE COMMUNITY MEETING HELD ON AUGUST 31, 2010

B. ORDINANCE NO. 3894 - BUDGET AMENDMENT TO APPROPRIATE REVENUE AND BUDGET EXPENDITURES ASSOCIATED WITH THE INGLES, SCHENCK PARKWAY, FARLEIGH STREET, DEERFIELD,

MOUNTAINBROOK, WATERS ROAD, ROCKING PORCH ROAD, KEASLER/SUNNYCREST, UPPER SONDLEY, TUNNEL ROAD, WILLOW WINDS, AND AIRPORT ROAD ANNEXATION AREAS

Summary: The consideration of a budget amendment in the General Fund in the amount of $166,757, and a budget amendment in the General Capital Projects Fund in the amount of $50,000 to appropriate revenue and budget expenditures associated with the Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road annexation areas.

In May 2010, City Council approved the annexation of the areas listed above. Under state law, property owners are allowed sixty days to file legal challenges to any annexation. The period for filing legal challenges has now passed, and there were no challenges filed for these annexations. As a result, these areas will become part of the City of Asheville on September 30, 2010. Therefore, the City needs to amend the current year budget to reflect expenses associated with serving these areas between September 30, 2010 and June 30, 2011.

The cost of providing services to these areas for the remainder of FY 2009-10 will be $163,875. Included in this amount is $82,150 to hire and equip two additional police officers to accommodate the anticipated increase in demand for police services and $50,000 for initial expenses associated with installation of sewer lines in the Airport Road area. The full cost of the sewer installation project for Airport Road will be $180,000. The remaining $130,000 needed to complete construction of this project will be included in the FY 2011-12 capital improvement budget which will be presented to Council next spring.

The City will receive nine months of property tax and fee revenue from the newly annexed areas in FY 2009-10. In total, these two areas will generate estimated revenue of $166,757 in FY 2009-10. As noted above, the total operating and capital costs for FY 2009-10 are $163,875. Therefore, total revenue in FY 2009-10 will exceed expenses by $2,882. This amount will be budgeted in a contingency account and flow into fund balance at year end.

This action complies with the City Council Strategic Operating Plan to operate the City of Asheville's organization to the highest fiscal responsibility.

Pro:

- Provides budget authorization for the City to incur the costs associated with the newly annexed areas from September 30, 2010 to June 30, 2011.

Con:

- None.

City staff recommends City Council adopt the budget amendment to appropriate revenue and budget expenditures associated with the Ingles, Schenck Parkway, Farleigh Street, Deerfield, Mountainbrook, Waters Road, Rocking Porch Road, Keasler/Sunnycrest, Upper Sondley, Tunnel Road, Willow Winds, and Airport Road annexation areas.

ORDINANCE BOOK NO. 26 – PAGE 285

C. ORDINANCE NO. 3895 - BUDGET AMENDMENT FOR MISCELLANEOUS CONTRIBUTIONS TO BE USED FOR PARKS AND FACILITIES IMPROVEMENTS

Summary: The consideration of a budget amendment, in the amount of $11,761, for miscellaneous contributions to be used for parks and facilities improvements.

The City of Asheville in the Parks, Recreation & Cultural Arts Department has received miscellaneous contributions totaling $11,761 to support improvements to parks and facilities. The funds will be used to help support facility improvements such as swimming pools and tennis courts.

This action complies with City Council's Strategic Operating Plan in that it supports making smart investments that accomplishes lasting and tangible returns by investing in ongoing capital improvements to the city's park system. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides capital investment in replacing aging infrastructure in the city's park system.

Pros:

- Investment to maintain and care for city-owned park assets.
- Provide quality service for capital improvements in the city's parks system.
- Fulfill commitment for improvements to park system.

Con:

- None

The city's Fiscal Year 2010/11 capital budget for Parks, Recreation & Cultural Arts will increase by $11,761. This increase is funded by $11,761 in miscellaneous contributions. Thus, there is no net fiscal impact to the City's budget.

Staff recommends City Council to adopt a budget amendment authorizing the City Manager to increase the capital budget for Park, Recreation & Cultural Arts by $11,761.

ORDINANCE BOOK NO. 26 – PAGE 287

D. RESOLUTION NO. 10-196- RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER FOR HUNTLEY CONSTRUCTION COMPANY FOR THE REYNOLDS MOBILE HOME PARK WATER SYSTEM REPLACEMENT PROJECT

Summary: The consideration of a resolution authorizing the City Manager to sign a change order increasing Huntley Construction Company's construction contract to $172,293.52 for the Reynolds Mobile Home Park Water System Replacement project.

Huntley Construction Company was originally hired by the City through a competitive bidding process to provide the construction for the Reynolds Mobile Home Park Water System Replacement project in the amount of $167,496.00. Change Order # 1 in the amount of $4,797.52 will allow Huntley Construction Company to add a section of 8-inch water line from the mobile home park entrance to two apartment buildings across the parking lot; one (1) new fire hydrant, eight (8) new connections to existing water meters, and three (3) connections on the new water line.

This project is part of City Council's strategic plans to improve city infrastructure.

Pro:

- Approval of the change order will allow the City to complete the project in the current fiscal year in order to expedite receipt of N.C. Dept. of Environment & Natural Resources (NCDENR) grant funds.

Con:

- Failure to award the change order will delay completion of the project and subsequently, state reimbursement.

The funds needed for this change order are available in the capital project. The additional funds needed are fully reimbursable by the NCDENR grant. A detailed project budget is summarized below:

Total Project Budget:	**$420,420.00**
Easement Recording Fee:	$ 20.00
NCDENR Administrative Fee:	$ 5,317.00
Engineering Contract:	$ 68,450.00
Construction Contract:	$167,496.00
Expenses To-Date:	$241,283.00
Change Order (Increase):	$ 4,797.52
Total Expenses With Change:	$246,080.52
Remaining Project Balance:	$174,339.48

City staff recommends City Council approval of the City Manager to sign a change order increasing Huntley Construction Company's construction contract to $172,293.52 for the Reynolds Mobile Home Park Water System Replacement project.

RESOLUTION BOOK NO. 33 – PAGE 201

E. ORDINANCE REPEALING THE DESIGNATION OF RICHMOND HILL HOUSE AS A LOCAL HISTORIC LANDMARK

This item was removed from consideration at this meeting to be considered at a later date.

F. RESOLUTION NO. 10-197 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MICHELIN NORTH AMERICA INC. FOR THE LEASE OF TIRES TO THE ASHEVILLE TRANSIT SYSTEM

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Michelin North America, Inc. for the lease of tires to the Asheville Transit System.

The City of Asheville released a RFP for transit bus tire lease on August 3, 2010. The city received three bids, Michelin North America, Inc., Bridgestone Americas Tire Operations, LLC. and The Goodyear Tire and Rubber Company. The only responsive bid was from one bid that fulfilled the bid requirements, Michelin North America, Inc. After a thorough review, City staff is recommending signing a contract for three years with Michelin North America, Inc.

The Asheville Transit System has been leasing tires for the buses since 2000. The cost for leasing the tires is about $4,700 per month and is based on actual mileage per tire *(6 tires per bus)*. The rate per mile in a three year period is as follows:

	Year 1	Year 2	Year 3
30570R225	$.00818	$.00867	$.00919
31580R225	$.00728	$00.772	$.00818

The Asheville Transit System uses about 15 tires per month and if the City bought them, it would cost about $400 per tire or $6,000 per month plus the cost of shipping. In addition, the City would have to pay a disposal fee to get rid of the old tires. The total cost of the project for three years is approximately $170,000.

The subject lease is part of the current operational budget and is recorded as an operational expense.

This action complies with the City Council FY 2009-10 Strategic Operating Plan within the Fiscal Responsibility Focus area by operating the transit system to the highest level of fiscal responsibility.

The Transit Commission supports the subject project.

Pros

- Leasing the tires generates savings thereby using resources and staff in a more efficient way.
- The company provides technical assistance and equipment.
- The contract is based on tires per mile and the price is "locked" for three years.
- The company takes care of tire disposal.

Con

- The total cost of the project is $170,000.

The total fiscal impact for the subject project is $170,000 which is currently budgeted in the Asheville Transit operational budget.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into a contract with Michelin North America, Inc. for the lease of tires to the Asheville Transit System.

RESOLUTION BOOK NO. 33 – PAGE 202

G. RESOLUTION NO. 10-198 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDMENT TO THE HERSEY METERS AGREEMENT TO ALLOW FOR THE COLLECTION OF GLOBAL POSITIONING SYSTEM DATA FOR COMMERCIAL AND RESIDENTIAL WATER METER LOCATIONS

Summary: The consideration of a resolution authorizing the City Manager to execute an amendment to the Hersey Meters agreement to allow for the collection of global positioning system (GPS) data for approximately 56,000 commercial and residential water meter locations at a cost not to exceed $112,000.00.

On February 9, 2010, City Council authorized the City Manager to execute an agreement with Hersey Meters (recently renamed Mueller Systems) to install Automated Meter Reading (AMR) devices on all water meters in the water system. Water Resources would like to increase the existing agreement to allow for the collection of GPS locations for approximately 56,000 commercial and residential meter locations as part of the AMR project. Hersey Meters is already deployed, on-site, and capable of integrating the GPS data collection portion at a greatly reduced rate. The cost to collect GPS coordinates for all 56,000 meters in the water system is $2.00 per meter for an amount not to exceed $112,000.00.

This project is part of City Council's strategic plan to improve city infrastructure.

Pros:

- Allows the department to adjust the driving route to improve meter reading efficiency, ensure that all meters are read before leaving the route, and reduce carbon emissions.
- Meter locations in the GIS system will be accurate, providing better customer service by allowing staff to locate meters quicker in order to perform needed maintenance and repairs.

- Helps keep an accurate inventory of all water meters in the water system.
- Reduces safety risks to Water Resources staff traveling in remote, wooded areas.

Con:
- If not approved, Water Resources staff will not have accurate locations for water meters, which may delay needed maintenance and repair due to dense foliage and overgrowth.

The cost to collect the GPS locations is $2.00 per point for 56,000 water meters for a cost not to exceed $112,000.00. Funds are available in the AMR capital projects budget. The available funds after the contract amendment or change order will be used to continue the installation of AMR devices and purchase of water meters needed for the project.

Project Budget:	**$4,490,576.00**
Hersey Meters AMR Contract:	$1,790,000.00
Water Meter Purchases:	$ 732,879.40
Change Order Increase:	$ 112,000.00
Subtotal:	$2,634,879.40
Available Funds After Change:	$1,855,696.60

The consideration of a resolution authorizing the City Manager to execute an amendment to the Hersey Meters agreement to allow for the collection of global positioning system (GPS) data for approximately 56,000 commercial and residential water meter locations at a cost not to exceed $112,000.00.

RESOLUTION BOOK NO. 33 – PAGE 203

H. RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO APPLY FOR A US DEPT. OF HOMELAND SECURITY FISCAL YEAR 2010 STAFFING FOR ADEQUATE FIRE & EMERGENCY RESPONSE GRANT TO OBTAIN FUNDING FOR SIX ADDITIONAL FIREFIGHTER POSITIONS

This item was removed from the Consent Agenda for discussion and an individual vote.

I. RESOLUTION NO. 10-200 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH OTIS ELEVATOR TO PROVIDE ELEVATOR MAINTENANCE AND REPAIR SERVICE FOR MULTIPLE MUNICIPAL BUILDINGS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Otis Elevator to provide elevator maintenance and repair service for multiple municipal buildings.

The service contract with Otis Elevator, located at 203 Elk park Drive, Asheville, NC, is in the third year of a five year renewal period that began in 2007. The service contract is a predictive, preventative maintenance system for the elevators at City Hall, Municipal Building, Stephens Lee Recreation Center, and Asheville Fire Station 11. The total contract amount is $69,283.56 renewable with a CPI adjustment.

This contract supports the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities.

Pro:
- Provides a contract to maintain and provide repair service to the elevators at City Hall, Municipal Building, Stephens Lee Recreation Center, and Fire Station 11.

Cons:

- Maintenance cost to the elevators at City Hall will continue to increase due to the age of the elevators increasing the annual service contract.
- Some repair costs may still be incurred for repairs beyond the scope of this contract.

The $69,283.56 for contracted elevator services is budgeted in the City's Fiscal Year 2010-11 operating budget for facilities maintenance.

City staff recommends that City Council adopt a resolution authorizing the City Manager to sign the contract with Otis Elevator to provide elevator maintenance and repair services for multiple municipal buildings in the amount of $69,283.56

RESOLUTION BOOK NO. 33 – PAGE 205

J. RESULTS OF THE SEPTEMBER 8, 2010, CIVIL SERVICE BOARD EMPLOYEE ELECTION

Summary: One copy of the results of the Civil Service Board employee election held on September 8, 2010, is to be filed with the City Manager and one with the City Clerk, who shall present such certification to the City Council at its next regular meeting. Secretary to the Civil Service Board Jessica Dunlap and City Clerk Burleson provided the following certified certificate on September 8, 2010: We do hereby certify, having opened, canvassed, and determined the original returns of the Civil Service Board employee election, the results of the Civil Service Board Employee Election held on September 8, 2010, noting the name of each person voted for and the number of votes cast for each person as follows: Charlie Hume - 102; and Anthony Alan Coxie - 118.

K. RESOLUTION NO. 10-201 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR A FEDERAL TRANSIT ADMINISTRATION JOB ACCESS AND REVERSE COMMUNITY PROGRAM GRANT TO FUND THE BLACK MOUNTAIN ROUTE

Summary: The consideration of a resolution authorizing City staff to apply for a Federal Transit Administration (FTA) Job Access and Reverse Commute (JARC) Program grant to fund the Black Mountain route and authorizing the Mayor to execute the appropriate documents to accept the grant, if it is awarded to the City of Asheville.

Since inception in 2002 the Black Mountain route was funded using Intercity funds, 45% Federal, 45% State and the remaining 10% had come from the Town of Black Mountain, Buncombe County, and from the route' farebox revenue. In December 2008 The North Carolina Department of Transportation (NCDOT) informed the City that the Intercity funding was going to be discontinued effective November 1, 2009 because the assessment of the route determined that they were not compliant with the requirements of Intercity Circular Section 5311 (f).

After negotiations with the NCDOT, it was agreed that they would continue funding the route until December 31, 2010, to give the city the opportunity to find another funding source. This is the last year NCDOT would fund the route.

After exploring all the options available, the JARC funding is the only funding source in the short-term we can apply for, and if awarded will allow city staff to pursue other funding sources for the upcoming years. The JARC program was established to address the unique transportation challenges faced by welfare recipients and low-income persons seeking to obtain and maintain employment. Eligible activities are capital, planning and operating expenses for projects that transport low income individuals to and from jobs and activities related to employment, and for reverse commute projects.

This route is proposed as a partnership between Warren Wilson College and the City. As proposed in the Transit Master Plan, this route will be combined with the current route 29 that serves the college and will operate as a regular route with frequent stops. The proposed route will operate five times a day, Monday through Saturday, along US 70 (Tunnel Road) between downtown Asheville and Black Mountain. Mountain Mobility is also applying for the JARC funding to fund the Black Mountain portion of the route. The service will continue connecting with the local Mountain Mobility deviated route service.

This route's ridership grew considerably since 2007. However, during FY2010 ridership decreased significantly due to the changes the city had to make to comply with the Intercity regulations. The new route will reverse some of these changes to be able to recover ridership, charging the same fares than the other routes in the system and increasing the number of stops along the route.

Route 28		
Year	Total Ridership	Change
FY2010	33,240	-40%
FY2009	55,038	44%
FY2008	38,216	9%
FY2007	35,140	78%
FY2006	19,727	

The total cost of providing this service is $201,552; 50% or $100,776 will be paid by the grant and the other 50% by the combined contribution of Warren Wilson College (14% or $56,576) and the City of Asheville to the route (36% or $144,976). The city is planning to apply for a two year period, for a total of $403,104.

The application deadline is September 20, 2010.

This action complies with the current City Council's Strategic Operating Plan by helping to fully leverage funding for transportation improvements, helping to establish a multi-modal transportation plan by making transit system improvements, and helping to achieve short-term and long-term energy goals and reducing city carbon emissions through transit. This action also complies with operational improvement recommendations included in the Transit Master Plan that was accepted by the City Council on October 27, 2009.

The Transit Commission supports the subject action.

Pros:

- Increased mobility for the citizens of Asheville both within and outside the city.
- This is a step toward retaining the service and funding.

Cons:

- The City is required to fund 50% ($201,552) of the subject project cost; funding will be allocated from the Warren Wilson College and City of Asheville contribution to current route 29.

The total two-year cost of the subject project is about $403,104. The City is required to fund 50% ($201,552) of the subject project cost with the remaining 50% funded by the JARC grant. The City's required funding will be allocated from the Warren Wilson College and the City of Asheville's contribution to current route 29. The two-year amount from Warren Wilson College

will total $56,576; therefore the City's two-year cost is $144,976 or $72,488 per year. The City's first year funding is already included in the Transit Fund budget for this year, and second year funding will be requested in the Transit Fund budget for next fiscal year.

City staff recommends City Council adopt a resolution authorizing City staff to apply for a Federal Transit Administration (FTA) Job Access and Reverse Commute Program grant to fund the Black Mountain route and authorizing the Mayor to execute the appropriate documents to accept the grant, if it is awarded to the City of Asheville.

RESOLUTION BOOK NO. 33 – PAGE 206

L. MOTION SUPPORTING THE CITY OF ASHEVILLE JOINING IN THE LET'S MOVE CITIES AND TOWNS INITIATIVE AIMED AT SOLVING CHILDHOOD OBESITY WITHIN A GENERATION

M. RESOLUTION NO. 10-202 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES FROM JULY 1, 2010, THROUGH JUNE 30, 2011

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Asheville Humane Society (AHS) for animal shelter services within territorial limits of the City of Asheville.

Historically, Buncombe County has required the City of Asheville pay for animal shelter services through the Asheville Humane Society who has contracted with the County to run the animal shelter. The Asheville Humane Society (AHS) has told City staff that the cost for the shelter to the City for FY 2010-2011 will be $11,116.88 per month for a FY year total of $133,402.56. This is a five percent (5%) increase from last year's contract amount. This agreement for the shelter services for the term of July 1, 2010 through June 30, 2011.

Over the past year, Buncombe County has appropriated $4.5 million for a new animal shelter that is now on-line and operated by AHS. In addition to this one-time capital construction cost, Buncombe County also allocated $35,000 for initial start-up costs, along with an operational base contract of $550,000 for shelter care, $89,000 for all building operations and equipment, $100,000 for spay/neuter programming for adopted animals, and $25,000 for specialty care and rabies control. Lastly, the County also provided $36,000 in contract performance incentives.

The City of Asheville continuing its animal shelter contract through the Asheville Humane Society ties directly back through the City Council's Strategic Operating Plan, specifically the focus area of safe by actively enforcing animal control laws. In addition, this city/county/non-profit collaborative effort should continue to provide opportunities to hold sheltering costs down through economies of scale.

Pros:

- This contract has allowed the City to continue to partner with Buncombe County and the AHS for animal sheltering services.
- Without this partnership, the City would be forced to identify alternative sheltering options.

Con:

- Contracted sheltering costs, when compared to other municipalities in North Carolina, may reveal higher than average sheltering costs.

This cost is included in the Asheville Police Department's budget. Increase of 5% from last year's shelter contract from $127,050.00 to $133,402.56.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Asheville Humane Society for Animal Shelter Services for the term of July 1, 2010, through June 30, 2011. In addition, staff recommends that city staff work with county officials over the next six months to examine operational costs for sheltering throughout Buncombe County, to include all other Buncombe County municipalities who use Asheville Humane Society's sheltering services. Any recommendations for contract amendments would occur during the FY 11-12 budget process.

RESOLUTION BOOK NO. 33 – PAGE 207

N. RESOLUTION NO. 10-203 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH DR. PAUL MARTIN FOR PHYSICIAN SERVICES PROVIDED THROUGH THE CITY'S HEALTH SERVICES DIVISION

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement for physician services provided through the City's Health Services Division.

In January 1995, Council authorized the City Manager to enter into an agreement for part-time physician services in the Health Services Division. Dr. Paul Martin entered into a contractual agreement with the City of Asheville to provide three clinic days to City employees and their families. These clinic days have been very successful for Health Services.

This action complies with the Fiscal Responsibility prong of the City of Asheville's Strategic Operating Plan for 2010-11. By offering city employees clinic hours and complimentary health services for non-critical issues, Heath Care funds are saved in unnecessary doctor and emergency room visits, maintaining the city's long term financial commitment to high levels of fiscal responsibility.

Pros:

- The Health Services Clinic and Health Services Satellite Clinic provides on-site care for non-critical health needs
- Onsite care and services for employees saves the City of Asheville money in expenses that are not paid in unnecessary doctor and emergency room visits
- Dr. Martin is a trusted member of the Health Services staff team

Con:

- There are no foreseen cons for these services

This is a one year $100,000 contract, and funds have been budgeted and will be encumbered from the Health Care Fund to cover the cost of this contract.

City staff recommends City Council adopt a resolution authorizing the City Manager to sign an agreement for physician services with Dr. Paul Martin, MD to continue to provide physician services to employees and their families.

RESOLUTION BOOK NO. 33 – PAGE 208

When Mayor Bellamy asked for public comments on any item on the Consent Agenda, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

H. RESOLUTION NO. 10-199 - RESOLUTION AUTHORIZING THE CITY OF ASHEVILLE TO APPLY FOR A US DEPT. OF HOMELAND SECURITY FISCAL YEAR 2010 STAFFING FOR ADEQUATE FIRE & EMERGENCY RESPONSE GRANT TO OBTAIN FUNDING FOR SIX ADDITIONAL FIREFIGHTER POSITIONS

Summary: The consideration of a resolution authorizing the City of Asheville to apply for a grant in the amount of $540,000.00 from the US Department of Homeland Security to obtain funding for 6 additional firefighter positions.

The Department of Homeland Security has recently issued guidance for the FY 2010 Staffing for Adequate Fire and Emergency Response (SAFER) program. This is a grant opportunity for fire departments to add additional firefighters. The grant is a 3 year matching grant. In years 1 and 2, the grant covers 100% of the cost for the additional firefighter's salaries and benefits. The matching portion for the grant occurs in year 3, which is the full cost of these firefighter's salaries and benefits. This could be a good opportunity for our city to add needed personnel and have their cost completely absorbed by this grant for two years.

We currently operate 4 firefighter companies on 8 of our 17 fire companies (47%). One of our companies operates with two firefighters (Haw Creek). This grant could assist with increasing additional fire companies to four firefighter staffing which helps accomplish the following strategic priorities:

- Increased firefighter safety
  - Studies performed in Providence, RI, and Austin, TX, have shown that four firefighter companies reduce firefighter injuries and reduce the physiological effects of firefighting activities on firefighters.
  - Increased efficiency translates into increased firefighter safety during fire emergencies. Tasks that are performed more quickly reduce the exposure time for firefighters as well as mitigate emergencies earlier. In summary, a small fire is safer to firefighters than a large fire.
- Increased efficiency
  - We have conducted critical task analyses of our 3 firefighter and 4 firefighter companies. These analyses of actual fireground activities showed that 4 firefighter companies perform up to 41% more efficient during fire emergencies and up to 92% more efficient during medical emergencies.
- Increased service delivery
  - Increased efficiency translates into increased service delivery for citizens during fire and medical emergencies. Performing tasks quicker provides better service to citizens. Fire and medical emergencies have been shown to significantly worsen as time progresses. Mitigating emergencies earlier lessens the impact on citizens.
  - Earlier incident mitigation places fire companies in service and available to respond to other citizen needs earlier. The increased efficiency of 4 firefighter companies increases unit reliability and lessens the amount of time that citizens are receiving help from fire stations further away.
  - Additional firefighters are the one area that increases our ISO rating performance the most and moves us closer to an ISO 2.

We recommend applying for 6 firefighter positions for the following reasons:

- The grant program guidance indicates that a much higher priority for awards will be given to applicants who are increasing staffing to comply with the OSHA 2 in/2out standard. The strongest application we can compile would be to address our 2 firefighter company at Haw Creek to four firefighter staffing. This is the only area that we currently are not meeting the OSHA standard. This is also our only stand alone company that does not operate with 4 firefighters.
- We feel that a grant that asks for less or more would not be competitive.

Due to the timing of this notification, the Public Safety Committee has not reviewed this request; however, this is the same action that was reviewed last year in which the Public Safety Committee recommended approval; however, the grant was not awarded.

This action complies with the Strategic Operating Plan by increasing safety, efficiency, and service delivery; therefore this grant will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- Firefighter safety, efficiency, and service delivery will be increased.
- Hiring 6 new firefighters will help reduce overtime. The firefighters obtained from this grant could be placed on shift without a requirement to be minimally staffed positions. These positions will fully meet the requirements and intent of the grant as more of our companies will be fully staffed more frequently.
- The grant covers 100% of the cost for these firefighters for two years.

Con:

- We would assume the full cost of these employees in year three (FY 13/14)

We would receive $270,000 each year for two years. In year three, we would have to absorb the $270,000 annually.

City staff recommends that City Council authorize the City of Asheville to apply for a grant in the amount of $540,000.00 from the US Department of Homeland Security to obtain funding for 6 additional firefighter positions.

Assistant Fire Chief David McFee responded to various questions from Council, some being, but are not limited to: how will we program the $270,000 into to years three and on as we go into long-term budget planning; what is the staffing needed for the Haw Creek Station; why did the City not receive the grant last year; and is the grantor looking for public safety priorities that relate to homeland security.

Vice-Mayor Newman noted that we are making an open-ended commitment of adding these positions to the full-time payroll in year three and didn't want grant opportunities to make these decisions for us. When he asked how much flexibility we have in making keeping these employees on when the grant runs out, City Manager Jackson said that a good faith effort would need to be made to continue the funding of the positions.

Mayor Bellamy said that there are always retirements and a constant need for hiring. She believed that even with the addition of six individuals over this time period, she felt we could use them as we continue to increase the corporate boundaries of the City of Asheville. This ensures our ability to do that in an effective and safe way, especially when the first two years will be paid for with grant funds.

Councilman Davis moved to adopt Resolution No. 10-199. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 204

III. PRESENTATIONS & REPORTS:

A. BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY UPDATE ON WAYFINDING SIGNS

Councilwoman Manheimer noted that her firm does represent the TDA; however, since this is an informational update only, she did not have a conflict of interest.

Mr. Kelly Miller, Executive Director of the Buncombe County Tourism Development Authority (TDA), and Ms. Marla Tambellini, Director of Marketing and Public Relations, briefly updated City Council on the peeling wayfinding signs and the solutions associated with the peeling signs, noting that this is a top priority of the TDA.

B. METROPOLITAN SEWERAGE DISTRICT UPDATE

Mr. Tom Hartye, Executive Director of the Metropolitan Sewerage District (MSD), expressed Chairman Steve Aceto's regrets for not being able to attend this meeting. Mr. Hartye then thanked City Council representatives for their service on the MSD Board. He said that MSD's mission/objectives include environmental stewardship, fiscal management, customer service, and continual improvement.

Regarding environmental stewardship, (1) MSD met all legal and permit requirements and received good regulatory reports for Plant Discharge and air permits, the collection system permit, the pretreatment program, and the ISO program; (2) Annual System Performance Report on website with summary mailed to customers; (3) Rehab and replace 50,000 feet of sewer per year; (4) cleaned over 1 million feet per year of sewer line last year; (5) $10 Million Microscreen project will increase quality of treatment plant effluent; (6) Industry awards for treatment, innovation and management; and (7) Significant reductions in overflows. He then showed a chart showing significant progress over the past 11 years of the sanitary sewer overflows.

Regarding fiscal management, (1) Kept within operating budget (which was set at less than last fiscal year) – we were under our operating budget by 6%; (2) Issued $17 Million in bonds for Capital Improvement Program funding: issued $17.2 Million at a fixed rate of 4.13% and refunded $13.4 Million for a present worth savings of over $1 Million; and (3) Utilize financial forecast model/business plan (a) keep rate increases small and consistent; (b) use equal measures of bond and pay-as-go financing for Capital Improvement Program; and (c) keep Capital Improvement Plan on track for the future. He then showed a chart of Fiscal Year 2011 budget expenditures of $45,420,400 for construction projects; debt service; operations & maintenance; and capital equipment. He then showed a chart of Fiscal Year budgeted revenues of $45,420,400 of interest & miscellaneous income; domestic user fees; bond & pay as go; industrial user fees; and facility & tap fees.

Regarding continual improvement, (1) Capital Improvement Program (CIP) of approximately $15 Million per year for next 10 years; (2) Have constructed $249 Million since consolidation in 1991; (3) 99% of CIP is replacement and rehabilitation of existing sewers and plant equipment; and (4) Replacements are upsized according to the Master Plan to handle future growth.

Mr. Hartye showed a chart of the Capital Improvement Program for 10 years, for a total of $148.0 Million. Said Program included interceptors/wet weather rehab; collection rehabilitation; treatment plant / P.S.; and reimbursements.

Regarding customer service, (1) MSD has a service area of approximately 180 square miles; (2) MSD achieved an average response time to customer calls at 30 minutes during the

day and 39 minutes at night; and (3) MSD partners with member agencies to save money and to limit disturbance to the public.

He then outlined all the City of Asheville and MSD partnering projects as of August 2010.

Regarding planning initiatives, (1) MSD has agreed to take over Avery Creek District sewer lines for ownership and maintenance; (2) Updating agreement with Cane Creek District for future service pursuant to both Master Planning efforts; and (3) Utilizing Master Plan to formulate expansion policies and priorities.

Mr. Hartye responded to various questions/comments from Council, some being, but are not limited to: will the Microscreening project affect the smell from the river; after treatment of the water is it drinking water clean; explanation about the bidding process for contracts and whether local contractors are being awarded those contracts; and explanation of MSD's affordable housing policy.

On behalf of City Council, Mayor Bellamy thanked Mr. Hartye and the Board of Directors for their efforts on this very important Board.

C. GREENWAY COMMISSION UPDATE

Mr. Marc Hunt, Greenway Commission Chairman, provided Council with several maps showing completed greenway segments, the Greenways Master Plan recommendation map, and transportation routes. He explained how greenways are important for health and wellness; redevelopment, economic development and tourism; connecting the community; and environmental protection. He explained how the Greenway Commission collaborates with many organizations, some being, but are not limited to: Buncombe County, Asheville Parks & Greenways Foundation, Asheville Parks, Recreation & Cultural Arts; the Trust for Public Land; Mountain Housing Opportunities; City of Asheville Transit Commission; Asheville Design Center; Quality Forward; and RiverLink.

On behalf of City Council, Mayor Bellamy thanked Mr. Hunt and the Committee for their efforts on this very important Committee.

D. SPORTS COMMISSION UPDATE

Mayor Bellamy said that this update will be given at a later date.

E. QUARTERLY STRATEGIC OPERATING PLAN

Finance Committee Update

Councilman Russell, Chairman of the Finance Committee, said that the purpose of this memorandum is to provide the City Council an update on progress and achievements made by the Finance Committee during the fourth quarter of fiscal year 2009-2010.

Beginning in February 2010, the Finance Committee allocated time at each monthly meeting to focus on items of importance to the annual budget process. The committee spent considerable time reviewing fees and charges and the city's healthcare program while receiving ongoing updates about the overall budget process. Although the FY 2010-11 budget process was challenging due to impacts of the global recession, we were pleased to take part in a process that resulted in the adoption of a budget that included no property tax increase, no staff layoffs, and minimal impacts to city services.

As a result of our consideration of the city's health care program, the committee recommended that City Council form a Blue Ribbon Health Care Task Force made up of local

human resource professionals. The purpose of the task force is to review and benchmark major components of the city's health care program to best practices found in Asheville and throughout North Carolina. City Council recently approved the membership of this group, and we are looking forward to a report back from the task force in the third quarter of this fiscal year.

The Finance Committee also considered an economic incentive proposal submitted by the developers of the Montford Commons project. I believe the committee's work helped refine the proposal that was ultimately considered by the full City Council.

As you know, the city's FY 2011-12 capital planning process is already underway, and the Finance Committee is looking forward to a productive and effective budget process for the coming fiscal year. The committee recently recommended the concept of a capital planning retreat, which has been since scheduled by the Council for October 8. Based on the vision and course Council charts at the retreat, the committee will stand ready to help provide policy guidance to both the capital planning and budget process.

Planning & Economic Development Committee

Councilman Davis, Chairman of the Planning & Economic Development Committee, updated Council on some major accomplishments during the 4th quarter of the Committee as follows: (1) Sidewalk Cleaning: Flow chart produced for determining responsibility for sidewalk cleaning, as a guide in the rewrite of the sidewalk cleaning ordinance; forwarded to City Council; (2) 51 Biltmore Avenue, Downtown Development Agreement: Reviewed 51 Biltmore Avenue Downtown Development Agreement and forwarded to City Council; (3) Development Incentive Process: Staff directed to draft guidelines to be used by Council for assessing transformational projects when evaluating requests for Economic Development Incentives; (4) UDO Streamlining Process: Planning staff has almost completed Phase I of five phases in the UDO Streamlining Process; (5) Grove Arcade, COPS Payment: Reviewed options for restructuring of the Grove Arcade Public Market Foundation's Certificates of Participation payment, and forwarded to City Council; and (6) Eminent Domain for Public Infrastructure: Staff directed to develop procedures for obtaining private property for public use that would mirror procedures already in place by the MSD.

Quarterly Strategic Operating Plan

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the February 2009 strategic planning retreat and staff is providing its quarterly updates on progress of the five key focus areas.

City Council has asked City staff to provide quarterly updates on key strategic initiatives associated with the five primary focus areas of the City's Strategic Plan. Staff has tracked projects using performance indicators and measurement through the Fiscal Year 2009-10. Similar to the previous quarter, this update will be presented in the form of a video. In addition, as a subset to this presentation, staff provided the Economic Development Key Indicator Report

He then showed Council a video showing the staff's progress on the key strategic areas for the fourth quarter. The video will be available on the City's website.

This information is to update City Council on key operational initiatives specific to City Council's Strategic Operating Plan. No action is necessary at this time.

Mayor Bellamy noted that Asheville's unemployment rate which is 7.4% is down from last year at this time at 7.8%. Also, the home sales are increasing for our community. Last year it was 217 and this year it's 260. We are seeing some improvement in our local economy.

Vice-Mayor Newman noted that our energy reduction achievements are good and for the next fiscal year we have increased our goal to reduce our carbon footprint from 2% to 4%. He was excited about what that energy reduction footprint will look like in the next 4-5 years and felt we need a good plan on how we can achieve those goals.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER ADOPTION OF THE SHILOH COMMUNITY PLAN 2025

RESOLUTION NO. 10-204 - RESOLUTION ADOPTING THE SHILOH COMMUNITY PLAN 2025

Mayor Bellamy opened the public hearing at 6:29 p.m.

Urban Planner Julia Fields said that this is the consideration of a resolution adopting the Shiloh Community Plan 2025. This public hearing was advertised on September 3 and 10, 2010.

In late 2003, the Shiloh Community Association, Neighborhood Housing Services of Asheville, and the City of Asheville came together to organize a community planning process, apply for funding for facilitation, and organize a task force to lead the effort to develop a plan for Shiloh. The Shiloh Community Task Force began meeting in 2004 and over the past several years has continued to meet to address pressing community concerns and to work on the development of the plan.

She explained that there was a collaborative effort of the Shiloh Community Association, Neighborhood Housing Services and the City of Asheville to develop a set of objectives to enhance the development and quality of life in Shiloh for years to come. The Plan pulled in a broad base of involvement and support, linked the plan's recommendations to the Asheville City Development Plan 2025, found ways to ensure the preservation of Shiloh's historical identity while acknowledging the reality of change, and increased awareness of the Shiloh community along with establishing consensus on improvements in the neighborhood.

Using maps, she showed the plan area and then the core implementation area. The plan as drafted is divided into three major sections. The first section provides an introduction to the plan and details how the plan was developed and how it is proposed to be used. The second section provides background on the Shiloh community including a detailed history prepared by resident Anita White-Carter, along with demographic and land use statistics. In Chapter IV, the vision, goals, strategies and implementation measures to carry out the plan are presented. An implementation matrix completes the plan.

A few of the plan's quality of life goals and strategies include: (1) celebrate, promote and showcase community spirit, citizen participation and neighborhood history (1) strengthen the neighborhood association; (b) promote Shiloh throughout Asheville and Buncombe County; and (3) complete a detailed history of the Shiloh neighborhood; (2)establish a community resource, recreation, and education center (a) develop a plan and program concept for a resource center; (b) initiate programming as work is completed on the development of a resource center; (c) examine community partnerships as part of the development of the resource centers; and (d) utilize the new pavilion as a way to initiate interest in the idea of a resource center; (3) work to improve the livability of our neighborhood – particularly housing and safety (a) work to ensure a safe Shiloh; (b) improve pedestrian accessibility throughout the neighborhood; (c) improve the overall appearance and beauty of the Shiloh community; and (d) utilize the new pavilion as a way to initiate interest in the idea of a resource center; (4) improve the infrastructure in the community (a) work with City of Asheville and utility service providers to access the infrastructure issues in the neighborhood; and (b) work with the Transportation Department to determine if additional traffic calming measures are warranted; (5) provide assistance for affordable housing and home

improvement (a) provide assistance to residents to enable them to remain in their homes; (b) explore opportunities to develop new affordable housing; (c) provide information on home improvement assistance; and (d) coordinate efforts to remove dilapidated and abandoned manufactured homes; (6) maintain and develop opportunities for green space (a) retain and develop the green space along the creek; (b) create additional green space and tree canopy in area; and (c) improve recreation opportunities at Recreation Center; (7) protect, enhance and complement the existing character of Shiloh (a) create a Shiloh Overlay District in the core area; (b) target areas for redevelopment and infill complementing existing development (c) restrict commercial incursion; define appropriate areas for commercial development; and (d) examine National Register District; and (8) create neighborhood gateways/identity (a) create a primary gateway into the community along Shiloh Road; (b) create smaller gateways into the community – West Chapel and Caribou Roads; and (c) explore ways to obtain approval and funding for customized street signs within the Shiloh community.

She then explained the implementation plan for each implementation measure, along with the suggested timeframes and principal responsible parties.

Some of the major recommendations in the plan include:

- Establishing a community resource, recreation, and education center.
- Working with Asheville Police Department on several initiatives to ensure a safe Shiloh.
- Creating a Shiloh Overlay District for new construction in the community core area.
- Creating neighborhood gateways.

The Asheville City Plan 2025, called for a neighborhood plan for the Shiloh Community. If adopted by Council, the policies and implementation measures found in this plan should be used to guide action in the community. Many of the community goals will need to be spearheaded by the Community Association. This plan should also be used as guidance for issues such as rezoning, housing initiatives and other relevant programs in the Shiloh neighborhood.

The Asheville Planning and Zoning Commission, at their meeting on July 22, 2010, reviewed and unanimously recommended the plan to Council. A few changes to the plan recommended by the commission and by the community have been made since that time.

This plan, while not specifically supporting a goal in the Council's Strategic Plan, was clearly called for in the Asheville City Plan 2025.

Pros:

- Puts forward a strategic plan for an important Asheville neighborhood.
- Plan was created with considerable community input.
- Sets an ambitious agenda.

Cons:

- Some may see plan as controlling and unchangeable.
- Sets an ambitious agenda.

The plan is a guide for future efforts in the Shiloh community. No specific program requiring funding will be undertaken without additional action.

Staff recommends the Asheville City Council review the draft plan, make any amendments, and adopt the Shiloh Community Plan 2025.

When Mayor Bellamy noted that if Council approves the plan, they will be approving the implementation schedule as well, Councilman Bothwell confirmed that this is a commitment of the spirit of implementation with funding to be decided in future budgets.

Ms. Norma Baynes, Shiloh resident and liaison for the Shiloh Community Association, briefly explained the path leading to development of this plan. She supported the plan and looked forward to continuing the partnership with the City and other organizations to implement the plan.

Ms. Marilyn Bass, Shiloh community outreach individual, reiterated Ms. Baynes comments and felt no plan is good unless it's implemented. She said we will need to continue this mutually beneficial partnership hopefully with some resources from the City, understanding the City's budgetary constraints. .

In response to Councilman Russell concern about the implementation expense, Ms. Fields said that all along City staff and the Community Association have been cognizant of the City's budgetary constraints and made it very clear that anything with City funds (except City staff) would have to come back to City Council. She said that many goals will rest heavily on the Community Association.

Mayor Bellamy said that the character of Shiloh will be preserved in this plan and as redevelopment occurs, it will be done in tandem to the existing fabric of the neighborhood. She felt that one thing missing in Shiloh is a lead agency to help them and she hoped that Mountain Housing Opportunities can partner with Shiloh to work together. It's also the responsibility of Council to make sure that the goals in the plan are a priority. It is incumbent upon us to implement the plan as we do all our master plans, understanding that the success of the plan will not happen overnight.

Mayor Bellamy closed the public hearing at 6:45 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-204. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 209

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REDUCE THE SIZE OF THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION FROM 14 TO 12 MEMBERS

ORDINANCE NO. 3896- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REDUCE THE SIZE OF THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION FROM 14 TO 12 MEMBERS

Mayor Bellamy opened the public hearing at 6:53 p.m.

City Attorney Oast said that this is the consideration of an ordinance amending the Unified Development Ordinance to reduce the size of the Asheville-Buncombe Historic Resources Commission (HRC) from 14 members to 12. This public hearing was advertised on September 3 and 10, 2010.

The HRC is a joint commission of the City of Asheville and Buncombe County organized pursuant to Part 3C of N.C.G.S. Chapter 160A. The HRC currently consists of 14 members, with

each governing body having seven appointments. A proposal has been made to reduce the HRC membership to 12, with each governing body appointing six members.

The proposal under consideration is for each appointing body to reduce its appointees by one member. In order for the City to reduce its appointments, an amendment to City Code Sec. 7-3-4(b)(1) is required. Corresponding amendments to Sec. 38-27 of Buncombe County's Ordinance were adopted by the Buncombe County Commissioners on August 17. Because the HRC and its functions are in the UDO, the proposed amendment should be treated as an amendment to the zoning ordinance, and a public hearing is required. Because there are some vacancies on the HRC, there is no need to need to phase-in or removal of members. This amendment will be effective for the October meeting.

This proposed amendment and the reasons for it have been discussed with the HRC, which does not oppose it. The Council's Boards and Commissions Committee (August 10) and the Planning and Zoning Commission (September 1) both unanimously approved this proposal.

Pros:

- Reduces membership of HRC to more manageable size.
- Reduces potential for quorum problems/minority decisions.

Con:

- None noted.

Slight reduction in administrative costs.

This action complies with City Council's Strategic Operating Plan in that it (1) Promotes intergovernmental cooperation; and (2) Promotes density and infill development (Smart Growth Plan).

Adoption of this ordinance is recommended.

Mayor Bellamy closed the public hearing at 6:54 p.m.

Councilwoman Manheimer, liaison to the HRC, said that she worked with the HRC in coming up with the number of 12 after looking at other cities across the state. She said that the membership size will again be re-evaluated in the future.

When Mayor Bellamy asked why the membership was an even number, City Attorney Oast said that since the City and County have equal number members there is no way there can be an odd number.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3896. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 289

Due to the anticipated length of the public hearings regarding telecommunication towers, Mayor Bellamy said that the two public hearings will be held after the closed session in order to not break up the public hearing discussion.

CLOSED SESSION

At 7:15 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) to discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authorization is contained in G.S. 143-318.11 (a) (4); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: Market Center, LLC, and City of Asheville. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (3) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 7:40 p.m. Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGULATING TELECOMMUNICATION TOWERS TO BE MORE CONSISTENT WITH CHANGES IN THE FEDERAL AND STATE LAWS

ORDINANCE NO. 3897 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGULATING TELECOMMUNICATION TOWERS TO BE MORE CONSISTENT WITH CHANGES IN THE FEDERAL AND STATE LAWS

Mayor Bellamy opened the public hearing at 7:42 p.m.

City Attorney Oast said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) regulating telecommunication towers to be more consistent with changes in the federal and state laws. This public hearing was advertised on September 3 and 10, 2010.

Telecommunication towers and concealed telecommunication support structures are allowed as a conditional uses in most commercial zoning districts. They are prohibited in residential districts unless located on publicly-owned property supporting a non-residential use, such as schools or fire stations, where they are allowed as conditional uses.

The federal Telecommunications Act was adopted in 1996. This law essentially required local jurisdictions to permit telecommunications facilities, but gave deference to local zoning regulations. However telecommunications towers were not originally included in the first UDO adopted in 1997. At the time, wireless telecommunications was a new and burgeoning industry, and the City hired a consultant to draft and explain the new standards, which were added in 1999. The standards have changed little over the years, despite changes in the federal and state laws and available technology. While these standards largely remain relevant and appropriate, there were a few areas that required updating in order to remain consistent with the changes in the laws. Moreover, in 2007, a State law was enacted to help implement the federal law, and to provide for some consistency across local jurisdictions with respect to zoning decisions involving telecommunications towers.

The proposed UDO text amendment proposes several changes to the conditional use standards for telecommunications towers.

The changes proposed are generally designed to remove some historic barriers to towers that have, through new technology, become less objectionable. Proposed amendments include:

1. Some definitions are amended and some new ones are added to conform to State law.

2. An expedited procedure for collocated facilities is added in order to comply with State law.

3. The requirement for facilities in residential districts to be located only on publicly owned property is removed in order to comply with a prohibition in the State law. Location on publicly-owned property is encouraged, and facilities are still prohibited from locating on property that is in use for residential purposes.

4. Some other non-substantive changes are made in order to use the new terminology

Facilities locating in residential areas are still required to obtain a conditional use permit, which requires submission of a detailed application and a public hearing. The applicant will still be required to demonstrate that there is no better alternative available and that the tower proposed is the least intrusive means for the service providers to provide their service or to close gaps in their services. Therefore, those properties continue to have the safeguards afforded by this process. Council can still impose appropriate conditions on the siting of these towers in order to mitigate their impacts.

The City Council Strategic Operating Plan outlines several goals aimed at improving sustainable growth and development opportunities while ensuring that the City's regulatory environment effectively protect the citizens health, safety and welfare. Wireless telecommunications are a key element to sustainable growth and development and should be supported to the extent that it does not compromise other strategic goals.

At its meeting on August 19, the Planning and Zoning Commission unanimously recommended in favor of this text amendment.

Pro:

- Expands opportunity for a utility, enabling providers to meet the growing demand and provide improved service without undue impact on residential areas.

- Is consistent with state and federal laws

Con:

- Expands the places where telecommunication towers may be located, most notably in residential areas, which has potential for conflict with the surrounding community.

Staff recommends adoption of the ordinance proposed.

Mr. Damien Hoffman, resident in the Hills of Beaverdam Homeowners Association, said that allowing telecommunication towers in residential zones is a sustentative change to the law. He opposed the "shock clock" clause in the ordinance to force City Council to decide within 45 days whether the telecommunication tower will be approved or not. The 45 day time period disallows citizens the time to do the research to oppose these types of activities on their land or in their neighborhoods. He noted that in 2006, City Council was presented with an application for an amendment to change the ordinance in an R-16 zone. This time an application is back to allow them in all residential areas.

Mr. Andy Gladstone, resident in the Hills of Beaverdam, spoke against this amendment and urged City Council to look at this amendment in the context of what it will be doing to the neighborhoods.

Ms. Ellen Bluestone, resident on Crescent Lane, spoke against the amendment. She understands that this wording amendment is necessary to make the application for the telecommunication tower for the proposed site at Lincoln Memorial Cemetery a viable application. She discouraged the wording amendment and suggested a buffer zone be established between children and telecommunication towers.

Ms. Patsy Brison, attorney representing US Cellular Corporation NC RS-4 Inc., said that the zoning map shows a number of residential areas that may be located in valleys or in ridges where it is difficult to have cell service provided. The proposed amendment would create still the same amount of protections through the conditional use process. Using a zoning map, she showed the parts in Asheville that are most residentially zoned. In those areas because of our ridge and mountainous terrain there are some physical restrictions on sending signals and locating towers and antenna. In order to provide that service and to comply with the federal law which prohibits City Council from prohibiting providing service it's necessary to open up more areas to provide that. She urged City Council to adopt the proposed amendment.

Mayor Bellamy closed the public hearing at 7:56 p.m.

In response to Councilwoman Manheimer, City Attorney Oast said that the 45-day time period is not for the location of a new tower, but for co-location of an antenna on an existing tower. He noted that the 45-day time period is required by state law. He also noted that there are certain restrictions on antenna co-locations.

When Councilwoman Manheimer asked if the City currently allows free-standing cells towers to be located in residential districts at all, City Attorney Oast said that they are allowed in residential districts on public property not used for residential purposes.

In response to Councilwoman Manheimer, City Attorney Oast said that someone could put an antenna in a church located in a residential district.

Councilwoman Manheimer acknowledged that there are changes in the proposed amendment that are necessary to bring us into compliance with state and federal laws. However, if we were to delete the following proposed language and continue to disallow monopoles and lattice towers in residential districts, would we still be in compliance: "Section 7-16-2 (d) (3) (a) Use Districts ... "In addition, telecommunication towers shall be allowed as a conditional use in residential districts at schools, fire stations, publicly-owned housing complexes, recreation centers, community centers, or other properties not used for residential purposes; provided: (i) said use is not otherwise non-conforming; (ii) the property is not subdivided for the purpose of accommodating a telecommunication tower and, (iii) the application meets the standards set forth in subsections 7-16-2 (c) and (d) of this chapter."

City Attorney Oast said that to delete the language outlined above by Councilwoman Manheimer, we would be in compliance with state law. He said the potential problem is whether the City has to allow monopole cell towers in residential districts. If the effect of not allowing them in residential districts would be to make the service unavailable, then we would not be in compliance. However, it was his opinion that the courts would say that federal law preempts state law or local zoning ordinances in that case.

Councilman Smith clarified that it would be possible to build cell towers elsewhere outside of residential areas and those towers can then service those residential areas. Then, those residential areas wouldn't have been prohibited from receiving service.

When Vice-Mayor Newman asked if it would be easy to provide a map to show where cell towers are located in the City, Assistant Planning & Development Director Shannon Tuch said that it's not difficult to demonstrate where the towers are located, but more of a challenge to

demonstrate their coverage area. What would be significantly more challenging would be to identify all of the locations where we have co-located antennas or concealed antennas.

Vice-Mayor Newman didn't feel that he has enough information of how successful or unsuccessful our current ordinances are in enabling the development of this infrastructure in our community. We are doing everything we can to restrict these developments in places that would be most appropriate – commercial corridors where they blend in. He noted that every cove is not going to have great reception, but we are trying to get as good of coverage as we can reasonably expect a city like Asheville to have.

Ms. Tuch said that co-location has been very successful in limiting the numbers of towers. In the last eight years we have had a lot of co-location applications. That technology has been very valuable. In addition, we co-locate on things other than existing towers, e.g., tall building, water towers, etc.

Vice-Mayor Newman clarified that the City's existing policy is if you are in a residentially zoned area, but it is publicly-owned property (like a city-owned community center), you can build a cell tower. Ms. Tuch responded that is correct, and also noted that a private company could lease space from the city or from the property owner.

Vice-Mayor Newman said that we have commercial corridors going to various parts in the community, but also have roads that were formerly rural and urbanized over time. He asked if it was Ms. Tuch's sense that those are the trickier spots because there is not much commercially zoned property. Ms. Tuch said that is the case and in addition to not having a lot of commercial uses in those areas, they tend to be less densely developed.

Planning & Development Director Judy Daniel said that another reason this is becoming an issue is because more people use cell phones and the cell phones are more complex. Because there are more and more people using the towers, the coverage gets smaller. That is exasperated in Asheville by the topography.

Mayor Bellamy asked if we can limit the areas of the City that would allow cell towers. City Attorney Oast said that we cannot limit them if the effect is to prohibit the service and the only way to know that is from information from the industry whether the service is available everywhere. There is a mandate to these providers and to local governments that regulate them to ensure that service is available, including filling in significant gaps in coverage.

When the Mayor asked if we can prohibit cell towers on school properties, City Attorney Oast said that there are not that many school properties in the City, so he thinks the effect of doing that would probably not prohibit the provision of service in the City.

Mayor Bellamy asked if we permitted a cell tower could we require that there be enough room on there for a public use facility. City Attorney Oast said that we could purchase space on someone else's tower and perhaps as a condition we could ask for some sort of public use space on that tower. In addition, Ms. Tuch said that it's not usual for us to recommend a condition that additional space for other providers be offered. She also noted that there is a provision in a different section in the City's Code that basically requires that when you have tall buildings or buildings of a certain kind of construction material that they have to be equipped with the infrastructure to accommodate internal and external communications and that the City has the rights to require an easement on the building in order to be able to locate a repeater or an antenna or whatever may be necessary.

When Mayor Bellamy asked if it was possible to include a reference to the provision explained by Ms. Tuch above as part of this ordinance, City Attorney Oast said that he would need to research that question but if it's possible he will bring it back to Council. As a general proposition, he thinks we can make it a condition of the erection of any tower.

Councilman Russell felt that if we ask for an amendment to be researched by our City Attorney that it be specific. He asked for clarification on whether the ordinance would be for public good or public safety (fire and emergency rescue). Mayor Bellamy said her thought would be for public good because conceivably if we were to actually provide services to some portions of our community who don't have access to the internet then it's for public good, not just for safety.

When Councilman Russell felt that discussion should be held at the Planning & Economic Development (PED) Committee level, Mayor Bellamy noted that this amendment didn't go through PED and this is the opportunity to discuss these things. Also, City Attorney Oast said that he would have to research it.

Councilman Bothwell said it seems to him that the technology is miniaturizing very quickly and some cities have wireless nodes on telephone poles through downtown. He wondered if towers themselves are headed out and therefore if we eliminated the paragraph outlined above by Councilwoman Manheimer we might not face any legal challenge because the point may be moot. City Attorney Oast said that in the course of the research he has done, that's true. You can do the same thing with more smaller towers that you can do with one big one. He also thinks that the technology has improved that towers are unobtrusive enough that they can be mounted on residential structures (similar to a television antenna).

Councilwoman Manheimer moved to (1) adopt Ordinance No. 3897, updating the standards regulating telecommunication towers, with the following amendments: (a) deletion of paragraph (f) which amends Section 7-16-2 (d) (3) (a); and (b) correct a typographical error that Section 7-16-2 (d) (4) (a) be lettered "(g)", not "(4)"; and (2) send the deleted paragraph (f) which amended Section 7-16-2 (d) (3) (a) to the Planning & Economic Development Committee (PED) for a better examination before a proposed zoning amendment is adopted that includes that language. This motion was seconded by Councilman Bothwell and carried unanimously.

City Attorney Oast said that the paragraph will be brought to the PED Committee just as soon as possible. Since the ordinance Council just adopted will have an effect on the pending conditional use permit application that follows, he requested for a brief recess.

Ordinance Book 26 - page 290

D. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS US CELLULAR TELECOMMUNICATION TOWER, LOCATED AT 415 BEAVERDAM ROAD, FOR CONSTRUCTION OF AN 80' MONOPOLE TOWER

City Attorney Oast said that with the language amendment being sent to the Planning & Economic Development (PED) Committee and presumably coming back to City Council for consideration, the ordinance amendment is still in play. Therefore, the conditional use permit application is still pending but there is no basis to hear it at this meeting.

Councilman Russell moved to continue the public hearing to consider a conditional use permit for the project identified as US Cellular telecommunication tower located at 415 Beaverdam Road until October 26, 2010. This motion was seconded by Councilman Bothwell and carried unanimously.

Mayor Bellamy explained to the audience that the conditional use permit application for the telecommunication tower is still on the table. However, City Council has asked the City Council PED Committee to review the language which was deleted from the adopted ordinance regulating telecommunication towers at their next meeting. The PED Committee will report their recommendation at the October 26 Council meeting, after which time City Council will consider the conditional use permit application.

V. UNFINISHED BUSINESS:

A. MOTION APPROVING THE USE OF REVOLVING FACILITIES FUND OPTION FOR ENERGY EFFICIENCY & CONSERVATION BLOCK GRANT FUNDS

Energy Coordinator Maggie Ullman said that this is the consideration of three sustainability options to reprogram the remaining $250,000 of Energy Efficiency and Conservation Block Grant (EECBG) funding

The EECBG program was established by the Department of Energy in 2009 as part of the American Recovery and Reinvestment Act (ARRA). The high level goals of this program include:

- Reduce fossil fuel emissions
- Reduce the total energy use of the eligible entities
- Improve energy efficiency in the transportation, building, and other appropriate sectors
- Create and retain jobs

The City of Asheville was awarded $804,700 in June 2009 for this program; $554,700 is currently obligated for municipal facility retrofits and environmental sustainability education. On August 10th, 2010 Council asked staff to provide options for how to use the remaining $250,000 of this grant award. The first two program options are residential renewable and energy efficiency loan programs. The third option is a municipal renewable and energy efficiency bond program to support the annual 2% carbon footprint reduction policy.

Loan Loss Reserve: The City of Asheville would solicit services from a lending institution (bank, credit union, etc) to provide a loan product to residents. The City and the lending institution would collaboratively determine lending requirements. EECBG funding would be the Loan Loss Reserve providing security to the partner to then invest their own funds to be loaned out as the primary loan pool. Administration for the life of the loans would be conducted by the lending institution.

Internally Administered Revolving Loan Fund: The City of Asheville would design a revolving loan fund in house to offer loan products to residents. The City would determine lending requirements. EECBG funding would be the total pot available for lending. Administration for the life of the loans would be conducted by staff.

Revolving Facilities Fund: The EECBG funding would be used to leverage a $3-5M bond for retrofitting municipal facilities. Retrofits would be focused on energy efficiency strategies that would result in utility budget savings. These savings would support debt service repayment with interest and remain cash flow positive each year. Retrofits to be included in this bond include: LED streetlights, energy management control systems, solar photo voltaics, lighting upgrades, and any other eligible projects that have over lapping facilities maintenance needs and energy savings potential.

She then explained the program comparison matrix for how these actions would tie into the City Council Strategic Operating Plan.

The Sustainability Advisory Committee on Energy and the Environment (SACEE) conducted sub committee meetings to discuss this topic in the absence of time for the full committee to address the issue. The sub committee recommends council consider the Revolving Facilities Fund.

City staff recommends City Council review the options identified and direct staff.

When Mayor Bellamy asked for public comment, no one spoke.

Vice-Mayor Newman was disappointed that we don't have the legal authority to move forward on the community based financing initiative but hoped that those issues on the state and federal level around the Property Assessed Clean Energy model will be worked out. In the meantime, he spoke in support of the Revolving Facilities Fund. Asheville can lead by example in showing how an organization can save money by being more energy efficient and reducing our environmental footprint at the same time. He noted that if the City proceeds with the LED streetlight retrofit, it will save approximately $400,000 per year. If we do a ten year bond, not only will it fully pay for itself, it will generate approximately $100,000 of cash flow per year. He felt it would be great to hear from staff about their different strategies to achieve a 20% reduction in our energy consumption over the next five years.

Mayor Bellamy said that she had an opportunity to meet with two different companies who manage Revolving Facilities Funds. She was not sure if we would administer this in-house or contract it out, but felt that Council should have an opportunity to hear some in-depth presentations since this is a new endeavor.

Vice-Mayor Newman moved to support using the $250,000 EECGB funding for the Revolving Facilities Fund to help advance the City's goal of achieving a 4% per year energy savings for municipal facilities along with the associated ideas for issuing bonds to advance those goals as outlined by Ms. Ullman. This motion was seconded by Councilman Bothwell and carried unanimously.

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-205 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH RAFTELIS FINANCIAL CONSULTANTS FOR A WATER RATES AND FEES STUDY

ORDINANCE NO. 3898 - BUDGET AMENDMENT FOR AN AGREEMENT WITH RAFTELIS FINANCIAL CONSULTANTS TO CONDUCT A WATER RATES AND FEES STUDY

Water Resources Director Steve Shoaf said that this is the consideration of resolution authorizing the City Manager to execute an agreement with Raftelis Financial Consultants, Inc., in an amount not to exceed $88,750 for the Water Rates and Fees Study; and adopt the associated budget amendment in the amount of $38,750.

Per City Council's direction, the Water Resources Department solicited proposals in July 2010 from consulting firms to conduct a Water Rates and Fees Study. Thirteen firms responded to the Request for Proposals (RFP), including:

1. Raftelis Financial Consultants, Inc. – Charlotte, NC
2. Municipal and Financial Services Group – Annapolis, MD
3. Lighthouse Utility Consulting – Ocala, FL
4. Utility Advisors' Network, Inc. – Orlando, FL
5. Burton & Associates, Inc. – St. Augustine, FL
6. TischlerBise – Bethesda, MD
7. ENTRIX, Inc. – Raleigh, NC
8. Black & Veatch Corporation – Overland Park, KS
9. Martin-McGill – Asheville, NC
10. Cavanaugh Associates – Asheville, NC
11. C.H. Guernsey & Company – Atlanta, GA
12. Burns & McDonnell – Kansas City, MO
13. Red Oak Consulting – White Plains, NY

A review team, comprised of staff from multiple City Departments, reviewed these proposals and selected the firm of Raftelis Financial Consultants, Inc. Subsequent to this selection, Water Resources staff met with Raftelis representatives and negotiated a Consulting Services Contract in the amount of $88,750.

This project is part of City Council's strategic plans to explore opportunities to ensure effectiveness and value for water fees charged and to operate the City of Asheville to the highest level of fiscal responsibility.

Pro:

- Approval of the bid award will allow the City to complete the project in time to recommend a water rate structure for future budget planning.

Con:

- Failure to award the bid to the recommended firm will delay completion of the project by the expected deadline.

Currently, $50,000 is earmarked for the study in the Water Resources Capital Improvement Project (CIP) budget. An additional $38,750 will be reallocated from another capital project. There have been enough cost savings in the Reynolds Mobile Home Park project to transfer $38,750 to the Water Rates and Fees Study. The total project budget for the study is $88,750.

In approving the Fiscal Year 2010-11 budget and related water fees and charges, Council set a goal to comprehensively evaluate water fee structures prior to setting rates in Fiscal Year 2011-12. Completing this study will accomplish the Council goal.

City staff recommends City Council authorize the City Manager to execute an agreement with Raftelis Financial Consultants, Inc., in an amount not to exceed $88,750, for the Water Rates and Fees Study; and adopt the associated budget amendment in the amount of $38,750.

Mr. Shoaf explained why he felt this study was necessary when Councilman Davis questioned the Brown and Caldwell study that was conducted several years ago that recommended a fee structure for a certain amount of increase each year.

In response to Councilwoman Manheimer, Mr. Shoaf said that the consultant will provide Council different alternatives for them to consider.

Rev. Christopher Chiaronmonte felt Council should use the $80,000 to put people in housing.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Davis moved for the adoption of Resolution No. 10-205. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Mayor Bellamy voting "no".

RESOLUTION BOOK NO. 33 – PAGE 210

Councilman Russell moved for the adoption of Ordinance No. 3898. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Mayor Bellamy voting "no".

ORDINANCE BOOK NO. 26 - PAGE 294

B. BOARDS & COMMISSIONS

River District Design Review Committee

The following candidates applied for the two positions on the River District Design Review Committee; however, none of the candidates meet the requirements of being property owners located within the River District: Philip Ellis, Michael McDonough and Stuart Smith.

Upon recommendation of the Boards & Commissions Committee, it was the consensus of Council to re-advertise for these positions.

RESOLUTION NO. 10-206 – RESOLUTION APPOINTING A REGULAR MEMBER TO THE BOARD OF ADJUSTMENT

The following candidates applied for a position on the Board of Adjustment, noting that current alternates of James Sheeler, Douglas Hattaway, Kristy Carter, and Phillip Hardin are interested in the regular vacancy: Diane Meek, Jeffory Quick, Eugene Britton, Bill Branyon, Richard Fort, Eric Rainey and Nelda Holder.

Vice-Mayor Newman said that the Boards & Commissions Committee recommend appointing Kristy Carter to the Regular position left by Lee McElrath and to re-advertise Ms. Carter's alternate seat in order to find diversity on the board.

Vice-Mayor Newman moved to appoint Kristy Carter (as a regular member) to fill the unexpired term of Mr. McElrath, term to expire January 21, 2011, and then a full three-year term, term to expire January 21, 2014, or until her successor has been appointed. This motion was seconded by Councilman Smith and carried on a 6-1 vote, with Councilman Bothwell voting "no."

Councilman Bothwell felt there were good candidates who applied to the Board and felt we should interview those for the alternate seat.

Mayor Bellamy spoke in support of interviewing Richard Fort for the alternate seat; however, would support re-advertising for diversity make-up of the board.

Since there was no motion, due to the need for diversity on the board, the City Clerk was instructed to re-advertise for the alternate seat on the Board of Adjustment.

RESOLUTION BOOK NO. 33 – PAGE 211

RESOLUTION NO. 10-207 – RESOLUTION APPOINTING MEMBERS TO THE CITIZENS-POLICE ADVISORY COMMITTEE

The following candidates applied for positions on the Citizens/Police Advisory Committee: Curry First (Central area), Carol Rogoff Hallstrom (North area), and Allen Brailsford (west area).

Vice-Mayor Newman said that the Boards & Commissions Committee recommend appointing Carol Rogoff Hallstrom (as the north representative) and Allen Brailsford (west representative) to the Citizens-Police Advisory Committee.

When Councilman Bothwell stated that he would like to interview Curry First, it was noted that Mr. First resided in the central area and the vacancies were for the north and west areas.

Vice-Mayor Newman moved to appoint (1) Carol Rogoff Hallstrom (as the north representative) to fill the unexpired term of Angelica Wind, term to expire June 30, 2011, or until her successor has been appointed; and (2) Allen Brailsford (as the west representative) to fill the unexpired term of Cesar Romero, term to expire June 30, 2011, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 212

RESOLUTION NO. 10-208- RESOLUTION APPOINTING MEMBERS TO THE PUBLIC ART BOARD

The following candidates applied for positions on the Public Art Board: Shad D. Marsh, Kathleen Lyons, Jeanna Maines, Jaan Ferree, William F. Meller and Mark Koven.

Vice-Mayor Newman said that the Boards & Commissions Committee recommend appointing Jaan Ferree (to fill the unexpired term of Dr. Barbara Cary) and Mark Koven (to one of the two new seats) to the Public Art Board and re-advertising for the other new seat. Councilman Smith noted that Professor Koven was a recommendation by the Public Art Board.

Vice-Mayor Newman moved to (1) appoint Jaan Ferree, to fill the unexpired term of Dr. Barbara Cary, term to expire June 30, 2011, or until her successor has been appointed; (2) appoint Mark Koven to serve a three-year term, term to expire June 30, 2014, or until his successor has been appointed; and (3) to re-advertise for the other new seat. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 213

RESOLUTION NO. 10-209 – RESOLUTION APPOINTING A MEMBER TO THE SOIL EROSION/STORMWATER REVIEW COMMITTEE

The following candidate applied for the positions on the Soil Erosion/Stormwater Review Committee: Pete Hildebrand.

Vice-Mayor Newman said that it was the recommendation of the Boards & Commissions Committee to appoint Pete Hildebrand and to re-advertise for the second seat of a City resident or an individual who resides in the extra-territorial jurisdiction area.

Vice-Mayor Newman moved to (1) appoint Pete Hildebrand to the City resident position for a three-year term, term to expire November 1, 2013, or until his successor has been appointed; and (2) re-advertise for the second seat of a City resident or an individual who resides in the extra-territorial jurisdiction area. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 214

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte asked Council to repeal the panhandling ordinance.

Councilman Bothwell suggested the City Manager investigate the necessity of sending out the non-negotiable checks for people who have direct deposit.

Councilman Davis invited the Council and public to the dedication of the Speedway Memorial on Thursday, September 23, 2010, at 6:00 p.m. at Carrier Park. Mayor Bellamy regretfully could not attend due to two previously scheduled events.

Councilman Smith was proud to acknowledge that Asheville City Schools came in second in SAT scores state-wide.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:56 p.m.

Magdalen Bourleson
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – September 28, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Russell gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING SEPTEMBER 15 – OCTOBER 15, 2010 AS "HISPANIC HERITAGE MONTH"

Mayor Bellamy proclaimed September 15 – October 15, 2010, as "Hispanic Heritage Month".

B. PROCLAMATION PROCLAIMING OCTOBER 3-9, 2010, AS "MENTAL ILLNESS AWARENESS WEEK"

Mayor Bellamy read the proclamation proclaiming October 3-9, 2010, as "Mental Illness Awareness Week" in the City of Asheville. She presented the proclamation to Mr. Jim Pitts, with the National Alliance on Mental Illness North Carolina, who briefed City Council on some activities taking place during the week.

C. PROCLAMATION PROCLAIMING OCTOBER, 2010, AS "FIRE PREVENTION MONTH"

Vice-Mayor Newman read the proclamation proclaiming October, 2010, as "Fire Prevention Month" in the City of Asheville. He presented the proclamation to Fire Chief Scott Burnett, who briefed City Council on some activities taking place during the month.

D. PROCLAMATION PROCLAIMING OCTOBER, 2010, AS "BREAST CANCER AWARENESS MONTH"

Councilwoman Manheimer read the proclamation proclaiming October, 2010, as "Breast Cancer Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Earleen Bennett, representing Beauty Through Cancer, who thanked City Council for their support and briefed Council on some activities taking place during the month.

E. PROCLAMATION PROCLAIMING OCTOBER 30, 2010, AS "KIDS VOTING DAY"

Councilman Davis read the proclamation proclaiming October 30, 2010, as "Kids Voting Day" in the City of Asheville. He presented the proclamation to Board Members Jewel Tavener and Kathi Ballard, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 14, 2010

B. RESOLUTION NO. 10-210 - RESOLUTION MAKING PROVISIONS FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE BLUE RIDGE PRIDE EVENT ON OCTOBER 2, 2010

Summary: The consideration of a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Blue Ridge Pride on October 2, 2010.

Blue Ridge Pride, Inc. has requested through the City of Asheville Development Services Center that City Council permit them to serve beer and/or unfortified wine at Blue Ridge Pride and allow for consumption at this event.

Blue Ridge Pride will be held on Saturday, October 2, 2010 from 12:00 p.m. – 8:00 p.m., within the boundaries of Lexington Avenue between the intersections of the I-240 overpass and Walnut Street, as per the event area limits referenced on the accompanying site map.

This action has no direct connection with the City of Asheville Strategic Operating Plan.

Pro:

- Allows fundraising opportunities for Blue Ridge Pride, Inc.

Con:

- Potential for public safety issues

City staff recommends City Council adopt the resolution authorizing the City Manager to approve a resolution making provisions for the possession and consumption of malt beverages and/or unfortified wine at Blue Ridge Pride.

RESOLUTION BOOK NO. 33 – PAGE 215

C. RESOLUTION NO. 10-211 - RESOLUTION AMENDING THE 2010 CITY COUNCIL MEETING SCHEDULE TO ADD (1) A CAPITAL IMPROVEMENT PROGRAM PLANNING RETREAT ON OCTOBER 8, 2010, AT 11:00 A.M. IN THE PISGAH B ROOM AT THE HILTON ASHEVILLE BILTMORE PARK, 42 TOWN SQUARE BOULEVARD, ASHEVILLE N.C.; AND (2) A CITY COUNCIL WORKSESSION ON OCTOBER 12, 2010, AT 3:00 P.M. IN THE FIRST FLOOR NORTH CONFERENCE ROOM IN CITY HALL REGARDING UNIFIED DEVELOPMENT ORDINANCE AMENDMENTS ACCORDING TO THE RECOMMENDATIONS OF THE DOWNTOWN MASTER PLAN

RESOLUTION BOOK NO. 33 – PAGE 218

D. RESOLUTION NO. 10-212 - RESOLUTION AUTHORIZING THE CITY TO APPLY FOR TWO GRANTS FROM THE ENVIRONMENTAL PROTECTION AGENCY FOR CITY-WIDE BROWNFIELDS ASSESSMENT FUNDING

Summary: The consideration of a resolution authorizing the City of Asheville to apply for two $200,000 Brownfields Assessments grants – hazardous materials and petroleum, for a total amount of $400,000 - from the Environmental Protection Agency (EPA), to obtain funding for approximately ten Phase I or II environmental assessments on sites having known or perceived environmental contamination.

In 2007, Council approved a contract with Land of Sky Regional Council of Governments (LOSRC) to prepare and submit two Brownfields Assessment Grants applications to the EPA. When both applications were successful, Council approved a contract with LOSRC to administer the funds over a three year period as a sub-program within LOSRC's Regional Brownfields Initiative. The two grants are now closing out and LOSRC would like to submit new applications, requesting the same total funding amounts and the same term lengths, effectively renewing the three year program.

LOSRC has recommended that the new applications reflect a City-wide program area with an emphasis on the Riverfront District. This approach will continue to highlight the Riverfront as a priority area for infill development while allowing pursuit and support of infill opportunities anywhere within the City's jurisdiction. Changes to the City's program would include: 1)a significant reduction in the amount of funding used for management of the program by LOSRC - from $180,000 to $130,000 over 3 years and 2) inclusion of $30,000 over 3 years) in the program budget for City staff to perform any or all of the following activities: a) marketing and outreach of adopted Brownfields sites b) assistance to the Asheville Area Riverfront Redevelopment Commission to encourage infill development and c) coordination of the Brownfields program with Challenge Planning Grant activities (part of the Livable Communities Initiative, delineated in the HUD/DOT application the City submitted for East of the RiverWay district) if Challenge Planning grant is successful.

The Asheville Riverfront Redevelopment Commission is scheduled to review this request and the current Brownfields Assessment program on October 14, 2010. The Planning and Economic Development Committee of City Council heard an informal update on this consideration at their meeting on September 21, 2010.

This request complies with the City of Asheville's 2010- 2011 Strategic Plan through the following: (1) Affordable: Identifying resources for strategic initiatives; and (2) Job Growth and Community Development: Support small business through the reductions in taxes, fees, and regulations; partner in regional economic development strategies; promote sustainable, high-density, infill growth that makes efficient use of existing resources; support the riverfront redevelopment partnership.

Pros:

- City promotes sustainable infill development
- City promotes safety of citizens through potential clean up of hazardous materials in the Riverfront District
- City maintains toolbox of incentives for sustainable development without having to redirect current or direct substantial new resources.

Con:

- External management of a City of Asheville initiative.

If the grant application is successful, the City would need to amend the budget to receive the grant funds; however since this initiative would be 100% funded with the EPA grant, there would be no impact to the City's General Fund budget.

Staff recommends Council authorize staff to apply for two $200,000 Brownfields Assessments grants – hazardous materials and petroleum, for a total amount of $400,000 - from

the Environmental Protection Agency (EPA), to obtain funding for approximately ten Phase I or II environmental assessments on sites having known or perceived environmental contamination.

RESOLUTION BOOK NO. 33 – PAGE 219

E. RESOLUTION NO. 10-213 - RESOLUTION AUTHORIZING A LEASE AGREEMENT WITH COMMUNITY ACTION OPPORTUNITIES FOR THE REID ANNEX LOCATED AT THE W.C. REID CENTER FOR OPERATION OF THE HEAD START PROGRAM

Summary: The consideration of a lease with Community Action Opportunities (CAO) for the Reid Annex located at the W.C. Reid Center for operation of the Head Start Program.

CAO, a locally based non-profit organization, works with citizens who live on limited incomes, and with elected public officials and private sector representatives to confront and solve the problems that cause poverty. One of its services, the Head Start Program, provides comprehensive health, education, family support and services for children.

CAO has leased the Reid Annex for 11 years in which to operate the Head Start Program. The lease began in 1999 at which time the Reid Annex was in a significant state of disrepair. As part of the original lease agreement, CAO made the investment to complete a major building renovation and to design the building to meet the needs and requirements of the Head Start Program. In return, the city agreed to a multi-year lease agreement at $1.00 per year.

CAO is currently replacing the roof on the Reid Annex at its own expense, further demonstrating its investment to assist the city in maintaining the facility.

CAO wishes to renew the lease agreement for a period of two years beginning October 23, 2010 at $1.00 per year. At this time the city is limiting the agreement to a two-year period since the long-term future of the Reid Center property is not known at this time. The city will continue to operate the Reid Center as a recreation center until spring 2011 at which time it will move to the new center at Livingston Street Park. It is expected the city will continue to utilize the Reid Center gymnasium for one to two years until the gym at the Livingston Street Park center can be built. During the next six to nine months, the city will conduct community dialogue as part of the process to determine the future of the Reid Center.

A public notice to announce the lease agreement was posted in the Asheville Citizen-Times on September 17, 2010.

At its meeting on September 13, 2010, the Recreation Advisory Board recommended to City Council to enter into a two-year lease agreement with Community Action Opportunities for the Reid Center Annex located at the W.C. Reid Center for operation of the Head Start Program.

The action complies with the City Council Strategic Operating Plan in that it leverages partnerships that deliver capital improvements and infrastructure maintenance for public facilities.

Pro:
- Leverage facility maintenance and improvements through partnerships.

Con:
- None

There is no fiscal impact on the city's annual operating budget. Although it does not increase the city's capital improvement budget, it does enhance the city's resources to maintain and improve public facilities.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into a two-year lease agreement with Community Action Opportunities for the Reid Center Annex located at the W.C. Reid Center for operation of the Head Start Program.

RESOLUTION BOOK NO. 33 – PAGE 220

F. RESOLUTION NO. 10-214 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH CINCINNATI SYSTEMS INC. FOR ANNUAL MAINTENANCE OF THE PARKING ACCESS AND REVENUE CONTROL SYSTEMS EQUIPMENT

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Cincinnati Systems, Inc. for annual maintenance of the parking access and revenue control systems equipment.

The City of Asheville uses Amano brand parking access and revenue control systems equipment for the three City-owned parking garages and the employee parking lots on Valley and Marjorie streets. This equipment includes entry and exit gates, card readers, ticket dispensers, fee computers, pay-in-lane-machines, in-pavement sensors and detectors, and the software to operate the system. The equipment ranges from two years old to over six years old and all of it is out of the original warranty. These machines cycle tens of thousands of times a year and need regularly scheduled preventive and restorative maintenance. Much of the hardware and software is proprietary to Amano systems and is beyond the expertise of City staff to repair.

Cincinnati Systems is the local distributor for Amano brand equipment in this area. They provide maintenance and service beyond the capability of Parking Services' staff. The annual maintenance contract is $57,770.00 but does not include costs from vandalism. Staff is requesting authorization to sign a contract with Cincinnati Systems, Inc. for an amount not to exceed $60,000.00; $57,770.00 for the contract and $2,230.00 for contingencies. These funds are currently budgeted and do not require further budget action.

This action complies with the City Council's Strategic Operating Plan in the area of fiscal responsibility and the goal to operate the City of Asheville to the highest levels of fiscal responsibility.

Pros:

- The company provides technical assistance and equipment.
- Maintenance contract will keep the equipment operating as efficiently as possible and minimize downtime.

Con:

- Total cost of the project is $60,000.00.

Funds were approved in the fiscal year 2010/2011 Operating Budget.

Staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Cincinnati Systems, Inc., in an amount not to exceed $60,000.00 for annual maintenance of parking access and revenue control systems equipment at City-owned garages and parking lots.

RESOLUTION BOOK NO. 33 – PAGE 221

G. RESOLUTION NO. 10-215 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A 4-YEAR LEASE AGREEMENT WITH JOHN DEERE LEASING FOR MOWING AND BALL FIELD MAINTENANCE EQUIPMENT

Summary: The consideration of a resolution authorizing the City Manager to enter into a four-year lease agreement with John Deere Leasing for mowing and ball field maintenance equipment.

The city owns mowers, utility vehicles and ball field groomers located in the Park Maintenance Division of the Parks, Recreation & Cultural Arts Department. The equipment is over 10 years old, deteriorated and has out-lived its useful life. The annual cost to maintain the outdated and low performing equipment is over $8,000. Cost comparison over a four-year period to replace the equipment and annual maintenance is estimated at $170,000 to replace the equipment, or $42,500 per year. This does not include future cost to replace the equipment.

The four-year lease with John Deere Leasing includes two commercial mowers, two utility vehicles, three ball field groomers, and maintenance and equipment replacement will cost $122,488.58, or $30,622.14 per year. Over the four-year period, the equipment lease will be a savings of $47,512 in comparison to the city purchasing the equipment.

This action complies with the City's Strategic Operating Plan in that it supports making smart investments that accomplishes lasting and tangible returns by investing in quality equipment and maintenance for the City of Asheville parks system. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides ongoing maintenance and care for the City's park system.

Pros:
- Investment to maintain and care for city-owned park facilities.
- Provide quality service for ongoing, core facility maintenance services.
- Fulfill commitment for maintenance of the park system.

Con:
- None

The four-year equipment lease, maintenance and equipment replacement cost will be $122,488.58 at $30,622.14 per year. To purchase and maintain the same equipment will cost approximately $170,000 at $42,000 per year, plus future cost to replace the equipment. The equipment lease represents a $47,512 reduced cost to the city's general fund. The $30,622.14 per year to support the lease agreement is budgeted in the FY 2010-2011 operating budget in the Parks, Recreation and Cultural Arts Department.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a four-year lease agreement with John Deere Leasing for park maintenance equipment not to exceed $122,488.58.

RESOLUTION BOOK NO. 33 – PAGE 222

H. RESOLUTION NO. 10-216 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPROVE PAYMENT OF EXCESS INSURANCE PREMIUMS FOR WORKERS COMPENSATION, LIABILITY AND PROPERTY INSURANCE PREMIUMS

Summary: The consideration of a resolution authorizing the City Manager to approve payment of excess insurance premiums for Workers Compensation, Liability and Property Insurance Premiums.

The City has operated a self-funded insurance program since 1993. The self-funded program has provided significant savings in the overall cost of risk for the City of Asheville. The Risk Management Division has the responsibility of providing the necessary insurance and reserves as prudent to meet losses resulting from claims, risks, and potential liabilities. In order to meet these objectives, it is necessary to protect City assets with the purchase of indemnification

policies. These policies protect the City from claims that exceed $450,000 for Workers Compensation and $500,000 for liability. Coverage is also purchased for property damage claims exceeding $25,000. These policies are not intended to act as primary insurance. Rather, the policies provide a stop loss for the City in cases when claims are presented which exceed the aforementioned amount.

This request ties into the goal of the strategic operating plan operate the City of Asheville at the highest levels of fiscal responsibility.

Pros:

- The program protects the City and the citizens of Asheville from losses exceeding $450,000 for workers compensation claims, $500,000 for liability claims, and $25,000 for direct damage to City property.
- The premium costs for the current year represent a $45,000 savings over last year's premiums.

Con:

- Without these policies, the City and the citizens of Asheville would be responsible for payment of any and all claims above the $450,000 retention for Workers Compensation and the $500,000 retention for liability claims as well as any and all property damage above $25,000 in any one occurrence.

The 2010 – 2011 premium cost for Workers Compensation is $146,686. The 2010 -2011 premium cost for the liability and property coverage is $828,210. These amounts are already included in the FY 2010-11 Insurance Fund budgets.

City staff recommends City Council adopt a resolution authorizing the City Manager to pay the proposed premiums.

RESOLUTION BOOK NO. 33 – PAGE 223

I. RESOLUTION NO. 10-217 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH BRYANT'S LAND & DEVELOPMENT INDUSTRIES INC. FOR THE OLD TOLL ROAD RETAINING WALL PROJECT

ORDINANCE NO. 3899 - BUDGET AMENDMENT FOR THE OLD TOLL ROAD RETAINING WALL PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to execute on behalf of the City of Asheville a contract and any change order within the budgeted amount with Bryant's Land & Development Industries, Inc. for the project known as Old Toll Road Retaining Wall; and (2) a budget amendment, in the amount of $360,000, from the Stormwater Fund reserves to fund the contract.

The Engineering Services Division of Public Works has opened bids to construct a new retaining wall on Old Toll Road near the intersection of Bent Tree Road. The wall and an attached drainage structure had failed, due to excessive stormwater water run off, and the age of the wall. The new wall and associated drainage infrastructure will incorporate modern design and construction methods that should solve the structural integrity of the wall, as well as the hydraulic concerns that were present before.

The initial low bid was rejected after the contractor rescinded their bid. They made a mistake in their interpretation of the plans and specifications, resulting in a bid that was substantially lower than the engineer's estimate, as well as all other bidders. The next lowest bidder was very comparable with the engineer's estimate, and was deemed a responsible bid.

This action complies with the City Council Strategic Operating Plan in fully leveraging funding from the State and other sources for regional transportation improvements.

Pros:

- Will repair an existing stormwater and roadway failure.
- Provides long term investment in the City's infrastructure.
- Improves vehicular safety.
- Enhances stormwater infrastructure.

Cons:

- The City will be responsible for future maintenance of the project.
- Project management and contract administration will consume staff time.
- This section of roadway will be required to be closed for the duration of the construction project.
- Requires an appropriation from Stormwater Fund reserves.

The project budget totals $360,000. These funds will be allocated from the Stormwater Fund reserves, and would cover the cost of construction and construction administration. Stormwater Fund reserves currently total approximately $1.2 million; this appropriation will leave $850,000 available in reserves for emergencies and/or future capital needs.

City staff recommends City Council adopt (1) the resolution awarding the contract to Bryant's Land & Development Industries, Inc. and authorizing the City Manager to execute on behalf of the City of Asheville the contract and any change order within the budgeted amount; and (2) the associated budget amendment in the amount of $360,000.

RESOLUTION BOOK NO. 33 – PAGE 224
ORDINANCE BOOK NO. 26 - PAGE 296

J. RESOLUTION NO. 10-218 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO PERFORM ASPECTS OF A PROJECT RECENTLY AWARDED FOR PEDESTRIAN CROSSINGS AT FOUR INTERSECTIONS UNDER THE JOB ACCESS AND REVERSE COMMUTE PROGRAM

ORDINANCE NO. 3900 - BUDGET AMENDMENT FROM THE FEDERAL TRANSIT ADMINISTRATION JOB ACCESS AND REVERSE COMMUTE GRANT TO INSTALL PEDESTRIAN SIGNALS AT FOUR INTERSECTIONS

Summary: The consideration of (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to perform aspects of a project recently awarded for pedestrian crossings at four intersections under the Job Access and Reverse Commute Program; and (2) a budget amendment, in the amount of $99,920, to set up the project budget for the grant awarded.

On August 27, 2010 the Federal Transit Administration (FTA) awarded the city a grant for Job Access and Reverse Commute (JARC) funding to install pedestrian signals at four busy intersections: 1) Haywood Road and Louisiana Avenue, 2) Clingman Avenue and Hilliard Avenue, 3) Choctaw Street and McDowell Road, and 4) Biltmore Avenue and Southside/South Charlotte Street. The sidewalk at the intersections and connecting to the transit stops will be brought up to American's with Disabilities Act (ADA) compliance as a part of the project. The traffic engineering and signal work will be carried out by the NCDOT and/or it's contractors under a reimbursable agreement with the city, and the remaining work will be completed by city forces. The grant is for $99,920, 80% of the estimated $124,900 project cost. The local match of $24,980 is city's in-kind contribution, mainly salaries.

Improving pathways to and from bus stops, including pedestrian street crossing facilities, was the number three priority identified in the MPO's Coordinated Public Transportation/Human Services Transportation Plan (2008). The specific intersections were selected based on transit accessibility, the character of the intersection, proximity to places that people with low to moderate incomes live or work, and willingness of NCDOT to install pedestrian signals at the location. Our FTA regional representative has cited the project as an innovative use of the grant program to solve the challenge of the first mile and last mile of travel for transit users.

This project supports the strategic operating plan's safe, affordable, fiscal responsibility, and green & sustainable focus areas by making the intersections safer for pedestrians, leveraging outside funds, and making transit use easier for travelers.

Pros:

- Improves safety and comfort of pedestrians crossing at four busy intersections
- Adds $99,920 in federal funding to the city's budget
- Helps further develop a cooperative relationship with NCDOT

Con:

- The city must provide $24,980 as the match for the project, approved in the grant as in-kind contribution, specifically salaries.

This will bring $124,900 in new capital investment to Asheville's pedestrian network. The required 20% matching funds will come from amounts already included in the City's adopted budget. The signals will be maintained by NCDOT, so there is no increase in ongoing city costs. This grant does not affect the city's regular FTA transit system funding.

City staff recommends City Council adopt (1) a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to perform aspects of a project recently awarded for pedestrian crossings at four intersections under the Job Access and Reverse Commute Program; and (2) a budget amendment, in the amount of $99,920, to set up the project budget for the grant awarded.

RESOLUTION BOOK NO. 33 – PAGE 225
ORDINANCE BOOK NO. 26 – PAGE 298

K. ORDINANCE NO. 3901 - BUDGET AMENDMENT FOR NORTHWOOD ROADWAY IMPROVEMENTS

Summary: The consideration of a budget amendment, in the amount of $225,000, for Northwood Street roadway improvements from the five percent Water Department Sullivan Act Funds.

In Fiscal Year (FY) 2009-10, the City received authorization from the State General Assembly to begin transferring up to 5% of Water Fund revenues to the general capital improvement program (CIP) to fund water-related infrastructure projects. The City transferred the full 5% in FY 2009-10, which provided $1,657,481 in funding. During this year's budget process, Council directed staff to transfer 1% of Water Fund in FY 2010-11. This 1% transfer will provide an additional $341,000, which will bring the total amount of Sullivan Act funds transferred over to the general CIP to $1,998,481. The table below summarizes the Sullivan Act funding and the projects that Council has approved to date.

Revenue:	
FY 2009-10 Water Fund Transfer	$1,657,481
FY 2010-11 Water Fund Transfer	$341,000

Total Revenue	$1,998,481
Approved Projects:	
Dogwood Grove	$87,440
Azalea Road	$1,710,000
Ridge Avenue	$110,000
Total Projects	$1,907,440
Balance	$91,041

The Water Department has started construction on a waterline replacement project on Northwood Street this year in which Sullivan Act funds can be used for infrastructure improvements. In the initial five-year CIP submitted to Council during the budget process, staff had anticipated using Sullivan Act funds for the Northwood project in a future budget year. Staff is now requesting to move the Northwood project forward into this fiscal year.

Based on the current schedule for the Azalea Road project, staff anticipates paying for the design of that project in the current fiscal year, but the construction is not anticipated to occur until FY 2011-12. As a result, the entire $1.7 million budget for Azalea Road improvements will not be spent in FY 2010-11. This request is to move $225,000 (the cost of the Northwood Street project) to this fiscal year and move funds for the Azalea Road project in the same amount to FY 2011-12, simply switching the funding years but not the funding amounts of the projects. This change will not impact the schedule or the funding for the Azalea Road project.

This action complies with the City Council Strategic Operating Plan in fully leveraging funding from the State and other sources for regional transportation improvements.

Pros:

- Will allow Public Works to make improvements to the Northwood Street after the waterline is replaced and prior to resurfacing the street.
- Provides long term investment in the City's infrastructure.

Con:

- Project will cause longer construction delays to residents.

This budget amendment is a request to move $225,000 from the Azalea Road project to set up the project budget for the Northwood Street project. Complete funding for the Azalea Road project will be restored in FY 2011-12. This amendment has no other fiscal impact.

City staff recommends City Council adopt the budget amendment for Northwood Street roadway improvements in the amount of $225,000 from the five percent Water Department Sullivan Act Funds.

ORDINANCE BOOK NO. 26 – PAGE 300

L. RESOLUTION NO. 10-220 – RESOLUTION SETTING A PUBLIC HEARING ON OCTOBER 26, 2010, TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT BETWEEN THE CITY OF ASHEVILLE AND FRONTIER SYNDICATE LLC FOR THE MONTFORD COMMONS DEVELOPMENT, PHASE I

Summary: The consideration of a resolution setting a public hearing on October 26, 2010, to consider an economic development incentive grant between the City of Asheville and Frontier Syndicate LLC for the Montford Commons Development, Phase I.

At it's meeting on August 24, 2010, City Council directed City staff to draft an economic incentive grant between the City of Asheville and Frontier Syndicate, LLC for the Montford Commons Development Project, Phase I.

Pursuant to N.C. Gen. Stat. sec. 158-7.1, a public hearing is part of the process for City Council consideration of these grants. It has also been a standard practice for Council. Moreover, Council's direction on August 24 included a request for participation by the County (to be made by Frontier), but the County has not yet acted on this. That information will be needed before the agreement can be drafted.

Staff recommends City Council adopt a resolution setting a public hearing on October 26, 2010, to consider an economic development incentive grant between the City of Asheville and Frontier Syndicate LLC for the Montford Commons Development, Phase I.

RESOLUTION BOOK NO. 33 – PAGE 228

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Manheimer moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Smith and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. NOISE ORDINANCE APPEALS BOARD UPDATE

Mr. James Fink, Chairman of the Noise Ordinance Appeals Board, briefly updated City Council on the activities and mission of the Board

On behalf of City Council, Mayor Bellamy thanked Mr. Fink and the entire Board for their hard work and efforts on this Board.

B. ASHEVILLE-BUNCOMBE-HENDERSON REGIONAL FEASIBILITY (TRANSIT) STUDY

Director of Transportation Ken Putnam said that this is the discussion of the Asheville-Buncombe-Henderson Regional Feasibility (Transit) Study contracted by the North Carolina Department of Transportation (NCDOT).

In November 2009, the N.C. Dept. of Transportation Public Transit Division (NCDOT-PTD) contracted with HDR Engineering of the Carolinas (HDR) and its partners to conduct the Regional Feasibility Study for public transportation in the City of Asheville, Buncombe County and Henderson County. This presentation highlights the findings and recommendations of that plan.

The purpose of this study was to conduct an organizational review of the transit systems in Buncombe and Henderson County to determine the feasibility of establishing a closer working relationship. The work of the study was guided by a steering committee comprised of representatives of the major stakeholders.

The report describes three alternative ways that services can be tied together and make specific recommendations for each one:

- Cooperation – working together in a loose association; focusing primarily on information sharing; separate identities and control remain in place.
- Coordination – group has formal arrangements to make decisions, take action, and manage resources; agencies remain separate organizations.
- Consolidation – one agency provides service through purchase of service agreements or other arrangements.

From the riders prospective these recommendations promote seamless transitions to and from work and services, through scheduling, routing and fare integration and more sophisticated technologies. From the City's prospective the recommendations will reflect in greater staff specialization and a more efficient use of existing resources and funding.

This report will be submitted to Council for approval at a later date.

The Transit Commission had a representative in the steering committee and has received monthly updates during the process.

This action supports the City Council's fiscal responsibility and green and sustainable focus areas. Specific tasks are to "fully leverage funding from the State and other funding sources for regional transportation improvements" and "operate the City of Asheville to the highest levels of fiscal responsibility".

Pros:

- It explores the options to provide a regional service establishing a closer working relationship.
- It does not commit the City of Asheville to any specific action.

Con:

- None

City staff recommends City Council receive the report and refer to the Transit Commission for review and comment.

Mr. Robert Bush from HDR Engineering reviewed the following Study background: (1) Part of NCDOT planning process; (2) Guided by steering committee; (3) Examined feasibility of closer ties among Asheville, Buncombe, and Henderson transit services; (4) Recommended phased approach; and (5) Requesting your approval tonight.

Advantages of regionalization: (1) Better service for passengers (a) 12,000 daily commuters across county line; (b) Daily commutes from Enka, Black Mountain, Weaverville; and (c) More reflective of actual travel; (2) Increased profile for transit (a) Greater awareness through larger system; and (b) Regional fares and service coordination; (3) Supports more technologies (a) Regional fareboxes, scheduling, dispatching; and (4) Permits staff specialization (a) Grant writing, marketing, safety & training, planning.

Short-term concepts: (1) Set the stage for later phases; (2) Within staff authority (mostly); (3) Timeframe: 1-2 years (a) Could be faster with strong local support.

Short-term recommendations: (1) Establish Regional Transit Council (staff & citizens); (2) Joint marketing; (3) Coordinate routes & schedules; (4) Adopt common fare structure (requires approval); and (5) Adopt common policies & procedures.

Mid-term concept: (1) Requires action by elected bodies; (2) Longer lead time facilities; and (3) Timeframe: 2-4 years.

Mid-term recommendations: (1) Operating environment (a) Merge demand-response scheduling systems; and (b) Harmonize operating contracts; (2) Capital & technology (a) Joint vehicle & service procurements; (b) Common fareboxes and (c) New transfer facilities; (3) Commuter services; and (4) Funding (a) Single grants administrator.

Long-term concept: (1) Regional services (a) In one or two counties; (2) New organization (a) Outside of either county or city; (3) Requires new funding (a) County $7 vehicle registration; (b) Bi-county $8 vehicle registration; and (c) ¼ cent sales tax (requires vote); and (4) Timeframe: 4+ years (a) At least 1 year past end of mid-term.

Long-term recommendations: (1) Organization (a) New transit authority under Article 25; (b) Interlocal agreement between Asheville & Buncombe; and (c) Henderson can join at outset or later; (2) Authority staffing (a) Hire new general manager at earliest possible time; (b) Proportional board representation; (c) Transfer existing staff to new organization; and (d) No union issues anticipated; (3) Construct new operating facility in Buncombe (a) Needed by 2016; and (b) Will require union determination; and (4) Create new identity (a) Rebranding of service.

Today's action include (1) Approval of Feasibility Plan; and (2) Agreement to implement recommendations (a) Subject to available funding; and (b) Phased implementation proceeds only when earlier phases are successfully implemented.

Councilman Davis was discouraged to see the comments from the other stakeholders regarding a possible joint venture. He felt that comments showed a reluctance to be a part of the Asheville system. He was still bothered that Weaverville didn't want to participate with the bus service to Weaverville. Asheville seems to carry the ball but no one wants to play. He hoped our Transit Commission could review the study carefully. He wanted Council to know that his support for accepting the report at this meeting should not be construed as his supporting the recommended funding mechanisms, which he does not.

Councilman Smith, liaison to the Transit Commission, said that he would relay Councilman Davis' concerns to the Transit Commission.

It was the consensus of Council to accept the Asheville-Buncombe-Henderson Regional Feasibility (Transit) Study and refer it to the Transit Commission for review and comment.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE PERMANENT CLOSING OF A PORTION OF DAVIDSON DRIVE

RESOLUTION NO. 10-219 - RESOLUTION TO PERMANENT CLOSE A PORTION OF DAVIDSON DRIVE

Mayor Bellamy opened the public hearing at 5:36 p.m.

Assistant Public Works Director David Foster said that this is the consideration of a resolution to permanently close a portion of Davidson Drive.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, the adjoining property owner, Buncombe County has requested the City of Asheville to permanently close a portion of Davidson Drive.

The Greenway Commission approved the proposed closure at their meeting of August 12, 2010.

The closing is subject to three utility easements as follows: (1) retention by the Metropolitan Sewage District of Buncombe County, its successors and assigns, of a 20 foot wide permanent easement, for the operation and maintenance of a public sewer line, lying 10 feet on each side of said sewer line located and existing within the portion of Davidson Drive proposed to be permanently closed; (2) retention by the City of Asheville Water Resources Department its successors and assigns, of a 20-foot wide permanent easement for the operation and maintenance of a water line lying 10 feet on each side of the center line of said water line located within the portion of Davidson Drive proposed to be permanently closed; and (3) retention by the Charter Communications its successors and assigns, of a 20-foot wide permanent easement for the operation and maintenance of a communication cable lying 10 feet on each side of the center line of said water line located within the portion of Davidson Drive proposed to be permanently closed.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties.

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution to permanently close a portion of Davidson Drive.

Mayor Bellamy closed the public hearing at 5:38 p.m.

City Attorney Oast said that City Council voted previously on a conditional zoning permit application for Buncombe County and Council's vote on that conditional zoning should not be regarded as binding Council on this vote.

When Mayor Bellamy asked for a motion to recuse her from voting on this item due to her lack of objectivity on this street closing, City Attorney Oast said that this is a legislative decision, not quasi-judicial, and not subject to the same requirements as to absolute objectivity. The key consideration is that Council understands that their previous vote on the conditional zoning does not bind them to a particular vote on this street closing.

In response to Councilman Bothwell, Mr. Keith Hargrove, architect for the project, explained that two levels of parking will be built, but the parking will only serve the court system.

In response to Councilwoman Manheimer, Mr. Foster said that City staff has talked with Buncombe County and the N.C. Dept. of Transportation about the possibility of an additional entrance at the end of Valley Street onto Charlotte Street. We also provided some rough estimation of what it would cost to make that connection. On a parallel track, Director of Transportation Ken Putnam is working with another group who wants to re-name and re-establish Valley Street as the major connector in that area and maybe include that connection,

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Russell moved for the adoption of Resolution No. 10-219. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33– PAGE 226

B. PUBLIC HEARING TO REPEAL ORDINANCE NO. 1240 DESIGNATING THE RICHMOND HILL HOUSE AS A LOCAL HISTORIC LANDMARK

ORDINANCE NO. 3902- ORDINANCE TO REPEAL ORDINANCE NO. 1240 DESIGNATING THE RICHMOND HILL HOUSE AS A LOCAL HISTORIC LANDMARK

Mayor Bellamy opened the public hearing at 5:42 p.m.

Development Review Specialist Cristin Moody said that this is the consideration of an ordinance to repeal Ordinance No. 1240 designating the Richmond Hill House as a local historic landmark. This public hearing was advertised on September 17 and 24, 2010.

Ms. Moody said that the Richmond Hill House was originally located at 45 Richmond Hill Drive in Asheville. The house was moved to 87 Richmond Hill Drive in 1984, where it stood until it was destroyed by fire on March 19, 2009. What was left of the historic structure after the fire was deemed unsalvageable by the Historic Resources Commission and approved for demolition. Only a portion of the building, a rear addition that was built in 2000, still remains in place and the site is extremely deteriorated.

Richmond Hill House was built in 1890 for Richmond Pearson and his family. It was a large, rambling, two-story frame mansion in the Queen Anne Style and had been saved from demolition by the Preservation Society of Asheville & Buncombe County in the early 1980s. As a prominent and historic mansion, it was added to the National Register of Historic Places in 1977, and designated as a local historic landmark on September 10, 1981.

Due to the unfortunate circumstances of this historic house having been severely damaged by fire and subsequently demolished, the historical significance and integrity has been permanently and irretrievably lost.

The ordinance is to repeal Ordinance No. 1240, passed on September 10, 1981, which designated this property as a local landmark.

As a consequence of this action, the property will no longer be subject to review and approval by the Historic Resources Commission for alterations and additions. Furthermore, this de-designation will result in the owner being ineligible for the 50% historic landmark tax deferral in the future. The amount of the deferral, as of 2008 was approximately $6,350, as applied to only the historic portion of the property. The City will not see an immediate increase in tax revenue from the property, however, since the value has significantly decreased due to the loss of the historic Inn.

Pros:

- The property will be brought into compliance with current circumstances and applicable laws regarding local historic landmarks.
- The owner will be free to modify the property without obtaining a Certificate of Appropriateness from the Historic Resources Commission.
- The property will cease to be eligible for the 50% local landmark tax deferral.

Con:

- This comes as the result of an unfortunate loss of a significant historic resource that was an irreplaceable symbol of our unique cultural heritage.

Based upon the foregoing, the Historic Resources Commission recommends that the Asheville City Council adopt an ordinance repealing the designation of Richmond Hill House as a local historic landmark. Staff concurs with the recommendation of the HRC for this designation.

Mayor Bellamy closed the public hearing at 5:43 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3902. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 302

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR CALEDONIA APARTMENTS LOCATED ON CALEDONIA ROAD FOR CONSTRUCTION OF 100 APARTMENT UNITS CONTAINED IN TWO BUILDINGS AND A REQUEST TO MODIFY OPEN SPACE STANDARDS

City Clerk Burleson administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

City Attorney Oast said that the Authorized Practice Committee of the North Carolina State Bar has issued an advisory opinion that appearing in a representative capacity for a party before a local governmental body in a quasi-judicial proceeding is the practice of law, especially with respect to such aspects of the hearing as examining or cross-examining witnesses, or advocating for legal conclusions or results. This does not prevent persons, including land use professionals, from presenting information or expressing opinions within their knowledge or area of expertise.

When City Attorney Oast asked if any Council members had any special knowledge of this matter other than familiarity with the site, Councilman Bothwell said that he made a site visit and met with a number of the neighbors who talked about the site. However, he felt that he could consider this issue with an open mind without pre-judgment and would make his decision based solely on what is before Council at this hearing.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 5:43 p.m.

Urban Planner Jessica Bernstein submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Bernstein said that this is the consideration of the issuance of a conditional use permit for the project identified as Caledonia Apartments located on Caledonia Road for construction of 100 apartment units contained in two buildings and a request to modify open space standards (Location Map and Aerial Map – City Exhibit 3).

She said that applicant is proposing to construct 100-residential units to be housed in two adjacent buildings for a residential density of approximately 15.5 units per acre. The buildings have a combined gross floor area of 160,444 square feet and contain a mix of units (8 studios; 44 1-bedroom; 44 2-bedroom and 4 3-bedroom units) (Site Plan –City Exhibit 3). The units will be Energy Star rated for environmental efficiency.

There is a considerable slope to the site, resulting in a building height of 19' 11½" from Caledonia Road (just over 49' to the top of the highest architectural element). Because the grade of the site slopes approximately 40 to 50 feet from the street edge to the back face of the buildings, the structures will appear to be two stories from Finalee Avenue and Caledonia Road while all four stories and the underground parking would be visible from the rear.

There are two vehicular access points proposed – one from Finalee Avenue and one on Caledonia Road. Parking is provided primarily beneath the structures and on exposed (interconnected) surface lots in the center and at either end of the project site. A total of 153 parking spaces are shown on plans (57 uncovered, 96 covered), including 6 accessible spaces and bike parking. There are two pedestrian access bridges shown on the plan, one to the front of each building from the roadway.

Landscaping is required on the site and includes street trees along Finalee and Caledonia, building impact landscaping, street buffer, parking lot landscaping and a Type 'B' property line buffer along the RS-8 zoned parcels adjacent to the west. The site is heavily vegetated and much of that existing vegetation will remain and will be applied to the required tree save area. The applicant is deliberately trying to keep the site as undisturbed as possible – with only 2.2 acres to be graded.

Sidewalks do not currently exist along Caledonia Road, which is identified by the City as a needed pedestrian linkage. The applicant is proposing to install sidewalk along the northern side of Caledonia, where the topography lends itself better to pedestrian accessibility, and will work with staff to determine the exact sidewalk placement location. Sidewalks are not required along Finalee Avenue, however there may be existing sidewalk buried underground along the project's frontage but the condition is unknown.

The applicant is proposing a modular construction type and anticipates completion of construction within one-year of starting, in a single-phase. Staging of materials will be on the applicants own parcel(s) along Swannanoa River Road. The developer has indicated that they plan to temporarily widen the hairpin curve at Caledonia and Pickwick to accommodate construction traffic.

Open Space standards require that 15% of the lot area be designated (0.97 acres), however the code also stipulates that only 50% of designated open space may exceed 25% grade. In this situation, the existing grade of the project area is over 25% (most of the project area is over 40% slope). The applicant is proposing to leave approximately almost four acres undisturbed; however that entire area exceeds the allowable slopes for open space designation. The applicant is requesting relief from due to existing conditions (Pedestrian View Renderings – City Exhibit 3) (Slope Map – City Exhibit 4)

This project was approved with conditions by the Technical Review Committee (TRC) on August 16, 2010. On September 1st, the Planning & Zoning Commission recommended approval of this project, including the relief to open space, by a unanimous vote (6-0). The Commissioners recognized the valid concerns of the neighbors but ultimately decided that the proposal meets multiple City goals, is an appropriate use for the site and appreciated the site design which leaves significant acreage undisturbed – preferring to recommend that City Council grant the open space relief rather than encourage the developer to greatly disturb the site by artificially creating "flat" open space areas.

There has been significant public comment received, at the TRC and P&Z meetings as well as outside of the public forum both with staff and at a neighborhood meeting. Primary concerns focus on:

- Traffic and traffic-related issues on Finalee and Caledonia, such as narrow pavement width (18' on Finalee and Caledonia), blind curves, steep streets, limited sidewalks and existing congestion;
- Difficulty when attempting to leave the Kenilworth neighborhood onto Biltmore Avenue or Swannanoa River Road due to traffic congestion;
- Concern that potential future development in the area on the remaining land could have a collective negative traffic impact and no Traffic Impact Study is technically required;
- The ability for large construction vehicles and modular unit delivery trucks to safely and efficiently access the site, especially given the sharp, narrow Caledonia roadway – as well as the ability for moving trucks to access the site once construction is complete;
- The steepness of the designated open space on the site (see *modification request* above)
- Potential for erosion on the steep slope during and after the construction process;
- How views of this vegetated bank from Biltmore Village will be altered;
- A request for increased articulation on the proposed roof design to appear more like the Kenilworth Inn with living space under the roof;
- Concern about impacts from potential use as high-turnover vacation rentals (would be allowed in Institutional zoning).

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case pursuant to Section 7-16-2(c). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project will meet State building code requirements and will be reviewed in detail by the Technical Review Committee to ensure compliance with health safety requirements.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The project site has a change in elevation of approximately 160 feet from Caledonia Road to the southern boundary (towards Swannanoa River Road) and has an existing grade over 30% with areas over 40%. To accommodate the steep site, the applicant has located the development footprint closest to Caledonia and Finalee Avenue, running along with the elevation change instead of against it. Additionally, the building footprint and area of disturbance is minimized by placing parking beneath the structures which lessens the physical and visual impact to the site. Only 2.2 acres of the 6.45 acre project site will be disturbed (leaving approximately 4 acres untouched) and landscaping around the building site along with the dedicated tree save area will help retain the natural, wooded areas of the location.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The proposed residential use is not expected to injure the value of adjoining or abutting property. The area is almost exclusively residential and there is an established multi-family use across Caledonia to the north (Kenilworth Inn Apartments). Neighborhood concern has been expressed regarding the negative impacts of traffic congestion on narrow roadways, which is seen as an existing issue that may be increased from this

development; however a Traffic Impact Study was not required and it is the determination of the Transportation Department that the existing infrastructure can support the additional traffic generated from this project..

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
This parcel is zoned Institutional and therefore a variety of non-residential uses would be permitted but the proposed use as multi-family residential aligns with the residential uses in the area. The neighborhood is comprised primarily of single-family detached structures but the presence of the Kenilworth Inn Apartments building across the street creates an established precedent for a larger-scale, higher density, multi-family structure. Additionally, the slope on the site is such that the structures will appear as two-stories from the street level, minimizing the scale and bulk. The design proposes a limited footprint to preserve and retain significant vegetation on the site, retaining the natural feel of this southern end of the Kenilworth neighborhood. The architect has drawn from the historic Kenilworth Inn for design elements and materials such as stucco, cedar shakes, stone and steep pitched rooflines. The proposal is in harmony with the scale, bulk, coverage, density and character of the area in which it is located.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The Asheville City Development Plan 2025 encourages higher-density infill development in areas where infrastructure can support the development and specifically in existing neighborhoods near downtown, such as this location in the Kenilworth neighborhood. The Plan also states that new development should promote a sustainable land development pattern and reduce impervious surfaces to reduce environmental impacts - this proposal minimizes land disturbance on the site by placing parking beneath the structures, retains vegetation and preserves the most steeply sloped areas. Transportation objectives in the Plan recognize the need to locate buildings close to transit and suggest a minimal density necessary to support transit – this site is proximate to two bus routes and proposes just under 16 units per acre, which is ideal for transit support. Additionally, the Plan stresses the benefit of neighborhood meetings – the applicant initiated meetings with the neighborhood prior to the City review process to keep open communication and address concerns.

This project aligns with City Council's goal of affordability by offering a mix of unit sizes and types, including smaller studio units, which will fit the housing needs of a variety of Asheville residents. In terms of green & sustainable, the project will meet Energy Star ratings, will be installing rainwater collection devices and has been sited in a way to minimize land disturbing activity as much as possible and retain acres of existing vegetation and natural features.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
This proposed development is located near major road facilities as well as proximate to several transit lines (Rtes. 4 & 8). In addition, the project has been reviewed by the Technical Review Committee who found that existing infrastructure appears adequate and preliminary review has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The UDO requires a traffic impact study for a proposed development that will generate at least 100 new vehicle trips in the peak hour as determined by the ITE Trip Generation Manual. The proposed Caledonia Apartments project will have 100 apartment units. The ITE Trip Generation Manual contains two possible categories that are applicable to this development – 'Mid-Rise Apartments' and 'Apartments'. The 'Mid-Rise Apartments' category is a closer fit based on the size of the development, but has a smaller data set. The 'Apartment' category has a larger data set, but includes a wider range of development sizes with an average number of 230 units. Neither of these categories project a volume that meets the City's threshold (Mid-Rise Apartment – 42 peak hour trips; Apartment – 75 peak hour trips).

If a development does not trigger a traffic impact study by city ordinance, then it is implied that the generated traffic will not cause an adverse effect to the existing level of service.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposal minimizes site disturbance with the parking situated beneath the building footprint and leaves almost 4 acres of the 6.45 acre parcel in its current natural, vegetated state.
- A mix of unit sizes is included from studios to 3-bedrooms, providing a variety of residential options at a range of price points.
- Because of the natural slope on the site, the building will appear much smaller scale from the street and pedestrian level.
- Sidewalk will be installed along one side of Caledonia Road, which is identified as a 'needed linkage.'

Cons:

- Although there is a considerable amount of undisturbed land left as open space, the existing grade of that area is over 40% which may inhibit usability and requires a modification from City Council.
- There are long-standing traffic-related concerns in the Kenilworth neighborhood and additional residential units will add to volumes.

Staff recommends approval of the project, finding that the proposal will be compatible with the neighborhood in a positive way and provides a variety of housing options in an infill location. Staff is supportive of the request for relief with meeting the open space requirement due to the topographical challenges inherent to the site.

Mr. Clay Mooney, landscape architect for the project, said the project consists of two separate buildings with 100 units and ranges in mix from studios to 3-bedroom units. The developer feels there is a distinct need for rental properties located within the I-40 to I-240 envelope that encompasses most of Asheville. The last project constructed in this envelope was the Woodbury Apartment project in 1995. We feel the project meets or exceeds many of the goals of the City Plan 2025. We acknowledge this is a steep site, but we have dealt with those issues in a creative and responsible way. Regarding the impervious area, with the institutional zoning designation 80% impervious area is allowed; however, they are only providing 20% impervious area. He used a site plan (City Exhibit 3) to illustrate the parking beneath the building. The disturbed area is only 34% (2.2 acres) of the entire site (6.54 acres). Using an aerial map (Developer Exhibit 1), he showed how the footprint of the Biltmore Gardens Apartments (6.29 acres with 73% disturbed area) compared to their proposed development (6.45 acres with 34% disturbed area). Regarding stormwater, their stormwater detention requirements are significantly reduced because of the amount of their impervious area. He explained the concept of their design for handing stormwater using an aerial map (Developer Exhibit 2), noting that they will meet all the requirements of the City regarding stormwater. Regarding the tree save area, they

are proposing 44% (2.83 acres) which greatly exceed the City's requirements of 30% (1.94 acres). They meet all the City's requirements, except for the City's open space requirement. The site is very steep and they can come within 3500 sq. ft. of meeting the open space requirements by clearing and disturbing an area, but the developer felt that in light of the slopes and also just clearing land to construct something a little less steep was contrary to the intent of the open space ordinance. Therefore, they respectfully request Council grant their modification to the open space requirements. Regarding traffic, the City's Traffic Engineer said the project did not meet the threshold to require a Traffic Impact Study. They are proud of this project and request Council approve the conditional use permit.

The following individuals spoke against the conditional use permit for the Caledonia Apartments, for various reasons, some being, but are not limited to: this project will be the 4th major Kenilworth development project to come before the City in the last 5 years and the three earlier approvals now stand in various stages of development purgatory; the prior development approvals collectively represents a 40% increase in housing units in the Kenilworth neighborhood; new development reviews should not only be judged on the merits of the proposal, but should take into account the latent population and traffic growth associated with the prior approvals; project approval will exasperate existing pedestrian safety and traffic issues; the applicant arranged one meeting with the neighborhood which was a presentation of the applicant's proposed plan; process flawed in that it appears to want public input but then disregards it; neighborhood wants their concerns reviewed; 4 acres of the 6.45 parcel is un-walkable as there are no trails, the terrain is too steep for most people, snakes will be forced to move and the site is full of poison ivy; when trees are cut they will leave unprotected soil that will be washed down to Biltmore Village; because the developer owns two extra parcels of land, he could use it for open space requirements but instead he plans to build another 100 units resulting in a possibility of at least 600 more people with 1200 cars in the future; constructing a 30' tall segmental block wall on a 40% slope is going to take a serious structural feat; the retaining wall required to be built to support the parking and building is not compatible with the natural or topographic features; the project does not fall under the steep slope ordinance (above 2220' in elevation and having an existing grade of 15% or more), but this project sits at 2116' and has an average slope of 40%; allowing this project to move forward will not preserve the scenic views and vistas of Asheville but would spoil the prominent vista from historic Biltmore Village; existing steep, substandard road with many blind curves; developer should have designed his project in a way that accommodated the open space requirements – include additional land in this project sufficient to satisfy statutory open space requirements; traffic safety concerns related to motorized vehicles, bicycles and pedestrians – roadway improvements along Caledonia Road; buildings are too large to reflect neighborhood character – should explore additional articulation of façade and roof to be more compatible with scale and character of neighborhood; proximity of staging site to construction site is a concern due to difficult travel path, traffic congestion and construction personnel parking; concerns regarding move in/move out and service vehicles on-site loading head clearances – increase head clearance in parking and drive under building to accommodate move in/move out vehicles on-site; existing traffic issues in Kenilworth include only one traffic light, steep roads, narrow roads, dangerous curves, non-existent or missing sidewalks, blind corner at Kenilwood and Finalee, and choke points; footprint of building spans more than 960 feet from one side to the other and with one inch of rain many tens of thousands of gallons of water will leave through only 3 outlets; there have been big landslides on slopes with less severe grade than this; since geotechnical studies had not been preformed at the time the project was reviewed by the Technical Review Committee, how did they know the site was suitable for such a project; what is the potential need for blasting or pile driving; most trees on the site are about 60 feet tall, not 104 feet tall; the building will appear as 4 stores (not 2 stories) from street level and will be more massive when coming up either of the two access roads; the proposed development will detract from the charm and intrigue that the Kenilworth Inn creates; concern of negative impact on nearby property values; to allow this development will destroy the aesthetic value; not all open green space should be built on; area mainly consists of single-family homes and this large development of modular, manufactured construction is not in harmony with the neighborhood; petition against development for following reasons (1) Not an affordable housing project; (2)

public traffic and pedestrian safety issues; (3) disproportionate amount of density on three streets in south Kenilworth (Kenilwood, Finalee, Caledonia); (4) runoff from impervious surfaces; (5) many stalled developments around Asheville; and (6) requires an exception to city's open space requirements; only one (No. 6) of the seven conditional use standards have been met; and perhaps institutional zoning is not the correct zoning designation for the area:

Ms. Teddy Jordan, President of the Kenilworth Residents Association
Mr. Peter Loewer, resident on Lakewood Drive (Neighborhood Exhibit 1)
Mr. Peter Stebbing, resident on Finalee Avenue (Neighborhood Exhibit 2)
Ms. Jennifer MacDonald, resident on Caledonia Road
Mr. Terry Meek, resident on Pickwick Road (Neighborhood Exhibit 3)
Mr. David Evers, resident on Finalee Avenue (Neighborhood Exhibit 4)
Ms. Miller Graves, resident on Caledonia Road (Neighborhood Exhibit 5)
Mr. Don Jeffries, Arden resident (Neighborhood Exhibit 6)
Mr. Cliff Yudell, resident on Forest Hill Drive
Ms. Valerie Hoh, resident on Finalee Avenue
Ms. Mary Evers, resident on Finale Avenue (Neighborhood Exhibit 7)
Ms. Angela Maddix, resident on Kenilworth Road (Neighborhood Exhibit 8)
Ms. Ann McLellan, resident of Duke Street (Neighborhood Exhibit 9)
Mr. Bill McClement, resident on Forest Hill Drive
Ms. Roberta Newman, resident on Chiles Avenue

For rebuttal, Mr. Mooney said that they are proposing a sidewalk on Caledonia but on the opposite side of the project. A geotechnical report has since been received. Borings were from 29' to 34' at which point they were terminated because construction would not necessitate excavation below that level. In the report, it states that we can expect excavations to be accomplished by heavy construction equipment, but that blasting would probably not be necessary. Some materials may be hard, but new mattock devices would probably be sufficient to remove that material. He stressed that if the project is approved, they must submit plans to the Technical Review Committee again for final plan approvals or they cannot receive any permits.

Mr. Frank Howington, developer, said that he had no plans to build anything else on the rest of the property. He wants to provide housing for the City of Asheville. Every apartment building in the envelope of I-240 – I-40 down to Biltmore Park is 100% leased. Even if they started the project tomorrow, it would not be on-line for 12-14 months. This project fits well in the institutional zoning. He said that they would do a tutorial revival construction that will complement the Kenilworth Apartments.

When Mayor Bellamy asked if Ms. Jordan, representing the Kenilworth Residents Association, would like to make any rebuttal comments, she declined.

Mayor Bellamy closed the public hearing at 7:17 p.m.

Vice-Mayor Newman moved to deny the Conditional Use Permit for the proposed master plan for the project identified as Caledonia Apartments as it is not compatible with the scale and character of the neighborhood and it is not in compliance with the open space requirements. This motion was seconded by Councilman Bothwell.

Councilman Russell said we must all realize that when we move into a neighborhood that abuts commercial industrial or institutional zoning that the character of the area is going to change over time. However, there are seven standards that must all be met for approval of a conditional use permit. He did not feel that Condition Nos. 1, 2 and 4 have not been met.

Councilman Bothwell felt the project did not meet four of the seven conditions required for approval.

Mr. Mooney said that they do believe this is a worthwhile project for this area, but in light of the comments, he requested that they be allowed to withdraw the project and work with City staff and the neighbors to come up with other options for the project. He also requested any suggestions Council may have to make this a more palatable project.

Mayor Bellamy explained that if the project is not withdrawn then the developer cannot bring back substantially the same project to Council for one year.

Upon inquiry of Vice-Mayor Newman, City Attorney Oast said that if the developer submitted a new application for a substantially different project, the time limitation would not apply and he could bring the substantially different project back to Council within the one year.

In response to Councilwoman Manheimer, Mr. Mooney said that his request is to withdraw the project. City Attorney Oast said that if the application has been withdrawn, there is nothing to vote on.

At 7:40 p.m. in order to give the City Attorney time to research the question of whether the application can be withdrawn after a motion is made and seconded but not voted on, Mayor Bellamy announced a short recess.

Mayor Bellamy explained that City Attorney Oast has advised Council that it is at Council's discretion as to whether they allow the developer to withdraw the motion before a vote or to proceed with the motion. She explained that normally before a motion is made Council comments on the project; however, a motion was immediately made and the developer did not have the opportunity to hear Council comments prior to their motion.

Vice-Mayor Newman felt either way it was pretty clear that a project would need to be substantially different in order to gain City Council support. His preference would be to follow through on the motion and invite the developer to bring forward a new proposal in the future that addresses concerns heard at this meeting. He said that Council does recognize the substantial shortage of mid-range and affordably-priced housing in the City of Asheville. Council will be considering a new policy to provide substantial new incentives (on a case-by-case basis) to encourage that type of infill development in the City.

City Attorney Oast said that if a new project is brought forward and is not identical or substantially similar to the one acted on, the ordinance imposes no delay.

Councilmen Bothwell and Smith agreed to proceed with the motion.

Councilwoman Manheimer felt we might want to examine our Comprehensive Plan regarding urban infill on certain slopes that have certain criteria like roads and other infrastructure issues and to also re-examine our slope development ordinance as it pertains to properties under the 2220' threshold. Regarding this project, she felt it would have to be substantially different being sensitive to the already imposed limitations on the neighborhood. She also felt we need to consider its impact on the overall beauty of that area of the City, e.g., Biltmore Village. Regarding comments about City staff, she felt the City was lucky to have talented, hard-driven staff and she felt they always have the best intentions. Technically speaking the project met all City requirements, except for the density. She felt that staff looked at this project and knew that Council wanted density and urban infill with a trade0off of land conservation, so it was with that good intention that City staff brought this forward to Council.

The motion made by Vice-Mayor Newman to deny the Conditional Use Permit for the proposed master plan for the project identified as Caledonia Apartments and seconded by Councilman Bothwell and carried unanimously.

V. UNFINISHED BUSINESS:

A. DISCUSSION OF ADOPTING A TRANSFORMATIONAL DEVELOPMENT PROJECTS INCENTIVE POLICY

Mr. Jeff Staudinger, Community Development Director, said that this is the consideration of a resolution adopting a Transformational Development Projects Incentive Policy.

At the August 24 meeting the City Council directed the staff to prepare a proposal for a new Council policy that would support development meeting thresholds that support major elements of the Council's Strategic Plan. These major elements include easy access (walkability and transit) to major employment centers and areas proposed for redevelopment, that offer jobs as well as affordable and workforce housing elements. The staff had already received direction from the Planning and Economic Development Committee for such a "Transformational Development" policy, and the additional request from the Council that would support "workforce" housing elements was added to that request.

The purpose of the policy would be (1) encourage infill development projects; (2) located in urbanized employment centers of the City; or (3) currently underutilized area in close proximity to major transit lines.

The Planning and Economic Development Committee discussed the proposed policy elements at their meeting last week. The document reflects their comments with one exception. The Committee recommends the following changes to the proposed policy:

1. To ensure flexibility in consideration of projects the policy intent was modified to state:

   "This policy is intended to provide incentives to encourage infill development projects that are located in urbanized employment centers of the City *or* that are currently underutilized but are in close proximity to major transit lines. ("or" added)

2. Item #3 in the required elements was modified to more clearly articulate the intended relationship between support for a project, financial need, and important public benefits (*changes in italics*):

   "Demonstrate that *but for* the requested support it would not be able to *provide the public benefits desired by the City."*

3. Item #4 in the required elements was modified to substitute language from the State law authorizing development financing, NCGS 158-7.2, for "redevelopment area. NCGS 158-7.2 (c) defines "development financing district as an area "comprised of property that is one or more of the following:

   (1) Blighted, deteriorated, deteriorating, undeveloped, or inappropriately developed from the standpoint of sound community development and growth.

   (2) Appropriate for rehabilitation or conservation activities.

   (3) Appropriate for the economic development of the community."

4. Item #6 in the preferred elements was moved from the required elements; as the Committee felt that it imposed too strict a standard for businesses. Also, the language regarding required pay levels was changed from a percentage requirement to a more general requirement:

   "Demonstrate that 70% of all permanent jobs created will, for the life of the incentive, pay ~~at or above 110% of~~ competitive salaries for similar jobs in Buncombe County.

This will be verified in an annual report to be submitted to the City Manager for the life of the incentive.

On one issue, the Committee was divided. Item #1 in the required elements states that a "*percentage of affordable and/or workforce level housing units*" must be included if housing is provided as a part of the project. Concern was expressed that this statement should perhaps state a specific percentage requirement as is stated in #4 of the preferred elements. Although that preference was not unanimously supported, the Committee requested that the alternate language be presented to the Council for your consideration. The modified #1 in the required elements would be:

"Demonstrate how it fulfills important public purposes that should include creating jobs, installing desired public infrastructure, using a substantial level of green building techniques, and if housing is included providing a minimum of 10% affordable housing or 25% workforce level housing units."

The strategic plan goals that are most closely aligned with this proposal are within the (1) Affordable Goal in that it expands opportunities for public/private partnerships and innovative financing mechanisms to incentivize affordable housing development; and (2) Job Growth and Community Development Goal in that is will support diversified job growth and small business development; and will promote sustainable, high-density, infill growth that makes efficient use of existing resources.

Pros:

- Adds a tool to achieve the Council goal for expanding opportunities for public/private partnerships and innovative financing mechanisms to incentivize affordable housing development
- Adds a tool to achieve the Council goal for supporting diversified job growth and small business development; and promotes sustainable, high-density, infill growth that makes efficient use of existing resources

Con: None noted

The proposed policy elements are intended to achieve these stated goals of the Council. No new incentives are offered, but the existing incentives for affordable housing and development that creates jobs are extended to allow consideration of projects offering substantial levels of workforce housing. There are three parts to the policy described below: elements that must be included before the Council would consider support for a project, elements that are preferred, and the types of assistance the Council can consider extending. A basic tenant of the policy is that meeting the thresholds for Council consideration is not a guarantee that such assistance would be offered – that would remain at the discretion of the Council. The elements provide a threshold for consideration only.

The threshold requirements (1) meet public purposes (a) create jobs; (b) desired public infrastructure; (c) using substantial level of green building techniques; and (d) provide a percentage of affordable and/or workforce housing; (2) directly address Council's annual strategic goals; (3) the proposal would have to show, but for the requested support it would not be able to provide the public benefits desired by the City; (4) be located in "redevelopment" areas; or in areas designated by Council as priority redevelopment areas (in or within ¼ mile of designated urbanized employment centers) or voluntary annexation areas; (5) floor area ratio exceeding 1.0; (6) located on an area of land larger than 1 acres; (7) greater than 3:1 private investment to public assistance; and (8) minimum 20% equity.

Preferred elements (that the developer would have to document that they meet the majority of these elements) include: (1) if it included housing, would have to have a minimum of

20% square feet of non-residential (job creation) uses; (2) pedestrian or open space amenities as noted in the master plan for the location; (3) meet an outside agency certification "green" or "sustainable" standard (such as LEED standard); (4) if housing in the project, the housing element of the project must include a minimum of 10% defined "affordable" housing or a minimum of 40% workforce housing units; (5) residential units must be the primary residence of the occupants; and (6) 70% of all permanent jobs created will, for the life of the incentive, pay competitive salaries for similar jobs in Buncombe County.

Eligible areas (1) urbanized employment centers annually designated by Council (2) areas current designed by City Council as priority redevelopment areas (a) under utilized areas of the downtown Central Business District; and (b) River Arts District; and (3) recommended initial designated urbanized employment centers.

Using a map, he said it indicates, according to the proposal, what the recommended areas for designation would be: downtown Central Business District; French Broad River corridor from the I-240 bridge to the I-240 on-ramp at Amboy Road; Swannanoa River corridor from the French Broad River to Biltmore Village; Mission Hospital Complex/A-B Tech Campus area; East Riverside area along Clingman Avenue and Depot Street; Biltmore Village; West Haywood corridor (in West Asheville) from its intersection with Beverly Drive in the east to its intersection with Patton Avenue to the west; Merrimon Avenue from I-240 to Beaver Lake; Broadway Avenue from I-240 to its intersection with Hillside Drive; Patton Avenue from the French Broad River in the east to the intersection with Haywood Road in the west; Biltmore Avenue from the edge of the downtown Central Business District to its intersection with I-40 south of Biltmore Village; Tunnel Road from the Beaucatcher Tunnel to the intersection with South Tunnel Road; and East Tunnel Road from I-240 to the intersection with the Blue Ridge Parkway.

He said if the policy is approved the following assistance will be available at the discretion of the Council: (1) affordable housing elements are eligible for use of the Asheville Housing Trust Fund; (2) 50% fee rebate for the following fees and charges: zoning permit fees, building permit fees, driveway permit fees, grading permit fees, plan review fees and water service connection fees; and (3) economic incentive grant agreement (a) an amount equivalent to City property taxes (in excess of currently assessed taxes); and (b) annually applied for the first 5 years of its operation after construction is complete.

If support is given, the City will not receive standard development permitting fees (that fund staff time required for reviews), but all required reviews will be needed. If support is given, the City will not receive additional taxes for the improved property for the length of the incentive authorized; although City services will need to be provided to the property.

City staff recommends approval of the new Council policy, with any amendment determined by the Council.

Mr. Staudinger responded to various questions/comments from Council, some being, but are not limited to: how can we confirm that "but for the requested support it would not be able to provide the public benefits desired by the City"; since there was discussion about using this policy on a purely residential development, does staff feel comfortable from a legal standpoint; does the policy adoption require a public hearing; do we have the internal experience to verify that developers have achieved their green and sustainable points since we are not requiring them to be formally certified; and if a developer does the majority of the preferred elements and chooses not to do any green building, can they still get the incentives.

Councilman Bothwell often expressed his skepticism about incentives for any developers because we tend to pick and choose winners. The only justification that he can find is to get a real social benefit, therefore, he suggested the housing element of the project must include a minimum of 30% defined "affordable" housing units and a minimum of 60% "workforce" housing units.

Vice-Mayor Newman would like to see the policy as simple, predictable and accountable as possible. He would be generally in favor of ratcheting up some of the standards we are asking people to hit, but in return for not making it so subjective for Council.

Councilman Smith suggested the following amendment to threshold No. 1: ""Demonstrate how it fulfills important public purposes that should include creating jobs, installing desired public infrastructure, using a substantial level of green building techniques, and if housing is included providing a minimum of 10% affordable housing or 25% workforce level housing units." From a financial standpoint, perhaps within the Central Business District (CBD) itself, that those affordable housing requirements would look more like 8%, whereas, those areas outside the CBD would have the hard 10% affordable and 25% workforce. Also in the preferred elements, he recommended that the affordable housing must exceed 10% and that the workforce housing must exceed 25%.

In response to Councilman Davis, Mr. Staudinger explained that that the section entitled "If the City Council extends support, the following assistance will be available at the discretion of Council" was added to just show that there are other incentives (existing programs) that can be available.

Mayor Bellamy felt it was confusing to include that in the policy because the first two points regarding the Housing Trust Fund and 50% fee rebates have already been discussed and voted on.

Mayor Bellamy felt it would be appropriate to talk to HUD representatives to make sure that the policy we put in place will not disqualify projects from consideration from our partners in the community that use HUD funding.

Councilman Russell felt that the transformational projects can happen in areas other than those eligible areas (e.g., Shiloh). Also, he felt that requiring the project be located on an area of land larger than 1 acre is too large.

In response to Councilman Russell, Director of Economic Development Sam Powers said that staff will look at how we could incorporate the areas of the Urban Progress Zones.

Mayor Bellamy explained why she did not support the title of the policy being "transformational" projects policy and incentives. She felt that since we want to encourage a multi-modal system, we should include all major corridors – all of Hendersonville Road, Merrimon Avenue, Tunnel Road and Patton Avenue. She expressed concern about No. 1 of the preferred elements, in that we are asking a proposed developer that comes in with a residential project that he must include a minimum of 20% square feet of mixed use, even though it does not meet Council's goals of green, affordable, etc. Also in the preferred elements, she asked (1) that a map of designated urbanized employment centers be a part of the policy; (2) the policy be made clear to show that as along as the LEED standards have been achieved in the building, no actual LEED certification is required (due to cost of actual certification); (3) how long the project needed to comply with the minimum of 10% affordable units and minimum of 40% workforce housing units; and (4) is it realistic that residential units must be the primary residence of the occupants.

Vice-Mayor Newman said that he had several comments which he would put them in writing and circulate them to Council and staff.

In the threshold requirements, Councilwoman Manheimer (1) supported the expanded "redevelopment" areas; and (2) supported the one acre threshold is too large in the CDB and suggested .25 in the CBD and one acre outside the CBD. Regarding the preferred elements, she (2) wondered how a developer would view the preferred element requiring a certain percentage of affordable housing, because she wants this policy to function as an incentive; and (2) supported

requiring the minimum of 10% affordable housing units and a minimum of 40% workforce housing units outside the CBD, but inside the CBD require some percentage because of the cost of land within the CDB is cost prohibitive.

Vice-Mayor Newman felt that if a project has some residential in it then some of it should be affordable or workforce and there should be a greenbuilding requirement. In fact, he felt that a greenbuilding requirement should be for any project in the City, especially if you are asking public support of the project. He would be open for the Healthy Built Homes standards.

Councilman Smith said that he supported (1) the Healthy Built Home standard certification or the elements therein; (2) the expanded "redevelopment" areas; and (3) the one acre threshold in the CDB be reduced to.25 in the CBD and ½ acre outside the CBD. He wanted to make it clear that if a developer accesses the Affordable Housing Trust Fund monies they understand that the affordability requirements would go beyond the five years because of the Trust Fund requirements.

City Manager Jackson suggested Council either call him or send him with any additional comments they would like reviewed for incorporation in to the policy.

It was the consensus of Council that this item be continued to allow City staff the opportunity to review Council's comments for perhaps a revised policy.

Upon inquiry of Councilman Davis, City Manager Jackson agreed to send this policy to the non-profit and for-profit development community for their input. He would send it to the affordable housing community, green building community, Council of Independent Business Owners, Chamber of Commerce, etc. He said that the policy is crafted in such a way that it does not impact the project on the table (Montford Commons).

VI. NEW BUSINESS:

A. MOTION TO ALLOW DEVELOPMENT PERMIT EXTENSION FOR ANOTHER YEAR TO DECEMBER 31, 2011

City Attorney Oast said that this is the consideration of Permit Extension Act "opt-out" provision.

In 2009, the N.C. General Assembly adopted the "Permit Extension Act of 2009." The effect of this law was to suspend the running of expiration periods for certain government-issued development permits. Most of the listed permits were State-issued, such as environmental permits, but the Act also covered some permits typically issued by local governments, such as conditional use permits, plat approvals, site plan approvals, and certificates of appropriateness. This law was a reaction to the economic situation and its impact on the building and financing industry.

The suspension period, which is applicable to all permits encompassed by this law, is retroactive to January 1, 2008, and runs through December 31, 2010 - - three years.

In 2010, the General Assembly amended the Permit Extension Act to extend the period of suspension for an additional year, to December 31, 2011. That new law, however, provided that local governments may by resolution "opt-out" of the additional one-year extension.

Provided that a local government does not opt-out of the additional one-year extension, the Act establishes some additional requirements that are intended to protect the City from the consequences of abandoned projects, such as maintaining performance guarantees and completing infrastructure. The previous law was silent as to these additional protections and there has been some disagreement between local governments and developers on these issues.

The new law makes it clear that certain development regulations continue to apply, and that permits may be revoked for non-compliance.

This extension is an "opt-out" extension; if Council wishes for the City's development permits to be extended for one year, no action is required. This extension, or the "opt-out," would apply to all permits; the City may not "opt-out" as to some but not all.

This is consistent with the Strategic Operating Plan goals of streamlining the development process. It is also consistent of several actions taken by Council in the last several years to provide some relief to developers, and the establishment of the development permitting center.

Pros:

- Extends development permits without having to consider individual projects.
- Provides some relief to finance and development industry in difficult times.
- Provides extra protection regarding abandoned/stalled projects.

Cons:

- Slight revenue loss from permit renewals.
- Staff will need to monitor dormant sites.

Slight revenue loss is anticipated but the size of the loss is difficult to estimate since we don't know which projects might reapply if their permits were to expire.

Do not opt-out; allow the additional extension to apply to the City of Asheville (and extraterritorial jurisdiction). No action or resolution is needed.

City Attorney Oast noted that the Planning & Economic Development Committee asked that staff provide a list of permits that the permit extensions would apply to; however, due to the amount of projects, the list is still being developed.

Mayor Bellamy noted that the developers have already spent money and time on these projects in addition to being approved though a public hearing process.

City Attorney Oast reiterated that the extension would apply to all permits and the City cannot not "opt-out" individual projects.

When Mayor Bellamy asked for public comments, none were received.

Councilmen Bothwell and Smith felt it would be appropriate to see the list of projects that the permit extensions would apply since a decision does not need to be made until December 31, 2010.

Councilman Davis moved to allow the development permit extension for another year, to December 31, 2011. This motion was seconded by Councilman Russell and carried on a 5-2 vote, with Councilman Bothwell and Smith voting "no."

City Attorney Oast said that he will provide the list of projects to Council and after reviewing the list if City Council would like to opt-out of the additional one-year extension, they could adopt a resolution prior to December 31, 2010.

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy recognized Councilman Davis for his efforts in bringing the Speedway Memorial to fruition on September 23, 2010, at Carrier Park. Councilman Davis thanked various members of the community for their donations and support, along with City staff, for their hard work on an important part of the racing community that needed to be recognized.

Councilman Bothwell thanked Councilman Davis and Economic Development Director/Interim Civic Center Director for their efforts in bringing events to the Civic Center, e.g., Elton John Concert and the Moogfest.

The following claims were received by the City of Asheville during the period of September 1-16, 2010: Phil Clark (Streets), Carol O'Neal (Streets), Lisa Lail (Streets), Ravencroft (Water), Mariya Fesiuk (Parks & Recreation), Anna Marie Smith (Police) and Edie Dooley (Sanitation). These claims have been referred to Asheville Claims Corporation for investigation.

The City was served with the following Complain on September 23, 2010, which is generally described as follows: Erie Insurance Group, as Subrogee of David Hirschman and Wendy Peterson v. City of Asheville. The nature of the proceeding is an insurance subrogation claim alleges damage to structure due to ruptured waterline. This matter will be handled by outside counsel.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:47 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Friday – October 8, 2010 - 11:00 a.m.
Asheville Hilton Biltmore Park
Pisgah B Room

City Council Capital Improvement Plan Worksession

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Mayor Bellamy convened the meeting and welcomed City Council, staff and the audience to the Capital Improvement Program (CIP) Worksession. She explained that Council will be provided a foundation of capital planning information to prepare for the upcoming budget process. At Council's retreat in January and then throughout the budget planning process, City Council will delve deeper into the capital needs as well as the operational needs.

Assistant City Manager Jeff Richardson explained that capital planning is contingent on financial forecasts and the overall budget process. Staff is working on a sustainability revolve fund for city facilities; these investments are not included in the CIP snap-shots. He said that this discussion focuses on the general capital budget and does not include in-depth information on enterprise capital budgets (water, civic center, transit, etc.).

Mr. Richardson explained that a CIP is (1) a statement of the City's policy regarding long-range development; (2) presents a long-term funding strategy and associated schedule to meet highest priority capital projects: (3) typically spans five years; and (4) captures any projects that involve needed repairs or improvements to our existing infrastructure (streets, parks, city facilities, etc.) and the acquisition or construction of new infrastructure (fire stations, traffic signals, sidewalks, etc.) with an estimated cost of $50,000 or more. He then explained how capital programs are funded and how local governments issue debt. Financing modes consist of General Obligation Bonds, Certificates of Participation, Limited Obligation Bonds, Special Obligation Bonds, Revenue Bonds, Special Assessment Revenue Bonds and Tax Increment Financing Bonds.

Budget Manager Tony McDowell identified best practices financial policies and annual CIP processes. He then reviewed Asheville's history and benchmarks, along with referenda history, referenda comparison, and other debt issuances. Using charts, he explained the debt capacity comparison.

Mr. Richardson then said that Asheville's growth rate was the slowest among the 15 largest cities in North Carolina over the last ten years. Among all cities in North Carolina with populations above 50,000, Asheville has the highest daytime to nighttime ratio (a) more than 40,000 people commute into Asheville for employment; and (b) 61% of people who work in Asheville live outside the city limits. This daytime population to nighttime ratio does not take into account tourism, recreation and other services like healthcare (approximately 1.5 million room nights in Buncombe County during 2009). The City's share of sales tax has declined from 23.5% in 1990 to 19.60% in 2010. Asheville takes more calls for emergency services per capita than 17 cities involved in the UNC School of Government benchmarking project (178 calls per 1,000 people). Charlotte receives 126 calls per 1,000 people. Asheville would need to add 51,000 more residents to bring call volume more in line with the State per capita average. The operational budget has grown to keep up with the demands of growing population outside our jurisdiction lines. While public safety staffing has grown by 17% over the last 10 years, our staffing to call volume ration remains at or below the State average.

Capital milestones include (1) automated garbage collection program; (2) $40+ Million in water system improvements through revenue bond; (3) Asheville has taken advantage of significant grant opportunities; (4) two new fire stations; (5) Livingston Street Center; and (6) Sullivan Act capital allocation.

Mr. McDowell then provided Council with three hypothetical CIP snap-shots along with associated outcomes and metrics for a five-year CIP, an additional $1 Million and an additional $4 Million.

City Manager Jackson provided Council with the CIP scenario comparison chart.

When Mr. Richardson suggested we create a staff facilitated budget worksession for citizens and then provide that information to Council to assist them in setting their strategic goals, Mayor Bellamy felt that we have already received citizen input via the master plans.

Staff responded to various City Council questions regarding the three hypothetical CIP snap-shots.

In summary, the following action steps will be provided to Council: obtain information from HUB about their project and inform Council about the possibility of enhancing matrix and reporting of master plan progress (for Council's January retreat); analysis of measuring impact of Asheville being a regional center as a result of the big disparity of daytime and nighttime population; analysis of the costs associated with the increased public safety on I-240/I-40/I-26; how would a Business Improvement District impact the City's CIP; analysis of annual debt service payments under all three hypothetical scenarios; how do the Transit Master Plan goals reflect in the CIP scenarios; update on status of existing capital projects, in particular 51 Biltmore Avenue and Haywood Street projects/properties, for possible re-programming of revenue; schedule review of Livingston Street Development Plan, phasing, partnership and funding options; and develop a specific 5-year CIP plan and also a 5-20 year general schedule of public improvements.

After each Council member offered their opinions on the CIP, it was the majority consensus of Council that Council favored something more a little more than scenario 2 (additional $1 Million).

Mayor Bellamy adjourned the meeting at 1:43 p.m.

Magdalen Burleson
City Clerk

Mayor

Tuesday – October 12, 2010 – 3:00 p.m.
Worksession
1st Floor North Conference Room

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Unified Development Ordinance amendments according to the recommendations of the Downtown Master Plan.

Urban Planner Alan Glines said that this is the consideration of an amendment to Chapter 7 of the Code of Ordinances to amend the Central Business District (Section 7-8-18).

Two years ago City Council approved a contract for planning services to develop a master plan for downtown to capture the community's goals for growth, redevelopment and continued vitality. The master plan consultants held numerous public meetings and forums to gather community input for downtown's future and the master plan was approved by City Council in May 2009. The Council directed the staff to work with stakeholder groups to prepare the changes to the UDO necessary to implement the plan recommendations, and other implementation strategies.

With that direction from Council, staff and stakeholder task groups have been studying the master plan and developing strategies for implementation. The Urban Design Action Committee began meeting in the fall of 2009 to evaluate the impacts of the master plan on parcels in downtown and to determine the best way to implement the recommendations in the plan. After over 20 meetings they concluded their work, and their final proposals for the Central Business District were presented to the Downtown Commission. At their June 2010 meeting, the Commission voted to approve the changes as recommended by the Committee. The Planning and Zoning Commission, after a series of meetings to review the proposals, voted on September 1, 2010, to approve the wording amendment. Other stakeholder groups continue to work on implementation elements that do not require UDO changes.

The proposed UDO text amendment replaces the current development standards for the Central Business District (CBD) with new text and maps that reflect the goals of the Asheville Downtown Master Plan. Changes to the UDO are directly related to *Strategy 4: Shape building form to promote quality of place* and *Strategy 5: Update downtown design guidelines* from the master plan.

The master plan introduces regulations that are form-based rather than use-based. They focus on the basic building design elements to strengthen compatibility, ensure pedestrian orientation, and enhance the character of the skyline. The existing ordinance provides minimal direction to ensure that new building construction is compatible with neighboring properties and with downtown in general. The plan introduces concepts for the CBD that include new definitions for how height is measured, building height maximums based on location in downtown, a context transition edge adjacent to residentially zoned properties, shadow protections for certain parks, a street wall requirement, and building step-backs. The plan also provides new development requirements for the portions of new structures that exceed 75 feet in height including a maximum floor plate, and a limit on the longest dimension of the tower portion of a building. All structures will be required to include a building cap, a primary entrance along a frontage line, and requirements for windows and other openings at the ground level and upper stories.

The charge of the Council to the Urban Design Action Committee was to study how each master plan concept would work and realistically function in downtown, and to avoid any "unintended consequences" from implementation. With that charge, some changes are proposed that slightly modify the master plan recommendation while maintaining the goals of the plan. The changes recommended for the master plan are summarized below:

Front Setback – The master plan suggested averaging front setbacks based on street context. The Committee instead recommends retaining current requirements in the CBD for zero-foot setback from the right-of-way-line with limited exceptions to emphasize urban form in new construction and not allow master plan suggested setback averaging because many areas in downtown currently have a suburban form.

Measurement of Building Height – The Committee found that there are practical difficulties with the master plan recommendation to re-measure/re-assess the height of a building based on the grade change across the site and instead recommended establishing a single height reference point at the primary pedestrian entrance.

Height Zone Locations – The Committee suggested adjustments to the height zone maps to reduce the locations of the tallest height zones based on compatibility with the traditional downtown core. Specifically, this reduction is in three locations – surrounding the Grove Arcade and areas below Hilliard Avenue along Church Street and Biltmore Avenue.

Applicability – The Committee recommends applying the master plan requirements and standards only to areas zoned Central Business District and not to other zoning districts surrounding downtown, as is shown on several maps within the plan. This will simplify implementation and aligns with community expectations to focus on downtown regulations.

Context Transition Edge – The Committee recommends that the Context Transition Edge be adjusted to apply only to the CBD areas most sensitive to changes in height (immediately adjacent to residentially-zoned properties) and limiting the application of the height buffer to 100 feet wide (instead of 300-400 feet wide as proposed in the plan).

Shadow Restrictions – Due to continuing concern about the impact of shadow requirements on building near very small parks, the staff proposed adjusting the building shadow limitations for parks and open spaces to only apply to larger park areas and exclude small pocket parks, private parks and plaza spaces, with definitions created for these uses. Additionally, the Committee recommended removing the shadow limitations on historic structures because other protections could be developed for them involving input from preservation professionals.

Street Wall – Because of its complexity, the committee recommends maintaining the street wall concept but reworking it to simplify understanding and provide some additional options that more completely reflect the historic fabric of downtown.

Air Rights – The Committee, reflecting a staff recommendation, recommend removing the air rights option for side step-backs for upper stories of buildings because of legal concerns.

Building Cap – The Committee included clarification of the building cap requirements to measurable standards. Originally the master plan provided a number of subjective design recommendations that will be more appropriate in the Downtown Design Guidelines rather than placed in this ordinance.

Key Pedestrian Streets – The Committee suggested some modifications of the Key Pedestrian Streets map and requiring the primary pedestrian entrance to be placed on these streets if the option is available.

Tower Floorplate – The plan recommended limiting the allowable floorplate dimension for towers over 75'. The Committee agreed with this recommendation but suggested increasing the allowable square footage to 8,000 square feet or 40% of lot area as a more practical number.

The new amendment will include a type of form code that is similar in look to the other ordinances in the UDO but which introduces building envelope concepts and appropriate illustrations to convey the new standards. Maps will also be a part of the ordinance to easily identify boundaries for specific requirements in the ordinance.

Mr. Glines then went into a little more detail regarding a few new concepts and then reviewed some maps that moderated the height of a structure. He points he reviewed are as follows:

(1) Key Pedestrian Streets – the existing concept in the UDO for downtown has been expanded;
(2) Height is defined differently in the CBD measure from the primary pedestrian entrance to the highest occupied floor, the remaining occupied area, attic, rooftop features will be required to occupy no more than 50 additional feet;
(3) Primary pedestrian entrance will be accessed from a key pedestrian street if one is along the site;
(4) Traditional Downtown Core – defined by a map and corresponding to the historic core of downtown;
(5) Context transition edge – moderates the heights of buildings when they are adjacent to and impacting residential zones;
(6) Height zone map recommended for downtown – some adjustments were made upon recommendation of the Downtown Commission to remove the taller height zones east of O.Henry and east of Church Street and a small area along Biltmore Avenue;
(7) Some limitations on public parks and plaza spaces, providing new definitions for these but excluding pocket parks and private park type spaces.
(8) The street wall is a new concept that was developed to preserve the experience along the street for pedestrian, coinciding with the traditional building principle of taller structures for providing a base, middle and cap. The street wall is the base portion of the building. A step back along the front or side is expected and in a few circumstances other alternatives could be provided. For example, in the traditional downtown core, the street wall will be between 2 and 4 stories. In the areas outside the core, it will follow a 1:1 relationship with the width of the right-of-way. This concept was given a lot of consideration by the Urban Design Action Committee to make it effective, but also to simplify it. Associated with the street wall is a step back from front or side by 10 feet or in certain circumstances a clear change of materials could also be sufficient to illustrate the point of the street wall. He used maps to illustrate the street wall concept.
(9) 75-foot height delineation. Specific requirements for projects that are high-rise structures in the NC State Building Code. Using drawings, he described how above 75-feet several things will happen.
(10) Tower size is limited to 40% of the lot area or 8,000 square feet which is smaller.
(11) No dimension in the tower portion of a building can be longer than 145-feet and this is in relation to the longest side of the Flat Iron Building.
(12) External Vista Points – He showed images of proposed building project areas from each location surrounding downtown as a tool to evaluate the structure in the skyline.

3. Public view corridors – If a project lies within a public view corridor a photo image from the vantage point will be required and if possible the building oriented to least disrupt the long view shed.

He said that a few additional items that all projects must provide include: a building cap regardless of scale of building, some termination of the building is required, and a roof feature or cornice line is required. He said that the primary pedestrian entrance along a frontage line is to be placed along a key pedestrian street if one is available to the site. Regarding fenestration required, more along the street and a limited amount along upper facades. This has been reviewed with a few additional scenarios.

West Asheville UDO Changes to CBD Zone

A related amendment has been finalized that proposes wording changes that will apply to the west Asheville CBD areas. There are two CBD sections along Haywood Road that cover about 60 parcels totaling approximately 18 acres. The proposed changes recommend a substantial height reduction for west Asheville, as there appears to be a general belief that very tall buildings are not appropriate along Haywood Road, and should be limited to the downtown CBD. Landscape buffer options are also proposed for the west Asheville CBD areas based on the scale of a specific development adjacent to residential areas. If these buffer options are adopted, these could provide a useful alternative for other areas in the city where commercial zones are directly adjacent to residential zones. These changes were worked out with the west Asheville property owners and interested residents at a series of meetings. Since they have met with property owners and some property owners along the corridor, they would like to propose that the height be capped at 75 feet to the highest floor level with 30 additional feet for the final living space and roof top features. In the current code for the CBD, there is no buffer required between a project site and neighboring residential zones. Along Haywood Road there are residential neighbors surrounding the CBD (and really all along Haywood Road) and some limited buffer would be helpful to reduce the impacts of the CBD areas. We would like to propose several options that would be available to a developer according to the scale of the proposed project. Based on the master plan proposal to buffer the height but allow a 2-story structure, a limited planting strip would be provided along that property edge. For a medium scale project, perhaps at 4 stories, a 15-foot planted buffer would be provided; and finally if a full size buffer was provided according to the table in Article 11, then there would be no requirement to buffer the height of the project. So, 75-feet could be developed. This proposal was reviewed with the group who thought this could be a reasonable compromise. Also the same information was presented to the Coalition of Asheville Neighborhoods and they felt this was workable and the idea of buffers size based on the scale of the commercial development could work along other corridors. We also expect to start a corridor study for Haywood Road and bring back that to City Council late next year.

There are also three other isolated Central Business District-zoned parcels in Biltmore Park in south Asheville. In the past the area for rezoning when development plans have been proposed, Urban Village has been the most frequently used zoning district. They would also be affected by the height limit of 75 feet like in the west Asheville districts. There are no development plans for these parcels and future development will likely require rezoning as a part of a new development plan, so there is no plan for modifying them, although they will be affected by the changes to the CBD district.

The Urban Design Action Committee identified a number of items that they felt should receive additional attention but which were beyond the specific scope of their work, and not essential for the implementation of the majority of the master plan recommendations. They asked that this list be presented as unfinished items that may be studied by the Downtown Commission or other appropriate groups:

1. View Corridors to be reviewed again for specific locations

2. External Vista Points ("Vista Trail") development providing vistas into downtown
3. Expansion of the CBD along Ashland and Biltmore Avenues
4. Incentives or trade-offs for new parks, green features, etc.
5. Shadow Impacts on sunlight-dependant historic resources or sunlight-dependant "green" features
6. Transfer of Development Right possibilities
7. Protection for historic structures

The Planning and Zoning Commission considered the following clarifications based on public comments received during the review and recommended their inclusion into the proposal:

1. The ordinance will apply to all new construction and/or changes that modify the exterior walls and/or roof of an existing building. There was additional clarification that the ordinance will not apply to routine maintenance, repair or replacement of the same or similar materials on existing buildings.
2. Requests for variances will rest with the official or agency responsible for project approval and with all variance requests, the Downtown Commission will provide a recommendation as a part of the process.
3. The descriptions of several sections were edited to clarify the meaning and requirements.

The wording amendment being considered is in direct support of the Asheville Downtown Master Plan adopted by City Council on May 26, 2010 (Resolution 09-102) The wording amendment represents the implementation of Strategies 4 and 5 focusing on the character and scale of the built environment. Some minor changes have been proposed by the reviewing committee but the goals and intentions of the master plan are preserved. The adoption of the wording amendment is also in alignment with the goals of the Strategic Plan 2010-11 which emphasize fiscal responsibility by implementing an approved master plan. The plan has represented a strong partnership with supporters and stakeholders of downtown who were heavily involved in developing the strategies in the master plan and continue to meet to implement the plan.

Pros:

1. Implements a community developed master plan.
2. Provides a recommended form-code framework for designing new structures.
3. Assures adequate air and light at the sidewalk level and promotes compatibility with the existing historic context.
4. Encourages views between tall buildings and enhances the skyline vistas of downtown.
5. Improves the compatibility for the two areas of Central Business District zoned property located along Haywood Road in west Asheville with the single-family neighborhoods that adjoin that property.

Cons:

1. The code is more complex and may be difficult to explain and understand for the layman.
2. Developable area per lot is reduced above the height of 75 feet (may be considered a pro).
3. As with any change to the UDO regulations, the impact of the new ordinance may not be fully understood until new developments are proposed.

The Planning and Zoning Commission voted 6-0 to recommend approval of the wording amendment at their meeting on 9-1-10. The wording amendment was reviewed with the Commission over four meetings to carefully consider the details of the ordinance. The Commission recommended some clarifications to the ordinance which have already been reviewed in this staff report and are part of the proposed ordinance being considered by City Council.

The Urban Design Action Committee endorsed the wording amendment and sent it forward to the Downtown Commission for consideration. The Downtown Commission after adjustments to the height map voted to approve the amendment on June 10, 2010 and recommend it moving forward to the Planning and Zoning Commission.

This proposal has also been shared with interested stakeholders along Haywood Road and with Biltmore Farms and new concepts for landscape property-line buffers were reviewed with the Coalition of Asheville Neighborhoods (CAN).

The Planning and Development Department staff recommends approval of this wording amendment.

Throughout Mr. Glines' presentation, he responded to various questions/comments raised by the Council. Council requested (1) more input from builders or architects on the building step-backs, so building do not look like pyramids; and that (2) Mr. Glines contact the Bowers, Ellis & Watson, the architecture firm that is a major property owner along the Patton Avenue corridor into downtown, to discuss the street wall concept due of the width of the road on Patton Avenue.

Unified Development Ordinance Amendments regarding Review Process Elements

Urban Planner Julia Fields said that this is the consideration of an amendment to Chapter 7 of the Code of Ordinances which would alter the review process for development occurring in the Central Business District.

With that direction from Council, staff and stakeholder task groups have been studying the master plan and developing strategies for implementation. The Urban Design Action Committee began meeting in the fall of 2009 to evaluate the impacts of the master plan on parcels in downtown and to evaluate the processes for the review of downtown projects. The proposals on processes have been on a different track from those for design standards. All ordinances are being presented to the Asheville City Council at the same time.

The ordinance presented details the necessary changes to the Unified Development Ordinance (UDO) concerning processes for development occurring on parcels zoned Central Business District (CBD) and located within the boundaries of the Design Review Overlay District.

This proposed UDO text amendment adds a new section to Article V ("Development Review Procedures") to outline the procedures for reviewing projects proposed on parcels zoned CBD and located within the boundaries of the Design Review Overlay District (CBD/DDR). Changes that are recommended reflect the goals of the Asheville Downtown Master Plan (DTMP) and the recommendations of the Urban Design Action Committee. These changes are directly related to Strategy 6 of the plan: *Make downtown project review, transparent, predictable, and inclusive of community input.*

The new section in Article V sets forth the procedures for Level I, II and III project review in the CBD/DDR: These procedures differ from the procedures in other parts of the City's jurisdiction as follows:

- The project level thresholds for development review in the CBD/DDR are different. Level III review will apply to those projects above 175,000 square feet or above the Intermediate Height Zone (145 feet). Level II review will apply to those projects between 20,000 and 175,000 square feet in size and up to the Intermediate Height Zone. All other projects are subject to Level I review.
- The order and format of the review process is different in the CBD/DDR except for Level I projects which are handled at staff level. Level III projects that are in the traditional downtown core go to the Technical Review Committee (TRC), the Downtown

Commission (DTC), the Planning and Zoning Commission (P and Z) and to Asheville City Council through a conditional zoning process. Level III projects outside of the core follow the same review process except Council is only considering these projects for compliance with applicable standards and regulations. Level II projects go to the TRC, DTC, and P and Z for approval.

- Early developer sponsored meetings are required for the Level II and Level III projects. Such meetings are strongly recommended for Level I projects.
- All meetings where project proposals in the CBD/DDR are reviewed shall provide notification through publication in a newspaper, mailed notice and posted notice.
- Level II project approvals are valid for two (2) years.
- Large phased developments must submit a master plan.
- Variance requests for projects proposed in the CBD/DDR shall be granted by the Planning and Zoning Commission (acting as the Board of Adjustment) with a recommendation from the Downtown Commission except for landscaping requests. Alternative landscaping requests must be reviewed and approved by the Asheville Tree Commission. Planning and Development Department staff may flex up to 10% on standards concerning openings and expanses of wall.
- Appeals from decisions of the Planning and Development Department or the Downtown Commission shall be heard by the Planning and Zoning Commission (acting as the Board of Adjustment). Appeals from the decisions of the Planning and Zoning Commission shall be heard by the Asheville City Council.

At their meeting on September 1, 2010, the Asheville Planning and Zoning Commission reviewed and unanimously (6-0) recommended approval of this ordinance to Asheville City Council.

This wording amendment reflects proposals set forth in the Asheville Downtown Master Plan adopted by the Asheville City Council on May 26, 2009. Specifically, it implements elements of Strategy 6 of the plan. Some changes have been proposed by the reviewing committee but the goals and intentions of the master plan are preserved.

Pros:

- Implements a community developed master plan.
- Sets forth a process that provides greater certainty to developers on projects in the CBD/DDR.
- Provides for a more transparent review process for projects in the CBD/DDR.

Cons:

- Some may be concerned over the elimination of City Council discretionary approval for all but the largest of projects.
- Some may be concerned that the requirement for developer sponsored meetings for Level II and Level III projects is burdensome.
- Some may feel that City Council review of Level II projects outside of the traditional downtown core (only reviewing for compliance with standards) is an unnecessary step as this review has already been conducted by the Planning and Zoning Commission.

Additional cost associated with notification of property owners for projects being considered by the Asheville Downtown Commission. First class postage for property owners within 200 feet is the proposed requirement. Actual amount will be dependent on the number of Level II and Level III projects proposed and the number of property owners to be notified.

City staff recommends approval of this wording amendment. At their meeting on September 1, 2010, the Asheville Planning and Zoning Commission reviewed and unanimously (6-0) recommended approval of this ordinance to Asheville City Council.

There was considerable discussion throughout Ms. Fields' presentation with each Council member ultimately outlining their view on the proposed amendments. Ms. Fields responded to various questions/comments raised by the Council, some being, but are not limited to: what is the appeal process from the Tree Commission; who can appeal decisions; request for pictures to show what a 175,000 building would look like, or any comparable building in Asheville; what is the additional time for projects to be reviewed by City Council outside the core area; is it possible to put some Council goals (e.g., affordable residential component – if in project - and green elements) in the ordinance and if a developer includes those components (and meets all other criteria) then there is a high degree of predictability that the project can be approved without moving forward to City Council; will a slender building still require a step-back; and how do other cities handle conditional zonings or conditional use permits for buildings of 175,000 square feet in their downtown area; the public process has proved useful to City Council in the past.

It was the consensus of Council to not schedule a public hearing before City Council on these amendments on October 26, 2010, but instead continue this worksession until November 9, 2010, and set the City Council public hearing on November 23.

At 4:32 p.m., Mayor Bellamy recessed the worksession to go into the formal meeting.

Tuesday – October 12, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Ms. Laura Degroat and representatives from Girl Scout Troop 30017, 30513, 30502 and 30585 from the Carolinas Peaks to Piedmont Council led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF GIRL SCOUT TROOPS 30017, 30513, 30502 and 30585 FROM THE CAROLINAS PEAKS TO PIEDMONT COUNCIL

Mayor Bellamy recognized representatives from Girl Scout Troops 30017, 30513, 30502 and 30585, Lora Degroat, Kendra McIntosh, Katherine Podraza, Julianne Moore, Natalie Benson-Greer, Kaylee Hutsell, and Georgia Foster from the Carolinas Peaks to Piedmont Council for painting fire hydrants.

She thanked them for their volunteer efforts with the City of Asheville. In particular I want to recognize Lora Degroat who worked with Chief Barry Hendren of Asheville Fire and Rescue to develop the Fire Hydrant Painting project. Lora led the effort to make a great idea a reality in our community by choosing this project for her Girl Scout Silver Medal project. As a part of her project she designed a brochure and worked with city staff to produce a Public Service

Announcement. These materials will be used to recruit volunteers to partner with the city to help maintain the more than 3,600 fire hydrant in the city limits.

In addition, these Girl Scouts and other members of their Troops held 2 workdays this fall and painted 25 hydrants and will hold other work days in the spring to paint more hydrants. Because of Lora's work, this great volunteer opportunity with the city is available to other groups.

Chief Barry Hendren said that had the City had to pay someone to do this work, it would have cost approximately $800-$1,000 in labor. Chief Hendren then introduced a brief Public Service Announcement that gave more information on the project and how to get involved.

B. RECOGNITION OF AWARDS

City Manager Jackson was pleased to announce that the City of Asheville was honored with two awards last month at the North Carolina American Planning Association Conference.

He recognized Ms. Sasha Vrtunski, Project Manager for the Downtown Master Plan, and said that the first award presented at to the City was the 2010 Sustainability Award for the City's Sustainability Management Plan. The judging committee provided these comments, "The Awards Jury was impressed with the Plan - - very original document and at the forefront of work on sustainability principles. The Jury further considered this to be a highly replicable initiative, and hopes to spread awareness of this model to other communities in North Carolina."

He then recognized Ms. Maggie Ullman, the City's Energy Coordinator, and said that the second award presented to the City was the 2010 Marvin Collins Outstanding Planning Award for Comprehensive Planning in a large community award for the Downtown Master Plan. The judging committee provided these comments, "The Awards Jury was impressed with the inclusive process used to develop the plan, the quality of the plan and its graphics, and the use of the "air rights" concept, among other things." In addition to the NC-APA award, the Downtown Master Plan received a Merit Award from the International Downtown Association at their annual conference in Fort Worth on October 1st.

C. PROCLAMATION PROCLAIMING OCTOBER 2010 AS "NATIONAL ARTS & HUMANITIES MONTH"

Vice-Mayor Newman read the proclamation proclaiming October, 2010, as "National Arts & Humanities Month" in the City of Asheville. He presented the proclamation to Cultural Arts Superintendent Diane Ruggiero who accepted the proclamation on behalf of the local Public Art 360 Committee and the members of the Public Art Board.

D. PROCLAMATION PROCLAIMING OCTOBER 15, 2010, AS "WHITE CANE SAFETY DAY"

Mayor Bellamy read the proclamation proclaiming October 15, 2010, as "White Cane Safety Day" in the City of Asheville. She presented the proclamation to Ms. Karen Harrington, on behalf of the Mayor's Committee for Citizens with Disabilities, and Ms. Joanne Baker, on behalf of the Buncombe County Chapter of the National Federation of the Blind of North Carolina. Ms. Baker thanked City Council for their support and then showed a brief Public Service Announcement.

II. CONSENT AGENDA:

At the request of City staff, Consent Agenda Item "B" was removed from the Consent Agenda to be considered on a subsequent agenda.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON SEPTEMBER 28, 2010

B. ORDINANCE AMENDING THE FEES & CHARGES MANUAL TO ESTABLISH A NEW PRIVILEGE LICENSE FEE FOR ELECTRONIC GAMING OPERATIONS

This item was removed from the Consent Agenda to be considered on a subsequent agenda.

C. ORDINANCE NO. 3903 - ORDINANCE CONCURRING IN A SPEED LIMIT CHANGE ON SR 1455 (CROWELL ROAD) FROM 35 MPH TO 25 MPH

Summary: The consideration of an ordinance concurring in a speed limit change on SR 1455 (Crowell Road) from 35 mph to 25 mph.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, when an engineering and traffic investigation determines that a speed limit other than the statutory 35 mph speed limit would be reasonable and safe along a state-maintained street that is inside municipal corporate limits, a concurring ordinance from the municipality is needed. Typically, these investigations are done by municipal staff but it is not unusual for the North Carolina Department of Transportation (NCDOT) to do the investigations along their streets.

The Division 13 Traffic Engineer for NCDOT recently completed an engineering and traffic investigation and determined that a 25 mph speed limit would be reasonable and safe on SR 1455 (Crowell Road) from a point 0.12 mile west of Old Haywood Road eastward to Old Haywood Road. The subject street serves a mixture of residential and commercial properties that are located near a heavily used interstate interchange.

This action complies with the City Council Strategic Operating Plan in the Safety focus area by improving the "street experience" for all users including pedestrians, bicycles, and motorists in a medium commercial corridor.

Pros:

- The North Carolina Department of Transportation did the engineering and traffic investigation to determine the reasonable and safe speed limit.
- Since the subject street is a state-maintained street, the North Carolina Department of Transportation will install and maintain the appropriate signs.

Cons:

- There are no known cons with the subject action.

There is no fiscal impact with the subject action. The North Carolina Department of Transportation will be installing and maintaining the appropriate signs.

City staff recommends City Council approve an ordinance concurring in a speed limit change on SR 1455 (Crowell Road) from 35 mph to 25 mph.

ORDINANCE BOOK NO. 26 – PAGE 305

D. ORDINANCE NO. 3904 - BUDGET AMENDMENT TO UPGRADE LIGHTING FOR THE DEVELOPMENT SERVICE CENTER PUBLIC AREA

Summary: The consideration of a budget amendment, in the amount of $7,307, utilizing Progress Energy Carolinas' Energy Efficiency for Business program sustainable rebate for work performed in the Development Service Center to upgrade the lighting for the Development Service Center public area.

The City of Asheville Building Safety Department coordinated the remodel of the first floor of the Public Works Building creating space for personnel from five development departments creating the Development Service Center or One-Stop-Shop. This facility grand opening was held on September 25, 2009. All existing light fixtures within the building were changed out to more efficient fixtures meeting Progress Energy Carolinas' Energy Efficiency for Business program thereby receiving a rebate from Progress Energy in the amount of $7,306.63. Progress Energy recognized our commitment to fiscal and environmental stewardship. These funds were deposited into an associated revenue account for the project. As part of the project, additional lighting is necessary for the public area in the atrium. An evaluation for the amount of lighting necessary during all seasons and weather conditions was conducted during the past year. The type of lighting to meet these demands while meeting the energy efficiency standards of Progress Energy's program has been determined. The use of these funds will allow the appropriate energy efficient lighting to be installed in this area improving the customer experience. The addition of these lights will close out the remodel of the Development Service Center.

This budget amendment supports the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements, and public facilities.

Pros:

- Improves the lighting in the Development Service Center public area for customers and staff
- Utilizes energy efficient fixtures.
- Does not use Fund Balance or General Fund dollars to complete the project.
- Allows the remodel of the Development Service Center to be closed out upon the addition of the lighting fixtures.

Con:

- None

This budget amendment is funded with the rebate revenue from Progress Energy; therefore there is no financial impact to the City's General Fund.

City staff recommends City Council approve the budget amendment for $7,307 to add lighting in the Development Service Center public area.

ORDINANCE BOOK NO. 26 – PAGE 306

E. ORDINANCE NO. 3905 - BUDGET AMENDMENT FOR THE WALNUT COVE RESERVOIR SITE REPAIR

Summary: The consideration of a budget amendment, in the amount of $35,940, in the Water Resources Capital Improvement Projects (CIP) Fund for the Walnut Cove Reservoir Site Repair.

The Walnut Cove Reservoir site located in the Cliffs of Walnut Cove Subdivision in south Asheville off Avery's Creek and Brevard Road is in need of repair. The work involves all efforts required to repair a wall and attached fence that are in danger of failing due to a slope failure. The work shall include, but is not limited to: permanent wall stabilization and repair of failed areas of existing pavement and subgrade between the fence and the water storage tank.

Water Resources solicited four (4) quotes on September 14th, 2010, from the following firms with only two (2) contractors submitting bids:

1. David Burnette, Inc. – Leicester, NC (bid)
2. Fletcher Grading Contractors – Arden, NC (bid)
3. T & K Utilities, Inc. – Asheville, NC (did not bid)
4. Huntley Construction Company, Inc. – Asheville, NC (did not bid)

Of the two contractors that submitted bids, only David Burnette, Inc., was considered responsive in an amount of $29,950. A construction contingency was not figured into the cost, so Water Resources added a 20% contingency for an amount not to exceed $35,940.

This project is part of City Council's strategic plans to maintain city infrastructure.

Pro:

- Approval of the bid award will allow the City to complete the necessary repairs to the reservoir site to ensure its stability and functionality.

Con:

- Not awarding the bid may result in failure of the slope around the reservoir, which may jeopardize the integrity of the water tank.

The Water Resources Department has a Pump Stations capital project in which funds are specifically reserved for pump station and reservoir maintenance. To date, there is a balance of $368,109.80 in that project. The funds needed for the Walnut Cove Reservoir Site Repair in an amount not to exceed $35,940 will be moved out of the Pump Stations reserve project into a separate Walnut Cove project.

Pump Stations Capital Project	$368,109.80
Walnut Cove Reservoir Site Repair	$ 35,940.00
Amount Remaining in Pump Station Reserve	$332,169.80

City staff recommends City Council adopt the budget amendment, in the amount of $35,940, in the Water Resources Capital Improvement Projects Fund for the Walnut Cove Reservoir Site Repair.

ORDINANCE BOOK NO. 26 - PAGE 308

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. BUNCOMBE COUNTY TOURISM DEVELOPMENT AUTHORITY UPDATE

Mr. Kelly Miller, Executive Director of the Buncombe County Tourism Development Authority (TDA), updated City Council on the Authority's mission, accomplishments and goals.

An overview of Buncombe County tourism includes (1) critical economic driver (a) generates nearly $1.9 Billion in direct and indirect economic impact; and (b) compared to $200

Million in 1983; (2) more than 2.9 Million overnight leisure visits annually; and (3) direct employment impact of more than 22,000 jobs (a) direct labor income impact is more than $473 Million.

He said that more than 22,200 people are employed in Leisure and Hospitality related jobs in the Asheville MSA area.

Regarding tourism dollars impact on residents in Buncombe County, more than $25 Million is generated for local government through retail and property taxes annually. Without tourism revenues, each Buncombe County household would pay approximately $300 more in taxes each year.

Using a chart, he showed the overnight leisure visitation to the Asheville area is more than 2.9 Million. A typical visitor to Asheville is in their 50s with an income of $100,000+, has a college or post-graduate degree, no children in the home, more than half employed full-time (1/3 retired), is married and traveling as a couple, and has internet access. Top points of origin markets include Charlotte, Raleigh-Durham, Atlanta, Greenville-Spartanburg, Tampa-St. Petersburg, Greensboro-High Point-Winston-Salem; Orlando-Daytona Beach, New York City, Washington, D.C., and Nashville. Using a pie chart, he described the main reasons for visits, which top reasons are outdoor activities, mountains/scenery, and downtown Asheville.

Using charts, he showed the historical snapshot of the numbers of the Buncombe County hotel sales by calendar year and fiscal year; hotel occupancy by calendar year, calendar year – 2005 – 2010 year to date, and fiscal year; and average daily rate (fiscal year).

The lodging forecast is (1) Smith Travel Research revises 2010 national forecast upward – to a project a 4.4% increase in occupancy t 57.1% with average daily rate expected to be flat; (2) in 2011, occupancy should climb to 57.9% with average daily rate expected to rise to $101.55; and (3) TDA is forecasting a 5% increase in hotel sales in 2010-11. He also used a chart to show the growth in hotel rooms in Buncombe County.

Despite knowing the exact location of the rock slide on I-40, nearly a third of markets east of the rock slide expected delays and traffic issues on their normal or alternate route to the North Carolina mountains.

The Presidential visit created a higher profile for the mountain region and generated more than $2 Million in publicity.

Regarding advertising effectiveness, (1) the TDA spends nearly half of its budget on net advertising – more than $2 Million each year; (2) for every $1 an estimated $55+ is returned to the community.

He said that studies show editorial converts at a higher rate than advertising. Editorial generated through media outreach from the Conventions & Visitors Bureau includes coverage from Good Morning America, the Associated Press, New York Times, MSNBC, and multiple magazines, blogs and broadcast outlets. In 2009-10, publicity value exceeded $5 Million.

Regarding green and sustainability efforts, the Asheville Offset Program focuses on direct sustainability of the area as a host City; volunteerism opportunities such as the river clean-up and partnership with Warren Wilson College's Insulate Program.

He said that $14,183,500 Million has been awarded in tourism product funding through 2010. In 2010, the TDA awarded the largest single Tourism Product Development Fund grant ($2 Million) to the City of Asheville for renovations to the Asheville Civic Center. This brings the total number of projects funded through this innovative program to 14. The total worth of these community assets total nearly $100 Million.

Significant initiatives include (1) overhaul www.ExploreAsheville.com to inject additional video, social media efforts and interactive components (site gets approximately 2 million unique visits each year); (2) new creative advertising elements; (3) Asheville-Buncombe Regional Sports Commission; (4) Hilton Head Island partnership; and (5) DMAI accreditation.

On behalf of City Council, Councilman Davis thanked Mr. Kelly and the TDA for their initial work and follow-up work on the wayfinding signs. He also thanked them for their assistance in bringing the Southern Conference back to Asheville, along with the Product Development Fund's $2 Million for upgrading the Civic Center.

In response to Mayor Bellamy, Mr. Miller explained how the room tax is distributed, along with the Product Development Fund application process.

On behalf of City Council, Mayor Bellamy thanked Mr. Miller and the entire TDA Board for their efforts on behalf of the City.

B. HUB ALLIANCE UPDATE

Dr. David Brown, Executive Director of the HUB Community Economic Development Alliance (HUB), updated City Council on the HUB's mission, accomplishments and goals.

He said that Mayor Bellamy, Councilman Smith, and City Manager Jackson have each attended over 75% of our 3rd Tuesday board meetings and have been significant contributors to our deliberations. In addition, all 5 of your city appointees have equal records of attendance & participation. Thank you for your trust and for our meeting place.

He said their mission is to take a longer view, to stimulate community leaders to think about what we need to be doing today in order for AVL-BC to be even better 5 years out and beyond, and to catalyze actions that will get us there. This means 3 things: (1) This means spotting opportunities for the future. Our current emphases are in creating new jobs in Climate Change, in Integrative Health, in Green industries, and in the Creative Arts; (2) This means creating systems to monitor our community's advances in jobs, economic well being, social well being, education, the environment, and cultural vitality; an (3) This means breaking down the barriers among silos --- buncombe/wnc, allopathic & CAM, business & non-profit communities, city/county, artists/performers, etc. We must work toward a consensus agenda because our resources are limited and our opportunities are manifold!

Our board and staff are entirely voluntary. Our office is virtual. Our general expenses are under $100 per month. Currently we have no general budgetary support from either you (the city) or the county. Yet, by bringing leaders together, by highlighting emerging opportunities, by monitoring our progress --- we believe that we have had and are continuing to have substantial impact.

He hoped that Council would advise them if there are there issues or opportunities that Council would like them to pursue.

Councilman Smith explained the make-up of the HUB Alliance and explained their importance to the community.

On behalf of City Council, Mayor Bellamy thanked Dr. Brown and the entire HUB Board for their efforts on behalf of the City.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE A NEW AIRPORT ZONING DISTRICT

ORDINANCE NO. 3906 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO CREATE A NEW AIRPORT ZONING DISTRICT

Mayor Bellamy opened the public hearing at 5:48 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance amending the Unified Development Ordinance to create a new Airport Zoning District. This public hearing was advertised on October 1and 8, 2010.

In March of last year, the City of Asheville received a copy of a signed resolution and cover letter from the Asheville Regional Airport Authority requesting that the City adopt specific land use/zoning ordinances for the airport property at the Asheville Regional Airport.

The Asheville Regional Airport Authority was established in 1979 as a joint governmental agency organized and created by the City of Asheville and Buncombe County, pursuant to General Statutes, for the purpose of maintaining, operating, regulating and improving the Asheville Regional Airport. The majority of the property is zoned Industrial (IND) which generally accommodates the uses associated with the airport functions; however, as a general zoning designation, it is subject to basic development standards that are designed for a wide variety of land uses occurring throughout the city. In recent years, the airport has submitted a number of modest development projects where applying basic development standards proved challenging, particularly for the aviation related projects.

Regional airports are generally recognized to be a very specialized and unique land use and it is not unusual for municipalities to apply special land use designations and standards to airport properties. There are a variety of tools that the City and the Airport Authority could consider including:

1) Develop and Adopt a Master Plan
2) Create a New Airport Specific Zoning Designation
3) Establish a New Authority by Special Act of the NC General Assembly
4) Allow the Airport to Develop their own Zoning Establish an Airport Overlay

Some of these actions require special legislation or other significant efforts. After some consideration, City staff generally agrees with the airport management that an airport specific zoning designation may be the best option available that satisfies the majority of the airports concerns while alleviating the burden of unnecessary detailed reviews applied to relatively modest projects. Both parties also recognize that the creation of an airport overlay applied to properties in proximity to the airport may also be necessary at some point in the future; however, the unique location of the airport would necessitate multi-jurisdictional cooperation that the airport would coordinate and that in which the City will participate.

Among the City Council's top priorities for the new Strategic Operating Plan was continuing to forge intergovernmental and community partnerships to implement initiatives during economically challenging times. This amendment is a joint request from the Airport Authority and City staff and will satisfy key goals for both parties. Specifically, as it relates to the City of Asheville's adopted goals and plans, this effort will help satisfy transportation and economic development goals by supporting and facilitating a healthy regional airport operation.

Pros:

- Addresses the unique needs of aviation operations while preserving standards for non-aviation uses.
- Alleviates the need for detailed reviews for relatively modest projects.

Cons:

- An overlay zoning applied beyond the airport properties is not being proposed at this time.
- Adds a new zoning district when there is interest in reducing the total number of zoning districts.
- Design review responsibilities remain with City staff expending City resources (as opposed to other options that would allow the airport to assume those responsibilities) – could be viewed as "pro" by some.

In May 2009, this item was reviewed by the Council's Planning & Economic Development Committee who supported the pursuit of an airport specific zoning designation and the participation in a multi-jurisdictional collaboration for establishing an airport overlay (at a future date yet to be determined).

The Planning & Zoning Commission reviewed this proposal at their February and March 2009 meetings where the proposal was introduced and generally supported. Final consideration was delayed to accommodate other requests to follow-through on several city-airport initiatives that could influence the final draft. This revised ordinance was reviewed and unanimously approved at the September 1, 2010, Commission meeting.

There is no direct fiscal impact to the City; however, modest reductions in time dedicated to the review of airport projects would result in minor relief to city resources.

City staff recommends City Council adopt the wording amendment creating a new airport zoning designation.

Mayor Bellamy closed the public hearing at 5:54 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3906. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 310

B. PUBLIC HEARING TO CONSIDER REZONING 61 TERMINAL DRIVE FROM INDUSTRIAL DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT AND HIGHWAY BUSINESS DISTRICT TO AIRPORT DISTRICT

ORDINANCE NO. 3907 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REZONE 61 TERMINAL DRIVE FROM INDUSTRIAL DISTRICT, COMMERCIAL INDUSTRIAL DISTRICT AND HIGHWAY BUSINESS DISTRICT TO AIRPORT DISTRICT

Mayor Bellamy opened the public hearing at 5:55 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance amending the Unified Development Ordinance to rezone 61 Terminal Drive from Industrial District, Commercial Industrial District and Highway Business District to Airport District. This public hearing was advertised on October 1and 8, 2010.

The Asheville Regional Airport Authority was established in 1979 as a joint governmental agency organized and created by the City of Asheville and Buncombe County, pursuant to General Statutes, for the purpose of maintaining, operating, regulating and improving the Asheville Regional Airport. The large majority of the property is zoned Industrial (IND) which generally accommodates the uses associated with the airport functions; however, as a general zoning designation, it is subject to basic development standards that are designed for a wide variety of land uses occurring throughout the city. In recent years, the airport has submitted a number of modest development projects where applying basic development standards proved challenging, particularly for the aviation related projects.

Regional airports are generally recognized to be a very specialized and unique land use and it is not unusual for municipalities to apply special land use designations and standards to airport properties. The creation of a new Airport zoning designation and related standards has been simultaneously proposed in order to create a more appropriate and efficient designation for the airport operations.

The purpose and intent of the new Airport zoning is stated as, "It shall be the intent of this district to encourage and support the continued operation and vitality of the Asheville Regional Airport by allowing certain airport-related commercial/industrial and recreational uses in accordance with this ordinance, state law, and Federal Aviation Administration regulations." Clearly, a specialized zoning district designed to address specific aviation needs will accomplish this more than a general use zoning district.

This rezoning was unanimously approved by the Planning and Zoning Commission on September 1, 2010, there has been no opposition to the proposal and no communications from the public regarding this rezoning.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Proposed zoning district is generally compatible with the surrounding area and does not change the allowable uses.
- Addresses the unique needs of aviation operations while preserving standards for non-aviation uses.
- Rezoning could encourage development and further job growth.

Cons:

- Requires the creation of a new specialized zoning district.

The staff recommends approval of this rezoning request.

Mayor Bellamy closed the public hearing at 5:55 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3907. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 314

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ADD A NEW APPLICATION PROCESS TO

ALLOW THE CONSIDERATION OF DEVELOPMENT INCENTIVES FOR PROJECTS MEETING KEY STRATEGIC CITY GOALS

ORDINANCE NO. 3908 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ADD A NEW APPLICATION PROCESS TO ALLOW THE CONSIDERATION OF DEVELOPMENT INCENTIVES FOR PROJECTS MEETING KEY STRATEGIC CITY GOALS

Mayor Bellamy opened the public hearing at 5:56 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance amending the Unified Development Ordinance to add a new application process to allow the consideration of development incentives for projects meeting key strategic city goals. This public hearing was advertised on October 1and 8, 2010.

This proposal is an outgrowth of the *2008 Affordable Housing Plan for the City of Asheville* which reflects a six-month planning effort by a diverse group of volunteers and advocates dedicated to exploring values and practices that help citizens access and maintain affordable housing. In June of 2008, the Asheville City Council reviewed and accepted this report with a recommendation for more work to continue in identifying high priority areas and possible measures that could be implemented to help accomplish recommendations included in the report and reduce barriers to affordable housing.

Following up on the direction from the Council, a smaller "working group" composed of members of the original task force was formed in the fall of 2008 and planning staff was assigned to work with them on the Plan recommendations. That effort turned out to be complicated by the divergent views of those on the working group. Because of this complexity, the group began by tackling one recommendation of the Affordable Housing Plan, a proposal that would directly address:

> Recommendation #6 – for all proposed developments under 50 units, density bonuses for affordable housing should be a use-by-right, subject-to-special-requirements, not a conditional use. The special requirements should be developed with community input and should not be prohibitive or onerous.

Preliminary work on this proposal was reviewed with the Housing and Community Development (HCD) Committee in February 2009. At that time, the HCD members recognized that the Sustainable Advisory Committee on Energy and the Environment (SACEE) was similarly tasked with developing an amendment that would allow additional density in exchange for sustainable building practices. Recognizing that the two goals were very similar with strong areas of overlap, the HCD members requested that staff work with SACEE and the Affordable Housing Working Group (AHWG) combined, to develop a single application process that would satisfy both goals. After nine months work and substantial discussion, a conceptual draft was prepared.

With a few exceptions, the amendment included with this report is the agreed upon product of the AHWG and SACEE. The primary point of divergence between the two groups is where the additional density should be located. Most, although not all, members of the AHWG preferred that the density bonus application be available to all projects and potentially realized on any parcel within the City's jurisdictional limits, while SACEE felt that density is most appropriately located within a certain proximity to transit lines and, in areas where density is part of larger vision plan such as the River District. A minority of members of the AHWG, representing neighborhood groups, strongly disagreed with the majority decision. Staff returned to HCD in September 2009 to seek policy direction and, to aid in the discussion, had produced several maps illustrating the coverage associated with distances from primary corridors (generally capable of supporting a transit line with a 30 minute frequency) and all transit lines. After reviewing the maps, the HCD

recommended moving forward with limiting the density bonus applications to those properties within ¼ mile of any transit line, not just 30 minute lines.

This proposal was reviewed by SACEE during meetings in: July 15, 2009 and June 16, 2010; and by the Planning and Zoning Commission at their meetings of July 22, 2010, and September 1, 2010. Both bodies recommended further modifications to the proposal, as discussed after the staff review.

SACEE recommended that the proposal be limited to properties within ¼ mile of road corridors with high frequency transit lines proposed. After review, this position was not supported by the AHWG or the HCD and was not included in the original amendment which included an applicability area of ¼ mile from any transit corridor.

At their July 22, 2010, meeting the Planning & Zoning Commission (after substantial public comment) requested the staff to prepare a modification to the proposal limiting the area of applicability to multi-family and commercial zoning districts, specifically excluding the single family zoning districts; and limiting applicability to areas within 1/8 mile of all high frequency transit lines. The first draft was ¼ mile of any transit line in the City of Asheville. After careful consideration, the area was significantly reduced to 1/8 mile from key transit lines. Those key transit lines include those that were identified to be high frequency lines in the City's Transit Master Plan and some of our other major corridors. Even though the high frequency may end closer to the City's core, because it's such a key corridor we extended the coverage to the end of the corporate limits. The entire total area in the City is 45.5 square miles. The areas within 1/8 mile of all high frequency transit lines (within our jurisdiction) cover 10.8 square miles. It's also important to note that the 1/8 mile also includes zoning districts that are not eligible for this application, e.g., urban zoning districts, Central Business District, specialty districts, and single-family districts are not included. That further reduces the area to 7.5 square miles, or 16.5% of the total City. The area of applicability gets narrowed significantly. Of that 16.5%, 70% is commercially zoned property. The majority of the area where these applications will be considered are developable, commercial properties within close proximity to major transit lines.

The Planning & Zoning Commission also requested staff analysis of opportunities to add pedestrian, bike and greenways plans as alternative transportation routes where additional density could be considered, and options for public notification. On September 1, 2010, the Commission reviewed the revised draft and staff analysis and approved the proposal unanimously (6:0) with the additions of portions of Broadway, Riverside and Amboy Road. The Commission was also generally supportive of the options for very light notification as described by staff but did not to include this as a requirement, preferring that this recommendation be reviewed and considered by City Council.

The proposed Unified Development Ordinance (UDO) text amendment replaces the existing Conditional Use Permit (CUP) process titled "Development standard bonuses for residential zoning districts" (commonly referred to as "density bonus" applications) with a use-by-right with standards (USSR) process applicable in all residential and commercial districts. The new proposal, dubbed "Sustainable Development Projects", in addition to changing this process from a CUP to "by right" approval includes density and other building incentives available to projects that address key City adopted goals. Such projects must, however, meet a number of basic requirements. Additionally, a menu of desirable features is included with each feature being assigned a relative value (points). Higher scoring projects are eligible for larger density bonuses and other flexible development options that allow reductions or waivers of other development requirements such as minimum lot size, setbacks, open space and height limitations. A separate, more simplified, option is offered for green building projects based on LEED (or NC Healthy Built) certification. When combined, special projects that meet both strategic goals are offered even larger bonuses. The proposed draft and menu were tested on a number of former development proposals (all approved through other applications) to determine

whether the extent of the resulting bonuses offered were relatively consistent with previous requests.

The proposed UDO amendment replaces only the conditional use permit procedures and standards for density bonus standards for development proposals of 5 or more dwelling units. This category establishes criteria under which proposals in this size category can be approved with additional density. There are other CUPs for smaller scale infill development that include duplex, triplex, and quadraplex structures. While a development proposal in this category of 5 or more dwelling units may include structure types such as a duplex, triplex, or quadraplex; no changes are proposed at this time to the CUP process for duplex, triplex, or quadraplex construction in single family zoning districts.

Some of the key differences between the new proposal and the existing process, and major elements of the current requirements and process that are being maintained in the new proposal are compared in the table below:

Existing Standard	**Proposed Standard**
Applications require public hearing and approval by City Council, regardless of size (projects larger than 50 units also requires review by the Planning & Zoning Commission)	Most applications reviewed administratively with no public hearing and approval by staff
Public hearing regardless of size	Public hearing only if base density is higher than a Level III threshold (50 units) or is a project larger than 70 units, regardless of base density.
Applicable only in residential districts	Applicable in multi-family residential and commercial districts
No relationship to transit proximity	Must be within 1/8 mile of a transit line, with additional points if site has frontage on corridor
No relationship to parking availability	Reductions in off-street parking when on-street parking is available, or the majority of units are 1 bedroom or efficiency size
No requirement to create good relationship with surrounding residents	"Good Neighbor Agreement" proposed, although not enforceable; but no separation requirements
No compatibility requirements other than what may be required through CUP	Compatibility requirements established in residential districts (height, size, orientation, architecture, materials, etc.)
Minimum project size 5 dwelling units	No change
Can be proposed in single-family residential districts	Not permitted in single family districts
No architectural and design requirements other than what may be required through the CUP	Very basic pedestrian oriented design and mixed use building features required.
Flexibility for off-street parking allowing it to be located in front of structures (if certain criteria are met)	No change other than the process for approval
Extent of density bonuses offered	Re-worked per committee recommendations – cutoff's are slightly different and now can combine additional bonuses for meeting both goals (affordable + green)
Relief from other basic development standards (setbacks, open space, minimum lot size, height, etc.)	No change other than the process for approval
Exceptional development and design features included	No change other than the process for approval

To summarize, the proposed wording amendment provides additional density and other incentives and eliminates the public review process for many projects to encourage the development of affordable and/or green building in the City of Asheville. Special standards are also proposed to help ensure that sustainable development projects are compatible with the surrounding areas. Again, this proposal addresses Recommendation #6 in the *2008 Affordable Housing Plan for the City of Asheville* (and a similar recommendation from SACEE), and while it indirectly supports other goals in the plan, it is not intended to:

1. Provide opportunities for smaller infill projects such as duplex, triplex, or quadraplex construction by right (Recommendation #9), or
2. Provide the structure or urban form that may be achieved through a Transit Corridor Overlay (Recommendation #22)

While not an officially adopted plan, the proposal is the result of work directly related to implementing recommendations in *The 2008 Affordable Housing Plan for the City of Asheville.* Additionally, if adopted, this proposal would help reduce barriers to affordable housing in the City as supported by the *City Development Plan 2025* (comp plan) and the *Consolidated Strategic Housing and Community Development Plan.*

Pros:

- Provides density and other incentives for residential or mixed use projects meeting key strategic city goals.
- Provides additional flexibility and relief from basic development standards.
- Allows for an administrative review of eligible projects (no public hearing); although this can also be viewed as a "con".
- Includes compatibility requirements to help ensure the project is compatible with the surrounding area.

Cons:

- Area of applicability in residential areas is more restrictive than the current CUP process.
- Removes public notification from review process, no opportunity for public input.
- Does not address small multi-family infill projects (although other application options exist)
- Does not directly address transit corridor development.

The Housing and Community Development Committee reviewed this proposal during meetings in: February 2009, September 2009, and May 2010. The HCD recommended that it move forward to the Planning & Zoning Commission at their May 2010 meeting.

The Sustainable Advisory Committee on Energy and the Environment reviewed the proposal during meetings on July 15, 2009 and June 16, 2010. As previously noted, in 2009 SACEE recommended a restriction that sustainable projects seeking additional density be limited to those properties within ¼ mile of road corridors with high frequency transit lines proposed; but that recommendation was not supported by the AHWG or the HCD and was not included in the original amendment.

The Planning & Zoning Commission reviewed the proposal at their July 22, 2010, meeting, and directed the staff to prepare modifications to the proposal, as discussed previously. On September 1, 2010, the Commission reviewed the revised draft and approved the proposal unanimously (6:0). The Commission was supportive of options for very light notification but chose not to include this as a requirement, preferring that this be reviewed and considered by City Council.

This proposal and subsequent revisions have also been shared with a variety of interested stakeholders, the Coalition of Asheville Neighborhoods (CAN), the Council of Independent Business Owners and others included in the Planning and Development Department listserve. Opposition has developed primarily from members of CAN and individual residents of single family neighborhoods. Their initial concern was the inclusion of the single family zoning districts in the proposal; which the Planning and Zoning Commission recommended modification would alleviate. Their remaining major concern is the elimination of public notice and approval by an appointed or elected body.

Community Concerns Expressed: In the weeks preceding the writing of this staff report, a number of letters, e-mails, phone calls and voice messages from concerned citizens have been received by the planning and development office. Those comments are summarized below along with response and other considerations offered by staff (additional comments have been added as a result of the revisions generated from the Planning & Zoning Commission, some concerns and considerations are now less applicable):

1) Removal of public notification, need for staff interpretation

Response: The specific direction given to staff was to make density bonus projects an option by-right where there would be no public hearing process. The standards proposed are intended to as objective as is practicably possible but need for staff interpretation is sometimes unavoidable and can occur in all types and ranges of applications, not just density bonus projects.

Consideration: A requirement for a developer sponsored meeting and/or notification of neighbors by the developer would accomplish some outreach and notification while minimizing the burden on staff resources.

See memo dated September 1, 2010.

2) Loss of character in single family neighborhoods, inability to rely on zoning

Response: The existing CUP process allows consideration in single family neighborhoods which is proposed to be maintained in the new by-right proposal. The new proposal requires compatibility (height, size, orientation) with the existing structures in an effort to minimize impact on the physical character of the block. Increased density; however, could result in increased activity which can affect the social character or harmony of the neighborhood.

Consideration: Separation requirements could be considered between projects in single family neighborhoods to help disperse projects and their impacts. This would only be recommended for single family zoning districts.

The effects of the amendment have been further reduced through the actions of the Planning & Zoning Commission to remove single family districts from consideration.

3) Effect of, and propensity for, poorly maintained rental property

Response: Lack of maintenance or poorly maintained properties is an occasional problem throughout all of Asheville and is not limited to rental properties. The proposed amendment would allow equally for owner-occupied units as well as rental units.

Consideration: There is little that can be done to address maintenance of property beyond what is required for public health, safety and welfare. However, this proposal does require the development of a "Good Neighbor Agreement" which, while not binding, has been shown to be effective in communicating reasonable expectations for new residents.

4) On-street parking and special exceptions detracting from character/harmony of block

Response: The City requires minimum road surface widths on roads where on-street parking is allowed. The general City position is that on-street parking is allowed anywhere where "no parking signs" are not posted and is considered a good and effective means of calming traffic on residential streets. On-street parking is public parking and will remain so with these applications. The proposed amendment does not eliminate off-street parking requirements but does allow reductions in situations where the reliance on fewer vehicles is more likely (affordable housing and 1 bedroom or efficiency units).

Consideration: This amendment could be modified to allow reductions only in those areas within a certain distance of a major transit corridor where reliance on alternative modes of transportation may be more realistic.

5) Ineffectiveness and/or legal concerns over "Good Neighbor Agreement"

Response: Legal concerns should be minimal as the Agreement is not intended to be a legally binding agreement but rather, a means of communicating reasonable expectations to new residents. Agreements are to be posted in areas where residents may see them and should be distributed to each new resident upon their entering the community.

Consideration: It may be possible to make these Agreements legally binding; however, this appears to be fraught with concern over legality and effective enforcement and is not recommended. Informal (non-scientific) information suggests that non-binding agreements are almost as effective as legally binding ones.

6) Desire/need for additional public review and input, request for proposal to go to Planning and Economic Development subcommittee prior to P&Z and Council

Response: This proposal has been discussed in two key Committees staffed by citizen volunteers for more than 12 months where significant opportunity for review and input has been offered. It has more recently been shared with other community groups who were afforded more than a month to review and provide feedback/input. Numerous comments and considerations have been offered and are reflected in this analysis and have resulted in several modifications to the draft ordinance being presented. This input has been extremely valuable and helpful. Additional time may provide the community an extended opportunity for comment; however, it is uncertain whether this additional time will result in new information or improvements that have not already been received and considered.

Consideration: A formal request for this item to be reviewed by PED has been requested by the community; however, this request was denied (2 of the 3 members of the HCD also belong to PED and it was felt that there had been enough review already). Nevertheless, the community may request that the Planning & Zoning Commission delay consideration to have specific issues examined and/or reconsidered.

7) Cumulative effect of bonuses offered

Response: Staff tested the draft ordinance on six (6) former development proposals that had all been approved through other means. To summarize, those projects did not result in significantly larger bonuses than what had already been afforded to them. Additionally, it is important to recognize that in many situations, other limitations such as building height, mass, or off-street parking requirements also effectively limit development potential of a site and just because a project is eligible for a large bonus, does not mean that they can effectively realize that bonus.

Consideration: To better understand the cumulative effect of multiple bonuses will require additional staff time to test the effect on additional sites. The Council could direct staff to undertake such research.

8) Loopholes that will be difficult to prevent and enforce against

Response: Loopholes are something that is difficult to protect against. Even when an ordinance appears to be extremely comprehensive, the most creative and motivated individual may work very hard to find a way to avoid certain requirements.

Consideration: It is recommended that if concern over loopholes is substantiated, then an appropriate response would be to invest time in identifying the specific "loopholes" and amend the ordinance to close them. Staff is not aware of any specific loopholes that are not intentional.

9) Lack of separation requirements

Response: A separation requirement mandates a minimum distance between like projects. The current CUP application does not include a separation requirement but this can be reviewed by the staff as part of the applications on a case by case basis. The usefulness of a separation requirement is that it ensures dispersal of higher density uses, preventing a concentration of a particular use or development form in one area. The primary consequence of a separation requirement is that it can greatly limit the available land that could be considered; and the greater the separation required, the greater the limitation.

Consideration: A separation requirement could be considered but staff would recommend limiting it to single-family residential districts with a careful analysis of the minimum distance necessary to achieve the desired outcome.

Consideration of separation requirements may not be necessary now that single family zoning districts have been removed from the proposal.

10) Need for better definitions of terms

Response: Some terms are easier to identify than others. Staff agrees that the ordinance would benefit from the addition of some definitions that members of the community found confusing, and will incorporate those into the draft.

Consideration: The Community and Commission are welcome to assist with the identifying of terms in need of definitions and/or offer basic definitions for consideration.

11) Need for ties to economic development and job creation

Response: Numerous affordable housing reports for Asheville identify an enormous deficit in the amount of affordable housing needed presently. While the need for economic development and job creation is not in dispute, the need for affordable housing is just as great and imminent.

Consideration: Staff would not recommend any changes to the amendment that would tie economic development or jobs to this proposal. Also, conceptually it would be very challenging to successfully do so.

12) Impact of large projects (size and density) is not mitigated by affordability or sustainability

Response: This is not in dispute. The basic premise of the amendment is that a density incentive would be offered for projects meeting the definition of sustainable that is to be established. Such projects would be supported despite their impacts to the neighborhoods where they would be built.

Consideration: This is a philosophical and policy question that does not lend itself to alternate options.

13) Impact on the new Shiloh Neighborhood Plan

Response: Shiloh is a predominately single family neighborhood and will be largely exempt from this application. Properties within 660 feet (1/8 mile) of the Hendersonville Rd. corridor may take advantage of the new application process, however, the very large majority of this area is commercially zoned property.

Consideration: Staff has met separately with the Shiloh community and has shared with them a customized map showing the area of applicability as it specifically relates to the Shiloh Community.

14) Density should be concentrated on major corridors

*Response: **The 2008 Affordable Housing Plan for the City of Asheville** included numerous recommendations including one calling for the creation of a transit corridor overlay that could incentive density and affordable housing through the creation of mixed use, sustainable, transit oriented development. The current proposal is not intended to accomplish the effect of a transit corridor overlay but is extended to those corridors until such a time that an overlay may be developed.*

Consideration: 1) This proposal could be amended to not exclude those commercial corridors and the Commission may direct staff to initiate the development of a transit corridor overlay, or 2) This proposal could be abandoned in favor of a transit corridor overlay, or 3) These projects could be limited to areas within a specific distance of the transit corridors.

The changes as a result of the Planning & Zoning Commission's revisions appear to follow recommendation #3 to a great extent.

15) The proposed architectural and design standards can require lower quality materials and designs in some instances when that is a character defining feature of the existing homes.

Response: This was discussed with the AHWG where an option to consider alternative designs and materials was debated. To summarize, the majority opinion was to require that the existing character be maintained even if that meant sacrificing the opportunity for "higher design".

Consideration: An option could be added to the proposed ordinance for alternative materials and designs to be approved by the Planning & Zoning Commission.

The design requirements related to building materials were limited to single family zoning districts which have now been removed from consideration.

16) Enforceability of LEED Certification or Affordability requirements.

Response: The most common enforcement mechanism is to withhold a CO until a project has demonstrated full compliance. Occasionally, however, projects are discovered to be out of compliance after occupancy. When this occurs, typical enforcement action includes

providing a period to correct the violation; if the responsible party fails to correct the violation by the end of the due process period, the City will move forward with other enforcement action. The City has, depending on the circumstances, a variety of enforcement options available to them including:

- Revoking Certificates of Occupancy
- Fines and penalties for non-compliance (compliance could include a Conditional Zoning which would allow for public notification and input)
- Other legal action (suing developer for violating deed restrictions, etc.)

If for some reason we find that that the project fails to meet the commitment that was originally offered, there a number of avenues to consider, however, the course staff would take would depend largely how out of compliance the project is. If a project fails to meet its silver LEED certification by 2 points or something relatively negligible, staff may ask them to pursue a conditional zoning in front of Council to explain the challenges and see if there is support for the project standing under the level it did ultimately achieve. If it's grossly out of compliance, they would still come before Council for a conditional zoning and at that time Council can consider a wide variety of factors. There is also the normal punitive enforcement action that includes fines that could be assessed.

Consideration:
Some features are easier to enforce than others. LEED certification is not completed until the project has been completed and occupied for a period of time. In these instances, the City could consider requiring a performance bond until such a time that certification is achieved.

Staff concurs with the Planning & Zoning Commission and recommends adoption of the Ordinance proposed as it accomplishes the goals of Recommendation #6 of the *Affordable Housing Plan for the City of Asheville*, and the objectives of the majority of the Affordable Housing Working Group and Sustainable Advisory Committee on Energy and the Environment, that the staff was tasked to assist. The proposal provides development incentives for projects meeting key strategic goals.

The following individuals are opposed to excluding public comment, lack of notification to adjoining properties, including a concern that the ordinance is an illegal delegation of zoning authority:

Mr. Mike Lewis, representing the Coalition of Asheville Neighborhoods
Ms. Teddy Jordan, resident on Normandy Road
Mr. Jack Westall, Asheville resident
Ms. Valeria Hoh, resident on Finalee Avenue
Mr. David Rogers

The following individuals spoke in total support of the ordinance as presented, noting that if the development includes affordable housing, sustainable development, transit-oriented development, and other goals City Council wants to promote, then each development does not necessarily need to have a public hearing:

Mr. David Nash, member of the Mayor's Affordable Housing Task Force and member of the Affordable Housing Working Group
Ms. Julie Mayfield, Executive Director of the Western North Carolina Alliance
Ms. Robin Merrill, member of the Mayor's Affordable Housing Task Force
Mr. Dane Barrager, representing the Sustainable Advisory Committee on Energy & the Environment

At 6:33 p.m., Mayor Bellamy closed the public hearing.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Manheimer moved to adopt Ordinance No. 3908 to amend the Unified Development Ordinance to add a new application process to allow the consideration of development incentives for projects meeting key strategic goals. This motion was seconded by Councilman Smith.

Councilwoman Manheimer said that this ordinance has been reviewed and revised by several committees and that is why she is comfortable with it. She reiterated that the density is increasing from 50 to 70 units so long as green building and/or affordability is provided on the project. And, she noted that these projects will not be allowed in single-family zoning districts. She would be open to (1) to consider whether or not we should exempt this ordinance from any properties subject to the slope development ordinance; (2) publicly interviewing Planning & Zoning Commission applicants to make the process of appointment more transparent; (3) requiring some kind of neighbor notification; and (4) reviewing the ordinance in a year to see how effective or ineffective it is. She believes that this ordinance will encourage green-building and building affordable housing. She liked that if the developer wants to proceed with this application, they have to comply with some design requirements for projects that we don't currently have any control over. She felt that the developer has to follow stricter rules and in exchange they get a process that is more secure for them.

Vice-Mayor Newman felt this ordinance is a positive step forward in achieving some of Council's goals of (1) growth and redevelopment on our major commercial corridors; (2) inclusion of some degree of affordable housing for projects that have major residential components; and (3) green-building. Regarding public hearings for every project, he felt public input is extremely important, but for him the question is does it make sense that the City have the same threshold for triggering a public hearing in every single part of the City. What makes sense in the terms of the threshold for triggering a formal public hearing in the Central Business District and in a low density residential area doesn't make sense to have the same standards. You can put a very significant development in the downtown or in the commercial corridor and it will blend right in. If you take that same type of development and you put it in a residential area, it would be completely out of context and would warrant a public hearing for that type of proposal. To say that the types of thresholds that should trigger a public hearing on our commercial corridors should be the same thing as in low-density residential areas, doesn't make sense from a planning standpoint.

Councilman Smith wholeheartedly supported the ordinance said that this has been a culmination of four years work. He explained how this meets some broad community values. Regarding Councilwoman Manheimer's comments, he (1) felt the slope development ordinance concern should be reviewed at a different time; (2) was supportive of the Planning & Zoning Commission interview process being expanded similar to the School Board appointment process; (3) supported notification to adjacent property owners; and (4) he preferred to see a two-year review of the ordinance.

Councilman Davis regrettably could not support the ordinance as it has a lot of good potential, however, he did not want to eliminate public comment. He felt that people elect Council to hear them and make a decision based on those opinions.

Councilman Bothwell supported the intent of the ordinance, except for eliminating public comment.

Councilman Russell agreed that we need higher density on our commercial corridors. He felt there are some corridors we need moderate price housing and wondered if this will have the long-term unintended consequence of pushing moderate and/or upscale housing out of the corridors.

When Councilman Russell asked if there was any discussion of expanding density along the commercial corridors to non-affordable housing developments, Ms. Tuch said that to be eligible for this application you either have to include some amount of affordable housing or get one of the certified greenbuilding levels. There is the possibility of having mixed housing where some is affordable and some is not.

Vice-Mayor Newman said that the City Council Boards & Commissions Committee has discussed the expanded Planning & Zoning Commission interview process. He said that if this ordinance is adopted and the UDO recommendations regarding the Downtown Master Plan are adopted, there will be definite elevated roles of the Planning & Zoning Commission in the City's planning process. The Committee discussed the interview process be similar to the School Board appointment process where specific questions are asked of the candidates and interviews are conducted in an open session. The Committee will be seeking City Council approval on this new process in the near future.

In response to Vice-Mayor Newman regarding notice requirements, Ms. Tuch said that we do have a precedent for notification. We presently require that developers notify directly adjacent property owners when alternative compliance requests for landscaping are being considered. How that works is we require that the developer send a letter to each of the directly adjacent property owners. We ask the developer to provide the City with a copy of the list of all the people who were notified as well as a copy of the letter. The letter has to include their contact information and the City's contact information. We also ask for additional information in the letter, e.g., the approximate timing of the project, basis elements of the project. etc. The property owners would receive notification before the developer makes application.

At the request of Vice-Mayor Newman, Councilwoman Manheimer and Councilman Smith agreed to the friendly amendment to include the notification requirements as outlined above by Ms. Tuch.

Mayor Bellamy said that this concept did originate out of the Mayor's Affordable Housing Task Force and she is a strong supporter of affordable housing. However, she believes in public input because they provide Council with valuable information that sometimes Council doesn't think of. If there is an outstanding project, it should stand in the midst of community review. She felt we should have density bonuses but not as a use by right at this time. She felt this is a good policy but felt we should do it in smaller steps to gain community support. She felt we could proceed with this ordinance with projects downtown, but not in our neighborhoods.

Councilman Davis moved to call the question. This motion was seconded by Councilman Russell and carried unanimously.

The amended motion made by Councilwoman Manheimer and seconded by Councilman Smith carried on a 4-3 vote, with Mayor Bellamy, Councilman Bothwell and Councilman Davis voting "no."

City Attorney Oast said that due to the vote, this ordinance will need to come back to Council at their next meeting for a second reading.

ORDINANCE BOOK NO. 26 – PAGE 317

Closed Session

At 7:18 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the

properties are (1) Eagle Street and (2) Shelburne Road. The statutory authorization is contained in G.S. 143-318.11(a)(5); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is contained in G.S. 143-318.11(a)(3); and (3)) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Davis and carried unanimously.

At 7:45 p.m., Councilman Russell moved to come out of closed session. This motion was seconded by Councilwoman Manheimer and carried unanimously.

ANNEXATION PUBLIC HEARINGS

Urban Planner Blake Esselstyn said that this is the consideration of public hearings to obtain comment on the following two annexation areas: Coopers Hawk area and the Royal Pines area.

On July 27, 2010, the Asheville City Council passed Resolutions of Intent beginning the annexation process for the Coopers Hawk Drive and Royal Pines areas. The Annexation Services Plan for these areas was approved on August 10, 2010, and a public information meeting was held on September 13, 2010. Approximately 95 persons attended this meeting. The meeting consisted of a video presentation defining annexation in general and providing a description of the proposed annexation areas and how each meets the standards required for annexation by the State of North Carolina. The video also detailed the specific services that the City would provide to the proposed annexation areas and outlined the financing and revenue sections of the services plan. Staff members from various City of Asheville departments were on hand at the meeting to respond to questions about proposed services.

Prior to the public hearing, staff will make a brief presentation concerning each area; the Mayor should then open the public hearing for each area. As part of the presentation for the Royal Pines Area, Cathy Ball, Public Works Director, will provide Council with information concerning corrections to the approved Plan for Services. Council should hear from the public separately on each area, and the order of comments should be (1) residents of the defined area and residents of the City; (2) and then any other commentators. The staff will bring forward annexation ordinances for Council consideration at the October 26, 2010 meeting. The proposed effective date for these annexations is June 30, 2011.

Pros:

- Supports the City of Asheville's Smart Growth Annexation Program (regular program of annexations) as set forth in the City's 2025 Plan.
- Provides for an urban level of service for developed and developing areas adjacent to the existing city limits and includes those benefitting from existing City services in participation in the costs of such services.

Cons:

- There are mixed reactions from residents of proposed annexation areas, including objections for financial and other reasons.
- Phasing in services to achieve the service plans will involve skillful organization and management.

The fiscal impact of these annexations is contained in detail on pages 29-35 of the Plan for Services. General fund impact is enumerated on pages 33 and 34.

Staff will make a brief presentation concerning the annexation areas and the Mayor should then open the public hearing for the area. Council should hear from the public separately on each area. The staff will bring forward annexation ordinances for Council consideration at the October 26, 2010, meeting.

PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE AREA COOPERS HAWK AREA

Mayor Bellamy opened the public hearing at 7:50 p.m.

Urban Planner Blake Esselstyn said that this is the public hearing to consider the annexation of the Coopers Hawk area. This public hearing was advertised on September 3 and 10, 2010.

He then made a brief presentation concerning the Services Plan for the Coopers Hawk area – (a) 31 parcels (or portions of parcels); (b) 41.8 acres; (c) 16 dwellings; (d) approximately 35 people); (e) residential land use; and (f) meets development test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

The following individuals spoke against the annexation of the Coopers Hawk area for various reasons, some being, but are not limited to: there will be no reductions in homeowners insurance premiums; there is no subsidy of water delivery to remote customers by Asheville citizens; there will be a slower fire response due to increased travel distance; they are losing a higher degree of emergency response; there is no better refuse service for new residents; certain areas will not receive trash collection; their taxes will increase by 57%; they already receive and pay for water and sewer services at the same rates as City residents; Asheville should not use annexation as a means to meet current budget problems; the City should manage the capital and operating budgets prudently; annexation public hearings should be scheduled separately so as not to have to have a long wait for their item to appear before Council; City should not forcibly annex; request for moratorium on forced annexation; and people are already financially unstable:

Mr. Mike Parentice, resident of Coopers Hawk Drive
Ms. Betty Jackson, Buncombe County resident
Mr. Alan Ditmore, Buncombe County resident
Ms. Nancy Grace, friend for resident in Coopers Hawk

At 8:10 p.m., Mayor Bellamy closed the public hearing.

Mayor Bellamy said that annexations are set by statutes and there is not a lot of flexibility in setting dates.

Mayor Bellamy said that consideration of the ordinance to annex the Coopers Hawk area will be held on October 26, 2010, which is also set statutorily as well.

PUBLIC HEARING TO CONSIDER THE ANNEXATION OF THE ROYAL PINES AREA

MOTION TO WITHDRAW FROM THE CURRENT PLANS FOR ANNEXATION OF THE ROYAL PINES AREA

Mayor Bellamy opened the public hearing at 8:12 p.m.

Urban Planner Blake Esselstyn said that this is the public hearing to consider the annexation of the Royal Pines area. This public hearing was advertised on September 3 and 10, 2010.

He then made a brief presentation concerning the Services Plan for the Royal Pines area – Royal Pines area (a) 682 people; (b) 388.7 acres; (c) 670 dwellings; (d) approximately 1,595 people; (e) residential land use; and (f) meets population density test, subdivision test and development test.

City Attorney Oast said that the City Clerk is required to perform certain functions under N.C. Gen. Stat. sec. 160A-49 with respect to notification of property owners, investigation of tax listings, filing of plans, delivery of certain information to the Buncombe County Board of Commissioners, etc. In addition, she has notified volunteer fire departments and solid waste haulers in the affected area. City Clerk Burleson and Urban Planner Blake Esselstyn have provided that certification for this area.

Public Works Director Cathy Ball clarified some inconsistencies in the Plan for Services for the Royal Pines area. In the initial Plan for Services there was some indication that we would not be providing solid waste collection or street maintenance on some of these streets. After further review, staff went back and re-looked at those areas. There are only two streets that we would not propose to do solid waste pick-up on unless the owners of the property are willing to sign an agreement, because the right-of-way does not exist for us to be able to access the property. The Plan for Services will be amended. In addition, we have sent 145 letters to all the affected property owners last week that are impacted by this change. There is no change in the cost of the Plan for Services as a result of this clarification.

The following individuals spoke against the annexation of the Royal Pines area for various reasons, some being, but are not limited to: the area will no longer contain affordable housing; additional taxes will place a financial burden on the already financially-strapped residents; don't balance the City's budget by annexing people; people can't find jobs and will not be able to pay the increase in taxes; don't annex due to current economic conditions; people in area are living in poverty or just above poverty levels; don't impose new local taxes because federal and state taxes will probably also rise; area has a lot of elderly on fixed, low and continually declining incomes; the law allows annexation, but it's not the right thing to do; this is taxation without representation; wait to consider annexation until economic times improve; City needs to take care of their current City residents before annexing more; street light burns day and night at the corner of Battery Park Avenue and Wall Street and residents don't want to have to pay for that waste; annexing some streets in the area will kill the ability for others to sell their homes; it's unfair to make some residents in the area pay City and County taxes and people on the other side of the road do not; some residents will not receive solid waste collection; annexing will cause a substantial hardship on residents; annexation is a violation of individual rights; not annexing the entire area will cause service delivery problems; will the City provide sewer service to each home; will streets be brought up to City standards; annexation will not benefit the area residents;

Ms. Deryn Blackmon, resident on Cedar Lane
Ms. Belle Reina, resident on Royal Pines Drive (presented petition "We, the citizens of Royal Pines, Arden, North Carolina, who live within the boundaries set forth in Buncombe County, stand in opposition of the proposed annexation" with over 650 names)
Mr. Mike Hinman, resident on Rathfarham
Ms. Diane LeBeau, resident on Fox Hollow Court
Mr. Tim Navaille, resident on Walnut Street
Mr. Charles Lewis, resident on Appian Way

Mr. Robert Cheek, resident on Chestnut Place
Ms. Amy Churchill, resident on Spring Cove Court
Ms. Joanne Watson, resident on Weston Road
Mr. Gerald Mozian, resident on Tree Top Drive
Mr. A.B. Wexler, resident on Pinehurst Circle
Ms. Jane Bilello, representing the Asheville Tea Party
Mr. Wilson Davis, resident on Sycamore Drive
Mr. Tim Moffitt, resident on Sweeten Creek Road
Mr. Hugh Murphy, resident on Locust Court
Ms. Michelle Rippon, resident on Rippon Court
Ms. Linda Murphy, resident on Locust Court (read letter from Patty Dalton who was unable to attend the public hearing)
Ms. Agnes Cheek, resident on Appian Way
Ms. Lisa Fruchtman, resident on Fox Hollow Court
Ms. Nichol Hazzard, resident on Royal Pines Drive
Mr. Rocky Hollifield, resident on Cedar Lane
Mr. Larry Carter, Acting Secretary for the Rosscraggon Wood sanctuary on Sweeten Creek Road
Mr. Andrew Euston, resident on Weston Road

Mayor Bellamy closed the public hearing at 9:40 p.m.

City staff responded to various questions/comments from Council, some being, but are not limited to: which roads are private and which roads will the City take over for maintenance; explain the street maintenance repair schedule; what is the City's procedure in extending sewer lines; are there any water line extensions planned for this area; what is the criteria for areas to be considered for annexation; since the City is not annexing all of the properties in the Royal Pines area, will there be confusion regarding service delivery and if not, why; explanation of the reasoning behind the boundaries in the Royal Pines annexation area; and if the area was annexed how, could the annexation take effect five years from now.

Councilman Russell moved that we withdraw from the Coopers Hawk annexation area and the Royal Pines annexation area and impose a 12-24 month moratorium on annexation plans and policies, which would allow the City to get a grasp on their own finances and give the people an opportunity to get back on their feet.

When Councilwoman Manheimer asked if the motion would be for a 12 month moratorium, she said that she would second it. Therefore, Councilman Russell amended his motion (keeping the withdrawal of the two annexation areas) that there be a 12-month moratorium on annexation plans. Councilwoman Manheimer then seconded the motion.

When Vice-Mayor Newman questioned if a motion is in order at this meeting, City Attorney Oast said that although a vote is scheduled in two week, he felt that Council can direct staff to cease pursuing the annexations thereby stopping the process. He felt Council has the authority to consider the motion at this meeting, but if it turns out that Council can't he will advise them and schedule the vote for October 26.

Councilwoman Manheimer explained that she is not interested in placing a moratorium on all annexations, but she is interested in ceasing the process on this one area. She believed there are better annexations for the City to pursue, other than these two areas.

When Vice-Mayor Newman clarified that the motion that the withdrawal was for both annexation areas, Councilman Russell said that he would be willing to amend his motion to withdraw just the Royal Pines annexation area.

Councilman Davis explained why he supported withdrawing from the Royal Pines annexation area.

Councilman Russell clarified his motion to withdraw the current plans for annexation of the Royal Pines area. This motion was seconded by Councilwoman Manheimer.

Vice-Mayor Newman doesn't agree with any of the concerns or sentiments expressed, but from a City Council standpoint this is probably the toughest issue we are charged with. The implicit opposition of people to go through an annexation is understandable. The state does goes through a democratic process to set the annexation process, so he disagrees to some extent that people do not have a voice in it. However, at a local level it feels that way. In every other city around the state when areas received city water services, they are basically automatically incorporated in to the City. That is how most cities grow. Involuntary annexations happen in other parts of the State, but they are relatively rare. However, in Asheville, that process has not been used. Asheville has been urbanized, but the City limits have stayed relatively fixed for a long period of time. The City of Asheville has had by far the least annexation of any city in North Carolina over the last two-three decades. In the long-run he does not believe it is a tenable position for the City to say that we are not going to grow. He felt the City will have to do some annexations and he doesn't enjoy it, but he feels it's the right thing for the City and the right thing for the region as well. He felt that City Council needs to have a focused discussion on what our approach is on annexations and give some type of clarity to City staff. We are all aware of the financial dynamics that we are in and that the costs and services on our City are growing every year but our revenue base to support them are not.

Mayor Bellamy agreed that Council needs to re-visit our annexation policy via a worksession and provide City staff direction. The next round of annexations are scheduled to begin in January and it would be good to give staff direction on whether to proceed with that schedule or not.

Councilman Bothwell noted that he received a letter from the community association in Coopers Hawk stating that some percentage of people want to be annexed. He still believes there are good reasons for the City to annex. However, it's clear that there are a lot of affordable housing in this community, and for us to give tax incentives for builders to create affordable housing and then turn around and raise taxes for people who have affordable housing is not logical.

Councilman Smith felt that if we had more choices to grow the City, we would not use annexation. He urged the community to contact their state legislators to provide Asheville more tools to grow their City. We are stuck with a litany of bad choices in order to maintain the infrastructure in the City. He explained that cities create wealth. Eighty-three percent of North Carolina's gross domestic product is created in urban centers. That money fans out across the State to be a part of all our lives, whether we live in those urban centers or not. It's important to acknowledge that we have to maintain those urban infrastructures if we are going to keep those economic engines. That is one of the reasons why cities are important. Asheville is unique because we have well over one million tourists come into our city every year. Asheville takes more calls for emergency services per capita than any other city in North Carolina. We have 178 calls for emergency service for every 1,000 residents. The City of Charlotte receives 126 calls per 1,000 people. We have an enormous responsibility to take care of people that don't live here. The money from hotel and motel taxes does not come into the City. It goes to the Buncombe County Tourism Development Authority, which does a great job marketing to get more tourists here. However, if we have some of the same tools as other cities in North Carolina we would have a percent or two of those taxes to be able to maintain the infrastructure used by people visiting the City. We have 40,000 people who daily come into work into Asheville. Buncombe County grew by about 150,000 residents between 1950 and 2000. The City of Asheville grew by about 16,000. The City of Asheville creates about 75% of the sales taxes for Buncombe County and we are returned about 19.6% of those sales taxes. We do have a lot of infrastructure

responsibilities to maintain. He understood that people that live outside the City's limits don't want that to be their responsibility, but City Council has the responsibility to figure out a way to keep up that infrastructure. Council cut over $6 Million from the budget in the last two years and they are belt-tightening. We provide water for customers across Buncombe County and we should be able to charge what it costs to do that. There are rules that prohibit us from doing that – uniquely to Asheville. He felt if we had some occupancy tax, or some more flexibility regarding our water system and more of our sales tax returned to us, we wouldn't have to annex.

Vice-Mayor Newman said that there are other ideas to change the rules regarding annexation, such as instituting a policy for areas involuntarily annexed that their taxes do not automatically go up to the full amount that would be paid under city taxes, but phased in over a period of time. City Council will be discussing their legislative agenda soon and he supported the idea of encouraging our legislators to support that idea. He was not sure that that middle class neighborhoods not be considered for annexation was the right thing to do for the City. If we take that tool out, then it leaves the City with few options to address long-term financial realities

Councilman Russell moved to call the question. This motion was seconded by Councilman Davis and carried unanimously.

The motion made and seconded by Councilman Russell to withdraw the current plans for annexation of the Royal Pines area carried on a 5-2 vote, with Vice-Mayor Newman and Councilman Smith voting "no."

Mayor Bellamy said that she would schedule a worksession regarding the City's annexation policy.

At 10:18 p.m., Mayor Bellamy announced a short recess.

V. UNFINISHED BUSINESS:

A. MOTION TO REQUIRE METER ACTIVATION BY ALL ON-STREET PARKING SPACE USES IN CONJUNCTION WITH OPTIONS FOR HANDICAPPED DOWNTOWN RESIDENTS TO PARK DOWNTOWN

City Attorney Oast said that this is the consideration of options for addressing handicapped parking issues in downtown Asheville.

Earlier this year, staff began reviewing the City's policies and practices regarding parking by vehicles displaying handicapped placards or license tags (herein "handicapped vehicles") in downtown Asheville. That review has disclosed that this is an issue with many different aspects, and differing points of view, and that addressing it will involve consideration of multiple options. This report covers only regular parking spaces, which are available for use by any vehicle, including handicapped vehicles. It does not cover designated or restricted handicapped spaces. This report also does not cover abuses and improper usage of handicapped placards. The determination of a handicap condition and the issuance of placards is done by State agencies, based on medical information.

I. Issue: Handicapped vehicles have been observed parking in on-street metered parking spaces for long periods of time - - sometimes days and weeks - - without activating the parking meters. Anecdotal information suggests that, at any given time, approximately 10 percent of the 740 metered spaces in downtown Asheville are occupied by handicapped vehicles. This use is concentrated in the northwest quadrant of downtown where there is a high concentration of downtown residents, and where business activity in downtown, including the Grove Arcade, has been growing in recent years. However, the issue is not confined to this area, and the phenomenon occurs throughout downtown.

II. Law: The law regarding handicapped parking is summarized in his Staff Report of July 27, 2010. In essence, the law allows handicapped vehicles to park in a time-limited on-street parking space for an unlimited time. If that space is a metered space, however, the law does not expressly relieve the handicapped vehicle from the requirement of activating the meter. The law is not clear, however, and there have been conflicting interpretations of it. The practice in Asheville has been to allow handicapped vehicles to park in on-street spaces, but not to require activation of the meters. Other cities in North Carolina have followed a similar practice but some, notably Raleigh and Charlotte, require that handicapped vehicles pay to occupy the space, whether by activating a meter or by inserting money in a central "pay station."

Even though maximum times have been established for parking in downtown, ranging from 30 minutes in some areas to three hours in others, this maximum limit is not well understood and has not been consistently enforced. The purpose of having time-limited spaces (metered or not) is to ensure regular turnover of the spaces, making them available for use by transitory parkers, who may only need a short time to conduct their business. Metering is a way to keep track of the time, and to generate revenue to defray the cost of administering and enforcing traffic and parking regulations. Vehicles not displaying handicapped placards are allowed to remain in a parking space for as long as the meter is activated. While revenue is generated by such use, however, a space occupied in this way is just as unavailable for on-street parking by transitory users as a space occupied by a handicapped vehicle that does not activate the meter.

The City's zoning ordinances play a part in this equation. In most areas of the City, any development projects (even single family homes) need to provide sufficient off-street parking to accommodate their anticipated uses. For developments in or (for residential uses) near downtown, however, there is no requirement that off-street parking be provided. There are several reasons for this, including (a) that the urban pattern of development (lot line to lot line) does not allow for off-street parking; (b) parking is available in the decks; (c) it encourages in-fill development and increased density, and (d) facilitates alternate modes of transportation. Despite there being no requirement for off-street parking, however, many newer developments have supplied their own parking for their building occupants.

III. Observations. These policies, practices and ordinances have combined to produce several effects:

(a) Handicapped persons who live in downtown, especially those in assisted housing who are on fixed incomes, have come to depend on the availability of free on-street parking. Similarly, handicapped individuals who visit downtown for various services (legal, medical, etc.) some times need to leave their vehicles for several hours. For individuals with handicaps, mobility is frequently an issue, and parking on the decks presents practical problems. While many handicapped individuals are willing to and can afford to activate the meters, getting back and forth to the meters is difficult and time consuming. Some individuals have dexterity challenges, and depositing a coin or token in a meter is difficult for them.

(b) Extended use of on-street parking - - on-street vehicle storage - - makes the space unavailable for businesses that depend on frequent turnover of spaces to generate business traffic.

(c) Occupancy of an on-street space by a non-handicapped vehicle for long periods of time, even if a meter is activated, reduces turnover and makes the space unavailable for transitory use.

(d) The City loses some parking revenue when a space is occupied for long periods by vehicles that do not pay. This amount is difficult to ascertain, but has been estimated at more than $100,000 per year.

(e) Equipment and methods are available to enable handicapped vehicles to pay for extended periods of parking at metered spaces, but the equipment is expensive.

(f) A review of parking ordinances for other North Carolina cities reveals that Asheville's ordinances, while adequate, are not nearly as detailed as ordinances from other cities, which regulate more aspects of parking, such as the practice of "meter feeding," and include detailed parking schedules that are reviewed and revised regularly.

IV. Process: In reviewing this matter, my office has worked with the Transportation and Engineering Department. That process has included: (a) Several meetings and conversations with business owners, including the Asheville Downtown Association. The issue was also taken up at a meeting of the Mayor's Task Force for Persons with Disabilities. The Downtown Commission has reviewed this matter on several occasions, and Council has received an update; (b) Review of the applicable law, including State law, the Americans with Disabilities Act, and City Codes. This included a review of practices in other cities in North Carolina; (3) Exploring options for addressing the issue, including requiring meter activation in all cases, establishing zones where handicapped vehicles may park without activating the meter, making City-issued handicapped placards available for a fee, clarifying ordinances, setting aside spaces in decks and surface parking lots, and working with the operators of downtown residential facilities.

V. Options: Our research and review has revealed several options for addressing the issue. They are listed below, along with some considerations associated with the implementation of each.

a. Require meter activation by all on-street metered parking space users.

- This would require handicapped vehicles to pay for parking at the same rate as other vehicles, or to locate off-street or non-metered parking.
- There would be some hardship - - financial and mobility - - on those low/fixed income handicapped individuals who have come to depend on the availability of this parking.

b. Enforce time-limited parking as to all.

- This should be done in any case, but especially if meter activation by handicapped vehicles will be required.
- Will ensure more turn-over in on-street spaces, and more availability for transitory parking.
- Will require the posting of clear information as to applicable time limits.
- Should involve some review of parking patterns in downtown, and adjustments to the parking schedule, as needed.

c. Establish times every day during which no on-street parking is available (for instance, 2:00 a.m. to 5:00 a.m.). This is done in larger cities to allow for trash collection, street cleaning, and snow removal, and to ensure that vehicles are not stored on the street.

- This ensures that streets are not used for vehicle storage.
- Disruptive to vehicle owners who need on-street parking at those times.

d. Make City-issued handicapped parking placards available (at a cost) for handicapped residents downtown.

- Cost could approximate parking in decks, or on-street
- This would generate some revenue.
- This would address the mobility and dexterity issues experienced by some handicapped individuals.
- This would obviate requirement to deposit coin or token in parking meter.

e. Establish areas or zones on the periphery of downtown where handicapped vehicles may park in metered spaces without activating the meters.

- Areas would be "non-exclusive" - - anyone could park there, but handicapped vehicles would not have to activate the meter.
- Require meter activation everywhere else.
- Could be used in combination with handicapped parking placard described in Paragraph 4 above.

f. Make reduced cost spaces available on the tops of the parking decks or in surface parking.

- This may be impractical for some handicapped individuals with mobility challenges.
- There are not many spaces available.

g. Ensure availability and convenience of adequate designated handicapped spaces.

- May require metering of spaces.
- May require more action enforcement.

h. Work with the owners/managers of downtown residential facilities to assist in providing off-street parking.

- This would likely be an added cost for the facilities.
- This would allow exploration of non-public parking options.

VI. Public education: Any one or any combination of these options should include substantial efforts to educate the public, including businesses and handicapped vehicle operators, as to the new policies and practices. There are several resources available for doing this, including the owner/operators of the residential facilities, community organizations, warning tickets, etc.

VII. Timing for Implementation. Some of these options can be implemented almost immediately. These include a requirement for all users to activate meters, and enforcement of time limits for non-handicapped vehicles. If this is the policy direction of Council, it is recommended that there be a phase-in period so that affected parties and groups can be notified.

Some of these options will take a short time (30 to 45 days) for implementation. These include establishing non-exclusive on-street handicapped vehicle zones, and identifying the availability of spaces in the parking decks and surface lots.

Some options will take longer. These include implementation of a City of Asheville handicapped parking placard program, and reviewing and revising (if necessary) the parking schedules.

VIII. Summary and next steps. No one of these options is likely to address the issue completely, but a combination of some or all of them is likely to have some effect. There are many competing interests involved in this issue; no one group will be completely satisfied with any particular policy directive, but Council may continue making adjustments as needs dictate. Our review and suggestion of options has been with the following goals in mind.

a. Ensuring regular turnover in on-street parking spaces, making them available for transitory parking.

b. Making on-street parking available - - at a cost - - for those handicapped individuals (including downtown residents) who really need it, but not allow for on-street vehicle storage.

c. Increasing utilization of off-street parking.

d. Regular review and consistent enforcement and application of City parking ordinances.

e. Generation of some revenue to defray administrative costs.

The ordinance structure already exists to implement some of the options listed above. Depending on Council's policy direction, staff can quickly come back with more detailed implementation information.

Mayor Bellamy said that regardless of which option(s) Council chooses to implement, staff will need to develop an education package and work to see how the option(s) can be implemented in coordination with each one.

In response to Councilman Bothwell, Transportation Director Ken Putnam said that the monthly parking rate at the Civic Center Parking Garage is $70 a month and Vanderbilt Apartment residents are offered a monthly rate of $35 a month. Mayor Bellamy was interested in seeing how many Vanderbilt Apartment residents take advantage of the reduced offer in the deck.

Councilman Bothwell said that it appears that Battery Park residents are the parkers who are most affected. He asked if there has been any discussion with the management of the Basilica parking lot. Mr. Putnam responded that the City has not made contact with the property managers for Battery Park or the Basilica. He noted the Battery Park Apartments do have their own lot across the street from Haywood Street tucked in between a couple lots owned by the Church.

Mayor Bellamy said that the surface lot next to the Flying Flog that the City owns is technically just as close to Battery Park as the on-street parking is that they are currently utilizing. Mr. Putnam said that there are several monthly parkers in that lot but that is a City surface lot.

Mayor Bellamy was interested in looking at a permit only section on O.Henry Avenue (close to the AT&T lot) for Battery Park residents, similar to what we do on Woodfin Street. That would provide some additional guarantee of parking for residents of the Battery Park Apartments,

as well as some revenue for the City. She did talk to some Battery Park residents that supported that idea in that it would meet their needs.

Mr. Putnam said that there is also a permit-only section on Grove Street. The City works with the management of the residential unit and they determine how many spaces they need and it's up to them to hand it out to their residents.

Vice-Mayor Newman pointed out that we don't want to use high demand on-street parking for long-term car storage. He felt that some of those spaces on O.Henry would have heavy turnover.

Mayor Bellamy felt that in order to address the needs, there needs to be a combination of options. She suggested we look at all the options for a good package. In addition, she felt there should be additional accessible parking spaces in our decks for those who are handicapped.

In response to Councilman Russell, Mr. Putnam said that handicapped spaces in the parking decks are not a problem and we do follow the Building Code requirements. He said that the City does have the appropriate designated handicapped spaces close to the door. He said that he would look at creating more spaces in those areas. He noted that the Civic Center Parking Garage does not fill up on a day-to-day basis. The difference is if you park in the deck, they will have to pay to get out. There is no distinction made between someone who may have used a handicapped parking space inside the deck.

Councilman Smith was interested in reduced rates, if not in the parking garages then on the surface lot next to the Flying Frog, if it is currently available. If someone in the future ends up owning that lot, he hoped we could continue to work with them to continue that sort of parking for people in the Battery Park Apartments. He does not support long-term car storage at metered spaces, but around the high traffic business area we need to provide some parking proximity. He hoped to be able to use the existing parking meter enforcement personnel to make this work. He suggested staff consider a seasonal parking plan, e.g., January-March when sidewalks would be icy people could park closer to their homes.

Councilman Davis supported meter activation by all on-street metered parking space users. He felt that option was equitable. It is important, however, to look for alternative spaces for those Battery Park residents, but he noted that there are other handicapped parkers around town who use metered parking spaces for long-term storage as well. All parking spaces are valuable to the merchants and residents and they should not be used as storage. He did want to make sure that there are adequate handicapped spaces.

Councilman Russell agreed with Councilman Davis.

Councilwoman Manheimer moved to require meter activation by all on-street parking space users (option a). This motion was seconded by Councilman Russell.

In response to Councilman Russell, City Attorney Oast suggested a 30-day period to begin implementation as he understands that the merchants are anxious to have the parking available during the holidays.

Councilman Smith offered a friendly amendment to not begin implementation until we also have a deck or surface lot solution for disabled residents. Mayor Bellamy suggested we postpone taking action on this friendly amendment until all the options have been discussed.

Councilman Manheimer and Councilman Russell re-stated their motion to require meter activation by all on-street parking space users (option a) no sooner than 30 days of its adoption.

Vice-Mayor Newman offered a friendly amendment that option (a) be implemented with some combination of option (e) (establish areas or zones on the periphery of downtown where handicapped vehicles may park in metered spaces without activating the meters) and option (f) (make reduced cost spaces available on the tops of the parking decks or in surface parking). Councilwoman Manheimer and Councilman Russell accepted the friendly amendment.

Mayor Bellamy suggested that Council also consider, in combination with the other options (a), (e) & (f), option (d) (make City-issued handicapped parking placards available at no cost for handicapped residents downtown).

Councilman Russell felt that option (a) is pretty simple instructions and suggested we have staff work on the other options and report back to Council.

Mayor Bellamy felt that option (a) focuses on meeting the needs of the merchants and not really meeting the needs of the handicapped. She just wanted to make sure that we have places for the disabled to park.

Councilman Russell felt the property managers need to take a lead on this since this is their property and their residents. He felt the City should with the property managers on solutions.

Mayor Bellamy felt there is a conflict in our policies, in that, we have a policy of no required parking for residential developments in our Central Business District, and now we have a policy about how we are handling people with disabilities who have a handicapped placard. She felt we need to offer solutions to people who have disabilities that live downtown full-time and can't afford the current monthly rates for our parking decks.

In response to Councilwoman Manheimer, City Attorney Oast explained option (d). He said that in order to address the issue of some people who have mobility or dexterity challenges and can't go back and forth to feed a meter, which they are allowed to park at all day as long as they activate the meter, you could have a City-issued placard for downtown residents that would come at a cost, which would allow them to park on the street in a metered space.

Councilwoman Manheimer withdrew her motion.

Councilwoman Manheimer then moved to require meter activation by all on-street parking space users no sooner than 30 days of its adoption; and to allow a City-issued handicapped parking placard be issued, pursuant to an application, to downtown handicapped residents to park in parking decks at a less than full rate; and to include the establishment of areas or zones on the periphery of downtown where handicapped vehicles may park in metered spaces without activating the meters. This motion was seconded by Vice-Mayor Newman.

Mr. Clarence Gray, resident of Battery Park Apartments, said that the Battery Park is the only building that has zero parking facilities that you don't have to pay for. There is a parking meter every ten feet. We have one street that doesn't have meters on it and it has no parking signs on it. We surveyed our building and talked to 80% of our residents - 49% of the residents have vehicles, 43% are disabled, 37 have handicapped placards, and 33 said they need to park close to the building. For many of the handicapped residents they cannot walk to the Civic Center Parking Garage. He said that all of the Battery Park vehicles have their sticker in their vehicle window. When the lease is signed and you have a vehicle, you get a sticker. He said there are 7-9 vehicles that are Battery Park residents who park on the streets.

Ms. Shirley Early, resident of Battery Park Apartments, said that she is in a wheelchair most of the time and cannot walk to and from the Civic Center Parking Deck. The Apartments have too many cars and not enough spaces allotted for them. People will have no choice but to move from Battery Park if they cannot park their vehicles close-by. She felt that a lot of the

spaces are taken up by people who work in the vicinity of Battery Park and feed the meter all day long.

Ms. Holly Stiles, staff attorney representing the Disability Rights of North Carolina, said that Disability Rights of North Carolina did an accessibility survey on August 18, 2010, of the Wall Street, Rankin Avenue and Civic Center Parking Decks and none of the City decks currently meet Americans with Disabilities Act guidelines.

Ms. Rose Logan Weaver Walker, resident of Battery Park Apartments, urged Council to provide parking for the Battery Park residents as they cannot move their car every hour or two.

Ms. Raelin Hanson gave a brief history of the Battery Park Apartments and felt that now since the Grove Arcade has been renovated they want the residents gone. She hoped Council would proceed with the surface lot next to the Flying Frog option and presented Council with some sketches of how to use that lot. She felt this would address the issue of parking for handicapped downtown residents and also address additional green space downtown.

Mr. Joe Minicozzi, Executive Director of the Asheville Downtown Association, said that this conversation stated approximately 4 years ago. They performed a study and found that 10% of cars are being stored on the downtown streets, which represent approximately $160,000 in lost revenue. He said this is not just about the Battery Park Apartments, but in several areas throughout downtown. He asked that if the City chooses the City-issued placard system, that they find a way to close the door on abuse. He urged City Council to move forward on option (a) as recommended by the Downtown Commission.

Mr. Bill Griffin, representing the Grove Arcade Merchants Association, explained that they have tried to be a good neighbor (as does the Battery Park Apartment residents) but the parking issue around the Grove Arcade is important to everyone. Downtown merchants have had a rough time during the past two years and every shopper that they can get to downtown, they want them to have an opportunity to park and shop. They asked Council to find a solution that would both free up spaces on the street for short-term metered parking, while at the same time finding adequate parking for the residents of Battery Park and Vanderbilt Apartment residents and others with handicapped placards downtown.

Ms. Karen Harrington, Chair of the Mayor's Committee for Citizens with Disabilities, thanked Council for inviting them to be a part of this discussion regarding handicapped parking in downtown Asheville. She felt it was a very passionate subject for both sides and trusted Council will do the fair thing for both sides.

After a short discussion, Mr. Putnam said that he would work toward bringing a report to Council within 30 days of how he will implement meter activation by all on-street parking space users no sooner than 30 days of its adoption, in conjunction with allowing a City-issued handicapped parking placard be issued, pursuant to an application, to downtown handicapped residents to park in parking decks at a less than full rate; and including the establishment of areas or zones on the periphery of downtown where handicapped vehicles may park in metered spaces without activating the meters

The motion made by Councilwoman Manheimer and seconded by Vice-Mayor Newman carried unanimously.

VI. NEW BUSINESS:

A. BOARDS & COMMISSIONS

RESOLUTION NO. 10-221 – RESOLUTION APPOINTING AN ALTERNATE MEMBER TO THE BOARD OF ADJUSTMENT

The following individuals applied for a vacancy (Alternate) on the Board of Adjustment: Diane Meek, Jeffory Quick, Eugene Britton, Bill Branyon, Richard Fort, Eric Rainey, Nelda Holder and Ron King

Vice-Mayor Newman said that the Boards & Commissions Committee recommended appointing Richard Fort.

Vice-Mayor Newman then moved to appoint Richard Fort to serve the unexpired term of Kristy Carter, term to expire January 21, 2013, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 229

RESOLUTION NO. 10-222 – RESOLUTION APPOINTING MEMBERS TO THE HOMELESS INITIATIVE ADVISORY COMMITTEE

The following individuals applied for vacancies on the Homeless Initiative Advisory Committee: Allison Browne, Jeff Paul, Christopher Winebrenner and Laura McIlvanie.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Scott Rogers, David Nash and Gerald Hixson. Since Mr. Rogers' attendance was below the 75% attendance requirement, it was the consensus of the Committee that in the reappointment letter that Mr. Rogers be made aware of the attendance requirements. In addition, City Clerk Burleson was instructed to write a letter to Chairman Nash to explain that Mr. Rogers' attendance will be reviewed in one year to see if his attendance increases and if not, City Council will consider replacement.

At Mayor Bellamy's suggestion, it was the consensus of Council to include in Mr. Rogers' reappointment letter that since his organization's involvement with the Committee is so valuable if he is unable to attend a meeting that he send a proxy.

Councilman Smith then moved to reappoint Scott Rogers, David Nash and Gerald Hixson to each serve a three-year term respectively, terms to expire November 1, 2013, or until their successors have been appointed. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 230

RESOLUTION NO. 10-223 - RESOLUTION APPOINTING A MEMBER TO THE PUBLIC ART BOARD

The following individuals applied for a vacancy on the Public Art Board: Shad Marsh, Kathleen Lyons, Jeanna Maines, William Meller and Nancy Sokolove.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended appointing Nancy Sokolove.

Councilwoman Manheimer then moved to appoint Nancy Sokolove to serve an three-year term, term to expire June 30, 2014, or until her successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 231

RESOLUTION NO. 10-224 - RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

The following individuals applied for vacancies on the River District Design Review Committee: Philip A. Ellis, Michael McDonough, Stuart Smith and Darren Green.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Marty Black (owner of property within the River District) and re-advertising for the second vacancy of an owner of property within the River District.

Councilwoman Manheimer moved to (1) reappoint Marty Black (owner of property within the River District) to serve an three-year term, term to expire September 1, 2013, or until his successor has been appointed; and (2) re-advertise for the second vacancy of an owner of property within the River District. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 232

RESOLUTION NO. 10-225 – RESOLUTION APPOINTING A MEMBER TO THE SOIL EROSION/STORMWATER REVIEW COMMITTEE

The following candidate applied for the positions on the Soil Erosion/Stormwater Review Committee: Ter MC Spinner.

Vice-Mayor Newman said that it was the recommendation of the Boards & Commissions Committee to appoint Ter MC Spinner (City resident or an individual who resides in the extra-territorial jurisdiction area)

Councilman Russell moved to appoint Ter MC Spinner (as a City resident or individual who resides in the extra-territorial jurisdiction area) to serve a three-year term, term to expire November 1, 2013, or until her successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 233

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

The following claims were received by the City of Asheville during the period of September 17-30, 2010: Frontier (Water), Mary Avery (Streets), Eric Edwards (Water), Steve Brown (Parks & Recreation), Pinecliff Condos (Water), Progress Energy (Water), Cody D. Moliterno (Police), Robert D. Gaddy (Police), Tom Reynolds (Streets) and Georgia Miles (Parking Services). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:28 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – October 26, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer (arrived in meeting at 5:47 p.m.); Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Miss North Carolina Kristian Tobias led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Newman gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING NOVEMBER 2010 AS "ADOPTION AWARENESS MONTH"

Vice-Mayor Newman read the proclamation proclaiming November, 2010, as "Adoption Awareness Month" in the City of Asheville. He presented the proclamation to Ms. Tara Foster, who briefed City Council on some activities taking place during the month

B. PROCLAMATION PROCLAIMING NOVEMBER 6, 2010 AS "AIDS AWARENESS WALK 2010 DAY"

Mayor Bellamy read the proclamation proclaiming November 6, 2010, as "AIDS Awareness Walk 2010 Day" in the City of Asheville. She presented the proclamation to Ms. Peggy Weil, Advocacy Coordinator for WNC AIDS Project and Kristian Tobias, Miss North Carolina International, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF CAPITAL IMPROVEMENT PLAN WORKSESSION HELD ON OCTOBER 8, 2010; AND THE REGULAR MEETING HELD ON OCTOBER 26, 2010

B. RESOLUTION NO. 10-226 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER WITH CORT ARCHITECTURAL GROUP, P.A., FOR THE CIVIC CENTER ROOF REPLACEMENT

Summary: The consideration of a resolution authorizing the City Manager to execute a change order with Cort Architectural Group, PA, for the Civic Center Roof Replacement in the amount of $91,512.43 for a total contract amount of $223,611.43.

On July 22, 2008, City Council authorized a contract with Cort Architectural Group in the amount of $132,099 to design, provide construction documents and contract administration for the Civic Center Roof Replacement. The City contracted with Owens Roofing to replace the roof in August 2009. The construction was anticipated to take five months to complete. Due to bad weather, change orders and exceeding amount of time on the part of the contractor, the project

took an additional six months for substantial completion and another three months for final completion for a total construction time of 14 months.

As a result of this increase in time, the construction administration cost for Cort Architectural Group, PA, increased an additional amount of $91,512.43. The Contractor will be penalized for liquidated damages in the amount of $31,000 for exceeding the time limit to help offset this cost.

Processing this change order was delayed because of the uncertainty of when the project would be completed, given the excessive additional amount of time it took to complete the project. Staff wanted to make sure that the overall project would not be exceeded as a result of the excessive time to complete the project. As noted above, the contractor will be required to pay liquidated damages in the amount of $31,000.

The final contract amount with Owens Roofing including six change orders is $1,513,452.42. The budgeted amount allowed for the construction was $1,647,982.00 for a difference of $134,529.58. This amount will cover the change order request from Cort Architectural Group, PA. No additional funds will be required on the project.

The total savings on the project, if this change order is approved will be $43,017.15.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute a change order with Cort Architectural Group, PA, for the Civic Center Roof Replacement in the amount of $91,512.43 for a total contract amount of $223,611.43.

RESOLUTION BOOK NO. 33 – PAGE 234

C. RESOLUTION NO. 10-227 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH T&K UTILITIES INC. FOR THE RICEVILLE FOREST TANK REPLACEMENT AND WATER SYSTEM IMPROVEMENTS PROJECT

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with T&K Utilities, Inc., in the amount of $289,535.06, for the Riceville Forest Tank Replacement and Water System Improvements project.

The Riceville Forest tank, located in the Riceville Forest Subdivision in East Asheville off of Riceville Road, is in need of replacement. The work consists of the demolition and disposal of the existing 19,000 gallon steel ground storage reservoir, construction of a new 97,000 gallon glass fused to steel reservoir, installation and operation of a 21,000 gallon temporary water storage tank with temporary booster pumping system for 3 existing residences, and construction and installation of approximately 370 linear feet of 6-inch ductile iron pipe with related appurtenances. In response to the Advertisement for Bids, Water Resources received five (5) bids.

Companies responding were:

1. Blitheco Construction, LLC. – Penrose, NC
2. Bryant's Land Development Industries, Inc. – Burnsville, NC
3. Spur Construction – Waynesville, NC
4. T & K Utilities, Inc. – Asheville, NC
5. Turner & Murphy Company, Inc – Rock Hill, SC

A review team comprised of City staff reviewed these bids and selected T & K Utilities, Inc., as the lowest responsible bidder in the amount of $289,535.06.

The Water Resources Department has a Riceville Forest Tank capital project in which funds are specifically reserved for this project. To date, there is a balance of $320,000.00 in this project.

Riceville Forest Tank Project	$320,000.00
Actual Bid for Project	$289,535.06
Amount Remaining After Contract Award	$ 30,464.94

City staff recommends City Council approval of the City Manager to enter into an agreement with T & K Utilities, Inc., in the amount of $289,535.06 for the Riceville Forest Tank Replacement and Water System Improvements project.

RESOLUTION BOOK NO. 33 – PAGE 235

D. RESOLUTION NO. 10-228 - RESOLUTION AUTHORIZING THE CITY MANAGER TO PURCHASE AUTOMATED GARBAGE CANS FROM SCHAEFER SYSTEMS INC.

Summary: The consideration of a resolution waiving the formal bid process and authorizing the City Manager to enter into a contract with Schaefer Systems Inc. to purchase automated garbage cans.

The Sanitation Division requires new automated garbage cans on a continuous basis for replacement of damaged, existing, out of warranty automatic garbage cans, for new customers and additional garbage cans as requested by residents.

Pursuant to N.C.G.S. 143-29(g) when in the best interest of a local municipality, the formal bid process may be waived for the purchase of apparatus, supplies, materials or equipment from a vendor after the vendor has participated in a formal bid process substantially similar to the need of the municipality with another local government within the last twelve (12) months.

On January 26, 2010, the Township of Brick, County of Ocean and State of New Jersey, after completing a formal bidding process, awarded a contract to Schaefer Systems International Inc., 10021 Westlake Drive, Charlotte, NC, for the supply of automated trash cans of the same make, models, size and markings satisfactory for the City's needs. Comparing our 2009-2010 automated garbage can pricing structure to the Township of Brick's contract with Schaefer Systems Inc. an estimated savings of approximately $9,720.00 can be realized FY 2010-11.

The Public Works Department budgeted $65,000 in its FY 2010-11 operating budget for the purchase of automated garbage cans. Based on the pricing structure above, the department will realize an estimated savings of $9,720.00 FY 2010-11.

City staff recommends City Council adopt a resolution waiving the formal bid process and authorizing the City Manager to enter into a contract with Schaefer Systems Inc. to purchase automated garbage cans.

RESOLUTION BOOK NO. 33 – PAGE 237

E. RESOLUTION NO. 10-229 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE BLACK MOUNTAIN ROUTE

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to accept State Funds for the operating expenses of the transit service route to and from the Town of Black Mountain.

The NCDOT has agreed to contribute funds to be used for the operating expenses of transit service to and from Black Mountain and the Asheville Transit System has agreed to operate the subject service.

Route # 28 and the Black Mountain Trailblazer Route were established in 2002 following a collaborative effort between NCDOT and the Land-of-Sky Regional Council as a result of a number of the region's counties and municipalities who passed resolutions in 2000 asserting the need for fixed route bus service connecting urban areas not in close proximity to each other.

The subject service operates seven times a day, six days a week. All funding is provided by the State of North Carolina (maximum of $141,667), and Fare Box Revenue ($7,084) for a total budget of $148,751.

This route's ridership grew considerably since 2007. However, during FY2010 ridership decreased significantly due to the changes the city had to make to comply with the Intercity regulations.

Route 28		
Year	Total Ridership	Change
FY2010	33,240	-40%
FY2009	55,038	44%
FY2008	38,216	9%
FY2007	35,140	78%
FY2006	19,727	

This funding is vital to keep the route operating. NCDOT is funding the route from August 1, 2010 to December 31, 2010 and funding will be discontinued after that date. These funds are programmed in the current transit operating budget, with no City funds being spent. The City of Asheville has been awarded a Job Access and Reverse Commute Grant that is in process of being approved by the Federal Transit Administration. If approved, this grant will guarantee continuation of this service for two more years.

The City of Asheville will receive State Funds in the maximum amount of $141,667 to cover operating expenses of the transit service route to and from the Town of Black Mountain for total budget of 148,751. These funds are already programmed in the current transit operating budget, with no City of Asheville funds being spent. As such, no budget amendment is required.

City staff recommends adoption of the resolution authorizing the City Manager to enter into an agreement with the NCDOT for the acceptance of funds to be expended for service to and from Black Mountain.

RESOLUTION BOOK NO. 33 – PAGE 238

F. RESOLUTION NO. 10-230 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO FUND THE TRANSIT PLANNING PROGRAM SECTION 5303 PLANNING GRANT OF THE FEDERAL TRANSIT ADMINISTRATION METROPOLITAN PLANNING ORGANIZATION

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to fund the transit planning program, Section 5303 Planning Grant of the Federal Transit Administration (FTA) Metropolitan Planning Organization (MPO).

The FTA MPO Section 5303 Planning Grant is an annual grant designated exclusively for transit planning. The funds are currently administered by the City of Asheville as a direct recipient of Federal Transit Funds. The funds are primarily used to pay the Transit Projects Coordinator position (90% of the grant) and a portion of the Transportation Manager position (the remaining 10%) for time spent on transit planning. In addition, the funds support grants administration and reporting activities, short range and long range transit planning, transportation improvement program preparation, Title VI and DBE programs, and planning and operational analyses.

Fiscal Year 2010-11 anticipated funding totals $63,390. The grant will fund 80% of the anticipated funding, which equals $50,712, the City will fund 10% local match, which equals $6,339. The North Carolina Department of Transportation will provide the additional 10% local match.

The anticipated grant funding and the City's local match in the amount of $6,339 are currently budgeted in the Transportation Department's approved budget.

The total anticipated grant funding for Fiscal Year 2010-11 is $63,390. The City is required to provide a 10% local match in the amount of $6,339. The anticipated grant funding and the City's local match in the amount of $6,339 are currently budgeted in the Transportation Department's approved budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into an agreement with the NCDOT to fund the transit planning program, Section 5303 Planning Grant of the FTA MPO.

RESOLUTION BOOK NO. 33 – PAGE 239

G. RESOLUTION NO. 10-231 - RESOLUTION AUTHORIZING THE CITY MANAGER TO AMEND THE EXISTING CONTRACT WITH KIMLEY-HORN AND ASSOCIATES TO UPDATE THE DOWNTOWN PARKING STUDY

Summary: The consideration of a resolution authorizing the City Manager to amend the existing contract with Kimley-Horn and Associates, Inc. in an amount not exceed $38,000, to update the downtown parking study that was completed during May 2008.

City Council authorized the City Manager to execute a contract (PO # 81138) with Kimley-Horn and Associates, Inc. for the feasibility study of a parking garage on Rankin Avenue during June 2007 (Resolution # 07-117) at a cost not to exceed $154,100. The subject contract was amended during July 2007 (Resolution # 07-142) to include a downtown parking study for all of the Central Business District (CBD) at a cost not to exceed $97,500. With the amendment, the total contract equaled $251,600. At this time, all of the agreed upon work has been completed at a total cost of $221,485 which leaves an encumbered balance of $30,115.

Since the downtown parking study was completed, economic conditions have drastically changed. As a result, staff believes that it would be a good idea to update the downtown parking study and the modeling tool to be sure that the data is still valid and/or to update the data based on current conditions. Kimley-Horn and Associates, Inc. has submitted a proposal to accomplish the work for an amount not to exceed $38,000. Since the existing contract has an encumbered balance of $30,115, it only needs to be increased by $7,885 for a total contract amount of $259,485. All funds would come from the Parking Enterprise Fund and are currently budgeted.

The total maximum cost of the subject supplement is $38,000 and it is already budgeted in the FY 2010-11 Parking Enterprise Fund Operating Budget.

Staff recommends that City Council adopt a resolution authorizing the City Manager to amend the existing contract with Kimley-Horn and Associates, Inc. in an amount not to exceed $38,000 to update the downtown parking study that was completed during May 2008.

RESOLUTION BOOK NO. 33 – PAGE 240

H. ORDINANCE NO. 3909 - ORDINANCE AUTHORIZING PARTIAL REFUND OF PRIVILEGE LICENSE TAXES FOR OPERATIONS THAT CEASE BY OPERATION OF LAW

ORDINANCE NO. 3910 - ORDINANCE AMENDING THE FEES & CHARGES MANUAL TO ESTABLISH A NEW PRIVILEGE LICENSE FEE FOR ELECTRONIC GAMING OPERATIONS

Summary: The consideration of ordinances amending the privilege license tax for electronic gaming operations, and authorizing partial refunds.

The State has attempted for years to prohibit and/or regulate electronic gaming operations (herein "EGOs"). The most recent attempt was challenged in the courts by the EGO industry and the court enjoined enforcement of the law. While this was a Superior Court decision and its applicability is limited, many localities suspended their efforts to enforce the law, which made unauthorized operation a criminal offense.

In response to the uncertain status of the State law, many localities began regulating EGOs through their ordinances, primarily zoning ordinances and privilege license taxes.

In May, Council amended the zoning ordinance to regulate the location of EGO's, and some aspects of their operation. At the same time, Council adopted a license tax of $2,500 per location, and $500 per machine. These fees were effective for the fiscal year beginning July 1. While high, the fees are within the range of what other cities across the State have done.

In July, the N.C. General Assembly again adopted legislation to prohibit EGOs. This legislation is effective as of December 1, 2010. Several EGO operators have asked staff whether partial refunds of the tax, to reflect partial year operation, are possible. Individual refunds are not possible because taxes must be uniform, and because the constitution prohibits "exclusive emoluments." However, an ordinance that amends the previous fee and provides for a reduced fee to reflect the reduced period of legality, with provision for partial refund of tax already paid, is possible. In the interest of observing the requirement for uniformity, the authorization for the refund has been drafted to apply to any business whose operating year is cut short because the legislature prohibits the activity. As a practical matter, however, this is not likely to affect any business other than EGOs or affect any year but this one. Also, in order to address pending court actions (in other counties) the refund is only authorized for businesses that actually cease operations.

Council may provide for a "straight" proration of the refund, based on the number of months during the tax year that the business was not prohibited. Fees collected so far from EGO's come to approximately $192,000. Adjusting the tax to reflect five months of operation would reduce that amount to $80,000; this would also reduce the expected stream of revenue from those businesses that have not yet paid. The refund ordinance as proposed uses the "straight" proration formula.

There is the possibility that, due to court cases pending in other jurisdictions, enforcement of the law banning EGO's could once again be enjoined. City Code Sec. 9-30 provides for some privilege license taxes to be for periods of "less than a full license year." In order to avoid a confusing "full payment/partial refund" process for those establishments that have not yet paid, but to authorize a full year's tax in cases EGO's are allowed to continue

operation, a second ordinance is attached that amends the license fee to make it apply one monthly basis for the period of operation. Again, this only affects EGO's, and only for this year. The fee is payable at the start of the license year, or the commencement of operation.

As noted above, revenue from this source has not been programmed yet, so no City programs would be affected.

Adoption of the proposed ordinances is recommended.

ORDINANCE NO. 3910 - ORDINANCE BOOK NO. 26 - PAGE 326

I. UPDATE FROM THE BLUE RIBBON HEALTHCARE TASK FORCE

Summary: In late July 2010, City Council appointed four (4) members of the community to serve on the Healthcare Task Force. Council directed the group to provide final health fund recommendations by the onset of the FY 11–12 budget process (January – February, 2011). The Task Force was initially charged with:

- Evaluating best practices to determine the optimal range of health insurance-related benefits afforded to employees
- Cost-for-service comparisons
- Employer-employee cost-share analysis
- Review of the Asheville Project Disease Management Program
- Other areas of interest

Since its inception, there has been one (1) additional Task Force member appointed: Mr. Marty Stamey, Assistant Manger for Haywood County. As with the other members, Mr. Stamey has a background in Human Resources and health insurance management in a medium to large organization.

The Task Force convened once in September to receive a comprehensive review of the City's benefits package, risk structure, healthcare funding and the Asheville Project. At this meeting, the Task Force directed staff to provide more detailed information in a number of areas, to include:

- Health and Wellness initiatives related to the strategic plan
- Health claim costs
- Medical and dental administrative costs
- Current health clinic costs
- Wellness Health Incentive/Employee Benefit Committee

The next Task Force meeting will take place on November 2, 2010.

This information is to update City Council on the progress of the Healthcare Task Force. No action is necessary at this time.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Smith moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously (Councilwoman Manheimer was not present).

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE SCHOOL BOARD UPDATE

Mr. Gene Bell, Chairman of the Asheville School Board, briefly updated City Council on the activities and mission of the Board. He provided Council with the School system configuration, a 6-year look at district membership (noting that they are up 121 students from 2009/10), the 2010-11 budget by revenue source, and the 2010-11 budget by object of expenditure.

Mr. Allen Johnson, Superintendent of Asheville City Schools, said that regarding academic performance, using charts he explained the Scholastic Assessment Test Report, and the NC's STAT gap vs. the USA (math & reading). He provided statistics on out of the 50 goals of the District AYP goals, 42 were achieved.

Mr. Johnson and Mr. Bell then reviewed in detail the following challenges: (1) budget; (2) facility needs; (3) achievement gap; and (4) dropout rates/graduation rates. They will continue to protect their classrooms, streamline Central Services, implement energy efficiency plans, sustain reductions in professional development, and do "more with less".

They then explained the new and innovative programs of (1) In Real Life; (2) Single-Gender Classrooms; (3) Uniform/Standardized Dress; (4) Teaching Artists Presentations in Asheville Schools (TAPAS); and (5) Fit2Learn.

Mr. Johnson responded to Mayor Bellamy when she questioned what was causing the decrease in scores in math and reading in the 3rd grade, and what caused the dramatic increase in the Asheville High scores.

Mr. Johnson also responded to Councilman Bothwell regarding the cost of computers vs. textbooks.

On behalf of City Council, Mayor Bellamy thanked Mr. Bell and the entire Board for their hard work and efforts on this Board, pointing out several achievements, including their participation in the City of Asheville Youth Leadership Academy.

B. ASHEVILLE-BUNCOMBE COMMUNITY RELATIONS COUNCIL UPDATE

Mayor Bellamy said that due to a conflict, this update would be held at a later date.

C. UPDATE ON HANDICAPPED ON-STREET METERED PARKING IN DOWNTOWN ASHEVILLE

Transportation Director Ken Putnam said that the purpose of this report is to update City Council on the recent action that was taken regarding handicapped on-street metered parking in downtown Asheville.

A motion was adopted unanimously on October 12, 2010, to require meter activation by **all** on-street metered parking users within 30 days. In addition, City Council directed staff to research and suggest various options to "soften the blow" for people with disabilities. It should be pointed out that the subject action only affects on-street metered parking which includes about 743 on-street parking spaces in the Central Business District of downtown Asheville. It does **not** affect designated on-street handicapped parking spaces.

Staff met on Thursday, October 14, 2010, to brainstorm and formulate an action plan to implement the subject action. The following action items are suggested in order to educate the public regarding the subject action assuming an effective date of November 12, 2010:

1. The Public Information Office will prepare comprehensive communication plan.
2. The Parking Enforcement Officers will place informational flyers on the windshields of vehicles parked in on-street metered parking spaces displaying a handicapped placard and/or license tag on October 27, 2010, and November 5, 2010.
3. The Parking Enforcement Officers will begin issuing warning citations on November 12, 2010, for a period of seven calendar days. In addition, an informational flyer will be included with the warning citation.
4. The Parking Enforcement Officers will begin issuing overtime parking citations on November 19, 2010. Informational flyers will continue to be included with parking citations.

Staff met with the Battery Park Apartment management team on Thursday, October 14, 2010, to discuss the subject action. The complex has a total of 122 residential units that are currently fully occupied with a waiting list. They do provide parking for up to 24 vehicles in a private surface lot that is located between Haywood Street and I-240. Residents use the parking lot on a first-come basis at no cost.

Various options to "soften the blow" for people with disabilities include the following items:

1. Provide Battery Park Apartment residents a discounted monthly parking rate at the Civic Center Parking Garage ($35 per month instead of $70 per month).
2. Provide a prepaid metered parking option to users that have a valid handicapped placard and/or license tag (modeled after the City of Boulder, Colorado).
3. Provide Battery Park Apartment residents a discounted monthly parking rate in the upper end of the Handi-Park surface lot ($27.50 per month instead of $55 per month). Staff is currently studying the possibility of a demolition project on the subject property to remove a couple of old structures so this option probably would not be available until mid-2011.
4. Consider providing monthly on-street parking permits along the area immediately adjacent to the Battery Park Apartment building (includes 13 on-street metered parking spaces). Current monthly on-street parking permits range from $30 per month to $45 per month. We would recommend half-price on these on-street parking permits.

Staff does not recommend establishing any on-street metered parking spaces as "free" areas because it would be confusing to the actual users and could lead to more citations in the non-"free" areas.

Councilman Bothwell was uncomfortable with proceeding with the November 12 effective date without having the immediate option for a discounted monthly parking rate in the upper end of the Handi-Park surface lot.

Councilman Russell cautioned Council about Option 4 because we will be getting into the original problem of on-street parking access. He felt that whatever option Council proceeds with should contain an annual review. Mayor Bellamy felt the Finance Committee would be reviewing this annually as part of the Fees & Charges discussion.

At this time (5:47 p.m.), Councilwoman Manheimer arrived at the meeting.

Councilman Smith supported Option 1 and to be able to move to Option 3 when feasible.

After Mr. Putnam provided Council with an update from his meeting with the Battery Park Apartment management team on October 14, 2010, Councilman Davis felt it was prudent to get

additional information from them to determine how many residents have cars and how many have handicapped placards, especially since the Apartment complex does provide free parking to their residents in their private surface lot behind the building.

Vice-Mayor Newman agreed that we need to have the Battery Park Apartment management involved in working on solutions as well. Long term, he questioned charging only $55 a month (market rate) for a parking space in the upper end of the Handi-Park surface lot when that parking area is probably the most prime parking in the downtown area. If we do maintain that surface lot for parking (which did not seem the highest and best use of that site), it might be a place for turn-over parking, opposed to long-term parking storage. Mr. Putnam said that once we made the investment in the surface lot (after demolition of the old structures), he felt it might be a good time to consider increasing that amount because the Parking Enterprise Fund is a self-sufficient fund.

In response to Mayor Bellamy, Mr. Putnam explained the on-going negotiations with AT&T for at least 50 parking spaces in their lot. He said that is still a viable option.

When Mayor Bellamy asked about the number of designated handicapped spaces in downtown, Mr. Putnam said that out of the 1200 spaces available on street, 50 are designated as handicapped, which is roughly 5-6%. Mayor Bellamy felt that the downtown area should have 10% of the parking designated for handicapped since there are a lot of service providers and non-profits in downtown.

Mayor Bellamy also asked that the City research our parking meters to make them more accessible height to drivers with disabilities. In addition, we need to look at our meters from a standpoint of people who are physically unable to physically hold a coin to put in the meter. She supported all four options.

Councilman Russell moved to (1) proceed with requiring meter activation by all on-street metered parking users effective November 12, 2010; (2) provide Battery Park Apartment residents a discounted monthly parking rate at the Civic Center Parking Garage ($35 per month instead of $70 per month); and (3) provide an update to City Council in January 2011 with feedback from residents and staff on how this is going. This motion was seconded by Vice-Mayor Newman.

Mayor Bellamy asked for a friendly amendment to include continued negotiations with AT&T to secure parking spaces in their lot and to direct staff to look at our parking meters for ADA compliance. Councilman Russell and Vice-Mayor Newman accepted the friendly amendment.

Mr. Bart Floyd explained that he cannot physically feed a coin-operated meter and this will require someone to be with him when parking downtown, robbing him of his independence. He supported the pre-paid option. He also noted that in the District of Columbia they replaced two accessible meters in each block. He offered his services to be a part of the solution.

Ms. Frances Moore, resident of Battery Park Apartments, said that management is changing and the residents were not allowed any input. She urged Council to find a solution prior to making any changes to on-street parking.

Mr. Clarence Gray, resident of Battery Park Apartments, said that they cannot afford to park, even at a reduced rate in the Parking Garages. Residents at the Battery Park live on a fixed income and he urged Council to be compassionate with them.

Ms. Bernadette Thompson, south Asheville resident who is wheelchair bound, said that she had trouble finding designated handicapped spaces downtown and when she parks at a

metered space she has problems with reaching the coin activation. She urged Council to take into account people with manual dexterity problems.

Ms. Raelin Hanson, speaking on behalf of residents at the Battery Park Apartments felt that the City should contact doctors to see why they are issuing handicapped placards so freely to people who don't need them. In addition, residents at the Battery Park Apartments and Vanderbilt Apartments were there longer than the businesses in the area and should be given due consideration. She said that residents in the Battery Park Apartments will either have to move out or sell their cars to afford the parking.

Ms. Rose Walker felt it was not fair to make elderly disabled people who have worked in the City their whole lives and can finally retire to have to move in order to pay for parking.

Councilman Bothwell was concerned of Battery Park residents parking in the Civic Center Garage and then having to traverse up the hill to their apartments.

In response to Councilman Bothwell, Mr. Putnam said that they can implement Option 1 immediately. In addition, once the environmental assessment is completed with the demolition of the Handi-Park building, they may be able to open more surface parking sooner than mid-2011.

Councilman Smith offered a friendly amendment to allow a one-month fee waiver for Battery Park Apartment residents to park free in the Civic Center Garage until December 19 in order to allow the continued discussions with the management of the Battery Park Apartments. Councilman Russell and Vice-Mayor Newman accepted the friendly amendment.

Mayor Bellamy doesn't want this policy to indicate that low income people can't live downtown because of parking. The apartments are now affordable, but when you add in the cost to park, it increases their affordable housing expenses. She felt Council supports affordable housing and we need to look at this in a holistic fashion, keeping in mind the people who live downtown.

Councilman Russell restated his motion to (1) proceed with requiring meter activation by all on-street metered parking users effective November 12, 2010; (2) provide Battery Park Apartment residents a discounted monthly parking rate at the Civic Center Parking Garage ($35 per month instead of $70 per month); (3) provide an update to City Council in January 2011 with feedback from residents and staff on how this is going; (4) continue negotiations with AT&T to secure parking spaces in their lot; (5) direct staff to look at our parking meters for ADA compliance; and (6) allow a one-month fee waiver for Battery Park Apartment residents to park free in the Civic Center Garage until December 19 in order to allow the continued discussions with the management of the Battery Park Apartments. This motion was seconded by Vice-Mayor Newman and carried unanimously.

D. 2010 COMMUNITY HEALTH ASSESSMENT

Ms. Jennifer Nelson-Weaver, Executive Director of Health Partners, briefly updated City Council on the Department of Health's 2010 Community Health Assessment, which is a community-wide strategic planning session to set health priorities for the next few years. One piece of this process is to ask community residents to vote on what they consider to be the top health priorities. She urged City Council and the community to participate by filling out a 3-minute survey by midnight on October 31st.

Mayor Bellamy felt it would be appropriate for the City to put this information in the City's next newsletter.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGULATING TELECOMMUNICATION TOWERS TO BE MORE CONSISTENT WITH CHANGES IN THE FEDERAL AND STATE LAWS

Mayor Bellamy opened the public hearing at 6:36 p.m.

City Attorney Oast said that this is the consideration of an ordinance amending the Unified Development Ordinance regulating telecommunication towers to be more consistent with changes in the federal and state laws. This public hearing was advertised on October 15 and 22, 2010.

At its meeting on September 14, Council adopted all of the proposed revisions to the telecommunications ordinances except the revision described in subparagraph (f) of the proposed ordinance. That subparagraph and the Staff Report summary of it are reproduced below:

(a) By amending Sec. 7-16-2(d)(3) a. to read:

- Ordinance revision.

"a. Use districts: Office/Business, Community Business II, Resort, Institutional, Highway Business, Regional Business Commercial Industrial, River, Industrial, Light Industrial. In addition, telecommunication towers shall be allowed as a conditional use in residential districts at schools, fire stations, publicly-owned housing complexes, recreation centers, community centers, or other properties not used for residential purposes; provided: (i) said use is not otherwise non-conforming, (ii) the property is not subdivided for the purpose of accommodating a telecommunication tower and, (iii) the application meets the standards set forth in subsections 7-16-2(c) and (d) of this chapter."

- Staff Report summary.

"3. The requirement for facilities in residential districts to be located only on publicly owned property is removed in order to comply with a prohibition in the State law. Location on publicly-owned property is encouraged, and facilities are still prohibited from locating on property that is in use for residential purposes."

This proposed revision was referred to the Planning and Economic Development Committee of Council, which considered it at its meetings of September 21 and October 19. After further presentations from staff, which included a review of the applicable law and a review of ordinances from other cities, and further discussions, the PED Committee recommended against adopting this revision.

The PED Committee recommended further changes to the ordinance, including (1) prohibiting telecommunications towers from residential districts entirely, adding a set back from residentially zoned property, (2) establishing a minimum lot size for towers, and (3) requiring that towers be constructed to allow co-location. These are material changes to the ordinance, and are not encompassed within the revisions currently under consideration by Council. They should be handled as a new and separate amendment to the ordinance. In addition, staff requires time to research the suggested revisions, and prepare language for the ordinance.

If Council adopts the proposed ordinance revision, then Council should proceed with the application for a conditional use permit for a telecommunication tower to be located at 415 Beaverdam Road. If that is the route Council chooses, he felt Council may wish to continue the conditional use permit application public hearing because notice has not been circulated to Beaverdam residents that this issue would be considered at this time. If, however, the ordinance

revision is not adopted, the Beaverdam application is moot. He said this is an evolving technology situation and an evolving zoning situation and staff will continue to review the law and come back to Council with whatever they feel is appropriate.

Assistant Planning & Development Director Shannon Tuch said that a question raised at the PED Committee is what other cities do. They surveyed 19 municipalities in North Carolina and of those 19 surveyed, it appears that 13 did allow cell towers in residential districts with a conditional use or a special use permit. Similar to our conditional use permit process, they had a variety of special standards, particularly a proof of need standard that the applicant demonstrates there is no other way to achieve coverage. Out of the 19 cities surveyed, staff found 3 that do not allow cell towers in residential districts.

Ms. Patsy Brison, attorney representing U.S. Cellular and North Carolina RSA#4, urged Council to adopt the proposed wording amendment to allow telecommunication towers as conditional uses in residential districts on properties not used for residential purposes. She pointed out that the Planning & Zoning Commission unanimously recommended to Council that they adopt this amendment. Further, if the amendment is not adopted, it is her opinion that the City's failure to adopt it will prohibit or have the effect of prohibiting provision of personal wireless services within certain areas of the jurisdiction of the City of Asheville. As evidence of the prohibition of personal wireless services, she showed Council a copy of the City of Asheville zoning map which includes the location of the residential districts within the City's jurisdiction. In addition, she provided Council with a copy of a "City of Asheville Cellular Coverage Map" produced by her clients, showing that the coverage issues are coincidental with residential zoning districts, particularly in the Haw Creek and Beaverdam areas. Further, if the existing language regarding allowing telecommunication towers on certain properties in residential districts is also removed, that further prohibits the provision of personal wireless services within residential areas in the City's jurisdiction. If the provision of personal wireless services is prohibited, it most likely will have serious safety implications due to the wide-spread use of cellular phones and their specific use for access to 911 calls. She respectfully urged Council to allow the provision of these services in residential districts where the evidence documents lack of service.

Mayor Bellamy closed the public hearing at 6:51 p.m.

Councilwoman Manheimer said that the PED Committee did review this issue and their recommendation was that we ask staff to prepare an ordinance amendment that will bring us into compliance with state law. We have to expand the types of properties within a residential zoning districts that cell towers can be located on (with a conditional use permit) or we need to zone them out entirely of residential districts. The PED Committee recommended (1) prohibiting telecommunications towers from residential districts entirely; (2) adding a setback from residentially zoned property (fall zone); (3) establishing a minimum lot size for towers, but perhaps with the fall zone, this would not be necessary; and (4) requiring that towers be constructed to allow co-location. If Council agrees with the PED Committee recommendation, City Council would not need to act on this proposed amendment. City Attorney Oast felt the amendments to the ordinance recommended by the PED Committee would need to go back through the Planning & Zoning Commission process.

In response to Vice-Mayor Newman (who felt this is largely an aesthetic issue), City Attorney Oast said that if Council does allow cell towers in areas zoned residential, through the conditional use permit process Council can require that they look like a picture Ms. Brison provided to Council of a cell tower in Harrill Hills, Knoxville, Tennessee. Ms. Brison said that this would be on a case by case basis and with the 100-foot limit you already have some aesthetic values in the conditional use permit process. She noted that they have done a number of different kinds of design applications in various jurisdictions to comply with that jurisdictions interests and how it might look in a specific location.

Mayor Bellamy didn't think that all applications are created equal, because she noted that the cell tower disguised as a flag pole at our Fire Station on Louisiana blends in. She supported allowing cell towers in certain residential districts with the conditional use process. She felt that Council can legislate what the tower will look like and she felt that coverage is needed in our community. Councilman Russell agreed that we need to look at each application through the conditional use permit process on a case by case basis.

Councilman Bothwell moved to instruct City staff to research the suggested revisions recommended by the PED Committee.

It was the consensus of Council (Mayor Bellamy, Vice-Mayor Newman, Councilman Davis and Councilman Russell) to allow cell towers as a conditional use in residential districts at schools, fire stations, publicly-owned housing complexes, recreation centers, community centers, or other properties not used for residential purposes. In addition, staff is to research (2) adding a setback from residentially zoned property (fall zone); (3) establishing a minimum lot size for towers, but perhaps with the fall zone, this would not be necessary; and (4) requiring that towers be constructed to allow co-location. The proposed wording amendment will come back to City Council for consideration of adoption.

In response to Vice-Mayor Newman, City Attorney Oast believed that staff previously researched city-owned properties looking for gaps that we could build the infrastructure for co-location. He would provide that research to Council.

Councilman Bothwell revised his motion to remand this issue to staff and the Planning & Zoning Commission to consider (1) allowing cell towers as a conditional use in residential districts at schools, fire stations, publicly-owned housing complexes, recreation centers, community centers, or other properties not used for residential purposes; (2) adding a setback from residentially zoned property (fall zone); (3) establishing a minimum lot size for towers, but perhaps with the fall zone, this would not be necessary; and (4) requiring that towers be constructed to allow co-location. This motion was seconded by Councilman Russell.

Ms. Tuch said that staff prior to the PED Committee meeting, staff hadn't identified the requirement for co-location, but after subsequent review, they discovered that there is a requirement for co-location, but only one additional space for another provider. In most cases we do find two, sometimes three other spaces. The proposal that is before Council tonight (for a cell tower at 415 Beaverdam Road) that would extend service to those privately owned residential properties that are occupied by non-residential uses. If Council is interested in adopting that wording amendment, the application on the agenda could move forward and they could return to the Planning & Zoning Commission for an additional amendment for the PED items discussed earlier.

It was the consensus of Council to not move forward with the application for a conditional use permit for a cell tower in Beaverdam at this meeting in order for the Beaverdam community an opportunity to speak at the public hearing. City Attorney Oast said that all of the items mentioned can be conditions on the pending application; however, he felt some separation of time between the wording amendment and the consideration of the application of the conditional use permit would be helpful.

In response to Mayor Bellamy, the main reason why he felt this wording amendment should be re-considered by the Planning & Zoning Commission was based on the PED Committee recommendation that cell towers not be allowed at all in residential areas. However, now that it is not the consensus of Council and Council is talking about incorporating these additional requirements on the conditional uses for allowing them in residential areas.

Ms. Brison noted that there is already a co-location requirement in the ordinance. She said there is a requirement in federal law and in the state law and that is if you fail to act in a

reasonable time period of the application being submitted then it can be challenged under federal law. Their application was submitted on July 27, 2010. She felt this is beyond a reasonable time period for action. She requested Council proceed with the proposed wording amendment and send the other PED items back to the Planning & Zoning Commission for review for inclusion on future applications, not this pending one.

A resident and homeowner in Beaverdam understood that federal law requires equal access for towers and cellular use, but didn't believe it applies to every single telecommunication company. He was concerned that there will be a lot of other telecommunication companies to follow and if we acquiesce to this tower within Beaverdam, will we have to give into those other telecommunication towers as well.

Mayor Bellamy closed the public hearing at 7:16 p.m.

In response to Councilman Russell when Ms. Tuch said that the next Planning & Zoning Commission meeting would be December 1, Vice-Mayor Newman felt this didn't need to go back to the Planning & Zoning Commission for review since they have already recommended approval of the cell towers being "allowed as a conditional use in residential districts ... not used for residential purposes," and staff could recommend some changes to the wording amendment as recommended by the PED Committee and bring those changes back to Council for review.

When Councilman Russell asked for a friendly amendment to continue this item to the November 9, 2010, agenda, Councilman Bothwell accepted the friendly amendment, with the amended motion to be to remand this issue to staff to consider (1) allowing cell towers as a conditional use in residential districts at schools, fire stations, publicly-owned housing complexes, recreation centers, community centers, or other properties not used for residential purposes; (2) adding a setback from residentially zoned property (fall zone); (3) establishing a minimum lot size for towers, but perhaps with the fall zone, this would not be necessary; (4) increase the requirement for co-location; and (5) that this item be reconsidered by City Council on November 9, 2010. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Councilwoman Manheimer voting "no."

Councilman Russell moved to continue the public hearing to consider a conditional use permit for the project identified as a U.S. Cellular telecommunication tower, located at 415 Beaverdam Road, for construction of an 80' monopole tower until November 23, 2010. This motion was seconded by Councilman Bothwell and carried unanimously.

B. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS US CELLULAR TELECOMMUNICATION TOWER, LOCATED AT 415 BEAVERDAM ROAD, FOR CONSTRUCTION OF AN 80' MONOPOLE TOWER

Councilman Russell moved to continue the public hearing to consider a conditional use permit for the project identified as a U.S. Cellular telecommunication tower, located at 415 Beaverdam Road, for construction of an 80' monopole tower until November 23, 2010. This motion was seconded by Councilman Bothwell and carried unanimously.

Closed Session

At 7:21 p.m., Councilman Smith moved to go into closed session for the following Reasons: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The location of the properties is Eagle Street. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the

General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 7:40 p.m. Councilman Russell moved to come out of closed session. This motion was seconded by Councilman Smith and carried unanimously.

C. PUBLIC HEARING TO CONSIDER AN ECONOMIC DEVELOPMENT INCENTIVE GRANT BETWEEN THE CITY OF ASHEVILLE AND FRONTIER SYNDICATE LLC FOR THE MONTFORD COMMONS DEVELOPMENT, PHASE I

RESOLUTION NO. 10-232 - RESOLUTION APPROVING AN ECONOMIC DEVELOPMENT INCENTIVE GRANT BETWEEN THE CITY OF ASHEVILLE AND FRONTIER SYNDICATE LLC FOR THE MONTFORD COMMONS DEVELOPMENT, PHASE I

Mayor Bellamy opened the public hearing at 7:45 p.m.

Planning and Development Director Judy Daniel said that this is the consideration of a resolution approving an economic development incentive grant between the City of Asheville and Frontier Syndicate LLC for the Montford Commons Development, Phase I. This public hearing was advertised on October 15, 2010.

In response to the directive of the City Council at their August 24 meeting, the following elements are proposed to be included in an Economic Incentive Grant (EIG) between the City and Frontier Syndicate, LLC. The City Council will need to vote to support the agreement. With that vote, the City Attorney will draw up the required documentation for approval by the City and Frontier Syndicate, once the City has received notice that the Buncombe County Commission has agreed to support the project as noted below.

The elements of the proposed agreement include:

The City of Asheville will make an Economic Incentive Grant (EIG) to Frontier Syndicate LLC that will support the installation of infrastructure necessary for the construction of Phase One of the Montford Commons development – consisting of a 250 unit apartment complex and attendant 390 space parking structure - contingent upon:

1. Agreement by Buncombe County to an equivalent or greater amount of support (which the Commissioners did agree to an equivalent level of support); and
2. Agreement that Frontier Syndicate will assume responsibility for any legal challenge to this interpretation of the EIG enabling statutes.

The extent of the grant is:

1. An amount equivalent to City property taxes (in excess of currently assessed taxes), annually applied, that will be generated by the project for the first five years of its operation after construction is complete;
2. Relief of 50% of any permitting fees (up to $350 per unit constructed); representing approximately $43,759;
3. Relief of 50% of water tap fees representing approximately $51,506.

In return the developers will:

1. Guarantee that 100% of the apartments remain at workforce housing level rents for the first 15 years of rentals – this clause to apply to any future owners of the property during

those years. An annual report to be submitted to the City Manager during that term to verify the current rent levels.

2. Work with the Community Development staff to develop a "preference queue" for the apartments that will give first right of rental to civil service employees (City and County government employees, City and County school employees) who are earning workforce level family incomes.

3. Report the number of construction jobs that will be created by the project.

If the developer or other subsequent owner of the property fails to perform as required, any expended grant funds will be refunded to the City.

The strategic plan goals most closely aligned with this proposal are the: (1) Affordable Goal in that it expands opportunities for public/private partnerships and innovative financing mechanisms to incentivize affordable housing development; and (2) Job Growth and Community Development Goal in that is will support diversified job growth and small business development; and will promote sustainable, high-density, infill growth that makes efficient use of existing resources.

Pros:

- Meets Council goal to expand opportunities for public/private partnerships and innovative financing mechanisms to incentivize affordable housing development
- Meets Council goals to promote sustainable, high-density, infill growth that makes efficient use of existing resources

Cons:

- The City will not receive the full development permitting fees that are used to offset staff time required for reviews, but all required reviews will be needed.
- The City will not receive tax revenue for the improved property for the length of the incentive authorized; although City services will be provided.

The City will not receive standard development permitting fees (that fund staff time required for reviews), but all required reviews will be needed. The City will not receive additional taxes for the improved property for the length of the incentive authorized; although City services will need to be provided to the property.

City staff recommends City Council adopt an Economic Incentive Grant that will support the construction of the Montford Commons Development, Phase I to the extent noted within the staff report.

A representative of Frontier Syndicate LLC appreciated Council's favorable consideration on this incentive grant.

Mayor Bellamy closed the public hearing at 7:49 p.m.

Councilman Bothwell noted that although this does provide workforce housing, this does not incentivize affordable housing per our definition.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilwoman Manheimer moved for the adoption of Resolution No. 10-232. This motion was seconded by Councilman Davis and carried 4-3, with Councilman Bothwell, Councilman Russell and Councilman Smith voting "no."

RESOLUTION BOOK NO. ~~32~~ 33 – PAGE 241

V. UNFINISHED BUSINESS:

A. SECOND READING OF ORDINANCE NO. 3908 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO ADD A NEW APPLICATION PROCESS TO ALLOW THE CONSIDERATION OF DEVELOPMENT INCENTIVES FOR PROJECTS MEETING KEY STRATEGIC CITY GOALS

Mayor Bellamy said that the public hearing on this issue was held on October 12, 2010, and due to the vote, it required a second reading.

Councilman Bothwell said that the first vote on this ordinance was very difficult. While he understood why people want public comment regarding changes to development in their neighborhoods, he now believes that this won't have nearly the impact that opponents are concerned about.

Vice-Mayor Newman moved to adopt Ordinance No. 3909 on its second and final reading. This motion was seconded by Councilman Smith carried on a 5-2 vote, with Mayor Bellamy and Councilman Davis voting "no."

ORDINANCE BOOK NO. 26 - PAGE 317

B. RESOLUTION NO. 10-233 - RESOLUTION AMENDING THE ANNEXATION SERVICES PLAN FOR THE COOPERS HAWK DRIVE AREA

At the request of Councilwoman Manheimer, Councilman Russell moved to recuse Councilwoman Manheimer from participating in this matter and the consideration of an ordinance extending the corporate limits of the City of Asheville to the Coopers Hawk Drive area, due to a conflict of interest. This motion was seconded by Councilman Bothwell and carried unanimously. Councilwoman Manheimer left the room and did not return until after the vote on the ordinance extending the corporate limits of the City of Asheville to the Coopers Hawk Drive area.

Urban Planner Julia Fields said that this is the consideration of a resolution amending the Annexation Services Plan for the Year 2011 Annexation Areas to reflect the removal of the Royal Pines Area from the plan.

In adopting an annexation ordinance, the City has the authority to annex all, some, or no portion of an area proposed for annexation, as long as any area being annexed qualifies for annexation. The City may also amend the services plan for the proposed annexation area or areas, as long as the requirements for providing service to the annexation areas continue to be met.

City staff presented the Annexation Services Plan for the Coopers Hawk Drive and Royal Pines Areas to City Council on August 10, 2010. The City Council approved the plan on this date.

Following the public hearing on these proposed annexation areas held on October 12, 2010, the City Council voted not to move forward with the annexation of the Royal Pines Area. This action necessitates an amendment to the approved Annexation Services Plan to reflect the removal of the Royal Pines Area from the plan. The amended Annexation Services Plan along with a resolution must be approved to effectuate this amendment.

The entirety of the approved plan has been reworked to delete all sections specifically addressing the annexation of the Royal Pines Area. Proposed capital expenditures for additional police patrol and solid waste vehicles/personnel have been removed (no longer needed) as have expenditures for the potential economic loss for the private waste haulers (no longer required per statute). The amended plan now only reflects the annexation of the Coopers Hawk Drive Area.

As long as the Annexation Services Plan does not show the annexation area as qualifying under any additional statutory tests, no additional public hearing is required for this amendment to the Plan.

The fiscal impact of the remaining proposed annexation area is contained in detail on pages 23-27 of the Plan for Services.

City staff recommends City Council adopt a resolution amending the Annexation Services Plan as presented.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy said that members of Council have previously been furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 10-233. This motion was seconded by Councilman Bothwell and carried on a 5-1 vote, with Councilman Russell voting "no" (Councilwoman Manheimer excused).

RESOLUTION BOOK NO. 33 – PAGE 242

C. ORDINANCE NO. 3911 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE THE COOPERS HAWK DRIVE AREA

Note: Councilwoman Manheimer was recused from participating in this matter due to a conflict of interest as noted by the motion in the prior item.

Urban Planner Julia Fields said that this is the consideration of an ordinance extending the Corporate Limits of the City of Asheville to include the Coopers Hawk Drive area.

On July 27, 2010, the City Council adopted a Resolution of Intent beginning the annexation process for the Coopers Hawk Drive Area. The Annexation Services Plan for this area was approved on August 10, 2010, and a public information meeting was held on September 13, 2010. A public hearing on the annexation was held on October 12, 2010. Adoption of the annexation ordinance is the final step in the annexation process should City Council want to continue to proceed. The proposed effective date for this annexation is June 30, 2011.

The ordinance sets forth this effective date and also reference a metes and bounds description attached to the ordinance.

The fiscal impact of the remaining proposed annexation area is contained in detail on pages 23-27 of the Plan for Services.

City staff recommends City Council adopt the annexation ordinance for the Coopers Hawk Drive Area with the effective date as established by ordinance.

Councilman Russell was disappointed that this annexation area was not withdrawn from consideration as was the Royal Pines area.

When Mayor Bellamy asked for public comment, she received none.

Mayor Bellamy noted that she spoke with some residents of the Coopers Hawk Drive area and they asked if Council would be willing to extend the effective date in order for them to properly prepare for the annexation into the City.

Mayor Bellamy said that members of Council have previously been furnished with a copy of the ordinance and it would not be read.

Vice-Mayor Newman moved for the adoption of Ordinance No. 3911, with an effective date of November 30, 2011 (400 days from the date of adoption). This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Russell voting "no" (Councilwoman Manheimer excused).

ORDINANCE BOOK NO. 26 - PAGE 328

Councilwoman Manheimer returned to continue participation in the Council meeting.

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-234 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN DOCUMENTS RELATED TO AN AGREEMENT WITH NC GREENPOWER FOR ACCEPTING PAYMENT FOR RENEWABLE ENERGY GENERATED USING A HYDRO MICROTURBINE

Director of Water Resources Steve Shoaf said that this is the consideration of a resolution authorizing the City Manager to sign documents related to an agreement with NC GreenPower for accepting payment for renewable energy generated using a hydro microturbine.

The Water Resources Department is pursuing a grant from the Appalachian Regional Commission (ARC) for a pilot microturbine installation to capture renewable energy. As a first step, the City of Asheville Water Resources Department is applying to NC GreenPower for supplemental payments for renewable energy generated using a hydro microturbine. Payments for renewable energy through NC GreenPower would supplement energy buy-back payments from the electrical utility and would make payback calculations for the microturbine pilot project more favorable.

Due to the mountainous terrain, the City of Asheville has several locations in the water distribution system that requires a reduction of high water pressure to serve customers. Currently, pressure reducing valves are used to achieve this, but they waste available energy. Installation of turbines would capture that energy and generate electricity for sale back to the electric grid. This project would serve as a demonstration of feasibility and could be modeled in other areas of Appalachia. The impact of wide-spread implementation could reduce the need to construct new electric generating plants in the region. In January the ARC is entertaining proposals for grants for planning and implementation of community energy projects. The Water Resources Department has been working with the engineering firm WK Dickson to investigate the performance, logistics, and payback of the technology and the ARC application process.

The Water Resources Department is relying on a grant from ARC and payments for the electricity produced to provide a favorable payback for this project. The NC GreenPower payments would be combined with the actual purchase of kilowatt hours by the electrical utility and an "avoided cost of new construction" payment from the electrical utility.

This project is part of City Council's strategic plans to become more Green and Sustainable. It would make use of an existing resource (water energy) and convert it to a commodity.

Pros:
- Promotes the concept of green and sustainable.
- Could provide an alternate source of revenue for the Water Resources Department.
- May provide an example for other systems to model.

Cons:
- The ARC grant funds will not cover the total cost of the project and a NC GreenPower supplement is necessary to improve payback calculations.
- The installation of turbines may present challenges for our system operation.

There is no budgetary impact associated with the application for supplemental funds from NC GreenPower. Any funds needed for this project will be allocated in the Water Resources FY 2011-2012 CIP budget. There will be a payback calculated by the sale of energy back to the electrical utility.

City staff recommends City Council approval of the City Manager to sign documents related to an agreement with NC GreenPower for accepting payment for renewable energy generated using a hydro microturbine.

When Mayor Bellamy asked for public comments, none were received.

City Manager Jackson commended Mr. Shoaf for this kind of innovation and leadership.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-234. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 243

B. ORDINANCE NO. 3912 - ORDINANCE AMENDING CHAPTER 16 OF THE CODE OF ORDINANCES PERTAINING TO STREETS, SIDEWALKS AND OTHER PUBLIC PLACES

Director of Public Works Cathy Ball said that this is the consideration of an ordinance amending Chapter 16 of the Code of Ordinances that amends existing Section 16-3 relating to maintenance of sidewalks.

Section 16-3 of the City of Asheville Code of Ordinances currently states that " *It shall be the duty of every occupant or tenant of improved property and of the owner of every vacant property within the city, in front of which the sidewalk has been paved, to keep such sidewalk clean and to do such sweeping and scraping as may be necessary to keep such sidewalk clean and free from snow, ice, dirt and trash and to render the sidewalk passable, comfortable and sightly and the gutter next to and along such sidewalk open and free from obstructions for the full width of the front.*" There is no other reference in the existing ordinance that clarifies these requirements and no direction, remedies or cures in the event the property owner does not correct the problem. She showed several pictures of overgrowth on streets and sidewalks, some which render the sidewalk non-Americans with Disabilities Act compliant.

Staff has revised the ordinance to make it clarify the responsibility of the adjacent property owner to maintain sidewalks, grass strips, drainage swales and gutters, clean and

unobstructed. The revised ordinance also provides for notice and enforcement of these requirements.

In summary, the purpose of the ordinance is twofold: (1) to make it easier to understand and (2) to be able to have some penalties to require property owners to take action. This ordinance clarifies what is required to keep sidewalks clear and free of overgrowth from adjacent properties as well as curb and cutter and to be able to create a civil penalty in the event the property owner does not comply. It also stipulates some requirements for when ice or snow is on streets, and it gives the City the ability to assess a criminal penalty if someone has deliberately piled snow upon the sidewalks or streets, or cleared off snow off their parking lots and piled it onto the sidewalks.

This recommendation complies with City Council's Strategic Plan by in the area of Fiscal Responsibility by improving the condition and safety of our sidewalks, grass strips, drainage swales and gutters.

Pros:

- Improve the condition of existing sidewalks, grass strips, drainage swales and gutters.
- Improve the safety and ADA compliance of existing infrastructure.
- Provides an enforcement arm to the existing ordinance.

Con:

- There are approximately 9.5 miles of sidewalks adjacent to City owned land that would need to be maintained by the City.

No fiscal impact but the City would need to reprioritize our resources to provide the maintenance for the 9.5 miles of sidewalk adjacent to City owned properties. We could utilize some of the nuisance court community service to accomplish some of this maintenance.

Staff recommends that City Council adopt an ordinance that amends existing ordinance 16-3 relating to maintenance of sidewalks.

After a short discussion, initiated by Mayor Bellamy, about an appeal process, it was the consensus of Council to amend the ordinance to include a provision for civil penalty appeals (including the penalty increases) similar to the street cut permit violations in Section 16-40 (appealed to Public Works Director and then to the City Manager).

Mayor Bellamy also felt it was necessary for the City to have a process for hardship cases for those that are unable to do the necessary maintenance.

In response to Mayor Bellamy, Ms. Ball said that the City the City will make sure we do our part on this ordinance as well. We determined that 9.5 miles of sidewalks are adjacent to City-owned property, so we have an obligation to maintain those sidewalks at the same level we are asking other property owners to maintain their property.

Councilman Bothwell felt it was important for the City to set a model on how sidewalks should be maintained.

When Councilman Bothwell asked whose responsibility is the sidewalk on the Flint Street bridge, Ms. Ball said that she would have to research that and report back.

Ms. McGlohon responded to Councilwoman Manheimer about the City's process now of when properties are not maintained.

Councilman Russell moved to adopt Ordinance No. 3912, to include a provision for civil penalty appeals (including the penalty increases) similar to the street cut permit violations in

Section 16-40 (appealed to Public Works Director and then to the City Manager). This motion was seconded by Councilman Bothwell.

When Mr. Dwight Butner asked if this ordinance has been reviewed by any other group, Ms. Ball responded that following the snow events last year, they worked with the Neighborhood Coordinator and sent out to all downtown residents a survey money asking them what would be the most important thing to improve. The result was a request for an ordinance on how to address snow removal from sidewalks. Even though we did not follow back up with them, we moved in the direction to clarify the responsibilities.

At the request of Mayor Bellamy, Ms. Ball said that they will develop a communications plan for educating property owners of their responsibilities regarding maintenance on sidewalks and suggested the ordinance not be effective until 60 days after adoption. In addition, she said they are working on a program so that property owners can purchase the necessary equipment at a cheaper rate to remove snow. She also noted that they are also looking at grants to make the equipment accessible as well. Mayor Bellamy wondered if there would be any Community Development Block Grant monies available to help on some level for those who can't afford to maintain their sidewalks.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

The motion made by Councilman Russell and seconded by Councilman Bothwell, with an effective date of 60 days after adoption for educating the public, carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 332

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Leslee Kulba suggested the City review Governor Beverly Perdue's bureaucracy reduction initiative to review the counter-productive unfunded mandates. Mayor Bellamy said that the Finance Committee would be the appropriate body to review the unfunded mandates coming from the state.

Ms. Betty Jackson spoke against forced annexation and suggested a forum where retired city planners and others who have expertise can provide information on why forced annexation doesn't need to occur.

Ms. June Patterson, Arden resident, asked the City to investigate why snipe signs are allowed along Airport Road. Mayor Bellamy said that City Manager Jackson would investigate the matter.

Mr. John Kleckner, local artist, explained his frustration with working with the City on an art project.

A Buncombe County resident spoke in opposition to forced annexation.

The following claims were received by the City of Asheville during the period of October 1-21, 2010: Stefan Bonitz (Parks & Recreation), Steven Anderson (Sanitation), Arville Dale Jenkins (Police), Don Adams (Streets), Asheville Property Management (Streets), Douglas Miller (Police), Melinda Vetro (Water), Progress Energy (Water), Progress Energy (Water), NC Dept. of Transportation (Police), Veronica Crouch (Transit); Michele Davy (Sanitation) and Pulliam Properties (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:42 p.m.

Magdalen Bamberson
CITY CLERK

MAYOR

Tuesday – November 9, 2010 – 3:30 p.m.
Worksession
1st Floor North Conference Room

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

Unified Development Ordinance amendments according to the recommendations of the Downtown Master Plan.

Urban Planner Alan Glines showed Council some wall examples of wall streets, along with some street wall alternatives. He then provided some scale comparisons of the larger buildings in the downtown area.

Mayor Bellamy felt that there should be an option for buildings where you see a difference in materials to not have to have a setback.

There was discussion by Council of the setbacks, with Mr. Glines responding to questions while each Council member voiced their opinions.

Mr. Glines then said that at the October 12, 2010 work session to discuss the UDO changes to implement the Downtown Master Plan, the City Council gave staff direction to look at the types of incentives that could be put in place for projects in the Central Business District that support City goals for affordable and workforce housing and sustainable projects. The staff, after considering the Council's request, proposed three options for approaching what we thought was the intent of the Council to integrate Council goals for affordability and sustainability with the downtown development review process.

Those options were sent to the Downtown Commission and the Urban Design Subcommittee, as these were the groups who have been working to get the Downtown Master Plan recommendations implemented. The options were then discussed at a special meeting on Thursday October 28, 2010. The group also reviewed City Council's broader comments on the Master Plan from the work session.

Based on comments made during the meeting and from email responses received before the meeting, there is a feeling by many that the incentives, while important, need additional thought. Most felt that getting the development standards pertaining to the Central Business District (CBD) adopted is the priority, and need not wait for the affordability and sustainability program. There was strong support for that added policy; the concern is timing and the pressing need to get the development standards in place.

There was support for the Sustainable Features List items by some as they represent issues identified by the community; but most others felt that with the current economic downturn requiring these specific features may affect development potential in the City and hurt chances of redevelopment and investment in an already challenging economic environment.

Option 1 - Of the options presented to the group, the idea of using the City Council proposed Transformational Projects Policy, with added elements specific to the CBD, was reviewed most favorably. The option would follow the proposed *Transformational Projects Policy and Incentives* that is currently being considered by City Council, but add elements specific to the CBD; as have already been suggested by the Council at their September 28 consideration of this

policy such as a smaller lot size and reduced percentages of affordable or workforce housing (reflecting higher land costs). The incentives in this policy would be available to projects of any scale that are able to meet the priority elements identified by City Council once that policy is adopted.

Because the program is voluntary and participation is not limited by the scale of the development, the group felt that it would not add burdens during this time of economic difficulty. The group felt that keeping the policy out of the Unified Development Ordinance (UDO) would maintain flexibility and responsiveness since it can be changed and adapted quickly in response to economic conditions. There was also appreciation of the policy because it could work like a synthetic "TIF" and support the infrastructure needs of the development and downtown in general.

Again, the group felt that the policy could be amended to represent the specific needs of the CBD by recognizing that some projects bring more community benefits than others and so the incentives received could reflect that. The Downtown Commission is willing to help with determining the range of incentives for the CBD if needed but they would like to see the UDO changes move forward and not be delayed.

Option 2 - This option would adjust project review thresholds for Level II and Level III projects based on desirable, sustainable features as follows:

Level II (base threshold):
20K s.f. – 150K s.f. (down from 175K s.f.) and/or up to 145 feet in height

Level II (adjusted threshold):
20K s.f. – 200,000 s.f. (up from 175K s.f.) and/or up to 200 feet in height (height option only available to those projects in the tallest height zone)

To be eligible for the adjusted threshold, projects would have to achieve a minimum of 5 points from the following list:

Sustainable Feature List

3 points	20% or 10,000 s.f. of office or retail space is offered as a business incubation space at a price meeting affordable rates for a period of 10 years.
3 points	The building meets the bronze level of LEED certification
4 points	The building meets the silver or better level of LEED certification
3 points	20% of the residential units are priced to meet the affordability standards for workforce housing^
4 points	20% of residential units are priced to meet the affordability standards for affordable units at or below 80% of area median income^
2 points	The developer provides a small public park located in the CBD with a design and orientation approved by the Downtown Commission and the Parks and Recreation Advisory Board to be accepted by the COA
1 point	The developer provides a pocket park of at least 1,000 s.f. located in the CBD accessible to the public and with a design and orientation approved by the Downtown Commission and the Parks and Recreation Advisory Board to be accepted by the COA

1 point Developer provides a fee in lieu of improvements for projects included in areas where an official streetscape plan or small area/neighborhood plan. Fee assessed based on costs associated with specified improvements.

1 point The developer provides funds for fee in lieu to the parking fund at a rate to be determined by calculating the parking demand of the proposed building (consulting the parking table based on uses) and providing $1,000 per space for each space not provided directly in the development.

^ *In calculating residential affordability the operating expenses for each unit may be factored in to the estimate of affordability while noting any energy saving features of the building or unit*

After discussion, many in the group felt that as proposed this proposal would not provide enough incentive to make this a viable option because the economic climate has changed so much. Just avoiding Council approval might not be enough reason for the extra expense incurred by gaining the required "points". There were suggestions that some of the sustainable features list might be useful to add to the Transformational Projects Policy. There was support for the types of things on the list and some felt that additional ones may be identified from many City adopted master plans.

Option 3 would require all Level III projects to achieve a minimum of 5 points from the *Sustainable Feature List*. The Level III project review process could be adjusted in a number of ways such as adjusting the scale of Level II and Level III projects (similar to above) or, expanding the area where the conditional zoning (CZ) process is applied.

This proposal received the least amount of support and most attending the meeting felt that this is the wrong time, given the continuing economic weakness, to require all developments to include affordable or sustainable features. Some attendees appreciated the concept of requiring participation for the largest projects since it would bring needed benefits to the most sustainable area of the city, even if it limited the growth potential in the city in the near term.

Summary and Recommendation

The staff supports Option One incorporating the *Transformational Projects Policy and Incentives* as an incentive available to projects proposed in the CBD. As has already been stated, that recommendation includes adding specific incentives to be directed towards needs in the CBD. The Downtown Commission is willing to work to identify community benefits for downtown projects based on the level of the benefit to the downtown CBD. The "pros and cons" of the three options, based on staff input and the thoughts of the Downtown Commission and Urban Design Review Committee, are noted below:

Option 1:

Follow the program of the proposed *Transformational Projects Policy and Incentives* that is currently being considered by City Council, with certain elements targeted to the CBD, which would be available to projects of any scale that are able to meet a number of priority elements that have been identified by City Council.

Pros:

- Voluntary, based on the interest of the developer (may be considered a con)
- A variety of incentives may be considered that may be tailored to the proposal
- Applies to specific areas in the City identified as under-developed but with potential for redevelopment, including downtown

- This policy is not a part of the UDO and could be more responsive to the needs of the city and the goals prioritized by City Council

Cons:

- Does not require participation in the program
- Participation is not tied to the scale of the development (a potential pro)
- Policy is designed for a number of areas and projects and not tailored to downtown specifically

Option 2:

Adjust project review thresholds for Level II and Level III projects based on desirable, sustainable features.

Pros:

- Provides a process related incentive for projects meeting community affordability and sustainability goals
- Participation is voluntary
- The incentive is specific to downtown
- Would apply to the largest category of projects (Level II)
- Provides a menu of options to choose from (although somewhat limited)

Cons:

- The incentives only apply to Level II projects (may not be necessary for all projects)
- An opportunity to avoid a Level III project review process may not be enough incentive to encourage participation, particularly for those projects outside the traditional core area that would follow the site plan review process
- Alone this may not be enough to affect the pro forma of a project which would assist in securing financing for the development
- Any new park facility will have a fiscal impact on the City for regular maintenance and repair
- Other incentives may also be available (*Transformational Projects Policy & Incentives*) producing an effect of "double-dipping" (may be viewed as a pro)

Option 3:

Require all Level III projects to achieve a minimum of 5 points from the *Sustainable Feature List*. The Level III project review process could be adjusted in a number of ways such as adjusting the scale of Level II and Level III projects (similar to above) or, expanding the area where the conditional zoning (CZ) process is applied.

Pros:

- All Level III projects would include desirable sustainable features
- May help mitigate the impacts that Level III projects can have on neighboring properties and on downtown as a whole
- Provides a menu of options to choose from (although somewhat limited)

Cons:

- Regarded as a requirement and not an incentive (may be amended to include a small incentive; however, incentive is likely to be weak)
- Tighter development rules may come at a difficult economic time and discourage new growth
- There are no incentives set aside for Level II projects
- Opportunity to negotiate specific features may be limited based on the point system

While Mr. Glines responded to various questions/comments from Council, discussion was held regarding the different options, resulting in Council providing guidance to City staff in preparation of the November 23 public hearing on the UDO amendments to the Downtown Master Plan. Mayor Bellamy asked staff to provide examples of what is being proposed, as visualization will make the presentation clear. In addition, Councilman Smith asked that staff underscore the areas of agreement. Councilwoman Manheimer emphasized that this has been worked on by a large number of people for hundreds of hours and they have reached consensus.

At 4:17 p.m., Mayor Bellamy recessed the worksession to go into the formal meeting.

Tuesday – November 9, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Bothwell gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF THE WNC NATURE CENTER ASSOCIATION OF ZOOS AND AQUARIUMS RE-ACCREDITATION

City Manager Jackson invited to the podium for recognition Mr. Jim Maddy, President and CEO of the Association of Zoos and Aquariums; Mr. Chris Gentile, Nature Center Director; Ms. Diane Ruggiero, Superintendent of Cultural Arts; Mr. Roderick Simmons, Director of Parks, Recreation & Cultural Arts; and the WNC Nature Center staff. He said that in early September 2010, the Western North Carolina Nature Center was re-accredited for another 5-year period by the Association of Zoos and Aquariums (AZA). Today we are honored to welcome Mr. Jim Maddy, President and CEO of AZA to Asheville as he presents the AZA accreditation plaque to the City of Asheville for the Nature Center. Mr. Maddy then spoke about the rigorous efforts and standards that needed to be met to achieve this re-accreditation.

Mayor also recognized Friends of the Nature Center, Mr. Simmons, Mr. Gentile and his staff for their efforts in making the WNC Nature Center an excellent facility.

B. PROCLAMATION PROCLAIMING NOVEMBER, 2010, AS "NATIVE AMERICAN INDIAN HERITAGE MONTH"

Mayor Bellamy proclaimed November, 2010, as "Native American Indian Heritage Month" in the City of Asheville. She said that she would send the proclamation to Ms. Renissa Walker, Manager Kituwah Preservation & Education Program for the Eastern Band of Cherokee Indians, who was unable to attend the meeting.

C. PROCLAMATION PROCLAIMING NOVEMBER 12, 2010, AS "CITY SCHOOLS CHAMPIONS DAY"

Mayor Bellamy read the proclamation proclaiming November 12, 2010, as "City Schools Champions Day" in the City of Asheville. She presented the proclamation to Ms. Leah Ferguson and the champions Wachovia Wells-Fargo Bank, Appalachian Sustainable Agriculture Project, Tanya Presha, Susie Jameson, Marjory Jackson Maxwell, and Cheri Torres. Ms. Ferguson then briefed City Council on thanked City Council for their support.

D. PROCLAMATION PROCLAIMING NOVEMBER 14-20, 2010, AS "NATIONAL HUNGER AND HOMELESSNESS AWARENESS WEEK"

Vice-Mayor Newman read the proclamation proclaiming November 14-20, 2010, as "National Hunger and Homelessness Awareness Week"" in the City of Asheville. He presented the proclamation to Ms. Laura Furey, representing the Key Center for Community Citizenship and Service Learning at UNC-Asheville, and Ms. Amy Sawyer, the City's Homeless Initiative Coordinator, who briefed City Council on some activities taking place during the week.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON OCTOBER 26, 2010

B. ORDINANCE NO. 3913 - ORDINANCE AMENDING THE FEES & CHARGES MANUAL TO WAIVE THE BURNING PERMIT FEE FOR THE PROPER DISPOSAL OF THE UNITED STATES FLAG AT FLAG DISPOSAL CEREMONIES

Summary: The consideration of an ordinance amending the Fees & Charge Manual to waive the burning permit fee for the proper disposal of the United States Flag at flag disposal ceremonies.

The City of Asheville requires a permit for open burning within the city limits. Citizens obtain this permit at the Development Services Center and are charged $52 to cover the operational costs associated with the permit. American Legion Post #2 recently applied for a burning permit for a United States Flag retirement program. They informed us that they hold this program every 6 months and that they retire about 50 flags according to the United States Flag Code procedures for proper disposal during these ceremonies.

Staff would like to recommend that Council waive the burning permit fee for these ceremonies as there is no other way to properly dispose of United Stages Flags. The operational cost involved in issuing this permit include administration of the permit application and an on site inspection of the open burning. The on site inspection typically takes 30 minutes of one staff members time.

The Finance Committee has reviewed this request and has recommended approval.

This action complies with the City Council Strategic Operating Plan goals within Job Growth and Community Development in that it helps to reduce fees.

Pro:

- Citizens in Asheville will be able to properly dispose of flags according to the United States Flag Code without an associated cost of doing so.

Con:

- None identified

A minor reduction in revenue would occur as these permits would be issued without the $52 fee. The recent request by the American Legion is the first that we have record of, so we do not anticipate a large number of these permits being issued.

Staff recommends City Council adopt an ordinance amending the Fees & Charges Manual to waive the Burning Permit Fee for Flag Disposal Ceremonies.

ORDINANCE BOOK NO. 26 – PAGE 336

C. RESOLUTION NO. 10-235 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH URBAN TRANS CONSULTANTS FOR THE DEVELOPMENT OF THE MARKETING PROGRAM FOR THE CITY OF ASHEVILLE TRANSIT SERVICES

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Urban Trans Consultants Inc. for the development of the Marketing Program for the City of Asheville transit services.

The Transit Master Plan (TMP), approved by City Council in October 27 2009, identified the development of marketing – branding strategy as one of the essential elements to promote the use of the transit system. This strategy is developed along with the implementation of the first phase of the TMP that proposes operational changes and increases frequency to 30 minutes in the main corridors and coincides with the delivery of the five new hybrid buses.

The Transportation Management Division, Transportation Department, issued a Request for Proposals (RFP) for the Transit Marketing Program on August 13 2010. The RFP closed on September 8 2010, and seven proposals were received from the following firms:

1. Hornsby BranDesign, Knoxville, TN
2. Urban Trans Consultants Inc., Atlanta, GA
3. B.B. DESIGN Inc., Fort Wayne, IN
4. SmartMaps, Knoxville, TN
5. Task Mania, LLC, Asheville, NC
6. Native Marketing, Asheville, NC
7. Granite Sky Design, Inc., Huntsville, NC

The evaluation committee recommended Urban Trans Consultants Inc. as the firm to provide services for the development of the City of Asheville Transit Marketing Program. The firms were evaluated based on their experience, similar projects completed, team qualifications, quality of proposal and project management plan. This procurement process has followed federal regulations that apply for professional services and geographic preference is not a factor to be considered.

The Transit Commission reviewed this and recommended approval.

The project cost will be approximately $132,674 and $17,000 contingency for unforeseen expenses the consultant may incurred during the development of the contract.

The goals of this marketing program are:

1. Improve Asheville Transit's public image.
2. Inform the public of the TMP route changes.
3. Boost ridership by targeting choice riders and tourist.

This action complies with the City Council Strategic Operating Plan, in particular the financial responsibility, pursuing funding opportunities with State and Federal government; and green and sustainable, since this program will contribute to the implementation of the TMP, therefore improving the multi-modal network.

Pros:

- The marketing strategy will give a fresh image to the transit system, promote the implementation of the first phase of the TMP, and highlight the new buses that the City should receive towards the beginning of the next calendar year.
- Improves the experience of passengers through the creation of improved maps, schedules, and website and other way-finding material.
- Federal Funds will provide 80% of the total cost of the marketing task, which equates to $120,000.

Cons:

- The total maximum cost of the subject project is $150,000.
- A 20% local match, which equates to $30,000 is required and it was already budgeted.

The cost of the marketing program will be approximately $132,674 and $17,000 contingency. This project is funded 80% by the Federal Transit Administration and 20% by the City. The project is already budgeted in the Transit Capital Fund.

City staff recommends that City Council adopt a resolution authorizing the City Manager to enter into a contract with Urban Trans Consultants Inc. to develop the Marketing Program for the City of Asheville Transit.

RESOLUTION BOOK NO. 33 – PAGE 244

D. RESOLUTION NO. 10-236 - RESOLUTION AMENDING THE 2010 CITY COUNCIL MEETING SCHEDULE TO ADD A WORKSESSION ON DECEMBER 14, 2010, AT 3:00 P.M. IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF CITY HALL TO REVIEW ANNEXATION POLICY DIRECTION AND LEGISLATIVE OBJECTIVES

RESOLUTION BOOK NO. 33 – PAGE 245

E. ABC BOARD MEMBER COMPENSATION

Summary: The City Clerk received a letter from Curtis L. Canty, Chief Executive Officer of the Alcoholic Beverage Control Board as follows: "The members of the City of Asheville Board of Alcoholic Control respectfully request that the Asheville City Council approve the following monthly compensation amounts at its November 9, 2010 meeting: Board Chairman - $300; Each Board Member - $250. I am providing this request pursuant to North Carolina General Statute 18B-700(g). The Asheville ABC system is very unique as we operate 10 stores with a total of 33 full-time and 33 part-time employees including law enforcement responsibilities, and we generate yearly revenues in excess of $19 million dollars. In addition, we have distributed to the City and County a total of $5,408,478 since 2005. We thank the Asheville City Council in advance for it's consideration of this request."

Upon inquiry of Councilman Russell, Councilman Davis said the ABC Board manages the revenue stream and they do a credible job. He felt this is a model board and they are very accountable. He noted that some profits are redistributed to the City and County. He felt that even though this is a fairly high amount of pay for volunteer service, it is a minimal amount of compensation for the work they dedicate to the Board and the exposure they receive from their service.

City Attorney Oast said that this request to Council is pursuant to N.C. Gen. Stat. sec. 18B-700 (g).

At the request of Vice-Mayor Newman, City Manager Jackson said that he would provide Council with a memorandum on the extraordinary duties, responsibilities and time commitments of the ABC Board members. Additionally, he would provide them information on how their compensation compares to the compensation of the Airport Authority Board members and the Metropolitan Sewerage District Board members.

F. ORDINANCE NO. 3914 - ORDINANCE TO PROVIDE FOR AN APPOINTMENT TO THE ASHEVILLE TRANSIT COMMISSION BY BUNCOMBE COUNTY

Summary: The consideration of an ordinance to provide for an appointment to the Asheville Transit Commission by Buncombe County.

: The Transit Commission consists of seven members serving three year terms. The initial ordinance, adopted in 1999 as a successor to the Transit Authority, provided for all appointments to be made by the City Council. Recently, Council directed that one of the appointments be made by the County. This reflects the fact that the service area for the transit system now extends beyond the City limits, and will likely continue to grow.

The ordinance provides that the Buncombe County Board of Commissioners will make its appointment to the first vacancy occurring as a result of a term expiring after the effective date of the ordinance. This vacancy will occur in December.

This action aligns with the City Council Strategic Operating Plan in that it supports development of a regional transit system.

Pros:

- Supports regional transit system
- Reflects current service beyond City limits
- Establishes another regional partnership with City local government

Cons

- None noted

Adoption of the ordinance is recommended.

ORDINANCE BOOK NO. 26 – PAGE 338

G. RESOLUTION NO. 10-237 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A DONATION FROM THE COMMUNITY ACTION OPPORTUNITIES OF THE ROOF AT THE REID CENTER ANNEX

Summary: The consideration of a resolution authorizing the City Manager to accept a donation from the Community Action Opportunities (CAO) of the roof on the Reid Center Annex.

In April 2010 City Council authorized CAO to replace the roof on the Reid Center Annex. Since then CAO has successfully met the requirements of the roof installation agreement and the work is complete. CAO is now making a gift of the roof to the City valued at $59,437.75.

The action complies with the City Council 2010-2011 Strategic Plan in that it supports fiscal responsibility of exploring alternatives for enhancing the city's long-term financial commitment to master plan implementation, infrastructure maintenance, capital improvements,

and public facilities. The action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it increases department resources with alternative funding sources ensuring a high level of service in parks and facilities by addressing capital maintenance of existing parks and facilities to meet community standards.

Pro:

- Further strengthens the partnership between the City and CAO to enhance facility development and programming at the Reid Center Annex.

Con:

- None noted.

There is no net fiscal impact to the City's operating or capital improvement budget in accepting the roof donation.

City staff recommends City Council adopt a resolution authorizing the City Manager to accept a donation from the Community Action Opportunities of the roof at the Reid Center Annex.

RESOLUTION BOOK NO. 33 – PAGE 246

H. ORDINANCE NO. 3915 - BUDGET AMENDMENT TO ACQUIRE APPROXIMATELY 12 ACRES OF PROPERTY LOCATED AT SHELBURNE AND HOMINY CREEK ROAD, KNOWN AS THE WALLER TRACT

Summary: The consideration of a budget amendment, in the amount of $130,285, for action approved by City Council on October 12, 2010, authorizing the acquisition of 12 +/- acres of property located at Shelburne and Hominy Creek Road, known as the Waller Tract.

This budget amendment establishes a project budget within the General Capital Projects Fund for the purchase of 12 acres of undeveloped real property along the Hominy Creek. This property is to be land banked for the future implementation of the Hominy Creek Greenway. Acquisition of this property was approved by City Council in closed session on October 12, 2010, with the purchase price of the property at $120,000 with estimated $15,000 in closing costs for legal fees and surveying costs. The purchase will be funded with contributions from the City and Buncombe County, and from third party pledges.

For budgeting purposes, a total estimated project budget has been set at $130,285, plus additional third party funds held in escrow by the closing attorney in the amount on $16,715. The City has received $60,000 from Buncombe County for its share. An additional third party pledge of $10,285 has been received by the City of Asheville as a donation. The City's contribution of $60,000 will come from the $75,000 that was approved for land acquisition as a part of the Parks & Recreation Department's FY2010-11 Capital Improvement Plan (CIP).

In the event that total acquisition costs are less than the budgeted amount plus the amount held in escrow, remaining funds will be dispersed according to the percentage of initial contribution.

This action complies with the City Council Strategic Operating Plan by demonstrating fiscal responsibility through leveraging external partners to pursue master plan implementation. In addition, this action complies with the Greenway Master Plan in that this acquisition serves to land bank a key property for future implementation of the Hominy Greenway.

This item has been reviewed by the Greenway Commission and has received the Commission's endorsement.

Pros:

- Leverage outside funding to implement the Greenway Master Plan
- Buyer's real estate market has allowed for a favorable purchase price

Con:

- None

As noted above, the City's contribution to this project will come from the $75,000 that was approved for land acquisition as part of the FY2010-11 Parks and Recreation Department's CIP. Revenue sources for the project are summarized below:

City's Contribution through currently budgeted CIP	$60,000
County Contribution (already received)	$60,000
Private Donations (already received)	$10,285
Total project budget	$130,285

City staff requests City Council to adopt a budget amendment of $130,285 for action approved by City Council on October 12, 2010, authorizing the acquisition of 12 +/- acres of property located at Shelburne and Hominy Creek Road, known as the Waller Tract.

ORDINANCE BOOK NO. 26 – PAGE 340

I. ORDINANCE NO. 3916 - BUDGET AMENDMENT FOR YEAR 5 WEED & SEED FUNDING

Summary: The consideration of a budget amendment, in the amount of $155,992, from the U.S. Department of Justice for Year 5 Weed & Seed funding.

October 2004, elected officials, city staff and Asheville citizens mobilized to develop comprehensive strategies to address issues of law enforcement, neighborhood restoration, and prevention/intervention/treatment programs and activities in the West Riverside area of Asheville as part of a Weed and Seed initiative. The strategy was introduced to the community, via a series of public meetings, to determine the concerns of residents of the targeted area. The strategy was favorably received with the understanding that residents would be integrally involved in the planning and implementation of the initiative.

In July 2006, the U.S. Department of Justice announced the designation of Asheville as an "Officially Recognized" site for the federal Weed and Seed initiative aimed at reducing crime and improving quality of life. Official recognition made the City of Asheville eligible to apply for Weed and Seed funds once a year over a five year period. The first funding application was approved and awarded in August 2006.

On September 15, 2010, Assistant Attorney General, Laurie Robinson, announced the City of Asheville's application for fifth year continuation funding was approved in the amount of $155,992. 50% of the funds will be used to support law enforcement and community police programs and 50% will be used to support neighborhood initiatives such as youth services, parenting programs, health and nutrition programs, vocational programs, neighborhood clean-ups, housing services, and the salary of the Weed & Seed site coordinator. No additional city funding will be required to support this fifth year grant.

The West Riverside Operation Weed and Seed steering committee, residents and several agencies such as the Housing Authority of the City of Asheville, Asheville City Schools, Children First/ Communities in Schools of Buncombe County, OnTrack Financial Education and Counseling, Asheville Greenworks, GO Asheville, LEAF in Schools and Streets and others continue to collaborate to improve quality of life for the residents of the West Riverside area of Asheville.

Data collected over the last 3.5 years suggests the initiative is having an impact in the targeted area. When comparing the averages from 2 years before strategy implementation to the 3.5 years since implementation, the following changes have been recorded: a 45% decrease in drug calls for service, a 32% decrease in violent crime and a 24% decrease in weapons offenses. An independent evaluator completed a survey of residents in 2009 and made the following assessment, "data shows that the areas where the Weed and Seed program have dedicated resources are improving, but that there is justification for the continued dedication of resources. Efforts should be continued, as many residents see gains being made in public safety and community appearance in the past two years. However, the respondents [residents of the Weed and Seed area] also provide evidence that there is more room for improvement."

This action complies with the City Council Strategic Operating Plan. It complies with the following goals in the "Safe Focus Area": continue to implement strategies to significantly improve public safety, reaffirm commitment to eliminate open air drug market in Asheville, support recreation and employment alternatives for youth at risk of gang exposure. Finally, it complies with the "Job Growth & Community Development Focus Area" in that it supports small business development and expands partnerships with UNCA, AB Tech and other institutions to achieve goals in health and wellness, workforce development, and economic development.

Pros:

- Significantly reduce violent crime and drug activity in a high crime area
- Provide a comprehensive crime prevention plan to address law enforcement, neighborhood restoration and prevention/intervention/treatment programs with the residents of the targeted area
- Mobilize community residents to collectively improve the conditions in the targeted area
- Provide resources for residents as a means of personal growth and development
- Address the social, educational, economic and cultural issues in the targeted area through multi-agency collaborations
- Leverage resources to sustain the program and replicate the strategies in other challenged areas in the city

Con:

- Some resistance to change by the residents who live in the target area.

Grant revenue of $155,992 in FY 2011 to implement the comprehensive Weed and Seed strategy which funds police overtime, police equipment, a coordinator position, and community-based resource provider contracts among other things at no additional cost to the city. The goals of the initiative will be sustained by established community efforts after the fifth year of implementation when Weed and Seed funding is no longer available. This program is 100% grant funded; there is no impact on the General Fund budget.

City staff recommends City Council adopt a budget amendment authorizing the City Manager to establish a budget in the amount of $155,992 for the fifth year of the West Riverside Operation Weed and Seed initiative.

ORDINANCE BOOK NO. 26 - PAGE 342

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A WNC REGIONAL AIR QUALITY AGENCY UPDATE

Mr. David Brigman, Director of the WNC Regional Air Quality Agency, said that their mission is to monitor and regulate Buncombe County's air quality to safeguard public health and the environment, while preserving the quality of life and economic vitality of the area. He provided a history of the Agency, along with an overview of the board.

He explained that the Agency (1) is responsible for enforcing federal, state, and local air quality regulations (a) permitting of industrial and area sources; (b) compliance and enforcement; (c) asbestos removal and open burning; and (d) monitor air quality for compliance with national ambient air quality standards; and (2) is responsible for education and outreach (a) pollution prevention projects and outreach; and (b) indoor air quality hotline. He explained the planning and rules associated with the Agency, the reduction in Title V revenues, the permitting program – 2009 stationary sources, the inspection program – 2009 stationary sources, and the permitting and inspection program 2009 – demolition and asbestos removal.

He talked about air pollution in WNC, along with national standards and reducing ozone in WNC. Using charts and graphs, he explained the emissions reductions at Progress Energy's Asheville stream plant; the ozone attainment status; ozone design values in Buncombe County from 1999-Present; ozone trends in Buncombe County from 1993-Present; Air Quality Index for Ozone in Asheville from 2003-Present; and Fine Particulate Matter in WNC.

He then explained The Idling Reduction Campaign at local schools, clean burning techniques, radon awareness, and diesel retrofits.

He said that you can (1) conserve electricity (a) use power management on your monitor and computer to reduce energy consumption; (b) buy energy efficient light bulbs and turn off the lights when not in use; and (c) insulate your home; (2) drive less (a) carpool; (b) combine trips; and (c) don't idle your vehicle – turn off your engine; (3) buy more fuel efficient vehicles; (4) participate in NC Green Power (a) choose to pay $4/month to purchase 100 kilowatts of renewable energy – sign up on your electric bill; and (5) know the air quality forecast.

On behalf of City Council, Mayor Bellamy thanked Mr. Brigman, Chairman Lovin and the entire Board for their efforts on the Board.

B. COMMUNITY ACTION OPPORTUNITIES UPDATE

Ms. Vicki Heidinger, Executive Director of the Community Action Opportunities, provided Council with a brief history of the agency and their partnership with the City of Asheville. She then explained that their mission is to help people who live on limited income transform their lives. He presented Council with their annual report for 2009-10. In August they received their first American Recovery and Reinvestment Act (ARRA) grant award - $214,000 for general Head Start operations. In September they received an additional $740,000 for Life Works. In November of 2009, state authorities approved their largest ARRA-related grant for the Weatherization Assistance Program, $1.4 Million, which represents 40% of their 3-year allocation. He then explained how those funds were used.

She then explained in detail their programs along with their outcomes (1) Life Works; (2) 21st Century Parenting; (3) Black Mountain Family Center; (4) Weatherization Assistance; (5) Heating/Air Repair/Replacement Program; (6) Head Start; and (7) North Carolina Family Development Credential.

On behalf of City Council, Mayor Bellamy thanked Ms. Heidinger, Chairman Schell and the entire Board for their efforts on the Commission.

C. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 10-238 - RESOLUTION AUTHORIZING THE CITY MANAGER TO WITHDRAW AWARD OF THE CONTRACT WITH MATRIX SYSTEMS FOR A KEY CARD ACCESS AND CAMERA SECURITY SYSTEM FOR THE CITY OF ASHEVILLE

RESOLUTION NO. 10-239 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH RHS PROTECTION FOR A KEY CARD ACCESS AND CAMERA SECURITY SYSTEM FOR THE CITY OF ASHEVILLE

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of city staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council approval of the following:

- A resolution authorizing the City Manager to withdraw award of contract for the Key Card Access and Camera Security System contract with Matrix Systems approved March 9, 2010 due to licensing issues with contractor.

- A resolution authorizing the City Manager to enter into a contract with RHS Protection for the Key Card Access and Camera Security System for the Municipal Building, APD Firing Range, Public Works and City Hall. The total bid estimate is $260,650. The portion for the Municipal Building and Firing Range is $178,650 which will be covered by the 2009 JAG ARRA Grant. The JAG ARRA Grant Budget was approved by Council August 11, 2009. The balance of the bid, $82,000 will cover Public Works and City Hall and will be paid from the budgeted Capital Project for security.

At its March 9, 2010, meeting, City Council adopted Resolution 10-62 authorizing the City Manager to execute a contract for this project with Matrix Systems for the Card Access and Camera Security System for the Municipal Building, APD Firing Range, Public Works and City Hall in the amount of $239,049.

In the course of reviewing the qualifications of the subcontractors that Matrix proposed to use for the project, staff learned that Matrix did not possess a license, required by the Alarm Systems Licensing Act (ASLA), to engage in the alarm systems business in North Carolina, which includes sales and installation work. Staff consulted the ASLA Board, the State agency that administers the ASLA, as to whether a license was required for the work that Matrix proposed to do. The ASLA Board ruled that Matrix was not properly licensed to complete the contract work specified. As such, Matrix is not the lowest, responsible bidder on the project and staff advised Matrix of this determination by letter dated August 30th.

Staff is requesting that City Council approve a resolution to withdraw the award of the bid to Matrix and to award it to RHS Protection as the next lowest, responsible bidder.

The Municipal and Firing Range enhancement will be fully covered by JAG ARRA Grant funding. The City Hall and Public Works portions will be funded with money set aside in the Building Security Capital Improvement Project, which was budgeted in a prior year's Capital Improvement Plan (CIP).

The equipment comes with a two year warranty plus an extended warranty through five years. Beyond this period the City of Asheville will be required to maintain the overall operations

and maintenance of the equipment. It is estimated that service extentions would run $15,000 per year. These costs will be added to the departmental operating budget at the beginning of the sixth year. The expected useful life of these systems are 10-15 years. The replacement costs will be at the expense of the department associated with the security equipment.

Pros:

- Increase safety for City Employees and facilities
- Increased safety for our communities
- Increased security of city property

Con:

- Maintenance cost

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to withdraw award of the Key Card Access and Camera Security System contract to Matrix Systems and (2) adopt a resolution authorizing the City Manager to enter into contract with RHS Protections for same for the City of Asheville.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Smith moved for the adoption of Resolution No. 10-238. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 247

Councilman Smith moved for the adoption of Resolution No. 10-239. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 248

D. CARBON FOOTPRINT ANNUAL REPORT

Energy Coordinator Maggie Ullman presented Council with the 2009-10 Carbon Footprint Annual Report. She outlined the following key highlights from the report: (1) tasked with a 6% reduction over 3 years the City delivered an 8.42% reduction; (2) the most significant reductions can be attributed to energy conservation in public buildings, streamlined efficiency in water distribution, and fuel/routing efficiency in transit; and (3) the most significant opportunities for future reductions are in the fleet and streetlight sectors.

Some 2009-10 financial facts include (1) municipal energy spending totaled $5,349,610; (2) carbon footprint reductions resulted in $336,216 avoided energy spending which is a 5.91% spending reduction from the previous year; and (3) grant monies awarded to the City in support of carbon footprint reduction totaled $8,839,345.

External impacts on energy usage includes (1) in Fiscal Year 2008-09, spending in many sectors increased due to an electricity rate increase of 11.5%; and (2) in Fiscal Year 2008-09, fuel spending in many departments decreased due to the brief fuel shortage in September 2008.

The carbon footprint reduction to date is $2,965 MT eCO2 which equals (1) annual emissions from 567 four-door sedans; (2) annual energy use of 252 homes; and (3) annual carbon sequestration of 76,026 trees.

In response to Vice-Mayor Newman, Ms. Ullman said that she would be coming back to Council in February to talk about the City's plan to achieve a 4% per year carbon footprint reduction.

In response to Councilman Smith, Ms. Ullman said that we project an annual savings of approximately $650,000 for the LED street light replacement.

Mayor Bellamy thanked Ms. Ullman for her commitment to this effort.

E. VOLUNTEER SIDEWALK CLEANUPS

Councilman Bothwell presented a short video explaining the sidewalk clean-ups the volunteer group has done since April 2010. Given the ordinance change at the October 26 meeting, he felt this effort could become a part of the education campaign. They have planned a City-wide clean-up day for Saturday, November 20. He hoped this video would educate the public on the need for people to maintain to sidewalks on their property, and to tell people who are physically limited in their ability to do the work that volunteers are available to help out.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PROPERTY LOCATED AT 301 LONG SHOALS ROAD (INGLES AREA) TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3917 - ORDINANCE ZONING 301 LONG SHOALS ROAD (INGLES AREA) TO HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:23 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to zone 301 Long Shoals Road (Ingles area) to Highway Business District. This public hearing was advertised on October 29 and November 5, 2010.

The City of Asheville recently annexed (effective September 30, 2010) 3. 6 acres (all of one parcel and a portion of another) located at 301 Long Shoals Road. The property is located on the south side of Long Shoals Road at the intersection of Long Shoals Road and CP and L Drive. The property contains a portion of the Ingles grocery store and an Ingles Gas Express facility.

The property is currently zoned Commercial Service by Buncombe County. The portion of the Ingles store that is currently in the City of Asheville is zoned Highway Business. Staff proposes HB zoning for the remainder of the facility.

Pro:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's comprehensive plan.

Con:

- None noted.

Based on the analysis provided in the report, staff finds this request to be reasonable. At a meeting on October 6, 2010, the Asheville Planning and Zoning Commission recommended approval of this initial zoning (6-0).

Mayor Bellamy closed the public hearing at 6:25 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3917. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 344

B. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PROPERTY LOCATED ON SCHENCK PARKWAY TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3918 - ORDINANCE ZONING PROPERTY ON SCHENCK PARKWAY TO CENTRAL BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:26 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to zone property on Schenck Parkway to Central Business District. This public hearing was advertised on October 29 and November 5, 2010.

The City of Asheville recently annexed (effective September 30, 2010) .7 acres of a 10.32 acre parcel on which is sited a convenience store and fast food establishment at 380 Long Shoals Road. The property is located on the west side of Schenck Parkway.

Of the .7 acres, 3,500 square feet was not previously zoned by the City of Asheville. The remainder of the parcel is zoned Central Business District (CBD). Staff proposes CBD zoning for this last portion of the property.

Pro:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's comprehensive plan.

Con:

- None noted.

Based on the analysis provided in the report, staff finds this request to be reasonable. At a meeting on October 6, 2010, the Asheville Planning and Zoning Commission recommended approval of this initial zoning (6-0).

Mayor Bellamy closed the public hearing at 6:26 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved for the adoption of Ordinance No. 3918. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 346

C. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PROPERTY LOCATED IN THE DEERFIELD AREA AT RACQUET CLUB ROAD/SALISBURY DRIVE TO INSTITUTIONAL DISTRICT

ORDINANCE NO. 3919 - ORDINANCE ZONING PROPERTY IN THE DEERFIELD AREA AT RACQUET CLUB ROAD/SALISBURY DRIVE TO INSTITUTIONAL DISTRICT

Mayor Bellamy opened the public hearing at 6:27 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to zone property in the Deerfield Area at Racquet Club Road/Salisbury Drive to Institutional District. This public hearing was advertised on October 29 and November 5, 2010.

The City of Asheville recently annexed (effective September 30, 2010) 29.3 acres of a 109.76 acre tract that is the site of the Deerfield Retirement Community. The property is located on and north of Salisbury Drive at the intersection with Racquet Club Road.

Of the 29.3 acres, approximately 2200 square feet was not previously zoned by the City of Asheville. The remainder of the parcel is zoned RM-16 and Institutional. The 2200 square feet more closely aligns with the portion of the lot zoned Institutional. Staff proposes Institutional zoning for this last portion of the property.

Pro:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's comprehensive plan.

Con:

- None noted.

Based on the analysis provided in the report, staff finds this request to be reasonable. At a meeting on October 6, 2010, the Asheville Planning and Zoning Commission recommended approval of this initial zoning (6-0).

Mayor Bellamy closed the public hearing at 6:27 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3919. This motion was seconded by Councilman Smith and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 348

D. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PROPERTY LOCATED AT 1445 TUNNEL ROAD TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3920 - ORDINANCE ZONING PROPERTY AT 1445 TUNNEL ROAD TO HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:27 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to zone 1445 Tunnel Road to Highway Business District. This public hearing was advertised on October 29 and November 5, 2010.

The City of Asheville recently annexed (effective September 30, 2010) a 1.5 acre tract on which a dental clinic is located. The property is located at 1445 Tunnel Road.

The property is currently zoned R-2 by Buncombe County. Staff proposes that the property be zoned Highway Business as are the other properties in the area that are in the City of Asheville.

Pro:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's comprehensive plan.

Con:

- None noted.

Based on the analysis provided in the report, staff finds this request to be reasonable. At a meeting on October 6, 2010, the Asheville Planning and Zoning Commission recommended approval of this initial zoning (6-0).

Mayor Bellamy closed the public hearing at 6:28 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3920. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 350

E. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF ENKA CENTER LOCATED ON SAND HILL ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT, RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND HIGHWAY BUSINESS DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING

ORDINANCE NO. 3921 - ORDINANCE TO CONDITIONALLY ZONE ENKA CENTER LOCATED ON SAND HILL ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT, RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT AND HIGHWAY BUSINESS DISTRICT TO COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING

Mayor Bellamy opened the public hearing at 6:28 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone Enka Center located on Sand Hill Road from Commercial Industrial District, RS-2 Residential Single-Family Low Density District and Highway Business District to Commercial Industrial District/Conditional Zoning, including a request for modifications to allow parking within the front setbacks and to modify required transportation infrastructure. This public hearing was advertised on October 29 and November 5, 2010.

She said that the applicant is requesting a Conditional Zoning for multiple parcels located off of Sand Hill Road and Smoky Park Highway from RS-2 (Residential Single-Family Low Density District), HB (Highway Business District) and CI (Commercial Industrial District) to CI - CZ (Commercial Industrial District – Conditional Zoning) in accordance with Section 7-7-8 of the UDO. With this master plan approval, each phase will be reviewed by the Technical Review Committee as a Level II project.

She said that due to the large plan size, overall plan pages have been distributed. Detailed sections are available for review in the Planning Department.

The project site consists of nine separate parcels with a combined area of 191.90 acres, located off Smoky Park Highway and Sand Hill Road. This site comprises a substantial portion of the campus formerly occupied by the BASF plant and is zoned CI (rezoned from IND to CI - January 2009) with a small portion of HB at the northern boundary and a small area of RS-2 in the northeastern corner. Adjacent zoning districts include Industrial, CBII and RS-2; adjacent uses are industrial, commercial, industrial vacant and recreational. Approximately half of the project area is within the Asheville City limits; the other half is within the extraterritorial jurisdiction area (ETJ).

The applicant is proposing a mixed-use development with 509,233 SF of retail commercial space; 19,803 SF of restaurant use; 364,650 SF office/medical/business space; 4,500 SF for a financial institution; 130,000 SF of warehouse/industrial space and additional acreage for recreation/open space/greenway use. Buildings are 1-3 stories with maximum heights between 50 – 80 feet. The appearance of the retail structures/area will be governed by the "Big Box Standards (Section 7-16-2(b)(10) of the UDO)" and will be reviewed in detail with each subsequent phase submittal.

The development plans show build-out over 15 phases, which each phase returning to the TRC as a separate Level II review. Due to the overall timeline for completion as +/-14 years and with the inevitability of changing market conditions over time, there may be some deviation from the master plan in terms of use type and phasing. Staff will bring any significant amendments back to City Council for review.

Primary access to the property will be from a new roadway connection to Smoky Park Highway at the northern boundary of the project site, to be built during the initial phase. The applicant is proposing a new bridge that will span over the Norfolk Southern rail line and Hominy Creek, leading into road "A." There are two main roadways proposed through the project site and two smaller connector roads. A secondary, narrowed access point is located towards the eastern edge of the site and connects into Jacob Holm Way. Retail buildings "I" and "Z" (Phases 10 & 11) are accessed directly from Sand Hill Road but do not have connections into the larger site at this time. All new roadways are noted as public.

The proposal provides sidewalks on both sides of all roads, including the bridge crossing. Dedicated bike lanes will be provided throughout the development, however, after significant discussion with City staff and incorporating input from the Bicycle and Pedestrian Task Force, the proposal shows dedicated bike lanes ceasing immediately before the bridge. At that point, the outside travel lanes on both sides increase to 13 feet in width (from 11') and bicyclists would merge with vehicular traffic as they approach and/or exit Smoky Park Highway.

According to plans, approximately 4,000 vehicular parking spaces are proposed throughout the project site on various surface lots, incorporating handicapped and van-accessible spaces. There will be a dedicated transit stop at the entrance bridge at Smoky Park Highway for future transit system. Bike parking is dispersed throughout the site.

Significant landscaping will be required throughout the site, including street trees, parking lot landscaping, street buffers, building impact landscaping, dumpster screening and a type "B" property line buffer where the site is adjacent to RS-2 zoning. More than 29 acres of open space will be provided, primarily through the recreational areas and a greenway. The plans include dedication of land for the construction of a greenway along Hominy Creek within the project boundaries.

A large portion of the site (including the closed landfill) has been granted a Brownfield designation by the state and any activity within those limits will be governed by state regulations. This area is indicated for future recreational use in Phase 3. Most of the environmental clean up has been completed and abandoned industrial buildings have been removed. The remediation

work has included removal of asbestos, lead-based paint and other hazardous materials from the site.

The western portion of the project site falls within the City limits, while the eastern portion is within the ETJ. Under the existing conditions, the development layout results in proposed infrastructure (roads and bridge) being situated only partially within the City's jurisdiction – however, the applicant has indicated that the infrastructure would be publically maintained. Any infrastructure that the City maintains must be entirely within the City limits. Additionally, the City limits line bisects a number of proposed structures so a selective voluntary annexation is needed to resolve these issues. The applicant has indicated interest in voluntarily annexing subsequent phases of development as they are built-out, although this is not included as part of this zoning proposal.

The following modifications need approval by City Council:

1. *Parking in Setback* – There are several locations where parking spaces encroach into the front setback, which is 35 feet in this zoning district. The applicant has provided a widened ROW to accommodate sidewalks, bike lanes, driving lanes and a landscaped boulevard, which takes up more space than a standard cross-section. Because of the need for more space for these desired transportation amenities, staff is supportive of this request. Additionally, the applicant has stated that parking will not encroach closer than 15 feet.

2. *Sidewalks and Bike Lanes on the Bridge* – The plans initially submitted included a request for elimination of sidewalk on one side of the bridge from Smoky Park Highway and sub-standard bike lanes. Staff was not supportive of this modification and preferred to see compliance with sidewalk and bike lane standards. Planning & Zoning Commission directed staff and the applicant to works towards an acceptable alternative (see *Required Reviews* below).

   After considerable discussion, the current proposal shows sidewalk on both sides of the bridge and widened outside travel lanes to accommodate bicyclists. Although this cross-section still does not technically comply with City standards, staff believes this layout can safely and reasonably accommodate pedestrian, vehicular and bicycle traffic entering and exiting the development and is supportive of the request.

This proposal was recommended for approval with conditions by the Technical Review Committee on September 20, 2010. The approval moved forward without staff support of the proposed reduced width bike lanes and elimination of sidewalks along one side of the bridge from Smoky Park Highway.

The Planning & Zoning Commission evaluated the project at their meeting on October 6, 2010, and recommended unanimous approval, inclusive of the modification to allow a parking encroachment into the front setback. With regard to the bridge cross-section, the Commission suggested that staff and the applicant should work to come up with various alternatives that may meet the intent of the City's goals for safe and adequate bicycle and pedestrian access. The Commission understood the not insignificant cost and time required with extending the width of the bridge because of complications spanning over the rail line but also highlighted the possibilities for transit, sidewalk and bike lane expansion out in this westward direction as well as the current bike and pedestrian needs within the site.

The only public comment received with regard to this project was at the Planning & Zoning Commission meeting, where a member of the community (also the Chair of the Greenways Commission) was present to support the project, especially the inclusion of the greenway along Hominy Creek. He also expressed a desire to see the City's standards for bike lanes and sidewalks met on the bridge cross-section.

Although not required, the Greenways Commission and Bicycle & Pedestrian Task Force included this proposal into their discussions. On September 9, 2010, the Greenways Commission voted unanimously to pass the following resolution: "Resolve that the Greenways Commission supports the plans to include a greenway in the Enka Center property and also supports the following additional details: 1.) Comments entered in the TRC Staff Report by Parks & Recreation Department staff; 2.) Plans should include bike lanes and sidewalks on both sides of all streets; 3.) The City should acquire a permanent easement for the greenway corridor to ensure ongoing public access; and 4.) Plans should incorporate any appropriate stream restoration elements."

On October 28, 2010, the applicant met with the Bicycle & Pedestrian Task Force to discuss alternatives for the bridge cross-section. The general consensus of the Task Force was that wider outside travel lanes on the bridge would safely accommodate bicycle traffic and may be preferable to dedicated, reduced-width bike lanes.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   Having been previously developed and used as the former BASF industrial site, the bulk of the project area is graded and flat. The development plan has been crafted to accommodate areas where there are topographic changes – for example, there is a significant variation in grade from Smoky Park Highway down into the site and the new bridge will span over the difference, with the railroad tracks and Hominy Creek protected below. Additionally, the area proposed for the recreational fields are somewhat higher than the western half of the site as this was the former landfill, but this physical separation works in its favor as the sports park activities are distinctly different from the commercial, office and warehouses on the rest of the site. The proposed greenway along the Hominy Creek is integrated into the development with connections to the shopping areas as well as the recreational fields.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The development includes multiple components that will greatly enhance and increase the value of adjoining and nearby properties, including brownfield remediation, asbestos and hazardous material removal, construction of a large portion of greenway along the Hominy Creek, the new access bridge from Smoky Park Highway, recreational fields on closed landfill and a variety of potential employment opportunities. These elements are expected to be a benefit to the area.

4. **That the proposed use or development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The almost 200 acre site is immediately surrounded by industrial and institutional uses. The proposed mix of retail, restaurant, office, medical, financial, manufacturing and warehouses are all appropriate in this location and have been situated within the site to compliment adjacent uses – i.e. the proposed recreational fields are in the northeastern corner, adjoining the existing Buncombe County Sports Park; the proposed warehouse and manufacturing phases are situated in the southeastern corner, adjoining Jacob Holm Industries and the proposed retail adjacent to the AB Tech satellite campus.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
Elements of the proposal are directly aligned with the City's goals and objectives, including providing a mix of uses (retail, medical, office, manufacturing, warehouse and recreational) on an infill site; locating a regional commercial center close to transportation facilities; redevelopment of a derelict former industrial site including environmental remediation of a brownfield location; inclusion of community park space and recreational fields on the former landfill; incorporation of a public greenway and a small annexation component.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The site is located just off Smoky Park Highway (US 19-23) and is within approximately 1 mile of I-40. Although the City of Asheville transit route does not currently extend this far west, provisions are included for a bus stop location on Smoky Park Highway to accommodate future transit expansion. Adequate water supply, fire and police protection, waste disposal and similar facilities are verified during the TRC review process.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed development is estimated to generate 36,000 vehicle trips per day prior to any trip reduction calculations. This trip generation estimate meets the City of Asheville's threshold of 100 vehicle trips in the peak hour to require a traffic impact study. Due to the nature and size of the project, staff recognizes the inherent uncertainty with identifying each specific use category at the conceptual stage. Therefore, updated studies or technical memorandums will be required as appropriate when these specific use categories are identified. The master plan traffic impact study has been received and reviewed by staff. The corresponding mitigation improvements listed in the study shall be the minimum that the developer is responsible for except as provided in future technical documents as the project phases are identified. The adjacent roadways to the development are maintained by the NCDOT and they will have final approval on the improvements as such.

In consideration of the multimodal standards and goals identified by the City of Asheville, it should be noted that the development's plans are indicating sidewalks on both sides of the road and bicycle lanes on the new street cross-sections. These facilities follow current City of Asheville design standards with the exception of the bridge cross section. Based on the direction given by the Planning and Zoning Commission and the Bike and Pedestrian Task Force, staff has worked with the developer through several potential solutions based on keeping the bridge footprint static. The current bridge cross-section proposal provides 5.5 feet of back of curb sidewalk on each side and wide outside travel

lanes to help facilitate sharing of these lanes between motor vehicles and bicycles. Based on this information, staff has no safety concerns with the current proposal.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Provides a mix of uses on an infill site in an appropriate location to be a regional commerce location
- Extensive environmental remediation of a former derelict industrial site (brownfield program)
- Re-use of closed landfill for recreational fields
- Includes a significant portion of the Hominy Creek Greenway (a portion to be constructed by the developer with the remaining length dedicated in an easement)
- Design retains and incorporates the historic ENKA clock tower.

Con:

- Bridge cross-section as proposed does not comply with City standards for bike lanes (however, it is an acceptable alternative).

Staff recommends approval of the conditional zoning request as submitted by the applicant, inclusive of the request to allow parking to encroach into the front setbacks (but not closer than 15') and the modified bridge cross-section. Staff suggests incorporating "Share the Road" type signage on the bridge/roadways for added safety.

Mr. Martin Lewis, developer, gave a brief history of the project and urged City Council for this support.

Mr. Will Buie, representing Lapsley & Associates Engineering, briefed Council on the details of the project, the overall road system and the bridge. He explained (1) the brownfield site – involves redevelopment of abandoned and blighted industrial site; (2) preservation and restoration of Enka clock tower; (3) recreational amenities – property is being donated to Buncombe County for the development of a recreation complex; (4) pedestrian oriented – greenway trail is planned through a portion of the site with dedication of rights-of-way for future trail sections; (5) alternate transportation – bike lanes are being planned for all new roads in the project site; and (6) transit facilities – bus stops are planned for two locations on the project. Regarding sidewalks and bike lanes on the bridge, they worked with City staff for a modified cross-section.

Mayor Bellamy closed the public hearing at 6:42 p.m.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3921, to conditionally zone Enka Center located on Sand Hill Road from Commercial Industrial District, RS-2 Residential Single-Family Low Density District and Highway Business District to Commercial Industrial District/Conditional Zoning, including approval of modifications to allow parking within the front setbacks (but not closer than 15') and approval of the modified bridge cross-section, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by

the TRC prior to issuance of any required permits; and (6) Incorporation of "Share the Road" type signage on the bridge/roadways for added safety. In addition, she asked that the motion include the following additional conditions, which Mr. Martin Lewis agreed to as well, (1) The developer grant a greenway easement dedicated along Hominy Creek within the boundary of the property owned by this developer, which said exact location to be determined by the developer and the City and/or County (wherever the land lies); (2) The developer will fund the construction of the greenway from the bridge moving in a southwesterly direction to the edge of the Creek where it leaves it the developer's property; (3) As a construction permit is applied for each of the phases, that phase be voluntarily annexed into the City; (4) The developer will set aside the land, delineated on the plans, to be used for some recreational purposes, e.g., ballfields. This motion was seconded by Councilman Bothwell.

In response to Councilman Davis, Mr. Lewis said that the County is open to accepting the brownfields area for ballfields. And, the project builds out, Mr. Lewis was amenable to discussing with potential tenants to partner with the public sector in preparing the land for the development of the ballfields.

Mr. Lewis responded to Vice-Mayor Newman when he asked if there was any potential for multi-family or residential development on this site.

The motion made by Councilwoman Manheimer and seconded by Councilman Bothwell carried unanimously.

ORDINANCE BOOK NO. 26 - PAGE 352

V. UNFINISHED BUSINESS:

A. CONTINUED CONSIDERATION OF AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGULATING TELECOMMUNICATION TOWERS TO BE MORE CONSISTENT WITH CHANGES IN THE FEDERAL AND STATE LAWS

ORDINANCE NO. 3922- ORDINANCE AMENDMENT THE UNIFIED DEVELOPMENT ORDINANCE REGULATING TELECOMMUNICATION TOWERS TO BE MORE CONSISTENT WITH CHANGES IN THE FEDERAL AND STATE LAWS

Mayor Bellamy said that this public hearing was held on October 26, 2010, and the matter continued to this date to allow staff to revise the ordinance per Council's direction.

Assistant Planning & Development Director Shannon Tuch said that telecommunication towers and concealed telecommunication support structures are allowed as a conditional uses in most commercial zoning districts. They are prohibited in residential districts unless located on publicly-owned property supporting a non-residential use, such as schools or fire stations, where they are allowed as conditional uses.

The federal Telecommunications Act was adopted in 1996. This law essentially required local jurisdictions to permit telecommunications facilities, but gave deference to local zoning regulations. However telecommunications towers were not originally included in the first UDO adopted in 1997. At the time, wireless telecommunications was a new and burgeoning industry, and the City hired a consultant to draft and explain the new standards, which were added in 1999. The standards have changed little over the years, despite changes in the federal and State laws and available technology. While these standards largely remain relevant and appropriate, there were a few areas that required updating in order to remain consistent with the changes in the laws. Moreover, in 2007, a State law was enacted to help implement the federal law, and to

provide for some consistency across local jurisdictions with respect to zoning decisions involving telecommunications towers.

At its meeting on September 14, Council adopted all of the proposed revisions to the telecommunications ordinances except the revision described in subparagraph (a) of the proposed ordinance related to locating of towers in residential areas. Additionally, the Planning & Economic Development (PED) Committee reviewed the proposed changes at their regular meetings on September 21 and October 19 and asked staff to conduct some additional research and to revise the proposed language to exclude towers in residential districts entirely and include stronger criteria related to setbacks/fall zones, minimum lot size, and co-location. This recommendation was carried to the City Council on October 26 where the recommendation failed to be adopted. In lieu of this change, the majority of Council recommended allowing towers in very limited circumstances in residential districts as a Conditional Use, and asked staff to continue to review existing standards regarding: co-location, setbacks and/or fall zones, and minimum lot size and to return with some new recommendations.

The proposed UDO text amendment proposes several changes to the conditional use standards for telecommunications towers. Per the recommendations from the October 19 Planning & Economic Development Committee (PED) meeting and the October 26 Council meeting, the proposed amendments include:

1. The requirement for facilities in residential districts to be located only on publicly owned property is removed in order to comply with a prohibition in the State law. Location on publicly-owned property is encouraged, and facilities are still prohibited from locating on property that is in use for residential purposes.

2. Increases the requirement for co-location from one additional user to two additional users.

3. Increases setbacks to a distance equal to the height of the tower, when located in proximity to residential zoning or residential structures.

4. Adds a requirement for a minimum five acre lot size to help address potential impact concerns. Minimum lot size may be reduced to three acres in instances where existing site features mitigate potential impact.

Facilities locating in residential areas are still required to obtain a conditional use permit, which requires submission of a detailed application and a public hearing. Therefore, those properties continue to have the safeguards afforded by this process.

The Strategic Operating Plan outlines several goals aimed at improving sustainable growth and development opportunities while ensuring that the City's regulatory environment effectively protect the citizens health, safety and welfare. Wireless telecommunications are a key element to sustainable growth and development and should be supported to the extent that it does not compromise other strategic goals.

Pros:

- Expands opportunity for a utility, enabling providers to meet the growing demand and provide improved service without undue impact on residential areas.

- Is consistent with state and federal laws

- Maintains special standards to mitigate land use conflict with residential properties.

Con:

- Expands the places where telecommunication towers may be located, most notably in residential areas, which has potential for conflict with the surrounding community.

Staff recommends adoption of the ordinance proposed.

She pointed out the following changes to the proposed ordinance, in addition to those directed by Council: (1) amending Section 7-16-2 (d) (3) (t) 6 to correct a typographical error in a subsection number; (2) amending Section 7-16-2 (d) (3) o. to read "... In addition, for all properties other than city-owned properties, telecommunication towers must be setback from any residentially zoned or residentially used properties a distance equivalent to the full height of the tower being erected. ..."; and (3) amending Section 7-16-2 (d) (3) (o.1) to read "In residential districts, a minimum lot size of five acres is required for properties other than city-owned properties. This requirement may be reduced by the city council if other site features are found to mitigate the impact of the tower but, under no circumstances shall the lot size be reduced to less than three acres."

In response to Councilman Bothwell, Ms. Tuch said that the separation standard reads that "no two telecommunication towers shall be constructed within 1,320 feet of each other unless documentation is provided to the Planning & Development Department to show that co-location on towers within 1,320 feet is not technically feasible."

In response to Councilwoman Manheimer, Ms. Tuch explained the criteria for cell towers. She said any cell tower application would be a conditional use permit. As a conditional use permit, in addition to the approximately 20 special standards, staff also evaluates it with the 7 conditional use permit findings.

In response to Councilman Bothwell, Ms. Tuch said that the applicant would have to verify that they can't co-locate on another tower. Should the City want to verify that information, the City can hire a consultant and the applicant is required to post a $5,000 bond should we need that to hire a consultant.

In response to Councilman Davis, Ms. Tuch said that the applicant has to show that there is no other option available to them. If there is another tower in that area, they would have to co-locate on it, if there was space on it. If a competitor wants to provide service in the area, the tower owner is required to lease that space at a lease rate that is supported by the market.

Mayor Bellamy said the agenda item is titled "continued discussion of an amendment to the Unified Development Ordinance regulating telecommunication towers to be more consistent with changes in the federal and state laws." She felt that was a little misleading, because this ordinance would also mean that cell towers would also have to apply to local laws as well. Ms. Tuch agreed. She said we are updating our local laws to be consistent with state and federal laws.

Councilwoman Manheimer explained that she is very familiar with the law regarding zoning of telecommunication towers. She was extremely concerned about allowing cell towers to be placed in residential districts. Her concern starts with the basic premise for land zoning – the purpose of land zoning is to help the individual protect the value and enjoyment of their land, so that they have some type of security in knowing how the neighboring lands will be developed. She felt that by allowing cell towers to be placed in residential districts, we will open the door for residential property owners to lose the value of their land and lose the enjoyment of their land and otherwise harm them. Some people have health concerns and visual concerns. We do need to comply with state and federal law but this is not the only option. We can elect to ban cell towers from residentially zoned districts. She understands that could potentially open the door for a legal challenge, but by allowing a conditional use permit process for cell towers to be located in residential districts, she argued that we are opening up the door for a legal challenge every time

we try to deny a conditional use permit in a residentially zoned district. She didn't know if there is a way to make a decision that safeguards us from legal challenges ever.

Councilwoman Manheimer then moved to adopt Ordinance No. 3922, (1) including the amendments regarding setbacks, co-location requirement and the technical amendment outlined by staff; (3) exclude the provisions allowing for cell towers to be located in residentially zoned districts in Section 7-16-2 (d) (3) a ; and (3) exclude the new Section 7-16-2 (d) (3) (o.1)). This motion was seconded by Councilman Davis.

Councilwoman Manheimer noted that her motion defaults the City back to the current zoning ordinance which allows cell towers in residentially zoned districts using a conditional use permit on publicly owned lands, which will still need to be resolved.

The following individuals spoke in support of the amended ordinance (which prohibits cell towers to be located in residentially zoned districts):

Ms. Suzanna Abell, resident on Beaverdam Road
Dr. Marilyn Haas
Mr. Tyler Martin, resident on Skyview Drive (provided Council with information regarding the real estate being devalued when cell towers are erected)
Mr. Andy Gladstone, resident on Skyview Circle
Ms. Ellen Bluestone, resident on Crescent Lane
Mr. Ralph Lambert, resident on Skyview Drive
Mr. Dave Castell, resident on Skyview Circle
Ms. April Hand, resident on Bassett Road
Mr. Kenneth Haas

City Attorney Oast advised Council that under state law the ability to consider public safety shall not include requirements relating to radio frequency emissions of wireless facilities.

Ms. Patsy Brison, attorney representing U.S. Cellular Corporation and North Carolina RSA#4, asked that her letter provided to Council on October 26, 2010, be incorporated into Council's records again at this meeting. That letter stated, in their opinion, that if Council does not adopt the proposed wording amendment, which includes 7-16-2 (d) (3) a, that Council will be in violation of federal law, specifically 47 U.S.C. sec. 332 (c) (7) b.IV and in violation of state law (N.C. Gen. Stat. sec. 160A-400.52 (h). She also suggested Council members review the conditional use permit procedure which includes for cell towers numerous pages of additional requirements. She then provided Council with a letter dated October 26, 2010, which states "We represent U.S. Cellular Corporation and North Carolina RSA#4, Inc. In the event the City Council does not adopt the amendment to Section 7-16-2 (d) (3) a. of the UDO regarding telecommunication towers, we respectfully request a decision in writing, supported by substantial evidence contained in a written record, on the application we made on July 27, 2010, for a conditional use permit for a telecommunications tower off of Beaverdam Road on property owned by Citadel/Lewis Memorial Park, LLC. We make this request pursuant to federal law (47 U.S.C. sec. 332) and state law (Part 3E of Article 19 of Chapter 160A of the North Carolina General Statutes)." She believed that the other changes made by Council provide even more additional protection to neighborhoods. She felt Council has only heard from one neighborhood tonight, but Council needs to consider the coverage issues all over the corporate limits. That is what federal law prohibits you from doing so by adopting the motion before you, it is her opinion that you will have the effect of prohibiting service. She respectfully requested that Council re-consider the motion or that it should fail.

In response to Councilman Russell, City Attorney Oast said that federal laws are hard to pin down because you don't know if you are effectively prohibiting service until you effectively prohibit it. That law is developed on a permit by permit basis. There are some cities where a ban in residential areas would have no effect because the cities are flat or small and the ban doesn't

affect the ability to provide. It is a location and fact-specific inquiry. With respect to the state law, the city may not require the placement of wireless support structures on city-owned or leased property. Our ordinance says publicly-owned property. He thinks we may have an issue with that in the future. He's not sure how much difference there is between city-owned and publicly-owned property in this particular context. That causes him more concern than federal law, but both matters are of concern.

Councilwoman Manheimer said that under state law, that is our current situation, regardless of whether we were considering an ordinance amendment or not. What we currently have on the books is arguably not in compliance with state law based on this public land vs. city-owned land issue. She felt that if we want to come into compliance with that law, we would still need to amend our current ordinance in some way. She would propose that we delete that we have now with regard to residentially zoned districts.

City Attorney Oast said that if Council were to ban towers or support structures in residential districts, in order to comply with state law, that may have the effect of putting us in violation of federal law.

Vice-Mayor Newman said that our commercially zoned areas are available for development of telecommunication towers in addition to city-owned property. City Attorney Oast read the provision that the opportunity needs to be available across districts.

In response to Mayor Bellamy, City Manager Jackson said that he did not know the immediate answer as to whether the radios we use for the Police Department communicate with radios in other jurisdictions, e.g., Sheriff's Department, County Emergency Medical Services. He said that he would report back to Council.

Mayor Bellamy was concerned if we ban cell towers in all residential districts, we will be saying that it's okay that some parts of our City don't have access to cell service. Because of the topography in the mountains, there are some dead zones in different areas of the City. She noted that some of the cities that have banned complete use of residential cell towers are flat and small. In addition, she felt a lot of people are moving away from land lines to cell phones. She asked for a friendly amendment that this ordinance be revisited in one year. Councilwoman Manheimer and Councilman Davis agreed to the friendly amendment.

In response to Mayor Bellamy, Ms. Tuch said in the use district, it reads: "In addition, where the city council determines that a telecommunication tower disguised as a coniferous tree is a preferable alternative to a concealed telecommunication support structure, it shall be allowed as a conditional use in residential districts at schools, fire stations, publicly-owned housing complexes, recreation centers or community centers when meeting the standards set forth in this subsection 7-16-2 (c) and (d) of this Chapter."

Mayor Bellamy said that the City does own one cemetery, so based upon her understanding, we could put a cell tower in that cemetery. City Attorney Oast noted that if the cemetery is city-owned, the City can just say no to the conditional use permit application.

Councilwoman Manheimer clarified that we don't have an allowance for placement on any publicly-owned properties. It's just those that are listed – schools, fire stations, publicly-owned housing complexes, recreation centers and community centers. It has to be public-owned and one of those types of uses.

Mayor Bellamy wanted to make sure that our residents understand that this is not all residentially zoned areas.

Upon an earlier inquiry of Mayor Bellamy, City Manager Jackson said that the Police and Sheriff Departments are on different frequencies which do not rely on cell tower technology. The

Fire Department is on a state-wide VIPER system, so they communicate on the same frequency. Neither one of those communication issues have to do with telecommunication towers.

As a result of the City Manager's response regarding public service communication, Mayor Bellamy was comfortable in voting in support of this ordinance amendment.

Mayor Bellamy felt it would be appropriate to have staff prepare an educational piece on our website to inform the public about the technology our Police and Fire Departments utilize to communicate between each other and other jurisdictions, such as the Sheriff's Department, Highway Patrol, and County Emergency Medical Services.

Councilwoman Manheimer clarified that the amended motion in the floor will preserve the status quo, which does allow towers in residential districts on a very limited basis to those properties previously listed - schools, fire stations, publicly-owned housing complexes, recreation centers and community centers.

The amended motion made by Councilman Manheimer and Councilman Davis carried unanimously.

At 9:09 p.m., Mayor Bellamy announced a short recess.

ORDINANCE BOOK NO. 26 - PAGE 357

B. RESOLUTION NO. 10-240 - RESOLUTION ADOPTING A TRANSFORMATIONAL DEVELOPMENT PROJECTS INCENTIVE POLICY

Planning & Development Director Judy Daniel said that this is the consideration of resolution adopting a Transformational Development Policy, along with the revised elements of said policy.

At the August 24 meeting the City Council directed the staff to prepare a proposal for a new Council policy to support development meeting thresholds that support major elements of the Council's Strategic Plan. These elements include easy access (walkability and transit) to major employment centers and areas proposed for redevelopment with uses that offer jobs as well as affordable and workforce housing elements. The staff had already received direction from the Planning and Economic Development Committee for such a "Transformational Development" policy, and the additional request from the Council that would support "workforce" housing elements was added to that request.

At the September 28 meeting the staff presented to the Council a proposal for such a policy based on that direction. After substantial discussion and questions, the Council directed the staff to return on November 9 after considering certain changes and options. This report presents answers to questions and alternative wording recommendations for the Council's consideration based on that direction.

As before, there are three parts to the policy: elements that must be included before the Council would consider support for a project, elements that are preferred, and the type of assistance the Council would consider extending. A basic tenant of the policy is that meeting the thresholds for Council consideration is not a guarantee that such assistance would be offered – that would remain at the discretion of the Council. The elements provide a threshold for consideration only. The revised policy document reflects the following changes in response to the Council's questions:

The original request of the Council was a new policy to assist development meeting thresholds that support major elements of the Council's Strategic Plan primarily including easy access (walkability and transit) to major employment centers and areas proposed for

redevelopment, and that offer jobs as well as affordable and workforce housing elements. While there was some Council discussion of the potential for the policy to offer an automatic approval if certain thresholds were met, there did not seem to be consensus to pursue that type of process, so the format was not changed. Also, a statement has been added to the beginning of the policy to clarify for potential applicants that a public hearing and Council action are required for approval of any Economic Incentive Grant (EIG).

> This policy is intended to provide incentives to encourage infill development projects that are located in urbanized employment centers of the City or that are currently underutilized but are in close proximity to major transit lines. *Approval of any requested Economic Incentive Grant (EIG) will require a public hearing and approval by the City Council.*

The Council discussion of September 28 appeared to support continuing that intent, although changes to individual elements were discussed, as noted below.

Element #1: The majority of the Council seemed to support language that would establish the elements desired in a project, including a requirement for some percentage of affordable or workforce housing if housing is proposed; without making any one element an absolute requirement other than meeting public purposes defined by the Council. A clause was added clarifying that intent. Any one of those elements could, if the Council chooses, be made a baseline requirement.

> Demonstrate how it fulfills important public purposes that should include creating jobs, installing desired *elements such as* creating jobs, installing desired public infrastructure, using a substantial level of green building techniques, and if housing is included *it must provide* a percentage of affordable and/or workforce level housing units.

Element #2: The Council expressed no questions and requested no changes to this element.

> Demonstrate that it directly addresses annual strategic goals set by the City Council

Element #3: The Council asked how the staff would be able to confirm that "but for the requested support it would not be able to provide the public benefits desired by the City". The policy has been revised to reflect (as was requested for Montford Commons) that the entity requesting the support would be required to fund an analysis of the financing. Such a document provides an analysis of the financing and is the process most often used for such requests for financial support.

> Demonstrate that but for the requested support it would not be able to provide the desired public benefits desired by the City. *This shall include paying for a fiscal analysis by a qualified financial consultant, chosen by the City.*

Element #4: The Council discussed the potential for expanding the areas proposed as designated "redevelopment" areas. The initial list proposed was drafted based on the Council's desire for this policy to be applicable to areas that have "sustainable" access (walkability and transit) to major employment centers and areas designated for redevelopment at substantial densities, that offer jobs as well as affordable and workforce housing elements. These are generally commercial corridors and nodes that represent enough existing density or zoning that encourage density that support that type of pedestrian/transit friendly environment.

The Council suggested that areas adjoining the Shiloh community should be included, which would entail expanding the applicable corridor along Hendersonville Road from I-40 to the Blue Ridge Parkway (as it extends to the Parkway along Tunnel Road).

Any further extension along Hendersonville Road, Smoky Park Highway, and Leicester Highway would enter areas of primarily low density, suburban scale development. The staff recommends that should the Council desire this change, the intention of the policy would need to be modified; or a new element added requiring existing or requested zoning that supports the creation of "infill development projects that are in close proximity to major transit lines", or projects that meet the criteria for "TIF eligible areas" in NCGS 155-7.3 (c).

> Be located in currently active defined "redevelopment" areas; or in areas annually designated by the City Council as priority redevelopment areas that are in or within 1/4 mile of designated urbanized employment centers (see Note 1 below); or in a targeted or voluntary annexation area.

She provided a map of the proposed areas (including the extension to the Blue Ridge Parkway along Hendersonville Road).

Element #5: The Council seemed to support a modification to the policy that would reduce the required project land area from 1 acre to ½ acre, except in the downtown CBD where it would be ¼ acre. That change has been incorporated.

> Have a floor area ratio exceeding 1.0 and be located on an area of land larger than *one-half acre, except in the downtown CBD where the size would be one-fourth acre.*

Element #6: The Council expressed no questions and requested no changes to this element.

> Have a minimum ratio greater than 3:1 private investment to public assistance.

Element #7: The Council expressed no questions and requested no changes to this element.

> Demonstrate a minimum 20% equity participation from the entity requesting the incentive assistance.

Element #8: This is a new requirement. As was required for the Montford Commons project, the staff recommends adding a clause requiring the applicant to assume any financial burden for legal challenges. This clause relates to the interpretation of the EIG legislation for use by a primarily residential project. Because this interpretation has not been tested, the use of the incentive to provide public infrastructure and meeting other strategic objectives benefitting residents of the city would need to be a significant element of a "qualified" residential development proposal.

> *Agree to assume any cost related to a legal challenge of the EIG.*

Preferred Elements:

Element #1: A concern was expressed about the non-residential uses requirement, which would primarily serve to create mixed uses in a residential structure. This element was included because such mixed-use structures are recommended as a preferred development type in urbanized areas in the 2025 Plan and the Downtown Master Plan. This is not; however, a required element for a proposal and the Council would be free to consider a building that has no mix of uses.

There is a concern about the legal intent of the EIG legislation being used for a wholly residential project, which is why the staff has also added a clause (#8 in the required elements) that requires (as is required for Montford Commons) that the applicant assume all legal risk. This is also why in the absence of a development providing employment potential, the provision of

public infrastructure and/or other benefits for the public at large (as noted in Element #1, required elements) would be such an important consideration.

Include a minimum of 20% square feet of non-residential (job creation) uses, such as, but not limited to: office, retail, manufacturing, restaurant, civic, cultural, or entertainment.

Element #2: The Council expressed no questions and requested no changes to this element.

Include pedestrian or open space amenities noted in the appropriate master plan for the location proposed.

Element #3: There seemed to be Council agreement that when "green" building is proposed, the developer could propose meeting the standards without getting the actual certification (due to the cost of actual certification). The staff recommends that while LEED certification is fairly expensive, other programs such as Healthy Built are not that cost prohibitive; so exemption from actual certification should be limited to LEED only. The language of the element has been altered to reflect that direction.

Demonstrate a high level of the use of "green" and sustainable building techniques and products, as determined by meeting an outside agency certification standard (*such as, but not limited to, meeting LEED standards, achieving the Healthy Built certification, using Energy Star appliances, or meeting other standards to the satisfaction of the Council*).

Element #4: There was substantial discussion among the Council members regarding the amount of affordable and/or workforce housing that must be provided when housing is proposed. Some members prefer for the percentage to remain undefined, some wanted to see defined percentage minimums. For those preferring a minimum required percentage suggestions included affordable housing at 10%-30% and workforce housing at 25% to 60%. In both cases there would be reduced requirements for property in the CBD given the higher cost of land. Since there was no apparent consensus from the Council on this element, additional guidance will be needed to make a change to the existing wording of a 10% requirement for affordable housing and 40% for workforce housing.

There was also a Council desire to clarify in the policy that while an EIG would not extend beyond five years, the housing affordability requirement could extend up to fifteen years; given the nature of this support as a grant, not a loan. The language of this element has been modified to reflect that intent.

If housing is provided, the housing element of the project must include a minimum of 10% defined "affordable" housing units and a minimum of 40% "workforce" housing units. *Any affordable or workforce housing provided would be required to remain at the designated level of affordability level for up to 15 years, at the discretion of the Council.*

Mayor Bellamy requested that staff talk to HUD representatives to make sure that the policy we put in place will not disqualify projects from consideration from our partners in the community that use HUD funding. The staff has been assured by HUD that a local requirement for affordability does not disqualify a developer from receiving the 221(4)(d) loan guarantee. Depending on the developer's costs, the amount of development equity invested, and other choices made along the development path it could potentially affect a developer's ability to be approved for the guarantee (if their financial projection does not show sufficient loan repayment capacity). This appears to be the reason that the Montford Commons project developers have stated that they cannot provide any affordable housing.

Element #5: There was a Council inquiry as to whether it is it realistic for residential units to be required to be the primary residence of the occupants. This is commonly used criteria for inclusionary zoning ordinances, and can be enforced by agreement. It is usually, however, an issue primarily with condominium units, not apartments; and the staff is recommending that this element be rephrased to reflect that it is pertinent only to condominium residences not rental housing.

> Will require residential units *sold as condominium residences* to be the primary residence of the occupants for the length of the life of the incentive.

Element #6: The Council expressed no questions and requested no changes to this element.

> Demonstrate that 70% of all permanent jobs created will, for the life of the incentive, pay competitive salaries for similar jobs in Buncombe County. This will be verified in an annual report to be submitted to the City Manager for the life of the incentive.

The staff also suggests that this policy have a "sunset" or "date certain renewal" clause. Since the nature of the policy is related to the excessive difficulties in finding financing for even very marketable projects that meet many Council goals; it may be advisable to consider an annual update and reconsideration of the need for the policy or if certain aspects of it should be changed or eliminated. The annual report would also allow the Council to monitor the performance of the grantees in meeting the requirements established by the Council.

The Council also requested input from other community groups Staff met with CIBO, and the members present appeared to support the policy. No negative comments were received. The Chamber of Commerce has received a copy of the policy, and to date have not expressed any thoughts on it. The staff has also not received any email comments on the proposed policy to date.

City staff recommends approval of the new Council policy, with any amendment determined by the Council.

Councilman Smith moved to adopt the Transformational Development Projects Incentive Policy, with an amendment to Preferred Element 4 to include the reclamation of brownfields and/or other environmental certifications discussed. This motion was seconded by Councilwoman Manheimer.

Vice-Mayor Newman felt the Required Element 3 is vague and he was not sure what formula we would use to determine if someone has made the case that unless they receive the support they would not be able to provide the desired public benefits. In addition, he felt the requirement for a fiscal analysis by a qualified financial consultant would add additional cost to a small project. He felt that element should be deleted from the policy or set some threshold so that it's clear that it applies to very large projects. Economic Development Director Sam Powers responded that in the cases where this has been used, in the absence of a formal policy, that is the purpose of the independent analysis of the pro forma. There are industry standards of what acceptable rates of return are on the different types of projects. Those are the analyses that we would rely on to determine whether that requirement element has been met or not.

Vice-Mayor Newman also felt Preferred Element 3, which is very important, was unclear regarding the green building requirements. He is open to processes other than LEED certification; however, he felt the language was vague. He felt there should be crisp standards for what it takes to meet that preferred element.

Vice-Mayor Newman observed that Preferred Element 5 is a good idea, but questioned if should be a preferred element because it sounds more like a description of how it would operate.

Councilman Smith and Councilwoman Manheimer supported amending their motion to delete Required Element 3.

Councilman Bothwell agreed with Vice-Mayor Newman on Preferred Element 3. He too felt it was unclear and wondered if a developer could buy one Energy Star appliance and meet this requirement.

Mayor Bellamy noted the example that UNC-Asheville met LEED certification standards in one of their buildings, but did not apply for LEED because of the expense. They used the money they would have had to apply for those standards towards the green building. If we get the elements we want, we should not have to require LEED certification.

City Attorney Oast said there is a statute that is applicable to Asheville regarding local energy efficiency incentives. The City can offer incentives to developers "based on generally recognized standards established for such purposes and makes a significant contribution to reduction of energy consumption." That does not mean Council can't be more specific than that, but the authorization is fairly general.

It was the consensus of Council to obtain the Sustainable Advisory Committee on Energy & the Environment's (SACEE) input on Preferred Element 3.

Vice-Mayor Newman suggested Council act on the policy at this meeting and let SACEE insert whatever level of LEED they think is appropriate for this policy. When SACEE makes their recommendation, the policy would be brought back to Council on the Consent Agenda.

Mayor Bellamy said that when you look at transportation corridors and opportunities for redevelopment, she asked for a friendly amendment to the policy for the map to be extended at least to the Ingles we just brought into the City on Long Shoals Road. Councilman Smith and Councilwoman Manheimer accepted the friendly amendment.

After further discussion about the corridors, Mayor Bellamy asked the friendly amendment be amended to extend the map to all of the major transportation corridors to the edge of the City limits. Councilman Smith and Councilwoman Manheimer accepted the amended friendly amendment.

Vice-Mayor Newman felt that the initial discussion around this policy was the idea of transit orientation and walkability to key employment centers. There is a lot of advantage of putting higher density infill development in places where people can literally walk to work. He had mixed feelings about providing these strong incentives to almost all new commercial development in the City vs. a more targeted area in the areas we really feel we most strongly want to encourage infill development, e.g., close to the heart of the City.

Mayor Bellamy felt we are saying that we want the type of development in our corridors that would meet these basic principles. Since City Council will see all the projects that apply for this, if they don't meet the criteria, they would not receive the assistance.

Councilman Davis wondered if we are engineering this policy to the point that we might discourage good organic development. Where this policy is at this point and were we started is different and he's not comfortable with it. He felt having the Required Element 3 was important to have in the policy but agreed that it should not apply to small projects.

City Manager Jackson said that regarding the deletion of Required Element 3, staff is not interpreting that to mean that we won't do financial analysis or require sufficient financial analysis to evaluate the pro forma to ensure these are viable projects. We have an obligation to perform

financial analyses. For complicated, complex major scale projects, that might require outside advisors.

Vice-Mayor Newman felt that if someone meets these requirement, we need to give the incentive, and because of that, he was still concerned whether the language in the Preferred Elements are refined enough.

At Mayor Bellamy's suggestion, it was the consensus of Council that (1) the policy be approved at this meeting; (2) SACEE will provide their input on Preferred Element 3; and (3) suggest Vice-Mayor Newman insert language the he would feel comfortable with. Then, once we have SACEE's input and Vice-Mayor Newman's refined language, the policy can come back to Council for a vote on the Consent Agenda.

Councilman Bothwell has an underlying concern of granting tax breaks to developers.

The amended motion as follows made by Councilman Smith and seconded by Councilwoman Manheimer carried on a 4-3 vote, with Councilman Bothwell, Councilman Davis and Councilman Russell voting "no.": Adopt the Transformational Development Projects Incentive Policy, subject to SACEE's input and Vice-Mayor Newman's refined language in the Preferred Elements; (1) with an amendment to Preferred Element 4 to include the reclamation of brownfields and/or other environmental certifications discussed; (2) deletion of Required Element 3;; and (3) extend the map to all of the major transportation corridors to the edge of the City limits.

Mayor Bellamy said that this policy will be brought back to Council on the Consent Agenda once SACEE has provided their input and Vice-Mayor Newman has refined the language in the Preferred Elements.

RESOLUTION BOOK NO. 33 – PAGE 249

Closed Session

At 7:47 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To discuss matters relating to the location or expansion of industries or other businesses in the area served by the City Council, including agreement on a tentative list of economic development incentives that may be offered in negotiations, provided that any action authorizing the payment of economic development incentives will occur in open session. The statutory authority is contained in N.C. Gen. Stat. sec. 143-318 (a) (4); (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (2) To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 8:05 p.m., Councilwoman Manheimer moved to come out of closed session. This motion was seconded by Councilman Russell and carried unanimously.

B. UPDATE OF NEW COMMUNITY CENTER AT LIVINGSTON STREET PARK

At the request of Mayor Bellamy, it was the consensus to postpone this presentation.

VI. NEW BUSINESS:

A. DISCUSSION OF STATE LEGISLATIVE AGENDA

City Attorney Oast said that this report is to begin discussion of the City's legislative agenda for the 2011 Session of the North Carolina General Assembly.

The 2011 Session of the North Carolina General Assembly begins on January 26; this will be a regular or "long" session. Usually, one of the first orders of business after the legislature convenes is to establish rules regarding special or local legislation. The deadline for submitting local bills for consideration is usually mid to late March, and there are fewer restrictions on the subject matter that may be included in such bills.

Council usually finalizes its legislative agenda in January, after the retreat. The agenda includes local initiatives, for which local bills are requested, as well as positions on matters of State-wide concern, with respect to the general legislation is introduced. Matters likely to be of general importance to the legislature this year include annexation, sustainability, and budget/finance. Other issues will come up, and Council may wish to take an official position on them as well.

As a starting point on State-wide issues, he provided Council with a copy of the N.C. Metropolitan Mayors Coalition 2011 Advocacy Agenda. In developing this part of our agenda we also review information from other organizations, such as the N.C. League of Municipalities and the Asheville Chamber of Commerce, as it becomes available.

As to local legislation, a good place to start is with last year's agenda, which he provided to Council, as well as a previous summary of what happened with our requests. Matters left unresolved from last year include adjusting the boundary of Woodfin, and the disposition of the City's institutional network (I-Net).

(1) We worked with Woodfin and UNC-A last year, and believe that we are in a good position to finally conclude this long-standing issue. Unless directed otherwise by Council, we will continue to proceed as we have been, finalizing boundary descriptions, and contacting affected residents.

(2) As to the I-Net, the bills that the City proposed to amend the Video Service Competition Act of 2006 was referred to a study committee. We have not made much progress in our negotiations with Charter on this issue, legislative solution may still be needed.

(3) Although not taken up in the 2010 short session, Council may wish to continue pursuing legislation to obtain more flexibility with regard to the water system and voluntary annexation.

He wondered if Council would be interested in getting legislative authority to reserve an easement for greenways whenever we close a road.

Although the beginning of 2011 Session of the General Assembly is still months away, and Council has not yet adopted its agenda, it is not too early to begin making contacts with our legislators. Based on the recently concluded elections, our local delegation is:

Senators:	Martin L. Nesbitt, Jr. Tom Apodaca
Representatives:	Susan C. Fisher Tim Moffitt Patsy Keever

Ms. Keever and Mr. Moffitt are new to the delegation.

In order to establish an orderly process and provide appropriate direction to staff, Council may want to establish its own schedule for development of the legislative agenda, bearing in mind that the agenda can be amended or supplemented during the course of the long session, based on new information.

He asked Council to provide him ideas on matters of local legislation and recommendations on matters of general policy by November 23 so he can incorporate them into a tentative agenda that Council can adopt on December 14, as talking points for conversations with legislators. He noted that November 23 is not the end of the time to suggest things, it's just a starting point. Things come up during the year that other cities propose that Asheville might want to join in.

Mayor Bellamy noted that adoption of the legislative agenda on December 14 was a goal so we could talk to our legislators before the session begins. She felt it was important that the agenda is well thought out and has strong unified support.

Councilman Russell felt the Council may need to talk about some of these issues at the December 14 worksession.

Mayor Bellamy suggested City Attorney Oast send out the preliminary items received by Council to all Council members after November 23 in order to begin review.

B. UPDATED PROCESS FOR APPOINTING MEMBERS TO THE PLANNING & ZONING COMMISSION

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the Committee recommended City Council adopt an updated process for appointing members to the Planning & Zoning Commission, similar to the process used for School Board appointments, with interviews in Council Chamber, televised.

Councilman Smith moved to use an appointment process, similar to the School Board appointments, for the appointments to the Planning & Zoning Commission. This motion was seconded by Councilwoman Manheimer and carried unanimously.

C. PLAN FOR THE LOCATIONS OF FUTURE COUNCIL COMMUNITY MEETINGS

RESOLUTION NO. 10-241 - RESOLUTION AMENDING THE 2010 CITY COUNCIL MEETING SCHEDULE TO ADD A COMMUNITY MEETING ON NOVEMBER 30, 2010, AT 6:30 P.M. AT THE REID CENTER

City Manager Jackson presented City Council with a list of prior community meeting locations and asked for direction on setting future meeting locations. He asked for direction to pre-determine their community meetings in which areas of the City, as they have previously been held north, south, east, west and central. He would schedule the meeting in an Americans With Disabilities Act (ADA) accessible location inside and out, make sure the facilities have the audio visual and sound capabilities; will have the capacity to handle Council's agenda, and will have adequate parking. Staff will look for other locations, other than those used in the past, as directed by Council.

Mayor Bellamy said that earlier this year she received a request by Livingston Street area residents for the November 30 community meeting at the Reid Center. They requested an

update on what is happening in the area. She has also received a request from residents in the south area of the City to hold a community meeting.

Councilman Russell felt the south community meeting should be held further south than the Shiloh Recreation Center.

In response to Councilwoman Manheimer, Mayor Bellamy said that she will contact Buncombe County Commissioner David Gantt on the status of the joint meeting with the Buncombe County Commissioners.

Vice-Mayor Newman liked the format used for the east Asheville meeting and hoped they would be structured similar to that in the future with items of interest for that neighborhood.

Mayor Bellamy was pleased with the east Asheville format as well. Specifically for the Reid Center area agenda, we should include the new Riverfront Area Redevelopment Commission, update on the Livingston Street Park, update on Walton Street Park, the Hospital construction and road status, and other things impacting our community in that area. In the south area, stormwater continues to be an issue.

Councilman Smith moved to adopt Resolution No. 10-241, setting the location for the November 30, 2010, community meeting at the Reid Center, and setting the future community meetings on March 29, 2011 – far south; May 31, 2011 – West; August 30, 2011 – North; and then continue east, central, etc. This motion was seconded by Councilman Bothwell and carried unanimously.

City Manager Jackson said that he would have a staff report at the December 14, 2010, meeting to set the locations for future community meetings in 2011.

RESOLUTION BOOK NO. 33 – PAGE 253

D. RESOLUTION NO. 10-242 – RESOLUTION APPOINTING A MEMBER TO THE ALCOHOLIC BEVERAGE CONTROL BOARD

The following candidates applied for a position on the Alcoholic Beverage Control Board: Rick Fornoff and Jeremy Gillespie.

Vice-Mayor Newman said that it was the recommendation of the Boards & Commissions Committee to reappoint Bill Lack.

Councilwoman Manheimer moved to reappoint Bill Lack to serve a three-year term, term to expire November 13, 2013, or until his successor has been appointed. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 254

E. RESOLUTION NO. 10-243 – RESOLUTION APPOINTING A MEMBER TO THE RIVER DISTRICT DESIGN REVIEW COMMITTEE

The following candidates applied for a position on the River District Design Review Committee: Phillip Ellis, Michael McDonough, Stuart Smith, Darren Green and Randy Shull.

Vice-Mayor Newman said that it was the recommendation of the Boards & Commissions Committee to appoint Randy Shull.

Councilwoman Manheimer moved to appoint Randy Shull to serve a three-year term, term to expire September 1, 2013, or until his successor has been appointed. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 255

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy invited the public to the Veterans Day Ceremony at the VA Hospital on November 11, 2010, at the VA Hospital beginning at 11:00 a.m. Councilman Bothwell noted that there will also be a Veterans Day recognition at the Memorial in Pack Square Park at 2:00 p.m. as well.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:44 p.m.

Magdalen Burleson
CITY CLERK

MAYOR

Tuesday – November 23, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr. (excused from meeting at 7:16 p.m.); Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 9, 2010

B. RESOLUTION NO. 10-244 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE FISCAL YEAR 2008 BUFFER ZONE PROTECTION PROGRAM GRANT ADMINISTERED BY THE DEPT. OF HOMELAND SECURITY

ORDINANCE NO. 3923 - BUDGET AMENDMENT TO ACCEPT THE FISCAL YEAR 2008 BUFFER ZONE PROTECTION PROGRAM GRANT ADMINISTERED BY THE DEPT. OF HOMELAND SECURITY

Summary: The consideration of (1) a resolution authorizing the City Manager to accept a grant in the amount of $51,500 from the Fiscal Year 2008 Buffer Zone Protection Program Grant administered by the Department of Homeland Security for procurement and installation of wireless telecommunications equipment to enhance the ability of Emergency Responders to communicate while protecting Critical Infrastructure assets of the City of Asheville; specifically the North Fork and Bee Tree Water Sheds; and (2) a budget amendment, in the amount of $51,500, to accept said grant.

The City of Asheville Fire Department has identified grant funding through the Fiscal Year 2008 Buffer Zone Protection Program for the procurement and installation of wireless telecommunications equipment. This equipment will enhance the ability of City of Asheville (COA) Police and Fire Departments and other regional Emergency Responders to communicate during a disaster or other emergency that requires the coordination and communication between multiple jurisdictions while responding to protect COA Critical Infrastructure.

This action complies with the City Council Strategic Operating Plan in that it helps to proactively pursue funding opportunities through state and federal economic stimulus packages. This action has been reviewed and approved by the Public Safety Committee.

Pros:

- An increased ability to communicate with responders from other jurisdictions that can not operate on the COA Public Safety Radio System or who are outside the system coverage area.
- Increases responder safety and accountability of COA resources when responding to COA Critical Infrastructure assets that are not within the present coverage area of the COA Public Safety Radio System.
- The infrastructure will provide an additional margin of safety during emergency operations ensuring continued and reliable communications.
- Grant would benefit the Asheville Police and Fire Departments as well as the Water Resources Department using the COA 800 MHz radio system.

Con:

- None identified

These funds are a non-matching grant from the Department of Homeland Security and will require no initial COA resources. Annual maintenance costs will be incurred but will be minimal as infrastructure maintenance will be funded by the State of North Carolina. COA maintenance costs on the equipment should not exceed $500 annually.

City staff recommends City Council (1) authorize the City Manager to accept grant money from the Fiscal Year 2008 Buffer Zone Protection Program; and (2) authorize a budget amendment to accept said grant.

RESOLUTION BOOK NO. 33 – PAGE 256
ORDINANCE BOOK NO. 26 - PAGE 360

C. RESOLUTION NO. 10-245 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A GRANT FROM THE FISCAL YEAR 2010 HOMELAND SECURITY GRANT PROGRAM

ORDINANCE NO. 3924 - BUDGET AMENDMENT FROM THE FISCAL YEAR 2010 HOMELAND SECURITY GRANT PROGRAM

Summary: The consideration of (1) a resolution authorizing the City Manager to accept a grant in the amount of $550,000 from the Fiscal Year 2010 Homeland Security Grant Program administered by the N.C. Division of Emergency Management for procurement and installation of wireless telecommunications equipment to enhance the ability of Emergency Responders to communicate locally and throughout the region; and (2) a budget amendment, in the amount of $550,000, to accept said grant.

The City of Asheville Fire Department has identified grant funding through the Fiscal Year 2010 North Carolina Homeland Security Grant Program for the procurement and installation of wireless telecommunications equipment. This equipment will enhance the ability of City of Asheville (COA) Police and Fire Departments and other regional Emergency Responders to communicate during a disaster or other emergency that requires the coordination and communication between multiple jurisdictions. This grant is a reimbursement grant in which the City of Asheville will purchase the equipment and then be reimbursed 100% by the NC Department of Crime Control and Public Safety.

This action complies with the City Council Strategic Operating Plan in that it helps to proactively pursue funding opportunities through state and federal economic stimulus packages. This action has been reviewed and approved by the Public Safety Committee.

Pros:

- An increased ability to communicate with responders from other jurisdictions that can not operate on the COA Public Safety Radio System or who are outside the system coverage area.
- Increases responder safety and accountability of COA resources when responding mutual aid to other jurisdictions.
- The redundant infrastructure will provide an additional margin of safety during emergency operations ensuring continued and reliable communications.
- Grant would benefit the Asheville Police and Fire Departments using the COA 800 MHz radio system.

Con:

- None identified

This equipment purchase will be fully funded by grant proceeds, so there is no impact to the City's General Fund budget. Annual maintenance costs will be incurred by the State of North Carolina or regional jurisdictions.

City staff recommends City Council authorize (1) the City Manager to accept grant money from the State of North Carolina Homeland Security Grant Program; and (2) a budget amendment to accept said grant.

RESOLUTION BOOK NO. 33 – PAGE 257
ORDINANCE BOOK NO. 26 - PAGE 362

D. RESOLUTION NO. 10-246 - RESOLUTION AUTHORIZING THE ASHEVILLE FIRE DEPARTMENT TO PURCHASE RAZOR EX BIOLOGICAL FIELD SAMPLER BASED ON STANDARDIZATION NEEDS WITH FUNDING FROM THE N.C. DEPT. OF HOMELESS SECURITY GRANT

Summary: The consideration of a resolution authorizing the Asheville Fire Department to purchase Razor EX Biological Field Sampler based on standardization needs.

The Asheville Fire Department (AFD) has grant funds available for the procurement of equipment to be utilized by Hazardous Materials Regional Response Team 6 (RRT-6) Asheville with State Homeland Security Grant FY09. This item will be procured through a previously Council approved grant through the U.S. Department of Homeland Security and the Office of Domestic Preparedness State Homeland Security Grant Number: FY2009-SS-T9-0046 to implement the State Homeland Security Strategy. This grant approved the NC Hazardous Materials Response Team Asheville (RRT-6) to procure equipment to be better prepared and respond to manmade and natural emergencies and disasters. The equipment to be procured through this grant will be used in the field to detect and identify unknown and potentially hazardous biological agents during a hazardous material response. The RAZOR EX is the most sensitive and reliable commercially available biodetection instrument designed for field use and utilizes the same polymerase chain reaction (PCR) technology used in the Public Health labs.

The six other RRT's have procured this specific piece of equipment from Idaho Technology in order to be compatible with each other in case of a statewide emergency.

This action complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; and will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities. The Public Safety Committee has reviewed and approved this action.

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, provided funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses.
- This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

The Standardization of Equipment will have not fiscal impact on the City's current budget since it is funded entirely with grant proceeds. There will be maintenance and replacement costs for the equipment, which will be needed to be, included in future fiscal year budgets.

City staff recommends City Council adopt resolution authorizing the Asheville Fire Department to purchase Razor EX Instrumentation based on standardization needs with funding from State Homeland Security Grant Fiscal Year 2009.

RESOLUTION BOOK NO. 33 – PAGE 258

E. RESOLUTION NO. 10-247 - RESOLUTION AUTHORIZING THE ASHEVILLE FIRE DEPARTMENT TO PURCHASE THE QINETIQ TALON HAZARDOUS MATERIAL RESPONSE ROBOT FROM QUINETIQ NORTH CAROLINA

Summary: The consideration of a resolution authorizing the Asheville Fire Department to purchase the QinetiQ Talon Hazardous Material Response Robot based on standardization needs.

The Asheville Fire Department (AFD) has grant funds available for the procurement of equipment to be utilized by Hazardous Materials Regional Response Team 6 (RRT-6) Asheville with State Homeland Security Grant Fiscal Year (FY) 2008 and FY 2009. This item will be procured through a previously Council approved grant through the U.S. Department of Homeland Security and the Office of Domestic Preparedness State Homeland Security Grant Number: FY08 2008-GE-T8 0033 and FY09 2009-GE-T9 0033 to implement the State Homeland Security Strategy. The grant's approved the NC Hazardous Materials Response Team Asheville (RRT-6) to procure equipment to be better prepared and respond to manmade and natural emergencies and disasters. The Hazardous Material Response Robot to be procured through these grants will be used in the field to detect and identify unknown and potentially hazardous conditions during a hazardous material response and to ensure the safety of emergency responders. The hazardous material response robot will be utilized in high risk scenarios to investigate dangerous situations giving emergency responders the tactical advantage. In certain situations the hazardous material response robot could be utilized to collect sensitive samples that in other situations placed the emergency responder in warms way.

The five other RRT's have procured this specific piece of equipment from QinetiQ Talon in order to be compatible with each other in case of a statewide emergency.

This action complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; and will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, provided funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses.
- This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

The Standardization of Equipment will have not fiscal impact to the General Fund since it is fully funded with grant proceeds. There will be maintenance and replacement costs for the equipment, which will be needed to be, included in future fiscal year budgets.

City staff recommends City Council adopt resolution authorizing the Asheville Fire Department to purchase QinetioQ Talon Hazardous Material Response Robot based on standardization needs with funding from State Homeland Security Grant FY08 and 09.

RESOLUTION BOOK NO. 33 – PAGE 259

F. ORDINANCE NO. 3925 - BUDGET AMENDMENT FOR EMPLOYEE & RETIREE HEALTH CARE CONTRIBUTIONS

Summary: The consideration by City Council of a technical budget amendment to reduce the General Fund budget by $3,553,000 to allow for more efficient and effective accounting and reporting of employee and retiree contributions to the health insurance program.

In FY 2007-08, the City created an Insurance Fund to account for all revenues and expenses associated with the City's self insurance programs for health care, workers compensation, and liability. Prior to that time, these programs were accounted for in the City's General Fund. When the Insurance Fund was created in FY 2007-08, staff decided to continue initially recording employee and retiree contributions to the health insurance program as a revenue in the General Fund and then transfer those amounts to the Insurance Fund. This accounting process created additional work for staff, however it allowed for a more consistent presentation of General Fund revenues and expenses across fiscal years.

Staff has recently revisited this issue and decided that the efficiency gains from reducing the number of accounting transactions as well as the transparency improvements from eliminating the "double counting" of employee and retiree health care contributions in multiple funds outweigh concerns about reporting consistency across fiscal years. With the pending transition of payroll from H.T.E. to MUNIS, staff would like to execute this budgeting and accounting change during the current fiscal year. The technical impact of this change is a reduction in the FY 2010-11 General Fund revenue and expense budget of $3,553,000. There is no impact to the Insurance Fund budget.

This action complies with the City Council Strategic Operating Plan Operate by ensuring that the City of Asheville's organization operates at the highest fiscal responsibility.

Pros:

- Will reduce the amount of accounting transactions.
- Eliminate the double counting of revenues in two separate funds.

Con:

- Makes comparisons with prior fiscal year budgets more challenging.

As noted above, the FY 2010-11 General Fund budget will show a reduction of $3,553,000. However, there will be no net fiscal impact to the City's overall budget since employee and retiree health care contributions will still be recorded in the Insurance Fund.

City staff recommends City Council approve the technical budget amendment.

City Manager Jackson responded to Vice-Mayor Newman regarding the technical budget amendment.

ORDINANCE BOOK NO. 26 – PAGE 364

G. ORDINANCE NO. 3926 - BUDGET AMENDMENT FOR THE ACQUISITION OF DOWNTOWN PROPERTY LOCATED OFF OF EAGLE STREET

Summary: The consideration of a budget amendment, in the amount of $605,000, from the Parking Services Fund's fund balance for the acquisition of approximately 0.36 acres of downtown property located off of Eagle Street.

This budget amendment establishes a budget within the Parking Services Fund for the purchase of 0.36 +/- acres of property located off of Eagle Street, , further identified as PIN # 9649-50-1164-00000. The parcel is owned by the William and Charlotte Harrison Living Trust. The City has leased this parcel for a number of years for use as secured parking for Asheville Police Department specialty vehicles, cruisers and storage. At this point in time, the City has the strategic opportunity to purchase at a price below the appraisal value and assemble the parcel to adjoining city-owned property. This acquisition will benefit the City by eliminating the annual operating expense of leasing this parcel and maximizing the value of the parcel through assemblage.

For budgeting purposes, a total estimated project budget has been set at $605,000 to include cost of acquisition, survey, phase one environmental review and legal fees.

This action complies with the City Council Strategic Operating Plan by demonstrating fiscal responsibility through eliminating ongoing operating costs, while maximizing the value of real property assets.

Pros:

- Eliminates annual operating costs in the Parking Services Fund associated with leasing the parcel (est. $30,000 per year)
- Maximizes value via assemblage
- Buyer's real estate market has allowed for a favorable purchase price

Con:

- Requires an appropriation from the Parking Services fund balance

The City's funding for this project will come from Parking Services Fund's fund balance. The Fiscal Year 2009-10 audit is not yet complete, so the June 30, 2010 fund balance number for the Parking Services Fund has not been finalized. However, based on staff's current estimate,

available fund balance in the Parking Services Fund on June 30, 2010 was approximately $2.5 million. This budget amendment will reduce the fund balance to approximately $1.9 million.

City staff requests City Council to adopt a budget amendment of $605,000 for the acquisition of 0.36+/- acres of property located off of Eagle Street.

ORDINANCE BOOK NO. 26 – PAGE 366

H. RESOLUTION NO. 10-248 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH PAUL HOWARD CONSTRUCTION COMPANY FOR THE DEAVERVIEW ROAD BRIDGE REPAIR PROJECT

ORDINANCE NO. 3927 - BUDGET AMENDMENT FOR THE DEAVERVIEW ROAD BRIDGE REPAIR PROJECT

Summary: The consideration of (1) a resolution authorizing the City Manager to execute on behalf of the City of Asheville a contract and any change order within the budgeted amount with Paul Howard Construction Company, Inc. for the project known as Deaverview Road Bridge Repairs; and 2) a budget amendment, in the amount of $142,000, from savings in other capital projects to fund the contract.

The Engineering Services Division of Public Works has opened bids to do repair work the Deaverview Road Bridge. The bridge carries Deaverview Road over the Norfolk – Southern Railroad, and is adjacent to the City's Roger Farmer Park. The structure has severe corrosion on the main steel beam supports. The proposed repairs should keep the structure in service for many years to come.

The initial low bid was rejected, as there was only one bidder. The project was re advertised, and again, only one bidder submitted. The City and Contractor will share the costs for Norfolk-Southern safety personnel required when working within the Railroad Right of Way.

This action complies with the City Council Strategic Operating Plan in fully leveraging internal partnerships for pursuing capitol improvements and infrastructure projects.

Pros:

- Will repair an existing bridge to current standards.
- Provides long term investment in the City's infrastructure.
- Improves vehicular safety.
- Prolongs the useful life of a valuable City asset.

Cons:

- Project management and contract administration will consume staff time.
- A travel lane on this section of roadway may be required to be closed for a short time during the construction of the project.
- Financial obligations to Norfolk-Southern for project administration.

As a part of the FY 2010-11 adopted Capital Improvement Program (CIP), City Council approved a project budget of $158,000 for the Deaverview Road bridge repairs. Based on the bid amount for the project, the budget needs to be increased by $142,000 to a total project budget of $300,000. As noted in the 1st Quarter Financial Report, during its year-end review of existing capital projects, staff identified approximately $500,000 in savings from projects in the General Capital Projects Fund that were complete and that came in under budget. These savings have been moved to the General Capital Projects Fund's reserve account. This addition brings the total amount available in the capital reserve account to $625,000. Staff is proposing that the $142,000 needed for this project be taken from the reserve account. This will leave

approximately $483,000 in the capital reserve account. Staff is recommending that the money remaining in the capital reserve be allocated for the FY 2011-12 CIP during the upcoming budget process.

City staff recommends City Council adopt (1) a resolution awarding the contract to Paul Howard Construction Company, Inc. and authorizing the City Manager to execute on behalf of the City of Asheville the contract and any change order within the budgeted amount; and (2) the associated budget amendment in the amount of $142,000.

RESOLUTION BOOK NO. 33 – PAGE 260
ORDINANCE BOOK NO. 26 – PAGE 368

I. RESOLUTION NO. 10-249 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN INTERLOCAL AGREEMENT WITH THE TOWN OF BLACK MOUNTAIN FOR SNOW FIGHTING MATERIALS

Summary: The consideration of a resolution authorizing the Mayor to enter into an interlocal agreement with the Town of Black Mountain for salt and sand materials.

The Town of Black Mountain desires to partner with the City of Asheville on the procurement of snow fighting materials. Specifically, the Town desires that the City incorporate in the City's annual bid for snow fighting materials the needs of the Town. By utilizing Asheville's purchasing power, the Town will be able to reduce its overall costs.

The Town of Black Mountain would reimburse the City the full cost of materials transferred based on that current year's bids.

This action complies with the City Council Strategic Operating Plan in creating more collaborative and effective working partnerships between the City of Asheville and other key organizations.

Pros:

- Provide materials to a sister local municipality using Asheville's economy of scale bidding advantage.
- Create common goal partnerships with other key organizations.
- Increase in bid quantities could potentially leverage overall reduced costs of materials.
- Similar in scope to existing arrangement with UNCA and Mission Hospitals.

Cons:

- Mid-storm deliveries would necessitate sensitive communications to sort out needed logistics.

As a part of the FY 2010-11 adopted budget, the Public Works Department, Street Division, budgets for snow materials. There would be an additional cost in procuring the additional material; however, the corresponding revenue would offset any increase.

City staff recommends City Council adopt a resolution authorizing the Mayor to enter into an interlocal agreement with the Town of Black Mountain for salt and sand materials.

RESOLUTION BOOK NO. 33 – PAGE 261

J. RESOLUTION NO. 10-250 - RESOLUTION AUTHORIZING SUPPORT FOR COUNTY'S GRANT APPLICATION TO THE METROPOLITAN PLANNING ORGANIZATION TO FUND AN UPDATE TO THE BUNCOMBE COUNTY GREENWAY AND TRAILS MASTER PLAN

Summary: The consideration of a resolution authorizing support for Buncombe County's $50,000 grant application to the Metropolitan Planning Organization to fund an update to the Buncombe County Greenway and Trails Master Plan.

Buncombe County through Parks, Greenways and Recreation Services Department is updating the Buncombe County Greenway and Trails Master Plan as a comprehensive system of interconnected trails and greenways. The update process is expected to cost $100,000. To date Buncombe County has $50,000 in hand to support the project. Buncombe County has applied to the Metropolitan Planning Organization for a $50,000 grant to assist in the support of the master plan. If awarded, the grant will complete the funding needed for the plan update.

Once complete, the master plan update is designed to 1) coordinate current and future greenway development with municipalities within Buncombe Counties jurisdiction and neighboring counties, 2) provide all jurisdictions within Buncombe County with working documents to assist with prioritization and implementation of a regional greenway plan, and 3) better position all jurisdictions within Buncombe County for state and federal funding opportunities for greenways.

Buncombe County is requesting local governments located in Buncombe County to support its efforts to update its master plan by expressing their support of its application to the Metropolitan Planning Organization for funding. The City's resolution of support will not commit the City to any actions or financial expectation.

At its meeting on November 11, 2010, the Greenway Commission recommended to City Council to approve a resolution to support Buncombe County's grant application to the Metropolitan Planning Organization to fund an update to the Buncombe County Greenway and Trails Master Plan.

This action complies with the following City of Asheville master plans: (1) Asheville City Development Plan 2025 in that it demonstrates cooperation with other government agencies for recreation facilities as effective and efficient as possible; (2) Parks, Recreation, Cultural Arts & Greenways Master Plan in that it continues efforts for cooperation between the City and Buncombe County to find opportunities for partnerships; (3) Pedestrian Thoroughfare Plan in that is supports comprehensive, multi-modal transportation and congestion management program by improving connectivity of overall sidewalks and greenways; and (4) Comprehensive Bicycle Plan in that it supports future greenway development efforts as greenways have potential to provide connections with on-road bicycle facilities.

Pro:

- Demonstrate the City's support to the Metropolitan Planning Organization regarding Buncombe County's effort for developing the Buncombe County Greenway and Trails Master Plan.

Con:

- None

This action does not commit the City to any fiscal expectation or obligation.

Staff and the Greenway Commission recommends to City Council adopt a resolution to support Buncombe County's $50,000 grant application to the Metropolitan Planning Organization for funding to update to the Buncombe County Greenway and Trails Master Plan.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Manheimer and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. NOISE ORDINANCE APPEALS BOARD UPDATE

Chairman Jim Fink said that the mission of the Board is that people of Asheville have the right to a peaceful environment. Their goal has been to keep it that way.

Their goal will not change and he will serve as long physically possible. He said that there has been talk that the Board may be discontinued; however, to serve the City, they must keep the Board and not waste the courts time. Mayor Bellamy assured Mr. Fink that City Council acknowledges the importance of the Board and there has been no discussion to dissolve the Board.

At the request of Mayor Bellamy, it was the consensus of Council to have the Noise Ordinance Appeals Board review the usage of "Jake Brakes" in the City limits. City Attorney Oast said that when the Board meets, he will have City staff present in order to participate in the discussion.

On behalf of City Council, Mayor Bellamy thanked Mr. Fink for his service on this Board along with the service of the other members.

B. QUARTERLY REPORTS

Strategic Operating Plan

Assistant City Manager Jeff Richardson said that the Asheville City Council identified short and long term goals at the January 2010 strategic planning retreat and staff is providing its quarterly updates on progress of the five key focus areas.

City Council has asked City staff to provide quarterly updates on key strategic initiatives associated with the five primary focus areas of the City's Strategic Plan. Staff has tracked projects using performance indicators and measurement through the Fiscal Year 2010-11. In addition, staff provided Council with the Economic Development Key Indicator Report.

He then showed Council a video showing the staff's progress on the key strategic areas for this quarter.

This information is to update City Council on key operational initiatives specific to City Council's Strategic Operating Plan. No action is necessary at this time.

Financial Report

Budget Manager Tony McDowell provided Council with the City's overall financial position for the fiscal year through September 2010.

The executive summary is as follows:

Amendments. The General Fund budget presented in this first quarter report reflects the adopted budget of $91,635,962; along with two budget amendments approved by Council during the first quarter that totaled $616,757. The first amendment was a $450,000 appropriation from fund balance for City Hall repairs. The other amendment, which totaled $166,757, was to appropriate revenue and expenses associated with the annexation areas that became part of the City on September 30. In addition to these two amendments, the General Fund budget presented in this report reflects the $3.5 million technical adjustment to the City's health care accounting. A summary of the budget changes since July 1 is presented below.

Adopted Budget	91,635,962
Health Care Technical Adjustment	(3,553,000)
Budget Amendments:	
City Hall Repairs*	450,000
Annexation Revenue & Expenses	166,757
9/30/2010 Budget	$88,699,719

* Fund balance appropriation

Revenues. Through September 30, 2010, the City has collected $9,995,081 in General Fund revenue, which represents approximately 11.3% of the total General Fund revenue budget. There is no change in property tax estimates to report. Staff will receive updated property tax data in late December or early January. Sales tax estimates also appear to be on track to meet budget. The only major revenue variance to report is in the investment earnings category, where low interest rates are having a significant impact. Because of this shortfall in investment earnings, staff is currently projecting that ***total FY 2010-11 General Fund revenue will come in under budget by $786,000.***

Expenditures. General Fund expenditures through September 30, 2010 total $18,811,826 or 21.2% of the budget, which is typical for this point in the fiscal year. One area to note on the expenditure side is the trend in health care expenses. Although expenditure growth in this area has slowed compared to previous years (about 6% during the first quarter compared to last year), the rate of growth may still result in expenses exceeding budget estimates. The city has implemented several management strategies to curb expenditure growth throughout the year, and the full impact of those strategies may not be realized until later in the year. Nonetheless, in order to conservatively manage expenses and address any potential under performance in revenues, the city is actively identifying additional savings in the current year budget. ***These savings, representing roughly 1% of the overall budget, are expected to come from a combination of strategies that have minimal impact on public services. These strategies include further selective hiring, line item reductions, deferring capital expenses where possible, and seeking opportunities to maximize efficiency in operations.***

Fund Balance. Until the FY 2009-10 audit is complete, staff must rely on unaudited estimates for the final year end available fund balance figure for FY 2009-10. Based on current data, staff is estimating that available fund balance on June 30, 2010 was approximately $11.9 million. ***With implementation of the savings strategies mentioned above, FY 2010-11 expenditures are expected to equal revenues, which means available fund balance will remain at $11.9 million or 13.6% of estimated expenditures.***

Mr. McDowell, Economic Development Director Sam Powers, Assistant City Manager Jeff Richardson and City Manager Jackson responded to various questions/comments from Council (noting that questions not readily answered will be followed-up in memo form), some being, but are not limited to: explanation of the Fund Balance analysis; is the reduction in license and fees causing a workforce reduction in the Inspections Division; more statistics on the unemployment rate (U-6 and U-3) and the rate of rental prices for housing in Asheville; when will the audit be complete; when will staff bring to Council more saving strategies; and what is

causing the high health care costs and what kind of incentives can we use to entice people with high risk to participate in our programs.

Mayor Bellamy noted that in June she suggested that if there were any cost savings she would like to put some of it toward sidewalks. Mr. McDowell recommended that Council wait and appropriate any cost savings projected as part of next year's budget process.

Mayor Bellamy said at Council's retreat it will be good opportunity to talk about some of the immediate needs we see in the community and the community's outcry for sidewalks.

In response to Mayor Bellamy, City Manager Jackson explained the status of the vacant Chief Financial position and introduced Interim Chief Financial Officer Kai Nelson, who in turn explained 2-3 areas of major focus in the Finance Department.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF PROPERTY LOCATED IN THE AIRPORT ROAD AREA TO HIGHWAY BUSINESS DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT

ORDINANCE NO. 3928 - ORDINANCE ZONING PROPERTY LOCATED IN THE AIRPORT ROAD AREA TO HIGHWAY BUSINESS DISTRICT AND COMMERCIAL INDUSTRIAL DISTRICT

Mayor Bellamy opened the public hearing at 5:51 p.m.

Urban Planner Julia Fields said that this is the consideration of an ordinance to zone property located in the Airport Road area to Highway Business District and Commercial Industrial District. This public hearing was advertised on November 12 and 19, 2010.

The property presented to you for initial zoning is property annexed by the City of Asheville effective September 30, 2010. The properties (a total of 17 parcels and a portion of another parcel) are located in the Airport and Rockwood Road areas. The land uses on these properties are varied with a mix of commercial, industrial, and office uses. There are also vacant parcels. The zoning on these parcels is Buncombe County Zoning (Employment District).

The Planning and Development Department recommends initial zoning in this area of Highway Business (HB) for all but one parcel for which the Department is recommending Commercial Industrial (CI) zoning. Staff has noted no nonconforming uses that would be created with the proposed zoning but recognize that some development standards will not be met with the existing development.

Pros:

- Supports the *Asheville City Plan 2025* goals for regional commercial corridor development.
- Is compatible with the zoning patterns (both City of Asheville and Buncombe County) in the area.
- Staff has noted no nonconforming uses that would be created with the proposed zoning.

Con:

- Some existing development many not meet all the city standards for the proposed zoning districts.

At a meeting on October 6, 2010, the Asheville Planning and Zoning Commission voted unanimously (6-0) to recommend this initial zoning to the Asheville City Council.

Staff recommends approval of the proposed initial zoning of the properties shown on the proposed maps and known as the Airport Road Annexation Area. Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Mayor Bellamy closed the public hearing at 5:52 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3928. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 376

B. PUBLIC HEARING TO CONSIDER A SUBSTANTIAL AMENDMENT TO 2009 AND 2010 CONSOLIDATED ANNUAL ACTION PLAN FOR COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME PROGRAMS

RESOLUTION NO. 10-251 - RESOLUTION AUTHORIZING SUBSTANTIAL AMENDMENT OF THE CITY'S CONSOLIDATED ACTION PLANS FOR 2009 AND 2010

Mayor Bellamy opened the public hearing at 5:53 p.m.

Community Development Director Jeff Staudinger said that this is the consideration of resolution authorizing substantial amendment of the City's Consolidated Annual Action Plans for 2009 and 2010. This public hearing was advertised on November 12 and 19, 2010.

When projects approved for CDBG or HOME funding change, the Annual Action Plan that detailed the project must change. The HOME program has one 2009 and one 2010 HOME Project needing amendment.

1. Asheville Area Habitat for Humanity was granted $130,000 of HOME funds in the 2010 Action Plan to support hard costs for a new housing development on Dennis Street in Swannanoa. The site is located near to Interstate 40, and without significant and costly noise mitigation does not meet minimum noise standards to meet HUD environmental regulations. Habitat will build this project, but will not use HOME funds in doing so. The Housing and Community Development Committee and the Asheville Regional Housing Consortium agree that these funds be allowed to be used for another Habitat project in Asheville. The 2010 Action Plan should be amended to cancel this project, and enable these funds to be used for another project, subject to Consortium approval.

2. The Community Housing Coalition of Madison County (CHCMC) was granted $50,000 of HOME funds in the 2009 Action Plan for the construction of single-family housing. CHCMC has not been able to perform this activity, and therefore are relinquishing this grant. CHC is receiving technical assistance through a technical assistance grant funded by the USDA, and expects to bring forward development projects in the future. The 2009 Action Plan should be amended to cancel this project, and reallocate the funds to Unallocated Funds.

The Housing and Community Development Committee and Asheville Regional Housing Consortium concur with approval of the amendments.

The draft Action Plan Amendment directly relates to the Council's Strategic Goal of "Affordable."

Pro:

- Because the funds cannot be used as originally intended, this amendment allows for the funds to be returned to the pool of funds available for HOME eligible projects.

Con:

- There are no cons to this action.

By keeping the Action Plans current, funds that are able to be used for their original purposes become available for other eligible activities.

Staff recommends that Council approve the amendments to the 2009 and 2010 Consolidated Annual Action Plans.

Mayor Bellamy closed the public hearing at 5:56 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 10-251. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33– PAGE 263

C. PUBLIC HEARING RELATIVE TO UNIFIED DEVELOPMENT ORDINANCE AMENDMENTS ACCORDING TO THE RECOMMENDATIONS OF THE DOWNTOWN MASTER PLAN

ORDINANCE NO. 3929 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE ACCORDING TO THE RECOMMENDATIONS OF THE DOWNTOWN MASTER PLAN

ORDINANCE NO. 3930 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE CONCERNING REVIEW PROCESS ELEMENTS AS RECOMMENDED IN THE DOWNTOWN MASTER PLAN

Mayor Bellamy opened the public hearing at 5:56 p.m.

Urban Planner Julia Fields said that this is the consideration of an ordinance amending the Unified Development Ordinance concerning review process elements as recommended in the Downtown Master Plan.

Almost three years ago, the Asheville City Council approved a contract for planning services to develop a master plan for downtown to capture the community's goals for growth, redevelopment and continued vitality. The master plan consultants held numerous public meetings and forums to gather community input for downtown's future and the master plan was approved by the Asheville City Council in May 2009. The Council directed staff to work with stakeholder groups moving forward to prepare the changes to the Unified Development Ordinance (UDO) necessary to implement the plan recommendations and other implementation strategies.

With that direction from Council, staff and stakeholder task groups have been studying the master plan and developing strategies for implementation. The Urban Design Action Committee began meeting in the fall of 2009 to evaluate the impacts of the master plan on parcels in downtown and to evaluate the processes for the review of downtown projects. The

proposals on processes have been on a different track from those for design standards. All ordinances are being presented to the Asheville City Council at the same time.

This ordinance details the necessary changes to the UDO concerning processes for development occurring on parcels zoned Central Business District (CBD) and located within the boundaries of the Design Review Overlay District. It adds a new section to Article V ("Development Review Procedures") that outlines the procedures for reviewing projects proposed on parcels zoned CBD and located within the boundaries of the Design Review Overlay District (CBD/DDR). Changes that are recommended reflect the goals of the Asheville Downtown Master Plan (DTMP) and the recommendations of the Urban Design Action Committee. These changes are directly related to Strategy 6 of the plan: *Make downtown project review, transparent, predictable, and inclusive of community input.*

The new section in Article V sets forth the procedures for Level I, II and III project review in the CBD/DDR. These procedures differ from the procedures in other parts of the City's jurisdiction as follows:

- The project level thresholds for development review in the CBD/DDR are different. Level III review will apply to those projects above 175,000 square feet or above the Intermediate Height Zone (145 feet). Level II review will apply to those projects between 20,000 and 175,000 square feet in size and up to the Intermediate Height Zone. All other projects are subject to Level I review.
- The order and format of the review process is different in the CBD/DDR except for Level I projects which are handled at staff level. Level III projects that are in the traditional downtown core go to the Technical Review Committee (TRC), the Downtown Commission (DTC), the Planning and Zoning Commission (P and Z) and to Asheville City Council through a conditional zoning process. Level III projects outside of the core follow the same review process except Council is only considering these projects for compliance with applicable standards and regulations. Level II projects go to the TRC, DTC, and P and Z for approval.
- Early developer sponsored meetings are required for the Level II and Level III projects. Such meetings are strongly recommended for Level I projects.
- All meetings where project proposals in the CBD/DDR are reviewed shall provide notification through publication in a newspaper, mailed notice and posted notice.
- Level II project approvals are valid for two (2) years.
- Large phased developments must submit a master plan.
- Variance requests for projects proposed in the CBD/DDR shall be granted by the Planning and Zoning Commission (acting as the Board of Adjustment) with a recommendation from the Downtown Commission except for landscaping requests. Alternative landscaping requests must be reviewed and approved by the Asheville Tree Commission. Planning and Development Department staff may flex up to ten (10) percent on standards concerning openings and expanses of wall.
- Appeals from decisions of the Planning and Development Department or the Downtown Commission shall be heard by the Planning and Zoning Commission (acting as the Board of Adjustment). Appeals from the decisions of the Planning and Zoning Commission shall be heard by the Asheville City Council.

At their meeting on September 1, 2010, the Asheville Planning and Zoning Commission reviewed and unanimously (6-0) recommended approval of this ordinance to Asheville City Council.

The Asheville City Council has held two work sessions on the Downtown Master Plan draft ordinances and has requested no changes to the process elements that were first presented to Council in November of last year.

Regarding compliance with the City Council Strategic Operating Plan, this wording amendment reflects proposals set forth in the Asheville Downtown Master Plan adopted by the Asheville City Council on May 26, 2009. Specifically, it implements elements of Strategy 6 of the plan. Some changes have been proposed by the reviewing committee but the goals and intentions of the master plan are preserved.

At their meeting on September 1, 2010, the Asheville Planning and Zoning Commission reviewed and unanimously (6-0) recommended approval of this ordinance to Asheville City Council. The Downtown Commission also recommended approval in the fall of 2009.

Pros:

- Implements a community developed master plan.
- Sets forth a process that provides greater certainty to developers on projects in the CBD/DDR.
- Provides for a more transparent review process for projects in the CBD/DDR.

Cons:

- Some may be concerned over the elimination of City Council discretionary approval for all but the largest of projects.
- Some may be concerned that the requirement for developer sponsored meetings for Level II and Level III projects is burdensome.
- Some may feel that City Council review of Level III projects outside of the traditional downtown core (only reviewing for compliance with standards) is an unnecessary step as this review has already been conducted by the Planning and Zoning Commission.

Additional cost associated with notification of property owners for projects being considered by the Asheville Downtown Commission. First class postage for property owners within two hundred (200) feet is the proposed requirement. Actual amount will be dependent on the number of Level II and Level III projects proposed and the number of property owners to be notified.

City staff recommends approval of this wording amendment regarding the review process elements as recommended in the Downtown Master Plan.

City Attorney Oast asked for a minor amendment to the process ordinance having to do with the manner in which these decisions by the Council are appealed. He suggested the appropriate language in subsection (12) be changed to appeal to "Superior Court of Buncombe County in the manner provided by law."

Urban Planner Alan Glines said that this is the consideration of an ordinance amending the Unified Development Ordinance according to the recommendations of the Downtown Master Plan. This public hearing was advertised on November 12 and 19, 2010.

Mr. Glines said that two years ago City Council approved a contract for planning services to develop a master plan for downtown to capture the community's goals for growth, redevelopment and continued vitality. The master plan consultants held numerous public meetings and forums to gather community input for downtown's future and the master plan was approved by City Council in May 2009. The Council directed the staff to work with stakeholder groups to prepare the changes to the UDO necessary to implement the plan recommendations, and other implementation strategies.

With that direction from Council, staff and stakeholder task groups have been studying the master plan and developing strategies for implementation. The Urban Design Action Committee began meeting in the fall of 2009 to evaluate the impacts of the master plan on parcels in downtown and to determine the best way to implement the recommendations in the plan. After over 20 meetings they concluded their work, and their final proposals for the Central

Business District were presented to the Downtown Commission. At their June 2010 meeting, the Commission voted to approve the changes as recommended by the Committee. The Planning and Zoning Commission after a series of meetings to review the proposals voted on September 1, 2010 to approve the wording amendment. Other stakeholder groups continue to work on implementation elements that do not require UDO changes.

The proposed UDO text amendment replaces the current development standards for the Central Business District (CBD) with new text and maps that reflect the goals of the Asheville Downtown Master Plan. Changes to the UDO are directly related to *Strategy 4: Shape building form to promote quality of place* and *Strategy 5: Update downtown design guidelines* from the master plan.

The master plan introduces regulations that are form-based rather than use-based. They focus on the basic building design elements to strengthen compatibility, ensure pedestrian orientation, and enhance the character of the skyline. The existing ordinance provides minimal direction to ensure that new building construction is compatible with neighboring properties and with downtown in general. The plan introduces concepts for the CBD that include new definitions for how height is measured, building height maximums based on location in downtown, a context transition edge adjacent to residentially zoned properties, shadow protections for certain parks, a street wall requirement, and building step-backs. The plan also provides new development requirements for the portions of new structures that exceed 75 feet in height including a maximum floor plate, and a limit on the longest dimension of the tower portion of a building. All structures will be required to include a building cap, a primary entrance along a frontage line, and requirements for windows and other openings at the ground level and upper stories.

The charge of the Council to the Urban Design Action Committee was to study how each master plan concept would work and realistically function in downtown, and to avoid any "unintended consequences" from implementation. With that charge, some changes are proposed that slightly modify the master plan recommendation while maintaining the goals of the plan. Using master plan concept maps, he explained the changes recommended for the master plan summarized below:

Front Setback – The master plan suggested averaging front setbacks based on street context. The Committee instead recommends retaining current requirements in the CBD for zero-foot setback from the right-of-way-line with limited exceptions to emphasize urban form in new construction and not allow master plan suggested setback averaging because many areas in downtown currently have a suburban form.

Measurement of Building Height – The Committee found that there are practical difficulties with the master plan recommendation to re-measure/ re-assess the height of a building based on the grade change across the site and instead recommended establishing a single height reference point at the primary pedestrian entrance.

Height Zone Locations – The Committee suggested adjustments to the height zone maps to reduce the locations of the tallest height zones based on compatibility with the traditional downtown core. Specifically, this reduction is in three locations – surrounding the Grove Arcade and areas below Hilliard Avenue along Church Street and Biltmore Avenue.

Applicability – The Committee recommends applying the master plan requirements and standards only to areas zoned Central Business District and not to other zoning districts surrounding downtown, as is shown on several maps within the plan. This will simplify implementation and aligns with community expectations to focus on downtown regulations.

Context Transition Edge – The Committee recommends that the Context Transition Edge be adjusted to apply only to the CBD areas most sensitive to changes in height (immediately adjacent to residentially-zoned properties) and limiting the application of the height buffer to 100 feet wide (instead of 300-400 feet wide as proposed in the plan).

Shadow Restrictions – Due to continuing concern about the impact of shadow requirements on building near very small parks, the staff proposed adjusting the building shadow limitations for parks and open spaces to only apply to larger park areas and exclude small pocket parks, private parks and plaza spaces, with definitions created for these uses. Additionally, the Committee recommended removing the shadow limitations on historic structures because other protections could be developed for them involving input from preservation professionals.

Street Wall – Because of its complexity, the committee recommends maintaining the street wall concept but reworking it to simplify understanding and provide some additional options that more completely reflect the historic fabric of downtown. City Council has also expressed interest in expanding the options for a variance from a street wall step-back for any new building. Using pictures, he showed examples of existing buildings.

Air Rights – The Committee, reflecting a staff recommendation, recommend removing the air rights option for side step-backs for upper stories of buildings because of legal concerns.

Building Cap – The Committee included clarification of the building cap requirements to measurable standards. Originally the master plan provided a number of subjective design recommendations that will be more appropriate in the Downtown Design Guidelines rather than placed in this ordinance.

Key Pedestrian Streets – The Committee suggested some modifications of the Key Pedestrian Streets map and requiring the primary pedestrian entrance to be placed on these streets if the option is available.

Tower Floorplate – The plan recommended limiting the allowable floorplate dimension for towers over 75'. The Committee agreed with this recommendation but suggested increasing the allowable square footage to 8,000 square feet or 40% of lot area as a more practical number.

The new amendment will include a type of form code that is similar in look to the other ordinances in the UDO but which introduces building envelope concepts and appropriate illustrations to convey the new standards. Maps will also be a part of the ordinance to easily identify boundaries for specific requirements in the ordinance.

West Asheville UDO Changes to CBD Zone

A related amendment has been finalized that proposes wording changes that will apply to the west Asheville CBD areas. There are two CBD sections along Haywood Road that cover about 60 parcels totaling approximately 18 acres. The proposed changes recommend a substantial height reduction for west Asheville, as there appears to be a general belief that very tall buildings are not appropriate along Haywood Road, and should be limited to the downtown CBD. Landscape buffer options are also proposed for the west Asheville CBD areas based on the scale of a specific development adjacent to residential areas. If these buffer options are adopted, these could provide a useful alternative for other areas in the city where commercial zones are directly adjacent to residential zones. These changes were worked out with the west Asheville property owners and interested residents at a series of meetings.

There are also two other isolated Central Business District-zoned parcels in Biltmore Park in south Asheville. There are no development plans for these parcels and future development will likely require rezoning as a part of a new development plan, so there is no plan for modifying them, although they will be affected by the changes to the CBD district.

The Urban Design Action Committee identified a number of items that they felt should receive additional attention but which were beyond the specific scope of their work, and not essential for the implementation of the majority of the master plan recommendations. They asked that this list be presented as unfinished items that may be studied by the Downtown Commission or other appropriate groups:

1. View Corridors to be reviewed again for specific locations
2. External Vista Points ("Vista Trail") development providing vistas into downtown
3. Expansion of the CBD along Ashland and Biltmore Avenues
4. Incentives or trade-offs for new parks, green features, etc.
5. Shadow Impacts on sunlight-dependant historic resources or sunlight-dependant "green" features
6. Transfer of Development Right possibilities
7. Protection for historic structures

The Planning and Zoning Commission considered the following clarifications based on public comments received during the review and recommended their inclusion into the proposal:

1. The ordinance will apply to all new construction and/or changes that modify the exterior walls and/or roof of an existing building. There was additional clarification that the ordinance will not apply to routine maintenance, repair or replacement of the same or similar materials on existing buildings.
2. Requests for variances will rest with the official or agency responsible for project approval and with all variance requests, the Downtown Commission will provide a recommendation as a part of the process.
3. The descriptions of several sections were edited to clarify the meaning and requirements.

During two work sessions with City Council on October 12, 2010 and November 9, 2010, staff was directed to look into a number of considerations including incentives for affordable housing and commercial units, sustainable building features for new construction, and a broader variance option for buildings seeking an alternative to the step-back requirements at the height of the street wall. After consideration of the options, the City Council decided to postpone the sustainability option. The Council then directed the staff to pursue the step-back alternative to ensure that a variety of options will be in place for new buildings and in recognition of the many existing downtown buildings that do not provide a physical step back.

Based on the comments from the Council during the work session, staff is now proposing a broader variance option for buildings seeking an alternative from the step back requirements. Originally the variance provision was limited to shorter buildings (below 75 feet) because of the need to protect the pedestrian environment at the sidewalk level. Step-backs are designed to allow air and light to reach the sidewalk and to maintain the historic character for buildings, especially in the downtown core. Factoring into the proposed change is the reality that many existing iconic downtown buildings do not 'step back' but rather provide a strong visual transition from the base of the building to upper floors by way of color and material changes and sometimes by the size and scale of entryways and windows at the base. This proposed modification will allow a building of any size to apply for the variance by showing a design that provides a clear transition between the lower portions of the building and upper floors at the street wall height.

This proposed variance option was reviewed with the Downtown Commission along with City Council's conversation about the *Transformational Projects Policy and Incentives.* The Commission did have some concerns about the change but noted that they will be involved in

reviewing the variance requests. The Downtown Commission also indicated that they would appreciate the opportunity to provide ideas relating to the Central Business District for the *Transformational Projects Policy and Incentives* when City Council is ready to consider these details.

Regarding compliance with the Strategic Operating Plan, the wording amendment being considered is in direct support of the Asheville Downtown Master Plan adopted by City Council on May 26, 2010 (Resolution 09-102) The wording amendment represents the implementation of Strategies 4 and 5 focusing on the character and scale of the built environment. Some minor changes have been proposed by the reviewing committee but the goals and intentions of the master plan are preserved. The adoption of the wording amendment is also in alignment with the goals of the Strategic Plan 2010-11 which emphasize fiscal responsibility by implementing an approved master plan. The plan has represented a strong partnership with supporters and stakeholders of downtown who were heavily involved in developing the strategies in the master plan and continue to meet to implement the plan.

Pros:

1. Implements a community developed master plan.
2. Provides a recommended form-code framework for designing new structures.
3. Assures adequate air and light at the sidewalk level and promotes compatibility with the existing historic context.
4. Encourages views between tall buildings and enhances the skyline vistas of downtown.
5. Improves the compatibility for the two areas of Central Business District zoned property located along Haywood Road in west Asheville with the single-family neighborhoods that adjoin that property.

Cons:

1. The code is more complex and may be difficult to explain and understand for the layman.
2. Developable area per lot is reduced above the height of 75 feet (may be considered a pro).
3. As with any change to the UDO regulations, the impact of the new ordinance may not be fully understood until new developments are proposed.

The Planning and Zoning Commission voted 6-0 to recommend approval of the wording amendment at their meeting on 9-1-10. The wording amendment was reviewed with the Commission over four meetings to carefully consider the details of the ordinance. The Commission recommended some clarifications to the ordinance which have already been reviewed in this staff report and are part of the proposed ordinance being considered by City Council.

The Urban Design Action Committee endorsed the wording amendment and sent it forward to the Downtown Commission for consideration. The Downtown Commission after adjustments to the height map voted to approve the amendment on June 10, 2010 and recommend it moving forward to the Planning and Zoning Commission.

This proposal has also been shared with interested stakeholders along Haywood Road and with Biltmore Farms and new concepts for landscape property-line buffers were reviewed with the Coalition of Asheville Neighborhoods (CAN).

The Planning and Development Department staff recommends approval of this wording amendment according to the recommendations of the Downtown Master Plan.

Mr. Pat Whalen, former Chairman of the Downtown Commission, hoped that Council would continue to honor all the public participation in the Downtown Master Plan to get to this point. He supported the amendments, noting that it could be fine-tuned in the future.

Mr. Steve Rasmussen, member on the Urban Design Action Committee commented on some loose ends as follows: (1) the need to find better ways to protect historic properties downtown; (2) more protection for the mountain views, view corridors and vista parks; (3) and ensure public input by keeping the Level III project thresholds at 100,000 square feet.

Ms. Raelin Hanson, resident of Battery Park Apartments, felt the Level III project threshold should reduced to allow public comment before City Council; and was opposed to modern building caps.

Mr. Joe Minicozzi, interim Executive Director of the Asheville Downtown Association, urged Council to adopt the ordinances which create a better, more transparent and predictable process.

Ms. Susan Griffin, downtown resident, supported the changes in that this is a reasonable and organized way to look at future growth.

Mr. Larry Holt, downtown resident, spoke about the culmination of hundreds of hours of work by hundreds of volunteers. He was concerned about the public participation in the review of plans once the threshold is raised because public comment becomes even more important. He hopes that is addressed; however, he felt we needed to move forward because when development starts again we need to have a good review process in place.

Ms. Karen Van Ammon, City resident, felt we should put language in to protect the historic buildings now because once they are torn down, it will be too late.

Mayor Bellamy closed the public hearing at 6:32 p.m.

Ms. Fields said that there are a number of buildings in downtown that are designated local landmarks and they are protected, to a certain extent. They can still be torn down, but you have to go through a lot of red tape and there is a waiting period. The only other thing you can do to protect historic buildings is to create a local historic district; however, the times that has been suggested there has been concern from the downtown property owners and not an interest in seeing that happen.

Vice-Mayor Newman moved to adopt Ordinance No. 3929, an ordinance amending the Unified Development Ordinance according to the recommendations of the Downtown Master Plan. This motion was seconded by Councilwoman Manheimer.

All of Council commended the hundreds of volunteers across the spectrum (business, architects, renters, City residents, County residents, etc.) for the thousands of hours of work on this process.

Vice-Mayor Newman said that we have tried to create a set of policies that encourage investment and growth in downtown, rather than sprawl development across the countryside and on our mountains. When new buildings are built in our downtown, we want them to be buildings that future generations will be proud of in the same way we are very proud of the architectural legacy we have inherited from past generations. That is the intent of this plan. This is not a plan that any one person would have written - it's the work of the community. We have created much stronger design rules that developers have to adhere to build in the downtown, while Council will still be involved in the very large projects in the traditional part of downtown.

Councilman Smith too noted that consensus on 19 strict design rules were achieved by the hundreds of volunteers.

Councilman Russell did not support this process in the beginning due to questions regarding property rights, but since this process has resulted in a more objective and less political process he could support it.

Councilwoman Manheimer stated that whole concept of the Downtown Master Plan was to have a massive collaboration of citizenry come up with a uniform set of rules that reflect what our community wants - not a case by case basis, but rather put a set of rules in place so when the economy picks up, Council is not having to make a decision each time about what is best for our community. Before this Plan, we didn't have height limitations or restrictions to what a building might look like. This Plan basically covers what a building should look like down to pretty minute details. And, if you are willing to build exactly what we want and what these volunteers have decided what is best for Asheville, in exchange, you can build your project. She felt that the ordinance can be amended in the future if need be. But, in the end, this represents our best efforts.

Councilman Davis felt Council should either do away with Council review of the Level III projects outside of the traditional downtown core (since it is only reviewing for compliance with standards), or make it the same review of all Level III projects inside the traditional downtown core area.

Mayor Bellamy reiterated that the Downtown Master Plan was a comprehensive endeavor to plan for the future with public input upfront. This process was built upon other plans, including the 2025 Plan (which received a lot of community input), as well as the Council's smart growth policies. She agreed with Councilwoman Manheimer that this plan addresses specific and minute details on the building, e.g., mechanicals on the buildings. She felt that if people review the ordinance in detail, they would appreciate what Council is trying to do.

The motion made by Vice-Mayor Newman and seconded by Councilwoman Manheimer to adopt Ordinance No. 3929, an ordinance amending the Unified Development Ordinance according to the recommendations of the Downtown Master Plan carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 373

Councilwoman Manheimer moved to adopt Ordinance No. 3930, an ordinance amending the Unified Development Ordinance concerning review process elements as recommended in the Downtown Master Plan, with the amendment outlined by City Attorney Oast. This motion was seconded by Vice-Mayor Newman.

Councilman Bothwell agreed with Councilman Davis in that Council should have the same review of the Level III projects inside or outside of the traditional downtown core. He questioned how the 175,000 sq. ft. Level III threshold was picked. He felt it was arbitrary to almost double the size of the Level III developments from the current 100,000 sq. ft. to the proposed 175,000 sq. ft. He suggested we have a 125,000 sq. ft. threshold for Level III projects and increase it through incentives. He pointed out that former Mayor Leni Sitnick felt the 100,000 sq. ft. threshold was extremely high when the current ordinance was adopted and has regretted that the Level III threshold was not lower back then. The Master Plan group started at 100,000 sq. ft. and they compromised up. City Council is the level where citizens get to have a voice in shaping our community. He felt we should keep the threshold for Level III projects at 100,000 sq. ft., or increase it in small increments. If we increase the threshold to 175,000 sq. ft. now, it will be difficult to reduce it in the future.

When Councilman Bothwell asked for a friendly amendment to keep the Level III threshold at 100,000 sq. ft., Vice-Mayor Newman explained why he did not accept it.

Councilman Smith suggested a compromise of 137,500 sq. ft. for the Level III threshold, and incentivize up to 175,000 sq. ft. for LEED certification.

Councilman Bothwell moved to amend the main motion to reduce the Level III threshold from the proposed 175,000 sq. ft. to 137,500 sq. ft. This motion was seconded by Councilman Smith and failed on a 2-5 vote, with Councilman Bothwell and Councilman Smith voting "yes."

Councilman Smith questioned if Council was open to pursuing incentivizing within this process and felt this could be an item Council could review at their retreat.

Councilman Bothwell moved to amend the main motion to have the same review of the Level III projects inside or outside of the traditional downtown core. This motion was seconded by Councilman Davis and failed on a 3-4 vote, with Councilman Bothwell, Councilman Davis and Councilman Smith voting "yes."

Mayor Bellamy explained that what is proposed is for those who invest in downtown will have strict rules to follow and if all those standards are met, the project will be approved. She noted that several of the e-mails she has received contain misinformed comments. Council is not abdicating their responsibilities for Level III projects. Notifications will still be sent and public comment will be accepted. This is the culmination of pretty strong ordinances and when development restarts, it will respect who we are in the City of Asheville and the mountains of western North Carolina.

At Mayor Bellamy's suggestion, it was the consensus of Council to have staff put on the City's website information and maps to help them understand how this will ordinances will benefit the downtown.

The motion made by Councilwoman Manheimer to adopt Ordinance No. 3930, an ordinance amending the Unified Development Ordinance concerning review process elements as recommended in the Downtown Master Plan, with the amendment outlined by City Attorney Oast, and seconded by Vice-Mayor Newman carried on a 6-1 vote, with Councilman Bothwell voting "no."

ORDINANCE BOOK NO. 26 – PAGE 343

At 7:16 p.m., Vice-Mayor Newman moved to excuse Councilman Russell from the remainder of the meeting. This motion was seconded by Councilman Davis and carried unanimously.

At 7:16 p.m., Mayor Bellamy announced a short recess.

D. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS US CELLULAR TELECOMMUNICATION TOWER, LOCATED AT 415 BEAVERDAM ROAD, FOR CONSTRUCTION OF AN 80' MONOPOLE TOWER

Mayor Bellamy said that it has been determined by the Planning and Development Director that the City's Zoning Ordinance does not allow telecommunications towers to be located on the property that is the subject of this Conditional Use Permit application, and that this application is ineligible for consideration. This public hearing will not be held.

E. PUBLIC HEARING TO CONSIDER THE MASTER PLAN AND REZONING FOR THE PROJECT IDENTIFIED AS HORIZONS, LOCATED AT 136, 176 AND 180 MERRIMON AVENUE AND 17 AND 23 ELOISE STREET FROM HIGHWAY BUSINESS DISTRICT, COMMUNITY BUSINESS I DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO URBAN VILLAGE DISTRICT FOR A MIXED USE DEVELOPMENT

Urban Planner Julia Fields said that in November 2007, the Asheville Planning and Zoning Commission reviewed a rezoning petition for the Horizons Urban Village project located on an 8.54 acre site on Merrimon Avenue. The Commission voted to recommend rezoning (7-0) and the conceptual site Plan (5-2) presented by the developers/property owners of the project, and the matter was scheduled to be heard by Asheville City Council in January of 2008. At that time, the developers requested a six (6) month continuance in order to review the site design particularly as it related to the height of some of the buildings. Building height was a significant concern for the adjoining neighbors of this project. In June of 2008, the property owners requested an additional three (3) month continuance primarily due to economic conditions. In October of 2008, and again in 2009, the property owners requested and obtained an additional twelve (12) month continuance from the Asheville City Council.

The property owners (F. Foster Shriner, AVN Developers, Member, Jasmine Development, LLC, Manager and CS Merrimon Group, LLC, Manager, submitted the following letter on November 16, 2010, withdrawing the rezoning petition "Please accept this notification that the property owners of the former DEAL property and the proposed Horizons project wish to withdraw our application. Current economic conditions have required that we abandon this project. We regret this decision and thank you and all of the staff for your patience and assistance throughout this process."

Since an Urban Village rezoning can only be done in response to a petition of the owners of the property included, this withdrawal has the effect of taking the petition out of consideration. Should the property owners wish to have the rezoning/project considered again, a new application will be required, with payment of all requisite fees. A new petition would be required to go through all steps in the process as before.

A valid protest petition for this rezoning has been submitted. The withdrawal of the project makes the protest petition of no effect.

A pre-application conference has been held concerning a proposal for a new project on this site. It is expected that there will be an application submitted for project review for this new proposal in December of this year.

Council need take no action on this matter.

V. UNFINISHED BUSINESS:

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-252 - RESOLUTION ADOPTING CODE OF ETHICS FOR THE CITY COUNCIL

City Attorney Oast said that this is the consideration of a resolution adopting Code of Ethics for the City Council.

: In 2009, the N.C. General Assembly adopted N.C.G.S. 160A-86 and 160A-87. N.C.G.S. 160A-86 requires adoption of a Code of Ethics; N.C.G.S. 160A-87 requires that Council members receive regular ethics training. Council members have been fulfilling their ethics training requirement through programs by the School of Government.

N.C.G.S. 160A-86 provides for certain minimum content a Code of Ethics, to include:

(1) The need to obey all applicable laws regarding official actions taken as a board member.
(2) The need to uphold the integrity and independence of the board member's office.

(3) The need to avoid impropriety in the exercise of the board member's official duties.
(4) The need to faithfully perform the duties of the office.
(5) The need to conduct the affairs of the governing board in an open and public manner, including complying with all applicable laws governing open meetings and public records.

The proposed Code of Ethics draws from publications by Institute/School of Government at UNC, the ethics codes and policies of other North Carolina local governments, and other sources. The proposed code covers the minimum required content, but also draws directly from applicable statutes, and covers other relevant and recurring issues.

Section 1 of the code contains definitions.

Section 2 covers the duty of Council members to know the law, and to make appropriate inquiry in the case of questions or uncertainty. The statutes are directory and cover those things that Council members must (or must not) do.

Section 3, 4, and 5 establish expected standards of behavior in meetings, on official business, and at other times. These are not mandatory or minimum standards, but rather are guidance for interacting with each other and with the public.

Section 6 is a special recognition of the open meetings and public records laws, and the importance and effect of those laws on Council's business.

Section 7 clarifies in broad terms the relationship between the Manager and Council on the Council-Manager form of government, as prescribed in the City's Charter and the General Statutes.

Section 8 codifies the manner for determining where a conflict of interest exists, and what to do if a conflict develops. Not every interest will be a conflicting interest, requiring recusal; different standards may apply to different situations, with different results.

Section 9 draws heavily on statutes regulating gifts and favors. Though not as detailed as the State Government Ethics Act, that law is cited as general guidance for appropriate conduct.

Section 10 Clarifies that Council members are responsible for knowing elections laws, and further provides that they not engage in political activity on City premises. This is drawn from a statute, N.C.G.S. 160A-169 that governs political activity.

Section 11 is a reminder of the limitations and the use of confidential information. This is likewise drawn from a statute, N.C.G.S. 14-234.1.

Section 12 describes a censure process for handling violations of the ethics policy; State law does not provide any process for enforcing the ethics policy or sanctioning violations of it. This is an optional provision, and a much more detailed process is available.

Council must adopt a Code of Ethics before the end of the year, except to maintain the required minimum content the Code may be amended as often as needed.

Adoption of a Code of Ethics is required by law.

Pros:

- Satisfies legal requirement
- Codifies and assembles in one place the legal and other provisions for Council conduct

Con:

- None noted.

The fiscal impact is negligible; cost of receiving periodic training.

He asked that the policy be revised as follows: (1) in Section 7, "Except for purposes of requesting or receiving assistance of a clerical or administrative nature from those employees assigned to provide such assistance, or for purposes of inquiry, Council members should deal with City staff only through the City Manager or his designee."; (2) further clarification in Section 9 regarding Gifts and Favors that N.C. Gen. Stat. sec. 133-32 is a regulation that applies only in situations where you are dealing with someone who is under contract with the City or anticipates being under contract with the City; and (3) deletion of subsection 1 in Section 9 regarding honoraria and re-number the following paragraphs.

Adoption of the revised resolution, and the Code of Ethics is recommended.

In response to Councilman Bothwell, City Attorney Oast said that "living as an elected official" means being aware that you are an elected official, which carries certain responsibilities. It is an expectation that you not act in such a way as to bring shame to the city.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 10-252. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 264

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilman Bothwell thanked all the volunteers who came out on November 20 for the City-wide clean-up day. He reminded people who are physically limited in their ability to do the work that volunteers are available to help out and to contact him for that assistance. Mayor Bellamy thanked Councilman Bothwell for his leadership on this effort.

Councilman Smith announced the November 30 community meeting at W.C. Reid Center at 133 Livingston Street, at which time staff will update the community on activities taking place in their area and Council will hear from residents as well.

City Attorney Oast said that the N.C. League of Municipalities representatives wanted to meet with representatives from some of the larger cities in North Carolina to discuss their legislative agenda for this coming year. They tentatively suggested December 6 in Asheville. He asked Council to let him know if they would be interested in meeting.

Mayor Bellamy reported on her trip to Washington, D.C., as a member of the Local Government Advisory Committee. She explained what a good opportunity it was to hear the priorities of the Environmental Protection Agency on a national and regional level and for them to hear our needs on a local level.

Mayor Bellamy wished everyone a happy and safe Thanksgiving holiday.

VIII. ADJOURNMENT:

366

Mayor Bellamy adjourned the meeting at 7:35 p.m.

Magdalen Bouleson
CITY CLERK

Ingrid Bellamy
MAYOR

Tuesday – November 30, 2010 – 6:30 p.m.
W.C. Reid Community Center

Community Meeting – Central Asheville

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; and City Attorney Robert W. Oast Jr.

Absent: None

Mayor Bellamy opened the meeting and welcomed the audience. She then introduced City Council members and explained the questions and answer process.

Mr. Robert Hardy, President of the Southside Neighborhood Association, thanked City Council for meeting at the Reid Center. He expressed several concerns, some being, but are not limited to: potential traffic alleviation plans and how that might impact Walton Street Park, inadequate notice of meeting; new aquatic center replacing Walton Street pool and the need for neighborhood children to use the facilities consistent with how they currently use available facilities; and safety, security and stability of area. Mr. Hardy said that (1) he has a proposal for an option that would leave the park intact and would like to share that idea when the topic is addressed again; (2) the community wants to ensure they are included in all plans and can provide input; (3) the community would like replacement facilities if plans fall through after the existing facilities are demolished; and (4) the community would like to engage in conversation via forum with A-B Technical Community College regarding potential and alternate routes for projects that will impact their neighborhood.

Mr. Hank Dunn, President of A-B Technical Community College, pointed out that they are a part of the community and they are concerned about safety for everyone, not just those on campus. They have on-campus traffic challenges and are exploring options, noting they would like to collaborate with the surrounding community to find something that works for everyone. They are looking for ways to make AB-Tech campus and the community safer.

Director of Parks, Recreation & Cultural Arts Roderick Simmons explained the vision for the Livingston Street Park redevelopment including multi-modal transportation, community center, outdoor play with water feature, etc. He said that this is the highest ranking project in the Master Plan process. He explained the following three phases which are planned for this project: Phase 1 – Community Center/Auditorium; Phase 2 – Gymnasium; and Phase 3 – community involvement for determining the highest and best use of undersigned program space.

Director of Administrative Services Lauren Bradley explained the City's strategic goals and financial realities. She then explained the constraints to which the City is subject, as well as the level of service delivery we provide and the volume of citizens and visitors to whom we provide them.

Mayor Bellamy then opened up the meeting for questions and answers explaining that all answered questions would be delegated to City staff for response and posting on the City's website.

Mayor Bellamy and Council members expressed their appreciation for the community involvement.

At 8:15 p.m., Mayor Bellamy adjourned the meeting.

Magdalen Burleson
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – December 14, 2010 – 3:00 p.m.
Worksession
1st Floor North Conference Room

Present: Mayor Terry M. Bellamy, Presiding; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Vice-Mayor Brownie W. Newman and Councilman William A. Russell Jr.

Annexation Policy Direction

Urban Planner Blake Esselstyn said that in October of this year, in reviewing two annexation areas, the Asheville City Council decided to forego one of the annexations. At that time, Council expressed an interest in conducting a worksession to examine the City's annexation policies and related legislative objectives.

Annexation is the methodical extension of a city's boundaries into adjacent unincorporated areas, and the corresponding extension of that city's services to the areas encompassed by the new boundaries. As a matter of policy, annexation is permitted in North Carolina subject to statutory requirements because the State has found that "sound urban development is essential to the continued economic development of North Carolina" and that "municipalities are created to provide the governmental services essential for sound urban development and for the protection of health, safety and welfare in areas being intensively used for residential, commercial, industrial, institutional, and governmental purposes or in areas undergoing such development." [NCGS § 160A-47]

Annexation is seen as a way to ensure fairness amongst those living in an urbanized area and as a way to maintain the strength of North Carolina cities. Several studies have shown that allowing for "elastic" cities helps to reduce sprawl, maintains population growth, and promotes financial stability of the municipalities in the State (bond ratings, tax base, etc).

The use of the tool of statutory, or city-initiated, annexation is perhaps more important to Asheville as a growth management tool than other cities because our local government has been deprived of both the traditional annexation incentives other cities have to ensure steady growth and other traditional revenue sources such as hotel/motel fees. The Sullivan Acts are the most egregious example of this situation in that they restrict the ability of Asheville to grow with water line extensions and to charge differential water rates. Thus, Asheville taxpayers must absorb operation cost deficits for water customers not within the City.

The City of Asheville's approach to annexation since 1999 has been to conduct city-initiated annexation in a conservative fashion [see comparative information]. The characteristics of this approach have been:

- Undertaking the annexation of properties that are clearly urban (i.e. meeting density or development thresholds) in nature.
- Annexing areas that are carefully defined from a rational service provision standpoint – omitting areas where service provision is infeasible.
- Annexing areas that enhance our ability to provide efficient and effective municipal service.
- Annexing relatively small areas unless such areas incorporate a road corridor or a large subdivision.
- Evaluating potential annexation areas adjacent to all quadrants of the City.
- Per Council direction, we have avoided annexation of industrial areas, primarily in the southern part of Buncombe County.

Staff has continued to follow this approach in presenting proposed annexations to the Asheville City Council once or twice each year.

To assist Council in policy review, staff provided Council the following materials: (1) Comparative Annexation Information – From City of Raleigh; (2) Comparative Municipal Growth Table; (3) Brookings Institute Report; and (4) Baltimore Magazine Article.

Using the map for the resolution of consideration (adopted by City Council in February of 2010 and effective until February of 2012), Mr. Esselstyn reviewed the methodology on why we annex certain areas of the community.

Throughout discussion, Mr. Esselstyn, City Attorney Oast and Director of Public Works Cathy Ball responded to various questions/comments from Council, some being, but are not limited to: why have we not annexed the I-26 corridor; why wasn't more of the Royal Pines area included in the earlier annexation proposal; since the City is not in the sewer business and it is a huge expense, why do we have to install sewer lines; does the Town of Woodfin provide sewer service as they seem to be annexing aggressively; how does Asheville compare in annexing with other cities over the last five years; and can Asheville charge new water customers a differential rate.

Mayor Bellamy supported providing sidewalk service in our future annexation plans.

It was Councilman Bothwell's opinion that we should annex areas in our resolution of consideration which are particularly likely to change in use or development of commercial areas in the future.

Noting that if the legislature moves forward with any iteration of the annexation bills that would effectively eliminate Asheville's ability to annex at all, City Attorney Oast explained the number of technical revisions to the act that municipalities were okay with. One major point of debate was the inclusion of a requirement of a referendum involving the area to be annexed, which was what caused the bill to fail. He said that the 2009 one version of the legislation would have stopped annexations in process and at the time we had two that were in the Court of Appeals. It was scaled back that it only applied to annexations on a going forward basis and the changes would have only applied to annexations to which a resolution of intent had been adopted before October 1, 2009. There was a lot of objection to stopping the annexations in process.

Mayor Bellamy said we need to look at the Sullivan Acts not just from the perspective of differential rates for Buncombe County and City of Asheville residents, but the future of this area because counties adjacent to our area need this resource and if we are not planning for our community to benefit financially, we are doing our City a disservice.

City Attorney Oast said that in the law proposed in 2009, there was a section that provided for annexation agreements, which is along the lines of what we have been talking about with the Sullivan Acts. It says a city may enter into a contract under which the city agrees to extend water service, sewer service or both to specific property and in return the owner or owners of the property agree to the following ... to petition the city for annexation and not to join in any appeals. When Councilwoman Manheimer asked if that would supersede the Sullivan Act restriction specific to Asheville, City Attorney Oast said this appears to be new language.

Mayor Bellamy felt that if residents of the proposed annexation areas are allow to vote whether to become a part of the city, then she would support city residents having the ability to vote on the expansion of their boundaries.

Councilman Bothwell felt we should entice people to want to become City residents and suggested ways to create a dollar differential for those that live in the City from those that live in the County, e.g., discount to City residents in our parking deck rates.

At Mayor Bellamy's request, City Attorney Oast said that he would provide Council the bill which the League supported, until the referendum revision was added.

Mayor Bellamy stressed that we need a plan to talk with our legislators about if the legislature eliminates cities to annex, as it is an equity issue for not just now but in the future because there is no way to grow Asheville and people will continue to tap into our water system. Said plan could include some negotiation/compromise tools, e.g., letting Asheville continue with their annexations in progress, an annexation contract to require voluntary annexation of developers that develop adjacent to the City limits; our willingness to have a 5-year delay for annexations to become effective; phasing services; phasing taxations; etc. City Attorney Oast said that he will also provide Council the information he compiled in 2009 when this issue was last discussed.

It was the consensus of Council to have a subcommittee made up of Mayor Bellamy, Councilwoman Manheimer and Councilman Smith discuss the negotiation/compromise tools, some outlined above, that Asheville would be willing to support of the ability for cities to annex is eliminated.

With all the factors in play, it was the consensus of Council to postpone any specific annexation proposals for the next few months.

At 4:20 p.m., Mayor Bellamy adjourned the worksession and to reconvene the formal meeting at 5:00 p.m. in the Council Chamber.

Tuesday – December 14, 2010 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman William A. Russell Jr.

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Manheimer gave the invocation.

I. PROCLAMATIONS:

A. EMPLOYEE RECOGNITIONS

City Manager Jackson recognized (1) Francois de Clarens, first year Engineering Student in Polytech 'Orleans France. His home town is Saumur, France a sister city of Asheville. From October 4 until January 1 Francois is working with the City of Asheville in the position of

Engineering Services Internship. In this role he is being exposed to Land Surveying, Computer Aided Drafting and design on our Civil Engineering projects. In the short time that he has been here, he has worked on the ongoing projects with sidewalk, bicycle and pedestrian design, bus stop shelters, retaining wall design and construction. Francois's mentor for the Internship is John White the Survey Coordinator for the City of Asheville. ; (2) Assistant Fire Marshal Kelly Hinz - Assistant Fire Marshal Kelly Hinz of the Asheville Fire Department has successfully completed the process that awards her the professional designation of "Fire Officer" (FO). The Commission on Professional Credentialing (CPC) met on November 16, 2010, to officially confer the designation upon Kelly Hinz. Kelly is one of only 20 FO's worldwide. The CPC awards the FO designation only after an individual successfully meets all of the organization's stringent criteria. The process includes an assessment of the applicant's education, experience, professional development, technical competencies, contributions to the profession, and community involvement. In addition, all applicants are required to identify a future professional development plan. Assistant Fire Marshal Kelly Hinz has been a member of the Asheville Fire Department for 10 1/2 years; and (3) Firefighter Combat Challenge World's Competition - Ruth Olson; Joy Ponder; Kelley Webb; Ashley Hamilton; and Maureen Casey– From Reem's Creek Fire Department. Local female firefighters returned home with a bronze medal after competing in the Scott Firefighter Combat Challenge®- World's Final Competition, held in Myrtle Beach, SC this past week. Four members from the Asheville Fire Department, Ruth Olson, Joy Ponder, Kelley Webb and Ashley Hamilton along with team member Mo Casey from Reem's Creek Fire Department, joined forces to create an Asheville team, better known as FUEL. In 2008 the team finished second in the world and this yearly proudly finished third. Each year the competition gets tougher as more women come out to compete. The Challenge annually attracts hundreds of U.S. and Canadian municipal fire departments at more than 25 locations and is now expanding to countries around the world, including New Zealand, Germany, Argentina, Chile, and South Africa. The Challenge seeks to encourage firefighter fitness and demonstrate the profession's rigors to the public. Wearing "full bunker gear" and the SCOTT Air-Pak breathing apparatus, pairs of competitors race head-to-head as they simulate the physical demands of real-life firefighting by performing a linked series of five tasks including climbing the 5-story tower, hoisting, chopping, dragging hoses and rescuing a life-sized, 175 lb. "victim" as they race against themselves, their opponent and the clock. Through support of the Asheville Fire Department, Reem's Creek Fire Department, Asheville Firefighters Association, and through assistants of local grants and fundraisers the team was able raise money in order to attend several training events and competitions throughout the season conditioning them for the final event.

On behalf of City Council, Mayor Bellamy thanked the employees on what they do on behalf of the City of Asheville and City Council. She was proud of City staff and looked forward to highlighting more accomplishments.

B. RECOGNITION OF BILTMORE FARMS' EASEMENT DONATION FOR DINGLE CREEK WETLANDS PROJECT

Mayor Bellamy was pleased to recognize Mr. Paul Szurek, Chief Financial Officer of Biltmore Farms, LLC, for Biltmore Farm's easement donation for the Dingle Creek Wetlands Project. Mr. Szurek also spoke about how two of their buildings have reached a LEED certification level.

C. PROCLAMATION PROCLAIMING JANUARY 10-17, 2011, AS "DR. MARTIN LUTHER KING JR. WEEK"

Mayor Bellamy read the proclamation proclaiming January 10-17, 2011, as "Dr. Martin Luther King Jr. Week" in the City of Asheville. She presented the proclamation to Ms. Oralene Simmons, who briefed City Council on some activities taking place during the week. City Manager Jackson said that he would add a link to the City's website to find all the activities that will be taking place during the week.

D. RECOGNITION OF NEW HUMAN RESOURCES DIRECTOR

Assistant City Manager Jeff Richardson was pleased to introduce Ms. Kelley Dickens, the new Human Resources Director. Mayor Bellamy said that the City will look forward to learning from her experience.

II. CONSENT AGENDA:

Mayor Bellamy asked that Consent Agenda Item G be removed from the Consent Agenda.

Councilman Smith asked that Consent Agenda Item B be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON NOVEMBER 23, 2010; AND THE COMMUNITY MEETING HELD ON NOVEMBER 30, 2010

B. RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 11, 2011, TO CLOSE SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA

This item was removed from the Consent Agenda for an individual vote.

C. RESOLUTION NO. 10-254 - RESOLUTION AUTHORIZING SETTLEMENT OF A PROPERTY DAMAGE CLAIM FOR THE HAYES & HOPSON BUILDING

Summary: The consideration of a resolution authorizing settlement of a property damage claim for the Hayes & Hopson Building.

In the course of construction of the Pack Square Park, surface water that previously had been collected in the storm drainage system of the Court Plaza roadway was directed to the North wall of the Hayes & Hopson building, and entered the basement and sub basement of the building. The intrusion incurred in two locations, one on the Northwest corner, and one midway along the North wall, where a manhole is.

The water intrusion resulted in recurring damage to the finish work in the Hayes & Hopson building, requiring replacement and repair of the work, mold remediation, and extensive use of dehumidifiers. The cost of this work was $35,150.54.

The problem has been corrected by the installation of a shallow drainage system in the area between the North wall of the building and the southern walkway through the park, which was tied into the storm drain collector in South Spruce Street. The Pack Square Conservancy was responsible for the design and installation of the drainage system in the park area; the City installed the improvements on Spruce Street. The corrective measure appears to have been effective.

The Asheville Claims Corporation and our engineers monitored this situation while construction of the park was in progress, and confirmed the source of the water intrusion, the extent of damage, the cost of repairs, and efficacy of the redesigned drainage system. We were initially concerned that the cost of correcting the problem might involve waterproofing the building, a far more expensive proposition.

The owner of the building has agreed to a complete release of the City from liability for damage resulting from water intrusion. Because the adjacent property is owned by the City and

Buncombe County as tenants in common, the County was requested to participate in this settlement, but declined. Accordingly, the release will apply only to the City.

Approval of the City Council is required because the amount of the settlement exceeds the settlement authority of the Asheville Claims Corporation.

Pros:

- Forecloses potential litigation
- The City is released from liability for damage

Con:

- Cost to the City's Insurance Fund

The $35,150.54 cost to settle this claim will be paid from the existing claims budget in the City's Insurance Fund.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 33 – PAGE 279

D. RESOLUTION NO. 10-255 - RESOLUTION ADOPTING THE 2011 CITY COUNCIL MEETING SCHEDULE

RESOLUTION BOOK NO. 33 – PAGE 280

E. ORDINANCE NO. 3931 - ORDINANCE ESTABLISHING A 25 MPH SPEED LIMIT ON MORRIS STREET FROM TALMADGE STREET TO BREVARD ROAD IN WEST ASHEVILLE

Summary: The consideration of an ordinance to enact and/or change a speed limit on Morris Street in West Asheville to 25 mph.

According to state law (NCGS # 20-141), the statutory speed limit in North Carolina is 35 mph inside municipal corporate limits for all vehicles and 55 mph outside municipal corporate limits for all vehicles except for school buses and school activity buses.

Furthermore, local authorities may authorize by ordinance higher speeds or lower speeds than the statutory 35 mph speed limit on locally-maintained streets provided that the higher speed limit cannot exceed 55 mph. Speed limits authorized by local authorities are effective when the appropriate signs are erected.

The City Traffic Engineer recently completed an engineering and traffic investigation and determined that a 25 mph speed limit would be reasonable and safe on Morris Street from Talmadge Street to Brevard Road. The subject street primarily serves residential properties in a well established neighborhood. Daily traffic volumes are less than 400 vehicles per day and the 85th percentile speed equals 23.3 mph.

This action complies with the City Council Strategic Operating Plan in the Safety focus area by improving the "street experience" for all users including pedestrians, bicycles, and motorists in a medium commercial corridor.

Pros:

- City staff has been able to respond favorably to a citizen's request.

- Based on the 85th percentile speed, most drivers are in compliance with the recommended change.

Cons:

- The initial cost to install the appropriate speed limit signs is about $500.
- Typically, speed limit signs have a serviceable life of five to seven years.

The initial cost to install the appropriate speed limit signs is about $500 and is included in the current operating budget for the Transportation Department.

City staff recommends that City Council approve an ordinance enacting and/or changing a 25 mph speed limit on Morris Street from Talmadge Street to Brevard Road in West Asheville.

ORDINANCE BOOK NO. 26 - PAGE 402

F. RESOLUTION NO. 10-256 - RESOLUTION AUTHORIZING CHANGES IN THE CITY OF ASHEVILLE WATER RESOURCES DESIGN AND CONSTRUCTION MANUAL

ORDINANCE NO. 3932 - ORDINANCE APPROVING AMENDMENTS TO THE CIT OF ASHEVILLE WATER POLICIES

Summary: The consideration of (1) a resolution authorizing changes in the City of Asheville Water Resources Design and Construction Manual and (2) an ordinance authorizing changes in the Water Policies.

The Water Resources Design and Construction Manual (herein "Manual") was last updated and adopted by City Council on February 23, 2010, to be effective on March 1, 2010. The Manual must be revised to maintain compliance with federal and state regulations and to reduce maintenance and repair costs by providing a higher level of protection for the City public water system. Along with some grammatical revisions, the substantive revisions to the Manual include but are not limited to a requirement for backflow protection device installations associated with Fire Department Connections (FDCs).

The revised Water Policies were adopted by City Council by ordinance on January 26, 2010. Along with some grammatical revisions, the substantive revisions to the Water Policies include but are not limited to there being a reference in Section VI of the Policy for Cross-Connection Control relative to the backflow protection device installations associated with FDCs.

This is in compliance with the City Council's Strategic Operating Plan to provide safe drinking water to area residents and to ensure compliance with state and federal laws.

Pros:

- Adoption of the changes in the Water Design and Construction Manual will ensure that the design and construction standards are compliant with State and federal laws.
- Changes will provide a higher level of protection to the public water system.
- Changes will help reduce maintenance and construction costs to water customers and developers, respectively.
- Changes will help clarify language.

Cons:

- Failure to adopt the change in the Water Design and Construction Manual will result in standards that are not compliant with state and federal laws and industry standards.
- Failure to adopt the changes in the Water Polices may cause confusion about interpretation.

There is no fiscal impact.

Staff recommends City Council adopt (1) a resolution authorizing changes in the City of Asheville Water Resources Design and Construction Manual and (2) an ordinance authorizing changes in the Water Policies.

RESOLUTION BOOK NO. 33 – PAGE 281
ORDINANCE BOOK NO. 26 – PAGE 403

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO AWARD SALE OF CIVIC CENTER ICE RINK AND EQUIPMENT TO THE HIGHEST BIDDER

This item was removed from the Consent Agenda.

H. RESOLUTION NO. 10-257 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CONTRACT WITH CANDLER CONCRETE WORKS INC. FOR THE DOGWOOD GROVE AND NORTHWOOD ROAD CURBING PROJECT

Summary: The consideration of a resolution authorizing the City Manager to execute on behalf of the City of Asheville a contract and any change order within the budgeted amount with Candler Concrete Works Inc. for the project known as Dogwood Grove and Northwood Road curbing project in the amount of $123,456.78.

The Dogwood Grove Development has existing curb that has deteriorated over the years and is in need of replacing. Northwood Road has curbing on one side of the road and has several areas that are broke. These two areas are going to be resurfaced after the curbing has been installed. The Adopted Capital Improvement Program (CIP) includes a budget of $87,440 for the Dogwood Grove project and a budget of $225,000 for the Northwood Road project. Funding for both projects came from Sullivan Act proceeds that were transferred from the Water Services Fund.

The initial contractor defaulted on the project and that contract was successfully terminated. The project was re-advertised and Candler Concrete Works, Inc. was the lowest responsive/responsible bid.

This action complies with the City Council Strategic Operating Plan in fully leveraging internal partnerships for pursuing capital improvements and infrastructure projects.

Pros:

- Will repair an existing curbing to current standards.
- Provides long term investment in the City's infrastructure.
- Improves vehicular safety.
- Helps with Storm Water run-off.
- Prolongs the useful life of a valuable City asset.

Cons:

- Project management and contract administration will consume staff time.
- A travel lane on this section of roadway may be required to be closed for a short time during the construction of the project.

The initial contract amount for the curbing portion of these projects totals $123,456.78. As noted above, funding for this contract will come from existing CIP budgets that were previously approved by City Council.

City staff recommends City Council adopt a resolution authorizing the City Manager to execute a contract with Candler Concrete Works, Inc. and any change orders, within the budgeted amount of $123,456.78.

RESOLUTION BOOK NO. 33 – PAGE 283

I. **RESOLUTION NO. 10-258 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A NON-MATCHING GRANT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR THE PROCUREMENT OF EQUIPMENT AND TRAINING/EXERCISE FUNDS TO BE USED BY HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 – ASHEVILLE**

ORDINANCE NO. 3933 - BUDGET AMENDMENT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR THE PROCUREMENT OF EQUIPMENT AND TRAINING/EXERCISE FUNDS TO BE USED BY HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6 – ASHEVILLE

Summary: The consideration of (1) a resolution authorizing the City Manager to accept a non-matching grant from the N.C. Dept. of Crime Control and Public Safety, Division of Emergency Management, for the procurement of equipment funds to be used by Hazardous materials Regional Response Team 6 – Asheville; and (2) the associated budget amendment, in the amount of $51,429.

The U.S. Department of Homeland Security and the Office of Domestic Preparedness has made funds available through State Homeland Security Grant Number: FY2010-SS-T0-0075 to implement the State Homeland Security Strategy. The strategy identifies the NC Hazardous Materials Regional Response Teams (RRT) as an integral component of North Carolina's preparation and response to manmade and natural emergencies and disasters. The purpose of the grant is to purchase specialized equipment to be used on-scene and to prepare for threatened or actual weapons of mass destruction or domestic terrorists attacks or major disasters.

There are seven Regional Response Teams (RRT) strategically located throughout the state. Asheville Fire and Rescue hosts one of the seven state funded teams - RRT 6. The team responds to hazardous materials incidents in the twenty westernmost counties of North Carolina.

Each of the seven RRTs will receive an equal amount of non-matching funding and each will procure comparable equipment. The equipment consists of updated Level A Personal Protective Equipment (PPE) and other equipment for training.

The grant is non-matching and all equipment provided through this grant will become the property of the Asheville City Government.

This action complies with the Strategic Operating Plan by better equipping the Hazardous Materials Team with upgraded equipment; this grant will assist in making Asheville a safer city, based on appropriate metrics for similarly sized cities.

Pros:

- The Department of Crime Control and Public Safety, Division of Emergency Management, will provide $51,428.57 in non-matching funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will better address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.

- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

Con:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

There is no fiscal impact associated with this grant, as it is non-matching.

City staff recommends that City Council (1) authorize the City Manager to accept the non-matching grant from the NC Department of Crime Control and Public Safety, Division of Emergency Management, to enhance AFD's capabilities to protect Asheville and Western North Carolina; and (2) adopt the associated budget amendment.

RESOLUTION BOOK NO. 33 – PAGE 284
ORDINANCE BOOK NO. 26 – PAGE 408

J. RESOLUTION NO. 10-259 - RESOLUTION AUTHORIZING THE CITY MANAGER TO APPLY FOR AN IBM SMARTER CITIES GRANT

Summary: The consideration of a resolution authorizing the City Manager to apply for an IBM Smarter Cities Grant on behalf of the City of Asheville.

IBM Corporation is currently accepting grant applications for up to $400,000 of technology and services to solve urban issues through the use of technology.

The grant is primarily aimed at cities with populations greater than 100,000. Due to Asheville's status as a regional hub, and due to Asheville's daytime population of nearly 120,000, staff feels that Asheville is well positioned to apply for this grant. Additionally, due to citizen interest, staff feels that significant support is available in the community, which may translate into increased exposure and awareness of Asheville's application on social media sites.

With Council or City Manager direction, staff can choose proposed problems to focus upon.

Key considerations for grant proposal success include:

- 1-3 problems or issues for the grant award to focus upon. These should be "pressing concerns" of the City.
- Demonstrate City's "commitment to publicly available data"
- Demonstrate City's "track record of innovative problem solving", "including any initiatives to implement new technologies or open data policies"
- Provide "clear, compelling evidence" that the city is well positioned to utilize the resources.

Staff feels that the City of Asheville has an excellent chance of capturing this grant, given the City's track record in the past few years of investing in technology (notably $2M on BTIP), and engaging citizens in technology decisions, notably mapAsheville's citizen engagement and the Google Fiber grant proposal.

Applying for this grant would align with City Council's "Fiscal Responsibility" goal from Council's 2010-2011 Strategic Plan, notably to "leverage internal and external partnerships for pursuing capital improvements and infrastructure projects". Other City Council goals, such as

"Green & Sustainable" or "Safe", could also be positively affected, depending upon which issues are chosen for the grant.

Pros:

- Potential to have greater ability to enhance the City's technology offerings to citizens and line department
- Citizen outreach will engage citizens in a positive manner
- Ability to engage IBM's best thinkers to apply cutting-edge technology to local issues

Cons:

- Time and effort spent on a grant application may not yield the desired result
- Given scarce resources, City must be careful to select service areas that will have fiscal and operational support

The grant would provide up to $400,000 in services and technology with no impact on the City's General Fund budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to apply for an IBM Smarter Cities Grant on behalf of the City of Asheville.

In response to Mayor Bellamy about obtaining Council's direction on problems to focus on, City Manager Jackson said that Council can e-mail their comments to him via e-mail.

RESOLUTION BOOK NO. 33 – PAGE 285

K. RESOLUTION NO. 10-260 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A LEASE AGREEMENT WITH KEVIN T. AND LISA A. FOX FOR A HEALTH SERVICES OFFICE AT 155 BILTMORE AVENUE

Summary: The consideration of a resolution authorizing a lease agreement between Kevin T. and Lisa A. Fox for a Health Services Office at 155 Biltmore Avenue.

The City of Asheville is recommending expansion of the existing Health Services Clinic to provide primary medical care to city employees and dependents over the age of 15, in an effort to reduce the city's medical costs.

As one strategy to lesson health care costs to the City of Asheville, analysis of clinic expansion and services offered has been explored with a hopeful implementation date of February, 2011. Expansion of the primary health services provided by the City of Asheville at its clinic will increase the number of visits by employees, covered dependents, and retirees for episodic care. Plan design of the clinic services will include financial incentive for access/use of clinic services. City staff has visited other municipality-operated health clinics for benchmarking comparison and has been pleased with analysis on cost-savings generated by this concept.

There are several downsides to expanding Health Services in its current location in City Hall to include: 1) lack of ADA accessibility in the building, 2) lack of parking, and 3) lack of confidentiality to access city hall and lack of feel of a primary health care clinic.

Examination of other city facilities did not yield a possible site at the current time, which has led staff to explore leasable medical space in close proximity to downtown. Several locations have been considered. The current best potential option is leasable space at 155 Biltmore Avenue. This 3,422 square foot space is almost move-in ready and requires minimal construction/remodeling in order to operate the city's health clinic.

Staff has presented this analysis and clinic expansion to the City Council Health Care Blue Ribbon Task Force at its November 30, 2010, meeting and received unanimous endorsement for City Council consideration.

This action aligns with City Council's Strategic Operating Plan under fiscal responsibility - Operate the City of Asheville to the highest levels of fiscal responsibility. As outlined in the staff report, staff and consultant analysis of clinic expansion projects significant savings to the city's self-funded Health Insurance Fund, which should provide opportunity to build the fund's current fund balance level.

Pros:

- Clinic expansion should generate reduction in medical claims costs to the Health Plan.
- Employees and other covered dependents will be provided with expanded primary care services at nominal costs.
- Employees should see clinic expansion as a welcomed benefit in the face of rising employee costs for service/premiums.
- Off-site location provides better accessibility and confidentiality to current location.

Cons:

- Initial up front investment cost.
- Lease cost of space.

There is a financial analysis for expenses and savings over a two year period. In summary, for the first year, anticipating a February 1, 2011, opening, there are nominal upfront costs to bring this clinic on-line. Beginning July 1, it is estimated that this expanded services clinic should reduce medical claims by $500,000 per year, which will generate a cost savings to the Health Fund of approximately $322,000 for the first full year that the clinic is in operation.

Staff recommends City Council support the resolution of a lease for $3,800 per month at 155 Biltmore Avenue for an initial term of three years, with the option of a two year renewal.

RESOLUTION BOOK NO. 33 – PAGE 286

L. ORDINANCE NO. 3934 - BUDGET AMENDMENT FOR THE SENIOR OPPORTUNITY CENTER AND THE HARVEST HOUSE FOR FACILITY IMPROVEMENTS AND EQUIPMENT

Summary: The consideration of budget amendments in the amount of $16,065 for Senior Opportunity Center and $15,230 for Harvest House for 1) appropriations from the State of North Carolina, Department of Health and Human Services, Division on Aging and the Land of Sky Regional Council/Area Agency on Aging through the Senior Center General Purpose Funding; and 2) transfers from the General Capital Projects Fund to provide the City's local match.

Funds will be used at the Senior Opportunity Center to 1) replace a unit within the HVAC system, 2) install ADA accessible drinking fountain, and 3) purchase program and facility equipment. The allocation requires a 25% local match which will be provided via capital improvement funds that were approved as a part of the FY 2010-11 adopted budget and in-kind services of staff time to manage the project.

Funds will be used at Harvest House to 1) repair the roof, 2) purchase program and facility equipment. This allocation also requires a 25% local match which will be provided via capital improvement funds that were approved as a part of the FY 2010-11 adopted budget and in-kind services of staff time to manage the project.

This action aligns with the City Council Strategic Goal of fiscal responsibility in that it 1) provides an alternative for enhancing the city's long-term financial commitment to infrastructure maintenance, and 2) leverages an external partnership for pursuing capital improvements. This action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it will 1) increase the level of service for indoor facilities to bring older facilities up to date before building new facilities, 2) increase department funding with alternative funding via grants, and 3) enhance the department's means to respond to identified programming priorities.

Pros:

- Facility improvements will address existing major maintenance projects and improve accessibility.
- Equipment purchases will enhance the customer experience and expand programming opportunities provided

Cons:

- None

The allocation will increase the City's Grant Fund budget by $31,295 in special project accounts designated for the Senior Opportunity Center and Harvest House. The 25% local match will be provided through capital improvement funds that were approved as a part of the FY 2010-11 adopted budget and in-kind services of staff time to manage the projects.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to establish a budget in the amount of 1) $16,065 for Senior Opportunity Center, and 2) $15,230 for Harvest House for facility improvements and equipment.

ORDINANCE BOOK NO. 26 – PAGE 410

M. RESOLUTION NO. 10-261 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN EASEMENT FOR ELECTRICAL POWER FACILITIES AT THE WNC AGRICULTURAL CENTER

Summary: The consideration of a resolution authorizing the Mayor to execute an easement for electrical power facilities at the Western North Carolina Agricultural Center (herein "WNCAC").

The land on which the WNCAC is located is owned by the City of Asheville. It is leased to the State of North Carolina, specifically, the Department of Agriculture and Consumer Services, which uses it for the WNCAC. Davis Arena, one of the major facilities at the WNCAC, is being expanded. In connection with this expansion, Progress Energy Corporation is upgrading the electrical service, and relocating the supply line. The proposed new line will be underground. The area of the easement will be 10 feet in width for its entire length (approximately 535 feet), with the power line located in the center of it. The existing power line and easement will be abandoned.

This installation has been approved by the Department of Agriculture, which requested it. Such improvements are within the scope of and contemplated by the lease.

This action complies with the City's Strategic Operating Plan in that it contributes to an existing partnership with the State for the operation of a regional facility, and promotes community education on agriculture.

Pros:

- Facilitates development and use of WNCAC
- Promotes community education on agriculture

Con:

- None noted

Regarding the fiscal impact, there is none directly for City; marginal impact on State.

Adoption of the resolution is recommended.

RESOLUTION BOOK NO. 33 – PAGE 287

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION NO. 10-253 - RESOLUTION SETTING A PUBLIC HEARING ON JANUARY 11, 2011, TO CLOSE SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA

Summary: The consideration of a resolution of intent to permanently close several portions of unopened rights of way and City streets within the Montford Commons Development area, which includes; an unopened portion of Woodside Place; an unopened unnamed right of way between Gudger Street and the unopened portion of Woodside Place; an unopened portion of Bay Street; all of the unopened portion of Jason Street and a portion of City maintained Jason Street; all of City maintained Michael Street; and all of the unopened unnamed right of way located near Jason Street.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, Frontier Syndicate LLC; Rhesa Read Tull Jr., Dorothy Tull Mothershead, and Margaret Tull Davis (heirs of Farrar G. Parker) have requested the City of Asheville to permanently close several portions of unopened rights of way and City streets within the Montford Commons Development area, which includes; an unopened portion of Woodside Place; an unopened unnamed right of way between Gudger Street and the unopened portion of Woodside Place; an unopened portion of Bay Street; all of the unopened portion of Jason Street and a portion of City maintained Jason Street; all of City maintained Michael Street; and all of the unopened Elizabeth Place. Adjacent property owners Asheville Board of Education and did not join the petition, a copy of this resolution of intent shall be sent by registered mail.

The Greenway Commission met on November 11, 2010. They voted unanimously to support the street closures and strongly recommended that any future development plan include the greenway connection as discussed in the site master plan.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use. The Strategic Plan Goals most closely aligned with the Montford Commons Development closure requests is the Job Growth and Community

Development Goal in that it will provide sustainable high density infill growth that makes efficient use of existing resources.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close several portions of unopened rights of way and City streets within the Montford Commons area.

Councilman Smith said that because he has not been in favor of moving forward with the Montford Commons project he would not support this action.

Councilwoman Manheimer moved for the adoption of Resolution No. 10-253. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Smith voting "no."

RESOLUTION BOOK NO. 33 – PAGE 277

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO AWARD SALE OF CIVIC CENTER ICE RINK AND EQUIPMENT TO THE HIGHEST BIDDER

Summary: The consideration of a resolution authorizing the City Manager to award sale of Civic Center ice rink and equipment to the highest bidder.

Pursuant to N.C. Gen. Stat. sec. 160A-266, City Council may dispose of personal property valued at $30,000 or more by private negotiation or sale. The Civic Center has requested the disposal of property for the ice rink and all related equipment as follows:

Refrigeration Plant with spare parts
Ice Resurfacer
Ice Edger
Hockey Goals, Nets and Pads
Ice Skates
Skate Sharpener
Jet Ice Paint System
Ice Floor Cover

This action complies with the City Council Strategic Operating Plan in that supports a fiscally responsible city government through identifying opportunities for revenue diversification.

Pros:

- Promotes City of Asheville fiscal responsibility by disposing of surplus property which generates revenue
- Space Utilization-eliminates the need to store large, bulky, unused equipment

Cons:

- None

Proceeds from the sale are estimated to be over $30,000. The net proceeds will be deposited in the Civic Center Fund.

City staff recommends City Council adopt a resolution authorizing the City Manager to award the ice rink and all related equipment to the highest sealed bidder.

Mr. Hutch Kerns, President of the Asheville Hockey League, looked forward to working with the City to discuss opportunities for the future of the ice rink in Asheville.

Councilman Davis felt it was important for the community to know that we have had a vibrant hockey community in Asheville for a long time, beginning with the Asheville Smoke. Last year City Council, with regret, accepted the Civic Center Commission's recommend to not have ice at the Civic Center due to the aging equipment and the many challenges associated with the ice. In addition, with the recent renovations to begin at the Civic Center, storage of the equipment has also become a concern, along with the amount of taxpayer dollars tied up with the ice and associated equipment. He hoped that the hockey community sees this as an opportunity to work with the City to see if there is a viable place to have ice in our community. Personally he would like to see the ice remain in the community.

When Councilman Bothwell asked about moving the equipment prior to the renovations, Economic Development Director/Civic Center Director Sam Powers aid that they are in the very beginning stages of reconfirming the design of the renovations. There is a sense of urgency in this process as the area where the equipment is stored is a connective tissue between the Arena and the Thomas Wolfe Auditorium and there are preliminary plans to benefit both areas. He felt the equipment should be out of the Civic Center within the next four months.

Mr. Powers noted that the value of the equipment is much more than $30,000 and that the $30,000 is only the threshold that requires a Council action to dispose of personal property by private negotiation or sale.

In response to Mayor Bellamy, City Manager Jackson said that still will need to research what, under State law, we can do, because this is disposal of a real asset. Staff will provide Council on the asset cost and how it ties into the Civic Center Financial Plan, noting that the Civic Center is an Enterprise Fund with an extensive list of capital improvements that need to be made. Staff will also provide Council with the pros and cons to a negotiated sale or an outbid bid over a donation of the property, in addition to the fiscal impact statements associated with the options.

It was the consensus of Council that this matter be reviewed by the City Council Finance Committee prior to coming back to the full Council.

III. PRESENTATIONS & REPORTS:

A. PRESENTATION OF CROSSROADS PUBLICATION

Ms. Karen Loughmiller, Librarian, Buncombe County Public Libraries; Ms. Priscilla Ndiaye, Author, researcher, and community activist; Dr. Dwight Mullen, Political Science Dept.; UNC Asheville Deborah Miles, Director, Center for Diversity Education; Ms. Johnnie Grant, Owner and Publisher of the Urban News and Native Ashevillian; and UNC Asheville DeWayne Barton, Co-founder of Asheville Green Opportunities, President of the Burton Street Neighborhood Association, said that the Buncombe County Public Libraries, the Stephens-Lee Alumni Association, and the Center for Diversity Education at UNC-Asheville were invited by Dr. Harlan J. Gradin of North Carolina Humanities Council to create this issue of the Council's CROSSROADS publication.

In 2008, Ms. Andrea Clark, photographer and community activist, made a major contribution to this collection allow the Library to add over 1,200 over her black and white photographs of East End and other African American neighborhoods in Asheville taken just before urban renewal. The stunning photographs became the basis of a year-long research and local history project called "*Twilight of a Neighborhood: Asheville's East End, 1970*", (jointly sponsored by these organizations and the NC Humanities Council), this CROSSROADS is the word of local scholars, community historians, community leaders, and neighborhood residents. Technical and editorial assistance was provided by the staff of Buncombe County Public Libraries and by the North Carolina Humanities Council. The publication was financed jointly by the North Carolina Humanities Council and by significant donations from various Asheville residents, businesses, and institutions.

The project originally focused on the East End, but the project expanded as residents and former residents of other neighborhoods shared the impact of urban renewal on all of Asheville's historically African American communities, revealing a part of our common history that had been lost to many.

Approximately 3,000 copies of the publication will be distributed locally at no charge, with distribution targeted to Asheville neighborhoods adversely affected during urban renewal, their local neighborhood groups, and organizations and institutions partnering with them to promote sustainable living wage employment, affordable housing, environmental restoration, and some visible acknowledgement of their significant history (extension of the Urban Trail, for example, or historic markers or other memorials).

The presenters were pleased to present City Council with the publication and spoke about their ongoing efforts.

On behalf of City Council, Mayor Bellamy thanked the CROSSROADS working group for their efforts on this wonderful publication, and thanked Ms. Clark for the wonderful photographs. She suggested the City Manager have the City's Neighborhood Coordinator contact Ms. Miles and Ms. Ndiaye to see how the City can work together on some opportunities of partnerships to help people find homes, and to rebuild the torn fabric of our communities.

IV. PUBLIC HEARINGS: None

V. UNFINISHED BUSINESS:

A. REID CENTER PROPERTY UPDATE

Parks, Recreation & Cultural Arts Director Roderick Simmons said that the first phase of construction for the new community center at Livingston Street Park is set for completion in February 2011. Following completion, most of the current recreation programming at the WC Reid Recreation Center will vacate and transition to the new facility. When the new project was initially approved, City Council asked staff to research the property value of the current facility to determine if funds would be available to implement future phases of the project. This report examines the future use of the WC Reid Center once this transition has occurred, within the context of Council's Strategic Goals, community development opportunities and real property valuation.

Real Estate Manager Nikki Reid said that the Reid Center property is comprised of two parcels, both fronting on Livingston Street, and separated by Gaston Street. East of Gaston Street, the smaller of the two parcels contains an asphalt basketball court in poor condition and measure 0.40 acres in size. The larger parcel equals 2.27 +/- acres and is improved with a former public school facility, gymnasium and related improvements. The City of Asheville Parks, Recreation and Cultural Arts Department currently utilizes the WC Reid Center for recreation programming, such as the Therapeutic Recreation Program. It should be noted that while most of

the recreation programming will relocate to the new center, the City will continue to use the gymnasium until the gym at the new center is constructed.

In addition to City use, the City leases space at the Reid Center to outside agencies as outlined below:

Reid Center Tenants

- Partners Unlimited: According to a 1996 agreement between the City and Asheville City Schools, the City provides at no cost one classroom, utilities and janitorial services in the Reid Center for what was then known as Metro School. This entity, now known as Partners Unlimited, provides academic services to at risk youth ages 10 to 18 who are referred by school system, court system, etc. The agreement automatically renews annually unless either party wishes to terminate the agreement.
- Asheville Housing Authority (AHA): Lease agreement between City and Asheville Housing Authority for AHA office space in Reid Center began in 1976 in which AHA contributed $150,000 to assist city in making improvements to the center. Lease amended in 1994 to add additional space to house the AHA Youthful HAND Program at no additional cost to AHA. Lease expired Oct 1, 2010. No action has been taken to consider renewing this lease, and is considered to be on a month-to-month basis.
- Asheville Green Opportunities: One-year facility use agreement beginning April 27, 2010, between City and Green Opportunities to use 1 classroom and janitorial services as an administrative office, cafeteria as a workshop for client services at no cost.
- Community Action Opportunities (CAO): CAO has leased in the Reid Center Annex (Lonnie Burton Building) for 11 years for the operation of a Head Start program. The lease began in 1999 at which time the Reid Annex was in a significant state of disrepair. As part of the original lease agreement, CAO made the investment to complete a major building renovation and to design the building to meet the needs and requirements of the Head Start Program. In return, the city agreed to a multi-year lease agreement at $1.00 per year. CAO is currently replacing the roof on the Reid Annex at its own expense. The lease is set to expire October 2012.

Appraisal Review: When the Livingston Street project was approved, Council asked staff to obtain information on property values of the WC Reid Center at 133 Livingston Street and to discuss as a possible funding source for Phase II. Given the age and condition of the structures on the property, it appears that these improvements may be at or near end-of-life and would require significant renovation of core systems to continue use. The improvements are also constrained by considerable physical and functional obsolescence, for example, the lack of Americans with Disabilities Act (ADA) accessibility to all floors of the building and structural limits to interior redesign.

With the perceived cost to renovate being very high, staff requested that the appraiser approach the valuation of the property as if vacant, and to consider potential demolition costs as well. The appraisal yielded mixed results: the total value of the property, as if vacant, is estimated at $254,500, yet the perceived cost of demolition may equal or exceed this price point, given the presence of considerable amounts of asbestos and lead paint materials.

Upon review the appraisal data within the scope of the Council's strategic plan, the following options are available for further discussion:

1 – Dispose of property via upset bid process.

Per the appraisal, the highest and best use of the site as if vacant is residential compatible with the surrounding uses. The 0.40 acre portion (basketball court) is zoned RS8 for single family residential uses, and the 2.27 acre parcel is zoned Office II, and allows for a variety

of residential and non-residential uses, subject to height and scale limitations of the district. The current economic market indicates a modest demand for this type of property and the timing of a fee simple sale may be difficult to predict. With the perceived costs of demolition or renovation, there may be limits to net yield of a private transaction. The perceived benefit of this method is to place the property back on the tax rolls.

2 – Dispose property via public purpose for affordable housing.

If the stated intent of the reuse of this property is to achieve affordability with the residential uses listed above, this may also include the City acting in a financial lending capacity to support affordable development. This type of deal structure is very dependent on the partner developer, but there are recent examples of this type of financial partnership (Habitat for Humanity at Pisgah View, for example) that provide a pattern of success that could be examined specific to this property. More review is necessary on this option and the perceived benefit would be a specific number of affordable units available for sale and the property would be back on the tax rolls.

3 – Dispose of property via public purpose for community services

The current tenants of the Reid Center, Green Opportunities, Partners Unlimited, Community Action Opportunities and the Asheville Housing Authority, have expressed serious interest in continuing to use the facility after the City moves its recreation functions, in collaboration with the City and other local partners. The Housing Authority has brought to our attention a current grant opportunity through the HUD Office of Capital Improvements, as discussed below. Pending the success of a grant application, the perceived benefits may include a market-based sale of the property and furthering the Council strategic goal of supporting job growth and community development.

Staff is seeking City Council policy direction on future use of the Reid Center property once the second phase is completed.

Staff Report from Community Development Director Jeff Staudinger: The current users of the Reid Center are exploring a recently announced grant opportunity that would preserve and rehabilitate the building for community services. The US Department of Housing and Urban Development in the past month announced a national capital grants competition for public housing authorities. The Housing Authority of the City of Asheville is eligible to apply for as much as $5 million to purchase, construct or renovate property for a community education and training center.

The grant requirements directly align with the existing uses now at the Reid Center, and may represent a unique opportunity to meet Council, neighborhood, and community-wide public service goals. The grant funding is specifically for public housing authorities to develop facilities to provide early childhood education, adult education, and/or job training programs for public housing residents. Each of the current users of the Reid Center is directly engaged in those activities:

- Community Action Opportunities operates their Head Start program in the "annex" building;
- Green Opportunities now runs their green job training and placement program from the Reid Center;
- Partners Unlimited provides training and remediation services to keep students in school and for out-of-school youth.

The Housing Authority uses part of the Reid building space for management and maintenance of its public housing developments in the area. The Reid Center is located adjacent to or nearby Erskine, Walton and Livingston Street public housing communities, and residents of

those communities and other public housing communities directly benefit from the activities at the Center. All of these community partners would commit to a plan to renovate the Center, enhancing the energy efficiency and sustainability of the existing buildings, and using the renovation itself as a training opportunity for underemployed community residents.

From a community and neighborhood perspective, preserving the Center as an important historical resource has been voiced as a key community priority. The Housing Authority would incorporate Asheville's African-American heritage in its vision for the facility.

The use of the facility as a community education and training center would help meet Council strategic goals for sustainable development and job creation. Council currently funds- both through Outside Agency and through federal funds distributed by the City - Green Opportunities and the Housing Authority.

Additionally, if successful, the grant would allow the City to sell the property to the Housing Authority for its appraised value, potentially contributing significantly to the next phase of construction at the ne Livingston Street Center.

The key commitment required at this time from the City for this project to be eligible for funding, would be the commitment from the City to provide the Housing Authority with long term site control of the property (sale or long term lease), contingent only on grant approval.

The deadline for the grant application is January 14, 2011. Prior to that date, the Housing Authority will need to prepare a preliminary plan for renovation, gain commitments from not only existing partners but also from other education and training partners in the community, and provide commitments for five percent of the grant in matching funds. The Housing Authority has discussed with community development division staff the possibility of using some portion of the recently awarded TIGER II grant for that purpose, and also possibly applying for CDBG funding.

It appears that pursuing a sale to the Housing Authority may be the most viable option for the City to achieve many of its strategic and fiscal goals. This action would align with Council's Strategic Goals by supporting fiscal responsibility through a market-based sale and furthering job growth and community development through the missions and actions of the non-profit agencies. Staff recommends allowing the Housing Authority to move forward with a formal offer to purchase and pursuing next steps as it relates to the sale of city-owned property. This would need to be done in a timely manner to allow further Council consideration prior to the grant deadline of January 14, 2011.

HOUSING AUTHORITY – POTENTIAL HUD RENOVATION GRANT OPPORTUNITY FOR REID CENTER

Mr. David Nash, Chief Operations Officer of the Housing Authority of the City of Asheville, said that with the W.C. Reid Center in transition, the current tenants of the center are working with the City and other community partners to identify opportunities to preserve the Center as a community asset. They have not spoken yet with A-B Tech, but they will be a critical partner in the process as they go forward. These partners envision the Center as a place where people from the surrounding neighborhoods could access education, job training, support services and other resources that help them achieve greater self-sufficiency and empowerment.

The HUD grant that is currently available is for a community education and training facility. It can be either an early childhood education facility or an adult education and training facility – or both. It fits well with the current use of the tenants in the building.

Specifically, we envision adaptive reuse of this historic African American school and neighborhood center as a job training facility that incorporates some or all of the following components:

- Technical training, life skills training and job placement, with an emphasis on "green-collar" careers—those that improve environmental, community and human health (Green Opportunities);
- Basic adult education (GED preparation) and credit recovery programs for high school students along with tutoring and academic remediation for short and/or long-term middle and high school students; emphasis on parent support group meetings; disseminating drug and alcohol effect information; computer recycling along with internet access usage for the community (Partners Unlimited);
- Continued high quality early childhood education in the Lonnie Burton Building (Community Action Opportunities);
- Youth programs designed to engage local youth in positive, community-based activities, including music, academics, pre-employment training and service (The Empowerment Resource Center, GO);
- Monuments, displays and programs that honor the contributions of prominent African Americans from the Asheville area (Empowerment Resource Center); or
- A public housing resident services and management/maintenance center for the neighborhood (Asheville Housing Authority and Residents Council).

A core principal in our vision for the building would be engagement of the surrounding community. We have held one community meeting with another meeting to be held later in the evening. We want to find out the neighborhood's interest for the building in general and their interest in this grant request. If they are not interested, the Housing Authority will stop until further discussions.

The renovation of the building itself would provide ongoing opportunities to train and employ locals, especially public housing residents. We see the future Reid Center as a Neighborhood Sustainability Center, linking history, housing, multi-modal transportation, education/training and jobs, located in the center of the Southside neighborhood close to some of Asheville's major job centers.

The grant opportunity is up to $5 Million and there may be some advantages to applying for a smaller amount. The grant requires a minimum 5% match and they have talked with Mr. Staudinger about one possible resource for that match. They will look for others possible match sources in the community, along with the Housing Authority's non-federal funds. They are thinking that they will propose to include a purchase price to the City of the appraised value in the grant so that could be reinvested into other parks & recreation facilities. However, that is contingent upon the AHA receiving the grant. Since the grant deadline is January 14, on January 11, 2011, they would need an option to purchase the property. That option could be contingent upon the AHA receiving the grant. A long-term lease is also a possibility, but it would need to be at least a 50-year lease and it would restrict some of the operating funding we could put into it. An option to purchase would be the better option for them.

In response to Vice-Mayor Newman, Mr. Nash said they should know in approximately 4-5 months if they have been awarded the grant.

Vice-Mayor Newman moved to allow the Housing Authority to move forward with a formal offer to purchase and pursuing next steps as it relates to the sale of city-owned property. This motion was seconded by Councilman Smith and carried unanimously.

City Manager Jackson clarified that this will be back on the January 11 agenda for formal Council consideration prior to the January 14 grant deadline. At the January 11 meeting staff will provide Council information on the actual structure of the real estate relationship.

Vice-Mayor Newman suggested on January 11 Council be advised of the public input process, along with the more fully-prepared grant proposal. He understands that the AHA is talking to the Housing & Community Development Committee (HCD) for some of the 5% match.

Mr. Nash said that he has talked with Mr. Staudinger to see if there may be some unused program income or other funding that could be allocated to this grant and he has generally discouraged him from that idea. They must have the 5% match prior to grant application. There are other options and he will talk again with the HCD Committee. He will not come to Council on January 11 and ask the City to make the $250,000 contribution to this project. This is a competitive federal grant and he thinks our chances are good to get.

In response to Mayor Bellamy, Mr. Staudinger said that possibly some of the funds awarded to the City under the N.C. Dept. of Transportation's TIGER II planning grant may be available for this type of initiative. Mayor Bellamy hoped the HCD Committee will keep that in mind that this meets the threshold of qualifying for a project that is able to be funded by money received but not technically allocated to a project.

B. RESOLUTION NO. 10-262 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A UTILITY CUT ENTERPRISE FUND REPAIR AGREEMENT WITH PUBLIC SERVICES OF NORTH CAROLINA

In response to Councilwoman Manheimer about a possible conflict of interest due to her law firm's representation of Public Services of North Carolina on a condemnation issue, City Attorney Oast did not see that is a disqualifying conflict.

Public Works Director Cathy Ball said that this is the consideration of a resolution authorizing the City Manager to enter into a Utility Cut Repair Enterprise Fund Agreement with Public Services of North Carolina (PSNC).

PSNC and Metropolitan Sewerage District (MSD) have requested that the City repair all utility cuts made to City streets and sidewalks within the City limits. City staff has evaluated this request and proposed a financial structure that would allow the City to perform these services without an increase in cost to the City's General Fund. The program which operates as an enterprise fund allows local utilities to deposit an estimated sum of funds to cover anticipated utility cut repairs. The program which commenced July 1, 2010, currently has two participants; the City Water Department and the Stormwater Enterprise Fund. MSD has indicated they are interested in participating in the program July 1, 2011. Progress Energy has also indicated some interest participating in the program.

Under the agreement, the City makes all repairs consisting of asphalt or concrete to trenches cut and backfilled by PSNC. While PSNC will not be required to obtain permits, PSNC must notify the City within 24 hours of any cuts made. The City will utilize a nuclear density gauge to determine the compaction of the trench and if acceptable will make the utility cut repair. There is no longer a warranty period for the utility cut.

The Street Utility Cut Enterprise Fund was approved by City Council as part of the FY 2011 Budget. The action supports several of Council's Strategic Goals by leveraging internal and external partnerships as well as improving the affordability of water and stormwater rates.

Pros:

- All cuts and repairs will be made in accordance with the City of Asheville Standards and Specifications Manual.
- PSNC will not be required to obtain street cut permits.
- The program will be more efficient due to number of cuts the City will be repairing.
- Repairs will be more consistent.
- Due to the structuring of the program, the City has minimal risk in this agreement.

Con:

- The Contractor that has been performing this work for PSNC will no longer be contracted to perform these repairs inside the City limits. City staff met with the contractor and asked him to submit bids on other work for the City. While staff cannot guarantee award of bid to the contractor, the contractor will be provided with the necessary information to submit bids.

The City's ability to provide these services, based on the previous five years data, would cost approximately $1.6 million. A review of the amount of permits over the past five years indicates that approximately 55% of the permits were obtained from the Water Department, 35% of the permits were obtained by MSD, 5% from PSNC and 5% to the City's Stormwater. The cost of the program is broken down as follows:

Agency	% of cuts	% of cost
Water Department	55	$880,000
MSD	35	$560,000
PSNC	5	$80,000
Stormwater	5	$80,000
Total	100	$1,600,000

The program will be reviewed annually. In the event that actual cost exceeds 10% of the budget, PSNC will be required to pay the difference between the budgeted amount and the actual amount. In the event that actual cost is 10% less than the budgeted amount, the City will reimburse PSNC the difference between the budgeted amount and the actual amount.

City staff recommends City Council authorize the City Manager to enter into a Utility Cut Repair Enterprise Fund Agreement with Public Services of North Carolina.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 10-262. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 289

C. 51 BILTMORE PARKING DECK PROJECT

51 BILTMORE PROJECT UPDATE

PARKING DEMAND STUDY UPDATE

RESOLUTION NO. 10-263 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A TWO-YEAR LEASE AGREEMENT WITH PUBLIC INTEREST PROJECTS FOR PROPERTY KNOWN AS 86 S. LEXINGTON STREET FOR THE PURPOSE OF PROVIDING TEMPORARY PARKING DURING THE CONSTRUCTION OF THE PARKING GARAGE AT 51 BILTMORE AVENUE

RESOLUTION NO. 10-264 - RESOLUTION FOR THE PARKING DECK FINANCING AND SETTING THE PUBLIC HEARING FOR THE FINANCING ON JANUARY 11, 2011

Administrative Services Director Lauren Bradley said that this is the consideration of a project update for the 51 Biltmore Avenue Parking Garage and associated resolutions authorizing the negotiation of project financing and a lease for temporary parking during construction.

In October 2008, City Council approved a Downtown Development Agreement (DDA) with McKibbon Hotel Group (MHG), Public Interest Projects and the City of Asheville for the purpose of constructing a parking garage at 51 Biltmore Avenue. Since 2008, City Council twice extended the DDA to allow for more time for MHG to obtain financing in a difficult market. MHG obtained a bank commitment for financing its portion of the project in September 2010.

With a financing commitment in place for the private portion of the project, staff is seeking City Council authorization to negotiate financing for the parking garage as well as other actions related to proceeding with the project.

I. Project description

The project is a mixed-use building that includes: an Aloft Hotel; sub-leased retail spaces along Biltmore Avenue; a City owned parking garage; and a component that may be a second phase for an area along Biltmore Avenue and Lexington Avenue to include housing units. The second phase portion of the project will come back through the review process including the Downtown Commission. This site is identified in the City Development Plan 2025: Center City Plan as both a potential parking garage site and as a possible location for a catalytic development because of its important location and size. Catalytic developments are projects that because of their size, location or programming have the potential to stimulate additional investment or provide missing uses that are critical to maximizing downtown vitality.

The current proposed parking garage will have 412 spaces and access points from three streets: one-way in from Biltmore Avenue and Aston Street, and two-way movement at Lexington Avenue. Several garage levels are below grade with the design taking advantage of the natural terrain across the site to eventually meet Aston Street and Biltmore Avenue at grade. Public restrooms are provided in the garage with direct access from Aston. Four of the garage's spaces will be for electric vehicles, and ten bike lockers will be made available in the facility. Because of the presence of the garage on the sidewalk edge, a space for public art will be provided to soften the façade and create pedestrian interest.

The retail spaces and hotel use cover and top the garage along Biltmore Avenue. Along Aston Street the garage fronts directly at the street and provides a driveway into the garage.

The retail and hotel uses occupy the frontage areas along Biltmore Avenue and above the street level along Aston Street. The building is six stories along Biltmore Avenue and measures about 91 feet to the top of the roof structure at the Biltmore/Aston corner. Ground level retail space along Biltmore Avenue will total about 5,397 rentable square feet, which will be leased. The hotel use occupies the second floor and above as measured from Biltmore Avenue and has 115 guest rooms. A balcony space for the hotel is located on the second level of the building and will serve to activate the street. A hotel amenity floor is provided at the top of the garage level.

The cost associated with building a parking garage includes property acquisition, design and hard construction. The total project cost for the parking garage is projected to be $14,792,436.

Conditional zoning to permit this use was adopted by the City Council on October 14, 2008. Also, the properties on which the project is to be constructed have been under option to the City since late 2008.

II. Due diligence

During the last three months, staff has worked with the project partners, including MHG and MHG's lender, to ensure financial, legal and risk management matters related to the project have been sufficiently evaluated. Significant time has been spent on developing agreements - including the DDA, a condominium agreement, a parking lease agreement and a construction management agreement – to ensure that the public's interests are protected as the project moves forward.

As a public-private partnership, there is a risk that the public component of the project could move forward to completion while the private component does not. This risk will diminish as private investment (both the developer's equity and financing) in the project progresses during construction. In order to fairly evaluate and mitigate this risk, staff offers the following:

- A need for additional public parking in this area has been identified and verified through a parking demand study, as described in Section III below. The construction of the parking garage meets this public purpose independent of the proposed private development on the site;
- The DDA provides that, if either party becomes unable to meet its financial obligations with respect to the project, the other party may undertake completion of that part of the project. The effect of this is that, if MHG cannot complete the hotel, the City can. While this would be at some cost to the City, it does put the City in control of the development.
- Should the private development component be assigned to another entity, the agreements mentioned above, and the Conditional Zoning ordinance, provide that the private development can only proceed as currently planned unless otherwise agreed by all parties (including the City), and;
- Staff is recommending an interim financing approach during the construction of the project to minimize any financial risk the City may have in the early stages of the project. This approach is further explained in Section IV below.

III. Parking demand study update

A parking study prepared by Kimley-Horn and Associates in 2008 evaluated the demand for parking versus the supply in the Central Business District. The study determined that the area around Biltmore Avenue had a peak deficit of parking in the amount of 622 spaces and a normal demand of 476 parking spaces. The proposed location of the garage is a surface parking lot with approximately one hundred parking spaces. Given economic conditions and related project extensions, staff updated the original parking demand study data. The updated study suggests that the deficiencies in this zone are not drastically changed in the new projections, and that the parking system demands are generally consistent with the original study.

IV. Parking garage financing

The financing of the 51 Biltmore project (the Aloft Hotel, sub-leased retail spaces and parking garage) involves separate, but integrated financing transactions. As previously mentioned, MHG has obtained a bank commitment for financing its portion of the project consisting of the Aloft Hotel and sub-leased retail spaces. The City is responsible for securing and financing the parking garage component of the 51 Biltmore project.

There are several types of capital financing methods available to local governments in North Carolina. The primary forms of those capital financing methods include general obligation, revenue-backed and asset-backed securities. The City currently does not have GO authorization for parking debt issuance. While the 51 Biltmore parking garage will become part of the City's overall Parking Services Enterprise Fund, as a practical matter, the overall parking system does not generate sufficient financial coverage or "mass" to issue revenue bonds in the capital markets for system improvements. The remaining type of financing available to the City to finance the

parking garage is through the issuance of asset-backed securities. This type of financing instrument (also known as "installment financing contract") has been used periodically by the City to finance a variety of assets including fire stations, renovation of the Municipal Building, sanitation trucks and public safety equipment.

The City proposes to secure financing for the parking garage improvements through a private placement installment financing contract with a bank. Additionally, the installment financing contract will be structured in a manner that provides the City interim, construction draw down financing – essentially a temporary construction loan with the City paying interest on the periodic construction draws. Current interest rates are anticipated to be about 1% for this interim financing method.

There are several reasons for this interim financing strategy, including:

1. Provides the City greater flexibility (as compared to a permanent, long-term financing approach) to deliver at closing the City's funding simultaneously with the developer's financing. Fixed rate public offerings (like a COPs transaction) require highly rigid financing calendars with sale dates calendared and fixed transaction closing dates. Additionally, with fixed rate public offerings that have been priced and sold, there is significant market, legal and tax consequences related to failure to close and failure to complete the project. A private placement with a bank for an interim financing provides the City with significantly greater closing flexibility, because it has essentially obtained construction line of credit, which the City can pay-off at any time with reasonable notice.
2. Provides the City greater flexibility to terminate the financing (as compared to a permanent, long-term financing approach) should 51 Biltmore project development risk (construction completion) materialize after closing. The City has 51 Biltmore project development risk throughout the project; at closing, through the construction period in which MHG is expending its equity, through the period in which the MHG's lender is expending its commitment and to the grand opening of the Aloft. Construction completion risk is partially mitigated in the early period of the construction calendar of the parking garage through the interim financing mechanism because the City could terminate any further draws on the construction financing. As the 51 Biltmore project - both the garage and hotel construction - progresses to completion, the likelihood of termination occurring is lessened.
3. Provides the City greater flexibility in integrating other City financing needs with the permanent financing (which would occur within 12-18 months). The City has several financing projects that are in the initial stages of development including Civic Center improvements, City Hall renovations, street light retrofitting and a potential new fire station. Additionally, the COPs that were issued in connection with the Municipal Building are candidates for an economic refunding thereby saving the City annual debt service. Combining many of these projects in single, fixed rate permanent financing will provide the City with overall improved collateral, better interest rates and lower overall transaction costs.
4. Provides the City with low cost financing during the construction period in the range of 1%. A later (12-18 months) permanent financing package does subject the City to fixed interest rate risk over that period.

It is anticipated that repayment of the lease payments associated with the 51 Biltmore parking garage would come from parking revenues of the financed facility as well as the favorable cash flows from the operating activities of the Parking Services Enterprise Fund.

Under the provisions of Section 160A-20 of the General Statutes of North Carolina, installment financing contracts that involve land require a public hearing in which the public may comment on the proposed financing and project. The resolution sets the public hearing for January 11 and authorizes the City Manager and various other officials to make application to the

Local Government Commission, to engage various professionals in connection with the financing and to proceed with securing the financing.

City staff is scheduled to meet with the staff of the Local Government Commission on December 17 in connection with continued due diligence with the Commission scheduled to take action on the financing at its February 8; 2011 meeting. The parking garage financing would close shortly thereafter.

V. Lease for temporary public parking during construction

The site on which the new parking garage will be built currently provides about 100 public parking spaces. These spaces will be taken out of use during construction of the garage. In order to continue to provide public parking in the area during construction, staff is recommending that the City enter into a two-year lease agreement with Public Interest Projects for land at 86 South Lexington Street, a parcel immediately adjacent to the site, that will be used to provide approximately 45 public parking spaces. The city will operate and manage the temporary lot. It is anticipated that parking revenues from the lot will more than cover the cost of the lease, which has been negotiated at $3,000 per month.

This project is in alignment with the Strategic Plan by promoting sustainable, high-density, in-fill growth that makes efficient use of resources and by making environmentally efficient capital improvements. In addition, this action complies with the Parking Action Plan adopted by City Council.

Pros:

- According to the findings of the downtown parking study, this area has a deficit of public parking. This parking garage would address this need.
- Capitalize on relationship with mixed use developer who is willing to partner with the City and make private property available for public use.
- Offer the opportunity to leverage public parking as an economic development tool.
- Offers community benefits such as additional jobs and tax base for the City created by the mixed use elements.
- Public parking helps sustain existing investments and future growth of retail and office uses in the area.
- Public parking is critical for downtown office job expansion.
- Project allows for the opportunity to develop workforce housing more feasibly due to reduced capital requirements for constructing private parking, which in turn supports lower priced housing units.

Cons:

- Public-private partnerships tend to be complicated and require additional coordination between the City and the private sector than traditional stand-alone projects.
- Specific performance guarantees must be made by the City to third parties. Corresponding grantees are required of the developer to the City regarding the quality and sustainability of the mixed use components.
- The cost of the land is higher than the appraised value. Originally the owner did not want to sell the property but rather lease the property to the City for sixty years. After the City determined that it was a better financial decision for the City to purchase the property, the owner agreed to sell but with the restriction that they recoup the capital gains taxes.

Total project cost for the parking garage is projected to be $14,792,436, which will be financed over a period of 20-25 years. It is anticipated that repayment of the lease payments associated with the 51 Biltmore parking garage would come from parking revenues of the financed facility as well as the favorable cash flows from the operating activities of the Parking Services Enterprise Fund.

Staff recommends that City Council:

- Approve the Resolution authorizing the negotiation of an installment financing contract for the 51 Biltmore Avenue parking garage, and;
- Approve the Resolution authorizing a two-year lease agreement with Public Interest Projects for property located at 86 South Lexington Street for temporary public parking.

In response to Councilman Bothwell, Director of Transportation Ken Putnam said that the City did not look at any other methods of transportation downtown, e.g., a trolley system. he said the updated parking study was to validate the previous study and to update the model it had created so as to use it as a tool in the future.

Throughout discussion, Mr. Putnam, Public Works Director Cathy Ball and Kimley-Horn representative Fred Burchett responded to various questions/comments from Council, some being, but are not limited to: what is the rationale for the price of the land and has there been any renegotiation of that price; how were the study dates selected; how do the projections take into account how other convenience and mobile options would affect parking needs; at what point does surplus parking encourage people to use an automobile over another alternative form of transportation; are there other examples of cities that have utilized more balanced approaches; and how does parking fit into the context of smart growth.

Councilman Bothwell felt we are proceeding with plans made in a different economic climate. He was concerned about putting all our parking money into this one project for the next several years. The parking study didn't take into consider the changing automobile use, with gasoline almost $3 a gallon. He felt that transit is changing. Transit using of shuttles and trolleys is flexible, whereas, transit using concrete parking garages is not.

Councilman Smith appreciated McKibbon for their willingness to invest in our downtown. He spoke to the need of convenience and mobility for all downtown. He said that parking is a solution to a convenience and mobility problem. The fact is that there is more than one solution to the convenience and mobility program. He addressed the need for a multi-tied approach to the future of convenience and mobility downtown. Parking is only one piece of the solution but we need the other pieces as well. He reviewed the 2025 Plan and noted that this site was identified as a place for a public/private partnership parking garage. He was surprised to see that in that Plan they identified "D*owntown parking is a complex issue that requires a multi-tiered solution."* The Plan included a solution of looking at creating a downtown shuttle to facilitate internal circulation – link with parking facilities, major activity centers and City transit system. He would like to find a way to reduce the pollution for people walking downtown and to improve the street level experience. He pointed out that if we spend $15 Million on a parking deck, we won't have that money to be used for sidewalks somewhere else in the City.

In response to Councilman Smith, Vice-Mayor Newman said that Council has never commissioned, not during the Downtown Master Plan process nor the Transit Master Plan process, an official study to look at developing a downtown circulator in terms of a detailed route structure, the cost and expected ridership. Mr. Putnam said there are only conceptual routing and rough ideas of cost shared with Council earlier. Councilman Smith wondered if this conversation was better suited for a Council retreat as far as being able to have a multi-faceted approach to downtown transportation.

Councilman Davis pointed out that there are some parking needs downtown that we may not recognize, e.g., First Presbyterian Church has a need for approximately 100 parking spaces in that area.

Vice-Mayor Newman does acknowledge this is committing our resources for a long time, but this is one area of downtown that needs parking. He agrees with Councilman Smith in that parking is not the only solution and would be interested in looking at other solutions.

In response to Mayor Bellamy, Economic Development Director/Civic Center Director Sam Powers updated Council on the offer from McKibbon for the parking lot across from the Civic Center. Mayor Bellamy suggested staff update the Planning & Economic Development Committee to see if there are other opportunities for partnership to meet Council's goals in that area, should the McKibbon proposal not proceed.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Davis moved for the adoption of Resolution No. 10-263. This motion was seconded by Vice-Mayor Newman and carried 4-2 with Councilman Bothwell and Councilman Smith voting "no."

RESOLUTION BOOK NO. 33 – PAGE 290

Vice-Mayor Newman moved for the adoption of Resolution No. 10-264. This motion was seconded by Councilman Davis and carried 4-2 with Councilman Bothwell and Councilman Smith voting "no."

RESOLUTION BOOK NO. 33 – PAGE 291

D. CONSIDERATION OF THE CITY'S STATE LEGISLATIVE AGENDA FOR THE 2011 SESSION OF THE NORTH CAROLINA GENERAL ASSEMBLY

City Attorney Oast said that this is the consideration of a resolution approving the City's State Legislative Agenda for the 2011 Session of the North Carolina General Assembly.

At its meeting of November 9, 2010, Council initiated discussion of the State Legislative Agenda for 2010. He provided Council with the report in three major areas, but would only address two major areas due to Council's desire to see more information on the State Municipal Policy Matters.

I. Continuing Local Issues. Based on direction received at the November 9 meeting, and on information received since them, a resolution has been prepared requesting legislative action with respect to several issues, some of which are carried over from previous years, and some of which are of persistent local concern.

A. Adjustment of Woodfin/Asheville boundary and UNC-A area and Merrimon Avenue. This is a renewal of the request developed last year. We have identified with more particularity the location of the boundary, and have reviewed the matter with the affected governmental and educational agencies. Of particular importance is that a method was developed for allowing privately owned properties currently located in Woodfin to remain subject to Woodfin's jurisdiction, at their option.

B. Clarification of the Video Service Competition Act of 2006. This was also carried over from last year. We sought introduction of a bill to preserve the status quo with respect to features of local cable television franchises (such as intranets) that were not addressed by the Video Service Competition Act. The bill that was introduced was referred to a study committee.

C. Authorization for Asheville to condition provision of water service on annexation for developments of a certain size. This request has been made in the past, and has taken several forms. This was last considered in 2009.

D. Clarify authority to use property assessment process to finance certain energy efficiency projects. This continues efforts begun in 2009. While legislation has been adopted that implements parts of this authorization, questions remain as to the effect of such assessments on home mortgage financing, and restrictions on the sources of revenue available for such programs. The School of Government has been working with stakeholder parties on clarification of these issues.

II. New Matters. Since the November 9 meeting, we have received several other items for potential inclusion on the legislative agenda:

A. Structure of State ABC system. In recent years, there have been discussions regarding changes to the structure of the State ABC system. These discussions have centered on privatizing parts of the system, which would have the affect of diminishing local control and local revenue. The local ABC Board has asked Council to consider a resolution supporting the current structure.

B. School system consolidation. There have been indications that the topic of school system consolidation may come up in this legislative session, particularly in view of the State economic situation. Asheville and Buncombe County currently operate separate school systems, so the impact of potential legislation on this subject is of particular interest on a local level.

III. State Municipal Policy Matters. We have now received the North Carolina League of Municipalities Proposed Advocacy Goals. The League has scheduled a conference for January 20, 2011, at which the agenda will be narrowed down and prioritized. Each member municipality is entitled to one vote in this process.

If Council desires for Asheville to participate in this process, Council should select a delegate, and should provide voting direction on the major issues. Council's attention is directed to the following items of particular interest.

A. Page 1, Item 1B. Municipal broadband authorization. With the termination of local cable television franchises by operation of the Video Service Competition Act (VSCA), the ability of local governments to build and operate fiber-optic systems has been a matter of interest across the State.

B. Page 3, Item 2A. Local control over ABC operations. This is consistent with the local ABC Board's request, summarized above.

C. Page 3, Item 2B. More influence for cities in ABC permitting decisions. This has been an issue over the years for Asheville and other municipalities. Currently, local involvement is advisory only, which can lead to repeated permitting of problem locations.

D. Page 4, Item 3A. Sales tax distribution process. The method of sales tax distribution has been a matter of interest to the City for several years.

E. Page 5, Item 3D. Prepared meals and beverage tax. This has been considered by Council in the past. The proposal would be for a State-wide local option authorization.

F. Page 7, Item 5A-E. Transportation infrastructure. This proposal is highlighted because of consistent local interest in transportation issues in general, including:

- Passenger rail service
- Alternative nodes of transportation
- Sidewalks.

He also provided Council the NCLM information package which contains a description of the policy development process, along with a form and method for submission of new items for legislative consideration. The deadline for doing this is January 14, 2011. In lieu of or in addition to participating in the NCLM Advocacy Goals Conference, Council may by resolution support individual proposals.

He also provided the Council with the N.C. Metro Mayors legislative agenda.

He recommended Council give him direction to proceed with the four continuing local issues at this time. On January 11, he will come back asking Council's consideration on adopting the State Legislative Agenda with more information regarding new matters and State Municipal Policy Issues for Council consideration.

In response to Mayor Bellamy, City Attorney Oast said that this is the beginning conversation about our legislative agenda and he assumes Council is okay with giving him direction to proceed with the four continuing local items.

Vice-Mayor Newman moved to adopt the four continuing local issues as part of the legislative agenda. This motion was seconded by Councilman Bothwell. However, after Mayor Bellamy noted that she could not support the motion as she felt the public was not aware that we would be voting on our legislative agenda, Vice-Mayor Newman withdrew his motion.

City Attorney Oast said that he will be seeking Council's approval of the state legislative agenda on January 11, 2011.

E. CONSIDERATION OF SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT'S RECOMMENDATION REGARDING THE TRANSFORMATIONAL DEVELOPMENT PROJECTS INCENTIVE POLICY FOR THE CITY OF ASHEVILLE

Vice-Mayor Newman said that the Sustainable Advisory Committee on Energy & the Environment (SACEE) reviewed the Transformational Development Policy at their November meeting as per Council's directive. The Committee discussed the policy's structure and design in relation to green/sustainable development practices, consistency with other development incentives, and incentivization thresholds for influencing development decisions. When City Council approved the Transformational Development Policy, the ordinance states the incentive will go into affect December 30, 2010. The SACEE Committee believes the timeframe before implementation does not allow them to adequately provide the policy support Council requested.

SACEE recommends that the City Council delay implementation of this ordinance until February 1, 2011, or later so staff and appropriate committees (including the Affordable Housing Working Group) can effectively perform the due diligence necessary in review of this policy. SACEE would bring forward their recommendations in January for Council consideration. This was a unanimous vote by the committee.

Vice-Mayor Newman moved to delay implementation of this ordinance no later than February 1, 2011. This motion was seconded by Councilman Bothwell and carried unanimously,

with the understanding that SACEE will report back to Council with specific recommendations before February 1 or the policy will be effective February 1, 2011.

VI. NEW BUSINESS:

A. RESOLUTION NO. 10-265 - RESOLUTION REAPPOINTING MEMBERS TO THE ASHEVILLE SCHOOL BOARD

Vice-Mayor Newman, Chairman to the City Council Boards & Commissions Committee, said that the terms of Jacquelyn Hallum and Precious Folston, as members on the Asheville School Board, will expire on April 1, 2011.

At the November 9, 2010, Boards & Commissions Committee meeting, it was the consensus of the Committee to instruct the City Clerk to contact Ms. Hallum and Ms. Folston to see if they were interested in reappointment and if so, to obtain their attendance records.

Both have served one term and both have expressed interest in reappointment.

Due to the extensive appointment process regarding the School Board with advertising to begin immediately and the significance of the board, the Committee requested City Council's direction on whether to proceed with advertising and interviewing for the School Board vacancies or to reappoint Ms. Hallum and/or Ms. Folston.

In response to Councilman Smith, Mayor Bellamy, as School Board liaison, said that the current School Board members are already in the process of discussing school consolidation. She supported reappointing Ms. Hallum and Ms. Folston as they are experienced and have served the citizens well. Having continuity on the Board will help move the community through the process.

Councilman Bothwell suggested the issue of an elected school board vs. an appointed school board be discussed if school board consolidation does not occur.

When Mayor Bellamy asked for public comment, no one spoke.

Councilman Davis moved for the adoption of Resolution No. 10-265 to reappoint Jacquelyn Hallum and Precious Folston to each serve an additional four-year term respectively, terms to expire on April 1, 2015, or until their successors have been appointed. This motion was seconded by Mayor Bellamy and carried unanimously.

RESOLUTION BOOK NO. 32 – PAGE 295

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mayor Bellamy announced the following vacancies: Board of Adjustment; Community Relations Council; Sustainable Advisory Committee on Energy & the Environment; Fair Housing Commission, Firemen's Relief Fund; Greenway Commission; Metropolitan Sewerage District Board; Riverfront Area Redevelopment Commission; Transit Commission and Tree Commission. The deadline for applications is Thursday, January 5, 2011, at 5:00 p.m.

Ms. Kyle Ross researched some concerns over the past five years relating to the criminal justice system – in particular the Asheville Police Department and the District Attorney's Office. Her first concern was fairness regarding an investigation of a fired police officer. Mayor Bellamy advised Ms. Ross that City Council cannot consider personnel matters in open session; and (1) suggested she meet with City Manager Jackson; and/or (2) meet with the Citizens-Police Advisory Committee. City Attorney Oast noted that the particular investigation Ms. Ross was speaking about is in litigation and cannot be discussed.

400.

Claims

The following claims were received by the City of Asheville during the period of October 22 – December 2, 2010: Rachel Evans (Sanitation), Brunk Auctions (Parks & Recreation), Charles and Nancy Long (Water), Jessica Toan (Water), Donald Gundry (Water), Lynn Ansley (Streets), Leigh W. Jones (Police), Iveth Ahumada (Water), David West (Sanitation), Progress Energy (Water), Paul Lorenzo (Police), Wendy Fletcher (Water), Quantarian Garnett (Sanitation), AT&T (Water) and Eric Bryant (Police). These claims have been referred to Asheville Claims Corporation for investigation.

Closed Session

At 7:29 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: John Robert Follett and the City of Asheville. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and **(2)** To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Davis and carried unanimously.

At 7:45 p.m., Councilman Bothwell moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:45 p.m.

Magdalen Burleson
CITY CLERK

Jerry W. Bellamy
MAYOR

Tuesday – January 25, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr.; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Students from Asheville Catholic School led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Newman gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF DR. HANK DUNN, PRESIDENT OF ASHEVILLE-BUNCOMBE TECHNICAL COMMUNITY COLLEGE

Mayor Bellamy was pleased to recognize Dr. Hank Dunn, President of Asheville-Buncombe Technical Community College. Dr. Dunn became the fifth President of A-B Tech on March 1, 2010. Prior to coming to A-B Tech, he served as Chancellor of Ivy Tech Community College in downtown Indianapolis for four years. Dr. Dunn is a dynamic educational leader with more than 30 years of experience in higher education and various business settings. He sees his role in the community as providing high quality educational opportunities and economic development to the residents of western North Carolina.

Dr. Dunn was pleased to be in the Asheville-Buncombe community and spoke about some of their programs.

B. PROCLAMATION PROCLAIMING JANUARY 30-FEBRUARY 5, 2011, AS "NATIONAL CATHOLIC SCHOOLS WEEK"

Mayor Bellamy read the proclamation proclaiming January 30-February 5, 2011, as "National Catholic Schools Week" in the City of Asheville. She presented the proclamation to Mrs. Donna Gilson, Principal of Asheville Catholic School, and students from Asheville Catholic School, who briefed City Council on some activities taking place during the week.

C. PROCLAMATION PROCLAIMING FEBRUARY, 2011, AS "BLACK HISTORY MONTH"

Mayor Bellamy read the proclamation proclaiming February, 2011, as "Black History Month" in the City of Asheville. She presented the proclamation to Mr. Ron King, Mr. Dan Johnson and Mr. Richard Fort from the YMI Cultural Center, who briefed City Council on some activities taking place during the month along with the YMI history and mission statement.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON DECEMBER 14, 2010

B. RESOLUTION NO. 11-1 – RESOLUTION AMENDING THE MEMBERSHIP OF THE CITIZENS/POLICE ADVISORY COMMITTEE

Summary: Councilman Bill Russell be and he is hereby appointed as the ex-officio non-voting City Council representative on the Citizens/Police Advisory Committee to serve a term according to the length of his Council term of office.

Section 1 (h) of Resolution No. 94-186 be amended to read as follows: "Two ad hoc seats to be temporarily filled and appointed by committee members for a specific problems, incident, or event – to be voting members."

RESOLUTION BOOK NO. 33 – PAGE 297

C. RESOLUTION NO. 11-2 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO DEVELOP THE LONG RANGE TRANSPORTATION DEMAND MANAGEMENT PLAN

ORDINANCE NO. 3935 - BUDGET AMENDMENT TO DEVELOP THE TRANSPORTATION DEMAND MANAGEMENT PLAN

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the North Carolina Department of Transportation (NCDOT) to develop the Long Range Transportation Demand Management (TDM) Plan and consideration of a budget amendment, in the amount of $100,000, to set up the funds for the above-mentioned project.

TDM is the application of policies and strategies that attempt to optimize existing transportation resources and infrastructure by mitigating single occupancy vehicle use in a defined area. TDM programs have the potential to deliver better environmental outcomes, lower parking demands, improved public health, stronger communities, and a more prosperous and livable city.

The TDM program has been hosted by the city since Fiscal Year 2005 and has focused in promoting alternatives to single occupancy vehicle mainly inside the City limits. The NCDOT has expressed the need to set regional goals to improve the quality of life for the citizens of Western North Carolina by providing education, support and resources that enhance and promote alternatives to driving alone. In order to evaluate the adequacy of these goals to the current program being managed by the city and to continue funding it, the NCDOT wants to perform an analysis and provide new strategies that will allow TDM to grow accordingly to regional needs.

The City of Asheville will hire a consultant to develop this plan and will be responsible for completion. The estimated cost is $100,000 and will be funded by Section 5307 of the Federal Transit Administration (FTA), with existing funding that will otherwise be lost, in the amount of $80,000. The 20% or $20,000 match is provided by NCDOT.

This Long Range TDM Plan supports the City of Asheville's 2010/11 Strategic Plan by helping to promote emission-reducing options, as well as supporting the Asheville Transit System though programs such as the *PASS*port program. It also complies with fiscal responsibility, leveraging funding from Federal and State agencies.

Pros:

- The project will be completely funded by the FTA in the amount of $80,000 and the NCDOT in the amount of $20,000.
- No city funds will be used to develop the Plan.

- This plan will address NCDOT and City concerns about the future of the TDM program.
- This plan will provide guidance for future TDM initiatives regarding regional needs.

Cons:

- City staff will manage this project. The TDM coordinator position is currently funded 50% by the NCDOT and 50% by the city.

City staff will be used to develop this plan; this task is already part of the current budget for this fiscal year. The plan will be funded 80% or $80,000 by FTA and matched by NCDOT with 20% or $20,000. There is no impact to the General Fund budget.

City staff recommends City Council to adopt a resolution authorizing the City Manager to enter into an agreement with the NCDOT to develop the TDM Plan and the associated budget amendment, in the amount of $100,000, to set up the funds for the above-mentioned project.

RESOLUTION BOOK NO. 33 – PAGE 298
ORDINANCE BOOK NO. 26 – PAGE 412

D. RESOLUTION NO. 11-3 - RESOLUTION IN SUPPORT OF AN ECONOMIC BENEFIT ANALYSIS FOR A COMMUNITY IMPROVEMENT DISTRICT

Summary: Update by the Downtown Management Subcommittee on its activities and consideration of a resolution supporting an economic benefit analysis for a Community Improvement District (CID).

The Downtown Master Plan, adopted by City Council in May 2009, strongly recommended a downtown management entity for Downtown Asheville. A subcommittee was formed by the Downtown Commission to explore this idea, and it has been meeting for the past year. In the United State and many parts of the world, these entities are funded by a special assessment district, and are often called a Business Improvement District (BID). The Downtown Master Plan recommends a Community Improvement District (CID) as our downtown has so many residents as well as businesses. These districts can be found in all sizes of cities and towns. In North Carolina, there are over 40 of them ranging from Chimney Rock to Waynesville to Charlotte.

As a part of its work, the subcommittee has been doing several things: learning about improvement districts, gathering information on current city services to downtown and analyzing the downtown tax base. Currently, the subcommittee has put together a survey for property owners to be carried out in the first quarter of 2011. The purpose of the survey is to find out what additional services property and business owners would be interested in as a part of the improvement district. In January 2011, the subcommittee will also begin a series of meetings with property owners in different areas of downtown to explain how districts function, but mainly to hear their thoughts about a potential district for Downtown Asheville. The subcommittee is working towards a goal of coming to City Council in June 2011 for approval of the district. However, this process is somewhat organic, and the end date may change.

The group has also been discussing an Economic Benefit Analysis that would show property and business owners what economic impact an improvement district would likely have for properties and businesses in Downtown Asheville. These studies are required in some places as a pre-requisite to district approval. They are not required in North Carolina, however our subcommittee thought it would be a good idea given the current economic climate and hesitancy of some property owners.

There are details concerning the economic benefit analysis in the documents provided to Council, including an RFP that will be released to solicit proposals. Currently, the Asheville

Downtown Association has promised $7000 in funding, a request of $1000 is being made to the downtown residents, and the committee feels confident that the county will fund another $3500. The Subcommittee is requesting a matching $3500 from the City of Asheville to help fund the economic impact study along with the survey. The funding ratios acknowledge that downtown stakeholders must be in the lead of this process.

The subcommittee is requesting that the city help fund the Economic Impact Analysis as a partner. This would be accomplished within the existing budget of Economic Development.

This item was reviewed by the City Council Planning & Economic Development Committee on December 21, 2010, and they recommended approval.

City Council has adopted the goal of completing the Downtown Master Plan and implementing it. The Downtown Management Subcommittee has determined that an economic benefit analysis is important in implementing Chapter 7 of the Downtown Master Plan.

Pros:

- An economic benefit analysis will show what benefits property owners and business owners can reasonably expect from a Community Improvement District downtown.
- The city's contribution can be made using existing funding.

Con:

- None noted.

The City's contribution towards the study can be funded out of the existing Office of Economic Development budget and does not require a budget amendment.

Staff recommends that City Council support the funding plan for the Economic Benefit Analysis, which includes $3,500 of city funds.

RESOLUTION BOOK NO. 33 – PAGE 299

E. RESOLUTION NO. 11-4 - SETTING A PUBLIC HEARING ON FEBRUARY 22, 2011, TO CLOSE SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA

Summary: The consideration of a resolution of intent to permanently close several portions of unopened rights of way and City streets within the Montford Commons Development area, which includes; an unopened portion of Woodside Place; an unopened unnamed right of way between Gudger Street and the unopened portion of Woodside Place; an unopened portion of Bay Street; all of the unopened portion of Jason Street and a portion of City maintained Jason Street; all of City maintained Michael Street; and all of the unopened unnamed right of way located near Jason Street.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjoining property owners, Frontier Syndicate LLC; Rhesa Read Tull Jr., Dorothy Tull Mothershead, and Margaret Tull Davis (heirs of Farrar G. Parker) have requested the City of Asheville to permanently close several portions of unopened rights of way and City streets within the Montford Commons Development area, which includes; an unopened portion of Woodside Place; an unopened unnamed right of way between Gudger Street and the unopened portion of Woodside Place; an unopened portion of Bay Street; all of the unopened portion of Jason Street and a portion of City maintained Jason Street; all of City maintained Michael Street; and all of the unopened Elizabeth Place. Adjacent property owners Asheville

Board of Education and did not join the petition, a copy of this resolution of intent shall be sent by registered mail.

The Greenway Commission met on November 11, 2010. They voted unanimously to support the street closures and strongly recommended that any future development plan include the greenway connection as discussed in the site master plan.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use. The Strategic Plan Goals most closely aligned with the Montford Commons Development closure requests is the Job Growth and Community Development Goal in that it will provide sustainable high density infill growth that makes efficient use of existing resources.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties
- Meets Council's goals to promote sustainable high density infill growth that makes efficient use of existing resources

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close several portions of unopened rights of way and City streets within the Montford Commons area and set the public hearing for February 22, 2011.

RESOLUTION BOOK NO. 33 – PAGE 300

F. ORDINANCE NO. 3936 - BUDGET AMENDMENT FOR AN ASHEVILLE PARKS & GREENWAYS FOUNDATION DONATION

Summary: The consideration of budget amendments authorizing the City Manager to increase the budgets for 1) Aston Park by $900, 2) the Park Maintenance Division by $4,171, 3) Special Projects budget by $70,580, and 4) to revise the Festivals Fund operating budget by $14,461.

The City of Asheville has received contributions totaling $90,112 from the Asheville Parks and Greenways Foundation to support various programs and special projects within the Parks, Recreation & Cultural Arts Department. The Asheville Parks and Greenways Foundation is a 501(c)3 non-profit organization whose purpose is to support programs and special projects related to parks, greenways and recreation programs within the City of Asheville Parks, Recreation & Cultural Arts Department.

The budget and description of each project supported by the Asheville Parks and Greenways Foundation contribution is listed below:

$900 to increase the operational budget to support Aston Park

$4171 to increase the operational budget to support the Hanging Flower Basket program in the Park Maintenance Division

$14,461 to revise the Festivals Fund operational budget to reduce the City of Asheville General Fund subsidy of the Festivals Fund

$430 to increase the special projects budget to support land acquisition related to greenway development

$25,000 to increase the special projects budget to support public art projects at Riverbend Park

$20,150 to increase the special projects budget to support public art projects at Reed Creek Greenway

$25,000 to increase the special projects budget to support the Public Artist of the Year project

This action complies with the Parks, Recreation, Cultural Arts & Greenway Master Plan in that it makes use of diverse funding sources for successful implementation in the delivery of parks, recreation and cultural art services.

Pro:
- Provide funds to support parks, recreation and cultural arts programming enhancements

Con:
- None

These donations enhance parks services at no impact to the General Fund operating budget.

Staff recommends City Council to approve the budget amendments authorizing the City Manager to increase the budgets for 1) Aston Park by $900, 2) the Park Maintenance Division by $4,171, 3) Special Projects budget by $70,580, and 4) to revise the Festivals Fund operating budget by $14,461.

ORDINANCE BOOK NO. 26 – PAGE 414

G. ORDINANCE NO. 3937 - BUDGET AMENDMENT TO AUTHORIZE THE USE OF FEDERAL DRUG SEIZURE FUNDS TO PURCHASE EQUIPMENT AND TRAINING FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of a budget amendment, in the amount of $131,167, to authorize the use of Federal Drug Seizure Funds to purchase equipment and fund improvements and training for the Asheville Police Department (APD).

The federal drug seizure program is an equitable sharing program which divides the illegal proceeds from drug dealing between the federal government and local law enforcement agencies. It is designed to help off-set the considerable cost of drug enforcement, by allowing local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The illegal proceeds are divided with 20% going to the federal agency adopting the seizure and 80% going to the local law enforcement agency initiating the seizure. The City of Asheville Police Department has received $131,167 in federal drug seizure funding. This proposed budget amendment would authorize the use of this funding for critical improvements, training, and equipment purchases for the Asheville Police Department.

Among the items slated for purchase with this funding include: 1) Replacement of Emergency Response Team Rifles; 2.) Forward Looking Infrared (FLIR) Surveillance Equipment; 3.) TASERS; 4.) Mobile Data Terminal Computers; 5.)LED Flashlights; 6.) Child Pornography Training, Computer Forensics Training and other uniforms and equipment not covered by the APD operating budget.

This action conforms to the City Council's Strategic Operating Plan under 1) Fiscal Responsibility in that we are using drug seizure monies to enhance the APD's equipment and training needs that would otherwise not be funded, and 2) Safe City in that providing the various equipment and training allows our employees to be more professional and more effective in proactively enforcing and preventing criminal activity.

Pro:

- Federal seizure revenues to cover the cost of equipment and training related to street level drug enforcement and community policing activities

Con:

- None noted

The increase of $131,167 for training and equipment. Accepting these funds is a significant financial benefit to the APD allowing us to better train and equip our employees without impacting the General Fund budget.

City staff recommends City Council adopt the budget amendment, in the amount of $131,167, to authorize the use of Federal Drug Seizure Funds to purchase equipment and training for the Asheville Police Department.

ORDINANCE BOOK NO. 26 – PAGE 420

H. ORDINANCE NO. 3938 - BUDGET AMENDMENT TO AUTHORIZE THE USE OF NORTH CAROLINA STATE DRUG SEIZURE FUNDS TO PURCHASE EQUIPMENT AND FUND TRAINING FOR THE ASHEVILLE POLICE DEPARTMENT

Summary: The consideration of a budget amendment, in the amount of $88,325, to authorize the use of North Carolina State Drug Seizure Funds to purchase equipment and fund training for the Asheville Police Department.

The North Carolina State drug seizure program is an equitable sharing program which divides the illegal proceeds from drug dealing between the North Carolina State government and local law enforcement agencies. It is designed to help off-set the considerable cost of drug enforcement, by allowing local law enforcement agencies to use seized monies for equipment, training, and improvements that might not necessarily be budgeted for by the agency. The illegal proceeds are divided with 25% going to the North Carolina Department of Revenue and 75% going to the local law enforcement agency initiating the seizure.

The City of Asheville Police Department has received $88,325 in North Carolina State drug seizure funding. This amendment will authorize the use of that funding to purchase drug enforcement equipment and training not covered by the APD operating budget. Items to purchase include: 1) Radar Speed Detection Units; 2) LIDAR Speed Detection Units; 3) Radar Speed Trailer; 4) Drug Surveillance Equipment; 5.) Police Bicycles; and 6.) Training related to Police Management, Hazardous Devices Training, Crowd-Control Training, Crash Data Retrieval Training or other training for employees.

This action conforms to the City Council's Strategic Operating Plan under 1) Fiscal Responsibility in that we are using drug seizure monies to enhance the APD's equipment and training needs that would otherwise not be funded, and 2) Safe City in that providing the various equipment and training allows our employees to be more professional and more effective in proactively enforcing and preventing criminal activity.

Pro:

- North Carolina State drug seizure revenue used to fund drug enforcement equipment, training, and improvements at no cost to city taxpayers.

Con:

- None noted

The increase of $88,325 for training and equipment. Accepting these funds is a significant financial benefit to the APD allowing us to better train and equip our employees without impacting the General Fund budget.

City staff recommends City Council adopt a budget amendment, in the amount of $88,325, authorizing the use of North Carolina State Drug Seizure Funds to fund drug enforcement equipment, training and other improvements for the Asheville Police Department.

ORDINANCE BOOK NO. 26 – PAGE 422

I. ORDINANCE NO. 3939 - BUDGET AMENDMENT FROM THE INSURANCE FUND PROGRAM TO PAY CLAIMS EXPENSES THAT HAVE EXCEEDED THE APPROVED BUDGET AMOUNT

Summary: The consideration of a budget amendment, in the amount of $200,000, from the Insurance Fund program reserves to pay claims expenses that have exceeded the approved budget amount.

The City's Fiscal Year 2010-11 adopted budget for the liability insurance program, which includes funding for premiums, claims and administrative expenses, totaled $1,460,270.

The budget is established each year to pay regular and routine claims; however, previously incurred claims are often paid in later budget years when they are settled or when additional costs are incurred. As a result, the budget needs to be increased by $200,000.

Pro:

- The City maintains adequate funds in the Insurance Fund to cover costs in high claim years.

Con:

- A few number of serious incidents have caused the timing of claim costs to be above staff's initial budget projections for the year.

Budget authorization for this increase will come from reserves already set aside in the liability insurance program. Currently, the City has $5,034,884 set aside in the Insurance Fund for claims that have been incurred but not yet paid. The budget amendment provides authorization to appropriate $200,000 from this reserve to pay the claims. This budget amendment will not impact the General Fund or any of the other operating funds.

City staff recommends City Council approve the budget amendment appropriating $200,000 from the liability insurance program reserves.

ORDINANCE BOOK NO. 26 – PAGE 424

J. RESOLUTION NO. 11-5 - RESOLUTION AMENDING THE 2011 CITY COUNCIL MEETING SCHEDULE TO ADD CITY COUNCIL'S ANNUAL RETREAT ON FEBRUARY 4, 2011, AT WARREN WILSON COLLEGE IN CANON LOUNGE IN ASHEVILLE NORTH CAROLINA

RESOLUTION BOOK NO. 33 – PAGE 302

K. RESOLUTION NO. 11-6 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH COMMUNICATION SERVICE INCORPORATED FOR THE INSTALLATION OF WIRELESS NETWORKING EQUIPMENT AT THE ASHEVILLE CIVIC CENTER

ORDINANCE NO. 3940 – BUDGET AMENDMENT FOR THE INSTALLATION OF WIRELESS NETWORKING EQUIPMENT AT THE ASHEVILLE CIVIC CENTER

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract on behalf of the City of Asheville with Communication Service Incorporated, for the installation of wireless networking equipment at the Asheville Civic Center, and the associated budget amendment, in the amount of $62,669.

The Asheville Civic Center lacks the ability to provide reliable wireless internet connectivity to event organizers and patrons of the facility. As part of the Civic Center renovation project funded through a grant from the Tourism Product Development Fund of the Buncombe County Tourism Development Authority, this equipment is being installed to provide improved service to national media outlets, event organizers, staff and visitors to the facility. This equipment will also provide added revenue generating opportunities for the Civic Center with the ability to offer secure wireless internet access to event organizers as a purchase option during facility use.

This project was advertised for bids and Communication Service Incorporated, located in Asheville, N.C., was the lowest responsive/responsible bidder for the required project elements. Bids have also been received for the installation of wireless networking equipment at City Hall. This contract does not include the installation of equipment at City Hall as funding has yet to be identified.

This action complies with the City Council Strategic Operating Plan in fully leveraging external partnerships for pursuing capital improvements and infrastructure projects.

Pros:

- Will greatly improve network and internet access at the Civic Center.
- Adds value to the Civic Center as a facility of choice.
- Creates additional revenue opportunities through service fees.

Con:

- Project management, contract administration, and integration with existing equipment and security protocols will consume staff time.

The contract amount for the project totals $62,668.13. The budget amendment authorizes the contract to proceed and be rolled into the SoCon renovations financing.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract on behalf of the City of Asheville with Communication Service Incorporated, for the installation of wireless networking equipment at the Asheville Civic Center, and the associated budget amendment.

RESOLUTION BOOK NO. 33 – PAGE 303
ORDINANCE BOOK NO. 26 – PAGE 426

L. RESOLUTION NO. 11-7 - RESOLUTION SETTING A PUBLIC HEARING ON FEBRUARY 22, 2011, TO CLOSE COOPER BOULEVARD

Summary: The consideration of a resolution of intent to permanently close Cooper Boulevard.

N. C. Gen. Stat. sec 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, adjacent property owner Ingles Market Inc., represented by Preston Kendall, Real Estate Property Manager, has requested the City of Asheville to permanently close Cooper Boulevard.

The Greenway Commission met on January 13, 2011, and recommended an existing foot path (goat path) be improved and paved. However this is located within the buffer area and the planning staff is researching if it can be done. Planning will provide information to the Greenway Commission which may change their recommendation. Additionally there is a topographic concern which will also be addressed by Planning Staff. Final comments from the Greenway Commission will be provided in the staff report for the public hearing on February 22.

This closure allows maximum land use potential for further development complying with the Asheville City Development Plan, Land Use.

Pros:

- There will be no future compromise of ingress/egress to other property
- The closure would allow for more efficient use of the existing adjacent properties

Con:

- None

There will be no fiscal impact related to this closure.

City staff recommends City Council adopt the resolution of intent to permanently close Cooper Boulevard and to set the public hearing on February 22, 2011.

RESOLUTION BOOK NO. 33 – PAGE 304

M. RESOLUTION NO. 11-8 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH MEDALLION ATHLETIC PRODUCTS INC. TO INSTALL NEW BACKSTOP NETTING AT MCCORMICK FIELD

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Medallion Athletic Products, Inc. to install new backstop netting at McCormick Field.

The lease agreement between the City of Asheville and DeWine Seeds-Silver Dollar Baseball for the Asheville Tourists at McCormick Field includes a capital improvement program which is funded via the lease revenue. Each year the funds are used to make facility improvements to McCormick Field. The City and DeWine Seeds-Silver Dollar Baseball work together to identify and prioritize improvements. This year the priority project is to replace the backstop netting.

The City conducted a competitive bid process for the backstop netting replacement project.

Medallion Athletic Products, Inc., located at 150 River Park Road in Mooresville, North Carolina, is the lowest responsive and responsible bidder not to exceed $63,000 and is proposed to be selected to replace the backstop netting at McCormick Field.

This action complies with the City's Strategic Operating Plan in that it supports making timely capital reinvestments that improve the infrastructure of a City facility. It is also consistent with the Parks, Recreation, Cultural Arts and Greenways Master Plan in that it provides ongoing maintenance and care for the City's park system.

Pros:

- Capital investment to maintain and care for McCormick Field, a City-owned asset.
- Provide timely capital reinvestment to prevent additional deferred maintenance costs.
- Fulfill commitment for maintenance of park system.

Con:

- None

The $63,000 to support the backstop netting replacement contract is budgeted in the Fiscal Year 2010-2011 Parks, Recreation and Cultural Arts Department capital improvement budget for McCormick Field. The budget receives revenue from DeWine Seeds-Silver Dollar Baseball as part of the lease agreement to support the budget and the cost associated with backstop net replacement.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Medallion Athletic Products, Inc., not to exceed $63,000 to install new backstop netting at McCormick Field.

RESOLUTION BOOK NO. 33 – PAGE 305

N. RESOLUTION NO. 11-9 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT THE CONVEYANCE OF REAL PROPERTY AT 75 SHELBURNE ROAD, KNOWN AS THE FORMER NORTH CAROLINA NATIONAL GUARD ARMORY, FROM THE STATE OF NORTH CAROLINA

Summary: The consideration of a resolution authorizing the Mayor to accept the conveyance of real property at 75 Shelburne Road, known as the former North Carolina National Guard Armory, from the State of North Carolina.

On August 25, 1960, the City of Asheville conveyed property at 75 Shelburne Road (PIN # 963709498100000) to the State of North Carolina for the purpose of operating a National Guard Armory. This conveyance was subject to the condition that if property is no longer required by the State of North Carolina for this military purpose, the property would revert back to City of Asheville ownership. The NC National Guard Armory facility has relocated to a site at Richmond Hill and no longer occupies the property at 75 Shelburne Road. The State of North Carolina has requested that the City of Asheville accept the property in its current condition and accept the liability and responsibility for the site.

The site consists of approximately 9.18 acres and is improved with buildings associated with the former use, including a large gymnasium, offices, garage and secured parking. Most of the improvements were constructed in the 1960s, apart from a small office building addition that was constructed in the 1980s.

Staff has conducted due diligence on the property, including environmental review, and multiple site inspections. The recognized environmental conditions on site include: (1) presence of asbestos in boiler tank insulation and pipe elbows, floor tile and mastic, building caulk and chalkboard mastic, (2) elevated levels of lead dust in indoor firing range, (3) below-ground oil-water separator associated with vehicle wash bay area, (4) unregulated underground storage tank (500 gallon capacity) containing heating oil. Soil samples collected at the underground tank site indicate a potential diesel fuel release. Upon acceptance of the property, the City would be

responsible for remediating these issues at a potential cost of $25,000 to $50,000, including lead and asbestos abatement, underground storage tank removal and associated soil remediation.

Overall, these upfront costs are fairly low considering the inherent value of the property. The current zoning is Institutional and offers a wide variety of land uses, with excellent access to Shelburne Road and I-240. Staff has identified several short-term uses for the property, to include utilizing the existing wash bay area for city fleet vehicles, operating existing buildings for Parks Maintenance function and off site storage. Discussions regarding long-term use will commence once the reversion process is final. The State of NC process for the property conveyance may take up to 6 months.

This action complies with the City Council Strategic Operating Plan by demonstrating fiscal responsibility through accepting a conveyance of prime real property for relatively minimal costs.

Pro:

- 9.18 acres of prime property will be under City of Asheville ownership

Con:

- Environmental issues including asbestos, lead dust and an underground fuel storage tank must be mitigated at the sole cost to the City

Costs associated with building operation (utilities) and costs to remediate environmental concerns will be reviewed in the upcoming budget cycle.

City staff recommends City Council approve a resolution authorizing the Mayor to accept a conveyance of real property at 75 Shelburne Road from the State of North Carolina.

RESOLUTION BOOK NO. 33 – PAGE 306

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Russell moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Bothwell and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. PRESENTATION OF THE EXTERNAL AUDIT OF THE FISCAL YEAR 2010 COMPREHENSIVE ANNUAL FINANCIAL REPORT

Interim Finance Director Kai Nelson said that at the conclusion of each fiscal year, an annual audit of the city's financial statements is conducted. The purpose of the audit is to obtain reasonable assurance that basic financial statements are free of material misstatement; to examine evidence supporting the amounts and disclosures in the financial statements; and to assess accounting principles used and the overall presentation of the financial statement.

In connection with the General Fund, he was pleased to report that the City finished the fiscal year with roughly $11-12 Million in Fund Balance, representing approximately 15% of the current year's expenditures.

In connection with the Civic Center Enterprise Fund and the Parking Enterprise Fund, they improved in 2010 compared to 2009. Regarding the Transit Enterprise Fund and the Water Enterprise Fund, their financial performance remained largely unchanged. The Golf Enterprise Fund showed a slight decline in their performance.

Regarding compliance matters, the external audit noted no question costs in connection with federal and state expenditures. In connection with internal control matters, the external audit firm noted two internal control matters, noting that by the time the audit report was completed in December, those had been fully addressed by staff. They are noted in the audit report that they have been corrected.

Finally, the fiscal year that the audit covers is July 1, 2009 – June 30, 2010. That was a particular difficult year for the Finance Department in several respects. One is that there was a substantial amount of turnover in various levels of the Finance Department operation. Secondly is there was a major financial conversion in connection with the City's financial systems which contributed to the delay in the presentation of the audit report.

The City Council Finance Committee heard earlier today a report that the Local Government Commission (LGC) has issued once they received the audit report. The LGC issued a report in which they requested the City to address three matters – (1) Fund Balance matter; (2) two compliance matters earlier referred to; and (3) the lateness in the filing of the audit report. The LGC has subsequently amended their communication to the City today and deleted the Fund Balance matter. That letter has been provided to Council members. The response has been drafted.

Mr. Brian Broom, Director of Dixon Hughes, PLLC, summarily reviewed with Council the annual audit. He said that the following is the audit and financial statement summary: "Our report for the 2010 audit expresses an unqualified opinion on the fair presentation of the basic financial statements in all material respects, in conformity with accounting principles generally accepted in the United States of America. Our report can be found on Page 1 of the Comprehensive Annual Financial Report (CAFR). Our reports on compliance and internal control, in accordance with Government Auditing Standards, OMB Circular A-133, and the State Single Audit Implementation Act, disclosed two material weaknesses in internal controls and no instances of non-compliance in the administration of federal and state awards programs. Our compliance reports and a summary of the results can be found in the Compliance Section of the CAFR. The City converted its accounting software during the year, which required a major time commitment from the City's accounting staff. Also, we noted some areas for improvement in the City's accounting function that we have communicated to management in a separate letter dated December 28, 2010."

In response to Mayor Bellamy, Mr. Nelson explained in more detail that there are three factors that contributed to the delay in filing the 2010 audited financial statements as follows: (a) employee turnover in the Finance Department in critical senior and technical level positions; (b) conversion of the City's business and financial applications from a legacy accounting system to an enterprise resource planning system; and (c) redesign and required new mapping of the City's entire financial accounting structure. The latter two factors were completed in 2010 and will not be impediments to completing the 2011 audit report in a timely fashion. With regard to the first factor of employee turnover, the City is currently recruiting for several key positions in the Finance Department, including the Director's position, and will have the necessary resources in place to ensure the timely completion of the 2011 audit.

Mr. Nelson said that the second concern related to the auditor's communication regarding two internal control matters – the accounting and financial reporting of notes receivable for the Housing Partnership Fund and bank reconciliations. The City has already instituted procedures to correct both matters.

He said that the City Finance treasury staff are current with the main bank statement reconciliation and are presently working on December 2010's statement. Financial activity in the Housing Trust Fund for 2011 has been recorded in accordance with appropriate accounting standards. In connection with the Housing Trust Fund finding, it is important to note that this fund first appeared on the City's financial statements in 2005 and until 2010, the manner in which the City was recording the transactions was never questioned. During the course of the audit, he inquired about the appropriateness of the accounting treatment which resulted in the change for 2010.

Mr. Nelson also responded to Mayor Bellamy regarding the City's Fund Balance and the importance that there be a plan to retain the 15% of Fund Balance.

Mayor Bellamy was very much concerned regarding the lateness of the audit. She felt the public trust and the LGC relies on City government to meet their deadlines. She expressed concern to the independent audit firm about the need to stay on schedule and to communicate to Council in a timely manner regarding the potential for future delays and other matters of a material nature.

Mayor Bellamy said it is am important part of the Council's responsibility to address our external auditors about the City's finances, and noted that she would respond to the correspondence by the LGC outlining each of the concerns raised.

B. ECONOMIC STIMULUS PACKAGE UPDATE

RESOLUTION NO. 11-10 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A CHANGE ORDER TO INCREASE THE CONTRACT WITH HICKORY CONSTRUCTION COMPANY FOR THE NORTH FORK WATER TREATMENT PLANT PUMPING SYSTEMS IMPROVEMENTS PROJECT

American Recovery & Reinvestment Project Manager Brenda Mills said that as part of city staff's recurring American Recovery & Reinvestment (ARRA) update to Asheville City Council, staff is seeking Council approval of a resolution authorizing the City Manager to execute a change order in the amount of $3,161 to increase the construction contract for Hickory Construction Company from $328,474 to $331,635 for the North Fork Water Treatment Plan (WTP) Pumping Systems Improvements Project.

The Water Resources Department applied for and was awarded ARRA funding in the amount of $510,000 for the North Fork WTP Pumping Systems Improvements project through NCDENR's Drinking Water State Revolving Fund (DWSRF). This loan is a 50% grant with a 50% loan requirement. Since applying for ARRA Funding, the project scope has changed to reduce the amount of work to be done and subsequent cost. Therefore, the total project cost is significantly less than the approved $510,000.

Water Resources issued formal bids in August 2009 for construction services relating to this project. The bid was awarded to the lowest responsible bidder, Hickory Construction Company, in the amount of $328,474.

In order to close out the project, a change order is needed to increase the contract amount by an additional $3,161 for a total contract amount of $331,635. The change order is needed to accommodate: (1) additional conduit and handholes to the North Fork WTP front gate and (2) the lack of existing wiring at the pump skids.

This project is part of City Council's strategic plans to improve city infrastructure and receive ARRA Funding to aid in economic recovery and operated in a fiscally responsible manner.

Pros:

- Approval of this action will allow the city to close out the North Fork WTP Pumping Systems Improvements project.
- This project is 50% funded from ARRA Funding, including the additional $3,161.00 needed for the change order.

Cons:

- Without approval of the change order, the project will not be completed.
- The Water Resources Department will have to fund 50% of the change order cost which will come from the Water Capital Projects fund.
- The change order will require staff to complete additional paperwork for the State when requesting reimbursement.

The City will be responsible to pay the loan amount not covered by ARRA Funding, which is 50% of the total project cost including the change order amount of $3,161. The funds needed for the change order are available in the ARRA capital project. The construction of the projects are substantially complete, and when these new pumps are in service an 80% reduction in power consumption will be realized.

Staff recommends approval of the resolution authorizing the City Manager to execute a change order in the amount of $3,161 to increase the construction contract for Hickory Construction Company from $328,474 to $331,635.

Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-10. This motion was seconded by Councilman Russell and carried on a 6-1 vote, with Mayor Bellamy voting "no".

RESOLUTION BOOK NO. 33 – PAGE 307

C. 12-MONTH REVIEW OF REVISION TO THE SIDEWALK ORDINANCE

Public Works Director Cathy Ball said that the purpose of this report is to provide a 12 - month update to City Council regarding the changes to the sidewalk ordinance approved by City Council on December 15, 2009.

On December 15, 2009, City Council amended the Unified Development Ordinance (Section 7-11-8) pertaining to sidewalks. Council also approved a resolution amending the Fees and Charges Manual to allow developers eligible for the fee-in-lieu of construction to pay 50% of the fee if sidewalk is only required on one side of the street.

The specific changes included the following:

1. Consolidate the geographical areas where the fee-in-lieu of construction funds can be spent.
2. Allow developers eligible for the fee-in-lieu of construction to pay 50% of the fee if sidewalk is only required on one side of the street.

3. Provide the ability for the fee-in-lieu of construction amount not to exceed 15% of construction costs even if the sidewalk is shown as a needed linkage on the Pedestrian Thoroughfare Plan.

Unfortunately due to the low amount of development that has occurred over the past year, we do not have much to report. During the past 12-months we have only received a total of $57,806 in the citywide fee-in-lieu-of fund with most of the money ($54,091) coming from the Thoms Estate project in North Asheville.

We do not feel that enough development as occurred for us to evaluate the impact of the change. We have not received any negative comments from the public regarding these changes.

This action complies with the City Council Strategic Operating Plan of sustainability by reforming and streamlining the development review process.

Pros and Cons:

- We have not had enough development activity to provide a complete assessment of the changes.

During the past 12-months we have only received a total of $57,806 in the citywide fee-in-lieu-of fund with most of the money ($54,091) from the Thoms Estate project in North Asheville.

It was the consensus of Council to have staff provide another update in two years.

D. UPDATE ON HANDICAPPED ON-STREET METERED PARKING IN DOWNTOWN ASHEVILLE

Director of Transportation Ken Putnam said that the purpose of this memorandum is to update City Council on recent action that has occurred since October 26, 2010 regarding handicapped on-street metered parking in downtown Asheville.

At the October 26, 2010, meeting, City Council directed staff to proceed with requiring meter activation by all users effective November 12, 2010, provide Battery Park Apartment residents a discounted monthly parking rate at the Civic Center Parking Garage (50% discount), provide an update in January 2011 with feedback from residents and staff on how the changes are going, continue negotiations with AT&T to secure parking spaces for public use on their surface parking lot, allow the Battery Park Apartment residents a one month fee waiver to park free in the Civic Center Parking Garage until December 19, 2010, look at our parking meters for ADA compliance, and continue discussions with the management of Battery Park Apartments.

Following is a summary of recent action steps that have been accomplished and/or are in process:

- 700+ educational flyers were placed on vehicles giving notice of the subject change between October 28, 2010 and November 11, 2010 (averaged 65 flyers per day).
- 92 warning citations with educational flyers were issued between November 12, 2010 and November 18, 2010 (averaged 15 citations per day for 6 days).
- 2,060 overtime citations were issued between November 19, 2010, and December 31, 2010 (averaged 90 citations per day for 23 days).
- Five percent of the overtime citations issued (101 citations) involved vehicles displaying a handicapped placard and/or license tag (Educational flyers were included with the citations).
- As of January 1, 2011, the educational flyers are no longer placed on windshields.
- Staff met with the Battery Park Apartment management company on November 5, 2010, to update them on the City's action plan and to ask them directly if they planned on doing

anything to ease the burden on their residents. They responded in writing on December 15, 2010, and stated that their first-come, first-served 24-space off-street surface parking lot would continue to be available as in the past. In addition, their property manager and service coordinator continually work on a case-by-case basis with the residents to link them with public and medical transportation services. They offered no other suggestions to help.

- Staff met with a group of the Battery Park Apartment residents on November 8, 2010, to discuss concerns and various options to help ease the burden.
- The Mayor and staff met with a concerned citizen on November 23, 2010, to discuss the overall policy decision and possible implications.
- Staff met with Bart Floyd on December 2, 2010, to discuss various options to make it easier to "feed" the parking meters.
- Six Battery Park residents have taken advantage of the discounted monthly parking rate in the Civic Center Parking Garage.
- Negotiations with AT&T continue. Staff is currently pursuing a project that includes taking down two existing buildings that are located at 68 and 76 Haywood Street due to their age and constructing a paved, surface parking lot that meets current Unified Development Ordinance standards. When the project is completed, staff hopes to have at least 75 parking spaces that could be used for hourly parking controlled by a pay-by-space machine. This action should provide much needed parking relief in the Grove Arcade area. The target completion date of the subject project is July 2011.
- The Building and Safety Department is reviewing our existing parking meters for ADA compliance.

Since the actual enforcement began, staff has not received very much feedback, positive or negative, regarding the changes. In addition, we have not received any appeals of parking citations involving handicapped placards and/or license tags. Staff continues to look for ways to improve any additional burdens that the changes have placed on people with disabilities including meeting with citizens and listening to their suggestions.

In the memorandum dated October 26, 2010, he suggested that monthly on-street parking permits along the area immediately adjacent to the Battery Park Apartment building (includes 14 on-street metered parking spaces) could be considered and the current rate ranges from $30 to $45 per month. Once the memorandum became public record, there was some resistance from the business community. Another suggestion would be to create up to four designated handicapped parking spaces in the same area. Although we could not guarantee these parking spaces for Battery Park residents, it would provide more opportunities for a "close by" parking space.

City staff recommends City Council direct staff to pursue creating up to four designated handicapped parking spaces along the area immediately adjacent to the Battery Park Apartment building.

Ms. Raelin Hansen, speaking on behalf of the Battery Park Apartment residents, said that since the City has made parking available for the Battery Park residents at the Civic Center Parking Garage at a reduced cost, two elderly individuals have fallen walking from the Civic Center to the apartments. She explained how the incline from the Parking Garage has a slight grade and in inclement weather it is difficult to walk that distance. She felt there should be more handicapped designated parking spaces close to the Apartment Building (designated for Apartment Building residents), noting that they have 50-60 people who have cars with only 24 parking spaces provided by the Apartment Building. Also, she asked if the City could discuss with apartment management to limit the number of residents living there under HUD guidelines.

In response to Mayor Bellamy, Mr. Putnam said that he will continue to meet with citizens and listen to their comments.

Councilman Bothwell asked how many of the 50-60 people who live in Battery Park Apartments who have cars are handicapped. Mr. Putnam said that he has requested that information from the Battery Park Apartment management company but has not been furnished with that information. Councilman Bothwell suggested he speak with some of the residents in the Apartment Building who may be able to provide that information to him.

Councilman Russell moved to direct City staff to create up to 4 designated handicapped parking spaces along the area immediately adjacent to the Batter Park Apartment Building, with two of those spaces currently designed as motorcycle parking. This motion was seconded by Councilman Davis and carried unanimously.

In response to Mayor Bellamy, Mr. Putnam said that the money for the signs would come from the Parking Enterprise Fund.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER FINANCING OF A NEW PARKING FACILITY LOCATED AT 51 BILTMORE AVENUE

RESOLUTION NO. 11-11 - RESOLUTION RE-SCHEDULING PUBLIC HEARING FOR 51 BILTMORE PARKING DECK FINANCING

RESOLUTION NO. 11-12 - RESOLUTION AUTHORIZING EXECUTION OF SECOND AMENDMENT TO DOWNTOWN DEVELOPMENT AGREEMENT

RESOLUTION NO. 11-13 - RESOLUTION APPROVING AN INSTALLMENT FINANCING CONTRACT AND A DEED OF TRUST REGARDING A NEW PARKING FACILITY LOCATED AT 51 BILTMORE AVENUE

City Attorney Oast said that in connection with the City's participation in the 51 Biltmore Parking Deck Project, two ancillary resolutions should be considered.

The first resolution is a procedural resolution acknowledging the circumstances that led to the public hearing on the proposed financing not being held on January 11, 2011, as originally scheduled. This resolution simply reschedules the public hearing, and ratifies the actions taken by staff to reorganize and re-advertise the public hearing for January 25, 2011.

The second resolution authorizes the amendment of the Downtown Development Agreement to extend certain time periods set out therein, including the options for the purchase of the property and the "Decision Period." The previous extension was until December 31, 2010. This resolution recognizes that the parties have made significant progress in furtherance of the Project, including progress towards securing financing (public and private), obtaining construction bids, and developing legal documents. Because the financial, legal, and construction arrangements have not yet been finalized, this proposed second amendment is contemplated as an interim extension. A final amendment to the Downtown Development Agreement will be considered at or near the time of closing, after the legal and financial arrangements have been finalized, which will be more comprehensive.

Adoption of the resolution rescheduling the public hearing is recommended prior to proceeding with the public hearing. Adoption of the resolution authorizing the Second Amendment to the Downtown Development Agreement is recommended in order to allow staff to continue its work on the Project, and to extend several time periods in the Agreement. Action on this resolution may be taken after the public hearing.

When Mayor Bellamy asked for public comment, no one spoke.

Mayor Bellamy said that members of Council have previously received a copy of resolution rescheduling the public hearing for 51 Biltmore Parking Deck financing and it would not be read.

Councilman Smith moved for the adoption of Resolution No. 11-11. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 308

City Clerk Burleson reported to the City Council that notice of a public hearing to receive public comments on the proposed execution and delivery by the City of (a) an Installment Financing Contract to pay the capital costs of acquiring and constructing a new parking facility located at 51 Biltmore Avenue in the City and (b) a Deed of Trust and Security Agreement to create a security interest in the real property on which the parking facility will be located and the improvements thereon was published on January 14, 2011, stating that the City Council would hold a public hearing thereon on January 25, 2011 at or about 5:00 p.m.

Director of Administrative Services Lauren Bradley said that this public hearing is to receive public comments on the proposed execution and delivery of an installment financing contract to construct a new parking facility located at 51 Biltmore Avenue, and for Council to consider a resolution authorizing the installment financing contract for the project.

Under the provisions of Section 160A-20 of the General Statutes of North Carolina, installment financing contracts that involve land require a public hearing in which the public may comment on the proposed financing and project. On December 14, 2010, City Council approved a Resolution authorizing the negotiation of an installment financing contract for the construction of a new parking facility at 51 Biltmore Avenue and set the public hearing date for January 11, 2011. Due to a legal advertising error and the cancellation of the January 11, 2011, meeting because of inclement weather, all public hearings scheduled for that date were rescheduled to January 25, 2011.

Ms. Bradley said that her presentation will include an overview of the project, the proposed financing and the feasibility of paying for the project.

She showed a rendering of the proposed project. The "51 Biltmore Project" includes both public and private development components on one shared site. The site will house a city-owned public parking garage, a privately-owned and operated Aloft hotel, and privately-owned commercial retail space along the front of the property. The City is responsible for constructing and operating the public parking garage. A private developer, McKibbon Hotel Group, is responsible for construction and operating the hotel and retail space. What makes this project a "partnership" is the mixed-use nature of the site. Part of the hotel will sit above the city's parking garage, and the retail space will wrap around the garage façade. The third component of the project is some land and air rights that are being retained by the property owner, Public Interest Projects (PIP), for a potential future workforce housing development.

She explained why the City pursed a shared site for the parking garage. Stand alone parking garages tend to deactivate street-level activity around the structure since people only enter and exit the structure for one reason: parking. This can have a negative impact on surrounding businesses and an area's overall economic growth. Stand alone garages are often less attractive than surrounding buildings, and they also limit the tax base potential of the property on which they sit since public parking garages don't pay property taxes. By mixing uses on a parking garage site, a community can make efficient use of limited resources (like land and infrastructure). At the same time, the community can promote economic development and tax base growth by incorporating other types of development (like residential units, offices, retail, etc.) into the parking garage design. The 51 Biltmore parking garage site accomplishes those objectives. The City is not paying for any portion of the hotel or the hotel's parking needs. The

Developer is paying for the increased structural costs in the garage to support the hotel above it. No economic incentive deals for the developer.

She briefly reviewed the project history. In 2006 City Council adopted a Parking Action Plan that included an item to pursue a parking garage in the area of Biltmore Avenue and directed staff to look at a public/private partnership to do that. Prior to 2006 we had heard from the community and stakeholders downtown that there was a need for Council. By adopting the Plan, Council wanted to put some actionable items for staff to work on. In May of 2008, the City commissioned a parking study that evaluated the demand for parking versus the supply in the Central Business District. The study determined that the area around Biltmore Avenue had a peak deficit of parking in the amount of 622 spaces and a normal deficit of 476 parking spaces. The proposed location of the 51 Biltmore parking garage is a surface parking lot with approximately 100 parking spaces. Given economic conditions and related project extensions, staff updated the original parking demand study data in 2010. The updated study suggests that the deficiencies in this zone are not drastically changed in the new projections, and that the parking system demands are generally consistent with the original study. The City has not commissioned a study to determine how other transportation alternatives, like a downtown shuttle, would impact parking demand in the Central Business District.

She reviewed the following parking garage specs:

Total Number of Spaces: 412

Number of Full-Time Spaces Utilized by Hotel 35
Monthly Rate Paid by Hotel for Full-Time Spaces $140/month per space

Number of Part-Times Spaces Utilized by Hotel 80
Monthly Rate Paid by Hotel for Part-Time Spaces
(4:30 pm – 10:00 am) - $70/month per space
(7:00 pm – 10:00 am) - $60/month per space

Using a map, she showed a footprint of the property. PIP owns the property at 51 Biltmore. Cascade Mountain Properties owns an adjacent piece of property where the Hot Dog King is currently located. The City is purchasing a portion of 51 Biltmore from PIP, subjacent (i.e., underground) rights under adjacent property, and the Hot Dog King property from Cascade Mountain Properties for the parking garage. The City's portion of the property at 51 Biltmore is about 2/3 of the parcel. McKibbon Hotel Group is purchasing a portion of the 51 Biltmore property and air rights from PIP for the hotel and retail development. PIP is retaining a portion of the 51 Biltmore property and air rights for a potential future workforce housing development. After the parties close on the land, the site and its structures will become part of a condominium where each party owns its respective share. In other words, the City will own and operate the garage; McKibbon will own and operate the hotel and retail space, and; PIP will own its property and air rights.

She explained the history of how the transaction was negotiated to know how we arrived at the purchase price for the land. When PIP, the owner of the property at 51 Biltmore Avenue, approached the City with this partnership, they wanted to have joint ownership in the operations of the parking garage. They proposed that they would invest in the property, the City would build the parking garage and both parties would share in the revenues. The City was not open to this proposal because the majority of the risk was on the City, not PIP. As a second option, PIP offered to lease the property at 51 Biltmore Avenue for sixty years for $180,000 per year. Following financial analysis, the City determined that it saved the City approximately $1 million dollars over the projected life of the deck to purchase the property rather than lease it. PIP agreed to sell the property for $3,110,000. The purchase price of the land is higher than the appraised value. After the City determined that it was a better financial decision for the City to

purchase the property, the owner agreed to sell but with the restriction that they recoup the capital gains taxes.

Staff later determined that the addition of the Hot Dog King property adjacent to 51 Biltmore Avenue might save the City significant construction costs by avoiding further excavation at the 51 Biltmore site. Engineering estimates indicated that the City would save about $5,200 per parking space or $2,272,400 by utilizing the Hot Dog King property. In light of the potential savings to the City, PIP sought and obtained a contract for the Hot Dog King property in the amount of $1,450,000. Although this is higher than the appraised value, the net construction cost savings after purchasing the Hot Dog King property is approximately $800,000.

In the case of the 51 Biltmore parking garage, the City believed the negotiated price of the land was a fair price because of the savings it yielded in construction costs and long-term lease costs. In addition, the City had to consider if it was feasible to purchase enough land to construct a garage in another suitable location, and what those associated costs might be. Based on the availability of land and downtown parking needs, the City pursued the project at 51 Biltmore because it believed it was best suited to meet the public's needs for parking and could provide a mixed-use public parking garage.

She said that the total costs projected for the construction is $14,100,000, which is lower than the $14,800,000 reported in December.

She explained that the private placement installment financing contract consists of (1) construction draw-down financing; (2) 1% interest rate, two-year term; and (3) longer-term financing would likely be timed to include integration with other large projects (i.e., City Hall).

Using a chart, she explained the project feasibility. In North Carolina, local governments can establish separate enterprise funds for any activity for which a fee is charged to external users for goods or services. For these types of enterprise funds, fees and charges are established to cover the operating and capital expenses of the activity so that the fund is self-sufficient and does not require support from other sources. Using this model, Asheville operates a Parking Services Enterprise Fund for parking. This fund uses the fees and fines captured from on-street metered parking, parking garages and surface lots to cover the operating and capital expenses of the parking system. The fund does not reply on property tax dollars for support.

The new parking garage at 51 Biltmore would be financed over a period of 25 years. The debt service would be paid for from the parking revenue generated by the new garage along with the positive cash flow from the existing Parking Services Enterprise Fund. Detailed financial projections anticipate that these revenues are more than sufficient to cover these debt service payments as well as other capital expenses incurred by the parking system over the life of the loan.

The chart illustrates a financial projection for the Parking Services Enterprise Fund including operation of the 51 Biltmore parking facility. One column shows the pro-forma for the facility in year 5 of its operation. In that year, the parking garage at 51 Biltmore is expected to generate $546,000 in revenue over expenses before the debt service payment. Over the life of the loan, the annual debt service payment (principal and interest) for the garage is anticipated to be $1,105,000. All of the revenue generated by the facility at 51 Biltmore would be applied toward the debt service payment.

Columns on the char show the audited results of the Parking Services Enterprise Fund during the last three years. From 2008-2010, the Parking Services Enterprise Fund generated an average of $1.3 million annually in operating income. Over this period of time, the City made the last of its debt service payments on its existing parking garages and transferred $248,000 each year to the Transit Fund. In 2011, the transfer to the Transit Fund increased to $375,000. At the same time, in anticipation of building a new parking garage, the City invested significant capital

dollars in its existing parking garages to allow for future cash flow to support a new facility. These expenses, considered one-time or infrequent expenses, are not expected to occur again at those levels within the next ten years.

Taking this into consideration, one of the columns shows what the performance of the Parking Services Enterprise Fund would look like if the system performed at 2010 levels and included the 51 Biltmore parking garage and associated debt service payment. Factored into this analysis is an annual amount that would be set aside in the fund's reserves for future capital maintenance on all four garages (Rankin, Wall Street, Civic Center and 51 Biltmore). Under this scenario, the Parking Services Enterprise Fund would have experienced $411,451 in revenue over expenditures.

As the garage operates beyond year 5, the facility's operating revenue improves in an anticipation of parking rate increases. As the facility's revenues improve, and if the parking system's performance remains consistent, it is expected that the positive cash flow in the Parking Services Enterprise Fund will also improve.

Over a 50-year period, the parking facility at 51 Biltmore is projected to generate $23 Million in positive cash flow. Positive cash flow begins after year 25, with the debt service is paid. Fund balance in the Parking Fund at Fiscal Year 2009-10 year-end was $2.7 Million.

Other financial considerations (estimates) include (1) City property taxes: $94,000 annually (currently receives $7,000 in taxes); (2) County property taxes: $118,000 annually; (3) City sales taxes: $13,500; and (4) Occupancy taxes: $200,000.

In addition to the increase in city property tax revenue, the Asheville City School System is expected to receive $33,750 in additional property tax revenue. Buncombe County is anticipated to receive an additional $118,125 in property tax revenue. The sales tax impact to the State of North Carolina is estimated to be $368,736, $13,500 of which will be returned to the City of Asheville, and hotel occupancy taxes will yield $200,250 to the Buncombe County Tourism Development Authority.

The project during construction is anticipated to support 405 jobs and $15.3 million in personal income. This income will generate $4.3 million in income tax, $2.9 million in Federal collections and $1.4 million in State collections. After construction is complete, it is expected the project will support 118 jobs and $3.2 million of personal income. This income will generate $1.6 million in income tax, $795,000 in Federal collections and $860,000 in State collections.

Staff is asking Council to consider (1) a resolution extending the "decision period" in the Downtown Development Agreement to June 2011 and options on the property until March 2011; and (2) a resolution approving an installment financing contract for the construction of a parking facility at 51 Biltmore Avenue.

Staff said that if the resolutions are approved by City Council, the next steps would be (1) LGC consideration in February of 2011; (2) loan and land closing in mid-February; and (3) construction to begin in March, 2011.

Mr. John McKibbon, representing McKibbon Hotel Group, said that he has 30 years experience in the hotel business. He felt this project will bring in tourism and is a good way to grow the community. He looked forward to working on this public/private partnership.

Mr. Pat Whalen, President of PIP, explained the wisdom of prior city councils in constructing parking garages. This project costs zero tax dollars, pays for itself over time, creates badly needed jobs, increases density, increases tax revenues and will create tax value around it. The site will pay more in City property taxes in its first year than it paid over the previous 25 years. This project has been worked on and analyzed by staff in numerous public meetings over

the last four years. The project fulfills numerous plans to address the parking shortage on south side of Patton. He urged Council to support this project.

Mayor Bellamy opened the public hearing at 6:47 p.m.

The following individuals spoke in support of the 51 Biltmore Avenue parking facility for various reasons, but basically due to the need of parking in that area (also acknowledging the need for other transportation alternatives):

Ms. Laurie Masterson, downtown property owner (Laurie's)
An Asheville resident
Mr. Ed Byers, downtown property owner (Ariel Craft Gallery)
Mr. John Cram, downtown property owner (Blue Spiral 1)
Ms. Kim McGuire, Asheville resident
Mr. Jim Samsel, downtown property owner (Samsel Architects)
Mr. Jimi Rentz, downtown property owner (Barley's)
Ms. Leslie Anderson, Asheville resident
Mr. John Ellis, Director of Diane Wortham Theatre at Pack Place
Mr. Dwight Butner, downtown property owner (Vincenzo's) and Chairman of the Downtown Commission
Mr. Harry Weiss, Asheville resident
Ms. Karen Tessier, Asheville resident
Mr. David Nutter, resident on Flint Street
Mr. Bill Griffin, downtown property owner (Four Corners)
Mr. Joe Minicozzi, Executive Director the Downtown Association
Mr. Eberhard Heide, downtown property owner (Asheville Wine Market)
Mr. Charlie Ball

The following individuals were opposed to the 51 Biltmore Avenue parking facility, for various reasons, but basically wanting to look at other transportation alternatives that will reduce the need for automobiles downtown and reallocation of parking revenue for other needs:

Mr. Robert Eidus, resident on Albemarle Place
Ms. Linda Brown, Asheville resident
Ms. Laura Brano, resident on Highland Street
Mr. Donald Warren, Kenilworth resident
Mr. Mark Bloom, Asheville resident
Mr. Bruce Emory
Mr. Karl Caterjohn, resident on Von Ruck Court
Mr. Jay Quinn, North Asheville resident
Mr. Chris Pelly, President of the Haw Creek Community Association and member of the East Asheville Sidewalk Initiative
Ms. Kimberly Kabicki
Mr. James Sheeler, Asheville resident
Mr. Bill Maloney, Asheville business owner
Ms. Megan Maloney, Asheville resident

At 8:07 p.m., Mayor Bellamy closed the public hearing.

Throughout discussion, Ms. Bradley, Transportation Director Ken Putnam, Public Works Director Cathy Ball, Downtown Master Plan Project Manager Sasha Vrtunski, responded to various questions/comments from Council, some being, but are not limited to: do we have the data showing how the construction of the Buncombe County parking deck on College Street has changed the parking deficit; what is the occupancy that is assumed over the life of the deck; what kind of prospects do we have that the prices will not inflate over the course of the project; has any thought gone into using the Business Improvement District as an assessment base for financing

the project; and how much will McKibbon be paying to reinforce the parking deck to support the hotel.

Mayor Bellamy said that members of Council have previously received copies of the resolutions and they would not be read.

Councilman Russell moved to adopt Resolution No. 11-12, authorization of the second amendment to the Downtown Development Agreement. This motion was seconded by Vice-Mayor Newman.

Vice-Mayor Newman believed the single greatest threat to the environmental integrity of Buncombe County and our region is the pattern of sprawl development. A single solution is promoting a successful pattern of development downtown of mixed use. He is very strong supporter of greater investment in transit and continues to support using some of the Parking Funds for transit. He noted that even the very conservative financial analysis shows if we move forward with this project we will still have a net positive source of revenue in our Parking Fund of over 400,000 a year and that number will grow every year. This project will not consume all of the funds that we have that could be contemplated for other transportation projects in Asheville. He felt this project represents a very sound investment for Asheville. He hoped we would discuss at our retreat ways to implement other approved plans, while focusing on other key steps for multi-modal transportation in Asheville.

Councilwoman Manheimer was disappointed to see the dissemination of information that compares funding this project vs. sidewalks, for example. There are projects that generate their own revenues and pay for themselves and this is one of them. Sidewalks do not generate anything. Sidewalks need to be funded in a different way. She also noted that if we were to back out of the contracts (option to purchase, commercial realty purchase agreement and partnership agreement) already signed with McKibbon and PIP, we would be breaching those agreements and that is bad business conduct. She agreed with Vice-Mayor Newman about discussing how other funds could be used to support sidewalks, greenways, etc.

Councilman Smith felt there are many positive aspects this project can bring to Asheville; however, he was concerned about spending priorities. If we already had committed dedicated funds for sidewalks, bike lanes, greenways, etc. he could support the project. However, we have not. Therefore, he could not support the project. He looked forward to finding a way to fund these priorities next year.

Councilman Bothwell felt the only facts everyone agrees on is the price tag of $14.1 Million and 412 parking spaces. Beyond that everything involves assumptions and points of view. The truth is if we are paying $1 Million per year in debt service, that is $1 Million that could be spent somewhere else. Arguments have been that this project will bring substantial economic benefit to the City, but sidewalks raise the value of every house in the neighborhood, and businesses who look to locate here might want other modes of transportation, such as bike lanes, sidewalks, etc. He has asked repeatedly for a study for a shuttle system, noting that the Downtown Master Plan says it should be a short-term project to create a circulating shuttle. Those circulating shuttles will ease up City parking city-wide. In these uncertain financial times, he felt it would be appropriate to hold off and don't borrow that money for the parking deck.

Councilman Davis agreed with Councilwoman Manheimer that this is not a about funding one thing or another. He did invest in downtown over 26 years ago and felt this is a good investment now. He is very supportive of this partnership in a part of town that will grow.

The motion made by Councilman Russell and seconded by Vice-Mayor Newman carried on a 5-2 vote, with Councilman Bothwell and Councilman Smith voting "no."

Councilman Russell moved to adopt Resolution No. 11-13, approving an installment financing contract and a deed of trust regarding a new parking facility located at 51 Biltmore Avenue. This motion was seconded by Vice-Mayor Newman.

Mayor Bellamy reiterated that there are no property taxes in any scenario being put forth in the parking deck. If taxes are increased, it won't be because of the deck. We are constructing the deck from fees from people who use our decks, meters, and those who pay their fines. She pointed out that the City of Asheville has been conscious on where we place our parking meters. We don't put meters in neighborhoods, and we have heard from businesses in Biltmore Village and West Asheville that if the City places meters in front of their businesses it will negatively impact their businesses. That leaves getting all the money from the parking decks, the parking meters and the parking tickets from downtown. It makes sense to her that we use money collected from downtown back into parking for downtown. She, too, supports subsidizing transit every year. Seventy percent of the individuals who use transit in our community do so as it's their only means of transportation. City Council has made a commitment to fund transit and every year Council continues to increase how much goes toward transit. We also make as many incremental improvements as we can afford. Through the many, many hours of developing the 2025 City Plan, this site called for a deck. We need to meet the needs of the growing economy by keeping some of the old paradigm and bringing in the new. Thinking about the Sullivan Acts, City Council does not want to start taking money from the Parking Enterprise Fund without clearly defining what the funds will be used for. She supported the parking facility. She encouraged the community to talk with our legislators, with the same level of passion as they do for sidewalks, to ensure that as they look to trim their budget, they don't hurt our budget, i.e., by taking away our Powell Bill Funds, Safe Walks to School funds, etc.

The motion made by Councilman Russell and seconded by Vice-Mayor Newman carried on a 5-2 vote, with Councilman Bothwell and Councilman Smith voting "no."

RESOLUTION BOOK NO. 33 – PAGE 314

At 9:00 p.m., Mayor Bellamy announced a short recess.

B. PUBLIC HEARING TO CONSIDER REZONING 13 ACRES ON ORCHARD STREET FROM INDUSTRIAL DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT

ORDINANCE NO. 3941 - ORDINANCE TO REZONE 13 ACRES ON ORCHARD STREET FROM INDUSTRIAL DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 9:12 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone 13 acres on Orchard Street from Industrial District to RM-6 Residential Multi-Family Low Density District. This public hearing was advertised on January 14 and 21, 2011.

He said that this 13-acre site is located near the very westernmost limits of the City's Extraterritorial Jurisdiction (ETJ), in an area marked by a mix of sparse development and higher-intensity development. This part of the ETJ was established in May of 2001, and the subject property, along with the adjacent land to the northwest, north, and northeast, was zoned Industrial. The combined area, totaling roughly 100 acres, was identified to have potential for industrial development owing to its largely vacant condition, as well as its proximity to Interstate 40 and Smoky Park Highway.

According to the Unified Development Ordinance (UDO)'s Article 8, the purpose of the Industrial District is to "reserve land for existing and future industrial activities and for land uses that support industrial activities. Development standards are established to ensure that land uses located outside the Industrial District are not adversely affected by the negative impacts of industrial uses. Industrial Districts shall be located to capitalize on existing infrastructure where possible, such as transportation facilities and utilities. Supporting land uses are characterized as providing supplies, raw materials, transportation, or storage services to industries or providing services to industrial employees."

In 2005 the owner of the 31 industrially zoned acres off Dogwood Road closest to the interstate petitioned for rezoning to RS4. The rezoning was approved, though City Council and City staff recognized that such a rezoning went against a Comprehensive Plan policy stating that Industrially zoned land should be preserved for industrial uses, a policy further emphasized in the Sustainable Economic Development Strategic Plan. The 31 acres were subsequently conditionally zoned to RM-6 in 2007, and are currently under development as the Vistas of Westfield planned (residential) community.

The subject site of this report is 13 acres of the remaining 70+ industrially zoned acres owned by members of the Roberson family. The properties have been in the family for a number of generations. Phillip Roberson, one of the petitioners, is interested in developing the property in such a way that family members will continue to be able to enjoy and appreciate the family property. Namely, he would like to build a residence, but residential uses are not permitted in the Industrial District. Accordingly, he is seeking a rezoning to RM-6 (Residential Multi-Family Low Density), a district which would allow such development.

The stated purpose of the RM-6 district is "to permit a limited range of low density multi-family housing types along with single-family detached and attached residences. [...] This district is also intended for areas where low density multi-family development is appropriate but where environmental constraints and infrastructure limit development potential."

The particular 13 acres included in this petition can aptly be described as having environmental constraints. The center of the site is a knoll, which is surrounded on three sides by creeks and drainages requiring aquatic buffers and associated with flood hazard areas. Further, a sewer line bisects the site, and the high ground of the site is separated from Dogwood Road (the only adjacent paved road) by Pole Creek, a significant perennial stream in a substantial gully.

As is noted above, the requested rezoning would not be consistent with a Comprehensive Plan policy stating that Industrially zoned land should be preserved for industrial uses. However, there are multiple recent precedents for City Council approval of similar zoning changes. At the August 2009 meeting of Asheville City Council's Planning and Economic Development Committee, City staff discussed these cases, and reviewed its practice of considering each such rezoning petition on a case-by-case basis, under close consultation with the Office of Economic Development. This approach was adapted following earlier stakeholder discussions acknowledging changing views about the future of this region's economy.

Staff does feel that the 56-acre area to the northeast of the subject site still retains potential for industrial development, particularly in light of N.C. Dept. of Transportation's (DOT) recent initial steps to examine the ramifications of an I-40 interchange at Liberty Road, which borders the eastern edge of this property. One scenario would involve the construction of a new road through this area to provide a more direct connection to Smoky Park Highway. Even under this scenario, however, the environmental constraints of the 13-acre subject area make it a less suitable site for an industrial tenant.

Staff has received two communications from neighboring property owners. One was simply seeking information and did not express any objection. The second owner was primarily concerned with whether the rezoning might have an impact on the potential future DOT project

mentioned above. DOT staff has indicated that the zoning designation of this property would not affect the implementation of the interchange project.

At their December 1, 2010, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the rezoning. The public hearing involved no speakers other than the applicant.

When City Council voted to approve the downzoning of the 31-acre Vistas of Westfield property to the north of the subject site on October 12, 2005, staff noted that it could be appropriate to reconsider a downzoning of some of the remaining industrially zoned property, based on the additional anticipated residential presence. The petitioner's request has prompted just such a reconsideration, and staff feels it is justified for the specified fraction of the property.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Proposed zoning district is compatible with the surrounding zoning.
- Environmental constraints make this site less than ideally suited for Industrial tenants.
- The subject area is removed from the potential future interchange at Liberty Road.

Con:

- The Comprehensive Plan, as well as the Sustainable Economic Development Strategic Plan, includes a stated policy to preserve Industrially zoned land for industrial uses.

Staff has concerns about rezoning Industrially-zoned land, due to the policies against such action stated in the Comprehensive Plan and other plans. Both the Planning and Zoning Commission and City Council have, however, supported similar rezoning in the recent past, and since 2006 stakeholders have not expressed significant concern about the rezoning of such land for other uses. If the City Council wishes to consider this rezoning independent of the existing policies, staff feels a good case can be made for recommending approval.

Mr. Phillip Roberson, property owner, explained how the properties have been in the family for a number of generations and hoped Council would approve the rezoning.

Mayor Bellamy closed the public hearing at 9:17 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Newman moved for the adoption of Ordinance No. 3941. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 428

C. PUBLIC HEARING TO CONSIDER A CONDITIONAL ZONING REQUEST FOR THE PROJECT IDENTIFIED AS BARNES DUPLEX LOCATED AT 12 WINCHESTER PLACE FROM RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT FOR AN EXISTING DUPLEX, AND A MODIFICATION REQUEST TO ALLOW AN ENCROACHMENT INTO THE FRONT SETBACK

ORDINANCE NO. 3942 - ORDINANCE TO CONDITIONALLY ZONING REQUEST FOR THE PROJECT IDENTIFIED AS BARNES DUPLEX LOCATED AT 12 WINCHESTER PLACE FROM RM-8 RESIDENTIAL MULTI-FAMILY

MEDIUM DENSITY DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT FOR AN EXISTING DUPLEX, AND A MODIFICATION REQUEST TO ALLOW AN ENCROACHMENT INTO THE FRONT SETBACK

Mayor Bellamy opened the public hearing at 9:17 p.m.

Urban Planner Jessica Bernstein said that this is the consideration of an ordinance to conditionally zone the project identified as Barnes Duplex, located at 12 Winchester Place, from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District for an existing duplex, and a request for a modification to allow an encroachment into the front setback. This public hearing was advertised on January 14 and 21, 2011.

Ms. Bernstein said that the applicant is requesting a Conditional Zoning for one parcel located at 12 Winchester Place from RM-8 (Residential Multi-Family Medium Density District) to RM-16 (Residential Multi-Family High Density District) in accordance with Section 7-7-8 of the Unified Development Ordinance (UDO). When the new property owner applied for permits to split the utilities in this existing duplex, it was discovered that the multi-family use was never legally established. The conditional zoning will remedy this non-conforming situation.

The site consists of a single parcel located at 12 Winchester Place with an area of approximately .21 acres. The lot and surrounding area is currently zoned RM-8. The immediate neighborhood is residential but commercial uses along Haywood Street are proximate (approximately 300 feet to the north – zoned CBII).

The site contains a two-story residential structure (approximately 1,389 square feet) and two detached accessory structures (116 and 238 square feet). The structure was built circa 1950 as a single family house and at some point was converted into a duplex. The applicant is proposing to maintain the use as a duplex and is not proposing any changes to the site. Access to the structure will remain in the current location from Winchester Place, where a gravel driveway leads to space behind the house for two parking spaces.

Although no sidewalks exist, Winchester Place is not identified as a needed linkage so none is required. No new landscaping or open space requirements apply.

Modification

- The structure has a small existing covered front porch that encroaches into the front setback. Front setback in RM-16 is 15 feet and this porch is 10.3 feet from the street. Staff is supportive of this request.

The parcel is approximately 9,148 square feet in area and a duplex in RM-8 would require 10,000 square feet as the minimum lot size to accommodate the two units. Rather than maintain the current zoning designation and seek a modification to reduce lot size, RM-16 will allow for the multi-family use on adequate acreage. However, RM-16 would allow for a total of four residential units. Staff recommends a condition limiting the number of residential units on this site to two only (present conditions).

This proposal was recommended for approval with conditions by the Technical Review Committee on November 15, 2010 and unanimously recommended for approval by the Planning and Zoning Commission on December 1, 2011. No public comment has been received.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. That the proposed use or development of the land will not materially endanger the public health or safety.
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.
   The site has existed in its presently developed state for many years and there are no physical changes are proposed to the site. There are no significant natural or topographic features on the site or in the immediate vicinity.

3. That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.
   The proposal is not expected to injure the value of adjoining or abutting properties. Since there are no physical changes to the site and because the site has been operating as a duplex for decades, there should be no impact to abutting properties. Additionally, there are apartments in the immediate vicinity, establishing a multi-family presence in the neighborhood.

4. That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.
   The two-story residential structure was built in the 1950s and is visually similar to the other residential structures in the immediate neighborhood. The parking area and small accessory structures are comparable to typical single-family lot configurations. Although the dwelling was converted into a duplex many years ago, there is only one entrance visible from the front, giving the appearance of a single-family home. No physical changes are proposed on the site and it will remain in harmony with the scale, bulk, coverage, density and character of the area.

5. That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.
   Objectives throughout the *Asheville City Development Plan 2025* are based upon encouraging a mix of residential options, especially providing higher density in close proximity to walkable, bikable commercial corridors served by transit (such as this location along Haywood Road in West Asheville).

   Additionally, City Council's goal for *affordability* is to "create and preserve affordable rental and home ownership opportunities in Asheville so that all citizens have access to safe, sufficient and affordable housing." This proposal legally establishes a duplex that will provide safe, code-compliant rental housing in West Asheville.

6. That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.
   The project site is located just off of Haywood Street (transit Rte. 1) in West Asheville in an established residential neighborhood where adequate infrastructure exists. In addition, preliminary review by other service providers has not revealed any problems for continued service to the site.

7. That the proposed use will not cause undue traffic congestion or create a traffic hazard.

No traffic congestion or traffic hazard is anticipated. The use is existing and adequate off-street parking is provided on the site.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pro:

- The conditional zoning legally establishes a long-existing duplex use on the site.

Con:

- None noted.

Staff recommends approval of the conditional zoning request as submitted by the applicant, including the porch encroachment into the front setback. Although the RM-16 zoning designation would allow for a total of four units, staff suggests a condition restricting the site to only two units.

Mr. Dale Roberts, adjoining property owner, explained that this is a busy street and due to parking concerns he hoped that they would limit the renters to single people.

Mayor Bellamy closed the public hearing at 9:21 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Russell moved for the adoption of Ordinance No. 3942, to conditionally zone the project identified as Barnes Duplex, located at 12 Winchester Place, from RM-8 Residential Multi-Family Medium Density District to RM-16 Residential Multi-Family High Density District for an existing duplex, and approval of a request for a modification to allow an encroachment into the front setback, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) Density shall be limited to only two units on this site. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 430

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY BOARD OF ADJUSTMENT VARIANCE FINDINGS

ORDINANCE NO. 3943 - ORDINANCE TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO MODIFY BOARD OF ADJUSTMENT VARIANCE FINDINGS

Mayor Bellamy opened the public hearing at 9:21 p.m.

Assistant Director of Planning & Development Shannon Tuch said that this is the consideration of an ordinance amend the Unified Development Ordinance to modify Board of Adjustment variance findings. This public hearing was advertised on January 14 and 21, 2011.

She said that at the recent Board of Adjustment retreat on October 5, 2010, City staff presented a proposal to modify the Board of Adjustment findings to be more consistent with the state enabling legislation that authorizes the Board to grant relief to a city's development standards. As described in the statutes, there are three main conclusions that must be made, and many cities have expanded on the first conclusion to include three separate "tests", typically resulting in a total of five findings that must be made before a variance can be granted. Asheville has seven findings for basic requests and six, slightly different, findings for sign variance requests. After some consideration and discussion, the current board of adjustment members, both regular and alternate, voted unanimously to amend the findings as proposed by staff.

It is unclear why the City's findings have evolved to include more findings than the state statutes require. It has also been noted that the findings, as currently listed, confuse some applicants with their redundancy, overlap and phrasing. Before a Board of Adjustment can issue a variance, the courts require that it make certain findings. These findings must be included in the record of the case and must be broad enough to indicate not only the conclusions that the Board draws but also the factual reasons on which they are based. Essentially, these findings must indicate to the courts that the Board has complied with the requirements and applied the standards set forth in the state enabling act and the zoning ordinance. North Carolina's enabling act calls for three main findings. Those findings include:

1) That there are practical difficulties or unnecessary hardships in the way of carrying out the strict letter of the ordinance;
2) That the variance is in harmony with the general purpose and intent of the ordinance and preserves it's spirit; and
3) That in granting the variance the public safety and welfare have been assured and substantial justice has been done.

The terms "practical difficulties" or "unnecessary hardships" in the first finding are not strictly defined and are typically satisfied through three tests. Those tests are:

a) If made to comply with the provisions of the ordinance, the property owner cannot secure a reasonable return from, or make reasonable use of their property,
b) The hardship of which the applicant complains results from unique circumstances related to the applicant's land, and
c) The hardship is not the result of the applicant's own actions.

If incorporated into the other findings this results in a series of five (5) questions presented to the applicant that, when properly supported provides justification for granting a variance. Staff proposed reorganizing the findings in such a way that it is clear that the three tests belong to finding #1 and that the other two findings will stand on their own.

This action complies with city adopted goals and plans by improving the clarity of our standards for the public's benefit.

Pro:

- Reduces confusion and redundancy when addressing the findings

Con:

- None identified

This wording amendment was reviewed by the Planning & Zoning Commission at their December 1, 2010, meeting where the proposal was supported unanimously (6:0).

City staff concurs with the Planning & Zoning Commission and recommends that the City Council adopt the ordinance as proposed.

Mayor Bellamy closed the public hearing at 9:22 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Manheimer moved for the adoption of Ordinance No. 3943. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 435

E. PUBLIC HEARING TO CONSIDER A SIGNAGE PLAN FOR MISSION HOSPITAL AND SURROUNDING CAMPUS LOCATIONS

ORDINANCE NO. 3944 - APPROVAL OF A SIGNAGE PLAN FOR MISSION HOSPITAL AND SURROUNDING CAMPUS LOCATIONS

Mayor Bellamy opened the public hearing at 9:22 p.m.

Technical Review Manager Kim Hamel said that this is the consideration of an ordinance approving a signage plan for Mission Hospital and surrounding campus locations. This public hearing was advertised on January 14 and 21, 2011.

Mission Health Systems (MHS) is currently undergoing a comprehensive evaluation of their Campus Master Plan to address growth and ongoing construction projects occurring at multiple campuses within the area. The two most recent and substantial of projects occurring within MHS are the Hospital Drive road extension project and construction of the new Cancer Center. The Hospital Drive project is ahead of schedule and is slated for completion early this summer.

Although MHS had hoped to present one complete and comprehensive Master plan to the City for their review, the changes brought about by the Hospital Drive road project and its impending completion prompted MHS to instead address the immediate need for appropriate signage for routing emergency vehicles, patients, and visitors to appropriate hospital entrances and campus locations.

The initial phase of the MHS plan comes in the form of a signage plan that specifically addresses primary and secondary campus identification signs, wayfinding and directional signage, and regulatory and traffic control signs. The plan proposes a combination of both new signage and modifications to existing directional signage. Some existing identification signs (attached and freestanding), however, will remain in current locations and will be addressed in future phases of the comprehensive master plan.

For the purposes of this review staff identified a "Development Area" for Mission Health Systems that includes: the Memorial Mission and St. Joseph's Campus drives and entrances along Biltmore Avenue, the new Hospital Drive and Victoria Road connections and MHS mini campus locations on the NE and SW sides of the street (445-495 Biltmore Avenue and Cancer Center), and the Mission Hospital entrances along McDowell Street.

The properties associated with this application are all zoned Institutional (INST). Given the size of the "development area" and the desire to ensure reasonable compatibility with signage in the vicinity but outside of the study area, the staff compared the single tenant and multi-tenant sign allowances permitted for Institutionally zoned properties specified in Section 7-13-4 and the Directional signage allowance in Section 7-13-2 of the Unified Development Ordinance (UDO).

Campus Identification Signs:

Three primary "Campus Entrance" identification signs are proposed within the development area. Two of the three signs will be equipped with an electronic changeable copy (LED) component:

- Location O1a (with LED): St. Joseph's Campus entrance off of Biltmore Avenue
- Location 140 (with LED): Not specifically associated with a campus, more of a gateway sign; proposed at the corner of McDowell Street and Hospital Drive
- Location 51: New Mission Hospital Campus entrance off of Victoria Road

In addition to the primary identification signs noted above, one secondary campus identification sign (141) is proposed for the new Cancer Center and is located on the corner of Hospital Drive and Hamilton Street.

The specific sign dimensions for each of the identification signs proposed for the development and a comparison of the proposal with the City's sign ordinance is provided in the table below.

** The sign ordinance typically allows for one free-standing sign and an allowance for attached signage per parcel.*

CAMPUS IDENTIFICATION SIGNS

SIGN TYPE/ LOCATION	WHAT IS PROPOSED	WHAT IS PERMITTED	AMOUNT EXCEEDED
Primary ID sign: 01a, 140 Free Standing Ground Sign w/ Electronic (LED) Changeable Copy	Height: 13 feet Size: 100 sqft LED: 25% of sign face	Height: 8 feet Size: 90 sqf LED: < 50% of sign face	Height: 5 feet Size: 10 sqft LED: N/A
Primary ID sign: 51 Free Standing Ground Sign	Height: 10'-4" Size: 73 sqft LED: 34% of sign face	Height: 8 feet Size: 60 sqft LED: < 50% of sign face	Height: 2'-4" feet Size: 13 sqft LED: N/A
Secondary Campus ID: 141 Free Standing Ground Sign	Height: 8 feet Size: 50 sqft	Height: 8 feet Size: 60 sqft	N/A

Vehicular Directional Signs:

As noted above, the significant changes resulting from the Hospital Drive road project have prompted MHS to modify their existing wayfinding program to address the directional complexities of a hospital with multiple campus locations. The modifications proposed include providing a variety of vehicular directional signs to direct and route emergency vehicles, patients and visitors to the correct hospital and entrance. The table below provides the location and type of directional signage proposed for each location point identified on the map.

The primary differences between the various directional signs are reflected in the height, square footage and branding (name/logo) provided. The larger signs (DV-3) are designed to comply with the DOT cap heights standards (letter size) that address higher vehicle speeds on

roadways with multiple traffic lanes. As a result, while larger signs are located primarily on the main corridor roads (Hospital Drive, and Victoria Road); they are also proposed in a few strategic but less visible locations on internal driveways located within the campus hospital.

Smaller directional signs (DV-5 and DV-5a) are proposed within the development area primarily at street intersections and in locations where the directional signage is only visible from and provides direction to a single view-point (i.e. location 87 is visible only to drivers heading south on Victoria Road - the backside of the sign will be blank and not visible from any other vantage point). It should be noted that smaller signs are also located at a few internal sites within the campus boundary where there are higher levels of vehicle and pedestrian activity.

**The Directional signage allowance in the UDO is intended to provide direction to visitors within a multi-tenant development (i.e. shopping center). The signage is exempt from formal review (a permit is not required) as long as the signs do not exceed 4 square feet per face, and do not exceed 3 feet in height; the number of signs per lot is also limited to 4 signs.*

VEHICULAR DIRECTIONAL SIGNS

SIGN TYPE/ LOCATION	WHAT IS PROPOSED	WHAT IS PERMITTED	AMOUNT EXCEEDED
DV1.3 01 3-Sided Directional Sign- No logo	Height: 8'-11" Size: 42 sqft Modify the existing sign to include a third face.	Height: 3 ft Size: 4 sqft Four signs permitted per site; Two faces per sign	Height: 5'-11" Size: 36 sqft 1 extra sign face
DV-2 64 Secondary Entrance Directional Sign w/ Name & Logo	Height: 9'-11" Size: 47 sqft	Height: 3 ft Size: 4 sqft Four signs permitted per lot; Two faces per sign	Height: 7'-11" Size: 43 sqft
DV-3 17, 36,105,105a, 110 Direction Sign w/ Name & Logo	Height: 11'-1/2" Size: 52 sqft	Height: 3 ft Size: 4 sqft Four signs permitted per lot; Two faces per sign	Height: 8'-1/2" Size: 48 sqft
DV-5 87, 102 Directional Sign w/ Name and Logo	Height: 8'- 6" Size: 28 sqft	Height: 3 ft Size: 4 sqft Four signs permitted per lot; Two faces per sign	Height: 5'-6" Size: 24 sqft
DV-5a 129,142 Directional Sign – No logo	Height: 7'-6" Size: 21 sqft	Height: 3 ft Size: 4 sqft Four signs permitted per lot; Two faces per sign	Height: 4'-6" Size: 17 sqft
RT 145, 146 Directional Sign – 445 Biltmore - Staff Parking - No logo	Height: 6ft Size: 5 sqft	Height: 3 ft Size: 4 sqft Four signs permitted per lot; Two faces per sign	Height: 3 ft Size: 1 sqft
IB-4s 143, 144	Height: 7'-6" Size: 15 sqft	Height: 3 ft Size: 4 sqft	Height: 4'-6" Size: 11 sqft

Cancer Center Parking Deck – No logo		Four signs permitted per lot; Two faces per sign	

Traffic control signs:

These include sign types SN-4, SN-6, and SN-O. Once completed, Hospital Drive and Victoria Road will be public and standard City street name signs (SN-6) will be installed. MHS is proposing custom street name signs (SN-4, SN-O) that include the Mission Hospital logo/pictogram on privately maintained streets and driveways within the campus.

Findings:

The stated purpose of allowing the consideration of a separate signage plan is as follows:

The purpose behind this section is to permit creativity in sign design and placement to address site issues and constraints associated with topography, pedestrian-orientation, way-finding and other conditions unique to the subject development.

MHS has proposed a sign program that appears to meet the intent and purpose of the signage plan. The signs have been creatively designed and customized to exclusively identify multiple MHS campus locations and parking areas by providing visible cues that are consistent in color, layout, branding (pictography), and structural form (stone bases).

Two gateway signs enhanced with LED messaging capabilities are also incorporated into the plan to provide limited Public Informational messages and alerts to visitors and patients approaching the campus. For hospitals, utilizing this type of technology is a rather new and unique approach for relaying important information to the public and visitors traveling to the campus.

The Directional (wayfinding) signage is also customized and complements the common design elements featured in the identification signs (noted above) visually informing motorists that they are still within the hospital campus area. The signs are strategically located throughout the development area and provide clear direction to visitors and patients traveling to specific campus destinations.

Pros:
- Comprehensive, graphically consistent signage
- Presents an intuitive and simple wayfinding (directional) approach

Con:
- Electronic messaging components (LED) often result in creating unnecessary distraction to drivers of motor vehicles

City staff supports MHS efforts to create a unique and consistent identity and our review indicates that this approach is satisfactory and recommends City Council approval with the following list of conditions: (1) All signs shall meet site distance triangle and building code requirements, including clearance requirements for pedestrian and vehicular traffic; (2) Traffic control and street name signs shall meet MUTCD standards in terms of location, size, color, message, shape, and height. All poles supporting any of these signs shall meet the breakaway standards for such poles. A maintenance agreement acceptable to the City shall be required from the developer to place maintenance and replacement on the developer for perpetuity; (3) Signs that include a changeable copy LED component are: 1) limited to two messages within a 24 hours period; and 2) are only permitted for display of Public Information and must comply with all LED signs standards as outlined in Section 7-13-4(a)(14)of the UDO; (4) All signage must

comply with illumination standards as outlined in Articles 11 and 13 of the UDO; and (5) All signs in the project area shall comply with the proposed standards and no exceptions or variances are permitted.

Mayor Bellamy closed the public hearing at 9:25 p.m.

Upon inquiry of Councilman Davis of the equity of these signs compared to other businesses, it was the consensus to instruct the Planning & Development Committee to begin review of some possible amendments to the sign ordinance and to report back to Council via memorandum.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3944 with the following conditions: (1) All signs shall meet site distance triangle and building code requirements, including clearance requirements for pedestrian and vehicular traffic; (2) Traffic control and street name signs shall meet MUTCD standards in terms of location, size, color, message, shape, and height. All poles supporting any of these signs shall meet the breakaway standards for such poles. A maintenance agreement acceptable to the City shall be required from the developer to place maintenance and replacement on the developer for perpetuity(3) Signs that include a changeable copy LED component are: 1) limited to two messages within a 24 hours period; and 2) are only permitted for display of Public Information and must comply with all LED signs standards as outlined in Section 7-13-4(a)(14)of the UDO; (4) All signage must comply with illumination standards as outlined in Articles 11 and 13 of the UDO; and (5) All signs in the project area shall comply with the proposed standards and no exceptions or variances are permitted. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 437

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 11-14 - RESOLUTION TO SUPPORT THE W.C. REID CENTER GRANT PROPOSAL BY THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE AND TO AUTHORIZE THE MAYOR TO DISPOSE OF CITY-OWNED REAL PROPERTY KNOWN AS THE W.C. REID CENTER, LOCATED AT 133 LIVINGSTON STREET, BY PRIVATE SALE

Community Development Director Jeff Staudinger said that this is the consideration of a resolution authorizing approval granting to the Housing Authority of the City of Asheville an option to purchase the Reid Center, and other financial commitments to the project.

As was reported at the December 14, 2010, City Council meeting, the Housing Authority of the City of Asheville is exploring a recently announced grant opportunity that would preserve and rehabilitate the Reid Center as a community education and training center. In November, the US Department of Housing and Urban Development announced a national capital grants competition for public housing authorities. The Housing Authority of the City of Asheville is eligible to apply for as much as $5 million to purchase, construct or renovate property for a community education and training center.

The grant requirements directly align with the existing uses now at the Reid Center, and may represent a unique opportunity to meet Council, neighborhood, and community-wide public service goals. The grant funding is specifically for public housing authorities to develop facilities to provide early childhood education, adult education, and/or job training programs for public housing residents. Each of the current users of the Reid Center is directly engaged in those activities:

- Community Action Opportunities operates their Head Start program in the "annex" building;
- Green Opportunities now runs their green job training and placement program from the Reid Center;
- Partners Unlimited provides training and remediation services to keep students in school and for out-of-school youth.

The Housing Authority uses part of the Reid building space for management and maintenance of its public housing developments in the area. The Reid Center is located adjacent to or nearby Erskine, Walton and Livingston Street public housing communities, and residents of those communities and other public housing communities directly benefit from the activities at the Center. All of these community partners would commit to a plan to renovate the Center, enhancing the energy efficiency and sustainability of the existing buildings, and using the renovation itself as a training opportunity for underemployed community residents.

From a community and neighborhood perspective, preserving the Center as an important historical resource has been voiced as a key community priority. The Housing Authority would incorporate Asheville's African-American heritage in its vision for the facility.

The use of the facility as a community education and training center would help meet Council strategic goals for sustainable development and job creation. Council currently funds (both through Outside Agency and through federal funds distributed by the City) Green Opportunities and the Housing Authority.

Additionally, if successful, the grant would allow the City to sell the property to the Housing Authority for its appraised value, potentially contributing significantly to the next phase of construction at the new Livingston Street Center.

The key commitment required at this time from the City for this project to be eligible for funding, would be the commitment from the City to provide the Housing Authority with long term site control of the property (sale or long term lease), contingent only on grant approval.

Other commitments the Housing Authority has requested the City consider making are:

- Subgrant of the HUD Special Purpose Grant of $137,200 to the Housing Authority for renovations, contingent on the new HUD grant award. This grant was made to the City as a part of a package of congressional earmarks, and can only be used for the Reid Center.
- Subgrant of some portion of the recently awarded TIGER II Planning Grant. $100,000 of this grant has been reserved for development assessment and planning on City-owned property in the "East of the Riverway" target area. The Housing Authority has asked for consideration of the use of $50,000 of these funds, again contingent on the award of the new HUD grant.
- Payment by the City of Asheville of some percentage of utility costs for the building for the three years of the project The Housing Authority has suggested 50%.

The deadline for the grant application is in February, 2011. Prior to that date, the Housing Authority will need to prepare a preliminary plan for renovation, gain commitments from not only existing partners but also from other education and training partners in the community, and provide commitments for five percent of the grant in matching funds.

The Housing and Community Development Committee considered the Housing Authority's proposal at their January 5, 2010, meeting and they recommended adoption of the resolution.

These changes directly support the City's Strategic Operating Goals as follows: (1) *Fiscal Responsibility*: If successful, the return from the sale would yield funds to support the City in pursing other projects, and remove from the City expense the operation of an inefficient building; (2) *Sustainable*: The proposed project would create opportunities for City residents to learn sustainable job skills; and would be an important component of the East of the Riverway project; (3) *Job Growth and Community Development:* The project would support diversified job growth through "green" jobs training; expand partnerships for economic development; and create local labor pool development opportunities; and (4) *Safe:* The project would support ongoing recreation and employment alternatives for youth at risk of gang exposure.

Pros:

- Ensure continued operation of neighborhood-based employment education and training center;
- Existing organizations to operate those programs are in place there;
- Renovations would be a training opportunity, helping create skills while keeping costs down;
- City would sell building for appraised value;
- HUD Capital Grant sought is available only to Housing Authorities;
- No other funding identified for building renovation;
- Neighborhood has identified saving building as important;
- Use of gym by City could be continued until new gym is constructed.

Concerns:

- Construction could possibly interfere with recreation programming;
- Other use possibilities have not been thoroughly explored;
- Structural, other existing conditions could impact cost;

If the Housing Authority was awarded the HUD Capital Grant, the City would be able to sell the Reid Center for appraised value. Continued operation of the gym would be an ongoing expense, but at a percentage of the cost needed to operate the entire Center now.

City staff recommends City Council adopt the resolution to support the Reid Center Grant proposal by the Housing Authority of the City of Asheville.

Mr. Staudinger responded to Mayor Bellamy when she asked what would happen if the Housing Authority does not receive the grant.

Mr. David Nash, Chief Operations Officer of the Housing Authority of the City of Asheville, and City Attorney Oast responded to Mayor Bellamy about the commitment of the partnership and the continued use of the building for a community based education and training center.

At Mayor Bellamy's request, Mr. Nash said that he would meet annually with the community in order for them to continue to be involved in the Reid Center.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-14. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 317

B. CIVIC CENTER RENOVATION UPDATE

RESOLUTION NO. 11-15 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT AMENDMENT WITH PBC+L AND BETSCH ASSOCIATES FOR PHASE II ARCHITECTURAL AND ENGINEERING DESIGN SERVICES FOR THE CIVIC CENTER RENOVATIONS

ORDINANCE NO. 3945 - BUDGET AMENDMENT FOR CIVIC CENTER RENOVATIONS

RESOLUTION NO. 11-16 - RESOLUTION DECLARING THE CITY OF ASHEVILLE'S INTENT TO REIMBURSE ITSELF FOR CAPITAL EXPENSES INCURRED WITH CONNECTION WITH THE RENOVATION, CONSTRUCTION AND EQUIPPING OF THE CIVIC CENTER FROM THE PROCEEDS OF AN INSTALLMENT FINANCING CONTRACT TO BE EXECUTED IN FISCAL YEAR 2012

Economic Development and Civic Center Director Sam Powers said that this is the consideration of a (1) a resolution authorizing the City Manager to sign a contract amendment for architectural and engineering design services for the preparation of construction drawings, receipt of bids, and administration of the construction contract for Phase II renovations to the Asheville Civic Center to meet requirements for the Southern Conference Basketball Tournament; (2) a budget amendment in the amount of $480,000 from existing Civic Center capital project funds to establish a project budget for the design contract; and (3) a reimbursement resolution, which officially declares the intent of the City to be reimbursed for costs associated with the project from the proceeds of the installment financing contract.

A project timeline, preliminary estimate of probable project costs, and source of funds have been provided to City Council. It is anticipated that the project financing will be done through an installment financing contract conducted through the City's finance department and reviewed by the NC Local Government Commission (LGC), similar to the process used with other recent City building projects. A Reimbursement Resolution, which officially declares the intent of the City to be reimbursed for costs associated with the project from the proceeds of the installment financing contract, is also provided to Council for consideration. The project timeline anticipates that construction will begin in June 2011, and be completed by December 2011.

The action supports current and prior Strategic Operating Plan Goals: Fiscal Responsibility, by leveraging internal and external partnerships for pursuing capital improvement projects and infrastructure projects; Green and Sustainable, by taking the City's sustainability program to the next level, which will include HVAC improvements to the Banquet Hall, increased recycling, and energy efficient lighting improvements; and the Job Growth and Community Development Focus Area, by creating more collaborative and effective working partnerships between the City of Asheville, the business community, and other key organizations to effectively manage the City's regulatory environment while accomplishing economic development goals.

The action complies with the Civic Center Commission's Strategic Plan, as well as recommendations of the 2006 Civic Center Task Force. The action supports the Downtown Master Plan, which calls for a near-term action step to maintain and upgrade the existing Civic Center and Thomas Wolfe Auditorium to serve for at least the next five to ten years.

City Council's Planning & Economic Development Committee reviewed and supported the SoCon bid as an event with a substantial economic impact of over $16 million for the initial three-year bid period.

Pros:

- Action meets the requirements to facilitate the Southern Conference, and the resulting $16 million economic impact.
- Action will support improved visitor experience and increased revenue capabilities for the Civic Center by increased seating, more points of sale, and increased opportunities for promoter use of the renovated facility.
- Action leverages significant partnership funding to allow for greater levels of renovation.

Con:

- Financing the project slightly increases the lifetime cost of the project due to the payment of interest on the amount financed.

Funding already approved by the TDA and Buncombe County, along with existing Civic Center capital funds and planned FY 2011-12 CIP funding as outlined in the five-year Capital Improvement Program totals approximately $3 million. The total cost of Phase II renovations, including the professional services contract, will likely be $4.8 million. The City will therefore need to finance $1.8 million. The financing will be structured such that debt service payments will begin in FY 2012-13. Based on discussions with City finance staff, the projected debt financing payback would be 5-6 years with annual debt service of $400,000, which will be covered by future CIP allocations and TDA payments. In addition, staff and Civic Center Commission members continue to explore additional revenue sources.

City staff recommends City Council (1) adopt a resolution authorizing the City Manager to sign a contract amendment with PBC+L Architecture and Betsch Associates for Phase II architectural and engineering design services for the preparation of construction documents, receipt of bids, and administration of the construction contract; (2) approve a budget amendment in the amount of $480,000 from existing Civic Center Capital Project funds to establish a project budget; and (3) adopt the reimbursement resolution, which officially declares the intent of the City to be reimbursed for costs associated with the project from the proceeds of the installment financing contract.

Mr. Mike Burke, Chairman of the Civic Center Commission, said that in 2009, the City of Asheville led a successful collaborative partnership initiative which resulted in Asheville being named the official host of the NCAA Southern Conference (SoCon) Men's and Women's Basketball Championships for 2012-14. The award of the SoCon Tournament 2012-14 formed the nucleus of the City's application to the Buncombe County Tourism Development Authority (TDA). In July 2009, the TDA awarded the Civic Center $2 million in Product Development Grant Funds for renovations to the Civic Center arena. In addition, Buncombe County Commissioners partnered with the City by approving $320,000 for the project. City Council has continued to include the Civic Center as a priority in the City's Capital Improvement Program (CIP). UNC Asheville will host the preliminary women's games in the new Kimmel Arena. The ABC Board will partner with the Civic Center in an alcohol awareness public educational campaign utilizing the new messaging infrastructure. The newly created Regional Sports Commission is leading the SoCon Local Organizing Committee, whose responsibilities include raising sponsorship funds for the event.

After the TDA grant award, the Civic Center Commission developed a Request for Qualifications (RFQ) process for architectural services for the required renovations. An evaluation committee comprised of Civic Center Commissioners, local design professionals and City staff, conducted an extensive public RFQ process. As a result, the design team of PBC+L Architecture and Betsch Associates was selected. PBC+L Architecture has an office in Asheville and has designed many public assembly facilities. Betsch Associates has designed several arena projects for SoCon institutions. The design team was contracted to provide the preliminary architectural report refining the project scope, timeline, and an updated estimate of probable project costs to meet SoCon commitments. On December 29th, the Civic Center Commission unanimously endorsed the preliminary concept provided by the architectural design team, and voted to recommend to City Council that the City Manager be authorized to execute a contract

amendment for Phase II architectural and engineering design services for the preparation of construction drawings, receipt of bids, and administration of the construction contract.

Mr. Chad Robertson, representing the PBC+L, briefly explained the proposal and what the Civic Center Commission wanted them to achieve with the funding available.

Mr. Ken Betsch, represent Betsch Associations, reviewed in detail the drawings, construction schedule and project budget in order to make the Civic Center more competitive.

Councilman Davis, liaison to the Civic Center Commission, was pleased with the active role of the Civic Center Commission and Mr. Powers in this process. He felt there will continue to be good events in the building during the construction phase.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and ordinance and they would not be read.

Councilman Davis moved for the adoption of Resolution No. 11-15. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 319

Councilman Davis moved for the adoption of Ordinance No. 3945. This motion was seconded by Councilman Russell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 444

Councilman Davis moved for the adoption of Resolution No. 11-16. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 320

C. RESOLUTION NO. 11-17 - RESOLUTION ADOPTING THE CITY OF ASHEVILLE'S LEGISLATIVE PROGRAM FOR THE 2011 SESSION OF THE N.C. GENERAL ASSEMBLY

RESOLUTION NO. 11-18 – RESOLUTION SUPPORTING THE N.C. METROPOLITAN MAYORS COALITION 2011 ADVOCACY AGENDA

RESOLUTION NO. 11-19 – RESOLUTION SUPPORTING A STATEWIDE INDEPENDENT ENERGY EFFICIENCY PROGRAM

City Attorney Oast said that this is the consideration of a resolution approving the City's State Legislative Agenda for the 2011 Session of the North Carolina General Assembly. This matter was continued from Council's December 14, 2010 meeting.

At its meeting of November 9, 2010, Council initiated discussion of the State Legislative Agenda for 2010. He provided Council with the December 14 Staff Report for details. He divided this report into three major areas.

I. Continuing Local Issues. Based on direction received at the November 9 meeting, and on information received since them, a resolution has been prepared requesting legislative action with respect to several issues, some of which are carried over from previous years, and some of which are of persistent local concern.

A. Adjustment of Woodfin/Asheville boundary and UNC-A area and Merrimon Avenue. This is a renewal of the request developed last year. We have identified with more particularity the location of the boundary, and have reviewed the matter with the affected governmental and educational agencies. Of particular importance is that a method was developed for allowing privately owned properties currently located in Woodfin to remain subject to Woodfin's jurisdiction, at their option.

B. Clarification of the Video Service Competition Act of 2006. This was also carried over from last year. We sought introduction of a bill to preserve the status quo with respect to features of local cable television franchises (such as intranets) that were not addressed by the Video Service Competition Act. The bill that was introduced was referred to a study committee.

C. Authorization for Asheville to condition provision of water service on annexation for developments of a certain size. This request has been made in the past, and has taken several forms. This was last considered in 2009.

D. Clarify authority to use property assessment process to finance certain energy efficiency projects. This continues efforts begun in 2009. While legislation has been adopted that implements parts of this authorization, questions remain as to the effect of such assessments on home mortgage financing, and restrictions on the sources of revenue available for such programs. The School of Government has been working with stakeholder parties on clarification of these issues.

II. New Matters. Since the November 9 meeting, we have received several other items for potential inclusion on the legislative agenda:

A. Structure of State ABC system. In recent years, there have been discussions regarding changes to the structure of the State ABC system. These discussions have centered on privatizing parts of the system, which would have the affect of diminishing local control and local revenue. The local ABC Board has asked Council to consider a resolution supporting the current structure.

B. School system consolidation. There have been indications that the topic of school system consolidation may come up in this legislative session, particularly in view of the State economic situation. Asheville and Buncombe County currently operate separate school systems, so the impact of potential legislation on this subject is of particular interest on a local level.

C. Assistance for Water Lines in Mills Gap Road Area. Residents of this area around the closed CTS electroplating facility have inquired about obtaining City water to help them with ground water contamination problems. Last year, Council voted to request State and federal elected officials for assistance to obtain the materials needed to perform this work, and such other assistance as may be available.

D. Parks District. Council has expressed interest in legislation that would allow for formation of a parks district, with the possibility of participation by two or more local governments. While a similar arrangement may be possible through an inter-local agreement, legislation allowing for a parks district would likely encompass some powers that typical inter-local agencies do not have.

III. State Municipal Policy Matters. We have now received the North Carolina League of Municipalities Proposed Advocacy Goals. The League has scheduled a conference for January 20, 2011, at which the agenda will be narrowed down and prioritized. Each member municipality is entitled to one vote in this process.

If Council desires for Asheville to participate in this process, Council should select a delegate, and should provide voting direction on the major issues. Council's attention is directed to the following items of particular interest.

A. Page 1, Item 1B. Municipal broadband authorization. With the termination of local cable television franchises by operation of the Video Service Competition Act (VSCA), the ability of local governments to build and operate fiber-optic systems has been a matter of interest across the State.

B. Page 3, Item 2A. Local control over ABC operations. This is consistent with the local ABC Board's request, summarized above.

C. Page 3, Item 2B. More influence for cities in ABC permitting decisions. This has been an issue over the years for Asheville and other municipalities. Currently, local involvement is advisory only, which can lead to repeated permitting of problem locations.

D. Page 4, Item 3A. Sales tax distribution process. The method of sales tax distribution has been a matter of interest to the City for several years.

E. Page 5, Item 3D. Prepared meals and beverage tax. This has been considered by Council in the past. The proposal would be for a State-wide local option authorization.

F. Page 8, Item 5A-E. Transportation infrastructure. This proposal is highlighted because of consistent local interest in transportation issues in general, including: (1) Passenger rail service; (2) Alternative nodes of transportation; and (3) Sidewalks.

He also provided Council the NCLM information package is a description of the policy development process, along with a form and method for submission of new items for legislative consideration. In lieu of or in addition to participating in the NCLM Advocacy Goals Conference, Council may by resolution support individual proposals.

He provided Council with the previously received the N.C. Metro Mayors legislative agenda.

We have received a proposed resolution supporting a Statewide Independent Energy Efficiency Program. This resolution anticipates a legislative proposal by the NC SAVE$ ENERGY alliance to fund energy efficiency programs to assist low income households. Council may adopt this resolution separately, and it can be included with information submitted to the legislature.

As covered in previous staff reports, Council has usually reviewed the legislative agenda of other civic and governmental organizations for items to include in its own legislative agenda, or for opportunities for mutual support and collaboration. The Asheville Area Chamber of Commerce is one of the organizations whose legislative agenda is of interest to us, for self-evident reasons.

Since the December 14, 2010, Council meeting, we received information from the Governmental Affairs Task Force (GATF) regarding the State and Federal legislative priorities for the Asheville Area Chamber of Commerce. That information was forwarded to Council last month. The Chamber's and GATF's stated approach is to have a "concise and powerful" legislative agenda. With this in mind, the GATF voted on January 4, 2011, to recommend the following three State legislative priorities to the full Chamber Board for consideration:

- Support programs and state legislation to help small businesses create and maintain jobs, including tax incentive strategies, grants and an expansion of the small business preference for companies seeking contracts with state government.

- Support the "Fund Schools First" statewide campaign to fund schools and preservation of state funding for cooperative high school programming (Huskins, Learn and Earn Online, dual enrollment).

- Support incentives and programs to enhance green building and energy conversation efforts.

These priorities were presented to State legislators at the Chamber's legislative luncheon on January 14.

Staff's recommendation is as follows:

1. Continuing local issues. Adoption of the Resolution regarding the State Legislative Agenda for 2011 is recommended. Adoption of this resolution will enable staff to assemble information in support of each request for submission to our legislative delegation. It is important to note that this is a starting point; there will be many opportunities to identify and act on other legislative proposals.

2. New matters. At Council's direction, appropriate resolutions can be prepared for either of the other listed items, or those items can be added to the State Legislative Agenda resolution.

3. State Municipal Policy Issues. There is a lot of information in the League's proposal, and Council may desire more information on some of the items. Representatives of the League have offered to come to Asheville to discuss these matters. With this in mind, Council may wish to defer action on this item until its meeting in January.

It was the consensus of Council to have a standing topic on the 2nd meeting agenda each month to discuss additional legislative items.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Vice-Mayor Newman moved for the adoption of Resolution No. 11-17, adopting the following legislative program for the 2011 Session of the North Carolina General Assembly (1) Introduce a local bill to adjust the boundaries of Asheville and Woodfin to: (a) Eliminate pockets of unincorporated area between the two municipalities; (b) Resolve jurisdictional confusion in the area of UNC-A (including land set aside for future growth), and Broadway/I-26/River Road interchange; and (c) Authorize agreements regarding service delivery to affected private properties; (2) Introduce a local bill or support general legislation to clarify status of local intranet facilities in connection with the Video Service Competition Act of 2006; (3) Introduce a local bill providing for annexation agreements for certain developments that receive city water service; and (4) Support legislation to clarify authority and sources of revenue for implementation of Property Assessed Clean Energy (PACE) programs. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 322

Mayor Bellamy moved for the adoption of Resolution No. 11-18, resolution supporting the N.C. Metropolitan Mayors Coalition 2011 Advocacy Agenda. This motion was seconded by Vice-Mayor Newman and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 324

At Mayor Bellamy's request, Vice-Mayor Newman moved for the adoption of Resolution No. 11-19, supporting a statewide independent energy efficiency program. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 326

D. CONSIDERATION OF SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT'S RECOMMENDATION REGARDING THE TRANSFORMATIONAL DEVELOPMENT PROJECTS INCENTIVE POLICY FOR THE CITY OF ASHEVILLE

Planning & Development Director Judy Daniel said that this is the consideration of revised elements proposed by the Sustainability Advisory Committee for Energy and the Environment (SACEE) for the Transformational Development Policy adopted in November 2010.

At the November 23, 2010, meeting the City Council adopted a resolution supporting the creation of a "Transformational Development Policy". That action followed several other considerations of the policy (in August, September, and November) where the Council directed the staff to modify certain aspects of the policy. The Council adopted the policy, but after discussion also directed the Sustainable Advisory Committee for Energy and the Environment (SACEE) to consider certain elements of the policy and provide their thoughts and recommendations to the Council.

Also of interest, on January 4, 2011, the Buncombe County Commission adopted a policy to support the creation (through new construction or rehabilitation) of workforce housing (limited to rental housing). She provided Council a copy of that policy, a summary of its provisions, and a comparison of the two policies. It differs from the City Transformational Development Policy in scope, detail, and process; but is directed to the same goal of incentivizing the creation of workforce level rental housing.

The staff suggests that a "sunset" or "date certain renewal" clause be added to the policy. Since the nature of the policy is related to the excessive difficulties in finding financing for even very marketable projects that meet many Council goals; it may be advisable to consider an annual update and reconsideration of the need for the policy or if certain aspects of it should be changed or eliminated. The annual report would also allow the Council to monitor the performance of the grantees in meeting the requirements established by the Council.

The Council may wish to consider adding certain elements that are in the County policy such as requiring annual proof of income or requiring residents to be full time County residents.

Mr. Matt Raker, Chairman of SACEE, said that SACEE considered the policy at a meeting on November 17. After a substantial discussion they determined that they needed additional time to review the policy elements. They formed a subcommittee to consider the policy and requested that the Council allow them until the end of January to provide comments (given the difficulty of convening meetings in December). The Council granted that extension, and the subcommittee met on December 15 to consider the policy and its relationship to and potential impact on the Sustainability Bonus policy recently adopted by the Council. In their review of the Transformational Policy the SACEE subcommittee also requested, received, and included input from the Affordable Housing Working Group (AHWG), understanding their interest in protecting the intent and elements of the Sustainability Bonus policy. SACEE notes that the AHWG comments were largely consistent with SACEE's thoughts, and thus the memo reflects the concerns and recommendations of both groups.

He provided Council with the memo with their comments, along with an annotated copy of the policy elements adopted by the Council indicating the changes recommended by SACEE (including the thoughts of the Affordable Housing Working Group). In summary, SACEE recommends:

- Limits to the geographic scope of the policy to be consistent with the Sustainability Bonus
- Requiring Energy Star or higher green building standard
- Substantial changes to the green building elements
- Requiring 20% affordable housing, rather than 10%
- Adding a better definition of what open space elements should be expected
- Clarification of the specific number of "preferred" elements required
- Changing the policy title to: Sustainability Incentive Grant

Mr. Raker strongly encouraged Council to adopt the recommendations as they believe the policy will effectively serve Council's strategic goals, complement the recently enacted Sustainability Bonus, be a strong economic development tool, and yield public benefits appropriate for the level of public involvement.

Councilman Russell recalled Council requesting SACEE's input on the green and sustainability building techniques in preferred element 3 and was a little confused at the overall review and recommended changes in the entire policy. Vice-Mayor Newman agreed; however, they felt they felt it was important to have the policy be consistent with other adopted Council's incentives (e.g., commercial corridors). He felt we should have sent the draft policy to SACEE before adopting it in November of 2010.

Mr. Raker said that they wanted to make sure there were green building components in the policy but they also wanted to reinforce the other City's goals and practices.

After a brief discussion, it was the consensus of Council (1) to ask City staff to take the adopted policy and show the SACEE's recommendation with strike-outs and SACEE's comments to the side so Council can see clearly their input; (2) to have options presented when changes are recommended; (3) that the revised policy be sent to the Council of Independent Business Owners for review; and (4) to place this item on the February 22, 2011, agenda consideration.

VI. NEW BUSINESS:

A. ORDINANCE AMENDMENT TO REQUIRE PAWNBROKERS AND SECOND-HAND DEALERS TO SUBMIT THEIR DAILY PAWN AND/OR PURCHASE TRANSACTIONS TO THE ASHEVILLE POLICE DEPARTMENT ELECTRONICALLY

Mayor Bellamy said that there has been a request by property owners to delay this item. Therefore, Councilman Davis moved to delay action on this item. This motion was seconded by Councilman Russell and carried unanimously.

B. BOARDS AND COMMISSIONS

Regarding the Asheville-Buncombe Community Relations Council, Councilman Bothwell moved to postpone taking action on the vacancy left by Ms. Kate Pett for six months. This motion was seconded by Councilman Smith and carried unanimously.

Regarding the Tree Commission, Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Robert Oast Sr. and Parker Andes, as members on the Tree Commission, expired on December 31, 2010. Both individuals are not eligible to

serve another term. It was the consensus of Council to interview the two applicants who have applied for the Commission: Debbie Emmons and Mike Kenton.

RESOLUTION NO. 11-20 - RESOLUTION APPOINTING MEMBERS TO THE BOARD OF ADJUSTMENT

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Douglas Hattaway (Alternate) and David Brown (Regular) as members on the Board of Adjustment expire on January 21, 2011. In addition, there currently exists a vacancy, left by Juma Jackson, whose term will expire January 21, 2012.

The following individuals applied for vacancies on the Board of Adjustment: Bill Branyon, Eric Rainey, Nelda Holder, Ron King and David Nutter.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Douglas Hattaway (Alternate), David Brown (Regular) and appointing Nelda Holder (Alternate).

Vice-Mayor Newman moved to (1) reappoint Douglas Hattaway (Alternate) and David Brown (Regular) to each serve a three-year term respectfully, terms to expire January 21, 2014, or until their successors have been appointed; and (2) appoint Nelda Holder to serve the unexpired term of Mr. Jackson, term to expire January 21, 2012, or until her successor has been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 328

RESOLUTION NO. 11-21 - RESOLUTION APPOINTING MEMBERS TO THE SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Melanie Brethauer, Duncan McPherson and Gary Hamrick (as the Progress Energy representative), as members on the Sustainable Advisory Committee on Energy & the Environment (SACEE), expired on December 31, 2010.

The following individuals applied for vacancies on the Sustainable Advisory Committee on Energy & the Environment: Benjamin Colvin, Mandy Broderick, Aaron Sarver, Eric Rainey, Peggy Dror, Sherry Ingram, Charles Rosenblum, Parker Spears, Jeremiah Smith and Hobie Orton.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Melanie Brethauer and Duncan McPherson. As to the Progress Energy seat, SACEE has expressed an interest in converting this to a regular open seat (rather than an ex-officio for Progress Energy). It was the consensus of the Boards & Commissions Committee that Vice-Mayor Newman talk with Chairman Matt Raker to discuss this request prior to taking any action. The Boards & Commissions Committee will report their recommendation to Council after their next meeting.

Councilman Bothwell moved to reappoint Melanie Brethauer and Duncan McPherson to each serve a three-year term respectively, terms to expire December 31, 2013, or until their successors have been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 329

RESOLUTION NO. 11-22 - RESOLUTION APPOINTING A MEMBER TO THE

ASHEVILLE-BUNCOMBE FAIR HOUSING COMMISSION

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Paul Ford, Geraldine Melendez and Jeff McMickens, as members on the Asheville-Buncombe Fair Housing Commission, expired on December 31, 2010.

No one has applied for the vacancies on the Fair Housing Commission.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Jeff McMickens and to re-advertise for the remaining seats.

Councilman Smith moved to reappoint Jeff McMickens to serve an additional three-year term, term to expire December 31, 2013, or until his successors have been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 330

RESOLUTION NO. 11-23 - RESOLUTION APPOINTING A MEMBER TO THE FIREMEN'S RELIEF FUND

Vice-Mayor Newman, Chair of the Boards & Commissions Committee, said that the term of Leesa Gibbs, as a member on the Firemen's Relief Fund, expired on January 1, 2011.

The following individual has applied for a vacancy on the Firemen's Relief Fund: Christopher James Bradford.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Leesa Gibbs. He noted that Ms. Gibbs has served 3 2-year terms; however, the board only meets twice a year.

Councilwoman Manheimer moved to reappoint Leesa Gibbs as a member to the Firemen's Relief Fund to serve an additional two-year term, term to expire January 1, 2013, or until her successor has been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 331

RESOLUTION NO. 11-24 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE GREENWAY COMMISSION

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Stephen Jones and Marcia Bromberg, as members on the Asheville Greenway Commission, expired on December 31, 2010.

The following individuals applied for vacancies on the Greenway Commission: Sandy Taratino, Eric Rainey, Philip A. Ellis, Mary Weber, Charles Rosenblum, Robert Roepnack and Ally Donlan.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Stephen Jones and Marcia Bromberg.

Councilman Bothwell moved to reappoint Stephen Jones and Marcia Bromberg to each serve a three-year term respectfully, terms to expire December 31, 2013, or until their successors have been appointed. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 332

RESOLUTION NO. 11-27 - RESOLUTION APPOINTING A MEMBER TO THE METROPOLITAN SEWERAGE DISTRICT BOARD

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the term of Louis Bissette, as a member on the Metropolitan Sewerage District Board (MSD), expires on January 19, 2011.

The following individuals applied for this vacancy: Eric Rainey and Barbara Field.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended extending Mr. Bissette's term until June 30, 2011.

Councilman Russell moved to extend Louis Bissette's term until June 30, 2011, pending City Attorney verification that City's appointment of an MSD Board member can be extended. This motion was seconded by Councilwoman Manheimer and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 335

RESOLUTION NO. 11-25 - RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE AREA RIVERFRONT REDEVELOPMENT COMMISSION

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Joe Ferikes and Robert Camille, as members on the Asheville Area Riverfront Redevelopment Commission, expired on January 1, 2011. Both positions must be a riverfront or business property owner.

The following individuals applied for vacancies on the Riverfront Redevelopment Commission: Chris Joyell, Gail McCarthy, Eric Rainey and Philip A. Ellis.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Joe Ferikes and Robert Camille.

Councilman Smith moved to reappoint Joe Ferikes and Robert Camille to each serve a three-year term respectfully, terms to expire January 1, 2014, or until their successors have been appointed. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 333

RESOLUTION NO. 11-26 - RESOLUTION APPOINTING MEMBERS TO THE TRANSIT COMMISSION

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Kevin Jenkins and David Erb, as members on the Transit Commission, expired on December 31, 2010.

The following individuals applied for vacancies on the Transit Commission: Brett A. McCall, Joan A. Gryscavage, Kevin D. Cross, Pamela K. Fisher and Dennis Wayne Miller, and Flora Marr.

Vice-Mayor Newman said that the Boards & Commissions Committee recommended reappointing Kevin Jenkins and David Erb.

Councilman Smith moved to reappoint Kevin Jenkins and David Erb to each serve a three-year term respectfully, terms to expire December 31, 2013, or until their successors have been appointed. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 334

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Kyle Ross presented her research from 2000-2010 about the justice system in Buncombe County, specifically related to the Police Department. Specifically she spoke about the terminated police officer Roger Aly. She also presented Council with the Police Department's mission statement and guiding principles and asked Council hold the Police Chief accountable to those guiding principles. City Attorney Oast said that Council cannot discuss personnel in open session.

Councilman Bothwell complimented Public Works Director Cathy Ball and Assistant City Manager Jeff Richardson on their creative approach to use drug rehab workers to clear snow from sidewalks.

The following claims were received by the City of Asheville during the period of December 3-30, 2010: Geoff Alexander (Transit), Kathryn Assoian (Police), Michael S. Wyatt (Transit), James L. Brown (Parks & Recreation), Julie Dill (Transit), Elvis M. Pinkney (Transit), Frank Huggins (Water), Garret Burnett (Streets), Charter Communications (Water) and Jim Johnson (Fire). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:34 p.m.

Magdalen Bulleson
CITY CLERK

Jan M Bellamy
MAYOR

Friday – February 4, 2010 - 10:00 a.m.
Warren Wilson College
Gladfelter Building – Canon Lounge

City Council Annual Retreat

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr. (left meeting at 1:30 p.m.); Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Mayor Bellamy convened the meeting and welcomed everyone to the annual City Council retreat.

Mayor Bellamy thanked Warren Wilson College for hosting City Council's retreat and introduced Mr. Sandy Pfeiffer, President of Warren Wilson College, who briefly outlined the successful national model of partnership between the City of Asheville and Warren Wilson College.

He welcomed Council to the Warren Wilson College Campus and explained their shared vision of sustainability. He then outlined the many areas of partnership between Warren Wilson College and the City of Asheville.

Mayor Bellamy thanked Councilman Bothwell and Councilman Russell for their assistance on the retreat agenda. She then introduced Mr. Chuck Fink, facilitator, who asked each Council member what outcome they would like to see out of this retreat; how they will measure success of the retreat; and something about themselves that people don't know. He then reviewed the norms of the meeting and had Council do a short exercise regarding the quality of communication.

Discussion surrounded Director of Administrative Services Lauren Bradley's update on the impact of State budget on City of Asheville. Even though a lot is unclear and unknown, she felt we have a manageable process for a continuation budget. Staff will continue to closely watch the State's budget to see how it might impact the community.

It was the consensus of Council to have staff research the steps necessary to enable a voter referendum on sales tax to apply only in the City of Asheville and the timeline.

Discussion occurred through City Attorney Oast's update on the annexation bills and how they would affect our pending annexations. Council was in agreement that we need to educate members of our delegation on the (1) distinction between involuntary and voluntary annexation and encourage them to look at ways to give cities the ability to grow; and (2) need to look for creative ways for the City to grow showing how the City is managing their budget. He also responded to Mayor Bellamy regarding electronic gaming. It was the consensus of Council to support the initiative of the N.C. League of Municipalities' position on annexation.

It was the majority of Council to advise our legislators that City Council is not in favor of a moratorium that stops annexations already in process; but they recognize that the majority supports an anti-annexation bill. They would like the bill to continue to include a provision that they have seen in previous annexation bills that would allow cities to continue to require annexation of development adjacent to the city that makes use of City services, such as water.

Assistant City Manager Jeff Richardson briefly updated Council on the current Strategic Operating Plan. He, and other staff, responded to Council's questions/comments, noting that answers not readily available would be provided to Council.

Goals Setting

There was considerable discussion about the time period for the strategic goals. It was the consensus of Council to review and update the current strategic goals for 2010-11, with staff working immediately on any policy items that have no budgetary impact. However, if there is budgetary impact, it will be wrapped into the next fiscal year budget. Mayor Bellamy explained that after Council identifies their strategic goals, City staff will wordsmith the goals and bring them back to Council at a worksession for their review and then to a formal meeting for adoption. As the budget process for Fiscal Year 2011-12 proceeds, items with big budgetary impacts will go to the Finance Committee and then recommended to Council, possibly in worksession.

Each Council member explained their personal goals, which were then grouped into the following six focus areas: Affordable, Fiscal Responsibility, Green/Sustainable, Safe, Job Growth/Community Development, and Multi-Modal Transportation (which was added as an additional focus area).

Councilman Smith:

- Look at water rates with an eye toward small business
- Continuing the energy goals set to reduce internal costs
- Maintain commitment to Housing Trust Fund
- Affordable Housing Standing Committee
- Best ways to achieve some master plan goals
- Encourage and facilitate other job creators to connect them with small businesses
- Continue support of incubator program
- Look at food production – how can we support area farmers and area restaurants
- Need for bigger strides in multi-modal transportation
- Track effectiveness of the nuisance court
- Safety for pedestrians on the Hillcrest Pedestrian Bridge
- Add staff and resources to the APD's office for child internet exploitation

Councilman Manheimer:

- Rewrite of the UDO using a form based method
- Ask the DOT to look at the Merrimon Avenue corridor problem again since they have now adopted the complete streets policy
- Adopt a City of Asheville Complete Streets Policy
- Take action in finding ways to fund sidewalks/bike lanes/greenway projects in a comprehensive manner
- Continue to look at ways to resolve our budget health issues
- Continue to improve our governmental relationships with County Commissioners, state and local delegation, and neighboring municipal communities
- Reinforcement of comprehensive water rates
- Include elements of bike safety

Councilman Davis:

- Move forward with the Business Improvement District
- Support riverfront redevelopment
- Support Civic Center renovations
- Need for fireworks on the 4th of July and New Years Eve

Mayor Bellamy:

- Make sure that adopted master plans are still a priority
- Foster more employment in our community
- More engagement with the Land-of-Sky
- Review of our enterprise funds
- Seek funding from the Livable Communities Initiative
- Look for ways to fund the Capital Improvement Plan
- Look for ways to leverage our existing dollars for more pedestrian/bike dollars

Vice-Mayor Newman:

- Look at proposals on our clean energy commitments
- Need for more multi-modal transportation
- Look for funding for sidewalks and greenways
- Create a new sidewalk crew to focus just on new construction
- Partnership with County on greenways
- Continue to focus on regional issues facing the City – work more with County and state legislators
- Look for more regional sustainability initiatives
- Low income housing tax credit products
- Increase the scale of tax credit projects in Asheville
- Improve air service to the Asheville Regional Airport
- Review High Point model regarding reduction of crime

Councilman Bothwell:

- Referendum on public financing of local elections
- Eager to see GIS mapping
- Support UDO rewrite to form based code
- Review selling water to other municipalities
- Look for resources to fund Mountain Bike Skills Park
- Carefully review candidates for Planning & Zoning Commission
- Power Saver Program through the FHA
- Carbon assessment for whole community done by professors and interns at UNC-Asheville or Warren Wilson College
- Public/private partnership for adding solar panels to the Civic Center roof
- Consider a ban for tree-topping
- Review UDO spacing of trees in parking lots to help with heat effect
- Review steep slope law regarding lower elevations
- Reconsider fluoridation in Asheville water
- Advance bicycle and greenway master plans
- Study downtown trolley or circulating trolley in City of Asheville
- Need for more sidewalks
- Consider cost sharing with neighborhoods for more sidewalks
- Impact of increasing of parking fees and lowering deck rates for City residents
- Continue to look at the number of adequate handicapped parking spaces
- Look at Durham's new law which lets police use international id cards for legal id
- Consider 3 Strikes law – City not contracting with companies and contractors who have been found guilty of labor, civil rights, environmental or tax laws

Councilman Russell (was not in attendance during this part of the retreat).

Council then reviewed each of the existing goals and objectives which were confirmed, amended or deleted and included, by majority vote, any individual goals.

After reviewing each of Council's personal goals, the following is a list of the new goals and objectives that received majority support of Council, to be folded into the Strategic Operating Plan:

- Affordable Housing Standing Committee
- Review of wholesale and resale water across jurisdictional lines
- Increase engagement with Land-of-Sky on their water study
- Comprehensive review of enterprise funds, community education and transparency
- Analyze Community Improvement District
- Review tree topping policy
- Review requirements of parking lot trees regarding spacing and shade
- Seek to obtain the Livable Communities Grant
- Support "Between the Bridges" initiative
- Maintain momentum and build on partnerships for Civic Center improvements
- Look for partnerships for fireworks on 4th of July and New Years Eve
- Support and promote job growth
- Seek resources to enhance Police Department's internet child abuse program
- Monitor High Point's crime model
- Look for resources to fund sidewalks, bike lanes, greenways beyond pay as you go

In addition, the new multi-modal focus area definition was discussed and agreed upon as follows: "Integrate and implement a multi-modal transportation plan including sidewalks, bike paths, signal preemption, transit, greenways, streets, rivers and access to the river, and other system improvements resulting in a funding priority list."

The following list of personal goals, for the new multi-modal focus area, will be narrowed down at a worksession:

- Streets, sidewalks, greenways, river access, etc. Make headway – add new sidewalk crew to double output.
- Look for partnerships for greenway investment.
- Clearly develop long-term Capital Improvement Plan with funding plan. Growth: Take action for funding sidewalk, bike lane, greenway projects beyond pay-go; look for comprehensive strategy.
- Pursue a pedestrian and bike friendly community grant opportunity
  - Leverage existing dollars
- Solve the Merrimon Corridor problem
  - N.C. Dept. of Transportation analysis using Complete Streets Policy
  - Council adoption of Complete Streets policy
- Transit: Make multi-modal its own focus area; advance sidewalks, greenways.
  - Study downtown trolley
  - Evaluate cost-sharing for sidewalk projects
- Consider parking rate increase
  - Lower rate for residents
  - Adequate handicapped spaces
- Multi-modal Transportation for sidewalks, greenways, transit, etc. How can we increase support for this overarching goal?
- G.I.S. mapping of Master Plans.
- Evaluate and affirm goals to ensure alignment with Council and the community.
- Bike safety enhancements
  - Public education

Councilman Bothwell asked that as we try to go paperless that that staff not provide hard copies of PowerPoint presentations.

At the request of Councilman Davis, Mayor Bellamy, liaison to the Asheville School Board, will convey to them the extravagant look of their annual report, with Mayor Bellamy noting that they do have an in house print-shop.

Economic Outlook

Economic Development/Civic Center Director Sam Powers and Mr. Ben Teague, Senior Vice President of Economic Development at the Asheville Area Chamber of Commerce, reviewed with Council the overarching economic outlook for our area.

Wrap Up

When Councilman Smith felt this retreat felt rushed, City Manager Jackson said that if a facilitator would have been hired earlier a lot of the preparatory work could have been done in advance. Councilman Smith suggested the next retreat committee be identified sooner to begin work on the next retreat.

Councilman Davis was very pleased with the retreat location; however, since we also have a partnership with UNC-Asheville he suggested that as a location for the next retreat.

Adjournment

The retreat adjourned at 4:55 p.m.

Magdalen Bowleson
City Clerk

Mayor

Tuesday – February 8, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman William A. Russell Jr. (arrived in meeting at 5:21 p.m.); Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Bothwell gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF MS. KIT CRAMER, PRESIDENT AND CEO OF THE ASHEVILLE AREA CHAMBER OF COMMERCE

Mayor Bellamy was pleased to recognize Ms. Kit Cramer, President and CEO of the Asheville Area Chamber of Commerce. Ms. Cramer was announced at the Chamber's new President and CEO on November 15, 2010. Prior to accepting the position in Asheville, Ms. Cramer was President of the International Downtown Association in Washington, D.C. Prior to that office, she worked for the Charlotte Chamber of Commerce for 17 years in various management capacities.

B. CITY RECOGNITION IN NATIONAL ENVIRONMENTAL HALL OF FAME FOR MUNICIPAL SUSTAINABILITY EFFORTS

Mayor Bellamy said that the City of Asheville is honored to join a league of both national and international organizations and individuals to receive an award from the National Environmental Hall of Fame. This award acknowledges the City for our leadership in energy efficiency, renewable energy and energy conservation.

Ms. Erika Schneider from Sundance Power Systems presented the award on behalf of the National Environmental Hall of Fame, to Mayor Bellamy and Energy Coordinator Maggie Ullman.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JANUARY 25, 2011

B. RESOLUTION NO. 11-28 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE A LEASE AGREEMENT WITH THE UNITED STATES OF AMERICA FOR CONTINUED OPERATIONS OF AN ARMY RESERVE CENTER AT 224 LOUISIANA AVENUE

Real Estate Manager Nikki Reid said that this is the consideration of a resolution authorizing the Mayor to execute a Lease Agreement with the United States of America for continued operations of an Army Reserve Center at 224 Louisiana Avenue, Asheville NC.

The property at 224 Louisiana Avenue known as the Army Reserve Center is an 8.857 acre tract on the West side of Louisiana Avenue about 200' from its intersection with Patton Avenue. Although most of the property is generally level, there is a steep slope with rock outcroppings covering the Southeast quadrant of the property. This presents a formidable challenge to further grading of the property, so the useable area is about 6+ acres. The property is currently zoned Institutional.

The property has been leased to the USA since 1950 at a rent of $1.00 for the entire 50 year term. The single story building and other improvements located on the property were built by the Army Reserve and remain the property of the Reserve with the right of removal for the duration of the lease. The most recent lease was signed in 2000 at an annual rent of $60,000 with escalations based on the Consumer Price Index.

At this time, the USA has offered to enter into a lease based on a rental rate that is more consistent with market based pricing, as follows:

(1) Term of five years
(2) Annual rental fee at an initial rate of approx. $82,000 per year with 5% annual increases

The USA procured an appraisal of the property to produce the new rental rate. City staff has further reviewed the pricing, by gathering and comparing lease rates of similar size and location within the Asheville market. On both accounts, there appears to be a gap between what is currently being paid by the USA (now $66,000/year) and the market rate for this property, approximately $100,000 per year. The new rental rate put forth at $82,000 and the 5% escalation rate allow a steady increase towards the market based price. The USA would pay for all utilities and other tenant expenses associated with operating the site.

The Notice of Intent to enter into a Lease Agreement with the United States of America was published on January 28, 2011, in the Asheville Citizen-Times. Ten days have passed since the publication and authorization to execute the Lease Agreement is being requested.

This action complies with the City Council Strategic Operating Plan by contributing to fiscal responsibility. Strategic real property management, through the renewal lease agreements, presents the City with revenue enhancements to the General Fund.

Pros:

- Enhanced revenue through the lease fee income
- USA provides a valuable public service and is an excellent tenant

Con:

- None

The proposed increase to the lease amount will be built into the upcoming budget cycle for the Fiscal Year 2011-2012 budget. During the next four subsequent years, the lease rate will increase by 5 percent annually. Over the life of the five year lease, the city will realize more than $450,000 in revenue.

City staff recommends City Council adopt a resolution authorizing the Mayor to execute the lease agreement with United States of America on behalf of the City of Asheville.

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution on the Consent Agenda and it would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Smith and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. INTERIM REPORT ON WATER RATE STUDY

Water Resources Director said that in September 2010, City Council adopted a resolution authorizing Water Resources to enter into a contract with Raftelis Financial Consultants to conduct a Water Rates & Fees Study. Following is a summary of recent action steps that have been accomplished and/or are in progress:

- Organized a kick-off meeting with Water Resources staff to identify the goals, objectives, and expectations of the water rate study.
- Gathered billing, water usage, and meter data to determine if the current rate structure achieves revenue sufficiency, stability, and sustainability and ensures full cost recovery for services rendered.
- Analyzed past, current, and proposed budget data to predict future needs for the following costs: operating and maintenance, salaries, overhead, materials, debt service, Sullivan Act transfer, indirect costs, capital project needs, etc.
- Ensured any changes will be compatible with the new billing software.
- Attended a Finance Committee meeting to provide a progress update and receive feedback on the information presented.
- Benchmarked Asheville with other water utilities as a comparison.
- Developed a rate model with a five-year planning period that will be used to project water rates necessary to support all costs associated with providing water service.
- Propose changes to the existing rate structure to ensure that the water fund continues to be self-supporting while ensuring water customers pay fair and equitable rates.

This project is part of City Council's strategic plans to explore opportunities to ensure effectiveness and value for water fees charged and to operate the City of Asheville to the highest level of fiscal responsibility.

Pro:

- Present a progress report of the water rate study and solicit input to include in the final report.

Con:

- The study is not complete at this time. A final report with findings and recommendations is expected to be completed by April 2011.

Staff is looking for City Council feedback on the information presented by Raftelis.

Mr. Lex Warmath, representing Raftelis Financial Consultants, provided Council an update regarding the status of the Water Rate Study. He said some pricing and community objectives from Council will help them shape the next steps in the rate study.

Using charts, he showed how the revenues are slightly above the expenses for Fiscal Year 2011-12, and they do not see a need to adjust rates for next year in order to meet their revenue requirements. However, based on some assumptions (which he explained in detail), Council will need to do something over the next several years since there starts to be a gap between projected expenses and revenues under current rates.

He explained (1) how Asheville compared to other communities (a) Asheville's water sold is below average for comparable systems; and (b) City's annual capital spending is below average for comparable systems; (2) how Asheville compared to local customers, explaining how Asheville's rates are high, but that was based on Asheville's average customer usage (which is very low). The other cities (Hickory, Raleigh, Cary, Knoxville, Greensboro, Charlotte, etc.) have a tiered structure to encourage conservation; again however, Asheville customers conserve; and (3) how Asheville compared nationally, which for residential customers Asheville is higher than the average and for large industrial users, Asheville is much lower than the average.

He showed statistics on the usage and revenue distribution by class. It showed the majority of usage is by single-family residential and a good part is by multi-family residential; however, there is a much bigger proportion of revenues coming from residential customers than their demand profile would indicate.

He reviewed the following rate structure modification ideas: (1) raise commercial and multi-family rates elative to single family (a) provide more equitable cost recovery; (2) separate irrigation from residential rate (a) targets true to elective usage; and (3) capital improvement charge (a) meter differentials.

In response to Mayor Bellamy, Mr. Shoaf said that there is no recommended increase for Fiscal Year 2011-12. The next step is that Raftelis will prepare the final report which will include not only their findings but recommendations moving forward as well as a computerized rate model where we can plug in different scenarios. Going next year forward they will be going through the normal budget process on how Council like to approach the different scenarios.

In response to Councilwoman Manheimer, Mr. Warmath said that they would like to get some policy direction from Council to generate alternative models. City Manager Jackson said that the sooner we can get the changes in policies, the sooner we can get it considered in the rest of the budget cycle which runs through at least the end of May, 2011.

Out of Council member discussion, they were interested in seeing (1) the rate structure adjusted for single-family residential customers who are subsidizing commercial/industrial users; (2) the rate structure adjusted for single-family residential customers who are subsidizing multi-family users; (3) an incentive plan for conservation; (4) the effect of stopping the Sullivan Act transfers; (5) seeing the commercial/industrial users being more in line with other cites; (6) opportunities to upgrade pumps that will help save energy and money; (7) ways to cut expenses departmentally; (8) what our wholesale customers are paying compared to our peers across the state and if low to gradually increase the rates so they can budget for it in future fiscal years; and (9) separating out the actual Sullivan Act transfers from support services.

It was the consensus of Council that City Manager Jackson instruct Mr. Shoaf to guide the consultant in completing the analysis to include rate adjustments for the March 22 worksession.

CLOSED SESSION

At 5:51 p.m., Councilman Smith moved to go into closed session for the following reasons: (1) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including potential litigation. The statutory authorization is N.C. Gen. Stat. sec. 143-318.11(a)(3); and (2)

To prevent disclosure of information that is privileged and confidential, pursuant to the laws of North Carolina, or not considered a public record within the meaning of Chapter 132 of the General Statutes. The law that makes the information privileged and confidential is N.C.G.S. 143-318.10(e). The statutory authorization is contained in N.C.G.S. 143-318.11(a)(1). This motion was seconded by Councilman Bothwell and carried unanimously.

At 6:10 p.m., Councilwoman Manheimer moved to come out of closed session and return to the Council meeting. This motion was seconded by Councilman Bothwell and carried unanimously.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE WHICH WOULD ALLOW THE COMBINATION OF THE STORMWATER UTILITY FEE ONTO THE COMBINED UTILITY BILL

ORDINANCE NO. 3946 - ORDINANCE TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING A MODIFICATION TO THE STORMWATER ORDINANCE

Mayor Bellamy opened the public hearing at 6:13 p.m.

Stormwater Services Manager McCray Coates said that this is the consideration of an ordinance amend the Unified Development Ordinance (Section 7-12-6) which would allow the combination of the stormwater utility fee onto the Combined Utility Bill. This public hearing was advertised on January 29 and February 4, 2011.

Staff is currently working to improve efficiency by placing the stormwater utility fee on the Combined Utility Bill (water bill). Currently the Stormwater Utility Fee is billed separately, with single family residential properties billed once annually and non-single family properties billed twice annually. The Combined Utility Bill is on a bi-monthly billing cycle. City staff has received requests from numerous individual property owners asking for the combination to take place.

City staff is seeking the ability to combine these utility bills where matching accounts are present and where practicable. For a single family residential property owner who currently receives a stormwater utility bill in the amount of $28.08 once a year, the utility fee will be placed on the combined utility bill on a bi-monthly basis in the amount of $4.68. For the non-single family property owner who currently receives the stormwater utility bill two times per year, they will receive the combined utility bill with the stormwater utility fee included which will be one-sixth of their annual rate. For those accounts that are not serviced by another utility, an individual stormwater utility bill will be generated and sent to the property owner on the same billing cycle as currently established.

Staff is asking for this now because the City is in the process of updating the billing software currently used. In addition, the new software allows staff the ability to move forward and provide the citizens better customer service by combining the bills.

The current billing cycle for the stormwater utility fee for single family residents takes place January-February. Non-single properties receive the bill bi-annually in November-December and again in May-June. The proposed changes will begin in July of 2011.

Regarding challenges, (1) customer education will be necessary; (2) not all water accounts are possible to match with the stormwater utility (some stormwater accounts will need to be billed separate from the water bill); (3) customer service staff will need additional training to respond to questions as they relate to the stormwater utility fee; and (4) if the water service is discontinued, individual billing will be required to be sent to the property owners.

This action complies with City Council's Strategic Operating Plan under Fiscal Responsibility in that it (1) Provides more efficiency in current process; and (2) Reduces extra billings for the different services provided by the City.

Pros:

- By placing the stormwater utility fee on the combined utility bill, an increased collection rate from 94% to 98 % is estimated to occur for matched accounts
- This will provide an additional customer convenience by receiving one standardized bill instead of two or more
- This will reduce duplication of administrative costs by the alignment of billings for Water, MSD, Recycling and Stormwater.
- Combination of the utility bills will reduce postage costs and paper use.
- The new utility billing system will facilitate change in process (MUNIS)
- Cash flow will be improved as a result of the combination

Cons:

- Education of the customers will be necessary
- Not all water accounts are possible to match with the stormwater utility (some stormwater accounts will need to be billed separately from the Water Bill)
- Customer Service Staff will need to be educated to respond to questions as it relates to the stormwater utility fee
- If water service is discontinued at a location, separate Stormwater billing may be required to be sent to the property owner under specific circumstances.

Including the stormwater utility fee on the Combined Utility Bill will have a net positive budget impact of approximately $69,000.

Staff recommends City Council approve the modifications to the stormwater utility ordinance allowing the stormwater utility fee to be placed on the combined utility bill, to be effective July 1, 2011.

A resident on Forest Hill Drive recommended the bills be sent out electronically to save postage.

Mayor Bellamy closed the public hearing at 6:20 p.m.

In response to Mayor Bellamy, Mr. Kevin Hymel, GIS and Application Services Manager, explained that after the system goes live, the process of phasing in electronic billing will be an option.

Mr. Coates responded to Councilman Davis regarding tenant-occupied bills.

In response to Councilman Russell, Councilwoman Manheimer said that the Finance Committee is discussing changing the name of the bill. City Manager Jackson said that staff would provide that information to Council in a memorandum.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Smith moved for the adoption of Ordinance No. 3946. This motion was seconded by Councilman Bothwell and carried unanimously.

ORDINANCE BOOK NO. 26 – PAGE 446

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATIVE TO CHANGES TO DEVELOPMENT REVIEW PROCEDURES REGARDING RESUBMISSION OF A DENIED CONDITIONAL USE AND SEPARATION REQUIREMENTS

ORDINANCE NO. 3947 - ORDINANCE TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATIVE TO CHANGES TO DEVELOPMENT REVIEW PROCEDURES REGARDING RESUBMISSION OF A DENIED CONDITIONAL USE

ORDINANCE NO. 3948 - ORDINANCE TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATIVE TO CHANGES TO DEVELOPMENT REVIEW PROCEDURES REGARDING SEPARATION REQUIREMENTS

Mayor Bellamy opened the public hearing at 6:26 p.m.

Planning & Development Director Judy Daniels said that this is the consideration of two ordinances amending the Unified Development Ordinance (UDO) relative to changes to development review procedures regarding (1) resubmission of a denied conditional use; and (2) and separation requirements to be more consistent with adopted plans and goals. This public hearing was advertised on January 29 and February 4, 2011.

Recent development projects have raised concerns regarding the ability to divide larger development projects not supported by the Council as a means to reduce review thresholds effectively circumventing intended Council reviews and/or conditions designed to mitigate the impact of larger projects. The proposed modifications are intended to better reflect the intent of the Council and the 2025 Master Plan in two ways.

The first amendment below would ensure that decisions of City Council to deny development projects are upheld and that the proposed change expands the range of projects that are precluded from going forward after denial by the Council. Currently a Level III conditional use permit is already denied. This expands that to other types and levels of developments. The first amendment is as follows:

"Sec. 7-5-5(e)(3)(d) - Conditional Use approvals, resubmission of denied applications:

d. No application for approval of a ~~conditional use~~ development project (conditional use, site plan, project plan) under any approval process (Level I, Level II, or Level III), shall be filed with or accepted by the planning and development department if that project ~~which~~ is identical or substantially similar to a conditional use or conditional zoning application which has been denied by the city council within one year of the final action by the city council denying the request."

The second change ensures that separation requirements that were intended primarily to assist development projects in commercial areas do not cause unintended impact to residential neighborhoods. This change was proposed by City staff last year. What we had in mind are places like the Airport, which might be doing a runway expansion, parking lot expansion, or an office expansion. They didn't relate to each other, but they were within a contiguous area. Limiting that separation requirement meant Council didn't have to review things that were minor in the greater scheme of what is reviewed. Staff was not considering residential situations when that was proposed and the current development that caused this conservation did bring it to staff's attention. Staff felt that should be corrected. The second amendment is as follows:

"Sec. 7-5-9(b)(1)(c) - Level II Site plan review process:

c. Properties not adjoining or fronting single-family zoning, that are within 500 feet of each other, under the same ownership and/or developed by the same developer over a period of three years or less shall be considered to be one development and reviewed as such. Properties adjoining or fronting single-family zoning, located within 1,500 feet of each other, under the same ownership and/or developed by the same developer over a period of three years or less shall be considered to be one development and reviewed as such."

This action complies with the City Council Strategic Operating Plan in that it supports sustainable development practices by ensuring the appropriate levels of review are reserved for high density/higher impact projects where mitigating conditions may be necessary for community compatibility. This action also complies with the 2025 Master Plan in that it supports the goal of providing options for new development while minimizing impact and balancing compatibility with existing neighborhoods.

The Planning & Zoning Commission reviewed these proposed amendments at their January 20 meeting. With 4 of 6 current commissioners present, they voted 4-0 to not support the first amendment (related to applications similar to denied proposals), and 2-2 on the second amendment (separation requirements). Because these amendments were initiated by the staff, they proceed to the Council with these recommendations.

The Commission generally seemed to express concern that the proposed amendments were too closely related to the recent Caledonia project, and needed more time and thought to consider what "unintended consequences" they might cause. Two commissioners supported the change to the separation requirement, supporting the staff position that the UDO change that decreased the separation requirement was not intended for locations that adjoined residential neighborhoods, but for commercial areas.

Pros:

- Will protect the intent of the Council when they deny a conditional use application, and
- Will better protect residential areas from inappropriate higher density/higher intensity development

Cons:

- Will limit development options for properties that were denied a conditional use approval, and
- Will put some additional limits on property in residential areas

City staff recommends City Council adopt the two ordinances amending the UDO.

The following individuals spoke in support of Council adopting the two UDO amendments:

Ms. Barber Melton, Vice-President of the Coalition of Asheville Neighborhoods (CAN)
Ms. Tracy Stubbing, resident on Finalee Avenue
Ms. Susan Roderick, member of the Technical Review Committee
Kenilworth resident
Ms. Miller Graves, resident on Caledonia Road
Ms. Roberta Newman, Kenilworth resident
Mr. Terry Weeks, resident on Pickwick Road
Ms. Teddy Jordan, resident on Normandy Road
Ms. Patsy Brison, attorney representing Kenilworth Residents Association

Mr. Mike Butrum, representing the Asheville Board of Realtors, felt City Council should table these amendments in order to give the parties involved the opportunity to meet to find a win/win solution, so there are not any unintended consequences.

Mr. E. Thomison Holman, attorney representing Caledonia Apartments, LLC, explained why he felt the proposed amendments are improper, are inconsistent with prior decisions, sets bad policy and is bad policy for City residents. Procedurally, he believed that this matter is not properly before City Council with regard to the first amendment. There needs to be compliance with Section 7-7-4 and that has not occurred with regard to the amendment regarding the separation requirements. Substantively, circumstances given rise to these amendment and the fast track demonstrate that the amendment has been proposed in direct response to the Caledonia projects and that is an improper purpose. Caledonia respectfully reserves all of its rights and remedies relating to this. Broader issues which City Council needs to consider are (1) Code provisions were not enacted because of one developer or one neighborhood and they not the reasons why the Code should be changed; (2) loss of economic benefits to the community which Council considered when it adopted the economic relief amendments in June of 2009; (3) substantial consideration, beginning in the fall of 2008, was put into the amendments before they passed in March and June 2009; (4) even if City Council did not pass the permanent economic relief amendments, the economic reasons for passing the amendments have not gone away; (5) good projects that could and will have a substantial impact will be killed or hurt by these amendments; (6) if the amendments are adopted, the direct effects will be the projects that won't occur and the indirect effects will be the message sent to other developers weighing whether to invest their own livelihood and dollars in Asheville vs. elsewhere if they feel the rules will or may be changed at any moment; (7) adopting these amendments will establish a bad policy, regardless of what Council may think of the Caledonia projects, will weaken the integrity of the UDO; (8) it's critical that people who consider investing in the City know that the rules are applied equally and know that if they follow the rules they won't be changed in the middle of the process; and (9) understanding that the UDO needs to be malleable, but not such that provisions can be so easily modified or discarded based on isolated perceived negative affects of a particular provision. If Council believes that the benefits to these amendments outweigh the cost, he urged them to table a vote on these amendments and implement the same study and consideration given to when it was passed initially.

City Attorney Oast advised Council that this is an ordinance amendment that will apply not to a particular project, but potentially to many.

Ms. Patty Beaver, representing the Council of Independent Business Owners (CIBO), felt that Council is in such a haste to pass these amendments, that they have not gone through the normal public scrutiny that usually takes place before major UDO amendments are approved. They are unaware of meetings with the normal organizations, such as CIBO, Board of Realtors, the Homebuilders, the Chamber of Commerce, and all the various neighborhood associations in the area. This is unusual since they have always participated on one of the groups or as part of larger committees working on these changes. In the past these efforts have resulted in all kinds of well-thought-out regulations. Their concern is that quick passage leads to unintended consequences that may have been flushed out during the normal process that Council has always followed in the past. She asked Council to consider carefully their actions to make sure that what they are doing will be the best for the entire community. Should Council find it worthwhile to delay for further study, they would certainly be available to participate.

Mr. Rick Grant, developer, felt that changes to the UDO due to knee jerk reaction from one project sends the wrong messages to potential developers. City Council needs to encourage, not discourage, sensible development.

Mayor Bellamy closed the public hearing at 7:08 p.m.

In response to Councilman Russell, City Attorney Oast explained the Planning & Zoning Commission vote. Because one of the ordinance amendments failed to get a positive recommendation, we treat that as a negative recommendation for the purposes of forwarding it onto Council. That is consistent on how we interpret Section 7-7-4 over the years.

In response to Councilman Russell regarding the fast track of the ordinance amendments, City Attorney Oast said that staff has followed the process outlined in the City Code. As far as other interest groups being able to comment, he wasn't aware that that opportunity was ever denied. The Planning staff usually do that kind of outreach or not, depending on the nature of the ordinance.

In response to Councilman Russell, Ms. Daniel said that regarding the Planning & Zoning Commission, they had a quorum. Regarding their lack of support, they expressed their opinions and they had their vote. This type of amendment initiated by staff requires only to go to the Planning & Zoning Commission to get their opinion before it is brought before City Council. Other types of amendments, if rejected by the Planning & Zoning Commission are not brought to the Council. This type of amendment is. Her position in proposing these amendments was that staff heard Council's intent and concerns, and felt it was important to give Council the opportunity to speak toward that in preservation of their intent. This does not stop anything, but gives staff the opportunity to look at something and if it was essentially the same project that the Council had considered before, staff would say that needs to wait one year. If it is substantially different, the project would go forward. Regarding the separation requirements, the amendment is correcting something that was not intended. In terms of quick action, since it came to their attention, she felt it was worthwhile to bring it forward for Council's attention.

When Councilman Russell felt that 1500 feet is a big space, Ms. Daniel pointed out that that was the requirement adopted in 1997 until it changed in 2009.

Councilman Russell felt it would have been helpful to have the minutes of the Planning & Zoning Commission discussion for their review.

In response to Councilwoman Manheimer regarding the first amendment, City Attorney Oast said that since the UDO was adopted in 1997, we have a few other land use processes to use – not only the conditional use permit, but conditional zoning, which did not exist at the time the original language was put in place.

Councilman Bothwell belt both amendments bring more consistency to the UDO. The provision in place regarding resubmission of a denial conditional zoning seems to be the will of the Council. He didn't think that Council thought the same project would reemerge in a different form through a different avenue before the one-year. Regarding the separation requirement, we are just reverting back to what was adopted in the original UDO.

Councilman Smith felt we work hard to streamline a more predictable process for builders in Asheville. This understandable and equitable process was to make it predictable for builders, neighborhoods and Council. Everyone needs to trust in the process.

Mayor Bellamy said that members of Council have previously received copies of the ordinances and they would not be read.

Vice-Mayor Newman moved to adopt Ordinance No. 3947, amending the development review procedures regarding resubmission of a denied conditional use. This motion was seconded by Councilman Bothwell.

Vice-Mayor Newman felt it was a mistake to do too much when the economy is down or do too much when building is booming. He felt Council needs to think of the long term policy to encourage the right kind of pattern of development. He felt Council has done a number of different policies that have been very pro-growth for Asheville, but he felt these amendments are positive clarifications to safeguard the areas that are more residential.

Mayor Bellamy raised questions concerning a public hearing on the same night as adoption of the original UDO in 1997 regarding a zoning vested rights request. City Attorney Oast said that the process was one available in our Code and is authorized by law. It is a mechanism by which Council can recognize a vested right in a certain site specific development plan. That has not occurred here. The approval by the TRC was conditional and he is not sure if we are talking about the same thing.

Mayor Bellamy felt that when the UDO amendments were adopted in 2009, Council felt like it was the right thing to do and it had gone through the proper channels as far as public outreach. She felt that regarding the project discussed tonight, the developer felt the project was different enough not have to wait the one-year. She felt that the amendment adopted in 2009, which included residential, is now being utilized by a developer. Her concern is that the amendment is still not clear to what we feel is wrong as it relates to the project talked about. If the City is sued, that will be more taxpayer dollars to defend something still not clear. She also felt that the ordinance was fast-tracked to Council. She wondered if a mediator could talk to the developer and neighborhood to see if there can be a win/win solution and then address this issue with the normal template we use having input from other groups. Sounds like the neighborhood is saying that they support development, but not at 100 units. Developers are saying that they have property and they want to develop it. She felt we have gone against our normal process in building trust with the community.

Councilman Davis was concerned with these amendments on the rush to get it to Council. He wondered about the definition of substantial difference. He would rather these amendments go through the normal process for public outreach.

Councilwoman Manheimer wanted to be known as a community that is somewhat predictable for the business community because that is fair. She also didn't want to drive away people that have money and time and great things to invest in Asheville. However, she feels the amendment is to enforce the spirit of the law and not just the letter of the law.

The motion made by Vice-Mayor Newman and seconded by Councilman Bothwell, carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no."

City Attorney Oast noted that because the ordinance was not adopted by 2/3 vote of Council, this ordinance will need to come back to Council at their next meeting for the second and final reading.

ORDINANCE BOOK NO. 26 – PAGE 450

Vice-Mayor Newman moved to adopt Ordinance No. 3948, amending the development review procedures regarding separation requirements. This motion was seconded by Councilman Bothwell.

The motion made by Vice-Mayor Newman and seconded by Councilman Bothwell, carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Russell voting "no."

City Attorney Oast noted that because the ordinance was not adopted by 2/3 vote of Council, this ordinance will need to come back to Council at their next meeting for the second and final reading.

In response to Mayor Bellamy, Ms. Daniel said that between now and the second reading she would do outreach to various groups and report back to Council.

ORDINANCE BOOK NO. 26 – PAGE 452

At 7:39 p.m., Mayor Bellamy announced a short recess.

V. UNFINISHED BUSINESS:

A. UPDATE AND PREVIEW OF PLANS FOR THE VISITORS CENTER IN PACK SQUARE PARK

Mr. Guy Clerici, Chairman of the Pack Square Conservancy Board, said that they have received a grant from the Buncombe County Tourism Development Authority which will allow them to complete the downsized pavilion. The grant covers not only construction, but landscape architecture work and finishing the mid-park area entirely. The size of the pavilion has been reduced to 60% in order to reduce the impact of that site, maintain the view corridors, etc. He outlined the changes from the original building, noting that the pavilion is now 1,300 sq. ft. compared to the original building of 4,600 sq. ft. The building is also intended to provide the City means of adding if necessary in the future or taken away. They have incorporated a lot of the use of the park into this design.

Mr. Charles Krekelberg, project designing architect, using the site plan, explained the building's current design. It is now a support building that supports the use of the park. On the left side there are four unisex restrooms on a central corridor and a rinse-off area. In the middle is a covered breezeway. On the right side is the Visitor's Center, a toilet facility and three offices for the Pack Square Conservancy. From the Visitor's Center desk, there will be visual connection of the restrooms and rinse off area. The building is surrounded by landscaping, allowing tents to be located in the Park area that may support the amphitheatre or a significant event taking place in the Park.

In response to Councilman Bothwell, Mr. Krekelberg said that the rinse off water was not required to be heated, noting that limiting use was the goal.

When City Attorney Oast said that under our agreement that established the Pack Place Conservancy in 2001, City Council does retain approval of the design elements of the park.

Councilwoman Manheimer was unaware that a vote was to be taken at this meeting and that the report was only an update. Therefore, she asked for a motion to recuse her from voting due to a conflict of interest. Councilman Russell moved to recuse Councilwoman Manheimer from voting in this matter. This motion was seconded by Councilman Smith and carried unanimously.

When Mayor Bellamy asked for public comment, no one spoke.

Councilman Russell moved to approve the downsized design elements of the pavilion. This motion was seconded by Councilman Bothwell and carried unanimously (with Councilwoman Manheimer being excused).

VI. NEW BUSINESS:

A. RESOLUTION NO. 11-29 - RESOLUTION TO IMPLEMENT DISCOUNTED TRANSIT TICKET AND PASS PROGRAM TO SERVE PERSONS EXPERIENCING HOMELESSNESS

Homeless Initiative Coordinator Amy Sawyer said that this is the consideration of a resolution to provide Agencies serving persons experiencing homelessness with discount transit tickets and passes for distribution to those persons, effective now through the remainder of this fiscal year.

For several years the Homeless Coalition and other community networks such as BEACON (the Buncombe Emergency Assistance Coordinating Network) have recognized that transportation is one of the biggest unmet needs in the community, and a barrier to obtaining and maintaining housing,

A key way agencies assist people asking for help with transportation is to offer people bus tickets and passes. Over time, agencies have independently approached the City of Asheville seeking free or discounted tickets and passes to varying degrees of success. Agencies have also worked with their donors to provide people with transportation aid when possible. However, the support has been intermittent and often only partially meets the need of any one household.

To gain consistent access to bus tickets and passes for a greater number of people, the Homeless Coalition, which represents a collective of over 40 different agencies and groups, voted to create a plan and make a collective request to the City of Asheville. The goal would be to access affordable bus tickets and passes for people experiencing homelessness or at imminent risk of experiencing homelessness in the community.

Subsequently, the Homeless Coalition developed a transportation subcommittee to review the need, availability, and possible solutions to accessing bus passes and bus tickets for people experiencing homelessness or at imminent risk of experiencing homelessness. This Transportation Subcommittee met with the City of Asheville Transportation Department to discuss bus fee/rate structures and options.

As a result, the Transportation Department has included in their Fiscal Year 2011-12 budget a proposal that agencies would be able to purchase tickets at the discounted rate currently available only to people with documented disabilities. This rate is one-half the market rate. If approved by City Council as part of the upcoming year's budget, this would go into effect July, 2011 (at the onset of the new fiscal year).

The Homeless Coalition and Homeless Initiative Advisory Committee support the Transportation Department's proposal to offer discounted passes to agencies on behalf of people experiencing homelessness or at imminent risk of experiencing homelessness. The Coalition has developed a process for purchasing bus tickets at the discounted rate.

The Homeless Coalition and Homeless Initiative Advisory Committee, however, see that this is an immediate need. To that end, the Homeless Initiative Advisory Board approached the Housing and Community Development Committee (HCD) at their January 21, 2011, meeting to explore whether the discount could be made available now.

After hearing the proposal, and getting feedback regarding its financial implications, the HCD Committee endorsed unanimously bringing this proposal before the entire Council.

The Homeless Coalition is also working with a team of community members who are independently working to raise funds to offset the cost of tickets and passes. "Bus Pass it On" is looking for donations and to partner with local businesses in this effort.

These changes directly support the City's Strategic Operating Goals as follows: (1) *Affordable:* this program would enhance the affordability of Asheville Transit's bus pass program; and would support initiatives to end chronic homelessness;

Pros:

- Directly assist persons experiencing homelessness access housing, jobs and services;
- Existing organizations are in place to operate this programs and ensure that the purposes for which the transit discounts are used are appropriate;

Con:

- Service agencies will need to raise the funds to purchase the discounted passes.

The Transit Division indicates that the proposal does not have a measurable fiscal impact. No change in costs results because the proposal does not affect schedules, personnel and or other costs of delivery of transit services. It may result in an increase in revenue, depending on demand.

City staff recommends City Council adopt the resolution to support the immediate implementation of the discounted bus pass program to serve persons who are homeless, effective to the end of this fiscal year.

Vice-Mayor Newman, Chair of the Housing & Community Development Committee, spoke in support of the resolution and responded to Councilman Bothwell on how the prices were determined.

When Mayor Bellamy asked for public comments, none were received.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 11-29. This motion was seconded by Councilman Smith and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 337

B. DISCUSSION OF EARLY VOTING SITES FOR 2011 CITY COUNCIL ELECTION

Mayor Bellamy said that the Buncombe County Board of Elections is in the process of preparing their budget for 2011-12 and has asked if City Council will want early voting sites for their election this year.

City Clerk Burleson provided Council the following information to assist Council in their decision: (1) In 2009, City Council requested by Buncombe County Board of Elections to add four additional early voting locations one week before the general election on November 3, 2009. They were located at Parks & Recreation on Gashes Creek Road, North Asheville Branch Library, West Asheville Branch Library and South Buncombe Branch Library. Out of the total cost for the November election ($122,786), approximately $39,406 were costs associated with the early voting sites. This is a conservative estimate. There were 3,357 City voters who took advantage of the early voting sites; (2) The City of Asheville will have 37 normal polling places in October and then again in November. If remote sites are opened in November, the Board of Elections will have to provide ballots for all voters for all municipalities, per the State Board of Elections; (3 The City must notify the Board of Elections 90 days before the election in order for them to submit a plan of implementation to the State Board of Elections for approval. Generally, the sooner we let the Board of Elections know about remote sites the better; (4) While the Board of Elections will certainly aim to provide the desired location for the one-stop sites, ultimately the final specific decision lies with the County Board of Elections and the State Board of Elections. Many factors have to be considered in these decisions; (5) Citizens will indeed always have the opportunity to vote early at the downtown office at 35 Woodfin Street for the full time period; and (6) A cost guideline would be $1,000 per day per site. This is an estimate since there are many line items that are significantly affected by the number of sites opened, i.e., training, advertising, travel, number of employees, overtime, etc.

City Council requested additional information to be made available at the March 8 meeting before a determination is made. Said information includes: how many people took advantage of early voting in 2007 when it was only located at the Board of Elections; how many

people took advantage of the early voting site in 2009 at the Board of Elections building only; and, will A-B Tech share in the cost of the general election since they will have a question on our ballot.

C. RESOLUTION NO. 11-30 - RESOLUTION APPOINTING A CHAIRMAN TO THE CIVIL SERVICE BOARD

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that Larry Harris currently serves as Chairman of the Civil Service Board. The Civil Service Law for the City of Asheville, Section 2, Chapter 303 of the 1999 Session Laws of the North Carolina General Assembly provides that the Chair of the Civil Service Board shall be appointed annually by the City Council.

The current members of the Civil Service Board include: Chairman Larry Harris, Jacquelyn Hallum, Alan Coxie, Virginia Robinson and Marvin Rosen.

It was the recommendation of the Boards & Commissions Committee to reappoint Larry Harris to serve an additional year as Chairman of the Civil Service Board.

Councilwoman Manheimer disclosed that Mr. Harris is a partner in her law firm; however, City Attorney Oast has advised her that that would not disqualify her from voting in this matter.

Councilman Russell moved to reappoint Larry Harris to serve an additional year as Chairman of the Civil Service Board. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 338

D. RESOLUTION NO. 11-31 - RESOLUTION APPOINTING MEMBERS TO THE TREE COMMISSION

Vice-Mayor Newman, Chairman of the Boards & Commissions Committee, said that the terms of Robert Oast Sr. and Parker Andes, as members on the Tree Commission, expired on December 31, 2010. Both individuals are not eligible to serve another term.

On January 25, 2011, City Council instructed the City Clerk to arrange interviews for Debbie Emmons and Mike Kenton.

Councilman Smith moved to appoint Debbie Emmons and Mike Kenton to each serve a three-year term respectfully, terms to expire December 31, 2013, or until their successors have been appointed. This motion was seconded by Councilman Bothwell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 339

E. BOARDS & COMMISSIONS

Regarding the Asheville-Buncombe Fair Housing Commission, it was the consensus of Council to readvertise for the vacancies due to no interested applicants.

RESOLUTION NO. 11-32 – RESOLUTION RESCINDING RESOLUTION NO. 11-27 EXTENDING THE TERM OF LOUIS BISSETTE ON THE METROPOLITAN SEWERAGE DISTRICT

Vice-Mayor Newman said that at the January 25, 2011, City Council meeting, Resolution No. 11-27 was adopted extending the term of Mr. Louis Bissette on the Metropolitan Sewerage District (MSD) Board for six months, term to expire June 30, 2011. However, after City Attorney

review of the applicable statutes, it has been determined that City Council may not extend or shorten MSD terms. Mr. Bissette can, however, continue to serve until his successor has been appointed and qualified. Therefore, Resolution No. 11-27 will need to be rescinded.

Vice-Mayor Newman moved to adopt Resolution No. 11-32 to rescind Resolution No. 11-27. This motion was seconded by Councilman Russell and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 340

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

A. CLAIMS

The following claims were received by the City of Asheville during the period of January 3-17, 2011: Jennifer White (Streets), Eric Velez (Water), Melanie Yeager (Fire), Brenda Farmer (Fire), Marc Murray (Streets), Debra Cochran (Streets), Linda Horton (Streets), Justin Wyatt (Police), Amanda Hyler (Transit), Mike Herron (Sanitation), Teresa Mosely (Water), Jeff Mayen (Streets), Pat McAfee (Sanitation), AT&T (Water) and Wayne Jewsbury (Streets). These claims have been referred to Asheville Claims Corporation for investigation.

The following claims were received by the City of Asheville during the period of January 28-February 3, 2011: Chris Taylor (Water), Brent Edgerton (Sanitation), Terry Peterson (Streets), Robert Hudson (Parks & Recreation), Charter Communication (Water), Sara Wainwright (Water) and Emily Watford (Parks & Recreation. These claims have been referred to Asheville Claims Corporation for investigation.

Ms. Kyle Ross spoke about a Police Department lawsuit. City Attorney Oast noted that City Council cannot discuss personnel matters or matters in litigation. He also advised Ms. Ross and anyone else that he didn't believe speaking at a City Council meeting insulates anyone from causes of action based on libel or slander.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 8:25 p.m.

Magdalen Burleson — CITY CLERK

Jan Bellamy — MAYOR

Tuesday – February 22, 2011 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Brownie W. Newman; Councilman Cecil Bothwell; Councilman Jan B. Davis; Councilwoman Esther E. Manheimer; Councilman Gordon D. Smith; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Magdalen Burleson

Absent: Councilman William A. Russell Jr.

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING FEBRUARY 22, 2011, AS "SPAY DAY"

Mayor Bellamy read the proclamation proclaiming February 22, 2011, as "Spay Day" in the City of Asheville. She presented the proclamation to Ms. Elaine Lite, representing Critter Magazine, who briefed City Council on some activities taking place during the day.

B. PROCLAMATION PROCLAIMING MARCH, 2011, AS "WOMEN'S HISTORY MONTH"

Mayor Bellamy read the proclamation proclaiming March, 2011, as "Women's History Month" in the City of Asheville. She presented the proclamation to Ms. Debbie Metcalf, President of the Asheville National Organization for Women, who briefed City Council on some activities taking place during the month.

C. PROCLAMATION PROCLAIMING MARCH, 2011, AS "DEVELOPMENTAL DISABILITIES AWARENESS MONTH"

Mayor Bellamy read the proclamation proclaiming March, 2011, as "Developmental Disabilities Awareness Month" in the City of Asheville. She presented the proclamation to Ms. Karen Harrington, Chairman of the Mayor's Committee on Disabilities, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE CITY COUNCIL ANNUAL RETREAT HELD ON FEBRUARY 4, 2011; AND THE REGULAR MEETING HELD ON FEBRUARY 8, 2011

B. RESOLUTION NO. 11-33 - RESOLUTION AUTHORIZING THE MAYOR TO ACCEPT THE CONVEYANCE OF REAL PROPERTY LOCATED OFF OF JANE STREET AND ADJACENT TO RIVERSIDE CEMETERY FROM BUNCOMBE COUNTY

Summary: The consideration of a resolution authorizing the Mayor to accept the conveyance of real property located off of Jane Street and adjacent to Riverside Cemetery, from Buncombe County.

In the fall of 2010 Buncombe County approached city staff with an offer to transfer a small residential parcel of land to the City of Asheville. The property is the subject of numerous complaints from an adjacent homeowner over illicit behavior allegedly taking place on the property and dangerous overgrowth. The 0.11 acre property (PIN # 963993508400000) is wooded and undeveloped and sits adjacent to Riverside Cemetery. It is residentially zoned. The county acquired this property through tax foreclosure and offered to transfer the property at no cost to the city.

Acquisition of the property would allow the Parks, Recreation, and Cultural Arts Department to preserve additional wooded acreage on the eastern side of Riverside Cemetery and further buffer it from surrounding residential uses.

This action would comply with the City Council 2010-11 Strategic Operating Plan in that it would promote environmental sustainability (Green and Sustainable category). This action would also comply with Goal 18 of the Parks, Recreation, Cultural Arts, and Greenways Master Plan in that it would preserve significant natural and cultural resources and increase park acreage (Strategy #1, "City Wide" Action step A and C).

This item has been reviewed by the Parks Recreation Advisory Board at the meeting held on February 14, 2011, and they recommended approval of this item.

Pros:

- Acquisition of the property would increase open space in the city.
- Acquisition of the property would buffer the cemetery from surrounding residential uses which will help preserve its serene character.

Cons:

- The lot is overgrown with invasive/exotic species, which is the cause of concern for at least one adjacent homeowner. Upon acceptance of the property, the city would have to perform select clearing.
- The property contains some trees with weighty, ominous limbs protruding over Gray Street, which is the cause of concern for at least one adjacent homeowner. Upon acceptance of the property, the city would have to perform select limbing.

Clearing and limbing will require resources in the form of staff time and equipment. These costs will be absorbed within the existing budget.

City staff recommends that City Council adopt the resolution authorizing the Mayor to accept a 0.11 acre parcel of land, adjacent to Riverside Cemetery, from Buncombe County for the purpose of preserving Riverside Cemetery and increasing open space acreage.

RESOLUTION BOOK NO. 33 – PAGE 341

C. RESOLUTION NO. 11-34 - RESOLUTION TO SUPPORT FRENCH BROAD RIVERKEEPER WORK ON THE SOUTHERN PORTION OF THE FRENCH BROAD RIVER PADDLE TRAIL

Summary: The consideration of a resolution to support French Broad Riverkeeper work on the southern portion of the French Broad River Paddle Trail, a cooperative effort within the Regional Riverfront.

The French Broad River Paddle Trail is a community led effort to establish a continuous paddling and camping trail along the length of the French Broad River. RiverLink- an appointing

partner in the Asheville Area Riverfront Redevelopment Commission- has started community engagement work in parts of Buncombe and in Madison counties. In a separate but not unconnected effort, The French Broad Riverkeeper program and the Western North Carolina Alliance- as staffed by Hartwell Carson- is securing campsites throughout the southern section of the trail, which includes parts of Buncombe County.

The French Broad Riverkeeper is requesting that City Council consider supporting the community's efforts to create the entire French Broad River Paddle Trail, and specifically requests that Asheville City Council support the French Broad Riverkeeper program's request for grant funds to support construction of some of the campsites in the southern section. The activities supported by a successful grant application include improving and adding river access points and establishing paddle-in campsites which would allow visitors to spend a few days paddling down the river and camping at well maintained facilities. Proposed campsites include public and privately owned land. One proposed campsite is owned by the City of Asheville. City staff is currently investigating the feasibility of utilizing the land, which is located outside the Wilma Dykeman RiverWay Master Plan area, as a paddle in (only) campsite. The Asheville Area Riverfront Redevelopment Commission (AARRC) – a partnership between the City of Asheville, The Town of Woodfin, Buncombe County, RiverLink, The Council of Independent Business Owners, The Asheville Area Chamber of Commerce/Economic Development Coalition and the River District Design Review Committee- were scheduled to consider a similar resolution of support for this project on February 10, 2011, however their meeting was cancelled due to inclement weather. The AARRC will consider this matter at their rescheduled meeting on February 17, 2011.

This action aligns with the City Council Strategic Goals as follows (1) Sustainable: Pursue a stronger riverfront redevelopment partnership (and dedicated office); (2) Green: Support open space preservation; and (3) Job Growth and Community Development: Partner in regional economic development strategies (including the HUB; continue partnership in the Economic Development Coalition);

Pro:

- City Council will support regional collaborative effort that aligns with strategic goals.

Con:

- None known.

By adopting this resolution, Council is not committing any funds to this project therefore there is no fiscal impact.

If City Council is amenable to the proposal, staff recommends they adopt a resolution to support French Broad Riverkeeper work on the southern portion of the French Broad River Paddle Trail, a cooperative effort within the Regional Riverfront.

RESOLUTION BOOK NO. 33 – PAGE 342

D. RESOLUTION NO. 11-35 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXTEND THE EXISTING AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE CONSTRUCTION OF REED CREEK GREENWAY, PHASE II BY SIX MONTHS

Summary: The consideration of a resolution authorizing the City Manager to extend the existing agreement between the City of Asheville and the N.C. Dept. of Transportation (NCDOT) for the construction of Reed Creek Greenway, Phase II by six months.

On February 12, 2008 City Council approved a resolution authorizing the City Manager to enter into an agreement with the NCDOT for up to $400,000 to construct Reed Creek Greenway, Phase II. The agreement was executed on April 4, 2008, and allowed a three-year time period for project completion. The completion date as prescribed by the agreement is April 14, 2011. Due to unforeseen delays in land acquisition, design, and the bid process, the greenway construction will not be complete within the three-year period. Staff requested a six-month extension to the existing agreement with NCDOT, which NCDOT has agreed contingent upon City Council approval.

This action complies with the Fiscal Year 2010-11 City Council Strategic Plan in that it supports continuing a funding alternative for enhancing the city's commitment to master plan implementation, infrastructure maintenance, capital improvements. This action also complies with the Parks, Recreation, Cultural Arts, and Greenway Master Plan in that it allows for the implementation of the Reed Creek Greenway, a high priority greenway corridor within the master plan.

Pro:

- Extends the NCDOT agreement to allow the City an additional six months to complete Reed Creek Greenway, Phase II

Con:

- The extension will delay the completion of the greenway construction by six months beyond the original completion date of April 2011 as set forth in the original agreement.

There is no fiscal impact to this action.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into an agreement with NCDOT to extend the current agreement between the City and the NCDOT for construction of the Reed Creek Greenway, Phase II by six months.

RESOLUTION BOOK NO. 33 – PAGE 343

E. RESOLUTION NO. 11-36 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH DISASTER RECOVERY GROUP AND TREE SERVICE, INC., TO CONSTRUCT REED CREEK GREENWAY PHASE II

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Disaster Recovery Group and Tree Service, Inc. to construct Reed Creek Greenway Phase II for an amount not to exceed $615,000.

The City of Asheville is preparing to construct the second phase of Reed Creek Greenway located along Reed Creek and Broadway Avenue. Once complete the greenway will be a 0.30-mile multi-use trail that will extends between Cauble and Magnolia Street. The second phase will construct the section between Cauble and Catawba Street, and bring the greenway corridor to 50% completion.

The City advertised for bids for construction of the greenway. Staff determined Disaster Recovery Group and Tree Service, Inc. located at 556 Long Shoals Road, Arden, North Carolina is the lowest, responsive and responsible bidder. The base bid is $478,250 plus $20,000 for required code plantings not included in the base bid amount, and $116,750 to exercise a bid alternate to develop a corner park on a city-owned parcel adjacent to the greenway corridor.

This action complies with the Fiscal Year 2010-2011 City Council Strategic Plan in that it supports continuing a funding alternative for enhancing the city's commitment to master plan implementation, infrastructure maintenance, and capital improvements. This action also

complies with the Asheville City Development Plan 2025 in that it implements the adopted Greenway Master Plan. In addition, this action complies with the Parks, Recreation, Cultural Arts, and Greenway Master Plan in that it allows for the implementation of the Reed Creek Greenway, a high priority greenway corridor within the master plan.

Pros:

- Leverages the city's existing capital funds allocated for construction of Reed Creek Greenway.
- The contract amount is within the project budget.
- The project will extend the Reed Creek Greenway by 0.30 miles, bringing the total length of the corridor to approximately 0.5 miles.

Con:

- The additional greenway mileage will require maintenance resources.

The $615,000 to support the construction contract of Reed Creek Greenway Phase II is budgeted in the FY 2008-2009 capital improvement budget for Reed Creek Greenway Phase II. The budget is funded by a $400,000 grant from the North Carolina Department of Transportation which was accepted by City Council on February 12, 2008, and the remaining funds were appropriated by City Council as part of the FY 2008-2009 capital improvement budget.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Disaster Recovery Group and Tree Service, Inc. to construct Reed Creek Greenway Phase II for an amount not to exceed $615,000.

RESOLUTION BOOK NO. 22 – PAGE 344

F. RESOLUTION NO. 11-37 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY SANITARY SEWER EASEMENTS AT THE NEW RECREATION CENTER SITE AT 285 LIVINGSTON STREET AND AT 415 S. FRENCH BROAD TO THE METROPOLITAN SEWERAGE DISTRICT

Summary: The consideration of a resolution authorizing the Mayor to convey sanitary sewer easements at the new recreation center site at 285 Livingston Street and at 415 S. French Broad to the Metropolitan Sewerage District.

The Metropolitan Sewerage District (MSD) is preparing to relocate existing sanitary sewer lines within the property at 285 Livingston Street in order to accommodate future phases of the new recreation center development. Currently, the existing lines in the park are in poor condition and necessitate replacement. The existing 24", 8" and 6" lines within the property will be replaced with 30" and 12" ductile iron pipe. The relocation will enable future phases of the recreation center to be implemented as well as the proposed Town Branch Greenway. A portion of the easement also crosses within the parcel boundary of Fire Station 2 at 415 South French Broad Avenue. Fire Department staff have reviewed this alignment and noted that it will have no significant impact to the fire station.

MSD is requesting two permanent easements as follows: easement #1 containing approximately 40,882 square feet (0.94 acre) and easement #2 containing approximately 1,899 square feet (0.04 acres). The land area will be restored upon the completion of the work by MSD.

This action would comply with the City Council 2010-11 Strategic Operating Plan in that it would promote public health, safety and welfare by allowing adequate sewer service lines through city-owned property (Safety category).

This item has been reviewed the by Parks Recreation Advisory Board at the meeting held on February 14, 2011, and the Board recommended approval of the item.

Pros:

- Improved sanitary sewer service for the community
- Allows for implementation of future phases of recreation center
- Proposed line replaces the existing, poor line

Con:

- Easement is being dedicated

No monetary consideration involved in this conveyance.

City staff recommends that City Council adopt the resolution authorizing the Mayor to convey sanitary sewer easements at the new recreation center site at 285 Livingston Street and at 415 S. French Broad, identified as PINs # 964814039800000 and # 964814534100000, to the Metropolitan Sewerage District.

RESOLUTION BOOK NO. 33 – PAGE 345

G. RESOLUTION NO. 11-38 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CINCINNATI SYSTEMS INC. FOR THE INSTALLATION OF AN ELECTRONIC TIME SYSTEM FOR THE ADMINISTRATIVE SERVICES AND PARKS DEPARTMENTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Cincinnati Systems, Inc., in an amount not to exceed $69,958, for the installation of an electronic time system for the Administrative Services and Parks departments.

The Administrative Services Department and the Parks, Recreation & Cultural Arts Department are working to streamline the timekeeping process with non-exempt employees. The new system will assist in advancing this process by automating the method for time entry by non-exempt employees. This automation will directly connect to the City's new MUNIS system and payroll.

For the Administrative Services Department, implementation of the timekeeping system will result in approximately 13 work hours gained annually since staff will spend less time manually verifying time cards and less time manually entering the data.

In the Parks, Recreation & Cultural Arts Department, implementation of the timekeeping system will result in approximately 370 work hours gained annually. Staff will spend less time verifying time cards and less time manually entering the data. The current process is very inefficient. Reporting staff payroll hours via a paper timecard requires approximately 20 supervisors to manually verify every timecard, making corrections when needed. These timecards are gathered from 22 different worksites, including community centers, athletic recreational facilities, park maintenance offices, etc. Three administrative support staff then enter the data from each time card into the MUNIS payroll system.

This system expands the existing timekeeping system that is currently in use at Public Works, Water, and other city departments. The system uses handprint recognition to ensure accurate timekeeping and eliminate false time card punching.

This action complies with the City Council Strategic Operating Plan's "Fiscal Responsibility" goal.

Pros:

- Provides a more efficient and accurate timekeeping system for the Administrative Services Department and the Parks, Recreation & Cultural Arts Department.
- Allows for fewer errors and creates less liability for the City organization than a manual, paper-based process.
- Centralizes data and interfaces smoothly with the City's core financial and HR systems, enabling better reporting for the City organization.

Con:

- Will require staff effort, project management, and expenditure of funds.

These funds are budgeted in departmental FY11 budgets.

City staff recommends City Council adopt a resolution authorizing the City Manager to enter into a contract with Cincinnati Systems, Inc., for the installation of an electronic time system for the Administrative Services and Parks departments.

RESOLUTION BOOK NO. 33- PAGE 346

H. RESOLUTION NO. 11-39 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AN AMENDMENT TO THE CONTRACT TO AUDIT ACCOUNTS WITH DIXON HUGHES PLLC FOR THE FISCAL YEAR 2009-10

Summary: The consideration of a resolution authorizing the Mayor to execute an amendment to the contract to audit accounts with Dixon Hughes PLLC for the fiscal year 2009-2010.

NC General Statute 159-34 requires local governments to have their accounts audited each fiscal year by a certified public accountant and confers upon the Local Government Commission (LGC) the authority to issue rules and regulations to ensure the quality and consistency of auditing services. The LGC has issued several rules in connection with the audit contract including:

- amendments to the audit contract be approved by a vote of the governing board in a public meeting
- financial statements submitted after December 1st require an amendment

On June 8, 2010, City Council approved a contract with Dixon Hughes PLLC, in the amount of $153,450 for auditing services for Fiscal Year 2009-2010. The contract includes certain estimates regarding compliance auditing of federal and state financial assistance programs and does not include auditing new major programs such as the American Recovery and Reinvestment Act of 2009 (ARRA Federal Stimulus). Additionally, the contract contains a completion date of October 31, 2010.

Dixon Hughes has submitted an amendment to the contract in the amount of $13,600 seeking additional compensation for required work not included in the original contract; such work relating to ARRA single audit compliance and consultation in connection with various compensation and fringe benefit tax matters. If approved, the total amount of the 2009-2010 contract would increase from $153,450 to $167,050. Funds are available in the Accounting Division of the Finance Department to cover this additional expenditure. This supplemental billing is not unusual. Dixon Hughes requested and received an additional $10,500 in connection with the 2008 audit contract.

The proposed amendment also contains a modification of the completion date of contained in the original contract of October 31, 2010 reflecting the delayed submission. This delay, including the factors contributing to the delay and efforts to ensure that such delays are

avoided in the future, was discussed extensively at the Council and Finance Committee meetings of January 25th. While the delay is unacceptable, some historical context may be helpful. The City has experienced delays in presenting the financial results on several occasions as follows:

FY2009 – Delivered to Council – January 12, 2010
FY2008 – Delivered to Council – February 10, 2009
FY2007 – Delivered to Council – January 8, 2008
FY2006 – Delivered to Council – December 12, 2006

Clearly, improving the timely submission of the audit report and keeping Council informed on that progress are on the "top" of the Finance Department and external auditors' priority list for the fiscal year 2011 audit report.

This action complies with City Council's Strategic Operating Plan of operating the City of Asheville's organization to the highest fiscal responsibility.

Pros:

- Complies with the requirements of the Local Government Commission in connection with amending the audit contract
- Conforms to the terms and conditions of the audit contract

Con:

- Requires additional funding (resources are available.

The contract amendment with Dixon Hughes entails compensation in the amount of $13,600 to cover additional for required work not included in the original contract. This additional amount will be paid for with currently budgeted funds.

Staff recommends approval of a resolution authorizing the Mayor to execute an amendment to the contract to audit accounts with Dixon Hughes PLLC for the fiscal year 2009-2010.

RESOLUTION BOOK NO. 33 – PAGE 347

I. ORDINANCE NO. 3949 - BUDGET AMENDMENT TO THE MCCORMICK FIELD BUDGET FOR THE ASHEVILLE TOURISTS LEASE PAYMENT

Summary: The consideration of a budget amendment to the McCormick Field budget in the amount of $61,666 for the Asheville Tourists lease payment.

As part of the ten-year lease agreement between the City of Asheville and the DeWine Seeds-Silver Dollar Baseball for the Asheville Tourists at McCormick Field, a scheduled annual lease payment increase occurred from $125,000 to $140,000 effective July 1, 2010. In preparation for the FY 2010-2011 budget, the lease increase was not included in the budget. Funds will be used to support the operation and capital improvements to McCormick Field. The budget amendment is to correct the omission of the $15,000 from the McCormick Field budget.

In addition, the DeWine Seeds-Silver Dollar Baseball recently made an advance payment of $46,666 toward the FY 2011-2012 $140,000 lease payment to support the cost of restroom improvements at McCormick Field so the improvements can be completed prior to the opening of the Asheville Tourists 2011 season. The budget amendment is to add $46,666 to the McCormick Field budget to support the cost.

This action aligns with the City Council Strategic Goal of fiscal responsibility in that it provides an alternative for enhancing the city's long-term financial commitment to infrastructure

maintenance. This action also complies with the Parks, Recreation, Cultural Arts & Greenways Master Plan in that it will increase the level of service to bring older facilities up to date before building new facilities.

Pro:

- Operations and facility improvements will address existing maintenance projects at McCormick Field.

Con:

- None

The allocation will increase the City's General Fund budget by $10,000 in the operating budget designated for McCormick Field, and increase the City's Capital Improvement budget designated for McCormick Field by $51,666.

Staff recommends City Council to approve the budget amendment authorizing the City Manager to increase the budget in the amount of $61,666 for McCormick Field operations and capital improvement.

ORDINANCE BOOK NO. 26 – PAGE 454

J. RESOLUTION NO. 11-40 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A COOPERATIVE AGREEMENT WITH THE U.S. DEPT. OF TRANSPORTATION FOR THE TIGER II PLANNING GRANT FOR THE EAST OF THE RIVERWAY MULTI-MODAL NEIGHBORHOOD

Summary: The consideration of a resolution authorizing the City Manager to enter into a Cooperative Agreement with the U.S. Dept. of Transportation for the TIGER II Planning Grant for the East of the Riverway Multi-Modal Neighborhood.

On October 20, 2010, the City was informed that it was awarded $850,000 of TIGER II Planning Grant funds from the US Department of Transportation (DOT) for the "East of the Riverway Multi-Modal Neighborhood." This award came in national competition for HUD and DOT funding for Sustainable Communities. The City received one of 33 TIGER II awards made nationally.

In summary, the funds will enable a partnership among the City, community residents, businesses, property owners and public, non-profit and private organizations to develop and bring plans for sustainable development to readiness. Specific planning activities will include:

- Final route planning, environmental assessment and construction drawings for the Town Branch and Clingman Forest Greenways;
- 2.7 mile section of the Wilma Dykeman Riverway brought to 75% construction drawing completion;
- Transportation Network Plan developed, including multi-modal transportation, road sections, complete streets and projected transit demand;
- Energy Plan, including an assessment of current energy use and an analysis of financing options for a community-based energy efficiency program;
- Transformational redevelopment of City properties will be explored through the development assessment of at least two city-owned properties in the target area;
- Significant public participation in all elements of the planning.

The City is required to provide a 20% match. This will be done through existing, already in place city staff, as in-kind match. The project will be managed within the Community

Development Division, guided by a team of city staff from involved departments. The project duration will be two years from the signing of the Cooperative Agreement.

This action complies with City Council's Strategic Operating Plan under the following goals: 1) *Affordable:* this program will explore opportunities to enhance affordability through innovative energy efficiency financing programs; explore opportunities to incentivize affordable housing development; ; 2) *Fiscal Responsibility*: will explore leverage of partnerships for pursuing capital improvement and infrastructure projects, and proactively pursue funding opportunities; 3) *Green:* will expand community education programs regarding sustainability, and integrate and implement a multi-modal transportation plan in this area; and 4) *Job Growth and Community Development:* Promote sustainable, high density infill growth, support the riverfront redevelopment partnership.

Pros:

- The practical partnerships being formed will lead to projects that are comprehensive and coordinated;
- Community residents, businesses and property owners will be directly involved in the planning activity;
- The activities will lead to "transformational investment" that will create new opportunities for people already living there, as well as incentivize new housing and economic development that will spur the sustainable reuse of existing property, including property now owned by the City;
- This grant will enhance the recommendations in the Wilma Dykeman Plan, and create opportunities for funding for implementation of the plan.

Cons:

- New resources can create expectations of immediate future funding; although HUD and other agencies have implied that this funding will be available, it will depend on the federal (and state and local) budget processes and constraints;
- New development brings inherent conflicts between competing interests. The success of any planning activity will be the ability to create win-win relationships.

Match requirements can be met in-kind through existing staff resources.

City staff recommends City Council adopt the resolution to execute the Cooperative Agreement with the US Department of Transportation.

RESOLUTION NO. 33 – PAGE 348

K. RESOLUTION NO. 11-41 - RESOLUTION AMENDING THE 2011 CITY COUNCIL MEETING SCHEDULE TO HOLD A WORKSESSION IN THE FIRST FLOOR NORTH CONFERENCE ROOM OF CITY HALL ON (1) TUESDAY, MARCH 8, 2011, AT 3:30 P.M.; (2) TUESDAY, MARCH 22, 2011, AT 3:00 P.M.; AND (3) TUESDAY, APRIL 12, 2011, AT 3:00 P.M.

RESOLUTION BOOK NO. 33 – PAGE 349

Mayor Bellamy asked for public comments on any item on the Consent Agenda, but received none.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Davis moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Newman and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. UPDATE FROM THE BLUE RIBBON HEALTHCARE TASK FORCE

Assistant City Manager Jeff Richardson introduced Mr. James Christian, representing the Task Force, who will be updating City Council on findings and recommendations of Healthcare Task Force.

He said that City Council appointed the following 5 members of the community to serve on the Healthcare Task Force: Mr. Jim Christian, Mr. Marty Stamey, Dr. Bruce Elliston, Mr. Bill Biddle and Ms. Vicki Banks. Council directed the group to provide final health fund recommendations by the onset of the Fiscal Year 2011–12 budget process (January – February, 2011). The Task Force was initially charged with:

- Evaluating best practices to determine the optimal range of health insurance related benefits afforded to employees
- Cost-for-service comparisons
- Employer-employee cost-share analysis
- Review of the Asheville Project Disease Management Program
- Other areas of interest

The City Council Finance Committee has reviewed and approved the recommendations.

Mr. Christian said that the Task Force convened four times between September and December to review and discuss all aspects of the City's benefits package. Our review included details on the current risk structure, healthcare funding levels, The Asheville Project Disease Management Program, health claim costs, medical and dental administrative costs, health Services on-site clinic costs, and health and wellness initiatives and incentives.

Task Force Defined Objective: Operate a sustainable Health Care Program that provides Access, Quality and Cost-effective medical care to the City of Asheville's employees, retirees and dependents. The Task Force's recommendation encompasses these three broad categories that, when combined, will improve the Health Care program of the City, provide for fiscally responsible spending and improve the health of the participants.

Access – Improving access to health care by removing barriers (cost and availability), encouraging preventive health care and wellness exams, and affiliating with health care providers/networks to offer expanded services and access to care.

- **Expansion of Employee Health Clinic** – Expansion of services involves acute care diagnosis and treatment by an on-site physician from the current 2 day per week to 5 days, expanded lab services and capabilities, disease management intervention for patients not yet enrolled in The Asheville Project program and current Asheville Project enrollees not compliant with evidence based medical norms. Potential savings also generated through decreased time out of work due to illness, improving health education for patients in all risk levels through preventive medical education, reduction in prescription drug cost through generic utilization and lower cost brand by prescribing physicians and reduction in cost per event for lab work. Details on the financial impact of Expansion of the Employee Health Clinic shown below under the Cost Category.

- **Coordination of Care with Physicians** located in the Community for Employees & Dependents by affiliating with networks and providers, encouraging all Medical Plan participants to find a primary care physician, and facilitating communication with providers through the use of Electronic Health Records. The Medication Therapy Management Program began in July 2010 to review Prescription Drug Utilization of

members on health plan is an example of Coordination of Care with pharmacists, physicians and members. Communication of recommendations to members and their Physicians for potential opportunities to reduce member and City costs through prescription drug changes is on-going.

Quality - Health Care that focuses on Prevention and Wellness will improve patient health and well-being.

- **Affiliate with Health Care providers** committed to provide quality care and that are committed to Prevention and Wellness Care.

- **Reward prevention/wellness** by creating a system of real rewards for participation in a Wellness Program. The Wellness Program presented by City staff offers financial rewards to participants for committing to basic biometric testing and healthy behaviors. The Wellness Program should provide incentives for modifying unhealthy behavior and educational opportunities to participants.

- **Preventive Care Services** should be covered by the Medical Plan for all members. The U.S. Preventative Services Task Force publishes a detailed recommendation of Preventive Care Services based on evidence-based medical standards of care. Medical Plan changes should be reviewed to ensure these recommendations will be covered.

- **Education and Communication** to all employees and retirees on the actual plan costs and cost saving information.
    - Provide information concerning advanced directives before illness begins and partner with Crescent Health Care to provide details upon diagnosis of life threatening illness.

Cost – The third part of our recommendation involves reducing the overall cost of the City's health insurance program and stabilizing the long-term financial health of the program. The key is to reduce costs and ensure the long-term viability of the fund while still providing Access to Quality health care. The City's current plan design and costs were benchmarked against other plans offered by private and public employers in North Carolina. The City's current Medical benefits and corresponding employee/retiree contributions require less employee expense than those offered through other employers. Modification of Plan designs to reduce costs and increases in employee and retiree contributions will bring the City's Medical benefits to be more in line with the plans reviewed.

- **Modify Plan Designs** to reduce cost to be more consistent to benefit plans offered by other Public and Private Employers in NC. The new plans should promote preventive care and wellness and provide incentive to utilize the City's Health Clinic.
    - Plan Design Changes effective 7/1/11: Estimated 14% decrease in claim cost for Fiscal year 2012, which will offset health care trend increase, estimated increase for Health Care Reform changes required by PPCA and increases in Reinsurance Premiums. The estimated reduction in claims is $1,647,000.

- **Increase Employee and Retiree Contribution** by utilizing an *alternate Contribution Strategy* which sets the City's Contribution at the same level for all plans offered.

    - Proposed changes increase the employee contributions and retiree contribution. Changes being considered would result in a savings of approximately $840,000. Calculation of Retiree contribution increase is based on the actual cost of the City's Retiree population, which is more than 2 times the cost for active employees. The recommended increases in Employee and Retiree contributions must be reviewed for legal compliance and policy objectives. Legal review is necessary due to changes in rating methodology and contribution strategy.

Modifying contribution levels to a more moderate increase for employees and retirees combined is equal to approximately $420,000 in annual costs.

- **Future Employee Retiree Health Insurance** – City staff and Consultants should perform a detailed analysis of the Retiree Health Insurance options for Future Employees. Medical claim costs, liability for future costs, and eligibility limitations should be reviewed and benchmarked with other public employers in North Carolina.

- **Cost Expansion of the Employee Health Clinic** reviewed by the Task Force is shown below. The recommendation is based on future projections of Cost Avoidance and the ability to provide Access to Quality Heath Care to Health Plan participants.

Expansion of Health Clinic	Feb 2011-June 2011	Fiscal Year 2012
Lease of space & construction costs	$52,500	$66,000
Addition of Physician Assistant 5 days per week	$41,670	$100,000
Current Health Services Budget	$113,310	$251,933
Additional nursing staff	$10,420	$25,000
Lab, Supplies & Equipment	$10,000	$10,000
Electronic Health Record System	$10,000	$17,000
Physician Occupational Costs	$33,330	$80,000
Total:	$271,230	$549,933
Cost with no change	$154,972	$371,933
Additional Costs	$116,258	$178,000
Estimated reduction in Medical Claims Cost	-$100,000	-$500,000
Additional Cost (1st year)	$16,258	
Cost Avoidance (year 2)		-$322,000

- **Margins and Reserve** - Priority should be given to stabilizing the Health Insurance Fund by rebuilding the Reserve Fund that will remain available to offset normal variances in claims costs from year to year (margin), unforeseen catastrophic claims, larger than expected Medical Inflation trends, Incurred But Not Reported Claim Liability and the impact of future Health Care legislative mandates.

    - Each year the City staff should work with their consultants utilizing sound underwriting methodology to determine an adequate level of margin and reserve based on the projected claim fund and reinsurance protection.
    - To ensure an appropriate level of margin and reserve in the fund, we suggest that the City's current level of funding remain the same for Fiscal Year 2012, despite benefit reductions and increases in Employee and Retiree contributions. Additional claim savings generated by the benefit changes, expansion of the Health Clinic and Employee and Retiree contribution changes should be used to stabilize the fund.
    - Funding should be reviewed and adjusted annually.

Ms. Kelley Dickens, Director of Human Resources, said that next steps include (1) the expansion of health care clinic - in progress; (2) communication/education on healthcare - in

progress; (3) Wellness Program – July 1, 2011; (4) plan design changes – July 1, 2011; (5) examine retiree insurance for future employees is in progress; (6) financial stability of Health Fund – reviewed annually/ongoing.

Staff is prepared to continue to implement the recommendations of the Task Force along with the direction received previously from City Council to offer domestic partner benefits.

On behalf of City Council, Mayor Bellamy thanked Mr. Christian and the Task Force members for their hard work in providing the framework for Council to consider during their budget process.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CLOSING SEVERAL PORTIONS OF UNOPENED RIGHTS-OF-WAY AND CITY STREETS WITHIN THE MONTFORD COMMONS DEVELOPMENT AREA

Mayor Bellamy said that the applicant has requested this public hearing be continued until March 8, 2011. Therefore, Councilman Davis moved to continue this public hearing until March 8, 2011. This motion was seconded by Councilman Smith and carried unanimously.

B. PUBLIC HEARING TO CONSIDER REZONING 103 N. BEAR CREEK ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING TO RM-16 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

ORDINANCE NO. 3950 - ORDINANCE TO REZONE 103 N. BEAR CREEK ROAD FROM COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING TO RM-16 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 5:40 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone 103 N. Bear Creek Road from Commercial Industrial District/Conditional Zoning to RM-16 Residential Single-Family High Density District. This public hearing was advertised on February 11 and 18, 2011.

He said that the subject property (2.28 acres) is located within the City limits on North Bear Creek Road, just north of the intersection with Deaverview Road. Surrounding properties to the north and west are residentially zoned (RS-8, RM-8, RM-16) and the properties to the south and east are zoned Commercial Industrial. The existing land uses follow the surrounding zoning with single-family and multi-family in the areas to the north and west, and commercial uses to the south and east.

The underlying zoning before the conditional zoning to Commercial Industrial was approved was RM-8, Residential Multi-family Medium Density district. The purpose of that district is to be a transitional area, with single-family and multi-family residential uses, between high density single family and multi-family areas. Some non-residential development is normally permitted to provide the basic elements of a balanced and attractive mixed-use residential area.

The prior Conditional Zoning / Commercial Industrial application (CI-CZ) was approved with a site development plan in 2006 and modified in 2007 for a preschool and K-12 school. Plans included two classroom buildings, site access and student drop-off areas. Some of the site grading has been competed and the existing home on the property is being used as a child day care home. The applicants have stated that they are pursuing a zoning change as a straight rezoning in order to satisfy a requirement from a bank financing the project to have a clear underlying zoning for the property that is not conditioned on a specific use and site plan.

The proposed zoning for the current application is for RM-16, Residential Multi-family High Density District. The purpose of this district is to permit a full range of high density multi-family uses along with limited institutional, public, and commercial uses appropriate within high density residential areas. It is intended that this district be located near employment centers, shopping facilities, roads and other urban infrastructure capable of handling the range of uses. No site plans or specific uses are required or submitted with an application for a straight rezoning, because the range of uses is limited only by the list of permitted uses and uses by right subject to special requirements.

As they are likely to be proposed for this property, we note that both child daycare centers and schools are uses by right subject to special requirements in the RM-16 district. Each use has specific requirements that cover lot size minimums, setbacks, activity spaces, drop-off areas and number of children allowed. The lot size of the property proposed for rezoning is sufficient to meet that requirement and any site plans will be reviewed for compliance with the use standards.

The staff believes that the RM-16 zoning provides an appropriate use buffer between the residentially zoned properties to the west and north and the commercially zoned properties to the south and east.

At their meeting on February 2, 2011, the Planning and Zoning Commission voted 5-0 to recommend approval of the zoning change.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The site provides an appropriate buffer for the residential districts to the north and west.
- The location is close to Patton Avenue and nearby residential areas providing convenient access.
- The site is on the Asheville Transit Route 15 for both outbound and inbound portions of the route.

Con: None noted.

Staff recommends approval of the rezoning request to RM-16 because a goal of the district is to act as a buffer between commercial uses and residential areas. The list of permitted uses in RM-16 district include some non-residential uses that can be expected in healthy diverse neighborhoods. The site is conveniently located to transportation corridors and the transit system.

Ms. Amica Venturi hoped Council would approve her request and submitted a letter of support from seven of her neighbors.

Mayor Bellamy closed the public hearing at 5:40 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Bothwell moved for the adoption of Ordinance No. 3950. This motion was seconded by Councilman Davis and carried unanimously.

C. PUBLIC HEARING TO CONSIDER A CONDITIONAL ZONING REQUEST FOR INGLES MARKETS INC. LOCATED AT 153 SMOKY PARK HIGHWAY FROM HIGHWAY BUSINESS DISTRICT TO HIGHWAY BUSINESS DISTRICT/CONDITIONAL ZONING FOR THE DEVELOPMENT OF A NEW 105,175 SQUARE FOOT GROCERY STORE WITH ASSOCIATED CAR WASH, GAS STATION AND 32,060 SQUARE FEET OF ADDITIONAL RETAIL SPACE AND A SIGNAGE PLAN

Mayor Bellamy said that the applicant has requested this public hearing be continued until March 22, 2011, in order to have the full Council hear his request. She noted that Councilman Russell was ill and would not be in attendance at the meeting.

Mr. Bernard Arghiere was disappointed about the continuance request when people have made arrangements to be at this meeting.

Ms. Laura Piraino, representing the Executive Committee of the local Wenoca Sierra Club, was also disappointed on the continuance request.

Mr. Gene Ellison, representing Ingles Markets, requested this matter be continued until March 22 in order for his request to be heard by a full Council.

Vice-Mayor Newman moved to proceed with the public hearing. This motion was seconded by Councilman Smith.

Mayor Bellamy noted that normally Council would continue a public hearing to allow the applicant the opportunity to address a full Council. No one knew until today that Councilman Russell would not be in attendance. She felt the issues regarding the request would not change between now and March 22 and felt Council should allow the continuance request. The applicant has a large investment in our community and she felt it was important for them to be given the opportunity of presenting their case before a full Council.

City Attorney Oast said that it would take four votes to continue the public hearing.

The motion made by Vice-Mayor Newman and seconded by Councilman Smith to proceed with the public hearing carried on a 4-2 vote, with Mayor Bellamy and Councilman Davis voting "no."

Mayor Bellamy said that there will be one combined public hearing, with two separate votes.

Mayor Bellamy opened the public hearing at 5:44 p.m.

Conditional Zoning

Urban Planner Nate Pennington said that this is the consideration of two ordinances (1) a conditional zoning ordinance from Highway Business District to Highway Business District/ Conditional Zoning for the development of a new 105,175 square foot grocery store with associated car wash, gas station and 32,060 square feet of additional retail space with modification requests to off-street parking, landscaping, retaining wall standards, open space, outdoor lighting and large retail development standards; and (2) a signage plan. This public hearing was advertised on February 11 and 18, 2011.

He said the applicant is requesting a Conditional Zoning for two parcels zoned HB (Highway Business) to HB-CZ (Highway Business – Conditional Zoning) for the redevelopment of an existing Ingles shopping center in accordance with Section 7-7-8 of the Unified Development Ordinance (UDO).

The project site consists of two separate parcels comprising 31.595 acres according to the submitted site plans. The project proposes to retain the existing Ingles store (for conversion to an alternate retail use) and shops to the west of the site and construct a new Ingles store, future retail space, gas station/convenience store, car wash and four (4) commercial outparcels. The following list provides a breakdown of the existing shopping center and the proposed development:

Existing	
Ingles Store:	53,000 SF
Shopping Center:	47,053 SF
Pizza Hut:	2,535 SF
Suntrust Bank:	2,325 SF

Note: Shops along former Cooper Boulevard and the State Employment Credit Union (SECU) bank are to be demolished.

Proposed	
New Ingles Store:	105,175 SF
Future Retail:	32,060 SF
Car Wash:	2,280 SF
Gas Canopy/Convenience Store:	8,745 SF
Total Shopping Center:	**253,173 SF**

The combined square footage of the development meets the Level III review threshold (projects exceeding 100,000 square feet) and is subject to the Conditional Use Permit findings outlined in Section 7-16-2(c). Multi-tenant developments located in the Highway Business (HB) district are permitted up to 200,000 square feet; and developments may exceed the square footage cap by up to 50% if the project complies with the Supplemental Design Standards For Large Retail Structures (Big Box Standards) as listed in Section 7-16-2(b)(10) of the UDO. The applicant has elected to have this project reviewed as a Conditional Zoning as this process allows for added flexibility to vary from the mandatory requirements of the big box standards (see below section for Big Box Standards) with Council approval.

Phasing

The new Ingles store, gas station/convenience store, car wash and access drive are proposed to be built in one (1) phase. Some shifting of the parking lot layout will occur, however, to keep the existing Ingles open during construction of the new store. Development of the future retail area and outparcels is expected to be incremental and market driven.

Access

Primary access to the site is gained from an existing traffic light along Smoky Park Highway. A secondary entrance (currently Cooper Boulevard – see road closure section listed below) is proposed to be upgraded to allow for full access to the site. Additionally, a driveway is proposed to connect to the primary entrance to the adjacent Lowes home improvement store. The future outparcels will take access from this driveway.

Road Closure

Cooper Boulevard was the access to a former mobile home park on the vacant parcel to the north and east of the existing Ingles store site. That site is the location of the new Ingles store, future retail area and outparcels. The proposed site plan calls for the closure of the Cooper Boulevard to create a secondary entrance to the property. The City Council must approve the

closure of this right-of-way by City Council to accommodate this development. This request was recommended for approval by the Greenways Commission at their January 13, 2011, meeting (see below under section Required Reviews).

Parking

According to the site plan, 732 spaces are required inclusive of required Americans with Disabilities Act parking. Bike parking is dispersed throughout the site in front of the existing and new Ingles stores, to the side of the existing shops, and in front of the Pizza Hut restaurant. A modification request is being sought to authorize a reduction in the amount of required off-street parking (see Modifications section below).

Landscaping & Open Space

Significant landscaping will be required throughout the site, including street trees, parking lot landscaping, street buffer, building impact landscaping, dumpster/loading zone screening, and a Class "B" bufferyard at the rear of the property. That rear buffer separates the neighboring residential zoning designation (RS-4) from the commercial zoning designation (HB) of the subject property. The Class "B" buffer standards for "Big Box" developments require 150% of the plantings called for in a standard Class "B" buffer. A number of modification requests to the landscaping requirements are being sought (see Modifications section below).

The open space requirement for this type of development is 15% of the total site size; a total of 4.52 acres for this site. The applicant has elected to pay a fee in lieu of for the remaining portion of deficient open space - .22 acres as prescribed in Section 7-11-4(g) of the UDO.

Big Box Standards- Appendix 7-F (Supplemental Development Standards for Large Retail Structures)

As noted above, the overall size of the development requires that the project be evaluated for compliance with Appendix 7-F, Supplemental Development Standards for Large Retail Structures (Big Box Standards). These development standards address building design, architectural compatibility with the surrounding area, landscaping, pedestrian safety and public enhancements. The standards are divided into two categories: 1) Required standards and 2) Optional design standards that are point based. In order to achieve full compliance with these standards the applicant must demonstrate that the project meets all the "required standards" and that the project has incorporated an adequate amount of "optional design standards" to accumulate a minimum of 150 points.

In regards to the proposed project, the applicant has fully demonstrated compliance with the optional design standards with an accumulated total of 160 points. However, several modification requests are being sought for two (2) of the required standards (see Modifications section below), including the façade standards. The applicant has provided a letter outlining their plan for proposed façade enhancements for the existing shopping center.

Signage

While signage is illustrated on the elevation drawings for this project, it is not part of this development review. Signage for the development will be reviewed in detail with the master sign package application following the public hearing on this project.

Modification Requests:

The applicant is requesting a total of 9 modifications to the site plan which must be approved by City Council. The staff supports 4 of the requests.

1. *Retaining Walls* – Section 7-10-5 of the UDO requires that foreground landscaping or attached vegetative screening be required for any retaining wall sections over 20 feet in height regardless of location relative to a public or private street. The applicant is proposing instead a 23-26 foot retaining wall behind outparcels #1 and #2; located above proposed detention pond #1. The wall will not be visible from the access drive connecting the outparcels to the Lowe's driveway or Smoky Park Highway. Given the difficulty in planting in such close proximity to the proposed detention pond, the **staff supports this request.**

2. *Off-Street Parking* – Section 7-11-2(c)(1) of the UDO requires a minimum number of off-street parking spaces based on land use. The Ingles shopping center development requires a total of 846 spaces. 732 spaces are provided resulting in a deficiency of 114 spaces or approximately 13% of the required total. The applicant has provided staff with reasonable justification for supporting the parking reduction based on the peak operating hours of the various retail and restaurant uses within the development, the **staff supports this request**.

3. *Parking Lot Landscaping* – Section 7-11-2(d)(4)c. of the UDO requires that when more than four trees are required in a parking lot with interior rows, 50% of the trees and shrubs must be planted in islands or medians located within the parking lot. The required amount of trees to be planted in islands and medians throughout this shopping center is 115 trees. The intent of this requirement is to break up large expanses of impervious surface with vegetation to help reduce urban heat island effect.

   The applicant is proposing to plant 70 trees throughout the parking lot resulting in a deficiency of 45 trees or 40% of the required total. As an alternative to this requirement, the applicant is proposing to plant the remainder of trees in other locations throughout the site. The reason given for requesting the modification is the applicant feels that their plan "creates an even distribution of trees though the proposed parking lot without reducing the parking space totals to below the City's minimum required." Those alternate locations would not, however, provide shade to the parking areas - a primary rationale for the requirement.

   The staff does not support this request as tree plantings in the alternate locations would not provide shade to the parking areas – a primary rationale for the requirement, and the reasons stated for requesting the modification have never before been accepted for requesting such a modification.

4. *Parking Lot Landscaping* – Section 7-11-3(d)(4)d. of the UDO requires that when more than four bays of parking are proposed, an interior island with an average width of 20 feet and a length equivalent to the length of the parking bay is required. This island must be planted and include a pedestrian walkway no less than five feet wide and placed in a location that enhances pedestrian circulation preferably leading directly to a building entrance or sidewalk. The intent for this requirement is to add shade in the parking area (thus reducing heat island impacts) in a larger island where trees will have better growth, and to provide a safer "refuge" for pedestrians. They are most often used by parents with small children, the elderly, and others who move slowly or wish to avoid vehicles in drive aisles.

   The applicant is instead proposing to wrap a sidewalk around the perimeter of eastern portion of the parking lot from Smoky Park Highway to the drive aisle in front of the stores. The reason stated for the requested modification is that "Ingles feels this request eliminates possible conflicts between pedestrians and automobiles."

   The staff does not support the request since the alternate sidewalk location does not

meet the primary intent of the standard. Staff notes that including the central island and sidewalk would result in a further reduction to the available parking spaces; however, additional spaces could be accommodated along the perimeter of the parking field or on one of the proposed outparcels. Further, the alternative sidewalk proposed would require approximately 710 linear feet of sidewalk while a central sidewalk would result in approximately 180 linear feet of sidewalk, thus further adding to impervious surface on the property. Also, the central island could support additional parking lot trees, offsetting the modification request. Additionally, the staff would support further reductions to the displaced parking given the large size of the new and existing parking lot.

Further, it is the belief of the staff that locating the sidewalk along the perimeter of the parking area would defeat the primary purpose of the standard, which is to provide safer pedestrian access into the parking areas; and added shade in the primary parking fields. Human nature being what it is, few are likely to take the time to go the perimeter and walk that much further to reach the store access. Further, installation of the required island would help the applicant meet the requirements of modification #'s 3 and 4 by providing additional areas for planting trees.

Finally, the staff also notes that multiple other "big box" retail developments approved in recent years have met this requirement without protest, including the Target store off of Tunnel Road, the Super Wal-Mart on Swannanoa River Road, and the recent renovation of the Wal-Mart store on Hendersonville Road. If this modification request is granted without reasons that establish its uniqueness, it would call into question the basis for the standard.

5. *Parking Lot Landscaping* – Section 7-11-3(d)(4)h. of the UDO requires that each parking space be located within 60 feet of a tree as measured from the trunk of the tree to the closest point of the parking space. The intent of this requirement is to provide shade to the parking area and reduce the urban heat island effect.

   While the required number of parking lot islands has been provided, eight (8) of the islands do not meet the parking lot tree requirement. The developer requests to provide only shrubs in these islands, creating a deficiency of 96 parking spaces that would not be within 60 feet of a tree, representing 13% of the total 732 spaces. The majority of these islands are located directly in front of the new Ingles store entrances. If installed and planted as required, the deficiency would decrease by 60 spaces to less than one-half percent.

   Additionally, the requirement for the large island noted in request #4 would also reduce this deficiency. The reasoning provided for not planting these trees reflects a general philosophy at odds with a basic intent of the landscaping standards: "The parking lot landscaping is designed to maximize visibility at both the vehicular and pedestrian levels."

   The staff does not support this request because it defeats the intent of the standard which is to provide for adequate shade and reduce the urban heat island effect. As with the previous request, if this modification request is granted without reasons that establish its uniqueness, it would call into question the basis for the standard. Further, planting larger, single trunk shade trees (rather than often chosen smaller ornamental trees) would alleviate any visibility concerns; as larger trees grow to create a canopy above the sight level of vehicles and pedestrians while providing the desired shading.

6. *Open Space* – Section 7-11-4(c) of the UDO requires that 15% of lot area be reserved for open space for developments that primarily include suburban open space amenities. Since the time of the Planning and Zoning Commission meeting, the applicant has worked with staff to identify areas of the property where open space can be provided.

The current plan reserves 4.52 acres of the required 4.74 acres of open space. The UDO provides a fee in lieu option if an applicant cannot meet some or the entire required amount of open space. The fees collected are used to purchase or to enhance recreational use of property necessary to implement features of the greenway master plan or the Parks and Recreation Master Plan of the City of Asheville. **Ingles has elected to pay this fee and therefore this modification request is no longer necessary.**

7. *Outdoor Lighting for Vehicular Canopies* – Section 7-11-10(k)(1) of the UDO requires that areas under a vehicular canopy have an average illuminance of 20 maintained footcandles. The intent of this requirement is to mitigate the negative light trespass that is emanated from vehicular canopies.

   The applicant is requesting an average of 80 maintained footcandles or 400% increase although the submitted photometric site plan indicates an average of 57.9 maintained footcandles which equates to a 289.5% increase. The stated reason for requesting the modification is that, "Ingles has created a prototypical fuel center that they feel meets the needs of their customers while providing utmost visibility and safety."

   Once again, the rationale for the request is at odds with the primary reasons for the regulation, and approving it without establishing elements that are unique to this particular location would call into question the basis for the regulation.

   At the Planning and Zoning Commission meeting, Ingles representatives noted that the canopy's footcandle output would somewhat diminish over time like other older similar canopies that have been installed at previous project locations. The staff recognizes that reasonable consideration could be given due to the deterioration of the lights over time but feels that the increase being requested by the applicant is excessive. The City of Asheville's footcandle output maximum for vehicular canopies are in line with other local communities in the area (see below).

Municipality	Footcandle (FC) Maximum
Asheville	20 FC
Black Mountain	24 FC
Brevard	10 FC
Fletcher	24 FC
Waynesville	15 FC
Weaverville	24 FC
Woodfin	20 FC

   The staff does not support the request for 80 FC as the existing 20 FC requirement reflects Asheville's commitment to efficient and appropriate lighting levels. [This standard comes directly from the Illuminating Engineering Society of North America (IESNA) recommendations and is a national standard, NOT a dark sky standard.] As with other requested modifications noted, to allow a modification, especially a modification so greatly in excess of our standards, and of other prevailing standards in the region, would call into question the basis for the lighting standards unless there were elements unique to the site. The staff does not believe that there are any elements unique to this site that warrant this great a variation from our regulations. 20 FC is an appropriate amount of light and neither the insurance industry nor the agencies regulating fuel dispensing require higher levels. Excessive illumination is designed to attract customers and, if granted, provides Ingle's an advantage over other fueling centers that meet the standards. The staff also notes that a recent replacement canopy on Long Shoals Rd. has complied with this new standard without protest.

Big Box Modification Requests:

8. *Required Standard #1* – Appendix 7-F of the UDO requires that if less than 25% of the parking is located to the side or rear of the building, then the parking area is to be buffered from the street with a 50-foot landscaped buffer that incorporates 150% of the plantings called for in a Class "B" buffer and includes a berm or wall with a minimum height of 42 inches. The applicant is requesting the elimination of this requirement due to the existing development on the site.

   The Big Box standards were primarily designed to address and mitigate the impacts a "new" large retail development has on surrounding and adjacent properties. Since its adoption, staff has had difficulty applying a number of the standards to "existing" developments undergoing renovation where the majority of property was already developed and in use. The landscape requirements in Appendix 7-F is somewhat outdated and has not been revised since the adoption of the City's current landscape ordinance which also incorporate many of the same standards. In lieu of the requirement noted above, the applicant proposes to meet the typical street tree and buffering from the street requirement along Smoky Park Highway and proposes installation of additional buffer plantings between the residential neighborhood and store at the rear of the site. **The staff feels that this proposal is more appropriate and in character with the existing development and therefore supports this request.**

9. *Required Standard #1* – Appendix 7-F of the UDO requires that outparcels shall meet the design standards set forth in this section and shall not incorporate drive through facilities. The applicant is seeking to have this requirement eliminated. **The staff supports this request** as the outparcels are setback more than 200 feet from Smoky Park Highway and are separated by an active Norfolk Southern rail line. Further, the outparcels are situated so that their ingress/egress is via the internal driveway that connects Ingles to Lowes, and will not create additional curb cuts along Smoky Park Highway.

In conclusion, while the staff found good reason to support four of the requested modifications, the staff found the remaining requests to be very problematic in both the degree to which they vary from the requirements and the nature of the reasons stated for requesting the modifications. These requests are deeply divergent from the required standards, and the reasons stated by the applicant are generally related to personal preference and standards of the company, not the standards adopted for the City or hardship inherent to this site. Unless the Council finds the situation at this location to be truly unique, approval of the requested modifications (particularly to the levels requested) would make it difficult to uphold the standards in other locations. The staff does not find elements at this location that make it unique enough to warrant significant divergence from the landscaping and lighting standards that are used throughout the city. If, however, the Council supports these modifications; they may wish to direct the staff to reconsider the basis of these standards.

This proposal was recommended for approval with conditions by the Technical Review Committee (TRC) on January 3, 2011. No members of the public were present to speak on this project and no comments have been received by staff. Susan Roderick (TRC representative for the Tree Commission) stated concern about the developer's proposal to provide fewer shade trees in the parking lot than required by the ordinance. She also stated a belief that the internal pedestrian walkway requirement provides a safer pedestrian connection and would also provide additional area for meeting the internal landscape requirements and prefers it over the alternative sidewalk location that wraps around the perimeter of the property.

It should be noted that the Alternative Compliance Sub-Committee of the Tree Commission has reviewed previous versions of the Ingles site when it was thought that the project would be reviewed under the purview of a Level II site plan review. Many of the same

modification issues/concerns were noted during these past reviews as noted by Ms. Roderick above.

The Greenway Commission considered the application for the permanent closure of Cooper Boulevard on January 13, 2011. Attention was focused on the existing dirt walking trail in the rear of the property connecting Old Starnes Cove Road to the rear of the existing Ingles store. The Commission, after some discussion, made the following motion unanimously approving the request for the permanent closure of Cooper Boulevard: "City staff shall research the feasibility of a permanent, multi-use, maintained trail connecting the neighborhood to the new Ingles Market development, and for the Planning & Zoning Commission and City Council to consider that research in their approval of the street closure and zoning modifications."

The Planning and Zoning Commission, at their regularly scheduled meeting on February 2, 2011, unanimously approved the project with all 9 modification requests. The Commission noted that they felt that the applicant presented valid points on why the modifications were being requested and that they felt that the requests were unique to the project. Reasons stated were generally related to the shape of the parking areas (being wider and shallower than many others), or a personal reluctance to use amenities like center pedestrian islands, or a concern about shade trees blocking vehicle visibility. Commissioners also noted that some sites are "not going to be able to meet the City's standards but may be able to achieve the same outcome in a different way" although no specific examples were given as to why this site was achieving those outcomes in other ways. The Commissioners stated that "they review each project that comes before them independently and make adjustments if they see fit." Additionally, it was the consensus of the Commission to request that a marked crosswalk be installed across Smoky Park Highway in front of the new proposed "Cooper Boulevard" entrance. The staff notes that there is currently a crosswalk across Smoky Park Highway at the Lowe's entrance.

Additionally, the Sustainable Advisory Committee on Energy & the Environment met on February 16 and voted to recommend: "Whereas properly landscaped parking lots provide environmental benefits to reduce heat island effect and whereas enforcing the city's existing lighting standards reduces light pollution therefore SACEE strongly supports staff's recommendation to deny the variance request from the Planning and Zoning Commission. SACEE is further concerned that allowing these variances will set a harmful precedent for permitting unsustainable development."

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use o permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the *UDO*, the *Standards and Specifications Manual*, the *North Carolina Building Code* and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   This project represents the redevelopment of the existing Ingles store and shopping center with an expansion onto an adjoining parcel that formerly housed a now demolished mobile home park.

The residential neighborhood to the rear of the property is separated from this project by existing trees and a Class "B" buffer of additional width and plantings to be installed by the developer as well as topography change of over 20 feet. The remaining portions of the property are surrounded by similar commercial developments along the Smoky Park Highway corridor.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   As noted in Finding #2, the proposed development is compatible with surrounding commercial uses and the residential nature of the property to the rear of the development will be buffered by additional vegetation, open space and the existing topographical elevation change.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The site is adjacent to the Lowes home improvement store to the east, auto sales and body shop to the west and a number of commercial uses along the Smoky Park Highway corridor including a motel, convenience store and the Asheville School campus. The proposed use is consistent with both the existing zoning and character of the Smoky Park Highway commercial corridor in which it is located and maintains sensitivity to the adjoining residential neighborhood along Old Starnes Cove Road through the use of mitigating factors including additional landscaping, open space and existing topography.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   Elements of the proposal are aligned with the City's goals and objectives as noted in the Compliance with Comprehensive Plan and other Adopted Plans section (listed above). Specifically, the redevelopment and expansion of this site is consistent with the goals of infill development along an established commercial corridor.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The site is located just off Smoky Park Highway (US 19-23) and is within approximately one (1) mile of an entrance to I-40. Although the City of Asheville transit route does not currently extend this far west, provisions are included for a bus stop location on Smoky Park Highway to accommodate future transit expansion. Adequate water supply, fire and police protection, waste disposal and similar facilities are verified during the TRC review process.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   Based on the development size, a traffic impact study for this development is required by City of Asheville ordinance. The traffic impact study has been received and reviewed by staff. No adverse traffic impacts occur on the adjacent roadways because the recommended mitigation elements are implemented. Further, as this development's entire street frontage borders a NCDOT facility, all recommendations will require their approval.

Based on the above findings and the analysis provided in the report, staff finds this request, with conditions noted, to be reasonable.

Pros:

- Provides an opportunity to redevelop and upgrade an existing developed site.

- The project will ultimately provide additional jobs to the local economy.
- An enhanced architectural building and landscaped parking lot will significantly improve the overall appearance of the shopping center making the development more compatible with the surrounding area.

Cons:

- Includes a significant number of modification requests that could be mitigated by designing the development in such a way that meets all applicable UDO requirements.
- Granting modification requests arising from a preference for maintaining standard prototypes could establish precedents for requests from future developments seeking such relief, and a dilution of the intent of the standards.

Staff recommends approval of the conditional zoning request as submitted by the applicant, including the modifications supported by staff. In addition to the standard conditions, staff recommends the following additional conditions as well: (1) A lot recombination of both subject parcels must be completed before zoning permit issuance; (2) Existing trail connecting the Old Starnes Cove Road neighborhood to the Ingles store will be required to clearly delineate surface with a pervious material such as mulch or gravel; (3) Façade enhancements to the existing shops within the center are required to be completed within 5 years of the Conditional Use Permit approval and shall be architecturally compatible in color and shall incorporate design elements in common with the Ingles structure; and (4) Future development of outparcels shall adhere to the design standards outlined in the Façade Renovation addendum provided by the applicant to ensure compatibility with the overall design of the structures within the development. Furthermore, staff requests that City Council consider the long term implications of approving modifications related to preference only, and do not achieve goals established by the City in the standards for review of these types of uses.

Signage Plan

Technical Review Manager Kim Hamel said that this is the consideration of an ordinance to approve a signage plan for a new Ingles Store and proposed ancillary uses and existing shops located at 153 Smoky Park Highway. This public hearing was also advertised on February 11 and 18, 2011.

The proposed master signage plan is being reviewed concurrently with a Conditional Zoning application for the redevelopment of the site. The signs included in this proposal primarily address the signage for the new supermarket, gasoline sales/convenience store, and car wash facilities.

The Ingles development site also houses several other businesses each with a freestanding and attached sign (Pizza Hut, Suntrust, and State Employees Credit Union). In addition to the signs being requested to support the new development, Ingles is also proposing a new multi-tenant identification sign to replace the existing free standing signs on site. This sign will be located near the western entrance, closest to the existing shops.

The project site consists of approximately 31.6 acres, zoned Highway Business (HB), and is considered to be a multi-tenant development. The Unified Development Ordinance (UDO) currently allows multi-tenant developments one free-standing development or joint identification sign and also attached signage for each individual business within the development. Tenants within a multi-tenant development are not permitted to have separate freestanding signs.

The signage plan is divided into two categories: (1) signage for the new Ingles supermarket and proposed ancillary uses, and (2) signage for the existing businesses remaining on the site and signage for future development within the center and on the proposed outparcels.

Category Description and Analysis

1) New Development: Separate attached signage is requested for each separate service and includes:
   - Multiple signs for the principal Ingles supermarket
   - Attached signage for a convenience store (The i Market)
   - Attached signage for the retail gasoline sales (Gas Express)
   - Attached signage for the car wash (Laser Wash)

Along with this attached signage, Ingles is also requesting consideration of two separate free-standing pylon signs to be located along the street front for both the retail gasoline sales and the Ingles supermarket. Changeable copy panels are requested for both pylon signs.

Using exhibits, she reviewed the following table which provides information on each of the signs that is being requested:

Note: Multi-tenant signage allowance: One freestanding sign permitted for the development: 25-feet in height and up to 200 s.f. Attached signage: one square foot per one linear foot of building frontage (1:1 ratio) not to exceed district maximum of 200 s.f.

INGLES MARKET EXHIBIT 2A – 2B	PROPOSED	WHAT IS ALLOWED	AMOUNT EXCEEDED
Ingles (Store Sign) (Exhibit 2A)	201.95 s.f.	1 attached sign; not to exceed 200 s.f.	1.95 s.f.
American Owned	36.0 s.f.	Not allowed	# of signs and s.f. has been exceeded
Fresh Foods	29.46 s.f.	Not allowed	"
Starbuck's	16.0 s.f.	Not allowed	"
Café	**8.48 s.f.	Not allowed unless not visible from the R.O.W.	"
Pharmacy Drive-Thru	*13.13 s.f.	Wayfinding/directional	allowed
Free-standing Pylon (Exhibit 2B)	180.26 s.f.	1 sign @ 200 s.f.	Permitted and Complies

GAS CENTER EXHIBIT: 3A - D	PROPOSED	WHAT IS ALLOWED	AMOUNT EXCEEDED
Gas Express, canopy (Exhibit: 3A)	36.6 s.f.	Not allowed; not a separate tenant	# of signs and s.f. has been exceeded
Ingles, canopy (Exhibit: 3A)	21.0 s.f.	Not allowed; not a separate tenant	"
The i Market (Exhibit: 3B)	16.37 s.f.	Minimum of 25 s.f. or 1:1 ratio	Permitted and Complies
Wash Express and Laser Wash (Exhibit: 3C)	33.86 s.f. 4.32 s.f	Minimum of 25 s.f. or 1:1 ratio	Permitted and Complies
Free-standing Pylon (Exhibit: 3D)	112.0 s.f.	(1) Joint identification sign per development.	Number of free-standing signs have been exceeded.

** The Pharmacy Drive-Thru sign was not included in the total square footage since it is considered wayfinding or directional signage. ** There is also a precedent for exempting the Café*

sign when reduced in size so as not to be visible from the public right-of-way or adjacent properties.

The proposed plan for the grocery store exceeds the number of attached signs allowed as it is proposing five separate signs instead of the one to two normally allowed. The attached signage also exceeds the total allowed square footage of the district maximum (291.89 s.f. instead of 200 s.f.).

The gas center (that includes the convenience store, gas pumps and car wash) must also comply with the multi-tenant signage allowance. Compliance with that standard would limit the attached signage to only the convenience store and carwash and would not permit a freestanding pylon sign since only one joint identification sign is permitted per development.

2) Signage for existing businesses and shops (Exhibit 4):

A total of 4 single tenant freestanding signs exist on the Ingles development site including: the existing Ingles sign, Pizza Hut, Suntrust, and the State Employees Credit Union. Currently, the Ingles development consists of two separate parcels that would have permitted at least two of the freestanding identification signs. There is also precedent for allowing businesses located on lease parcels to obtain separate single tenant signage as long as the lease area is constructed to meet all of the UDO design standards as if it were located on its own parcel.

Ingles is proposing to remove all of the existing freestanding signs within the development and replace them with one joint identification sign that will provide advertisement at the street for the other businesses located within the shopping center. The sign would comply with the height and size standards permitted for a multi-tenant development (25-feet tall, 200 s.f) and would also reduce the visual clutter and distraction that multiple free standing signs (located within close proximity to one another) can create for motorists traveling on the highway.

The Conditional Zoning application that is associated with this review is conditioned upon Ingles recombining the two parcels into one lot. This is a standard requirement when there are not enough parking spaces within a multi-tenant development to support all of the uses on the property (when calculated separately for compliance) and when other infrastructure on the site is used in common (ingress/egress, sidewalks, etc.). This requirement also eliminates the need for separate cross access and shared parking agreements between business uses.

As noted in the Conditional Zoning report, staff supports the applicant's request to allow for a reduced parking requirement to support the various uses on site. This, however, creates unique challenges in applying fair and equitable signage for the existing and future uses and development that may occur on the site. Because the existing development falls short of providing the number of required parking spaces the lot must be recombined into one parcel. This, however, eliminates the option for existing tenants to maintain their current "single tenant" status as they can no longer comply with all of the design standards for a business located on a separate parcel or lease area.

Additionally, unlike other recent Ingles developments, the site cannot be subdivided (or re-subdivided) to accommodate the features included in the new Ingles prototype development that includes not only a supermarket but also a gas station with convenience store and car wash. The prior signage plan approvals that Ingles received were supported because the gas center uses could be located on a separate parcel from the supermarket and the signs could have been permitted as single-tenant signs by right (with exception to the larger sizes that were approved). It is also not unusual for the primary business, Ingles, to request a separate free-standing sign with a changeable copy component for advertising the various uses within the store and special sales on products.

The stated purpose of allowing the consideration of a separate signage plan is as follows:

The purpose behind this section is to permit creativity in sign design and placement to address site issues and constraints associated with topography, pedestrian-orientation, way-finding and other conditions unique to the subject development.

In the context of the significant number of applications for signs received daily by the City, we feel that the site presents unique site conditions and constraints that warrant the special consideration allowed. Staff also feels that a precedent for Ingles has been set through the approval of two other sign packages that were substantially similar to the signage included in this report.

Pros:

- Provides clear and recognizable signage to a large grocery retailer.
- Allows for the removal of multiple signs within close proximity to one other and replaces them with a more compliant sign option;
- Allows for equitable signage opportunities for the existing retail center and future uses
- Reduces visual clutter by removing multiple signs that may lead to distracted motorists along a corridor

Con:

- Exceeds existing standards without creatively addressing pedestrian-orientation or way-finding

Staff recommends that the signage plan for the Ingles development located at 153 Smoky Park Highway be approved as submitted with the following conditions: (1) All signs shall meet the HB zoning district setbacks, the site distance triangle requirements and all applicable building code requirements; (2) Window films shall be limited to image displays only; films that incorporate any form of commercial advertisement or trademark must be counted towards the development's signage requirements which are not included in this application; (3) Any changes to the signage included in this plan may require a new review by City Council; and (4) All signs shall comply with the proposed standards and no exceptions or variances are permitted.

Mr. Ellison said that Ingles has been working on this good plan for over 5 years. They began with 9 modification requests and have worked their way down to only 4 modification requests. Regarding the parking lot trees, they are in 87% compliance in a small parking lot that has a unique shape. He noted that in the parking lot there will be 330 large canopy trees, 146 small deciduous trees, 135 evergreen trees for a total of 611 trees. While there is a shortage in the parking area, they believe they are addressing those issues by the number of canopy trees around it. Regarding the parking island, Ingles feels that it is safer to build the wrap around sidewalk. They received a letter from Asheville School in support of the alternate wrap around sidewalk. He feels that safety of the public is the issue and with the sidewalk around the lot, it will reduce the battle between pedestrians and cars. They are not trying to dodge the requirements, but have found some alternative ways to meet the requirements. He quoted comments from the Planning & Zoning Commission February 2, 2011, meeting in which the Commissioners unanimously approved all modifications noting that they were unique to the site. Ingles has worked with the neighbors and they have made adjustments to the plan based on community input. This $20 Million project has many economic benefits to Asheville, including increase in jobs, payment of more taxes, etc. Regarding the lighting issue, he again said the issue is safety. He explained that the superior Ingles fuel center canopy design allows the light to remain on their property. He said that every Ingles store with a gas station in western North Carolina has a standard of 100 maintained footcandles; however, they are requesting 80 maintained footcandles. He urged Council to approve the conditional zoning request with modifications.

Even though the following individuals were supportive of the conditional zoning request of Ingles, they did not support the four variances not supported by City staff for the various reasons, some being, but are not limited to: properly landscaped parking lots provide environmental

benefits to reduce heat island effect; the City's existing lighting standards reduces light pollution; allowing these variances will set a harmful precedent for permitting unsustainable development; and the internal pedestrian walkway requirement provides a safer pedestrian connection:

Mr. Bernard Arghiere
Mr. Bob Gale, Chairman of the Tree Commission
Mr. Kenneth Fulford
Ms. Laura Piraino, Executive Committee of the local Wenoca Sierra Club
Ms. Raelin Hansen
Ms. Susan Roderick, Asheville Greenworks
Ms. Lisa McWherter, Executive Committee member for the local Sierra Club Chapter
Mr. Steve Rasmussen
Mr. James Judd (opposed also to signage plan)

Mayor Bellamy closed the public hearing at 6:48 p.m.

Councilman Bothwell moved to adopt an ordinance for the conditional zoning of the project identified as Ingles Markets, Inc., located at 153 Smoky Park Highway from Highway Business District to Highway Business District/Conditional Zoning to allow for the development of a new 105,175 square foot grocery store with associated car wash, gas station and 32,060 square feet of additional retail space, and approval of the modification requests only supported by City staff (not the three parking lot standards modifications or the outdoor lighting for vehicular canopies modification), subject to the following conditions (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with full cut-off fixtures (including wall packs) and directed away from adjoining properties and streets. A detailed lighting plan will be required upon submittal of detailed plans to be reviewed by the Technical Review Committee; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits; (6) A lot recombination of both subject parcels must be completed before zoning permit issuance; (7) Existing trail connecting the Old Starnes Cove Road neighborhood to the Ingles store will be required to clearly delineate surface with a pervious material such as mulch or gravel; (8) Façade enhancements to the existing shops within the center are required to be completed within 5 years of the Conditional Use Permit approval and shall be architecturally compatible in color and shall incorporate design elements in common with the Ingles structure; (9) Future development of outparcels shall adhere to the design standards outlined in the Façade Renovation addendum provided by the applicant to ensure compatibility with the overall design of the structures within the development; and (10) that the City's standards be met regarding the three parking lot landscaping requirements and the outdoor lighting for vehicular canopies outlined above by City staff. This motion was seconded by Vice-Mayor Newman.

City Attorney Oast said that because this is a conditional zoning, any conditions imposed by City Council must have mutual consent by the applicant. If there is no mutual consent by the applicant, then the conditional zoning project fails and cannot be brought back to Council for one year, unless there are significant changes (if the ordinance to be considered on second reading by City Council later in the meeting passes.)

Mr. Ellison advised Council that he did not have the authority to consent to the condition regarding the four variance requests not recommended by City Council. He suggested Council continue the matter in the hopes of working towards approval of the variances requested.

City Attorney Oast suggested Council continue the matter to a date certain to see if the applicant will agree to the conditions incorporated into the motion. This will also allow staff to

meet with Ingles representatives and hopefully come to some agreement. If the matter is continued, Council could continue the public hearing and take further comment on new information only related to the parking lot landscaping requirements and the outdoor lighting issue.

It was the consensus of Council that Ingles is an outstanding corporate citizen and they hope that staff and the applicant can work out a compromise on the four remaining modification requests.

Councilman Bothwell withdrew his motion. He then moved to continue the public hearing on the conditional zoning request to March 22, 2011. This motion was seconded by Vice-Mayor Newman and carried unanimously.

Councilman Smith moved to continue the public hearing regarding the signage plan for a new Ingles Store and proposed ancillary uses and existing shops to March 22, 2011. This motion was seconded by Councilman Davis and carried unanimously.

D. PUBLIC HEARING TO CONSIDER CLOSING COOPER BOULEVARD

Because the public hearing to consider closing Cooper Boulevard relates to the conditional zoning request for Ingles Markets Inc. located at 153 Smoky Park Highway, Councilman Smith moved to continue the public hearing to March 22, 2011. This motion was seconded by Councilman Davis and carried unanimously.

At 7:15 p.m., Mayor Bellamy announced a short recess.

V. UNFINISHED BUSINESS:

A. ORDINANCE NO. 3947 - ORDINANCE TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATIVE TO CHANGES TO DEVELOPMENT REVIEW PROCEDURES REGARDING RESUBMISSION OF A DENIED CONDITIONAL USE

ORDINANCE NO. 3948 - ORDINANCE TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATIVE TO CHANGES TO DEVELOPMENT REVIEW PROCEDURES REGARDING SEPARATION REQUIREMENTS

Due to a recent conflict of interest, Councilwoman Manheimer asked to be recused from participating in discussions of Ordinance Nos. 3947 and 3948. Vice-Mayor Newman moved to recuse Councilwoman Manheimer from participating in these matters. This motion was seconded by Councilman Bothwell and carried unanimously.

Councilwoman Manheimer then left the Chamber.

City Attorney Oast advised Council that in order for the ordinances to pass, they will require four votes in favor.

Planning & Development Director Judy Daniel said that on February 8, the City Council voted 4-3 to adopt two changes to the Unified Development Ordinance addressing the decisions of the City Council, and separation requirements for developments in or adjoining residential areas. A 4-3 votes requires a second vote, set for February 22. During the discussion of these amendments, the Council requested that the staff get additional comments on them from several organizations including (but not limited to) the Council of Independent Business Owners (CIBO) and the Coalition of Asheville Neighborhoods (CAN).

The first amendment establishes that if the Council denies a conditional use or conditional zoning application, a project that is essentially the same (or substantially similar) may not be submitted under any approval process within one year of the Council action.

> **Conditional Use approvals, resubmission of denied applications**: No application for approval of a ~~conditional use~~ development project (conditional use, site plan, project plan) under any approval process (Level I, Level II, or Level III), shall be filed with or accepted by the planning and development department if that project ~~which~~ is identical or substantially similar to a conditional use or conditional zoning application which has been denied by the city council within one year of the final action by the city council denying the request.

The second amendment modifies the threshold for Level II vs. Level III review of a site plan, affecting properties under the same ownership in residential areas, establishing (as was the standard in the Unified Development Ordinance (UDO) until modifications in 2009) that to be reviewed as a Level II, the projects must not contain multiple structures less than 1,500 feet apart.

> **Level II Site plan review process**: Properties not adjoining or fronting single-family zoning, that are within 500 feet of each other, under the same ownership and/or developed by the same developer over a period of three years or less shall be considered to be one development and reviewed as such. Properties adjoining or fronting single-family zoning, located within 1,500 feet of each other, under the same ownership and/or developed by the same developer over a period of three years or less shall be considered to be one development and reviewed as such.

This change does not affect properties in commercial areas (as was the intent of the modification in 2009) and such properties in residential areas can still move forward as Level III projects.

The staff presented the changes at the CIBO meeting on Friday, February 11. Their overall comments were very negative about the proposed changes. There were a number of comments, most feeling that changing the process is a bad idea, especially given the current economic conditions. The tone and content were very much the same as expressed by a CIBO representative and a representative of the Board of Realtors at the Council meeting on February 8.

The staff met with CAN representatives on Monday evening, February 14. Their overall comments were very much in support of the proposed changes. There were several comments on both amendments. On the first amendment most reflected a feeling that the process needed to be changed so that if the Council did not approve a project, it could not return as essentially the same or slightly modified within a year. On the second amendment most reflected a feeling that distance requirements should be wider in or adjoining residential neighborhoods; and projects under the same ownership that are proposing structures within 1500 feet of each other should go to the Council for approval.

Councilman Davis said that he did not support the ordinances on first reading because he felt it was a reaction and came forward out of our normal policy of doing business; however, the amendments are good and in consideration of neighborhoods and he would support them at this time.

Mayor Bellamy concurred with Councilman Davis in that these amendments will help developments going forward so when Council denies a project, they will have that decision stand for one year.

Vice-Mayor Newman moved to adopt Ordinance No. 3947 on its second and final reading. This motion was seconded by Councilman Smith and carried unanimously (with Councilwoman Manheimer excused).

ORDINANCE BOOK NO. 26 – PAGE 450

Vice-Mayor Newman moved to adopt Ordinance No. 3948 on its second and final reading. This motion was seconded by Councilman Bothwell and carried unanimously (with Councilwoman Manheimer excused).

ORDINANCE BOOK NO. 26 – PAGE 452

Councilwoman Manheimer returned to the Chamber.

C. CONSIDERATION OF SUSTAINABLE ADVISORY COMMITTEE ON ENERGY & THE ENVIRONMENT'S RECOMMENDATION REGARDING THE TRANSFORMATIONAL DEVELOPMENT PROJECTS INCENTIVE POLICY FOR THE CITY OF ASHEVILLE

Vice-Mayor Newman explained that the City Council Planning & Economic Development Committee discussed the "transformational projects" economic incentive policy at their meeting earlier this week. They asked the HCD Committee to have some further discussion about the affordability requirements as well, and so they had additional discussion at our HCD Committee on February 17.

The HCD Committee felt that we are getting closer to agreement about the key elements of this policy but that we would benefit from having a little more time to flesh out the policy details. It is our understanding that the issue may be scheduled for Council consideration at our next meeting. We wanted to request consideration for scheduling this at the meeting after next in order to provide a little more time to work out these details before it comes back to full Council.

Councilman Bothwell moved to delay consideration of this item until the March 8, 2011, meeting. This motion was seconded by Councilman Smith and carried unanimously.

D. STATE LEGISLATIVE UPDATE

City Attorney Oast said that the North Carolina General Assembly convened for the 2011 regular session on January 26. Almost immediately, bills were introduced in both chambers that would, if enacted, place a moratorium on involuntary annexation by cities. The bills would also stay annexations in progress, including those currently under review by the courts. This legislative stay would apply to Asheville's annexation of the Biltmore Lake area, which is currently pending in the North Carolina Court of Appeals. Council has been supplied with information from the North Carolina League of Municipalities and other sources regarding the progress of the bills in legislature. Additionally, we are receiving updates from League staff, and will pass them along as we receive them.

On a related note, local bills were introduced to repeal recently completed annexations by some cities.

Other bills for general legislation have been introduced that would have some effect on municipal operations. House Bill 111 would permit the carrying of concealed weapons in local government parks. House Bill 95 would clarify certain aspects of railroad corridors, and would have some effect on municipal subdivision and zoning processes. House Bill 36 would prohibit State and local government contracts with contractors who employ illegal immigrants, and require contractors to verify and certify the legal status of their employees.

We have not noted any local bills of particular interest to Asheville (other than the annexation repeal bills described above), but the pace of local bill introduction should pick up next month. A local bill has been introduced to authorize Alleghany County to collect an additional three percent room and occupancy tax. (H.B. 96).

City Attorney Oast said that he received a call from the Buncombe County Attorney who said a bill had been introduced – An Act to Authorize Brunswick County to Require the Payment of Delinquent Property Taxes Before Recording Deeds Conveying Property. The Buncombe County Commissioners have expressed an interest in having Buncombe County added to that bill and they have asked if the City would support them in that request.

Councilwoman Manheimer moved to support Buncombe County being added to the following bill: "An Act to Authorize Brunswick County to Require the Payment of Delinquent Property Taxes Before Recording Deeds Conveying Property." This motion was seconded by Councilman Davis and carried unanimously.

Councilman Smith moved to discourage the state legislature to support House Bill 129 – bill "Level Playing Field Local Government Competition Act" which would prohibit or limit the ability of local governments to provide broadband or any other communication services or systems. This motion was seconded by Councilman Bothwell.

After a brief discussion, Councilman Smith withdrew his motion.

It was the consensus of Council for City Attorney Oast to provide information to Council on this bill and if no concerns are raised to place the resolution on the March 8, 2011, consent agenda.

VI. NEW BUSINESS:

A. RESOLUTION NO. 11-42 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A NEGOTIATED PURCHASE AGREEMENT WITH THE ASHEVILLE HOCKEY LEAGUE AND AWARD THE SALE OF THE ASHEVILLE CIVIC CENTER ICE RINK AND ALL RELATED EQUIPMENT

Administrative Services Director Lauren Bradley said that this is the consideration of resolution authorizing the City Manager to enter into a negotiated purchase agreement with the Asheville Hockey League and award the sale of the Asheville Civic Center ice rink and all related equipment.

On December 14, 2010, Asheville City Council delayed consideration of a resolution authorizing the City Manager to award sale of Civic Center ice rink and equipment to the highest bidder in order to provide time for staff to explore options for privately negotiating a sale of the equipment to the Asheville Hockey League (AHL).

After the December 14 meeting, staff completed legal research regarding the disposal of the equipment. Normally, personal property with a value in excess of $30,000 cannot be disposed of by private sale and negotiation. Advertised bids would be required. However, GS 160A-279 provides an exception to this rule. This statute authorizes a City to dispose of property by private sale to a non-profit agency that is carrying out a public purpose. Conveyance of the property is conditioned on the use of the property for a public purpose. Based on this research, staff concluded that the AHL could meet the requirements of the statute and carry out a public purpose by allowing public access to the rink and equipment.

At the January 25, 2011, Finance Committee meeting, representatives from the Asheville Hockey League presented staff with a plan for putting the ice rink into use. The Finance

Committee directed staff to review the proposal and discuss options for negotiating a sale of the ice rink and equipment for City Council consideration.

After the January 25 Finance Committee meeting, staff met with AHL representatives to review the plan and determine mutually acceptable terms by which the ice rink and equipment could be conveyed to the league. These terms would be summarized in an agreement between the City and AHL and would include:

- AHL will provide an up-front payment to the City for the purchase of the ice rink and associated equipment in the amount of $15,000 with one payment of $5,000 at the execution of the agreement and the remaining $10,000 paid by May 31;
- The ice rink would be operational and open to the public within three years. If the ice is not open within three years, the City would have the right to exercise a reversion clause;
- AHL would agree to move the equipment out of the Civic Center by May 31, and would have a signed contract with a contractor to remove the equipment as well as evidence of a reserved storage space no later than May 1, and;
- The City would require as exhibits to the agreement a bio of AHL board members and others who would be involved to demonstrate that the group has the background and experience to operate the ice rink.

The purchase price was negotiated based on the AHL's estimates for moving and repairing the ice rink, which is estimated by the league to be $57,000-$85,000.

The Finance Committee was updated on progress at its February 8, 2011, meeting, where the Committee voted to move the item forward for City Council consideration at its February 22, 2011 meeting.

The consideration of this action does not specifically relate to the City's Strategic Plan.

Pros of the negotiated sale:

- Allows the ice rink and equipment to remain in the Asheville community for public use.
- Supports the City's goal to partner with outside groups and agencies to provide recreational programming.
- Provides a certain date and specified sale amount by which the rink will be disposed.

Cons of the negotiated sale:

- AHL plans for utilizing the rink and equipment are still somewhat conceptual and will rely on fundraising; therefore, implementation is not guaranteed.
- The value of the rink and equipment has been estimated by staff to be around $100,000. The negotiated purchase price is below this amount and could result in the loss of additional revenue generated through a competitive bid process.

A negotiated sale to the AHL would result in $15,000 in revenue. A competitive disposal process could yield a higher amount of revenue for the Civic Center Fund; however, this potential loss of revenue could be offset by the benefit of putting the ice rink and equipment into public use for the Asheville community. It also recognizes the capital investment AHL will have to make in order to make the ice rink operational in Asheville.

Staff is seeking City Council consideration of a resolution authorizing the City Manager to enter into a negotiated agreement with the Asheville Hockey League for the sale of the Civic Center ice rink and all related equipment. If City Council is not supportive of the negotiated sale, staff would further seek City Council's consideration of resolution authorizing the City Manager to award the ice rink and all related equipment to the highest sealed bidder.

The following individuals spoke in support of the City entering into an agreement with Asheville Hockey League for various reasons, some being, but are not limited to: the public and economic value of an ice rink in town and the great recreational opportunity for Asheville:

Mr. Hutch Kerns, President of Asheville Hockey League
Mr. Jim Delany, Youth Director of Ice Hockey with Asheville Hockey League
Mr. Dean Pistor
Current Active In-Line Youth Commissioner
Three young hockey players
Ms. Julie Pratt

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Bothwell moved for the adoption of Resolution No. 11-42. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 33 – PAGE 350

\

B. RECEIVE AND CONSIDER PROPOSAL FOR FORMATION OF MILLS RIVER WATERSHED PROTECTION PROGRAM

Mr. Jere Brittain, Mills River resident and conservation landowner, said there have been concerns over the past several years about maintaining the quality of the water that flows through the community. He invited the City of Asheville to name a member to the Board of Directors of the Mills River Partnership.

Mr. Shaun Moore, Watershed Coordinator with the Henderson County Soil and Water Conservation District, highlighted the importance of this drinking water supply and history of the Mills River Project.

Mr. Kieran Roe, Executive Director of Carolina Mountain Land Conservancy, explained that the informal Mills River Partnership is now attempting to form a formal non-profit. He then invited the City of Asheville to participate in the revitalization of water supply restoration and protect efforts in the Mills River drinking water supply watershed by appointing a representative to serve on the Mills River Partnership Board of Directors.

In response to Mayor Bellamy, Mr. Roe said that the first meeting of the Board is March 2, however, if it takes the City longer to name a representative perhaps the City could send a representative to the first meeting. He will meet with City Manager Jackson to discuss how the City can be more engaged in the process.

In response to Mayor Bellamy, City Manager Jackson felt that staff needed at least 60-90 days to evaluate the structure, funding recommendations, etc. of this request. He said that City staff can report back to Council in 30 days with an interim report. At this point, this is a lot of information that needs to be considered from a policy standpoint, including the proposal which is to establish this as a perpetually funded entity with fees to be charged to water rate payers.

Mayor Bellamy requested this be reviewed, prior to coming back to Council on March 22, by the City Council Planning & Economic Development Committee or the City Council Finance Committee.

City Manager Jackson said there has been a lot of good work done to evaluate the needs for watershed protection and we want to be on board with that. It is important to protect this watershed and to play a role. At this point in time, he and the Water Resources Director are not

in the position to say that with 1 out of 13 seats on a non-profit board is meaningful for our level of investment in this process.

C. RESOLUTION NO. 11-43 - RESOLUTION IN SUPPORT OF FULL EQUALITY FOR ALL ASHEVILLE CITIZENS

The resolution being considered outlined the following final actions requested by City Council: The Asheville City Council act to affirm and protect the equal rights of all its citizens by (1) Extending the city's employment discrimination clause to include "sexual orientation", "gender", and "gender identity or expression"; (2) Enacting an anti-bullying ordinance for all city institutions and grounds; (3) Creating a Domestic Partner Registry to recognize same-sex relationships for the purposes of providing documentation and offering a mechanism through which hospitals, businesses, and other entities will have the opportunity to recognize these relationships; and (4) Endorsing and supporting the rights of same-sex couples to share fully and equally in the familial rights and responsibilities of civil marriage.

Councilman Smith was honored to bring this forward to City Council and thanked the various individuals and groups who have been important in this process.

The following individuals spoke in support of the resolution for various reasons, but mainly due to equal rights for all:

Rev. Joe Hoffman, Senior Pastor of First Congregational United Church of Christ, on behalf of People of Faith for Just Relationships
Ms. Angel Chandler
Mr. Juan Oyola
Mr. T.J. Thomasson
Mr. Chris Oaks
Ms. Yvonne Cook-Riley
Mr. James Sheeler
Mr. Wes Heath
Ms. Ashley Arrington
Mr. Simon Thompson
Mr. Alan Robinson
Mr. David Spicer
Ms. Carmen Ramos-Kennedy
Mr. Alan Ditmore
Mr. Craig White
Mr. James Dye
Mr. Aixa Wilson
Ms. Leslie Boyd
Mr. Monroe Gilmore, Coordinator of WNC Citizens for an End to Institutional Bigotry
Ms. Jennifer Thornberg
Ms. Heather Talley
Founder of Justice for All
Mr. Robert Wells
Ms. Vivian Gold
Ms. Allison Shad

The following individuals spoke in opposition of the resolution for various reasons, but mainly due to religious and financial reasons:

Rev. Wendell Runion
Mr. Randy Bray
Mr. Tom Ascik
Pastor Larry Sprouse, Oak Ridge Baptist Church

Pastor Jerry Young
Mr. Meredith Hunt
Ms. Leslee Kulba
Mr. Donald Fleming
Rev. David Hall
Mr. Ricky Parham
Mr. Sam Taylor
Taxpayer in Asheville
Mr. Phillip Wilson

NOTE: Information before City Council from Staff Report from Assistant City Manager Jeff Richardson: "A community group has formally requested the Asheville City Council to adopt a resolution at the February 22 council meeting 'in support of full equality for all Asheville citizens.'

Pursuant to this request, the City Manager requested staff to provide analysis and any applicable guidance for consideration with this draft resolution. This draft resolution is intended to affirm and protect the equal rights of all citizens through the four steps outlined below. Staff has provided analysis and/or operational steps with each of the four steps as follows:

1. Extending the city's employment discrimination clause to include sexual orientation, gender, and gender identity or expression.

Staff Review: The city's EEO policy which was originally passed in 1994, does include language to address sexual orientation as a protection:

> "Every employment related decision the City makes shall be on the basis of merit without regard to an individual's race, color, creed, religion, national origin, sex (including pregnancy) age, disability, sexual orientation or familial status except when being a member of a particular group is deemed to be a bona fide occupational qualification."

Research indicates some employers have included this language as outlined, mostly in the private sector. Legal review suggests that 'at will' status in the City of Asheville remain as is, meaning that this language, if adopted, would only affect employees covered under the City's personnel ordinance.

2. Enacting an anti-bullying ordinance for all city institutions and grounds.

Staff Review: The City's Ethics Policy appears in line with the goals of this language as stated, 'the policy intent is to foster trust and respect among city employees and the public by creating an environment in which citizens and employees feel valued, safe, and welcome.' The City's Workplace Violence Policy is in line with anti-bullying policies in that it requires employees to treat each other with respect and consideration and to maintain a workplace free of intimidation and violence. In addition, the Parks and Recreation Department has adopted a *Discipline and Behavioral Management Policy* for youth programs that outlines in detail behavioral expectations to include threatening behavior. Staff feels that current policies as outlined adequately address the intent of the proposed language in the resolution and no further edits are necessary to existing city policies. If Council adopts the ordinance and directs Staff to include additional language addressing anti-bullying in City of Asheville parks on supplementary signage, Staff should anticipate that the fiscal impact would be between $3,000 to $4,000 based on the costs of the signage stating the City's anti-smoking policy outlined in the December 2010 Staff Report. Staff suggests that if signs are needed for informing citizens of the anti-bullying policy that the posts supporting the City's anti-smoking policy for recreation areas and facilities be utilized.

3. Creating a Domestic Partner Registry to recognize same-sex relationships for the purposes of providing documentation and offering a mechanism through which hospitals, businesses, and other entities will have the opportunity to recognize these relationships.

Staff Review: Chapel Hill and Carrboro are the two N.C. cities that currently provide this service. Chapel Hill enacted this registry in 1995, and it is operated in the City Clerk's Office. Chapel Hill offers this service to same sex and opposite sex domestic partners and has registered partners all over the U.S. at a fee of $50. Over the 16 year history, Chapel Hill reported 141 domestic partner registrations. City staff is prepared to administer this service upon the direction of city council accordingly and if adopted, staff would like to recommend a fee structure accordingly.

4. Endorsing and supporting the rights of same-sex couples to share fully and equally in the familial rights and responsibilities of civil marriage.

Staff Review: Regarding applicable city policies: 1) Sick Leave: does currently enable employees to use sick leave for domestic partners under the term of 'significant other,' which is defined as any person with whom the employee has cohabitated and shares an intimate relationship regardless of marital status. 2) Bereavement Leave: does allow leave for employee's significant other. 3) FMLA: this federal law does not provide benefits to domestic partners. While the city could extend FMLA leave benefits for domestic partners, this would be in addition (over and above) to the employee's leave entitlement under federal law. 4) Extended Medical Leave: does not indicate leave could be used for the care of a domestic partner and this section would need modification if this resolution is passed. Nepotism Policy: does currently address domestic partners in the Immediate Relative definition to include significant other.

This action aligns with City Council's Strategic Operating Plan in the *Job Growth and Community Development* Goal: "Enhance diversity throughout the City as an organization so that the workforce more closely resembles the community, especially in the area of public safety.

Section three, *Creating a Domestic Partner Registry*, requires administrative and operational oversight of the program. A proposed fee structure offsets the cost of the program, however, it is difficult to determine total cost of the program until ample time has passed to study volume of requests is analyzed compared to revenue collected. Staff recommends differential fee for non-city and non-state residents. The fiscal impact of additional signage addressing the City's anti-bullying policy would be between $3,000 to $4,000 based on the costs of the signage stating the City's anti-smoking policy outlined in the December 2010 Staff Report.

Staff analysis is intended to show operational impact to the City of Asheville. Staff is prepared to take steps to implement policy changes as directed through City Council action."

In response to Councilman Smith, Assistant City Manager Jeff Richardson said that the last fall City Council directed staff to look at same sex domestic partner health insurance benefits. Council asked staff for guidance on an implementation date. After analysis, staff reported that they would be prepared, in conjunction with the budget process, to bring back any issues with the domestic partner health insurance implementation within an expected implementation of July 1, 2011. Beginning in March, Council will begin looking at pieces of the budget process including compensation and benefits. At this point, staff is not recommending any General Fund transfer to the Health Fund next year. We are preparing for the domestic partner health insurance roll-out July 1, 2011.

Councilman Smith said Council's job isn't to prefer one religious view over another and it's clear that there are all sorts of strongly held beliefs around these issues. Nothing Council does at this meeting will restrict you from believing that which you choose to believe. We have a responsibility to address the equality, safety and opportunity of all our Asheville citizens. This is about justice.

Councilman Smith moved to adopt Resolution No. 11-43. This motion was seconded by Councilman Bothwell.

In response to Mayor Bellamy, Councilman Smith reviewed each of the four points in the resolution as follows:

(1) Extending the city's employment discrimination clause to include "sexual orientation", "gender", and "gender identity or expression." Councilman Smith said that City's employment discrimination clause would broaden this to include "gender identity or expression."

(2) Enacting an anti-bullying ordinance for all city institutions and grounds. Councilman Smith said that this would be for within City institutions and on City grounds, e.g, parks.

When Mayor Bellamy asked how "bullying" would be defined, Councilman Smith said that the was using the language in the School Violence Prevention Act.

Mayor Bellamy felt it was important that Council have the opportunity to review the definition of "bullying" to be clear on what exact language Council is being asked to vote in support of.

Councilman Smith felt Council is only providing general policy direction for staff and they would return to Council with details of implementation.

Mayor Bellamy agreed that staff could be given direction; however, before we adopt the resolution with that provision in it, Council and the community should be clear on what the language means.

(3) Creating a Domestic Partner Registry to recognize same-sex relationships for the purposes of providing documentation and offering a mechanism through which hospitals, businesses, and other entities will have the opportunity to recognize these relationships. Councilman Smith said the Registry would be in City Hall. Using Chapel Hill as a model, domestic partners from anywhere are able to register through their city process. This same Registry would be used to register those City employees who would be applying for same sex domestic partner benefits.

Mayor Bellamy felt the Register of Deeds Office seems like the more logical place for this Registry as it is the location of all the vital records impacting our community. In addition, the Register of Deeds Office has several employees to handle the additional workload, whereas, we have one and will have to add one.

City Attorney Oast said it's his understanding of what can be recorded in the Clerk of Court's Office or the Register of Deeds Office is regulated to a large degree, or perhaps entirely, by state law. He would ask the County and let Council know.

(4) Endorsing and supporting the rights of same-sex couples to share fully and equally in the familial rights and responsibilities of civil marriage. Councilman Smith said that we as a city cannot offer marriage, but this is an acknowledgement that same sex couples should be afforded those rights. This resolution states that City Council endorses the capability of same sex couples to execute the responsibilities and believe they should be afforded those rights. This is the most we can offer today. This is a way to tell everyone in our

community that we stand together with them towards a broader equality.

When Mayor Bellamy asked if this is an endorsement of same sex marriage, Councilman Smith said that it is saying that same sex couples are capable of exercising the responsibilities of civil marriage and that we as a Council endorse them being able to marry.

Councilman Bothwell pointed out that the City's budget is balanced every year. He also said that his is an ordained minister and when he marries couples, he is clear in his counseling and in his ceremony that the only reason government cares about marriage at all is property.

Councilman Davis felt that it is common sense that we don't discriminate. That should not be tolerated. Regarding the anti-bullying ordinance, he was concerned about our enforcement abilities along with the lack of definition. He voted against the domestic partner health insurance package because he did not know the financial implications. With the domestic partner insurance being implemented, there will need to be a Registry with a fee attached. Regarding the fourth request, City Council does not have the ability to offer civil marriages, so when you take religion and government out of the issue, then you are talking about rights for people. He felt that people should be treated equal and he will support the resolution for that reason.

Vice-Mayor Newman felt that what we are doing is part of a larger effort to create equality in our country. He is proud that our country took the step last year to repeal the "Don't Ask, Don't Tell" legislation that prevented gay men and women from serving in our armed forces and protecting the country that they love. The steps we are taking tonight will make a difference to people's lives in Asheville in practical ways. He believed that ultimately the goal in terms of these equality issues is that if there are two adults who decide they want to commit their lives to one another that they will be able to get married and the government will not be able to stand in their way. The steps we are taking tonight will at least say for the elected officials from Asheville, North Carolina, that is what we believe is the direction we should be going in. We don't have the legal authority to make it happen, but we want to raise our voice in support of doing everything that is within our power to go in that direction.

Councilwoman Manheimer was proud to vote on something that brings more equality and justice to this issue.

Because of the importance of this issue, Mayor Bellamy asked that prior to City Council voting on this resolution that staff be allowed to bring back language that is clear to all parties in our community on just what we are enacting. She said the resolution could be placed on the March 8 agenda.

Vice-Mayor Newman supported the City enacting an anti-bullying ordinance, but he agreed with Mayor Bellamy that the language in the policy is important.

Councilman Bothwell felt that the resolution is the intent to create an anti-bullying ordinance and item 4 could be constructed as a legislative instruction.

Mayor Bellamy said that this policy is significant and it will create fear in the minds of some people because it's not clear. Since we are making policy it needs to be clear. She recalled some incidents of being ignored because the individual made the assumption about her feelings about people who are gay, lesbian, transgender, etc. based upon some comments from the dais. She has never had a malicious thought toward gay, homosexuals, queers, transgenders, lesbians, etc. in our community. Because she did not vote for the domestic partner benefits she was demonized. In 2010 she was threatened and told to go back to Africa. Asheville, North Carolina, is her hometown where she grew up and graduated from a local high school. So, to say discrimination is going to go away because City Council adopts this resolution

is not true. She is not against people having equal rights. She knows what it's like to be discriminated against. If we keep rushing to get policy passed, just because we have the votes, then we continue to divide our community. It would behoove us to have leaders who unite not divide. Although she supports the rights of individuals, it is unfortunate that she can't say that she doesn't agree in same sex marriage and not be condemned. Her belief is that marriage is between a man and a woman. But, she also believes that all North Carolinians should have a right to vote on the issue. She didn't believe the Registry should be located in City government. That is not what we do. If we believe something should be done, it should be done right. If we are going to recognize individuals who are in a committed relationship, then the documents should be held in the right place in our government that recognizes those forms. She could not say, with a clear conscious, that she wouldn't want the significant other of her lesbian cousin at her death bed. She believed individuals who are about to die should have the right to have whomever they want at their bedside or to leave their money to whoever they want to leave it to. But she can't say that she supports gay marriage. If we are saying that in the resolution, she would have to vote against it. The first three issues (with some modifications) she could support. The fourth issue, if stated by Councilman Smith, is endorsing gay marriage, she could not support that. We need to be clear on how we define bullying, where it applies, how it is enforced and the penalties. She represents, whether people like her or not, all citizens of Asheville. Again, she asked for staff to have time to flesh this out so it is clear on what we are and are not approving.

Councilman Smith sees the resolution as providing broad policy direction. If an anti-bullying ordinance comes back to Council and it looks to threaten free speech, he would be the first to send it back to staff. The intent of the anti-bullying ordinance is to diminish fear and increase safety.

Vice-Mayor Newman asked for a friendly amendment in item 2 to read "Ask City staff to research policies related to protecting public safety related to bullying activities." Councilman Smith and Councilman Bothwell accepted the friendly amendment.

Vice-Mayor Newman said that in terms of item 3 regarding the Domestic Partner registry, he agreed that it would be logical to have the Registry at the Register of Deeds office. However, that is not something under City Council's control. If we think it is the right thing to have in the community, then the City Clerk's Office is the only place we can do it. That is the only option for us.

When Mayor Bellamy asked if Councilman Smith would not honor her request to give staff two weeks to flesh out the resolution, Councilman Smith said that with no disrespect, he hoped that the friendly amendment regarding the anti-bullying ordinance will give Council clarity. The other items seem to be straightforward in the staff report from Mr. Richardson.

Councilman Smith called the question.

The amended motion made by Councilman Smith and seconded by Councilman Bothwell and carried on a 5-1 vote, with Mayor Bellamy voting "no".

RESOLUTION BOOK NO. 33 – PAGE 351

VII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Gillian Kerns was proud that Council did what they said when they ran for Council.

Mr. Alan Ditmore spoke about methods to stop climate change.

VIII. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:53 p.m.

Magdalen Bourdeson
